BARNARD COLLEGE

This catalogue is intended for the guidance of persons applying for or considering application for admission to Barnard and for the guidance of Barnard students and faculty for the 2019-20 academic year. The College reserves the right to make changes to this catalogue from time to time, without notice. This catalogue is not intended to be and should not be regarded as a contract between Barnard College and any student or other person.

In accordance with its own values and with Federal, State, and City statutes and regulations, Barnard does not discriminate in admissions, employment, programs, or services on the basis of race, creed, national origin, sexual orientation, or disability.

During the 2019-2020 Academic Year, Barnard College temporarily revised some of its academic policies in response to two unprecedented events, the tragic loss of first-year student Tessa Majors in December 2019 and the global COVID-19 pandemic in Spring 2020.

Fall 2019

In the days following the death of Tessa Majors, Barnard temporarily adjusted its end-of-term academic procedures. The College’s guidelines regarding incomplete and deferred work were altered for the Fall 2019 semester to meet the varied needs of the student community in a time of mourning.

Deferred Exam Policy

In Fall 2019, students who wished to defer their final exams as well as any students absent at the time of their final exams were granted deferrals without penalty or fee. Likewise, students who were unable to complete written work or other final projects received a temporary grade of “incomplete.” Students were informed that the “incomplete” or “deferred” designation would be permanently replaced by the final course grade once their exam or final coursework was completed.

Faculty were given latitude to make alternative arrangements to end-of-semester work, including changes to final work assignments and extending due-dates.

In late January 2020, Fall 2019 deferred exams were self-scheduled by students according to their preference. Those who receive testing accommodations through Barnard's Center for Accessibility Resources & Disability Services (CARDS) scheduled their deferred exams with CARDS. All students were asked to sign an additional pledge supplementing the traditional Barnard Honor Code, committing students to confidentiality and expressly prohibiting the sharing of exam information.

Spring 2020

In response to the circumstances created by the COVID-19 pandemic, Barnard College has moved to virtual classes starting Wednesday, March 11, 2020, through the end of the Spring 2020 semester, in line with Columbia University. Barnard College has temporarily revised the following academic policies for the remainder of the Spring 2020 semester.

Pass/Fail Policy

Spring 2020 has been mandated a Pass/Fail semester – i.e., all final grades for Spring 2020 will be either “pass” or “fail.” As the community adjusts to these new grading procedures, the College maintains its dedication to engaging students in thoughtful, rigorous learning. Faculty will continue to guide and measure the work of their students, providing feedback on all course requirements and helping students progress in their understanding, application, and mastery of course material. Given the great uncertainty about obstacles to academic study and instruction that students and faculty may be facing, faculty are encouraged to consult with their departments and programs to consider what a grade of “pass” or “fail” looks like in the current circumstances, and to communicate this with their students.

Faculty are encouraged to keep their own detailed records of student work, performance, and participation for the purposes of future letters of recommendation. However, faculty are advised against assigning official letter grades for any student work completed since the disruption of the semester. Faculty are also encouraged to continue to help students in their efforts to gain mastery of course material with critical and timely assessment.

If faculty are concerned that a student in one of their classes may be unlikely to earn a “pass” as a final grade, they should submit an Early Warning form to the Registrar, X (absence from final examination), or IX (incomplete coursework as well as absence from final examination).

It should be noted that the Spring 2020 Pass/Fail policy is not an extension of Barnard’s usual Pass/D/Fail policy and that all faculty should be evaluating students with either a pass or fail grade, not a letter grade. A Pass grade in Spring 2020 will allow a course to satisfy both major and minor requirements, as well as General Education Requirements. For reasons of equity, no student will be able to uncover a grade at the end of the semester. Students who had previously elected Pass/D/Fail for a class in the Spring 2020 semester will have that election removed, so that it does not count against their total possible P/D/F elections.

Barnard, in partnership with Columbia University, is committed to ensuring that the Spring 2020 Pass/Fail policy does not disadvantage
any student applying to graduate school, professional school, or competitive work opportunities.

The end of the academic year remains the same. No additional teaching days will be added to the academic calendar. The last day to withdraw from a course has been changed from March 26 to April 2, 2020. See the academic calendar and deadlines. (https://barnard.edu/academic-calendar/)

Guidance to Faculty for Providing Equitable Remote Learning

Many students are working asynchronously and coping with a range of challenging circumstances, and are studying at a physical distance from their instructors and from one another.

In order to facilitate equitable access to course material, faculty have been advised to record all their lectures in Zoom. These lectures may be shared by the faculty with those students who, for reasons of time or place, cannot join classes at the scheduled meeting time. Faculty may also adjust the times of their courses at their discretion and according to the needs of their students.

Students are reminded that the Barnard Honor Code includes relevant language for the proper use of electronic class material: “We consider academic integrity to include the proper use and care for all print, electronic, or other academic resources.” Recorded class content is the intellectual property of the professor and attending students, and should not be distributed outside of class.

The Barnard Center for Engaged Pedagogy (CEP) can help faculty develop alternative assignments and group work. If you would like to consult with them, please write to pedagogy@barnard.edu.

Faculty are expected to be aware of any accommodations their students may have and plan accordingly. CARDS has created guidance for faculty regarding providing accommodations remotely. If a faculty member has specific questions about how to implement accommodations in their courses, CARDS is available for individual consultation at cards@barnard.edu.

End-of-Term Assignments

Especially given the events of this semester, end-of-term assignments can provide students with a sense of completion in their learning this term, which can be achieved by many means.

The challenges of administering final examinations asynchronously are not inconsiderable, and faculty may wish to consider an adjustment to their originally planned assessment formats (e.g., final papers, oral exams, open-book or open-note exams, etc.). Flexibility and creativity are encouraged, and faculty may consult their colleagues as well as their own students about how best to deliver the final assignment. They are also encouraged to create opportunities for students to study together for final assignments and to design assignments that promote teamwork and collaboration whenever possible.

For many courses, final examinations will remain the preferred end-of-term assignment. All final examinations for the spring 2020 semester will be administered online.

Academic integrity in end-of-term assignments is of the utmost importance. Both students and faculty have communicated a desire to foreground the heightened significance of academic integrity in Spring 2020, emphasizing the values that bind us as an academic community.

All faculty should seek ways to engage their classes in supporting the highest standards of academic integrity at this moment.

BLAIS Personal Librarians, the CEP, and the Columbia Center for Teaching and Learning are available to assist and will have additional guidance.

Senior Theses

All Barnard seniors complete a required senior project. The senior project allows students to develop records of individual research that include theoretical engagement in the major discipline, the development of creative projects or research, and original empirical and interpretive analysis. The form of the senior requirement varies across majors, but the most common forms are the senior thesis (one or two semesters), supervised original research in a lab, a final creative project, and/or research that has been completed within a dedicated senior seminar.

Grading: The senior project is usually assigned a letter grade. For projects completed in the Spring 2020 semester, we recommend that faculty assign no letter grade, but instead provide an alternative evaluation of the work.

Awarding of Distinction: In Spring 2020, there will be no awarding of Pass with Distinction. Faculty advisors are encouraged to speak to particularly exceptional and distinguished work in their letters of recommendation.

Full-Year Thesis Work: Spring work will receive either a Pass or Fail grade. Some departments require thesis work to span both the fall and spring semesters. Where appropriate, faculty should assign a letter grade for fall semester work. Faculty supervising year-long theses should inform their students of the letter grade pertaining to their fall semester work by April 15. Students will have the option to accept either a Fall semester letter grade and a spring semester Pass/Fail, or a grade of Pass/Fail in each of the fall and spring semesters that reflects their year-long thesis work. Final Fall semester grades -- whether P/F or letter grade -- should be submitted by May 1. As per college policy, Fall semester theses that received the grade of Y for full-year thesis work will not be included in the calculation for departmental honors or Phi Beta Kappa.

Thesis Presentations: For all departments that require thesis presentations, accommodations should be made to allow for the remote presentation of work. We understand that this may require significant alterations to the usual format of these symposia.

Honors, Awards, and Prizes

The following guidance was offered to faculty to maintain the College’s commitment to honoring seniors for exceptionally distinguished work.

GPA Calculations: Spring 2020 passing grades will be excluded from GPA calculations (major and cumulative). A failing grade will impact these calculations, however.

Dean’s List: There will be no Dean’s List for the Spring 2020 semester.

Latin Honors: Spring 2020 passing grades will be excluded from Latin honors calculations. A failing grade will impact these calculations, however.

Departmental Honors: Departmental honors are awarded for distinguished work in the major to no more than 20% of graduates, as nominated by their major departments, and conferred by the Committee.
on Honors. Departmental honors display on student transcripts but not diplomas. Standard college and department procedures will govern the selection of recipients for departmental honors. For May 2020 graduates, department honors will be decided based on major GPAs through Fall 2020 and any additional consideration departments would normally use in determining such awards.

**Academic Prizes and Awards**: Standard college and department procedures will govern the selection of recipients for academic prizes and awards.

**Phi Beta Kappa**: Phi Beta Kappa decisions will not be impacted by the move to Pass/Fail. In keeping with usual college practice, Phi Beta Kappa calculations will be based on work completed through the fall semester of a student's senior year. The national Phi Beta Kappa Society has confirmed that students can be elected to Phi Beta Kappa even in the absence of an in-person induction ceremony.

### Additional Notes and Resources

Barnard’s Center for Engaged Pedagogy (CEP) and Instructional Media and Technology Services (IMATS) have partnered on training materials and other assistance for both students and faculty. See Virtual Class Resources and Instruction ([https://alert.barnard.edu/virtual-class-resources-instructions/](https://alert.barnard.edu/virtual-class-resources-instructions/)) for details.

All formally scheduled campus visit programs, including campus tours, information sessions, special group tours and class visits, are suspended until further notice. In the meantime, we invite prospective students to view our website ([https://barnard.edu/](https://barnard.edu/)), follow us on Instagram ([https://www.instagram.com/barnardadmissions/?hl=en/](https://www.instagram.com/barnardadmissions/?hl=en/)), and explore our Barnard videos and student bloggers on YouTube ([https://www.youtube.com/channel/UCk_-X1schHnyklUVF7_-4w/](https://www.youtube.com/channel/UCk_-X1schHnyklUVF7_-4w/)). Only limited services and access to certain buildings are available on campus at this time. All events and gatherings are cancelled for spring semester 2020.

MESSAGE FROM THE PRESIDENT

Welcome to Barnard!

I can imagine no better place to be than Barnard College. Here, you will be able to immerse yourself in an education that prompts you to explore the world from a variety of different perspectives and through the lenses of multiple disciplines. From this foundation, you can begin to shape your own educational journey – one that I promise will last a lifetime. I have no doubt that your years at Barnard will give you the tools necessary to pursue your passions with knowledge, confidence, and humanity.

In the pages that follow, you will discover what makes this College such a singular institution – with excellence across the arts and sciences, our world-class faculty of scholars dedicated to teaching, and the vast resources of Columbia University and New York City to draw from. You will find courses in literature and the arts, in anthropology and politics, in languages and mathematics, in psychology, neuroscience, and physics. You will find lectures taught by world-renowned professors as well as intimate seminars where faculty share their latest research and ideas. You will find classes in subjects that you have been wanting to study for years, and others that may never have crossed your mind.

There are hundreds of options waiting for you – now you simply need to choose. It can be hard to know where to start, and how best to plot a course that will satisfy your intellect and your imagination. So don’t rush. Take time to discover the possibilities. And feel free to take a risk. Choose a course that may lead somewhere new. Take at least one class in a subject that unnerves you, and others that seem tailor-made. Because Barnard truly is the best of all worlds for students and faculty who care about the fundamental disciplines that enhance our abilities as thinkers and doers.

Revel in the options before you, and please enjoy the process.

Sian Leah Beilock
President
THE COLLEGE

Barnard College has been a distinguished leader in higher education for women for over 100 years and is today the most sought after private liberal arts college for women in the nation. Founded in 1889, the College was the first in New York City, and one of the few in the nation at the time, where women could receive the same rigorous liberal arts education available to men. Its partnership with a great research university, combined with its setting in an international city and its unwavering dedication to the advancement of women, makes Barnard unique among liberal arts colleges today.

Barnard is both an independently incorporated educational institution and an official college of Columbia University—a position that simultaneously affords it self-determination and a rich, value-enhancing partnership. Barnard students may take classes at Columbia and benefit from the University’s academic resources, as Columbia students may do at Barnard.

New York City and its vast cultural and social resources are also an extension of the Barnard campus, literally used by every department to enhance curriculum and learning. The City is an inescapable presence, inviting students with both its challenges and infinite opportunities (from dancing with the American Ballet to working with social-change organizations to interning on Wall Street).

The College draws motivated, talented, curious young women who create a stimulating atmosphere and diverse community. Barnard alumnae include pioneers like anthropologist Margaret Mead and Judith Kaye, the first female Chief Judge of the State of New York, along with prominent cultural figures such as choreographer Twyla Tharp, writers Zora Neale Hurston and Mary Gordon, and Pulitzer Prize-winning journalists Anna Quindlen and Natalie Angier.

Mission Statement

Barnard College aims to provide the highest quality liberal arts education to promising and high-achieving young women, offering the unparalleled advantages of an outstanding residential college in partnership with a major research university. With a dedicated faculty of scholars distinguished in their respective fields, Barnard is a community of accessible teachers and engaged students who participate together in intellectual risk-taking and discovery. Barnard students develop the intellectual resources to take advantage of opportunities as new fields, new ideas, and new technologies emerge. They graduate prepared to lead lives that are professionally satisfying and successful, personally fulfilling, and enriched by love of learning.

As a college for women, Barnard embraces its responsibility to address issues of gender in all of their complexity and urgency, and to help students achieve the personal strength that will enable them to meet the challenges they will encounter throughout their lives. Located in the cosmopolitan urban environment of New York City, and committed to diversity in its student body, faculty and staff, Barnard prepares its graduates to flourish in different cultural surroundings in an increasingly inter-connected world.

The Barnard community thrives on high expectations. By setting rigorous academic standards and giving students the support they need to meet those standards, Barnard enables them to discover their own capabilities. Living and learning in this unique environment, Barnard students become agile, resilient, responsible, and creative, prepared to lead and serve their society.

Barnard History

Barnard College was among the pioneers in the late 19th-century crusade to make higher education available to young women.

The College grew out of the idea, first proposed by Columbia University’s tenth president, Frederick A.P. Barnard, that women have an opportunity for higher education at Columbia. Initially ignored, the idea led to the creation of a “Collegiate Course for Women.” Although highly-qualified women were authorized to follow a prescribed course of study leading ultimately to Columbia University degrees, no provision was made for where and how they were to pursue their studies. It was six years before Columbia’s trustees agreed to the establishment of a college for women. A provisional charter was secured, and Barnard College was named in honor of its most persistent advocate.

In October 1889, the first Barnard class met in a rented brownstone at 343 Madison Avenue. Fourteen students enrolled in the School of Arts and twenty-two “specials,” lacking the entrance requirements in Greek, enrolled in science. There was a faculty of six.

Nine years later Barnard moved to its present site in Morningside Heights. In 1900, Barnard was included in the educational system of Columbia University with provisions unique among women’s colleges: it was governed by its own Trustees, Faculty, and Dean, and was responsible for its own endowment and facilities, while sharing instruction, the library, and the degree of the University.

Barnard Today

From the original 14 students, enrollment has grown to about 2,600, with over 40,000 awarded degrees since 1893. The integration of teaching and scholarship occurs at an incomparable level at Barnard. Barnard’s faculty of 255 women and men are teacher-scholars whose paramount concern is the education of undergraduate students and whose professional achievements bring added vitality to the classroom. This commitment to personal attention and high achievement provide the ultimate learning environment.

Barnard’s liberal arts education is broad in scope and demanding. The curriculum (http://barnard.edu/academics/departments/) includes a series of general education requirements—a program of courses the faculty believes provides a stimulating and thorough education, while remaining flexible and varied enough to suit a student’s own interests, strengths, and talents. Classes vary in size. Those in which student participation is important are small. There are opportunities for independent study and students are often invited to work on research projects with faculty members.

In 2007, Barnard College and Columbia University amended and extended the longstanding agreement for cooperation between the institutions, an agreement which remains unique in higher education. Barnard stands as an independent college for women with its own curriculum, faculty, admissions standards, graduation requirements, trustees, endowment, and physical plant. At the same time, Barnard and Columbia share resources, thereby giving students open access to the courses, facilities, and libraries of both schools. Barnard and Columbia students also share in a wide variety of social and extracurricular activities. Barnard boasts 80 undergraduate clubs, and students have access to an additional 140 at Columbia.
From its inception, Barnard has been committed to advancing the academic, personal, and professional success of women. Students benefit from an atmosphere in which over half of the full-time faculty (p. 489) are women, and women are well represented in the administration (p. 498). The College is led by Sian Beilock, former Stella M. Rowley Professor of Psychology, Vice Provost for Academic Initiatives, and Executive Vice Provost and Officer of the University of Chicago. At Barnard, women are given the opportunities and the freedom to lead both in and out of the classroom, and to develop the skills that will equip them to lead throughout their lives.

Barnard’s unique ties to several of Columbia’s graduate schools and to premier New York City institutions, including the Juilliard School, the Manhattan School of Music, the Jewish Theological Seminary of America, and Teachers College, give students an unusual range of educational options, including a number of joint degree programs. Academic organizations within and beyond the University also offer vital opportunities for research, study, studio experience, internships, and community service.

Barnard has a high student retention rate, an indication of student satisfaction with the college experience. Barnard students also enjoy leaves for study, travel, and internships. By senior year, about three-quarters of students have undertaken an internship and/or pursued funded summer research across academic institutions, corporations, nonprofit organizations, government agencies, and in the arts. Every year Barnard admits about 80 transfer students who come to take advantage of the educational opportunities available to Barnard women.

Every year, Beyond Barnard (https://barnard.edu/beyond-barnard/) collects and summarizes information about post-graduate student and employment. Within the first six months after graduation, 93% of Barnard graduates in the Class of 2018 were working or enrolled in graduate or professional schools. Full reports are available at Beyond Barnard’s website.

Accreditation

Barnard College is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools (http://www.msche.org/), 3624 Market Street, Philadelphia, PA 19104, 215-662-5606. The Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Commission on Recognition of Postsecondary Accreditation.

The Barnard Education Program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP) and approved by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (Grades 1-6) or Adolescent Education (Grades 7-12).

For more information, please visit https://education.barnard.edu/certification (http://education.barnard.edu/certification/).

The Campus

The Barnard campus occupies four acres of urban property along the west side of Broadway between 116th and 120th Streets. At the southern end of the campus, four residence buildings, Brooks Hall (1907), Hewitt Hall (1925), Helen Reid Hall (1961), and Iphigene Ochs Sulzberger Hall (1988), form an enclosed quadrangle known as the "Quad." Barnard Hall (1917) is just north of the "Quad" and contains seminar rooms, classrooms, and faculty offices, and dance studios. The Sulzberger Parlor on the third floor is used for meetings and special events. The Julius S. Held Lecture Hall is also on the third floor.

Just north of Barnard Hall is the newly constructed Cheryl and Philip Milstein Center for Teaching and Learning, opened in September 2018. Designed by the award-winning firm Skidmore, Owings & Merrill, the 128,000-square-foot building—with a base of five floors and a tower of eleven floors adjacent to Altschul Hall—is a distinctive place that convenes students and faculty, facilitates collaboration, and fosters dialogue. It includes a new kind of library, one that brings together current technologies and learning spaces in an interactive setting. Furthermore, it is a dynamic academic hub of the campus, linking departments and disciplines both physically and philosophically.

Further to the north, Helen Goodhart Altschul Hall (1969) and the Diana Center (2010) face each other across an open plaza. The 14 stories of Altschul Hall are devoted to the sciences. Herbert H. Lehman Auditorium is on the first floor. The Diana Center was designed by the renowned architecture firm Weiss/Manfredi and is the student center for the campus.

Milbank Hall (1897) occupies the furthest northern end of the campus and houses administrative and faculty offices, classrooms, the Arthur Ross Greenhouse, and the Minor Latham Playhouse, a well-equipped modern theater.

In 2003, the College’s four oldest buildings—Brooks Hall, Hewitt Hall, Barnard Hall, and Milbank Hall, were added to the National Register of Historic Places.

In the immediate neighborhood, Barnard maintains additional residence halls, including Plimpton Hall, acquired in 1968, Eleanor Thomas Elliott Hall, formerly 49 Claremont Avenue, acquired in 1982 and renamed in 1992, and Cathedral Gardens, constructed by Barnard in 2006. In addition, three apartment buildings on West 116th Street, 600 (acquired in 1971), 616 (acquired in 1964), and 620 (acquired in 1968) are Barnard residence halls. The College also rents additional spaces at 601 West 110th Street.

Columbia University is directly across the street on Broadway.

Admissions

Barnard students change the world and how we view it. They are bold, thoughtful, analytical, intrepid and ambitious. They love to learn and make connections from the classroom to the world around them. The admissions team seeks candidates such as these to fill our first-year and transfer classes. While admission is highly selective, our process is holistic and contextual; no one criterion or score determines acceptance. In addition to school records, recommendations, writing, and test scores, we carefully consider each applicant in terms of their personal qualities, intellectual potential, the rigor of the curriculum they pursued, as well as their potential for achievement at Barnard. We review each applicant in the context of her school, community, and individual story.

Barnard seeks students from diverse educational and cultural backgrounds and from all geographic regions. However, no preconceived profile of an ideal student population limits the number of applicants accepted from any one group. The College admits students and administers its financial aid and loan programs, educational policies and programs, recreational programs, and other College
programs and activities without regard to race, color, creed, national origin, sexual orientation, or disability.

First-Year Application Procedures

First-year applicants are welcome to apply through the Early Decision round by November 1st or Regular Decision round by January 1st. Barnard accepts the Common Application (https://www.commonapp.org/). It requires an additional Barnard supplement. A non-refundable fee of $75 must accompany the application. Students may also submit payment directly through the Common Application website. Checks or money orders must be in U.S. funds drawn on a U.S. bank and made payable to Barnard College. Students with significant financial hardship can request a fee-waiver through the common application, NACAC, SAT, ACT or from their high school counselor on school letterhead and submit it with the application.

Another important part of the application is the submission of three recommendations, one from the high school counselor and two from academic teachers. Students should submit teacher recommendations from 11th or 12th grades in english, math, science, social sciences, or foreign language courses. These recommendations give the Admissions Committee additional information about the candidate's interests, character, skills, and contributions to the classroom.

Secondary School Preparation

Each candidate for admission must offer a college preparatory program from an accredited secondary school or an equivalent education representing a four-year course of study. Academic preparation for admission should be based on the requirements for the A.B., or liberal arts, degree. Our most competitive applicants have taken four years of each of the five core subject areas: English, math, science, foreign language, and social science, during their high school years. There are certainly no guarantees that a student with this kind of curriculum will be admitted to Barnard, and similarly no guarantees that a student who doesn’t take this broad curriculum won’t be admitted to Barnard. Students should discuss all their options with their guidance counselor to ensure they making rigorous choices within the context of their curriculum and course offerings. A secondary school diploma or equivalent is a requirement for enrollment at the College.

First-Year Entrance Tests

Barnard requires all candidates to take the SAT or the ACT. The writing portion of the exams is not required or evaluated in our review. In addition, Barnard does not require or evaluate SAT II Subject Tests. We recommend that students take these standardized tests in the spring of their junior year or fall of their senior year prior to the application deadline date to ensure the scores are received for review.

It is the student’s responsibility to direct the College Board or ACT Program to send official test scores to the Office of Admissions. The SAT tests code number for Barnard is 2038. The ACT code number for Barnard is 2718.

In addition to SAT/ACT requirements, students whose primary language is not English or who have not studied at a secondary school for four or more years where the primary language of instruction is English should submit scores from the Test of English as a Foreign Language (TOEFL) (http://www.ets.org/toefl/), the International English Language Testing System (IELTS) (http://www.ielts.org/ test_takers_information.aspx) or the Duolingo English Test (https://englishtest.duolingo.com/applicants/).

Another important part of the application is the submission of three recommendations, one from the high school counselor and two from academic teachers. Students should submit teacher recommendations from 11th or 12th grades in english, math, science, social sciences, or foreign language courses. These recommendations give the Admissions Committee additional information about the candidate’s interests, character, skills, and aptitude.

Interviews

Although not required, first year applicants may choose to interview. For students who are able to visit the campus, an interview can be arranged by visiting our website. Appointments are scheduled Monday through Friday from 9:30 A.M. to 4:00 P.M., and on selected weekends throughout the Fall, from June to mid-December. Applicants who are unable to visit the College may request an interview with a local Barnard Alumnae Admissions Representative (BAAR) via our website (https://barnard.edu/admissions/how-to-apply/). Interviews are not offered to transfer applicants.

Early Decision

Well-qualified high school seniors who have selected Barnard as their first-choice college may apply under a binding Early Decision plan. To be considered under Early Decision, a candidate must submit her application and other required credentials (listed under First-Year Application Procedures) to Admissions by November 1. The Admissions Committee’s decision is sent in mid-December. A student may initiate regular applications to other colleges; however, they must withdraw all other applications upon admission to Barnard. Notification of financial aid for those candidates who have demonstrated financial need will follow the admissions decision. To reserve a place in the first-year class, an accepted student must submit a nonrefundable enrollment deposit by the enrollment deadline (typically three weeks after acceptance). This deposit is applied toward tuition and fees for the first year. If a student is denied in the Early Decision round, this is the final decision for the year. Students are welcome to apply next year as a transfer student.

The Admissions Committee may choose to defer an Early Decision application to the Regular Decision Round and send a final decision in late March. In that event, the student is asked to submit final grades from the first half of the senior year.

Deferred Enrollment

Admitted students who wish to defer enrollment in Barnard for up to one year must obtain permission by writing to the Dean of Admissions, explaining the reasons for the deferral request. Such a request is normally granted for purposes of work, travel, or pursuit of a special interest. Students are not allowed to matriculate at another institution during that year and should relinquish their space on any wait lists for other institutions. Written deferral requests must be received by February 1 for students admitted Early Decision and April 25 for students admitted Regular Decision. Transfer students and students admitted from a waiting list are not permitted to defer admission. Deferral requests do not factor into evaluations or committee decisions. Students can only defer for up to one year.
International Students

We broadly define international students to be 1) a citizen of a country other than the United States who has been educated abroad; 2) a U.S. citizen educated abroad; or 3) a Foreign National educated in the U.S. International applicants follow the same application procedure and presenting the same credentials, or the regional equivalent, as domestic candidates. Please submit materials as described under the Application Requirements for First-Years (https://barnard.edu/admissions/first-year-applicants/) or Transfers (https://barnard.edu/admissions/transferandvisiting/) (no separate International Student application is required). In some cases, additional credentials may be required, as described below.

All students are required to submit official results from either the SAT OR results from the ACT. In addition to SAT/ACT requirements, students whose primary language is not English or who have not studied at a secondary school for four or more years where the primary language of instruction is English should submit scores from the Test of English as a Foreign Language (TOEFL) (http://www.ets.org/toefl/), the International English Language Testing System (IELTS) (http://www.ielts.org/test_takers_information.aspx) or the Duolingo English Test (https://englishtest.duolingo.com/applicants/).

VISP: The Visiting International Students Program

The Visiting International Students Program (https://barnard.edu/international-student-services/) (VISP) brings students from across the globe to Barnard for one spring semester in residence at our campus in New York City. Through a limited number of collaborative relationships with international universities, our partners send cohorts of 3-15 undergraduate students to Barnard to spend the spring semester as full-time visiting students. VISP students are fully integrated into the Barnard College academic and co-curricular community, gaining a broad understanding of how liberal arts institutions in the United States function, exploring the American model of undergraduate education, and studying and researching with Barnard and Columbia University’s world-class faculty, while also contributing to the internationalization of the student body.

Transfer Students

Barnard welcomes transfer students in the fall and spring term of each year. Applications for admission will be reviewed according to the following schedule:

<table>
<thead>
<tr>
<th>Deadline</th>
<th>Notification</th>
<th>Enroll</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 15</td>
<td>mid-May</td>
<td>Fall</td>
</tr>
<tr>
<td>November 1</td>
<td>December 1</td>
<td>Spring</td>
</tr>
</tbody>
</table>

Each candidate must submit the Common Application for Transfer Admission or the Coalition for College Transfer application and the following credentials: the Barnard Supplement for Transfer Students; an official secondary school transcript; the results of the SAT or ACT; and, if appropriate, the TOEFL/IELTS/Duolingo Language Exams; the official transcripts of all college work and a copy of the college catalogue in which the courses taken are clearly marked. Two recommendations are also required: one each from a college faculty member and a college dean or adviser. Transfer applicants may also submit a recommendation from the high school counselor (optional). The most successful transfer students have both high school and college transcripts with strong outcomes in a rigorous liberal arts curriculum. Courses completed at other accredited colleges and universities, which are similar in content and depth to Barnard courses, may be submitted for transfer credit. Credit for approved work at another institution is applied to Barnard’s 121-point graduation requirement for transfers with a maximum of 16 points per term. Credit cannot be granted for courses with grades lower than C-. Acceptable transfer work does not usually include applied or professional courses or more than the equivalent of two Barnard studio courses.

Pre-evaluations of transfer credit are not conducted by the College. However, admitted transfer students will receive a transfer credit evaluation with their letter of admission indicating transferable credits and satisfied Foundations requirements. At this time, we do not grant transfer credit for distance learning courses. Students are advised to compare and contrast the course descriptions at their institution(s) against Barnard’s online course catalogue to gain a sense of possible credit transfer outcomes. Generally, if courses taken at another institution are in alignment with courses offered at Barnard, credit is likely to be awarded but not guaranteed. Barnard College reserves the right to accept or decline transfer of credits based on its specific academic expectations.

After acceptance, academic and general guidance is provided by the advisers to transfer students in the Dean of Studies Office. For information on financial aid, students should consult with Financial Aid (http://barnard.edu/finaid/).

Visiting Students

Undergraduate students who are degree candidates at other colleges may apply for admission as visiting students for one or two semesters. Students must submit the same credentials as transfer applicants, with the exception of standardized test scores and course descriptions.

Other Degree Credit

The following policies apply to students entering Barnard in Fall 2019 and later:

Advanced Placement exams: Students who earned an upper-level score on an AP exam may receive college credit. (For the specific scores required, please click the link below for your entering class year.) Incoming students should have ETS send their official scores to the Barnard Registrar’s Office.

International Baccalaureate diploma: Students who earned an International Baccalaureate diploma may receive credit for the number of points indicated on the diploma, up to the maximum credit limit for their entering class year. For students who did not complete the full IB diploma, credit may be granted for individual Higher Level scores only. (No credit for Subsidiary Level.) Incoming students should have their official diploma or exam scores sent to the Barnard Registrar’s Office by the examiner of record.

Select National Examinations and Diplomas: Students who complete the French Baccalaureate, the German Abitur or the Italian Maturità may receive college credit, up to the maximum AP/IB credit limit for their entering class year. We may grant similar credit for the Israeli Bagrut. Each GCE A-level or AS-level grade is individually evaluated for college credit. No credit is given for O-level or AS-level examinations.
Credit for other national exams or diplomas will be evaluated for college credit on a case-by-case basis.

**Prior to Barnard Credit:** Students who have satisfactorily completed college courses before entering Barnard as first-year students may apply for a maximum of 15 points of degree credit. ([https://barnard.edu/transfer-credits/](https://barnard.edu/transfer-credits/)) The courses must be intended primarily for college students and taught at the college by members of its faculty and must be in excess of the courses required for the high school diploma. With the exception of Advanced Placement courses overseen by the College Board and International Baccalaureate work, courses taught in high school (whether by specially trained high school teachers or college instructors) will not be credited towards the Barnard degree.

**Resumed Education**

Former Barnard students who wish to return to the College after an absence of five years or more in order to complete their degree may obtain information from the Dean of the College. They can return to campus on a part-time or full-time basis to complete their remaining credits or requirements and earn their degree.
FINANCIAL INFORMATION

The costs of education at Barnard are met by tuition, income from endowment, current gifts from alumnae and other friends of the College, and grants from foundations, corporations, and government agencies. The College makes every effort to limit the charges to students, but must reserve the right to set tuition and fees at the level necessary for the maintenance of a high quality of instruction. For more information please see the Bursar’s website (http://barnard.edu/bursar/).
Financial Aid

Insofar as possible, Barnard assists qualified students who demonstrate financial need. Barnard does not discriminate against applicants for financial aid on the basis of race, color, creed, national origin, or disability.

Financial aid (http://barnard.edu/finaid/) from the College consists of grants, loans, and opportunities for part-time employment. In addition to providing financial aid from its own funds, i.e., gifts, endowment, and general income, Barnard participates in the following federal programs: the Federal Pell Grant Program, the Federal Supplemental Educational Opportunity Grant Program, the Federal Direct Student Loan Program, and the Federal College Work Study Program. Barnard also participates in the New York State Higher Education Opportunity Program (HEOP). Federal and state funds are administered by the College in accordance with government regulations and the College’s general policies relating to financial aid. To supplement the above-mentioned financial aid sources, students are urged to investigate state loan and scholarship/tuition assistance programs and college tuition financing plans. The Bursar’s Office (http://barnard.edu/bursar/) has additional information and applications for payment plans.

A detailed explanation of current College policies and awarding practices may be found on the Financial Aid website (http://barnard.edu/finaid/).
ACADEMIC POLICIES & PROCEDURES

Academic policies and procedures are determined by the faculty and implemented by the Office of the Registrar. For complete information, visit the Registrar's website (http://barnard.edu/registrar/).

Enrollment Confirmation

Enrollment Confirmation for New and Continuing Students

Instructions for Enrollment Confirmation are distributed to students and available online (https://barnard.edu/registeringforclasses/).

Students are expected to confirm enrollment online during the times published in the College Calendar (https://barnard.edu/academic-calendar/). Permission to confirm enrollment may be refused to students who do not observe the deadline. Those students who have permission to confirm enrollment late will be assessed additional fees, as posted at the Office of the Registrar.

Any outstanding debts to the College or University, including library fines, must be paid before the student may confirm enrollment.

In a separate online process, registration for classes must be completed by the deadline published in the College Calendar. All students are expected to register full-time.

Enrollment Confirmation for Resumed Education Students

Resumed Education students are those Barnard students who have been away from the College for five years or more and are returning to complete the A.B. degree requirements and those Barnard graduates who are returning to the College to take additional, post-baccalaureate course work. Resumed Education students are subject to regular procedures and deadlines for confirming enrollment and registering for classes.

Registration (formerly known as Program Filing)

Each student is required to register for classes online, with the approval of her adviser, by the specified deadlines in September, November, January, and April.

Beginning with the Fall 2019 semester, students can take a maximum of 19 credits each semester. Students may add four additional credits (up to 23 total) during early registration and the shopping period, but the adviser must grant approval for the student to remain above 19 credits permanently. As a reminder, all students must be registered for a full-time course load, with a minimum of 12 credits per semester.

There is no refund issued for courses dropped after the registration deadline, or for fees attached to courses dropped after the deadline, and any part-time registration filed after that date will be assessed full tuition.

Note: the deadline for registration for classes is separate from, and somewhat later than, the Enrollment Confirmation deadline (see College Calendar (https://barnard.edu/academic-calendar/)). Late registrations will be assessed additional fees, which will be posted at the Office of the Registrar. A student who neglects to register for classes is subject to academic probation.

Enrolling in Columbia University Courses

Many courses offered in other divisions of the University are open to qualified Barnard students; those cross-listed in the Barnard Catalogue do not normally need special approval; no undergraduate courses listed in the Columbia College bulletin need special approval unless so indicated in the course description. Other courses not cross-listed in the Barnard Catalogue may require divisional or instructor’s approval in addition to the approval of the student’s academic adviser. Columbia University courses are entered on the student’s Barnard schedule; specific instructions are distributed. The student is expected to have reviewed the course description and prerequisites before consulting an adviser, to determine for herself whether she is eligible to enroll.

Permission is needed to take a course at Teachers College. Students should obtain an application from the Office of the Registrar, obtain course approval from the Dean of Studies, and return the completed form to the Office of the Registrar. TC courses require the payment of additional tuition at the Teachers College rate over and above Barnard tuition.

Adjustment of Fees and Refunds for Changing Registration

If a student changes her registered classes and the tuition called for is lower than the amount she has already paid, she will be refunded the excess only if the alteration is made by September 13 (last day of registration) in the autumn term and by January 31 in the spring term. If the new registration calls for higher tuition, the student is responsible for paying the additional charges promptly.

Schedule of Classes and Room Assignments

Class times and room numbers are published in the online Directory of Classes (http://www.columbia.edu/cu/bulletin/uwb/home.html), which is updated every night. Students needing wheelchair-accessible classrooms should register with the Center for Accessibility Resources & Disability Services (https://barnard.edu/disabilityservices/) (CARDS) as soon as possible prior to the beginning of the term to make them aware of this need.

Courses with Limited Enrollment

Enrollment in certain Barnard and Columbia courses is strictly limited and students must follow specified procedures to secure places in these courses.

Adding Courses

Courses may not be added after the registration deadline. Up to that deadline, the student may add courses online. Adding a course requires
the online approval, or the signature on an Add form, of the student’s adviser.

**Dropping Courses**

Courses may be dropped by submission of an Application to Drop a Course, available at the Office of the Registrar. The form requires the written approval of the student’s adviser and must be returned to the Office of the Registrar before the deadline published in the College Calendar (https://barnard.edu/academic-calendar/). Courses dropped by the deadline will not be recorded on the permanent transcript. If withdrawal from a course is approved after the deadline to drop and by the deadline to withdraw, the course will be recorded on the permanent transcript with the notation W (Withdrawal). Action on any course which meets for less than the full semester must be taken before the last class meeting. No adjustment of fees (including any laboratory fees) is made for any course dropped after the registration deadline. A student may not drop below 12 points without the approval of her class dean or Office of Disability Services.

**Attendance**

Students are expected to attend classes regularly. Frequent or prolonged absences from classes may cause a student to forfeit the right to complete coursework or to take final examinations.

**Policy on Religious Holidays**

It is the policy of Barnard College to respect its members’ religious beliefs. In compliance with New York State law, each student who is absent from school because of her religious beliefs will be given an equivalent opportunity to register for classes or make up any examination, study, or work requirements that she may have missed because of such absence on any particular day or days. No student will be penalized for absence due to religious beliefs, and alternative means will be sought for satisfying the academic requirements involved.

Those responsible for scheduling of academic activities or essential services are expected to avoid conflict with religious holidays as much as possible. If a suitable arrangement cannot be worked out between the student and the instructor involved, they should consult the appropriate dean. If an additional appeal is needed, it may be taken to the Provost.

**Credit for Summer Study**

The granting of course credit for summer courses taken at other accredited institutions (including Columbia) is treated as transfer credit and is subject to some additional regulations. The maximum number of summer points that can be applied toward the degree for course credit is 16, subject to the approval of the Committee on Programs and Academic Standing. Although a student may not receive degree credit for summer courses exceeding this maximum, she may fulfill degree requirements with additional summer courses, subject to the approval of the Committee, and in some cases, subject to satisfactory performance on a Barnard placement examination. The full regulations on credit for summer study are available at the Office of the Registrar and on the Registrar’s website on the Application for Approval of Summer Session Courses. The student may learn in advance whether the courses she wishes to take in summer school meet the approval of the Committee by completing the form and submitting it to the Office of the Registrar well before the end of the spring term. Although the application may also be retroactive, the student places herself at risk of being denied degree credit if she fails to receive prior written approval from the Committee. The student is advised to consult the application for the full regulations, some of which are listed below:

1. No more than eight points may be counted for no more than two courses taken in one five- or six-week summer session.
2. To be eligible for credit, a course normally must meet for at least five weeks and at least 35 hours.
3. Grades for courses taken in summer school must be letter grades of C– or higher; they are not included in the Barnard grade point average, but they will be included in the calculation for Latin honors if the student’s Barnard GPA meets the threshold for honors. These courses and grades will, however, be considered by graduate or professional schools, which normally require the submission of an applicant’s transcripts from all the colleges attended.

A fee is charged by Barnard to transfer summer credits from the other institution.

**Length of Residence**

Students are expected to be registered full-time (12 points minimum) for four years. Transfer students must complete at least 60 points and two years full-time in residence at Barnard to receive the degree (see below for additional information). Under certain conditions, it is possible for a senior to complete her work for the degree while registered in absentia, with the permission of the Senior Class Dean.

**Classification of Students**

Students are classified as follows:

**Matriculated**

First-Year (fewer than 24 points)
Sophomore (24-51 points)
(\textit{Note: A student who enters as a first-year remains a first-year for the full academic year, regardless of points earned})
Junior (52-85 points and a declared major)
Senior (86 or more points)
Unclassified (transfer students who have not yet been assigned credit)

**Non-matriculated**

Other college degree candidates (visiting students)
Barnard alumnae auditing courses
Barnard alumnae taking courses for credit
Any other student who is not a degree candidate
A degree candidate (i.e., a student who is matriculated) is expected to be enrolled for at least 12 points each term and may not change her status to non-matriculated.

**Confirming Graduation Status**

Students must officially notify the Registrar that they expect to have completed all requirements for the degree and to receive the diploma on a particular graduation date. Specific instructions and deadlines will be available through the Registrar. Degrees are granted in May, October, and February. Graduation ceremonies are held in May.

**Leaves and Returns**

There may be many reasons why students take time off from College. Some reasons are personal, others health-related. Some students are required to leave because of a disciplinary infraction or because of a lack of satisfactory academic progress. Whatever the reason, Barnard’s goal for students is to succeed and graduate, and so the College hopes
that students going on leave will return and successfully complete their degrees. To that end, the College Case Manager in the Dean of the College division works with students going on any type of leave of absence. Students who wish to take a voluntary leave of absence, for personal or health-related reasons, should make an appointment with the College Case Manager in the Dean of the College division to discuss the process of leaving and returning.

Students who are required to take a leave of absence from the College should also work closely with their Class Dean and advisers. There may be conditions for their return, depending on the reasons why they were required to leave. Again, the goal is a return to the College and a return to good standing, and so students should work with the Class Dean and with the College Case Manager to ensure that they understand what they need to work on before proving their readiness to resume ordinary college activities.

Academic reasons why students are required to take a leave include the following:

- Students who do not maintain a minimum GPA of 2.0 in two consecutive semesters, or students who do not complete the requisite number of credits to make satisfactory academic progress for two consecutive semesters, will be asked to leave for either one semester or one year. These students will be required to meet certain conditions and who readiness to return and resume ordinary college activity, specifically related to their academic progress.

- Students who have violated the Honor Code on more than one occasion may be asked to leave the College for a stipulated period of time. Very severe or multiple violations of the Honor Code can result in expulsion, which is a permanent separation from the College (these are rare).

Nonacademic reasons why students may take a leave of absence:

- Students who have a sudden or ongoing medical or mental-health related condition may elect to take a leave of absence, in consultation with their health care providers and health care providers on campus as well.

Family emergencies may necessitate a leave of absence.

- Students who wish to pursue a personal or professional experience or opportunity, such as an internship or travel opportunity, may wish to take a personal leave.

- Any personal leaves of absence should be determined with all necessary advisers, to ensure the student is aware of how a leave from the College will affect academic progress, credits, major, and anticipated date of graduation.

Returns:

Students seeking to return from any type of leave (whether required or voluntary) submit a request to return packet to the College Case Manager. The request to return includes a form (the request to return form), a letter outlining the student’s plan for continued academic success, a $100 processing fee, and proof of readiness to return. This may include transcripts for courses taken, letters of employment, or clearance from medical personnel and the student’s care team. This packet is considered by the Deans Evaluation Committee, which makes recommendations for return.

Exceptions to College Regulations

Requests by students for exceptions to college regulations governing the awarding of academic credit and requirements for the degree may be addressed to the Faculty Committee on Programs and Academic Standing. Students should consult their class deans for the procedure for filing petitions online. Requests that bear the appropriate approvals and comments of advisers and instructors normally receive consideration within two weeks of their submission.

Examinations

Language Placement Examinations

The foreign language requirement can be met by completing the required courses at Barnard (for individual languages see departmental curriculum statements), or, for transfer students, by having completed acceptable qualifying language courses.

Transfer Students

A transfer student who has no AP score or previous college language courses must, if she wishes to continue with a particular language, take a placement test. Transfer students who are not required to take an examination are notified of language placement along with the evaluation of their transfer credit.

First-Year Students

First-year students are placed on the basis of their CEEB or AP scores. Those with no scores who wish to continue languages studied in high school take placement examinations. The Class Dean advises all new first-year students on their language requirements.

Summer School Language Courses

Students, other than incoming transfer or first-year students, who take summer language courses and wish to use them to satisfy or determine placement in their continuing language studies may be required to secure departmental approval to receive degree credit and continue at a higher level.

A student who does not wish to continue with a language in which she has been placed may begin the study of a new language.

Please consult the individual language department for information about Language Placement Examinations and results.

Other Departmental Placement Examinations

Students may obtain placement in certain courses by means of departmental placement examinations (for example, in the Mathematics and Physics departments). Information and applications for the examinations are available in departmental offices, and deadlines are particular to each department.

Make-Up Examinations During the Term

Instructors are not required to give make-up examinations to students absent from previously announced tests during the term. An instructor who is willing to give a make-up test may request a report of illness or acceptable evidence of other extenuating circumstances from the appropriate class dean in the Dean of Studies Office.
Final Examinations

No class meetings will be held on required reading days as set forth in the College Calendar. The dates for final examinations, given at the end of each term, are published in the College Calendar. Exact times and room numbers for individual examinations are posted on the website of the Office of the Registrar at least four weeks in advance of final examinations.

Barnard examinations are given under the Honor Code, which states that a student should not ask for, give, or receive help in examinations, nor should she use papers or books in a manner not authorized by the instructor. She should not present work that is not entirely her own except in such a way as may be approved by the instructor. Under the Honor Code, faculty members are expected to report any violation to the Dean of Studies.

A student who wishes to leave the room before the end of the examination period will submit her blue books to the instructor. If a student becomes ill during the course of the examination, she must notify the instructor and go to the College Physician, Brooks Hall, Lower Level. If less than an hour has expired, a grade of X will be recorded on the transcript and she will take a deferred examination. If a student remains for more than one hour of a three-hour examination or more than 40 minutes of a two-hour examination, she will be graded on the work she has completed, with the uncompleted work scored as 0.

Deferred Final Examinations

Deferred final examinations, given in September and January (see College Calendar), are permitted only for those students who were absent from the regular examinations for reasons of illness or emergency and who have received authorization from their instructors and the Dean of Studies Office.

Requests for absence from final exams for reasons of health or other emergencies must be reported to the instructor and to the Dean of Studies Office in person or by telephone on the day of the examination.

Examinations missed in December are to be taken the following January or, in cases of prolonged illness, in September of the same year. Those missed in May are to be taken in September of the same year. If a student absents herself without a compelling and valid excuse from a final or deferred examination, she will receive a grade of zero for that examination.

Applications for deferred examinations are filed with the Office of the Registrar. A payment of a $10 handling fee for each examination must accompany the application.

Examinations for Students with Disabilities

Individual arrangements can be made for disabled students unable to take examinations in the usual manner. Disabled students are normally expected to take their exams with the rest of the class, with disability-related modifications as needed. Students with disabilities who require nonstandard administration should consult with their instructors and the Director for Disability Services about reasonable accommodations. Students should obtain copies of the Test Accommodations Form in Room 008 Milbank and return them at the beginning of each semester.

Grading & Academic Honors

Grading System

Academic standing and eligibility for graduation are determined by both the number of courses completed and the grades achieved. The system used at Barnard is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Excellent</td>
</tr>
<tr>
<td>A</td>
<td>Good</td>
</tr>
<tr>

<td>B+</td>
<td>Unsatisfactory but passing</td>
</tr>
<tr>
<td>B</td>
<td>Failure</td>
</tr>
<tr>
<td>B-</td>
<td>Passed without a specific grade on student’s election of P/D/F option</td>
</tr>
<tr>
<td>C+</td>
<td>Passed in a course for which only a grade of P or F is allowed</td>
</tr>
<tr>
<td>C</td>
<td>Incomplete</td>
</tr>
<tr>
<td>X</td>
<td>Absence from final examination</td>
</tr>
<tr>
<td>Y</td>
<td>For the first half of a two-semester course in which the grade for the second semester is the grade for the entire course</td>
</tr>
<tr>
<td>W</td>
<td>Approved withdrawal after “drop” deadline</td>
</tr>
<tr>
<td>UW</td>
<td>Withdrawal from a course without official notification to Registrar</td>
</tr>
</tbody>
</table>

Pass/Fail grades are recorded for all students in certain courses, e.g., physical education. Pass/Fail grades for individual students are subject to regulations described below.

In the computation of grade point averages, marks for courses are awarded on the following scale:

<table>
<thead>
<tr>
<th>Letter</th>
<th>Grade</th>
<th>Grade Point</th>

</tbody>
</table>

In order to be recommended for the degree, a student must maintain a cumulative average of 2.0 (C) for 122 (121 for transfer students) or more points completed with passing grades. At the end of each term all records are examined. Normally only those students who have completed 12 points with cumulative averages of 2.0 or above are permitted to remain in college. Students whose work falls below the cumulative average of 2.0 may be permitted to continue at Barnard with probationary conditions at the discretion of the Committee on Programs and Academic Standing.

Courses in which the student receives the grade of D may not be counted toward the major requirement or the minor option. Courses graded D that are retaken for a higher grade will not receive degree
credit when repeated. Both enrollments and grades appear on the transcript.

**Pass/D/Fail Option**

A student may elect the Pass/D/Fail option by submitting a Request for Pass/D/Fail online, via myBarnard, before the absolutely firm deadline published in the College Calendar. Under the Pass/D/Fail option the student is held responsible for fulfilling all course requirements. A grade of D or F is not converted. A student cannot elect the Pass/D/Fail option after the deadline and cannot revoke it after the deadline, but a student can request that a P grade be uncovered (see below). The complete rules and instructions are available on myBarnard and on the Registrar’s Office website (https://barnard.edu/grades-exams/).

Some courses record Pass/Fail grades for all students enrolled, e.g., Physical Education classes. Of the 122 points required for the degree, a maximum of 23 points of course work may receive a grade of Pass. Mandated grades of P* (e.g., for Physical Education) are not included in the 23-point total; students may elect the Pass/D/Fail option in 23 points over and above mandated P grades. (For transfers, the maximum is 22 points.) The P/D/F option cannot be elected for First-Year English or First-Year Seminar or any course designated to count toward the major or the minor.

No limitation is placed on the number of Pass grades that may be recorded in a single term, except those rules that apply to Dean’s List, to eligibility for financial aid, and to the overall 23-point maximum.

Grades of P are not included in the grade point average. Grades of D or F, whether or not received under the Pass/D/Fail option, are computed. If the total number of points excluded from calculation in the grade point average exceeds 34, a sliding scale requiring higher qualifying averages is used to determine eligibility for general honors at graduation. (Like courses graded Pass, points credited for AP and baccalaureates are not calculated in the Barnard grade point average.)

The request for a course to be graded under the Pass/D/Fail option is irreversible. No request will be honored after the deadline. No request filed before the deadline can be reversed after the deadline. However, students may uncover their grades in any course that they initially elect to take P/D/F; they must request the uncovering no later than the registration deadline of the semester following the one in which the P/D/F course was taken (i.e., the second Friday of the following semester). Caveats: Graduating seniors cannot uncover P/D/F grades in their final semester. (If a graduating senior elected P/D/F in a course that is required for the major, the Registrar’s Office will uncover the grade the month before graduation, but the student cannot uncover any P/D/F grades for her final semester.) The 23-point cap is a cap on points the student elected to take P/D/F. Even if a student has chosen to uncover grades for some of those points, the student still cannot elect P/D/F in more than 23 points (or 22 for transfers). For 10 of them, she can elect only 8 more points P/D/F, even though she has only 5 grades of P on her record. Note: The uncovering policy takes effect in Fall 2016, for courses elected P/D/F in that semester. It is not retroactive to earlier semesters.

**Incomplete**

A student may, for compelling reasons, request from her instructor an Incomplete by means of written approval on forms available at the Office of the Registrar. The deadline for filing the Application for Incomplete is the last day of the reading period. However, in a course without a final examination, the deadline is the day before the final paper is due if that date precedes the last day of the reading period.

There are two Incomplete options. The “Early Incomplete” option requires submission of unfinished work to the Registrar and instructor soon after the end of the term by the date designated in the College Calendar and results in the removal of the “I” notation from the transcript. The second option extends the deadline to the first day of classes for the next Autumn term, but the “I” notation remains on the permanent transcript and is joined by the final letter grade. The full regulations that apply to Incompletes are listed on the Application for Incomplete form available at the Office of the Registrar. A student must have the permission of her instructor to qualify for an Incomplete, and she is required to use the form, which is a written guarantee of the terms set forth in it by the instructor.

**Transcripts**

Students can view their grades and unofficial transcripts in the myBarnard portal. Following graduation, a student copy of the transcript is sent to each student at their home address (an unofficial transcript for which there is no charge).

All copies of official transcripts are sent only at the request of the student in compliance with FERPA, and are subject to the $7 fee and five business day turnaround time. Transcripts can be sent by FedEx or Express Mail for an additional fee. Transcripts can be sent in paper or secure pdf format. Students and alumnae can request transcripts here (https://tsorder.studentclearinghouse.org/school/ficcode/00270800/). Barnard cannot send copies of transcripts from other schools that the student attended; they must be requested directly from the other institution.

**Dean’s List**

Effective fall 2013: To be eligible for Dean’s List, a student must be enrolled at Barnard, on Morningside Heights (or on a Columbia program abroad) and complete at least 12 letter-graded points with a minimum grade point average of 3.60 for the term. (P-graded points are excluded.) The grade point average will be based on all letter grades in the A to F range.

Prior to fall 2013: To be eligible for Dean’s List, a student must be enrolled at Barnard for both terms and complete at least 12 letter-graded points each term of an academic year with a minimum grade point average of 3.4 for the academic year. (P-graded points are excluded.) The grade point average will be based on all letter grades in the A to F range.

**College Honors**

The Faculty awards honors to students who complete work for the degree with distinction (cum laude), with high distinction (magna cum laude), and with highest distinction (summa cum laude). Students whose records include study at other institutions (transfer, summer school, study leave) will be eligible for Latin honors if both the overall and the Barnard grade point average meet the designated requirements. If the total number of points for courses graded P and P*, and for transfer grades that do not have Barnard equivalents, exceeds 34 of the 122 points for the degree (121 for students who enter as transfers), the qualifying averages are computed on a sliding scale.

The values determining Latin Honors will change each year.
A student with a final cumulative grade point average matching or exceeding the cutoff average for the top 5% of graduates of the last three years will be awarded the degree summa cum laude.

A student with a final cumulative grade point average matching or exceeding the cutoff average for the top 10% of graduates (and below the cutoff average for the top 5% of graduates) of the last three years will be awarded the degree magna cum laude.

A student with a final cumulative grade point average matching or exceeding the cutoff average for the top 20% of graduates (and below the cutoff average for the top 10% of graduates) of the last three years will be awarded the degree cum laude.

The averages for these three groups of graduates in the three academic years 2016-2017 through 2018-2019 were, in descending order, 3.97, 3.88, and 3.74. Accordingly, these minimum values govern the awarding of the corresponding honors in 2019-2020. Latin honors appear on both the transcript and the diploma.

Departmental honors are awarded for distinguished work in the major to no more than 20% of graduates, as nominated by their major departments, and conferred by the Committee on Honors. Departmental honors display on student transcripts but not diplomas.

Phi Beta Kappa
The Barnard section of the Columbia University chapter of Phi Beta Kappa was founded in 1901. Election to the national honor society is a recognition of scholarship, and Barnard students of exceptionally high standing are eligible. Junior election requires a minimum of 86 completed points, and senior election, 102. Students do not apply for membership; they are elected by Barnard faculty members who are themselves members of Phi Beta Kappa.

Eligibility for Student Government Offices
To be a candidate for election to a student government office, a student must be in good academic standing and free of disciplinary action for at least one year.

Eligibility for Intercollegiate Athletics
Any student at Barnard College, Columbia College, the Fu Foundation School of Engineering and Applied Science, or the School of General Studies who is pursuing the undergraduate program or a combined program toward a first degree is eligible for intercollegiate athletics, provided that certain conditions are met. To be eligible for athletic activities, a student must:

- be a candidate for a bachelor’s degree;
- be registered for at least 12 points of credit per semester;
- be in satisfactory academic standing;
- have passed by the beginning of the academic year 24 points if in the second year, 52 points if in the third year, or 86 points if in the fourth year;
- have attended the University for not more than eight terms;
- not have completed the requirements for a bachelor’s degree.

An eligibility form must be filed with the Department of Intercollegiate Athletics, which consults with the Registrar to determine eligibility.

Academic Advising
Barnard’s model of shared advising, where faculty and administrators advise pre-major students, is one of the hallmarks of the Barnard experience. Although the responsibility of knowing the degree requirements rests with each student, advisers offer support, guidance, and a sounding board for students, helping them set goals and priorities, select courses, and understand the curriculum. Class Deans in the Dean of the College division also offer support, especially if students encounter issues or have concerns that might extend beyond the classroom.

Class Deans and Advisers
Prior to matriculation, each entering first-year student will receive A Guide to Your First Year at Barnard from the First-Year Class Dean. The student selects courses for the autumn term.

Students can enroll in their First-Year Experience courses over the summer, and the formal finalization of courses happens in the fall, during the Orientation and the first two weeks of class. Assistance in planning courses of study is given to first-year students and sophomores by their academic advisers with whom students are expected to schedule appointments for individual advising throughout the year.

By the second semester of sophomore year, each student chooses a major field in consultation with the Sophomore Class Dean, an adviser, and the academic department. From then on, the major adviser guides advanced study for the major.

Students are responsible for completing all degree requirements and completing 122 credits (121 credits) in order to graduate. Students who have completed the requisite number of credits and all of their Foundations and major requirements are expected to graduate.

Transfer Students
Incoming transfer students are assisted by the transfer advisers and the Transfer Advising Dean in planning their courses of study and selecting majors. Advising sessions are scheduled in the summer and during Orientation, and individual appointments may be arranged throughout the academic year. Transfer students who enter with junior class standing are guided by both transfer and major advisers during their first Barnard semester.

International Students
The Office of International Student Services supports all international students from the moment they have been accepted up through graduation and beyond. In addition to providing advising support, the Office provides programming for international students, as well as all information and support pertaining to visas, I-20s, and other travel matters.

Study Leaves
Students who wish to study abroad for credit toward the Barnard degree are urged to discuss their plans and to apply for approval from the Associate Provost early in the year prior to the period of enrollment at the other institution.
Honor Code
The Honor Code, instituted at Barnard in 1912, governs all aspects of academic life and is enforced by an Honor Board that has a membership of students and faculty members, advised by the Dean of Studies Office. The Judicial Council of undergraduates, faculty, and administrators recommends disciplinary action for non-academic offenses and acts on appeals of academic disciplinary sanctions determined by the Honor Board. A more complete explanation of the system may be found online.

Each student who registers at Barnard agrees to maintain the Honor Code:

Approved by the student body in 1912 and updated in 2016, the Code states:

We, the students of Barnard College, resolve to uphold the honor of the College by engaging with integrity in all of our academic pursuits. We affirm that academic integrity is the honorable creation and presentation of our own work. We acknowledge that it is our responsibility to seek clarification of proper forms of collaboration and use of academic resources in all assignments or exams. We consider academic integrity to include the proper use and care for all print, electronic, or other academic resources. We will respect the rights of others to engage in pursuit of learning in order to uphold our commitment to honor. We pledge to do all that is in our power to create a spirit of honesty and honor for its own sake.

Graduate School Advising, Combined Plan Programs, 4+1
For students interested in study beyond the undergraduate level, or for students interested in pursuing a 4+1 program with Columbia in Engineering, Public Health, School for International and Public Affairs, or other programs, should consult with Beyond Barnard and with appropriate faculty advisers.

For students interested in medical school or any other training for the health professions (vet, nursing, pharmacy, etc.), they should consult the Health Professions Adviser at Beyond Barnard. Students interested in law school should also consult with Beyond Barnard.

For students pursuing medical school, there are many courses they should be taking at Barnard to develop the core competencies necessary to success on the MCAT and in medical school. To that end, students should work with their academic advisers to plan on taking a full year of Biology, a full year of Chemistry (following Barnard's entire Chem sequence, OR Columbia's, but not both), a full year of Physics, requisite Calculus courses, one semester of Biochemistry, as well as one Psychology course, two writing-intensive courses in a humanities field (preferably English), and other coursework as well. For details, direct students to Beyond Barnard.

Honors
The following awards, administered according to the provisions of their respective donors, were established to honor students who have shown exceptional distinction in their studies. Students do not apply for these awards; rather, recipients are selected by appropriate Faculty departments and committees.

Fellowships
Alpha Zeta Club Graduate Scholarship (1936)
For graduating seniors who show promise of distinction or to outstanding recent Barnard graduates who are candidates for higher degrees.

Student Life & Services

Barnard Student Life engages students in community and educational opportunities outside of the formal classroom through multiple programs and activities. The Office of Student Life works to foster a sense of collective responsibility and ownership for our campus community, and to support students in exploring all that New York City has to offer. The office provides and helps students plan campus-wide programs, events, and activities to foster a sense of connection amongst students, faculty, and staff, including history and heritage months, orientation for new students, performances in the Glicker-Milstein Theatre, self-care programs, and managing the illustrious career of Barnard's mascot, Millie the Dancing Bear. The Office offers:

• Opportunities for identity exploration and leadership development through the Barnard BLUE (Building Leadership and Understanding Equity) series, leadership retreats, dialogues, student clubs and organizations, and working in Student Life as office assistants, programming interns, and the NSOP committee.

• Support and guidance for student clubs and organizations, including the Student Government Association, the Governing Board at Barnard, the McIntosh Activities Council, and the over 80 student clubs recognized by GBB. We engage in holistic advising to recognize the complex and multifaceted lives of students.
• Accessible means for Barnard students to experience New York City through discounted tickets to NYC events (for sale in the Barnard Store) and free trips through the Urban NY lottery.

Campus Organizations
The Student Leadership Collective (SLC) comprises the Barnard Student Government Association (SGA), the Governing Board at Barnard, and the McIntosh Activities Council (McAC). The SLC was created to recognize the distinct and important roles and responsibilities of each organization on campus. SGA are elected officers who represent students’ concerns; GBB governs student clubs and supports student leaders, and McAC plans campus events for the Barnard community. The Student Leadership Collective Office is located in the Diana Center Anna Quindlen Room (inside Liz’s Place, Diana Center 1st Floor).

• The Student Government Association of Barnard College (SGA) aims to facilitate the expression of opinions on matters affecting the Barnard community through active communication between students, administration and faculty. With various forums for collaboration, such as committees and weekly Representative Council meetings, SGA strives to promote open dialogue and action that will enhance student life at Barnard College. All Barnard College students, by virtue of having paid student activities fees, are members of the SGA.

• The Governing Board at Barnard (GBB) upholds the values of Barnard College by promoting the personal and intellectual development of students as leaders. We hold GBB clubs and their members to the high expectations of Barnard College: rigorous standards, self-awareness, holistic learning, and social accountability. Reflective of the Barnard mission statement, GBB believes that participation and leadership in student clubs will empower students “to achieve the personal strength that will enable them to meet the challenges they will encounter throughout their lives.” We strive to provide a strong sense of community and dedication to student life on Barnard’s campus.

• The McIntosh Activities Council (McAC) is Barnard’s programming board and plans some of annual campus traditions including Big Sub, Midnight Breakfast, the Emily Gregory Dinner, Founder’s Day, and Spirit Week! Each committee (Community, Action, Network, Sub, Midnight Breakfast, the Emily Gregory Dinner, Founder’s Day, and Spirit Week! Each committee (Community, Action, Network, Wellness, and Mosaic) plan other great events throughout the year.

Sports and Athletics
The Columbia University/Barnard College Athletic Consortium (Division I of the NCAA) sponsors 16 women’s varsity teams, including archery, basketball, cross country, fencing, field hockey, golf, lacrosse, soccer, softball, squash, swimming and diving, tennis, indoor and outdoor track and field, volleyball and rowing. The Athletic Consortium is just one of three in the nation and the only one on a Division I level. Students at Barnard College along with women enrolled at the undergraduate divisions of Columbia University have the opportunity to compete on all university-wide teams. Scheduled competition includes the Ivy League, the metropolitan area, the Eastern region, and national tournaments. Individuals and teams have the opportunity to advance to regional and national competition within the ECAC and NCAA.

Honor Board and Honor Code
The Honor Code, instituted at Barnard in 1912, governs all aspects of academic life and is enforced by an Honor Board that has a membership of students and faculty members, advised by the Dean of Studies Office. The Judicial Council of undergraduates, faculty, and administrators recommends disciplinary action for non-academic offenses and acts on appeals of academic disciplinary sanctions determined by the Honor Board. A more complete explanation of the system may be found online.

Each student who registers at Barnard agrees to maintain the Honor Code.

Approved by the student body in 1912 and updated in 2016, the Code states:

We, the students of Barnard College, resolve to uphold the honor of the College by engaging with integrity in all of our academic pursuits. We affirm that academic integrity is the honorable creation and presentation of our own work. We acknowledge that it is our responsibility to seek clarification of proper forms of collaboration and use of academic resources in all assignments or exams. We consider academic integrity to include the proper use and care for all print, electronic, or other academic resources. We will respect the rights of others to engage in pursuit of learning in order to uphold our commitment to honor. We pledge to do all that is in our power to create a spirit of honesty and honor for its own sake.

Enrollment in the College, award of academic credit, and conferral of the degree are subject to disciplinary powers vested by the Barnard Board of Trustees in appropriate officers of instruction, administration, and in College committees.

Residential Life
Barnard maintains a diversified residential program. Residential options include traditional corridor-style and apartment-style rooms in College-owned or rented buildings on or near to campus. On average, the number of first-year students in College housing is 98%, while the average residency rate among upperclass students is 90%. In a cooperative exchange with Columbia College and the School of Engineering and Applied Sciences, a limited number of Barnard and Columbia upperclass students participate in a housing exchange program.

Facilities
All Barnard College owned or operated residence halls are completely smoke-free. Under the leadership of the Executive Director for Residential Life & Housing, the College provides substantial supervision of student life in the residence halls. This includes Associate Directors, graduate Hall Directors, and undergraduate Resident Assistants. The Barnard Public Safety office provides 24 hour Access Attendant coverage at the residence hall front desks and regular security guard patrols.

Brooks, Hewitt, Reid, and Sulzberger Halls, or the “Quad,” at the south end of the campus, are operated as a single complex. The first eight floors house first-year students, who are assigned to double, triple, and quad rooms. The “Tower,” floors 9 through 16 of Sulzberger Hall, house upperclass students.
A number of upperclass residence halls provide housing for students near to the campus. 600, 616, and 620 are apartment-style residence halls on 116th St. Elliott is a corridor-style hall on Claremont Ave that has a concentration of new Transfer students. Plimpton is a suite-style residence hall on Amsterdam Ave, adjacent to Columbia & Teacher’s College. Cathedrals Gardens is a suite-style residence hall on Manhattan Ave that also houses faculty members. The College also rents apartments for students in “College Residence,” located on 110th St.

**Eligibility**

Eligibility criteria have been established in order to assign available space on an equitable basis. These regulations may be changed as needed at the discretion of the College, but insofar as possible, the following criteria will determine eligibility:

- Eligibility for residence is limited to Barnard students and approved visiting students who have both completed the registration and program filing processes and have made all required payments by the payment deadlines.
- Some Columbia students may also be eligible, providing they meet the requirements for the Barnard/Columbia Housing Exchange as defined by Columbia University Undergraduate Housing.
- Students must be enrolled on a full-time basis.

**Assignments**

Returning upper-class resident students already living in College housing are eligible to take part in the Room Selection process, to select housing for the following academic year. Most students select through the Housing Lottery, but students may also apply for Pre-Lottery placements as an accommodation through the Disability Services office.

New First Year students are matched with roommates and assigned to rooms by the College based on the responses to their Housing Application. New Transfers students and students returning from a leave of absence are assigned to housing if space is available.

**Requirements**

The rules and regulations regarding payments and refunds, and the use and occupancy of rooms are in the Housing Contract, which students sign when they apply for College housing. The Housing Contract and the Residence Hall Handbook may both be reviewed via the Residential Life & Housing webpage.

**Board**

All Barnard students are required to participate in a meal plan. All first-year students residing in Barnard housing will be enrolled in the Platinum Meal Plan. Upperclass students who live on floors 2-8 of the Quad are required to enroll at minimum in the Quad Upperclass Meal Plan. All other students, including commuter students, must enroll at minimum in the Convenience Meal Plan.

Students may upgrade their required meal plan to one offering more than the minimum requirements for their housing location (Kosher options are also available). Students may change their meal plan enrollment through the fourth day of each semester (via the Meal Plan Change Form on My.Barnard.edu).

Any meals remaining on any meal plan at the end of the fall semester are forfeited. Any meal plan points remaining at the end of the fall semester may be carried over to the spring semester providing that the student remains enrolled in a Barnard meal plan during the spring semester. Any meals or meal plan points remaining at the end of the spring semester are forfeited.

**Married Students & Students with Children**

College housing is available only for enrolled Barnard students. College housing is not available for the spouses or significant others of students and/or their children.

**Financial Aid for Room and Board**

All students who live on campus will have their financial aid based on the resident student budget. A student who receives aid from the College based upon the resident budget must live in College housing billed by Barnard. It is the student’s responsibility to notify the Office of Financial Aid when she decides not to reside on campus. Students who decide to live off-campus or commute from home will have their financial aid based on the commuter student budget. All first-year students who are receiving financial aid will have a resident budget based on the cost of a multiple room and the Platinum Meal Plan. All upper class students who are receiving financial aid will have a resident budget based on the cost of a multiple room and the Upper Class Quad Meal Plan. A student who chooses to reside in a studio apartment must cover the difference between the cost of a studio apartment and double room from her own resources.

**Resident Assistants**

Residential Life & Housing employs students as Resident Assistants (RAs) throughout campus housing. RAs facilitates the social, academic, and personal adjustment of students to the residence hall and University. RAs serve as a role model, provide referrals to resources across the College, enforce the policies of Residential Life & Housing and the College, and provide social & educational programming.

**Information Services**

**Barnard College Information Technology (BCIT)**

Barnard College Information Technology (BCIT) is responsible for managing and supporting the College’s IT infrastructure. Systems include email, calendars and other tools for collaboration using gBear, Barnard’s implementation of Google Apps for Education. In addition, BCIT manages and supports campus network & internet access, database applications, and administrative systems. BCIT runs a Service Desk for faculty & staff support, a project management office (PMO) for IT-related projects, manages computer labs, and offers computing services for Barnard College students. BCIT works in partnership with the other college departments to implement and support applications like course registration and online student services as well as enterprise systems and applications for faculty and administrative departments.

**Barnard College Information Technology (BCIT) – Student Computing Services**

BCIT provides computing resources and support to all Barnard students through Student Computing Services. Student Computing Services assists students with a wide range of technological issues,
including software installation, computer security, and network configuration; supports five computer labs that are accessible to all students; and helps disseminate information about technology through special events and workshops. Student Computing Services is located in the main computer lab in the Diana Center, Room 307. Both full-time staff and student technicians (known as Academic Computing Experts or “ACEs”) are available to troubleshoot computer and printer problems, help with technology questions, and provide general computing support. For computing assistance, students may contact Student Computing Services by phone, email, or in person. The smaller labs are open 24 hours a day, 7 days a week during the academic year, and are located in the residence halls in Sulzberger, Plimpton, and 616 West 116th Street.

Other Student Services

Beyond Barnard

Beyond Barnard supports all students and alumnae as they define, pursue, and achieve success in their careers and communities. The office represents an integrated hub of services and resources in the areas of career development (including job and internship exploration and applications), student employment (including Federal Work Study, Barnard College Jobs, and other forms of on- and off-campus work), competitive national and international fellowships, and graduate and professional school. Members of the Barnard community can access Beyond Barnard from their first day on campus as students, throughout their matriculation, and for a lifetime as alumnae. Resources are available to students and alumnae, regardless of whether they intend to pursue careers in academia, corporate entities, nonprofit organizations, the arts, or government (and many others in between).

Reporting to the Dean of the College and to the Provost, Beyond Barnard’s resources are meant to complement the academic mission of the College. The initiative proceeds from the assertion that one’s major does not dictate the entire course of one’s career, and that there is too often a false dichotomy between the skills and knowledge necessary for success in the classroom, and those necessary for success in careers after graduation. To this end, Beyond Barnard emphasizes the value of transferable skills, personal and professional networks (especially with Barnard alumnae), and critical thinking about the purpose of a liberal arts education in the context of the twenty-first century.

In all of these activities, Beyond Barnard emphasizes that students and alumnae own their career trajectory, and works to empower them to define and pursue their path and their purpose. Students and alumnae can tap into Beyond Barnard resources (enumerated in more detail below) at its website, through its online portal, and on social media. Newsletters about services and resources are deployed weekly to students throughout the academic year. Additional targeted messages are deployed to students and alumnae year round.

Information about Beyond Barnard is available on its website, and questions can always be addressed to beyondbarnard@barnard.edu.

Advising and Programs

The Advising and Programs Team provides one-on-one advising, events, workshops, mentoring opportunities, and other resources that help students and alumnae explore and pursue diverse careers, fellowships, and graduate or professional school programs. Leading more than 3000 individual advising appointments in an academic year, the Advising and Programs Team can support students and alumnae in career exploration, job and internship document creation (resumes, CV’s, cover letters, etc.), applications for graduate and professional school (including Medical School and Law School, among many others), interview and negotiation best practices, networking, and the pursuit of competitive fellowships. Appointments are secured using Beyond Barnard’s online portal. Drop-in hours with full-time staff are also available. Information about how to schedule appointments or drop in for advising is available on the website.

In addition to full-time staff, the Advising and Programs Team oversees the Peer Career Advisor (PCA) program. PCA’s offer drop-in appointments for students to review job documents, discuss job and internship search strategies, review LinkedIn profiles, and more.

Central to Beyond Barnard’s philosophy on career exploration is its integration of multiple stakeholders from the Barnard community – including alumnae, faculty, parents, staff, and others – into its resources. Programs like Career Insights connect students to alumnae for conversations about industries, career skills, and diverse fields. The Beyond Barnard Mentoring Program, now in its tenth year, annually connects more than 200 students to an equal number of alumnae for in-person and virtual mentoring relationships.

Questions about the Advising and Programs Team may be directed to beyondbarnard@barnard.edu.

Experiential Education

Beyond Barnard’s Experiential Team administers part-time employment programs, and provides access to internships (including funding for unpaid internships), externships, volunteerism, and community service and civic engagement opportunities through a comprehensive online job posting site available to all currently-enrolled, full-time Barnard College students. In these opportunities, students acquire many of the transferable skills and competencies necessary to ready them for the competitive world of full-time employment in the global marketplace. Wherever possible, these opportunities align with the academic mission of the college and the intellectual and professional goals of students.

Services available at Beyond Barnard through the Experiential Education Team include assistance with securing part-time employment opportunities by way of the office’s online database of on-campus and off-campus job postings (including bartending and babysitting opportunities); as well as the Beyond Barnard Internship Program (BBIP), which offers funding for unpaid internships. Information about BBIP funding, eligibility requirements, and application processes, is available through Beyond Barnard’s website.

In addition, the Experiential Education Team oversees Civic Engagement at Barnard, fostering campus-wide conversations about civic engagement both in New York City and much farther afield. Students interested in engaging in Civic Engagement have access to practical opportunities to work and volunteer in organizations in Morningside Heights, Harlem, and throughout the City – and to tap into regular events hosted by the Experiential Education Team.

Students have access to singular support in the form of individualized employment counseling appointments with professional staff for assistance with part-time jobs matching, assistance with setting professional development goals, alignment with internship and civic engagement opportunities offered by the office, and support with resolving workplace conflicts or concerns; customized support for
special student populations, such as students with disabilities, first-generation low-income students, international students, LGBTQ+ communities, and HEOP students; and group service sessions and presentations that provide extra assistance for specialized documents completion, including internship and funding protocols, processes and applications, and payroll forms.

Questions about the Experiential Education Team may be directed to beyondbarnard@barnard.edu.

Employer Relations

Beyond Barnard's Employer Relations Team connects with a range of employers across industries to connect Barnard students and alumnae to internship and job opportunities. The team facilitates regular information sessions and programs led by visiting employers (including alumnae in recruiting and other areas of organizations), on-campus interviews for internships and full-time jobs, and an array of skills development workshops that prepare students for success in the recruiting process.

Annually, more than 150 employers visit Barnard's campus for the specific purpose of employing students. Opportunities Fairs take place twice each year (on the first Friday of each semester), connecting students to recruiters and alumnae at upwards of 75 firms, nonprofit organizations, and graduate institutions.

Questions about the Employer Relations Team may be directed to beyondbarnard@barnard.edu.

Data & Operations

Beyond Barnard tracks the graduate and professional outcomes of each graduating class and reports them each year on its website. In line with peer institutions, outcomes are reported six months after graduation. To track satisfaction and improve its resources, Beyond Barnard also collects data in the form of surveys from students. Data that Beyond Barnard collects and reports on can be found on the Beyond Barnard website.

Questions about the Data & Operations Team may be directed to beyondbarnard@barnard.edu.

Health Services

Alcohol and Substance Awareness Program

The Alcohol and Substance Awareness Program (ASAP) works with the Barnard community to provide drug and alcohol education, prevention, and intervention on campus. Its purpose is to promote the healthy development of students and to encourage students to explore their options and ultimately make choices that are positive for them as individuals.

ASAP offers individual and group counseling ASAP also offers outreach and educational programs on related topics, including: consequences of alcohol use, Barnard norms, women and alcohol, alcohol and relationships, alcohol and stress, abstinence, drug use, safe spring break and media literacy. All ASAP services are confidential and free of charge.

Disability Services

In 1978, Barnard established a program to provide services for students with disabilities, which enhance their educational, pre-professional, and personal development. The Office of Disability Services (ODS) serves students who have different types of disabilities such as mobility, visual, hearing loss, as well as students with invisible disabilities, such as learning disabilities and ADD/ADHD, chronic medical conditions, psychological disabilities, and substance abuse recovery. ODS works with other administrators and members of the faculty to assist students with disabilities in participating equally in college. Students who wish to seek accommodations at Barnard should call ODS at 212-854-4634 to self-identify a need and to register as soon as possible. ODS staff will then send you a short online application to fill out and then contact you afterwards to schedule an intake meeting. Accommodations are not granted retroactively, so it is best to register with ODS early on. Accommodation decisions are made on a case-by-case basis, according to the type of disability a student has and the recommendations of the student’s documentation. The buildings on the Barnard campus are wheelchair accessible. ODS staff can assist students with determining the best access routes on campus. ODS maintains a comprehensive webpage (https://barnard.edu/disabilityservices/), which includes important information about accessing accommodations, how to register, and policies related to accommodations.

Primary Care Health Service (PCHS)

The PCHS, nationally accredited by the Accreditation Association for Ambulatory Health Care, provides primary care and specialist referrals for all registered Barnard students. It offers a wide range of general services, with a particular emphasis on the developmental needs of college-aged women. Entering students must submit a proof of immunization as required by New York State Health Laws. All students are entitled to all services at the PCHS, regardless of the type of insurance they carry.

Staff

The clinical staff consists of full-time and part-time physicians, nurse practitioners, a nurse, a nutritionist and a health educator (shared with the Well-Woman Health Promotion Program). The PCHS collaborates with major New York medical teaching centers to provide advanced clinical training in college health to Adolescent Medicine Fellows.

After-Hour Care

At all times when the college is in session and during winter and spring break there is a Clinician-on-Call phone service nights and weekends for after-hours urgent medical advice. The PCHS closes during winter, spring, and summer breaks. During these breaks, Barnard students may use the Health Services at Columbia, for urgent care only, for a $95 per-visit fee. If students carry the school health insurance program, they will be reimbursed for the visit. If they carry their family’s insurance plan, they will need to check with their carrier about being reimbursed.

Fees

There is no per-visit charge at the PCHS, and the number of visits is unlimited. Medications are available for discounted fees from our on-site dispensary.

Health Insurance

All enrolled students at Barnard must carry health insurance while they are a student at the College. Students have two options: They can either carry the school’s insurance plan, implemented by Aetna, or waive out of the student health insurance plan with their family’s insurance plan. The waive-out period is during the summer only and must be approved. All outside insurance plans must be ACA compliant. Students should carry their insurance cards with them at all times.
For additional information about services provided and the Student Insurance Plan, students are encouraged to visit the Health Services website (https://barnard.edu/health/).

**Rape Crisis / Anti-Violence Support Center (RC/AVSC)**
The Barnard Columbia Rape Crisis / Anti-Violence Support Center (RC/AVSC) is a joint program of Barnard College and Columbia University's Sexual Violence Response (SVR), a department of CU Health Services. The RC/AVSC is staffed by a professional and graduate staff, and professional advisors from Columbia University and Barnard College.

Programs offered by the RC/AVSC include peer-counseling and advocacy for survivors and co-survivors; referrals for a variety of on- or off-campus services; and workshops which aim to educate students, administrators, and faculty about the dynamics and effects of sexual and relationship violence.

**Rosemary Furman Counseling Center**
The Rosemary Furman Counseling Center, accredited by the Accreditation Association for Ambulatory Health Care, provides short-term counseling, medication evaluations, referral services, and crisis intervention services for all registered Barnard students. They see students with a full range of problems, from adjustment issues, relationship problems, eating and substance issues, mood disorders, trauma, stress related to oppression, and other emotional/mental health concerns.

**Staff**
The clinical staff consists of psychologists, social workers, psychiatrists, and psychology and social work graduate students who are in training.

**After-Hours Care**
During the nine months of the school year, an After Hours Psychological Emergency Line provides emergency assistance on nights and weekends.

**Referrals**
Because the clinic offers only short-term treatment, all students requiring long-term psychotherapy will be assisted in finding a therapist in the city. All students on psychiatric medication will also be referred out to psychiatrists in the area.

**Mental Health Insurance**
All registered Barnard students are required to have health insurance which includes mental health benefits for in-patient and out-patient treatment. The student insurance may be waived if the family policy meets these requirements.

**Well-Woman Health Promotion**
Well-Woman promotes the health and wellness of Barnard students through peer education, educational programming, individual health behavior consultation, campus-wide health campaigns, community outreach, and advocacy. We are a resource for students to learn about their physical, sexual, mental, and spiritual health, and we work to support women’s individual self-care and the health of the community. We also educate students about how to find and use health resources at Barnard and in the community.

Well-Woman peer educators are student volunteers who are trained to present workshops and campus events on sexual health, nutrition, fitness, body image, sexually transmitted infections, contraception, stress management, sleep, healthy relationships, and communication (and more), in residence halls, to clubs and organizations, and to teens in the surrounding community. Peer educators present education sessions to students having their first-ever GYN exam, and are available to answer student questions during evening office hours.

**Student Life**
The area of Student Life embraces the educational mission of Barnard College as an independent liberal arts college for women in New York City. The Student Life team strives to engage each student in advising, programming, and community development using a student-centered approach. Our mission is to connect our community through dialogue, co-curricular experiences, and student engagement on every level. We promote active and involved citizenship through identity and leadership development and aim to educate and prepare students for success in an increasingly inter-connected global society.

The offices that make up the area of Student Life are: Diversity Initiatives, Glicker-Milstein Theatre, Leadership Development and Orientation and Activities.

**Diversity Initiatives**
The mission of Diversity Initiatives (ODI) is to promote and support a campus community that embraces its pluralistic identity. We seek to enhance the social and academic experiences of Barnard students by encouraging and empowering them to explore complex issues of social diversity.

**Glicker-Milstein Theatre**
The Glicker-Milstein Theatre functions as an artistic performance space and creative outlet that provides priority to the Barnard College Theatre Department, SGA recognized organizations as well as other academic departments. The GMT will facilitate the mission of Barnard College and Student Life by presenting enrichment opportunities through performances open to the student body and the College community. The Theatre Coordinator of Student Life is responsible for all facets of scheduling and programming in the GMT year-round. In addition, the TC is to act as advisor to all recognized student performance groups scheduled to use the GMT.

**Leadership Development**
The Leadership Development office recognizes that leadership occurs in many settings. With this in mind, the staff is dedicated to identifying, reinforcing, and cultivating the skills that Barnard students need in order to be effective leaders on campus, in New York City, and throughout the world. We seek to accomplish this through signature initiatives which include the Emerging Leaders Program, Leadership Lunches, and the F.U.E.L. workshops, as well as many programs in collaboration with other departments on campus. The office’s holistic approach embraces the potential of co-curricular leadership development which creates well-rounded students who are ready to be progressive members of society.

**Orientation and Activities**
Orientation and Activities is an office that focuses on various co-curricular aspects of Barnard College. The office coordinates both fall and spring New Student Orientation Programs that welcome and introduce first-year, transfer, visiting and international students to the College. Building community is another essential part of this area which is primarily done through programming. On and off-campus
programs are offered as ways of building relationships and gaining a sense of belonging at Barnard.

**Commuter Services**
The Student Life Office supports the cultural, educational, and social programs designed to enrich commuter life. The Skip Stop Commuter Student Organization sponsors events and services for all commuter students. The commuter lounge is located on the first floor of the Diana Center. Additionally, the Office of Residential Life provides information on off-campus living.

**Student Records and Information**
The Family Educational Rights and Privacy Act (http://www.ed.gov/policy/gen/guid/fpco/ferpa/) of 1974 (the Buckley Amendment/FERPA) stipulates that students may have access to their official files and that no transcripts may be issued without their written request. A further explanation may be found in the College Calendar and Student Handbook.

Also in accordance with the Buckley Amendment, Barnard has the right to make public, at its discretion and without prior authorization from the student, the following information: name, class; home or college address and telephone number; e-mail address; major field; date and place of birth; dates of attendance at Barnard; participation in officially recognized activities and sports; weight and height of members of athletic teams; degrees; honors and awards received; and previous school most recently attended. The law also gives students the right to place limitations on the release of this information. A student who wishes to do so must file a special form with the Registrar, 107 Milbank, each year by September 15. In practice, the College does not indiscriminately release information about individual students.

**Public Safety**
The Barnard Public Safety Department is located just opposite the Main Gate at 117th Street and Broadway, in Barnard Hall, Room 104. It is open 24 hours a day, seven days a week, including holidays. Security guards are College employees who are unarmed and do not have law enforcement status. They are, however, licensed by the State of New York as proprietary officers of the College authorized to maintain order on campus grounds.

The safety and well being of students, faculty, staff, and guests have always been of paramount importance at Barnard. Located on Morningside Heights in Manhattan, we are a community within our neighboring communities: Columbia University and New York City. Separate from them in some ways, but very much a part of them, we have many mutual interests, including that of crime prevention. For more information please visit the Barnard Public Safety website.

**Crime Statistics**
In compliance with New York State Education Law Article 129-A, crime statistics for the Barnard College campus for the last three calendar years are filed annually with the United States Department of Education (http://www.ed.gov/) and are available for review on their website (http://ope.ed.gov/security/) and on the Barnard College website. In addition, the Advisory Committee on Campus Security will provide, upon request, all campus crime statistics as reported to the United States Department of Education. Requests can be made by contacting the Director of Public Safety at 854-3362.
A Barnard education seeks to provide women with the tools and techniques needed to think critically and act effectively in the world today. It fosters a respect for learning, an aptitude for analysis, and a competence in the demanding disciplines of the liberal arts and sciences. By virtue of its special mission and location, Barnard strives to give its students insight into interconnected worlds of knowledge and experience.

Research & Scholar Services
Milstein Center for Teaching and Learning

The Milstein Center for Teaching and Learning establishes the Barnard Library at the heart of the campus, co-located with academic centers that both create research platforms and sustain robust services for students to facilitate their scholarly work. It serves as an open, accessible, and creative space to connect with and create information in a way that is engaging, fosters collaboration, and sparks new thinking. Housing 6 new Academic Centers adjacent to the Barnard Library and Instructional Media and Technology Services, it establishes a home for scholarly exploration, innovation and production by empowering the Barnard community collectively to challenge and expand methods and scholarship, mix and remix content, and create new conversations. It acts as a gateway to a whole new creative frontier of information that can lead to brand new modes of teaching, learning, and discovery.

Barnard Library & Academic Information Services

The Barnard Library and Academic Information Services unit supports excellence and innovation in teaching and learning by providing exceptional research and instructional services, and connecting the Barnard Community to extensive information resources. Located in the Milstein Center for Teaching & Learning, the unit includes the Library, Instructional Media and Technology Services, AV/Classroom Technologies and the Barnard Archives & Special Collections.

The staff of the Barnard Library Circulation and Help Desk on the 2nd floor of the Milstein Center welcome you to ask questions and learn from us how to use the Barnard and Columbia Libraries collections in all formats. The Barnard Library is the Columbia University Library specializing in Women’s, Gender, and Sexuality Studies as well as in Dance. We hold a unique collection of books in Art and Architecture that complement the Avery Library holdings. We also serve as a general undergraduate library with a thriving collection including humanities, social sciences, and texts used in courses. Our special circulating collections include the Barnard Zine Library - a collection of self-published magazines by and about women and femme-identified people with an emphasis on materials by women of color; the Barnard Alum Collection and the Barnard Black, Indigenous, and People of Color Alum Collection; the Barnard FLIP Library, a course book library collaboration with the Columbia First-Generation Low-Income Partnership; Course Reserves; and the Media Collection.

The size of our collection makes our library browseable, and we welcome you to visit the shelves. We hold more than 130,000 circulating books, zines, journals, and media in the Milstein Center on floors 2, 3, and 4. Just over 23,000 volumes reside in a retrievable storage facility; these are available for request in the shared Columbia University Libraries CLIO Catalog and will be delivered to Barnard Library for pickup. Our circulating collections in print and digital formats also support interdisciplinary work of students and faculty researching in the Barnard Archives and Special Collections and the many academic centers in the Milstein Center.

In addition, the Barnard Library operates as one of the Columbia University Libraries to contribute to and provide access to a world-class research collection. The collections include over 11 million volumes, over 150,000 journals and serials, as well as extensive electronic resources, manuscripts, rare books, microforms, maps, and graphic and audio-visual materials.

The Personal Librarian program connects each student and faculty member with a member of our research and instruction team, librarians specializing in academic disciplines across the curriculum. Incoming students are assigned to a personal librarian who will help them navigate library resources, build on their research interests, and explore new methods for research and scholarship. Personal librarians seek to understand student, faculty, and staff research needs, and provide individualized attention to the researcher through one on one consultation. As students select a major, the librarian affiliated with their field becomes a guide for the research process in advanced courses, and ultimately the senior project, thesis, or capstone. Librarians also provide instructional workshops in First Year Writing as well as foundational courses across the curriculum. They support both students and faculty in making connections from the course syllabus to the vast collections available at the Barnard Library, within the Columbia University Library system, and across the New York metropolitan area. The Personal Librarians are partners for researchers seeking to build projects that utilize the Milstein Centers, serving as a point of connection to other Milstein specialists.

The Barnard Archives and Special Collections collects and makes accessible materials that document campus and academic life at Barnard. In addition to documenting the history of the College, the mission of the Barnard Archives is pedagogical at its foundation. We provide source material to students, staff, alums, faculty, and administrators, and other members of the Barnard College and Columbia University communities, as well as to local, national, and international researchers, activists, and artists. The Barnard Archives and Special Collections also seeks to grow Special Collections that relate to histories of Feminism; Women’s, Sexuality, and Gender Studies; and Dance.

Instructional Media and Technology Services (IMATS) consists of two units: Audiovisual Technology Services (https://imats.barnard.edu/), which supports Barnard's audiovisual needs and classroom technologies; and Instructional Media Services (https://imats.barnard.edu/media-services/), which provides resources and training in media equipment, editing, and digital technology for Barnard College. Our media equipment room is located on the second floor of the Milstein Building, where a variety of equipment is available for checkout including cameras, projectors, microphones, and more. IMATS supports academic technologies at Barnard as well, including Canvas, course evaluations, the digital archives collections, website development, and consultation on implementation of new software or computing needs. IMATS uses media and technology to support scholarship and creativity at Barnard.
Academic Centers

The Milstein Center for Teaching and Learning houses a range of flexible learning spaces, including centers for empirical reasoning, digital humanities, design, media, pedagogy, and movement. In addition, the Vagelos Computational Science Center, located on the fifth floor, is an inviting space where students and faculty collaborate on pioneering research in data and computation.

DESIGN CENTER (http://design.barnard.edu/)
The Design Center (DeC) is an incubator for creative making where students will experiment with, pilot, discover, and test new tools and practices. From 3D printers and laser cutters to sewing machines and soldering irons, the range of equipment allows students to create costumes, electrical prototypes, devices to support their research projects, and much more. This center is committed to maintaining an open and accessible culture of making, and welcome all levels of skill and ability. Once trained on the equipment, members of the Barnard community can visit anytime the space is open.

DIGITAL HUMANITIES CENTER (https://digitalhumanities.barnard.edu/)
The Digital Humanities Center (DHC) is a research, teaching, and learning facility designed to foster technological approaches to the humanities to help researchers create dynamic connections between the analog and the digital. The DHC will provide students and faculty with support for a range of methods, from textual and timeline analysis to sonification and mapping. Additionally, the space will host conversations about the intersections of critical theory, technology, the humanities, and feminism, and is equipped with video conferencing technology to connect people around the globe.

EMPIRICAL REASONING CENTER (http://erc.barnard.edu/)
The Empirical Reasoning Center (ERC) helps faculty, students, and alumnae engage critically with data, both qualitative and quantitative. Now located in The Milstein Center, the ERC continues to offer advanced software for statistical, textual and spatial analysis, and data visualizations. Through course workshops and staffed drop-in hours, the ERC provides the Barnard community with empirical research support and technology training.

ELSIE K. SLOATE MEDIA CENTER (http://mediacenter.barnard.edu/)
The Sloate Media Center is a place for experimentation, research, and original content creation. With both a bookable production studio and a drop-in post-production lab, the Center allows digital media producers to access recording equipment and editing software. Additionally, it provides support for community members who are interested in incorporating media into their research and instruction.

VAGELOS COMPUTATIONAL SCIENCE CENTER (http://csc.barnard.edu/)
The Vagelos Computational Science Center (CSC) facilitates the understanding of how data technology can help find solutions to the world’s most complex problems. Students can use the CSC’s visualization wall to collaborate on code, see each other’s work, and share ideas. In addition to the high-tech computer classroom, the CSC offers a CS/Math Collaborative Space where students can work together and a lounge space for socializing and relaxing.

MOVEMENT LAB (http://movement.barnard.edu/)
The Movement Lab is designed for experimentation and exploration at the intersection of dance, performance, and technology. It is a flexible, modular space for movement research, production, collaboration, and interdisciplinary interaction. The Lab’s trans-media function serves to enhance critical thinking and learning through body-and-brain connection as it seeks to explore emerging trajectories in art science and technology. The facility can be reserved for collaborative research and practice that connects movement and performance to multidisciplinary discovery.

THE CENTER FOR ENGAGED PEDAGOGY (https://cep.barnard.edu/)
The Center for Engaged Pedagogy (CEP) advances the practice of teaching and the experience of learning on Barnard's campus. With its deep history and commitment to academic excellence and close faculty-student interaction, Barnard has from its inception been an ever-evolving laboratory for innovative teaching and engaged learning. The CEP continues to build on that history as it gathers, connects, and expands best pedagogic practices, and offers new methodologies and support-systems for student learning.

As a forum for dialogue within and across Barnard’s departments, centers, programs, libraries, and collections, the CEP invites experimentation in the classroom, laboratory, studio, and in the community at large. The CEP is founded on the conviction that the best teaching is the most inclusive teaching. Supporting Barnard’s commitment to create an environment where no voices are silenced and all of us can thrive, the CEP explores, promotes, and exemplifies effective and contextual practices to serve every member of the Barnard community. It serves as a hub for student learning and support at all levels of the curriculum by providing student tutorials on study strategies, the use of new technologies and much more. For faculty, the CEP offers workshops and 1-1 sessions on topics ranging from inclusive teaching strategies to the use of streaming technology in classroom instruction.

BARNARD CENTER FOR RESEARCH ON WOMEN (http://bulletin.columbia.edu/barnard-college/curriculum/research-and-scholar-services/bcrw.barnard.edu)
The Barnard Center for Research on Women (BCRW) is an academic research center that brings scholars and activists together through its working groups, public events, publications, and multimedia projects to advance intersectional social justice feminist analyses and to promote social transformation. BCRW is committed to vibrant and engaged research, pedagogy, art, and activism, supporting the work of scholars and activists to create new knowledge and to challenge and refine how we understand the world around us. Since its founding in 1971, the BCRW has cultivated collaborative and accountable relationships with community organizations, activists, and cultural workers in New York City, across the US, and transnationally. From its signature annual Scholar and Feminist Conference to its peer-reviewed journal S&F Online, unique collection of feminist social movement ephemera (housed in the Barnard College Archives), constantly expanding video archive, and recently inaugurated Social Justice Initiative, BCRW remains committed to critical feminist engagement with the academy and the world.

BCRW enacts its commitment to social justice feminism by hosting several activists, researchers, and artists in residence each year. These residents pursue projects devoted to social change, focusing in particular on issues of incarceration and alternatives to incarceration; legacies of imperialism; restorative and transformative justice; queer and trans liberation; and more. Students can get involved with the center as research assistants and through more short-term affiliations with projects and events.
ATHENA CENTER FOR LEADERSHIP STUDIES  (https://athenacenter.barnard.edu/)
The Athena Center for Leadership Studies offers targeted academic courses that examine aspects of women's leadership from the distinctive perspective of the liberal arts. Using an innovative, interdisciplinary approach that combines academic and experiential study, the courses allow students to explore what it means for women to lead, to follow, to collaborate, and to excel. These courses prepare students to assume positions of leadership in all sectors and industries. The Center also offers lectures and hands-on skills building through the Athena Leadership Labs, a wide range of workshops designed to teach practical elements of leadership.

THE TODDLER CENTER  (https://toddlers.barnard.edu/)
The Center was created in 1973. Since the beginning, it has functioned as an integral part of the Psychology Department at Barnard College, providing an initial group social experience for toddlers, a unique learning experience for Barnard and Columbia College students, and a research site for developmental researchers. Each year the Center enrolls toddlers in one of four classes for the academic year (mid-September through June). All classes are structured by age and gender, and include children from diverse backgrounds. Morning and afternoon classes are available and meet once or twice a week. Classes are divided based on toddler age range. Beginning in January, parents and/or caregivers can participate in an educational group focused on the developmental issues of the toddler years and on related parenting and caregiving issues.

The approach of the Center is based upon the philosophy that children learn by doing: through experiences, exploration, and active participation with their environment. Children's discoveries promote mastery and feelings of competence. The Center provides a warm environment to support each child's needs, promote self discovery and facilitate separation. Activities are adjusted to the developmental level of each child, enhancing his/her social, emotional and intellectual development. The Toddler Center is located in Milbank Hall.

Requirements for the Liberal Arts Degree
Barnard's motto, Following the Way of Reason (Hepomene toi logismoi), signals the College's continuing commitment to the intellectual breadth and analytical depth of the liberal arts tradition. Since the College's founding in 1889, a Barnard education has been characterized by its distinctive combination of elements: a rigorous, broadly based framework of general education requirements; a focused inquiry into major subjects; and a range of electives. Together these elements allow for substantial personal choice. The exact structure of College requirements has varied over the past century in response to changes in society, education, and student needs. Today, degree candidates complete first-year courses, general education courses organized around different “ways of knowing” or “modes of thinking,” a major, and electives totaling 122 points (120 points for students entering before Autumn 2003). They also fulfill a physical education requirement reflecting the College's view that physical well-being is an essential part of a healthy and productive life. (Of the 122 required points, 1 must be for PE. Transfer students who enter with 24 points of credit need 121 points, of which 1 is for PE.)

The Barnard Education
A Barnard education seeks to provide women with the tools and techniques needed to think critically and act effectively in the world today. It fosters a respect for learning, an aptitude for analysis, and a competence in the demanding disciplines of the liberal arts and sciences. By virtue of its special mission and location, Barnard strives to give its students insight into interconnected worlds of knowledge and experience.

The Barnard curriculum enables students to develop strength in language and literature, in social and historical analysis, in mathematics and the natural sciences, in the arts and the humanities, and in digital and technological thinking—distinct areas of study that incorporate but also transcend traditional academic disciplines. Built around major methods for apprehending the world and organizing knowledge, the College's basic requirements are designed to equip students to respond both critically and creatively to a rapidly changing world. Barnard students learn to employ a variety of analytical methods in order to engage new complexities of social evolution and scientific knowledge. The College dedicates itself to imparting to every student self-renewing intellectual resourcefulness, the mark of a liberal arts education.

The College faculty encourages each student to elect courses in a manner that ensures exposure to distinct forms and traditions of knowledge and to the human experience as lived in various parts of the world. Each student is encouraged to make selections that develop connections among the elements of the curriculum, that promote understanding of global issues, and that acknowledge both the diversity and the commonality of human endeavors in civilizations around the world and through time.

As a college for women, Barnard embraces its responsibility to address issues of gender in all their complexity and urgency, and is committed to an integrated curriculum that recognizes the importance of gender in all forms of human endeavor. The College encourages students to profit from the exceptional and varied opportunities to explore women's histories, challenges, and achievements. Gender-related matters are incorporated into a wide range of additional courses across the academic disciplines.

Barnard also encourages students to take full advantage of the world city of New York—its international character and economic power; its prominence in science, medicine, and the arts; its cultural abundance; its diverse neighborhoods and peoples; its architectural richness. In their studies, their work, and their personal lives, Barnard students can avail themselves of the city's unparalleled resources. As an extended campus, New York serves not only as a multidisciplinary research laboratory for coursework and guided field experiences, but also as the site for a vast array of internships and wide-ranging, city based student activities.

Barnard seeks to ensure that students become aware of, and knowledgeable about, their physical being. Students complete courses that focus on physical activity, fitness, and well-being. The College also provides additional opportunities for students to exercise and to learn more about fundamental elements of good health and women's health issues.

Majors and Electives
Departments and programs establish majors to provide a structured, focused investigation of an academic discipline or area of
interdisciplinary study. Often a major will require courses taken in
cognate disciplines. Generally, there are three levels of study within
each major: introductory survey courses; mid-level courses that
cover more specialized subject matter and where attention is paid
to the methodologies, including the writing styles and formats, of
the discipline; and advanced-level seminars with an emphasis on
independent research. The College has a long-standing commitment to
preparing students sufficiently in a subject so that they may undertake
a semester- or year-long project, usually during the senior year, on a
topic related to their major.

All students complete the requirements of an approved major. Majors
vary in the number of credits required. For students transferring credit
from another college or university, a minimum of six semester courses
must be completed while the student is in residence at Barnard. Only
courses graded C– or higher will be credited toward the major.

A student registers her chosen major with the Office of the Registrar
and with her major department or program, normally in the second term
of her sophomore year. The major may be chosen from any listed in
the Barnard Catalogue. A student may major in two fields by satisfying
all the major requirements prescribed by each department, with no
overlapping courses. A combined or special major may be designed
in consultation with the Class Dean and chairs of the appropriate
departments, and with the approval of the Committee on Programs and
Academic Standing. Committee approval is not needed for a double
major that comprises all the course requirements of two majors with
one integrating senior project, but the form designated for such a
double major must be filed with the Registrar and the two departments.

Apart from fulfilling general education requirements and major
requirements, a student completes the remainder of the 122-point
requirement with elective courses, either within or outside the major
department, subject to the approval of the appropriate adviser.

No more than 18 points of studio, performing arts, or professional
school courses may be credited toward the A.B. degree. Of these, a
maximum of four arts studio courses may be credited. A maximum
of six courses in instrumental instruction may be credited (except for
Music majors and minors, who may receive credit for eight, including
piano instruction). A maximum of six studio courses in Theatre may
be credited (except for Theatre majors who may receive credit for 24
points of studio). A maximum of twelve courses (12 credits) in dance
technique may be credited (except for Dance majors who may receive
credit for 24 points of dance). If a student is applying 1 or 2 credits of
dance technique classes towards the P.E. requirement, they can take
a maximum of 12 credits in dance technique in addition to the credits
used for P.E.

Exceptions to this rule are allowed only for courses in the major field
or for courses taken in fulfillment of requirements for double and
joint degree programs with professional schools of the University.
A maximum of 24 points may be credited for studio or performance
courses in the major field. A minimum of 90 points of traditional liberal
arts courses is required for the student who majors in such a field; for
all other majors, a minimum of 102 points of such courses is required.

Minors

The selection of a minor field of study is optional. A minor requires
at least five courses (three of which must be qualifying Barnard or
Columbia courses), each worth 3 or more points, and may be requested
by any student having a major after she has completed a minimum of
three courses in the minor field. Requirements depend on the minor
chosen (see individual department curriculum statements); courses
are selected in consultation with the department chair. Courses for the
major and minor may not overlap (except by petition from the minor
department’s chair, in cases where the minor requires more than 18
points, the major requires more than 40 points, the overlapping courses
are required for both major and minor, and the request is for no more
than two overlapping courses). Minor courses may also be used in
satisfaction of general education requirements. To qualify for the
minor, a course must be letter-graded A+ to C-.

Foundations

Barnard’s curriculum, Foundations, applies to students
entering in or after Fall 2016.

Courses may be designated as fulfilling more than one requirement, subject
to recommendation by the Committee on Instruction and Faculty approval.
However, a course cannot be counted in more than two categories
(Distributional Requirements, Modes of Thinking, and Major Requirements).

I. First-Year Experience
   • First-Year Writing
   • First-Year Seminar

II. Physical Education (1 Course)

III. Distributional Requirements
   • 2 Courses in the Languages (must be in the same language)
   • 2 Courses in the Arts/Humanities
   • 2 Courses in the Social Sciences
   • 2 Courses in the Sciences (1 with a Laboratory)

IV. Modes of Thinking
   • 1 Course in Thinking Locally—New York City
   • 1 Course in Thinking through Global Inquiry
   • 1 Course in Thinking about Social Difference
   • 1 Course in Thinking with Historical Perspective
   • 1 Course in Thinking Quantitatively and Empirically
   • 1 Course in Thinking Technologically and Digitally

Modes of Thinking: Learning Outcome Guidelines

Courses fulfilling these requirements will demonstrate one of the following:

1. A dominant and unifying theme in the course that corresponds to
   the description of the Mode(s) of Thinking
2. Close matching between the learning objectives for the GER
   requirement and learning objectives for the course
3. A significant portion of written assignments, projects, or exams
   focused on the Mode(s) of Thinking
4. A majority of the readings focused on the Mode(s) of Thinking

All courses satisfying the General Education Requirements must be at least
3-point courses.

Thinking Locally—New York City

Requirement: One course that asks students to examine the
community and environment in which they find themselves as
residents of New York City.
Aim: This requirement encourages students to situate themselves in a local context. In this respect, New York is not just the backdrop of their undergraduate experience, but is equally a rich and diverse object of study in its own right. New York is both a wholly distinctive metropolis and a microcosm of contemporary world experience. The requirement can be met through the study of many topics, from the literature of the Harlem Renaissance to the ecosystems of the Hudson River, from the history of urban planning to the architecture of the Gilded Age.

Students who complete a course satisfying the Thinking Locally requirement should be able to attain at least one of the following outcomes:

- Identify specific cultural, social, political, or economic institutions that have shaped the city over time
- Identify distinctive geological or environmental factors that characterize the region
- Describe the contexts and distinctive features of at least one author, genre, or tradition characteristic of New York City
- Situate art, architecture, literature, urban planning, or performance within the social or historical context of the city
- Explore theories of urban structure or form focusing on New York City as an exemplar

Thinking through Global Inquiry

Requirement: One course that asks students to consider communities, places, and experiences beyond their immediate location.

Aim: This requirement asks students to engage with topics across the disciplines that consider the dynamic global relationships among people, ideas, artifacts, or physical phenomena. The subjects or objects of inquiry will span multiple regions, nations, cultures, ethnicities, races, religions, histories, or art forms. This requirement will encourage students to expand their perspectives on the world and their place in it, while complementing the Thinking Locally—New York City mode to highlight the ways in which global engagement involves a consideration of the local, as well as the global.

Students who complete a course satisfying the Thinking through Global Inquiry requirement should be able to attain at least one of the following outcomes:

- Identify and analyze the ways in which a cultural, social, political, or economic event may have distinct effects in different locations
- Articulate the distinctions among “local” and “international” and “global” in the context of one or more systems—e.g., economic, judicial, literary, philosophical, scientific
- Identify and compare the value systems displayed in materials from multiple cultures
- Identify and critique personal and/or national cultural assumptions and behaviors in relation to those of others
- Identify and analyze the evidence of transnational, multicultural, or multilingual exchanges in materials from multiple cultures
- Utilize multilingualism to investigate the construction of, and interactions among, multiple cultures

Thinking about Social Difference

Requirement: One course through which students examine how difference is constituted, defined, lived, and challenged in cultural, social, historical, or regional contexts.

Aim: This requirement encourages students to engage with disparities of power and resources in all of their manifestations, including but not limited to access to economic or natural resources, political rights, social status, and cultural expression. Areas of study may include race, ethnicity, class, gender, sexuality, ability, nationality, or religion and their intersections within contemporary and historical experience.

Students who complete a course satisfying the Thinking about Social Difference requirement should be able to attain at least one of the following outcomes:

- Identify and critique ways that groups understand themselves to be different and how they mobilize difference in the pursuit of a range of ends
- Identify and analyze the intersectional nature of differences in cultural, social, national, or international contexts
- Identify and critique the modes in which such differences are expressed
- Identify and articulate the relations between categories of difference and the general principles of hierarchy and inequality

Thinking with Historical Perspective

Requirement: One course that enables students to study times and traditions of the past, to learn theories and methods of historical analysis, and to discover how different concepts of history shape our understanding of both past and present.

Aim: This requirement asks students to examine the ways in which historical context shapes and conditions the world in which we live; it also challenges them to see the past on its own terms -- as an unfamiliar locus of difference. By fulfilling this requirement, students will have a better understanding of the ways in which human experience is shaped by both temporal change and spatial variation.

Students who complete a course satisfying the Thinking with Historical Perspective requirement will be able to attain at least one of the following outcomes:

- Identify and analyze historically specific cultural, social, political, or economic, structures, and the dominant actors and ideas relevant to the period, region, or theme of the course
- Articulate significant commonalities and differences between structures and ideas specific to the period, region, or theme under study and those in the present
- Evaluate the methodology and evidence used by scholars to study the period, region, or theme of the course
- Examine literature, art or cultural forms in a historical context

Thinking Quantitatively and Empirically

Requirement: One course that exposes students to analysis with numbers, figures, data, and graphs, and to empirical and mathematical methods for better understanding of quantitative and empirical approaches to thinking and problem solving.

Aim: This requirement asks students to develop basic competence in the use of one or more mathematical, statistical, or deductive methods. These may involve applications to particular problems, as in the case of models or data analysis, but may also simply involve abstract reasoning as in pure mathematics or logic.
Students who complete a course satisfying the Thinking Quantitatively and Empirically requirement should be able to attain at least one of the following outcomes:

- Demonstrate an ability to apply at least one method of quantitative or deductive reasoning
- Apply quantitative or empirical conceptual tools and procedures to the analysis of problems
- Complete a project involving organizing, analyzing, and visualizing data

**Thinking Technologically and Digitally**

**Requirement:** One course that engages students with contemporary and emerging fields such as computational sciences and coding, digital arts and humanities, geographic information systems, or digital design.

**Aim:** This requirement emphasizes courses in which students actively engage with digital technologies manipulated with computers and accessed locally or at a distance. The requirement fosters students’ abilities to use advanced technologies for creative productions, scholarly projects, scientific analysis or experimentation. The requirement will instill in students the confidence to make decisions about the adoption and use of current and future technologies in a critical and creative manner.

Students who complete a course satisfying the Thinking Technologically and Digitally requirement should be able to attain at least one of the following outcomes:

- Demonstrate proficiency in writing computer code or in using technology to construct knowledge or produce creative or scholarly works
- Analyze the development, efficiency, or use of digital resources
- Use digital tools to critically, creatively, innovatively, or effectively gather, access, evaluate, and synthesize relevant materials
- Complete a project that demonstrates an understanding of technology concepts, systems, or operations

**Nine Ways of Knowing**

**The Nine Ways of Knowing curriculum applies to students who entered Barnard before Fall 2016.**

**First-Year Foundations**

Two courses are required of all first-year students to ensure that their skills in reading, writing, and speaking continue to develop in ways that will support their learning throughout their years at Barnard. First-Year Foundation courses are deliberately kept small; they focus on individual participation and on methods of research, analysis, and revision.

**First-Year English**

Barnard’s liberal arts philosophy takes as its starting point the idea that every student, whatever her level of academic achievement, can continue to improve her skills in writing, analysis, and argumentation. Therefore, all first-year students are required to take a one-semester writing course titled First-Year English (ENGL BC1201 First-Year English: Reinventing Literary History or ENGL BC1204 First-Year English: Reinventing Literary History (Workshop)), designed to cultivate and develop expository writing and related tools of scholarship. Students choose to study one of three rubrics: I. Legacy of the Mediterranean features a curriculum of classic texts representing key intellectual moments that have shaped Western culture; II. Women and Culture features a more global curriculum exploring the role of women in literature and culture; or III. The Americas features a curriculum of texts that exemplifies the dynamic relationship between North, South, and Central American literatures. All three literary traditions are historicized in interdisciplinary contexts to foster better writing across the curriculum.

Transfer students who did not pass a satisfactory course at their previous institution are not required to take ENGL BC1201, but must take ENGL BC3103 The Art of the Essay or ENGL BC3104 The Art of the Essay or a 3-point literature course from the Barnard English department offerings (http://english.barnard.edu/course-information/).

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Analyze the thematic structure of literary works through close reading
- Translate critical reading into elegant and persuasive expository writing
- Conduct interdisciplinary research to ground literary works in historical context
- Document sources and incorporate scholarship into original analytical arguments
- Avoid plagiarism and other academic violations of Barnard’s Honor Code
- Develop a sense of literary history
- Gain confidence in speaking as well as writing skills in a small seminar setting
- Appreciate the value of incisive writing in courses across the curriculum

**First-Year Seminar**

First-year students take this one-semester course designed to develop the intellectual skills and styles central to subsequent academic work. This course emphasizes the enhancement of writing and communication skills and the group-discussion mode of intellectual inquiry and discourse.

Seminars center on major themes or issues, and participants read and discuss selected important philosophical, historical, literary, or scientific texts. Students and faculty engage in an extended consideration of a theme of general human concern, one that goes beyond departmental boundaries.

Transfer students are not required to take the First-Year Seminar.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Develop their skills in critical reading and analysis, writing, and effective speaking
- Assess and use textual evidence in support of oral and written arguments
- Explore important issues through significant texts ranging across genres, disciplines, and historical periods
Physical Education and Health

Degree Requirement: One Physical Education course is required for graduation. This course must be completed by the end of the first year. One point will be earned for this one course. One additional point of Physical Education may be counted towards the 122 points required for graduation. Transfer students must consult their transfer credit evaluation to see if a Physical Education class is needed.

Aim: To enable students to become aware of, and knowledgeable about, their physical being through participation in fitness and sports activities. Students are encouraged to enroll in additional activity and self-paced exercise courses toward the attainment of lifelong well-being.

General Education Requirements

The aim of the General Education Requirements is to ensure that each Barnard graduate confronts and engages in central ways of knowing the world. These ways of knowing—divided into nine key areas—include, but also bridge, the traditional disciplines of the liberal arts and sciences. Inquiry into these areas establishes the basis for a Barnard education. Each student studies, from analytical, quantitative, and artistic perspectives, the major means by which human knowledge has been constructed.

To allow for flexibility within this framework, a student chooses among the designated courses that fulfill each of the nine requirement areas. She will find some courses that offer a broad view of a field, exploring issues that help create an educated citizenry; other courses satisfy the purposes of general education by close scrutiny of critical methods and their specific application. Thus, each student will shape her own academic program, deliberately and distinctively, by electing a combination of wide-ranging introductory courses and more specialized upper level courses to fulfill the General Education Requirements. The areas included in the General Education Requirements are:

1. 1 Course in Ethics and Values (EAV)
2. 1 Course in Social Analysis (SOC)
3. 1 Course in Historical Studies (HIS)
4. 1 Course in Cultures in Comparison (CUL)
5. 2 Courses in one Laboratory Science (LAB)
6. 1 Course in Quantitative and Deductive Reasoning (QUA)
7. 4 Semesters (or equivalent) in one Language (LAN)
8. 1 Course in Literature (LIT)
9. 1 Course in The Visual and Performing Arts (ART)

Courses used to fulfill these area requirements must be at least 3 points and may also be used to satisfy requirements for majors or minors. Students may not use Advanced Placement Credit to fulfill the area requirements unless specifically noted otherwise.

A student’s choice of specific courses should be influenced by an intent to forge links among topics and ways of knowing, to find common themes across time and form, and to develop an internal coherence within her own set of courses used to fulfill the College’s General Education Requirements. A student should also be mindful that her choices of courses can, and should, expand and enrich her understanding of the world at large, of cultural diversity, and of issues of gender.

1a. Ethics and Values (for current students)

Requirement: One course on the nature and demands of ethical reasoning and the ways in which individuals and communities articulate and embody their values both in reasoning and in practice. These courses recognize that contemporary and historical moral problems are often complex and unresolved.

Aim: In courses that satisfy this requirement, students consider attitudes, judgments, and choices of individuals and cultures concerning what is good and bad, right and wrong, just and unjust. How do larger social, religious, and ethnic contexts shape evaluative attitudes, decisions, and actions? How do we study ethical reasoning and practice within a complex and diverse global context? Are moral attitudes rooted in reason or emotion, or both? How may values be formed through narrative, ritual, and a range of other activities? What is the extent of moral agreement and disagreement across and within cultures and historical periods? Are deep conflicts of value susceptible to rational reflection and critical discussion? Courses on the history and politics of human rights, moral philosophy, religion, or the ethics of bioengineering fall under this rubric, but so might courses exploring post-liberal politics, environmentalism and animal rights, race, gender, and global equity.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Explain how individuals or cultures arrive at judgments, expressions, or embodiments of their deeply held commitments
- Engage in debate and discussion of moral reasoning and ethical practice in different cultures and historical periods
- Discuss how differences in deeply held convictions emerge across cultures and historical periods
- Investigate how social, religious, and ethnic customs and ideas shape the moral attitudes and actions of individuals and groups
- Demonstrate a critical understanding of the complexity of moral questions and values

1b. Reason and Value (for students entering before Fall 2011)

Requirement: One course that allows students to explore ways in which values shape thought, thought shapes values, and both guide human actions.

Aim: To introduce ways of thinking, both past and present, about the formation of human values, their role in guiding action, and their susceptibility to rational reflection and critical discussion. This requirement allows students to discover how established disciplines in the humanities, social sciences, and natural sciences—as well as newer interdisciplinary fields—approach a wide range of value-related issues. Courses may address such questions as: What does it mean to follow "the way of reason"? What are the sources of human values? How do we arrive at our conceptions of virtue and obligation, and how do such conceptions shape our notions of a good life and a just society?
How have questions about values emerged in different traditions at different times? Other possible subjects include the intersecting ethical dilemmas of private and public life, the relation between moral thought and moral action, and issues of human rights, cultural diversity, and global equity.

2a. Social Analysis (for current students)

**Requirement:** One course that prepares students to analyze societies and social categories using systematic theoretical and empirical inquiry. These courses must critically and constructively evaluate social structures and practices.

**Aim:** Social analysis investigates and explains the form and function of social institutions, including the categories on which they are based, their informal and formal operations, and their effects. It is especially concerned with how institutions vary across time and place, how they are shaped by individual and group behaviors, and how power is distributed across different groups. Students will study individuals, groups, or institutions, or the relations among them. They will engage empirical evidence from a variety of sources, such as interviews, oral histories, cultural artifacts, surveys, field observation, experiments, texts and official records. They will learn strategies to make sense of these data such as causal reasoning, hypotheses testing, and critical analyses of the meanings and measures of empirical categories. Fundamentally, social analysis questions “what is” and contemplates what could or should be.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Apply the methods of research and inquiry of a discipline to the study of human behavior in a social setting/context
- Evaluate the usefulness of evidence for assessing any specific phenomenon and to question the nature of the evidence
- Demonstrate a critical understanding about the social forces that shape opportunity and power in society
- Demonstrate a critical understanding of the interplay between individual action and collective social life
- Identify how scholarships in the discipline have approached social problems and influenced organized efforts to ameliorate social problems

2b. Social Analysis (for students entering before Fall 2011)

**Requirement:** One course that acquaints students with the central concepts and methods of the social sciences, while also critically examining social structures and processes, and the roles of groups and individuals within them.

**Aim:** To introduce various ways of analyzing social structures and processes, and to explore how these institutions and processes both shape and are shaped by group and individual behavior. Courses will focus on a variety of institutions and processes, from the family, to the nation-state, to the international economy. All courses will address fundamental questions such as: How are individual and collective human behavior linked to the cultural, economic, and political context in which they occur? How is power distributed across different groups and among individuals? How do social systems develop and change? How can we come to better understand societal dynamics through a variety of quantitative and qualitative methods?

3. Historical Studies

**Requirement:** One course enabling students to study times and traditions of the past, to learn theories and methods of historical analysis, and to discover how different concepts of history shape our understanding of both past and present.

**Aim:** To emphasize the importance of historical knowledge for understanding various aspects of human experience and activity, and to develop the skills necessary to conduct or evaluate historical research. Coursework will demonstrate how history is not a simple record of past events, but an interpretation of the past shaped by the theories, methods, and data used to construct it. Among the questions to be raised are: Whose past is remembered? How is it remembered? To serve what purposes?

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Identify the historically specific social, political, and economic structures and agencies, as well as dominant ideas, relevant to the period or theme of the course
- Identify the main historiographical traditions pertaining to the period or theme of the course
- Evaluate the methodology and evidence used by historians to study the period or theme of the course

4. Cultures in Comparison

**Requirement:** One course that compares two or more cultures from the perspectives of the humanities and/or social sciences.

**Aim:** To study the diversity and the commonality of human experience, and to examine and question personal cultural assumptions and values in relation to others. Through comparative methods, courses will explore the beliefs, ideologies, and practices of different peoples in different parts of the world, across time, and through migrations. Courses may include comparison of cultures from two or more geographical areas or from two or more cultures within one area, and may approach the subject matter using anthropological, historical, social, and/or humanistic perspectives.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Identify the differences and commonalities between two or more cultures
- Apply the methods of research and inquiry of a discipline to the comparative study of cultures
- Demonstrate a critical understanding of their personal assumptions and values in relation to at least one other culture

5. Laboratory Science

**Requirement:** Two courses with laboratory in one science chosen from among: astronomy, biology, chemistry, environmental science, physics, or psychology. Acceptable courses must meet for at least three hours of lecture and three hours of laboratory each week. *Note: students may combine a course in Physics with an appropriate course in Astronomy.*

**Aim:** To develop intellectual curiosity about the natural world and the processes of scientific experimentation; to convey an understanding of what is known or can be known about the natural world; to introduce basic methods of analyzing and synthesizing the sources of scientific information; and to create scientifically literate citizens who can
engage productively in problem solving. Students are expected to master the tools of science and current understanding in one area, and are encouraged to explore the limitations of existing theories and to learn how to ask strategic questions. Laboratory exercises introduce students to techniques of scientific investigation as they make observations, carry out experimental procedures, and learn how results and analyses are communicated in specific visual, quantitative, and written forms.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Ask questions about the natural world that can be tested by experiments or observations
- Analyze and synthesize sources of scientific information to assess what is known, or what can be known, about the natural world
- Practice discipline-appropriate methods of scientific observation, experimentation, data collection, interpretation, and analysis
- Communicate scientific results and analyses in appropriate visual, quantitative, or written forms

Note: Students may fulfill part of this requirement with scores of 4 or 5 on Advanced Placement Examinations in biology, environmental science, and physics (or their International Baccalaureate equivalents).

The following courses meet these requirements.

Astronomy
Select one of the following sequences:

Sequence A: 6
- ASTR BC1753 - ASTR BC1754
  Life in the Universe and Stars, Galaxies, and Cosmology
- ASTR C1903 - ASTR C1904
  Earth, Moon, and Planets Laboratory and Astronomy Lab 2

Sequence B: 8
- ASTR C1403 - ASTR C1404
  Earth, Moon, and Planets (lecture) and Stars, Galaxies, and Cosmology
- ASTR C1903 - ASTR C1904
  Earth, Moon, and Planets Laboratory and Astronomy Lab 2

Sequence C:
- ASTR W1453 - ASTR C1404
  Another Earth and Stars, Galaxies, and Cosmology
- ASTR C1903 - ASTR C1904
  Earth, Moon, and Planets Laboratory and Astronomy Lab 2

The following combinations can be used for one semester of the requirement:
- ASTR UN1610 - ASTR C1903
  Theories of the Universe: From Babylon to the Big Bang and Earth, Moon, and Planets Laboratory
- ASTR C1420 - ASTR C1904
  Galaxies and Cosmology and Astronomy Lab 2
- ASTR C1836 - ASTR C1904
  and Astronomy Lab 2

Biology
Select one of the following sequences:

Sequence A: 9
- BIOL BC1001 - BIOL BC1002
  Revolutionary Concepts in Biology and Global Health and Ecology

Sequence B: 10
- BIOL BC1500
  Introduction to Organismal and Evolutionary Biology

Chemistry
Select one of the following sequences:

Sequence A: (For students that entered prior to Fall 2014)
- CHEM BC2001 - CHEM BC2002
  General Chemistry I and General Chemistry II

Sequence B: 11
- CHEM BC2001
  General Chemistry I
- CHEM BC3230
  Organic Chemistry I

6. Quantitative and Deductive Reasoning

Requirement: One course in which students learn methods and approaches used in mathematics and related fields involving quantitative expression and logical reasoning.

Aim: To provide a productive acquaintance with at least one means of quantitative and deductive reasoning and to develop an ability to apply this knowledge to the analysis of new problems. Coursework will emphasize how quantitative analysis and deductive reasoning function as creative, elegant, and powerful ways of thinking and as effective sets of conceptual tools and procedures with widespread applications.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Demonstrate a familiarity with at least one method of quantitative or deductive reasoning
- Apply relevant conceptual tools and procedures to the analysis of problems

Note: Students may fulfill this requirement by securing Advanced Placement Credit in mathematics, chemistry, computer science, physics, or statistics (or their International Baccalaureate equivalents or equivalent transfer credit).

7. Language

Requirement: Competence in one ancient or modern language other than English, demonstrated by completion of, minimally, the fourth sequential semester of college-level study, and preferably, a more advanced course with greater emphasis on literary and cultural traditions.
**Aim:** To provide basic linguistic competence in at least one language other than English, in order to familiarize students with the language, literature, and culture of at least one non-English speaking people. Students are encouraged to develop their language skills to a level that permits them to live and function in another country, to enable them to conduct research, whatever their field; and to prepare them to work effectively in an increasingly global and multicultural society. In becoming familiar with the form and structure of another language, students consider how languages function as tools for communication. Students are encouraged to apply their language skills in courses that fulfill other general education requirement areas.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Read, write, and translate a chosen language of study
- Communicate with speakers of the chosen language, if it is a spoken language
- Demonstrate familiarity with the culture(s) and customs associated with the language of study

**Exemptions**

1. CEEB SAT II score of 781 or higher (780 or higher in Chinese); CEEB SAT II score of 700 or higher in Hebrew only. No exemptions granted for CEEB SAT II scores in Japanese or Korean.
2. AP score of 4 or 5 in French, German, Italian, Latin or Spanish; AP score of 5 in Chinese.
3. Departmental examination.
4. Students with native English who study in a high school where the language of instruction is not English (e.g., French, for alumnae of the Lycée Français).
5. For international students for whom English was not the primary language of instruction in high school, satisfactory completion of ENGL BC1201 First-Year English: Reinventing Literary History or ENGL BC1204 First-Year English: Reinventing Literary History (Workshop) or one satisfactory semester at Barnard.

**Placement**

1. Re-centered CEEB SAT II score of 680–780, fourth semester; 570–679, third semester; 400–569, second semester; below 400, first semester, for German.
2. Re-centered CEEB SAT II score of 690–780, fourth semester; 570–689, third semester; 420–569, second semester; below 420, first semester, for French and Spanish.
3. For languages other than French, Spanish, and German, placement will be determined by departmentally administered examinations.
4. For transfer students: the course following the level of the last satisfactorily completed semester course; however, formal withdrawal and reenrollment in a more suitable course may be required for students who are judged by the department to be inappropriately placed and in need of additional preparation or review. In such a case, transfer credit for the previous course is rescinded to allow the student to receive credit for the Barnard/Columbia course of equivalent level. Taking the departmental placement exam is recommended.
5. By departmental examination, if there is no CEEB score or previous college transfer work.

**Credit**

1. Credit is given for courses satisfactorily completed in residence at Barnard or, in the case of a transfer, at her previous college.

2. No prior assurance of degree credit is given for summer or transfer work in foreign language courses. For work completed at other colleges, credit is granted with departmental approval, or by examination, or on completion of the next level at Barnard.
3. No credit is granted for work equivalent to a level already completed and credited.
4. Although credit for the first semester of an elementary language is not normally granted unless a more advanced course is completed, a student is granted one exception maximum to this rule on written request to the Registrar.

**8. Literature**

**Requirement:** One course in literature in any language, in the original or in translation; or in comparative literature.

**Aim:** To develop the skills needed for an informed and aesthetically rewarding reading of literary texts from various times, places, and traditions. Coursework will address the methods and theories by which readers produce meanings and interpretations, and will investigate the pertinence of material such as the authors’ biographies or their cultural contexts to literary analysis. Students will study rhetorical strategies employed in literature, becoming more adept at grasping the underlying assumptions and appeal of various forms of discourse.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Recognize a range of rhetorical strategies employed in literary texts and analyze their function
- Describe the contexts and distinctive features of at least one literary author, genre, or tradition

**9. The Visual and Performing Arts**

**Requirement:** One course in architecture, art history, studio art, graphic design, dance, music, film, or theatre.

**Aim:** To build an understanding and appreciation of creative processes and forms of artistic expression. Courses will provide insight into the ways art is used to explore and enrich the world and the human condition. The requirement will enable students to cultivate their skills, to develop an understanding of the ways various arts communicate and are discussed, and to consider works of art in their complex social and historical contexts.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Produce a work of art or a critical analysis of a work of art that demonstrates an understanding of formal characteristics including technique, style, medium or materials, and composition of design as applicable
- Situate the work in its social or historical context

**Requirements for Transfer Students**

A student admitted to Barnard with fewer than 24 points of credit is considered a first-year student and is subject to all requirements for first-year students, including First-Year Seminar. A student admitted with 24 credits or more is considered a transfer student. To receive the A.B. degree at Barnard, a transfer student must be enrolled at Barnard (Morningside Heights, Reid Hall, Kyoto, Beijing, or the Berlin Consortium) for at least four full-time regular academic terms during
which she must complete at least 60 points, including at least six courses in the major field (and three in the minor field, if a minor is elected). Additional major (and minor) courses, as well as general education requirements, may be satisfied by transfer courses. Transfer students are eligible for Latin honors when both overall and Barnard averages meet the required academic standards.

Transfer Credit

Courses completed at other accredited colleges and universities which are similar in content and depth to Barnard courses may be submitted for transfer credit. Transfer courses are evaluated after a complete official transcript is received in the Office of the Registrar (http://barnard.edu/registrar/). Students are asked to submit course descriptions with their requests for transfer credit to the Admissions Office.

Credit for approved work at another institution is applied to Barnard's graduation requirement with a maximum of 61 total credits (60 academic credits plus 1 credit for Physical Education) and a maximum of 16 points per term. The 61-credit maximum applies to a student's entire academic record at Barnard, including any credit from AP, IB or other select national examinations and diplomas, any credits transferred in from prior to Barnard; and any credits from study abroad, study leave, or summer courses taken while at Barnard.

Credit is not granted for courses with grades lower than C minus. Acceptable transfer work does not usually include applied or professional courses or more than the equivalent of two Barnard studio courses. The first term of an elementary language course is not normally credited unless or until the second term or a more advanced course has been satisfactorily completed, but a student may request a single exception to this policy.

Transfer students entering with 24 or more points must complete 121 points for the Barnard degree, and 1 of those points is for PE. Only 1 point from PE will be used toward the 121 points required for the degree. Students will not receive credit for any additional PE classes.

Once a student has received 1 point for PE, they may receive credit for additional dance technique courses, but they may not receive credit for any further PE courses. (Transfer students who entered before Fall 2013 must complete 120 points and do not receive credit for Physical Education.)

Transfer students may apply for credit for previous summer courses under the regulations governing summer study. There is a 16-credit maximum for summer coursework, including summer courses taken both prior to and during a student's matriculation at Barnard.

First-year students with a record of prior course work taken as non-matriculants at an accredited college in the United States may request up to 15 points of transfer credit (the courses must be intended primarily for college students and taught at the college by members of its faculty, and must be in excess of the courses required for the high school diploma). Such work will be evaluated after the student has completed 12 points at Barnard.

Grades for course work transferred from other institutions are not included in a student's Barnard's GPA, but they are included when determining Latin honors eligibility at the time of graduation.

Other Academic Opportunities

The Writing Center

In addition to their work in specific courses across the curriculum, Writing Fellows staff at the Erica Mann Jong '63 Writing Center (http://writing.barnard.edu/about/) (second floor Barnard Hall). Any Barnard student is welcome to confer on a particular writing project or to discuss some broader aspect of her writing (e.g., how to articulate, organize, and structure thoughts, how to use evidence effectively, how to work on English as a second language). Students confer on chapters of their senior theses, drafts of papers for First-Year English, outlines or ideas for papers in upper-level courses, lab reports, personal statements for admission to law school, etc.

Writing Fellows Program

The Writing Fellows Program (http://writing.barnard.edu/writing-fellows/) offers students with strong writing, reading, and communication skills an opportunity to become writing fellows, peer tutors in writing. During their first semester in the program, students take a training course about the teaching of writing (ENGL BC3101 The Writer's Process: A Seminar in the Teaching of Writing), usually in the autumn term of their sophomore or junior year. Writing Fellows work in different settings (e.g., the Writing Center, writing-intensive courses across the curriculum) with Barnard undergraduates at all levels and in all disciplines. Writing Fellows receive a stipend and are asked to make a commitment of three semesters to the Program.

Writing-Intensive Courses Across the Disciplines

Students in these courses undertake at least three writing projects, each of which goes through at least two drafts. Writing Fellows read and confer with students on the first drafts of their papers, which students revise, handing in both first and second drafts to their instructors, who comment on and grade the revised drafts.

The departments of Anthropology, Architecture, Art History, Asian and Middle Eastern Cultures, Biology, Dance, Economics, Education, English, Environmental Science, French, History, Philosophy, Political Science, Psychology, Religion, Slavic, Sociology, Spanish, Theatre, and Women's Studies have offered writing-intensive courses. Both instructors and students report positive results. Students appreciate the help they get in revising drafts and experience significant gains in their writing skills. Instructors find that the revised papers they receive permit them to focus their comments on course content, rather than on the mechanics of writing.

The Speaking Center

Barnard Speaking Fellows are trained peer-to-peer educators who collaborate with students on building skills for speech communication. In addition to working with courses across the discipline, Speaking Fellows staff Barnard's Speaking Center (https://speaking.barnard.edu/) (second floor Barnard Hall). Any Barnard student is welcome to confer about a class presentation, job interview, or some broader aspect of speaking in public (e.g., how to articulate, organize, and structure thoughts for a presentation, or how to participate in class discussions). Students meet with Speaking Fellows to practice presenting their senior thesis, build confidence in leading or participating in seminar discussions, meeting with professors during office hours, articulating scientific research etc.
**Speaking Fellows Program**

Students with exceptional public speaking skills and an interest in helping their peers articulate their thoughts may apply for the Speaking Fellows Program. Before becoming a Speaking Fellow, students take a seminar and practicum in the theory and teaching of public speaking (ENGL BC3123 Rhetorical Choices: the Theory and Practice of Public Speaking), usually in the autumn term of their sophomore or junior year. As part of working with courses across the discipline, Speaking Fellows work with students on the fundamentals of public speaking, presentation-giving, negotiating, and other skills required for course assignments. They meet with Barnard students for the individualized and group workshops, and offer workshops on the art of listening, storytelling, helping with speech anxiety and more. The program approaches public speaking as a critical leadership ability and focuses on helping students know how to use rhetorical skills to have an impact on the world around them. Speaking Fellows receive a stipend and are asked to make a commitment of three semesters to the Program.

**Opportunity Programs**

The Opportunity Programs are the New York State-funded programs for New York State residents who meet demonstrate financial need and meet certain academic standards. These include the Higher Education Opportunity Program (HEOP) and the College Science and Technology Entry Program (CSTEP). Barnard also has a few slots (usually, annually, fewer than 10) for students who are not New York State residents who enter the Opportunity Programs as a BOP (Barnard Opportunity Program) student. The HEOP, CSTEP and BOP scholars receive additional support and advising to help them to help them transition into College, addressing, through programming, counseling, financial support, and other measures, the emotional, social, and academic challenges of being a low-income student or underrepresented/marginalized student at an elite institution.

**Arthur O. Eve Higher Education Opportunity Program**

The Arthur O. Eve Higher Education Opportunity Program (HEOP) is an academic support and financial assistance program for undergraduate New York State residents who meet New York State economic and education guidelines. HEOP provides academic tutoring, as well as individual counseling, workshops, study groups, and mentorship. All incoming HEOP students participate in an intensive residential summer academic program which includes instruction in English, mathematics, science, research, and public speaking skills.

**Collegiate Science and Technology Entry Program**

The Collegiate Science and Technology Entry Program (CSTEP) is a New York State Department of Education initiative designed to provide services to students from under-represented populations or economically disadvantaged backgrounds who are seeking careers in the sciences, mathematics and technological fields, and the licensed professions.

During the academic year, Barnard CSTEP provides academic counseling, academic and career development workshops, tutorial support, financial assistance for standardized test preparation and graduate/professional school admissions, and support for research experiences in STEM-content areas. CSTEP’s summer component introduces a selected cohort of incoming first-year Barnard students to academic enrichment in math and science gateway courses, writing, and graduate school/professional school/career advising tours.

**Dean for Student Success**

The Dean for Student Success in the Dean of the College area works to support all students who identify as first-generation or low-income, whether they are part of the Opportunity Programs or not. This position exists to help students advocate for their individual needs, as well as to create systemic changes at the College. The Dean for Student Success meets with students individually, and also provide programming, and oversees the student First-Gen/Low-Income Advisory Board. Students wishing to become involved with Barnard’s FGLI Advisory Board, or with the Columbia-Barnard FLIP (First-Gen, Low-Income Partnership) should come see the Dean for Student Success.

**Spelman Exchange Programs**

Barnard offers students the opportunity to participate in a domestic exchange program for a semester with the historically black institution: Spelman College. This exchange has aided in forming an alliance as a means of providing students with a truly enriching and intellectually stimulating experience. Barnard students studying at Spelman pay Spelman’s rates for tuition, fees, room, and board to Barnard. Students interested in a visiting experience at Spelman should speak to the Dean for Student Success.

**Study Abroad**

All students are encouraged to study abroad as an essential part of their Barnard education. Barnard offers exchanges and programs in over 40 countries around the world. Visit the Study Abroad website (https://barnard.edu/global/studyabroad/) for a list of all approved programs. Students who wish to participate in a semester study abroad program that is not on the approved list must submit a written petition in order to be approved. Courses taken at institutions abroad other than Columbia-led programs are treated as transfer credit.

Semester and academic year study abroad programs require advanced planning. Students are encouraged to meet with Study Abroad staff as soon as they are aware of their desire to go abroad. All Barnard students who plan to study abroad must also consult with their Class Dean, Major advisor, and Financial aid officer (if applicable). Courses from abroad must be submitted to the registrar in order to be evaluated for requirements and/or credit. A transcript from an accredited school of record must be sent to the Barnard registrar in order to be coursework from abroad to appear on a Barnard transcript.

Students pay Barnard tuition and an off-campus comprehensive fee for the period of study abroad. All other costs (housing, meals, other fees, etc.) are payable directly to the host institution at their own rate.

In order to study abroad for the semester or academic year Barnard students should meet the following criteria as set by the faculty:

- Have no outstanding incompletes;
- Be in good academic standing;
- Have worked out, in consultation with the Major advisor and Class Dean a plan for the completion of all major and general education requirements for graduation.
- Have two years or the equivalent* at the college-level of the language of the host country (this includes AP test scores, language proficiency exam or courses taken at another college or university), provided the language is offered at Barnard or Columbia. For students studying the sciences or mathematics
abroad, language requirements vary slightly. *Students who don’t meet these requirements may apply for an exemption through a written request.

Several short-term faculty led study abroad opportunities are also offered during the academic year as well as the summer. Students must complete an application and be accepted in order to be enrolled in the corresponding course. Courses and credit for faculty-led programs will appear as regular Barnard credit and courses.

Students who participate in other summer study abroad programs (including Columbia University) must complete the summer course approval process (https://barnard.edu/transfer-credits/) through the Barnard registrar in order to receive credit. Courses taken during a summer study abroad program are treated as transfer credit.

Students must adhere to their program’s code of conduct as well as Barnard’s Student Code of Conduct while abroad.

**Study at Jewish Theological Seminary**

The Jewish Theological Seminary of America (http://www.jtsa.edu/) (JTS), located two blocks from the Barnard campus, offers opportunities to Barnard students for specialized study under a cooperative arrangement. Students may enroll in courses at the Seminary under either of two options:

1. individual courses;
2. a double-degree program.

A student wishing to study at the Seminary should consult her adviser and obtain the written permission of the chair of her major department. Courses taken at the Jewish Theological Seminary are evaluated as transfer credit. Students who wish to obtain simultaneously the degree of Bachelor of Arts from Barnard and Bachelor of Hebrew Literature from the Seminary must consult the appropriate dean in the Dean of Studies Office at Barnard and at the Seminary’s List College and must be admitted separately to each institution.

Barnard students who are enrolled in the Double Degree Program may request housing at the Seminary. Double-degree students who enroll in the Seminary College will be subject to both Barnard and Seminary tuition charges and pay their student accounts separately to each institution. Students taking JTS courses pay the Seminary directly for those courses at the JTS rate.

**Study at the Juilliard School**

The Juilliard School (http://www.juilliard.edu/) at Lincoln Center offers opportunities to Barnard students for individual courses in music. For a five-year program leading to the Barnard A.B. and the Juilliard M.M., rigorous auditions are required for which early application must be made. Students interested in these options may obtain further information and audition dates by consulting Dr. Gail Archer, Coordinator of the Barnard Music Program (319 Milbank), at the time of admission to Barnard or as early as possible. Students enrolled at Barnard taking music lessons at Juilliard pay tuition only to Barnard. Students admitted to the Juilliard M.F.A. program pay tuition to Barnard for courses taken at Barnard and to Juilliard for courses taken at Juilliard.

**Study at the Manhattan School of Music**

The Manhattan School of Music (http://www.msmnyc.edu/) is located one block to the north of the Barnard campus. Under a cooperative program of cross-registration, musically qualified Barnard students who pass required auditions have the opportunity to enroll in six semesters of private instrumental lessons at the Manhattan School, subject to the regulations specified in the application form available at the Office of the Registrar. Majors and minors in Music may take eight semesters of lessons. Students must complete a Barnard approval form each semester before receiving permission to enroll at the Manhattan School. Students pay Barnard tuition.

**Study at Teachers College**

Permission is needed to take a course at Teachers College (http://www.tc.columbia.edu/). Students should obtain an application from the Office of the Registrar, obtain course approval from the Dean of Studies, and return the completed form to the Office of the Registrar. Teachers College courses require the payment of additional tuition at the Teachers College rate and above Barnard tuition.

**Joint Degree Intrauniversity Programs**

Barnard offers double and joint degrees in coordination with other schools in the University system, including the School of International and Public Affairs (http://www.sipa.columbia.edu/) (SI PA). Details on specific programs are given below.

**School of International and Public Affairs:**

International Affairs and Public Administration

Barnard College and the Columbia University School of International and Public Affairs (http://www.sipa.columbia.edu/) offer two joint programs leading to the A.B. degree at the end of four years and the Master of International Affairs (M.I.A.) or Master of Public Administration (M.P.A.) after one additional year.

Interested students should consult Dean Youngblood-Giles in Beyond Barnard in as early as the sophomore year. Qualified students complete the application in the spring of the junior year. The final decision on admission to a program rests with the SI PA Review Committee.

Admission to a joint program does not constitute automatic admission to the M.I.A. or M.P.A. graduate program. Final admission is conditional upon the applicant’s receiving the A.B. degree from Barnard. A Barnard student’s eligibility for the joint programs is governed by the following conditions:

2. At least four semesters of matriculation at Barnard before enrolling in a joint program.
3. Fulfillment of all general education requirements and almost all major requirements before the senior year.
4. No more than four courses in the major to be completed during the senior year.
5. Completion of introductory courses in microeconomics and macroeconomics and a strong background in quantitative courses.
6. Pertinent professional experience.

A Barnard student in the Program must satisfy all Barnard degree requirements. Courses in the School of International and Public
Affairs may be used to fulfill major requirements only with the written permission of the chair of the major department. During the senior years she must complete at least 24 points of course work at the 4000 level or above, including the first-year required core courses. An internship, usually during the summer between the fourth and fifth years, is also required.

Africana Studies

Programs Assistant: Ady Matos

The Discipline of Africana Studies
As a field of study, Africana Studies analyzes the history, cultures, modes of political thought and social movements engendered by the freedom struggles of black people. It engages as well the unfinished work of achieving fully enfranchised forms of citizenship and the many forms of expressive culture African diasporic communities have created and inspired as articulations of their histories, experiences, and struggles. In so doing, Africana Studies trains students in the analytical tools necessary for rigorous and culturally sensitive analyses of racial formation both historically and in contemporary societies.

Africana Studies Department
The Africana Studies major offers an interdisciplinary, comparative approach to the study of the history, politics, cultures, literatures, and experiences of peoples in Africa and the African Diaspora. Through this course of study, students come to see the centrality of Africa and the black Diaspora in the modern world and develop a critical understanding of the political, social and ideological forces that shape their place in the world. Our introductory courses encourage students to understand the world from multidisciplinary and transnational perspectives, to critically engage with primary and secondary materials, to develop key geographical knowledge and to engage in comparative analysis. In consultation with their Africana advisor, majors determine a course of study that draws from a range of disciplinary and/or theoretical perspectives. This coursework includes a required colloquium which grounds students in key theories and methodologies of the black Diaspora, a Harlem course that asks students to think about our historic location in relation to the larger Diaspora and a senior seminar that requires students to conduct groundbreaking research.

This multidisciplinary training not only involves a questioning of disciplinary boundaries, but also provides students with the intellectual tools necessary to think critically about the production and dissemination of knowledge. Our home in a premier college for women means that Africana Studies majors at Barnard develop a particular understanding of how gender and sexuality, as well as race, class, religion and region interact with and transform each other in individual and group experiences.

Mission
As a department for the multidisciplinary study of the history, politics, cultures, and literatures of Africa and African Diaspora communities in the Americas, the Caribbean and Europe, Africana Studies at Barnard is defined by a unique approach to studying the African Diaspora that centers on a gendered analysis of racial and diasporic formations. Its central mission is to train students to think critically about the gendered nature of racial difference from a relational perspective: at once locally, globally, and trans/nationally. The curriculum provides students with a deep knowledge of:

- the history of African and African-descended cultures forged prior to and as a result of the Middle Passage;
- the transnational communities of affiliation created in response to diasporic dispersal;
the diverse forms of cultural production engendered by Blacks in the multiple contact zones that constitute the African diaspora.

Student Learning Outcomes

Students who complete the major in Africana Studies should be able to attain the following outcomes:

1. integrate research tools and methods from a range of disciplines in order to study the history, politics, cultures, literatures, and experiences of peoples in Africa and the African Diaspora;
2. compare histories and cultures of black peoples across the globe;
3. evaluate and interpret primary and secondary source materials;
4. express themselves effectively in writing and oral presentations;
5. demonstrate their understanding of Harlem’s symbolic and historical importance to peoples of the African Diaspora;
6. identify and communicate the importance of Africa and the African Diaspora to an increasingly global, diverse and interconnected world;
7. demonstrate in their coursework knowledge of the key intellectual traditions of the African Diaspora;
8. analyze and critique representations of peoples or cultures of Africa and the African Diaspora;
9. design, execute and present an original research project.

This department is supervised by the Africana Studies Committee:

Chair: Yvette Christiansën (Africana Studies/English)

Professors: Tina Campt (Africana Studies/Women's, Gender and Sexuality Studies); Yvette Christiansën (Africana Studies/English); Kim F. Hall, (Africana Studies/English); J. Paul Martin (Adjunct/Human Rights); Celia E. Naylor (Africana Studies/History); Lesley A. Sharp (Anthropology)

Associate Professors: Severine Autesserre (Political Science); Kaiama L. Glover (French); Maja Horn (Spanish and Latin American Cultures); Brian Larkin (Anthropology); Monica M. Miller (English); Rose Razaghi (Africana Studies) Paul Sciori (Dance)

Assistant Professors: Lori Lynne Brooks (Women's Studies); Abosede George (History)

Senior Lecturer: Pamela Cobrin (English/Writing Program)

Senior Associate: Quandra Prettyman (Emerita, English)

II. Language

Each student must demonstrate proficiency in any of the languages of Africa or the diaspora (including Arabic, Dutch, English, French, Hausa, Italian, Portuguese, Spanish, and Swahili) by completing at least the fourth semester of that language, or its equivalent. This requirement is not in addition to the general foreign language requirement.

III. Harlem

Each student will take a course on Harlem, chosen in consultation with her advisor, from among the offerings at Barnard or Columbia.

IV. Electives

Each student will, with the approval of her advisor, select five electives. Of these five, one must be on Africa and one must concern issues of gender.

VI. Senior Seminar

Students will complete a one-semester program of interdisciplinary research in preparation of a senior essay.

Requirements for the Minor

Although the college requires students to declare the minor formally after they have completed course work for the minor, the Africana Studies program strongly encourages students to meet with the Africana Studies Director (or the minor advisor) to plan a course of study and fill out an "intent to minor" form.

The Africana minor consists of five courses to be distributed as follows:

<table>
<thead>
<tr>
<th>AFRS BC2004 Introduction to African Studies 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>AFRS BC2006 Introduction to the African Diaspora 3</td>
</tr>
</tbody>
</table>

One course on Harlem, chosen in consultation with her advisor, from among the offerings at Barnard or Columbia. Two electives chosen by students in consultation with the minor advisor.

AFRS BC2004 Introduction to African Studies. 3 points.

Interdisciplinary and thematic approach to the study of Africa, moving from pre-colonial through colonial and post-colonial periods to contemporary Africa. Focus will be on its history, societal relations, politics and the arts. The objective is to provide a critical survey of the history as well as the continuing debates in African Studies.

AFRS BC2006 Introduction to the African Diaspora. 3 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Multidisciplinary exploration of the Anglophone, Hispanic, and Francophone Caribbean. Discusses theories about the development and character of Caribbean societies; profiles representative islands; and explores enduring and contemporary issues in Caribbean Studies (race, color and class; politics and governance; political economy; the struggles for liberation; cultural identity and migration.) BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

AFRS BC2005 Caribbean Culture and Societies. 3 points.

Not offered during 2019-20 academic year.

Multidisciplinary exploration of the Anglophone, Hispanic, and Francophone Caribbean. Discusses theories about the development and character of Caribbean societies; profiles representative islands; and explores enduring and contemporary issues in Caribbean Studies (race, color and class; politics and governance; political economy; the struggles for liberation; cultural identity and migration.) BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

AFRS BC2006 Introduction to the African Diaspora. 3 points.

Interdisciplinary and thematic approach to the African diaspora in the Americas: its motivations, dimensions, consequences, and the importance and stakes of its study. Beginning with the contacts between Africans and the Portuguese in the 15th century, this class will open up diverse paths of inquiry as students attempt to answer questions, clear up misconceptions, and challenge assumptions about the presence of Africans in the 'New World.'
AFRS BC2010 Colonialism in Africa.  3 points.
Not offered during 2019-20 academic year.

This course will prepare students to examine diplomatic interactions involving African and European polities during the eighteenth and nineteenth century and the role that military force played in helping European nations secure access to territory and control of resources on the African continent. Students will also examine the vast array of forensic evidence (the broad range of ritual compacts and treaties, the forms of proof and the legal debates) that European merchants and political representatives used to secure entitlements to land and resources.

AFRS BC2510 Food, Ethnicity & Globalization.  3 points.
Not offered during 2019-20 academic year.

Prerequisites: None
Corequisites: None

When people produce, consume or refuse food, choices that often seem "natural," unthinking and highly personal are in fact daily acts of identity and belonging that place individuals in the global circulation of goods, people and resources. This course examines representations of food and foodways as a way of understanding the politics of representation and the complex interplay of race, ethnicity and gender. The course's units on Ethnicity, Migration and Identity; Food & Globalization; Food and Power; and the Politics of Pork, will allow students to understand foodways as key expressions or embodiments of cultural affiliations and food choices as linked to questions of morality and values.

AFRS BC3001 Politics of Gender in Contemporary South Africa.  1.5 point.

This course will only take place from September 23rd through October 9th.

This module is designed to offer mid-senior level students with an interest in African Studies an intensive engagement with the politics of gender and sexualities in specific African contexts of the c21. Although the module will include discussion of aspects of the sexual and gendered operations of colonial praxis, the concentration will be on the ways in which post-flag democracy cultures have taken up the question of gender and sexualities. We will explore debates on the representation and realities of lesbian and transgendered experiences, the meaning of race-based identity-politics within "new" democracies, the narratives of "the body" as they emerge through medical and religious discourses on "women," and discourses of "e-masculinization" and militarism. Note that this course will only run from September 16th through September 30th.

AFRS BC3009 Toni Morrison: An Ethical Poetics.  4 points.

Toni Morrison set herself a challenge: to engage language in complex literary ways in order to reveal the 'fact' of race in the lived experiences of Americans—those made to bear the burden of being 'raced,' those exercising the prerogative of 'racing,' and those who imagine that none of this applies to them. We travel with her artistic path from The Bluest Eye to her later novels to learn how her choice to create figurative, logical narratives seek their own understanding of the ethics of what she called the 'manageable, doable, modern human activity' of living in 'the house of race.'

**AFRS BC3120 History of African-American Music. 3 points.**

*Not offered during 2019-20 academic year.*

Survey interrogates the cultural and aesthetic development of a variety of interconnected musical genres - such as blues, jazz, gospel, soul, funk, R&B, hip-hop, classical and their ever changing same/names - viewed as complex human activities daringly danced at dangerous discourses inside and outside the American cultural mainstreams.

**AFRS BC3121 Black Women in America. 4 points.**

Prerequisites: Students must attend first day of class and admission will be decided then. Priority will be given to CCIS students (Africana Studies, American Studies and Women's Studies majors; minors in Race and Ethnic Studies). Enrollment limited to 20 students.

Examines the roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as WMST BC3121.

**AFRS BC3134 Unheard Voices: African Women's Literature. 4 points.**

How does one talk of women in Africa without thinking of Africa as a 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora.

**AFRS BC3146 African American and African Writing and the Screen. 4 points.**

*Not offered during 2019-20 academic year.*

Focuses on the context and history of representations of African Americans and Africans in early American and other cinematographies; the simultaneous development of early film and the New Negro, Negritude and Pan African movements; and pioneer African American and African cinema.

**AFRS BC3148 Literature of the Great Migration. 3 points.**

BC: Fulfillment of General Education Requirement: Literature (LIT).

*Not offered during 2019-20 academic year.*

(Also ENGL BC 3148) Examination of fiction, poetry, essays and films about the Great Migration (1910-1950) of African-Americans from the rural South to the urban North, focusing on literary production in New York and Chicago. (This course satisfies the Harlem Requirement for the Africana Studies major).

**AFRS BC3150 Race and Performance In The Caribbean. 4 points.**

*Not offered during 2019-20 academic year.*

Prerequisites: Permission of the instructor. Sophomore Standing. Enrollment limited to 18 students.

Analysis of the shifting place and perception of Afro-Caribbean performance in Caribbean societies. This course takes a cross-cultural approach that examines performance through the lens of ethnography, anthropology, music and literary criticism.

**AFRS BC3517 African American Women and Music. 3 points.**

*Not offered during 2019-20 academic year.*

Prerequisites: None

Corequisites: None

Examines the music making practices of African-American women in blues, gospel, jazz, and rock at different periods in the 20th century. Considers the content and context of these musical productions as well as artist biographies in order to understand the significance of music for these producers and their audiences.

**AFEN BC3525 Atlantic Crossings: The West Indies and the Atlantic World. 4 points.**

*Not offered during 2019-20 academic year.*

Prerequisites: Enrollment limited to 20 students.

This course examines the literature of transatlantic travel from Columbus's first voyage in 1492 to Caryl Phillips's re-tracing of his mother's migration in *The Atlantic Sound* (2000) to recent re-imaginings of slavery and the Middle Passage by M. Nourbese Philip and Marlon James. Even before Columbus's first encounter, the "Indies" sparked English desires for riches and adventure. We will first investigate how English writers promoted an idea of the West Indies and then came to inhabit its heterogeneous spaces, filling them with longing and anxiety. The class will chart the emergence of modern race thinking from the rich interaction of peoples and goods in the early modern Caribbean. We will also question how ideals of freedom and "English-ness" co-existed with slavery, bondage and creole life. The class will then look at the ways later writers revisit the Caribbean's colonial origins and discuss how notions of the West Indies may haunt modern Atlantic travel.

**AFRS BC3528 Harlem on My Mind: The Political Economy of Harlem. 4 points.**

Drawing on social histories, primary sources, fiction, and popular culture this course will explore the postwar history of Harlem. We will place Harlem in the broader context of New York City and explore how domestic and transnational migration patterns have shaped its history. Specific topics include: urbanization, migration and settlement patterns; racial liberalism and political incorporation; critical engagement with East Harlem as research cite for "culture of poverty" theorists; state criminalization of youth; underground, illegal and illicit economy from the 1960s to the 1990s; struggles over property and gentrification; and perhaps most importantly, exploring Harlem as cultural and political center of the Black World throughout the twentieth century.
AFRS BC3550 Harlem Seminar: Gay Harlem. 4 points.

Prerequisites: This course is limited to 20 students and by permission only.
This course explores Harlem’s role in the production of sexual modernity and in particular as a space of queer encounter. While much of our investigation will be devoted to the intersection of race and sexuality in African American life, we also consider Harlem’s history as a communal space for Italian, Puerto Rican, and more recent immigrants. Students will be encouraged to distinguish and connect contemporary sites of sexual culture in Harlem to the historical articulations of race and sexuality examined in the course.

AFRS BC3556 Ethnography of Black America. 4 points.
Not offered during 2019-20 academic year.

This course critically examines ethnographic texts about Blacks in the United States, focusing as much on what they proffer about Black American culture as on the various socio-political contexts in which this body of scholarship has been produced. The goal is to advance an understanding of the larger social forces undergirding the production not only of formations of Black culture, but also of knowledge about Black America. A further goal is to foster a critical understanding of the anthropological enterprise itself.

AFRS BC3560 Human Rights and Social Change in Sub-Saharan Africa. 4 points.

Prerequisites: Permission of the instructor.
Examines the evolution of the ideas, institutions and practices associated with social justice in Africa and their relationship to contemporary international human rights movement and focuses on the role of human rights in social change. A number of themes will re-occur throughout the course, notably tensions between norms and reality, cultural diversity, economic and political asymmetries, the role of external actors, and women as rights providers. Countries of special interest include Liberia, Senegal, South African and Tanzania.

AFRS BC3563 Translating Hispaniola. 4 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

Students will look at the extent to which the nation-language border separating Haiti and the Dominican Republic represents the legacy of a colonial history whose influence in many ways undermines regional community in the Caribbean to the present day. Beginning with Christopher Columbus’ fraught “discovery” of Hispaniola and ending with the 2010 earthquake and its aftermath, the course explores social, political, and cultural phenomena common to both nations – among which, slavery and freedom, Euro-North American imperialist intervention, and diaspora and migration – as these issues manifest in primary and secondary works of creative fiction, history, anthropology, and political theory. From oral histories to newspaper articles to short fiction by Junot Diaz and Edwidge Danticat, this course traces the history of a divided Caribbean family. Students will engage with recently created digital humanities resources concerning Haiti and the Dominican Republic and also develop interactive, web-based tools that allow for a more nuanced and expansive understanding of Hispaniola’s transnational past, present, and futures. Please note that there is no language requirement for this course.

AFRS BC3570 Africana Issues: Diasporas of the Indian Ocean. 4 points.
Not offered during 2019-20 academic year.

The Indian Ocean has been called the cradle of globalization, a claim bolstered by seasonal monsoon winds and the trade that these enabled. We will consider the aesthetic histories of such trade by engaging literary and other cultural exchanges (including film, visual arts, music, and dance). What did the Zulu prophet Isiah Shembe learn from Gujarati poets? Other than a major slaving center and source of spices, what role did Zanzibar play in the development of music and literary forms that look to Oman as well as the East Coast of Africa? We focus on four sites: Durban (South Africa), Bombay (India), Zanzibar (Tanzania) and Port Louis (Mauritius). This course will be taught simultaneously between Barnard in New York and the University of Witwatersrand in Johannesburg, South Africa. Students from both campuses will be encouraged to interact electronically and to establish a blog and website. The course will also have live-streamed guest speakers from chosen sites around the Indian Ocean.

AFRS BC3585 Poor in America: The Experience and Impact of Financial Deprivation. 3 points.
This course focuses on the life experiences and impact of poverty in the contemporary United States. We will be exploring the consequences of financial and material deprivation on work, housing, health, parenting, children, as well as the limits and opportunities for inter-generational mobility and how each of these intersect with gender, racial and ethnic identities. We will be learning about the experiences of individual persons as well as how these particular experiences reflect the overarching patterns of social, political and economic trends in the United States. The course will incorporate a diverse set of disciplinary perspectives to shed light on the challenges faced by persons living in poverty. In addition, there will be an emphasis on learning about and critically assessing methodological approaches applied in the literature. No prior knowledge of methods is required and any technical references will be explained in class.

AFRS BC3589 Black Feminism(s)/Womanism(s). 4 points.
Black Feminism(s)/Womanism(s)

AFRS BC3590 The Middle Passage. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Admission to this seminar is by application only. Applications will be made available on the Africana Studies website: www.barnard.edu/africana
In addition to learning about the history of the Middle Passage, students will examine literary and political responses to this forced immigration out of Africa. Identifying responses to slave holding pasts, the seminar culminates in a visit to an historic site of importance in the Middle Passage.

AFRS BC3998 Senior Seminar. 4 points.
A program of interdisciplinary research leading to the writing of the senior essay. All Africana majors must complete the one-semester
Africana Studies Senior Seminar in the fall and submit a senior essay as one of the requirements for this course. A student who has successfully completed the Africana Studies Senior Seminar, has demonstrated the ability to complete a senior thesis, and has obtained approval from the faculty member teaching the Senior Seminar may take an Independent Study with a Barnard or Columbia faculty member or a second thesis seminar in another department in order to complete a senior thesis in Africana Studies in the spring semester.

AFEN BC3815 The Worlds of Ntozake Shange and Digital Storytelling. 4 points.
Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at http://bit.ly/Ntozake2019. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Women's Studies. Students who successfully complete into this course will be eligible to take the second half of the course in Spring 2019. NOTE: There will be three extra sessions scheduled in the Digital Humanities Center. A poet, performance artist, playwright and novelist, Ntozake Shange's stylistic innovations in drama, poetry and fiction and attention to the untold lives of black women have made her an influential figure throughout American arts and in Feminist history. This semester will examine Shange's works in the context of political and artistic organizing by women of color in the 1970s and 80s. In addition to our analysis of primary texts, students will be introduced to archival research in Ntozake Shange's personal archive at Barnard College. This in-depth exploration of Shange's work and milieu is complemented with an introduction to digital tools, public research and archival practice. You can find more information and apply for the course at http://bit.ly/Ntozake2019 (http://bit.ly/Ntozake2019/). On Twitter @ShapeWorlds.

AFEN BC3816 The Worlds of Ntozake Shange and Digital Storytelling. 4 points.
Prerequisites: AFEN BC3815 or equivalent. This course has a prerequisite and an application: http://bit.ly/AFENBC3816 (http://bit.ly/AFENBC3816/). This hands-on, project based course introduces students to the use of digital tools and sources to organize and manage their archival research, creatively interpret their findings, and communicate their results to the public. This semester, the course is somewhat different from the usual research course in that, rather than simply going more deeply into the course focus, you will be asked to apply your knowledge to make new things. Working with the Barnard Digital Humanities Center, you will develop projects that teach some aspect of Shange's work and or feminist movements. But while making these new things, we will have ongoing discussions about the nature of digital life and evolving protocols for digital work. You will make plans to visit the archive appropriate to your project (in most cases this will be the Barnard Archives, but they might include sites such as The Billy Rose Theatre Division at the NYPL, or the Amiri Baraka collection at Columbia University) as well as doing background reading for your project. By the end of the semester, you'll have sharpened your research skills while also acquiring digital, teamwork, and project management skills that will be useful in other classes and beyond.

Enrollment limited to 40; not open to first-years. Not offered during 2019-20 academic year.
Prerequisites: Non-anthropology majors require the instructor’s permission.
Introduction to medical anthropology, exploring health, affliction, and healing cross-culturally. Draws from theory and methods to address critiques of biomedical, epidemiological, and other models of disease; the roles of healers in different societies; the inseparable nature of religion and healing; and different conceptions of the body and how this affects cultural conceptions of health.

ANTH V3660 Gender, Culture, and Human Rights. 3 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

ANTH V3943 Youth and Identity Politics in Africa. 4 points.
Enrollment limited to 15. Not offered during 2019-20 academic year.
Prerequisites: Permission of the instructor is required.
Examines ways in which African youth inevitably occupy two extremes in academic writings and the mass media: as victims of violence, or as instigators of social chaos. Considers youth as generating new cultural forms, as historically relevant actors, and informed social and/or political critics. At the core of such critiques lie possibilities for the agentive power of youth in Africa.

ANTH V3983 Ideas and Society in the Caribbean. 4 points.
Enrollment limited to 20. Not offered during 2019-20 academic year.
Focusing on the Anglo-Creole Caribbean, this course examines some aspects of popular culture, literary expression, political change, and intellectual movements over the past thirty years.

MDES W2030 Major Debates in the Study of Africa. 4 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL), CC/GS/SEAS: Partial Fulfillment of Global Core Requirement, Recitation Section Required
This course will focus on key debates that have shaped the study of Africa in the post-colonial African academy. We will cover seven key debates: (1) Historiography; (2) Slavery and slave trades; (3) State Formation; (4) Colonialism; (5) Underdevelopment; (6) Nationalism and the anti-colonial struggle; (7) Political Identity and political violence in the post-colony. Partial Fulfillment of Global Core Requirement.

CLRS W4190 Race, Ethnicity, and Narrative, in the Russian/Soviet Empire. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2019-20 academic year.
This course examines the literary construction of ethnic and cultural identity in texts drawn from the literatures of ethnic minorities and non-Slavic nationalities that coexist within the Russian and Soviet imperial space, with attention to the historical and political context in which literary discourses surrounding racial, ethnic, and cultural particularity develop. Organized around three major regions -- the Caucasus, Central Asia, and the Russian Far East -- readings include canonical “classics” by Altmatov, Iskander, and Rytkheu as well as less-known texts, both “official” and censored.

Center for the Study of Ethnicity and Race
CSER W1012 History of Racialization in the United States. 3 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.
The History of Racialization in the United States examines the development of race and racism through the study of significant historical circumstances that define the institutional structure of American Empire and of the resulting interactions among its peoples. Race is not static. Consequently, it is not an ahistorical object, nor a predetermined identity, nor a uniform category of analysis. Traditionally, the history of American race relations is the contact between racially defined groups over time and space of the effort required to maintain social and economic differences among them. Racialization, then, refers to the process by which one population group or many are “placed” in distinct racial categories.

DNCE BC3570 Latin American and Caribbean Dance: Identities in Motion. 3 points.
Not offered during 2019-20 academic year.
Examines the history and choreographic features of Latin American and Caribbean dance forms. Dances are analyzed in order to uncover the ways in which dancing shapes national, racial, and gender identities. Focuses on the globalization of these dances in New York City.

DNCE BC3578 Traditions of African-American Dance. 3 points.
Not offered during 2019-20 academic year.
Traces the development of African-American dance, emphasizing the contribution of black artists and the influence of black traditions on American theatrical dance. Major themes include the emergence of African-American concert dance, the transfer of vernacular forms to the concert stage, and issues of appropriation, cultural self-identification, and artistic hybridity.

DNCE BC3980 Performing the Political: Embodying Change in American Performance. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: An introductory course in dance or theatre history or permission of instructor. Enrollment limited to 12 students. Exploration into the politics of performance and the performance of politics through the lens of 20th-century American dance.

Economics
ECON W4438 Economics of Race in the U.S. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: ECON W3211 and ECON W3213. ECON W4400 is strongly recommended.
What differences does race make in the U.S. economy? Why does it make these differences? Are these differences things we should be concerned about? If so, what should be done? The course examines labor markets, housing markets, capital markets, crime, education, and the links among these markets. Both empirical and theoretical contributions are studied.

English & Comparative Literature

English (Barnard)
ENGL BC3129 Explorations of Black Literature: Early African-American Lit. 1760-1890. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).

Prerequisites: Enrollment limited to 18 students. Poetry, prose, fiction, and nonfiction, with special attention to the slave narrative. Includes Wheatley, Douglass, and Jacobs, but emphasis will be on less familiar writers such as Brown, Harper, Walker, Wilson, and Forten. Works by some 18th-century precursors will also be considered.

ENGL BC3144 Black Theatre. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 16 students. Exploration of Black Theater, specifically African-American performance traditions, as an intervening agent in racial, cultural, and national identity. African-American theatre artists to be examined include Amiri Baraka, Klaa Corthron, W.E.B. Du Bois, Angelina Grimke, Langston Hughes, Georgia Douglas Johnson, Adrienne Kennedy, Suzan-Lori Parks, Adrian Piper, and August Wilson. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

ENGL BC3190 Global Literature in English. 3 points.
Not offered during 2019-20 academic year.

Selective survey of fiction from the ex-colonies, focusing on the colonial encounter, cultural and political decolonization, and belonging and migration in the age of postcolonial imperialism. Areas covered include Africa (Achebe, Aidoo, Armah, Ngugi); the Arab World (Mahfouz, Munif, Salih, Souie); South Asia (Mistry, Rushdie, Suleri); the Caribbean (Kincaid); and New Zealand (Huime).

ENGL BC3194 Critical and Theoretical Perspectives on Literature: Marxist Literary Theory. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).
Not offered during 2019-20 academic year.

Evolution of Marxist criticism from Marx to Jameson and Eagleton. Central questions: What is unique about Marxist cultural analysis? What are the different Marxist schools of criticism? Is there a future for Marxism? Issues considered: capitalism and culture, class analysis, commitment, modernism and postmodernism, commodification and alienation, and postcolonialism.

ENGL BC3196 Home to Harlem: Literature of the Harlem Renaissance. 4 points.
In the spring of 2020, Home to Harlem will focus on Harlem as a crossroads, diasporic and transnational black mecca. Exploring the cultural contexts and aesthetic debates that animated Harlem in 1920s to 1930s, the course discusses the politics of literary and performative cultural production while exploring the fashioning of New Negro identity through fiction, poetry, essays, artwork and music. Topics considered include: role of Africa/slavery/the south in New Negro expression, patronage, passing, primitivism/popular culture, black dialect as literary language, and the problematics of creating a "racial" art in/for a diverse community comprised of differences in gender, class, sexuality, and geographical origin.

This course will partner with AfroSwedish hip-hop artist, writer, and activist Jason "Timbuktu" Diakité and Harlem Stage. Born to interracial American parents in Sweden (his father hails from Harlem), Diakité grew up between worlds, riding a delicate cultural and racial divide. His search to unify a complex system of family roots has taken him across continents, ethnicities, classes, colors, and eras to find a sense of belonging. In spring of 2020, he comes Home to Harlem when he performs a new stage version of his memoir, A Drop Of Midnight, at Harlem Stage.

French and Francophone Studies

FREN UN3421 Introduction To French and Francophone Studies II. 3 points.
Prerequisites: FREN UN3405 Advanced Grammar and Composition or an AP score of 5 or the director of undergraduate studies’ permission. Universalism vs. exceptionalism, tradition vs. modernity, integration and exclusion, racial, gender, regional, and national identities are considered in this introduction to the contemporary French-speaking world in Europe, the Americas, and Africa. Authors include: Aimé Césaire, Léopold Sedar Senghor, Frantz Fanon, Maryse Condé.

FREN BC3070 Negritude. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.
Analysis of the theoretical and literary precursors of négritude; major figures of the movement; relations with the Harlem Renaissance; and the formulation of creolity by contemporary Caribbean writers and thinkers. Authors will include Gobineau, Maran, Price-Mars, Hughes, McKay, Césaire, Senghor, Damas, Fanon, Sartre, Glissant, and Chamoiseau. Taught in French. General Education Requirement: Cultures in Comparison (CUL).

FREN BC3071 Major Literary Works of the French-Speaking World. 3 points.
Not offered during 2019-20 academic year.
Introduction to major works of fiction from the French speaking countries of the Caribbean, West Africa, North Africa and Indochina. Considers some of the principal authors of these regions, and examines the sociopolitical, historical, and aesthetic considerations that have influenced Francophone literary production in the twentieth century. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3072 Francophone Fiction: Special Topics. 4 points.
Looks at the portrayal of women as unsettling figures in the Francophone Caribbean literary universe. Examining the uncanny heroines in the novels of both male and female writers, students will identify the thematic commonalities and specific configurative strategies that emerge in the fictional representation of women in the region. The symbolic import of zombies, schizophrenics, and other "disordering" characters will be analyzed as indicators of and reflections on broader social realities. FREN BC1204: French Intermediate II or the equivalent level is required.

History
HIST W3540 History of the South. 3 points.
A survey of the history of the American South from the colonial era to the present day, with two purposes: first, to afford students an understanding of the special historical characteristics of the South and of southerners; and second, to explore what the experience of the South may teach about America as a nation. Group(s): D Field(s): US

HIST W3772 West African History. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
This course offers a survey of main themes in West African history over the last millennium, with particular emphasis on the period from the mid-15th through the 20th century. Themes include the age of West African empires (Ghana, Mali, Songhay); re-alignments of economic and political energies towards the Atlantic coast; the rise and decline of the trans-Atlantic trade in slaves; the advent and demise of colonial rule; and internal displacement, migrations, and revolutions. In the latter part of the course, we will appraise the continuities and ruptures of the colonial and post-colonial era. Group(s): D Field(s): US Limited enrollment. Priority given to senior history majors. After obtaining permission from the professor, please add yourself to the course wait list so the department can register you in the course.

HIST W4429 Telling About the South. 4 points.
A remarkable array of Southern historians, novelists, and essayists have done what Shreve McCann urges Quentin Compson to do in William Faulkner's Absalom, Absalom!—tell about the South—producing recognized masterpieces of American literature. Taking as examples certain writers of the 19th and 20th centuries, this course explores the issues they confronted, the relationship between time during which and about they wrote, and the art of the written word as exemplified in their work. Group(s): D Field(s): US Limited enrollment. Priority given to senior history majors. After obtaining permission from the professor, please add yourself to the course wait list so the department can register you in the course.

HIST W4768 Writing Contemporary African History. 4 points.
Prerequisites: the instructor’s permission. See undergraduate seminar section of the History Department’s website.
An exploration of the historiography of contemporary (post-1960) Africa, this course asks what African history is, what is unique about it, and what is at stake in its production. Field(s): AFR

HIST W4928 Comparative Slavery and Abolition in the Atlantic World. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: seminar application required. See undergraduate seminar section of the History Department's website.
This seminar investigates the experiences of slavery and freedom among African-descended people living and laboring in the various parts of the Atlantic World. The course will trace critical aspects of these two major, interconnected historical phenomena with an eye to how specific cases either manifested or troubled broader trends across various slaveholding societies. The first half of the course addresses the history of slavery and the second half pertains to experiences in emancipation. However, since the abolition of slavery occurs at different moments in various areas of the Atlantic World, the course will adhere to a thematic rather than a chronological structure, in its examination of the multiple avenues to freedom available in various regions. Weekly units will approach major themes relevant to both slavery and emancipation, such as racial epistemologies among slaveowners/employers, labor regimes in slave and free societies, cultural innovations among slave and freed communities, gendered discourses and sexual relations within slave and free communities,
and slaves' and free people's resistance to domination. The goal of this course is to broaden students' comprehension of the history of slavery and freedom, and to promote an understanding of the transition from slavery to freedom in the Americas as creating both continuities and ruptures in the structure and practices of the various societies concerned. HIST BC3402 Selected Topics in American Women's History. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Critical examination of recent trends in modern U.S. women's history, with particular attention to the intersection of gender, sexuality, class, and race. Topics will include: state regulation of marriage and sexuality, roots of modern feminism, altered meanings of motherhood and work, and changing views of the body.

HIST BC3546 The Fourteenth Amendment and Its Uses. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The role of the 14th Amendment in shaping the modern American Constitution; theories of judicial review; the rise and fall of economic due process; the creation of civil liberties; the civil rights revolution; and the end of states' rights.

HIST BC3587 Remembering Slavery: Critiquing Modern Representations of the Peculiar Institution. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The enslavement of people of African descent signifies a crucial historical and cultural marker not only for African-Americans but also for Americans in general. We will interrogate how and why images of slavery continue to be invoked within the American sociocultural landscape (e.g., in films, documentaries, historical novels, and science fiction).

HIST BC3763 Children and Childhood in African History. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

This course focuses on the history of childhood and youth in African societies and how young people as historical agents have impacted the social histories of their communities. How did young Africans live in past times? What forces shaped understanding of their status as children or youth? How have major historical processes such as colonialism, industrialization, apartheid, and liberation, neocolonialism, and neoliberalism impacted and been impacted by children and youth in Africa? What roles have young people themselves played in the making of African histories? These questions will be explored in course readings, discussions, and students' original research projects.

HIST BC3771 Critical Perspectives on the Mobilization of Race and Ethnicity on the Continent and in the Study of Africa. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Sophomore Standing.
Critically examines the relationship between social difference and narratives and practices of power in historical and contemporary African publics. Race and Ethnicity are the key axes of social difference that will be examined. Other axes of difference such as gender, sexuality, class, caste, generation and nationality will also be examined through points of intersection with race and ethnicity.

HIST BC3905 Capitalism, Colonialism, and Culture: A Global History. 4 points.
Not offered during 2019-20 academic year.

**Musical**

**MUSI V2020 Salsa, Soca, and Reggae: Popular Musics of the Caribbean. 3 points.**

A survey of the major syncretic urban popular music styles of the Caribbean, exploring their origins, development, and sociocultural context.

**MUSI W4435 Music and Performance in the African Postcolony. 3 points.**

Not offered during 2019-20 academic year.

This course examines music and performance in various African contexts, focusing on the postcolonial period. It will explore the complex interactions between music, politics, nation, race, and mediation through case studies from Ghana, Nigeria, DRC, Kenya, Tanzania, Zimbabwe, Namibia, and South Africa. In addition, discussions will involve what is meant to speak about "African music," and class will theorize about the conditions of musical production in the context of postcolonialism.

**MUSI GU4540 Histories of Post-1960's Jazz. 3 points.**

Prerequisites: HUMA W1123 or the equivalent. Historiographical issues surrounding the performance of jazz and improvised music after 1960. Topics include genre and canon formation, gender, race, and cultural nationalisms, economics and infrastructure, debates around art and the vernacular, globalization, and media reception. Reading knowledge of music is not required.

**Political Science (Barnard)**

**POLS BC3101 * Colloquium on Black Political Thought. 4 points.**

Not offered during 2019-20 academic year.

Prerequisites: POLS W1013 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#pt).

Advanced political theory colloquium treats black political thought as concerned with the universal problem of domination. Examines how black thinkers relate democracy, slavery and race, redefine race consciousness as linked fate; articulate new social theories to suggest new “meanings” for race; redefine the political to address social and aesthetic concerns.

**POLS V3604 Civil Wars and International Intervention in Africa. 3 points.**

Not offered during 2019-20 academic year.

Prerequisites: at least sophomore standing, except in consultation with the instructor. This course analyzes the causes of violence in civil wars. It examines the debates around emergency aid, peacekeeping and peacebuilding. In addition, it focuses on recent conflict situations in Africa—especially Congo, Sudan, and Rwanda—as a background against which to understand the distinct dynamics of violence, peace, and international interventions in civil conflicts. (Cross-listed by the Center for the Study of Ethnicity and Race.)

**POLS BC3810 *Colloquium on Aid, Politics & Violence in Africa. 4 points.**

Prerequisites: POLS UN1601 or the equivalent. Admission by application through the Barnard department only. Explores the concepts, theoretical traditions and debates around development and humanitarian aid, focusing on the relationships between aid, politics, and violence. It looks at the political and military impacts of aid, the linkage between humanitarian aid and conflict resolution, and aid’s contribution to perpetuating subtle forms of domination. (Cross-listed by the Africana Studies and the Human Rights Programs.)

American Studies Program

American Studies is a field defined not only by the critical questions it asks but by the interdisciplinary methods it uses to answer those questions. In considering the United States as a cultural, ideological, geographical and historical formation, students of American Studies examine how cultural configurations of and within the nation-state operate as social forces, contested archives of change, locus of power and resistance, and a site historical meaning and memory. How are ideologies and arrangements in the U.S. amplified, altered, challenged or contested? Through critical analysis, American Studies seeks to address these questions by considering how ideas and assumptions about the U.S. have been constituted through a range of competing and corroborating affiliations – gendered, racial, ethnic,
transnational, corporate — arrangements that continue to impact the world today.

**Mission**

The Program in American Studies is designed to teach students how to engage in the critical and interdisciplinary study of United States cultures in contemporary, historical and transnational contexts.

After an introductory course entitled “What Is American Studies?” students take an intensive junior colloquium focusing on theories and methods of American Studies. Their individually-chosen five-course concentration covers two historical periods and culminates in a two-course senior capstone project. The major aims to teach students to recognize, question and analyze American cultural practices in historical depth as well as global breadth.

**Student Learning Objectives**

Barnard students graduating with a degree in American Studies should be able to attain the following outcomes:

1. Demonstrate a critical understanding of American cultural practices and their complex inter-relationships with national and global structures of power.
2. Identify the cultural influences that have shaped American social formations including, but not limited to, history art, literature, politics, and religion.
3. Demonstrate an understanding of the various theoretical and interdisciplinary methods used by current scholars within the field of American studies.
4. Construct a sustained argument in a piece of original scholarship.

As an American Studies major, you will have the opportunity to take courses in the field of American Studies, but also in history, religion, visual culture, literature and other related disciplines and interdisciplinary fields. In addition to the introductory course “What Is American Studies?” and the junior colloquium, you will work with your American Studies adviser to devise a five-course concentration organized around a topic (for example: immigration, migration and ethnicity) and covering at least two historical periods. This student-designed cluster will serve as the intellectual foundation of your senior capstone project.

This program is supervised by the Committee on American Studies:

AMST BC1040 Incarcerating the Crisis. 3 points.
This course focuses on the structures and processes that led the U.S. to build the largest carceral regime on the planet in the post-1970s United States. Through readings, lectures, and original research, students will develop analyses of how this growth coincided with a shift in the racial composition of prisons from majority white to almost seventy percent people of color. Students will develop a number of concept such as race, class, gender, neoliberalism, abolition, policing, and surveillance that are foundational for analyzing the formation of the carceral state.

AMST BC1041 Critical Approaches to the Study of Ethnicity and Race. 4 points.
This seminar will introduce students to critical theories of race and ethnicity. It will familiarize students with interdisciplinary scholarship on power and difference, with a special focus on the historically specific relationships between race, capitalism, empire, dispossession, migration, political economy, and the U.S. state's regulation of gender and sexuality. Throughout the course, students will consider the political and economic critiques of race and power that have been articulated by antiracist freedom, anticolonial, feminist, queer of color, and immigrant labor struggles.

AMST BC1042 America and Early Modernity. 3 points.
This class explores the impact of the colonization of the Americas, and the introduction of the slave trade into the Americas, on the development of the Renaissance, the Scientific Revolution, and the early Enlightenment.

AMST BC1510 The Profits of Race. 3 points.
Does race appear in American life in the ways we make, distribute, and consume goods? If so, how? Through film, literary criticism, history, ethnography, and philosophy, this course will examine how race manifests as an economic relationship. We will focus on the legacies of chattel slavery, the interconnections of race and property, and ongoing struggles for racial justice. The course is grounded in what Cedric Robinson has referred to as the "Black radical tradition": a centuries-long intellectual and political tradition oriented towards contesting the definition of a specific group of people (Black people) as property. We will examine ways that this central economic claim, which underpinned the chattel slavery system, continues to appear in our own society, in prisons, international migration system, residential segregation, underemployment, and other ways.

AMST BC3300 Topics in American Studies: The Wealth of Natives. 4 points.
Not offered during 2019-20 academic year.

Indigenous people are often imagined in the distant past, or as living anachronisms in relation to contemporary life. Working against these assumptions, this course examines how Native peoples have survived colonialism, focusing on economic aspects of colonialism in North America. We will look at the long history of Native land struggles, and links between colonial economies and ecological destruction. Themes guiding our inquiry include: the development of wage labor, property law and economic production on Native lands, histories of political and economic dependency, "development" as defined and practiced over Native communities, and Native people's own economic choices. Our inquiry will be oriented towards deepening our ability to critically analyze the colonial situation we live in, and to see Indigenous survivals despite ongoing assaults against life and territory.

AMST BC3401 Junior Colloquium in American Studies. 4 points.
Introduction to the theoretical approaches of American Studies, as well as the methods and materials used in the interdisciplinary study of American society. Through close reading of a variety of texts (e.g., novels, films, essays), we will analyze the creation, maintenance, and transmission of cultural meaning within American society.

AMST BC3999 Independent Research. 3-4 points.

AMST BC3310 Planet America. 3 points.
This course is a semester-long engagement with the idea of internationalism from the perspective of U.S. culture, history, and politics. We will consider two forms of internationalism: internationalism from above, “imperialism,” and internationalism from below, “radical democracy.” We will engage long-standing models in the analysis of empire, and focus on cultural, economic, and political dimensions to examine the centrality of imperialism to the United States, and the history of the United States within a context of global histories. On the other hand, radical democratic movements and ideas have long been articulated in relation to the American project. Central to these movements is the necessity of articulating demands for justice not as matters of civil rights, but as human rights. The lectures and readings in this course will engage the body of scholarship known as “transnational American Studies” to think about America, as an idea, a set of institutions, and a way of being, within a larger world.

AMST BC3707 Global Radicalism. 4 points.
At the turn of the twentieth century, struggles against racism, capitalism, colonialism, and imperialism encircled the globe. From Irish republicanism in Dublin, Bolshevism in Moscow, revolution in Mexico City, to anti-lynching crusades in Birmingham, as well as all their unanticipated international alliances, these movements represented the largest waves of rebellion hitherto sustained by the global economy. This seminar offers an intensive overview of these various struggles and spaces. Through examination of primary and secondary sources, students will consider radical social movements from distinct yet overlapping cultural and political traditions. We will discuss how participants in these struggles confronted issues of gender, accumulation, and uneven development in their evolving revolutionary theories. Taking a uniquely spatial approach, we will observe how geographies of accumulation emerged alongside sites of global resistance. Throughout the course we will consider the contemporary relevance of these debates, observing how global radicalism might be charted in our present world.

Cross-Listed Courses

Africana Studies (Barnard)

AFRS BC2006 Introduction to the African Diaspora. 3 points.
Interdisciplinary and thematic approach to the African diaspora in the Americas: its motivations, dimensions, consequences, and the importance and stakes of its study. Beginning with the contacts between Africans and the Portuguese in the 15th century, this class will open up diverse paths of inquiry as students attempt to answer questions, clear up misconceptions, and challenge assumptions about the presence of Africans in the ‘New World.’

AFRS BC3110 The African Colloquium: Caribbean Women. 4 points.
Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 18 students. Priority will be given to Africana majors and CCIS students (Africana Studies, American Studies and Women’s Studies majors; minors in Race and Ethnic Studies).

AFRS BC3120 History of African-American Music. 3 points.
Not offered during 2019-20 academic year.

Survey interrogates the cultural and aesthetic development of a variety of interconnected musical genres - such as blues, jazz, gospel, soul, funk, R&B, hip-hop, classical and their ever changing same/names - viewed as complex human activities daringly danced at dangerous discourses inside and outside the American cultural mainstreams.

AFRS BC3121 Black Women in America. 4 points.
Prerequisites: Students must attend first day of class and admission will be decided then. Priority will be given to CCIS students (Africana Studies, American Studies and Women’s Studies majors; minors in Race and Ethnic Studies). Enrollment limited to 20 students. Examines the roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as “double jeopardy,” or “intersectionality”) developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as WMST BC3121.

Anthropology (Barnard)

ANTH UN2005 Ethnographic Imagination. 3 points.
Introduction to the theory and practice of “ethnography”—the intensive study of peoples’ lives as shaped by social relations, cultural images, and historical forces. Considers through critical reading of various kinds of texts (classic ethnographies, histories, journalism, novels, films) the ways in which understanding, interpreting, and representing the lived words of people—at home or abroad, in one place or transnationally, in the past or the present—can be accomplished.

**ANTH V3907 Posthumanism. 4 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2019-20 academic year.

Explores what a post-human anthropology might look like. Readings draw from anthropology, actor-network theory, science studies, media studies, and science fiction.

**ANTH V3950 Anthropology of Consumption. 4 points.**
Enrollment limited to 20. Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.

Examines theories and ethnographies of consumption, as well as the political economy of production and consumption. Compares historic and current consumptive practices, compares exchange-based economies with post-Fordist economies. Engages the work of Mauss, Marx, Godelier, Baudrillard, Appadurai, and Douglas, among others.

**ANTH V3954 Bodies and Machines: Anthropologies of Technology. 4 points.**

Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.

Examines how bodies become mechanized and machines embodied. Studies shifts in the status of the human under conditions of capitalist commodification and mass mediation. Readings consist of works on the fetish, repetition and automaticity, reification, and late modern technoprostheses.

**ANTH V3960 The Culture of Public Art and Display In New York City. 4 points.**

Enrollment limited to 16. Not offered during 2019-20 academic year.

Prerequisites: Students must sign-up in the Anthropology Department prior to registering for this course.

A field course and seminar considering the aesthetic, political, and sociocultural aspects of selected city museums, public spaces, and window displays.

**ANTH UN3966 Culture and Mental Health. 4 points.**

Enrollment limited to 20.

Prerequisites: the instructor’s permission. Limited to juniors & seniors.

This course considers mental disturbance and its relief by examining historical, anthropological, psychoanalytic and psychiatric notions of self, suffering, and cure. After exploring the ways in which conceptions of mental suffering and abnormality are produced, we look at specific kinds of psychic disturbances and at various methods for their alleviation.

**ANTH V3969 Specters of Culture. 4 points.**

Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.

Pursues the spectral effects of culture in the modern. Traces the ghostly remainders of cultural machineries, circuitries of voice, and representational forms crucial to modern discourse networks through a consideration of anthropologically significant, primarily nonwestern sites and various domains of social creation - performance, ritual practice, narrative production, and technological invention.

**ANTH V3974 Lost Worlds, Secret Spaces: Modernity and the Child. 4 points.**

Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.

Examines the figure of the child in modernity. Study of children and the delineation of a special time called childhood have been crucial to the modern imagination; for example, the child tended to be assimilated to the anthropological notion to the "primitive" (and vice versa), with repercussions ranging from psychoanalysis to painting, from philosophy to politics. Engages the centrality of the child through interdisciplinary readings in anthropology, history, children’s literature, art criticism, educational theory, and psychology.

**ANTH V3976 Anthropology and Science. 4 points.**

Not offered during 2019-20 academic year.
ANTH V3980 Nationalism. 4 points. Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission. Intended for seniors, but not necessarily anthropology majors.

This course will cover the basic readings in the contemporary debate over nationalism. It will cover different disciplinary approaches and especially look at recent studies of nationalism in the formerly colonial world as well as in the industrial West. The readings will offer a mix of both theoretical and empirical studies. The readings include the following: 1) Eric Hobsbawm’s *Nationalism since 1780*; 2) Ernest Gillier’s *Nations and Nationalism*; 3) Benedict Anderson’s *Imagined Communities*; 4) Anthony Smith’s *The Ethnic Origins of Nations*; 5) Linda Coley’s *Britons*; 6) Peter Sahlin’s *Boundaries*; and 7) Partha Chatterjee’s *The Nation and Its Fragments*.

**ENGL BC3179 American Literature to 1800. *3 points.***

This course surveys American literature written before 1800.

While we will devote some attention to the literary traditions that preceded British colonization, most of our readings will be of texts written in English between 1620 and 1800. These texts—histories, autobiographies, poems, plays, and novels—illuminate the complexity of this period of American culture. They tell stories of pilgrimage, colonization, and genocide; private piety and public life; manuscript and print publication; the growth of national identity (political, cultural, and literary); Puritanism, Quakerism, and Deism; race and gender; slavery and the beginnings of a movement towards its abolition. We will consider, as we read, the ways that these stories overlap and interconnect, and the ways that they shape texts of different periods and genres.

ENGL BC3196 Home to Harlem: Literature of the Harlem Renaissance. 4 points.
In the spring of 2020, Home to Harlem will focus on Harlem as a crossroads, diasporic and transnational black mecca. Exploring the cultural contexts and aesthetic debates that animated Harlem in 1920s to 1930s, the course discusses the politics of literary and performative cultural production while exploring the fashioning of New Negro identity through fiction, poetry, essays, artwork and music. Topics considered include: role of Africa/slavery/the south in New Negro expression, patronage, passing, primitivism/popular culture, black dialect as literary language, and the problematic of creating a “racial” art in/for a diverse community comprised of differences in gender, class, sexuality, and geographical origin.

This course will partner with AfroSwedish hip-hop artist, writer, and activist Jason ‘Timbuktu’ Diakité and Harlem Stage. Born to interracial American parents in Sweden (his father hails from Harlem), Diakité grew up between worlds, riding a delicate cultural and racial divide. His search to unify a complex system of family roots has taken him across continents, ethnicities, classes, colors, and eras to find a sense of belonging. In spring of 2020, he comes Home to Harlem when he performs a new stage version of his memoir, A Drop Of Midnight, at Harlem Stage.

MUSI W4420 Music and Property. 0 points.
Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.
This course raises the questions: 1) What does it mean to “own” music? 2) In what senses can music be conceptualized as “property?” and 3) How do divergent understandings of music’s status as “property” shape contemporary debates and discourses in the particular areas of disputes over “illegal downloading” of copyrighted music and the “repatriation” of Native American musical recordings as “cultural property?” Several relevant major recent statements will be considered and responses discussed. Case studies from ethnomusicological, anthropological, media studies and legal literatures engage issues of appropriation, the role of new technologies in shifting the terrain of musical ownership will be studied. Hands-on look at the Columbia Center for Ethnomusicology’s ongoing projects to repatriate historic recordings of Native American music (currently ‘owned’ by Columbia University) to the Navajo and Inupiat tribes.

RELI V2645 Religion in Black America: An Introduction. 3 points.
CC/CS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2019-20 academic year.
Undergraduate lecture course introducing students to the study of African American religion. While there are no required prerequisites for the course, prior coursework in religious studies or African American history is helpful. This course progresses as a historical survey and is intended to introduce students to important themes in African American (thus African) religious history (i.e. migration, urbanization, nationalism) through a rich engagement with the religious practices and traditions of black communities. Primary attention is given
to Afro-Protestantism in North America; however, throughout the course attention is directed to religious diversity and varying religious traditions/practices in different diasporic locales. While this is a lecture course, students are expected to arrive each week having completed assigned readings and prepared to make informed contributions to class discussions (as class size allows). By the end of the semester students will be expected to possess a working knowledge of major themes/figures/traditions in African American religious life, as well as key questions that have shaped the study thereof.

RELI V3602 Religion in America I. 3 points.

Survey of American religion from the Civil War to the present, with the emphasis on the ways religion has shaped American history, culture, identity.

RELI W4721 Religion and Social Justice. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of the instructor. Sophomore standing. Examines current debates on three topics (religious reasons in public discourse, human rights, and democracy). Also looks briefly at some uses of the Exodus story, focusing on Michael Walzer's study of its political uses, Edward Said's criticism of Walzer's use of it in connection with contemporary Israel, and its role in debates among African Americans in the nineteenth century.

RELI W4803 Religion Vs. The Academy. 4 points.
Prerequisites: Sophomore Standing. At least one course in Religion. Today we hear heated debates about the proper aims of education in relation to those of religion. The impact of the David Project's "Columbia Unbecoming" on the Department of MESAAS and the university as a whole (2008) is a case in point. More recently (2014), in response to threatened legal action from the Hindu right, Penguin Press of India has withdrawn Wendy Doniger's book "The Hindus" from circulation, generating an international controversy. This course focuses on case studies from India and the United States-sometimes parallel, sometimes divergent, sometimes overlapping. Wendy Doniger and Gurinder Singh Mann will be guests.

RELI W4805 Secular and Spiritual America. 4 points.
Priority given to majors and concentrators.
Are Americans becoming more secular or more spiritual (not religious), or both? What are the connections between secularism and what is typically called non-organized religion or the spiritual in the United States? We will address these questions by looking at some of the historical trajectories that shape contemporary debates and designations (differences) between spiritual, secular and religious.

Not offered during 2019-20 academic year.

Prerequisites: Sophomore Standing. SOCI BC1003 or permission of the instructor. Enrollment limited to 20 students. Post-1965 immigration in the U.S. has prompted conflicts between new immigrant groups and established racial and ethnic groups. This seminar explores ethnic conflict and unrest that takes place in the streets, workplace, and everyday social life. Focus is on sociological theories that explain the tensions associated with the arrival of new immigrants.

SOCI W3936 Sociology and the Public. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Sociological Imagination (SOCI V1202) or The Social World (SOCI W1000) (not required). This course explores how sociologists address pressing public concerns. With a focus on contemporary American issues, we will discuss: (1) how particular problems are identified; (2) what resolutions are put forth, who is likely to achieve them, and how; (3) what the audience is (and should be) for such work.

Spanish and Latin American Cultures (Barnard)
SPAN UN3350 Hispanic Cultures II: Enlightenment to the Present. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course surveys cultural production of Spain and Spanish America from the eighteenth to the twenty-first centuries. Students will acquire the knowledge needed for the study of the cultural manifestations of the Hispanic world in the context of modernity. Among the issues and events studied will be the Enlightenment as ideology and practice, the Napoleonic invasion of Spain, the wars of Spanish American independence, the fin-de-siècle and the cultural avant-gardes, the wars and revolutions of the twentieth century (Spanish Civil War, the Mexican and Cuban revolutions), neoliberalism, globalization, and the Hispanic presence in the United States. The goal of the course is to study some key moments of this trajectory through the analysis of representative texts, documents, and works of art. Class discussions will seek to situate the works studied within the political and cultural currents and debates of the time. All primary materials, class discussion, and assignments are in Spanish. This course is required for the major and the concentration in Hispanic Studies.
Prerequisites: Students must attend first class. Examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey research, quantitative studies, and participant observation will provide perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment.

URBS V3420 Introduction to Urban Sociology. 3 points.
WMST BC3121 Black Women in America. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students.
Examines roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as AFRS BC3121 Black Women in America.

WMST BC3131 Women and Science. 4 points.
Prerequisites: Enrollment limited to 18 students.
History and politics of women's involvement with science. Women's contributions to scientific discovery in various fields, accounts by women scientists, engineers, and physicians, issues of science education. Feminist critiques of biological research and of the institution of science.

WMST UN3311 Colloquium in Feminist Theory. 4 points.
Prerequisites: LIMITED TO 20 BY INSTRUC PERM; ATTEND FIRST CLASS
An exploration of the relationship between new feminist theory and feminist practice, both within the academy and in the realm of political organizing.

WMST V3312 Theorizing Activism. 4 points.
Prerequisites: Critical Approaches or Feminist Theory or permission of instructor.
Helps students develop and apply useful theoretical models to feminist organizing on local and international levels. It involves reading, presentations, and seminar reports. Students use first-hand knowledge of the practices of specific women's activist organizations for theoretical work.

WMST W4301 Early Jewish Women Immigrant Writers: 1900-1939. 4 points.
BC: Fulfillment of General Education Requirement: Literature (LIT). Enrollment limited to 15.
Prerequisites: students must attend first day of class and admission will be decided then.
Covers significant pre-Holocaust texts (including Yiddish fiction in translation) by U.S. Ashkenazi women and analyzes the tensions between upholding Jewish identity and the necessity and/or inevitability of integration and assimilation. It also examines women's quests to realize their full potential in Jewish and non-Jewish communities on both sides of the Atlantic.

WMST W4304 Gender and HIV/AIDS. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of instructor. Enrollment limited to 15 students.
An interdisciplinary exploration of feminist approaches to HIV/AIDS with emphasis on the nexus of science and social justice.

WMST W4308 Sexuality and Science. 4 points.
Not offered during 2019-20 academic year.
Examines scientific research on human sexuality, from early sexology through contemporary studies of biology and sexual orientation, surveys of sexual behavior, and the development and testing of Viagra. How does such research incorporate, reflect, and reshape cultural ideas about sexuality? How is it useful, and for whom?

WMST W4309 Sex, Gender and Transgender Queries. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Enrollment limited to 20 students.
Sex, sexual identity, and the body are produced in and through time. "Trans" – as an identity, a set of practices, a question, a site, or as a verb of change and connection – is a relatively new term which this course will situate in theory, time, discipline, and through the study of representation.

WMST W4320 Queer Theories and Histories. 4 points.
Enrollment limited to 20. Not offered during 2019-20 academic year.
The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections...
between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldúa, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

General Anthropology Major

411 Milbank Hall
212-854-9389
anthropology.barnard.edu (http://anthropology.barnard.edu/department-anthropology/)
Faculty Department Assistant: Fabiola Lafontant

The Discipline of Anthropology

Anthropology examines the social worlds people create and inhabit. It is a comparative discipline that takes seriously the differences between societies across the globe and through time. Historically, anthropologists studied non-European societies, describing their social and linguistic systems, their patterns of thought and culture and by doing so they aimed to throw into relief the contingency of normative Western assumptions.

Contemporary anthropology examines a very different landscape. It seeks to examine not just the diversity of cultural practices but to understand how societies clash, mutually interact and are interconnected through movements of goods, people, ideas, culture and politics. Anthropology today is thus more genuinely cross-cultural than it once was. Anthropologists conduct research with urban New Yorkers as often as with Mayan peasants, with genetic scientists as much as with spirit adepts and seek to understand the increasingly complex interconnections of people around the world.

The Department of Anthropology

Our faculty specialize in science and medicine, technology and media, religion, language and cognition, visual and material culture, colonialism and postcolonialism, and conservation and the environment. We conduct research in Africa, the U.S., Oceania, the Middle East and Latin America and in doing so we use a variety of foci, tacking between the immediacy of local modes of lived experience and broader social and political transformations.

Mission

Anthropology seeks to prepare students to succeed in a globalized world. It provides them with the skills to identify problems in intercultural settings, to recognize alternative lived realities, to discuss solutions with colleagues of diverse backgrounds, and to communicate those solutions to broader publics.

Student Learning Outcomes

Upon successfully completing the major, students should be able to attain the following outcomes:

- Articulate key methodological and theoretical debates in the history of the discipline;
- Compare and use distinct analytical frameworks for interpreting meaningful social behavior, detecting patterns and thinking comparatively across social domains, cultures and contexts;
- Develop an anthropological sensibility that enables one to distill social meaning from everyday encounters with individuals, material objects, texts and other social phenomena;
- Undertake ethnographic, linguistic or archaeological fieldwork using the appropriate methods;
- Conceptualize, undertake, and present an original research project by the end of the senior year.

The department also cooperates with related programs such as Africana Studies, American Studies, Human Rights, Urban Studies, and Women’s Studies. Arrangements for combined, double, joint, and special majors are made in consultation with the chair.

Chair: Lesley A. Sharp (Professor & Director of the Medical Anthropology Track)

Professors: Nadia Abu El-Haj, Brian Larkin (Tow Associate Professor), Lesley A. Sharp (Barbara Chamberlain & Helen Chamberlain Josefsberg ’30 Professor), Paige West (The Claire Tow Professor)

Associate Professor: Severin Fowles

Assistant Professor: Mara Green

Assistant Professor of Practice, Anthropology & Human Rights: J.c. Salyer

Professors Emeriti: Abraham Rosman, Nan Rothschild

For a list of other officers of the University offering courses in Anthropology, please see the Columbia Anthropology department website: https://anthropology.columbia.edu/people (https://anthropology.columbia.edu/people/)

Requirements for the Major

Every major is urged to acquire a general knowledge of three of the four fields of anthropology (social and linguistic anthropology, archaeology, and physical anthropology) and of their interrelationship. To this end, the student’s program should be designed in consultation with her adviser as soon as possible after the declaration of the major. Continuing and frequent meetings with the adviser are encouraged.

Eleven courses are required for the major, including:

Select six electives, one of which can be a third introductory level class and three of which must be 3000 level or higher. Moreover, the three 3000 level or higher seminars must be taken at Barnard or Columbia (not while on an exchange program during junior year).

In consultation with advisers, programs will be designed to reflect the students’ interests and plans—whether they intend to go on to graduate studies in anthropology or expect to enter other fields.
It is recommended that students who plan to major and in socio-cultural anthropology take ANTH BC3868 Ethnographic Field Research in New York City (y) before their senior year. Many seniors choose to incorporate a fieldwork component in their thesis research and having some experience of field methods is extremely important. Those interested in other sub-disciplines may wish to take this or another “methods” course and should consult their advisers. Students are also encouraged to check listings for courses offered by EEEB at Columbia for possible Anthropology credit, in consultation with the Barnard department chair.

Senior Essay
All students majoring in Anthropology are required to submit an essay of substantial length and scholarly depth. Such a paper will usually be written during the course of ANTH BC3871 Senior Thesis Seminar: Problems in Anthropological Research—ANTH BC3872 Senior Thesis Seminar: Problems in Anthropological Research.

Requirements for the Minor
The minor consists of five courses:
ANTH UN1002 The Interpretation of Culture
Select one of the following introductory courses:
ANTH UN1007 The Origins of Human Society
ANTH UN1008 The Rise of Civilization
ANTH UN1009 Introduction to Language and Culture
EEEB UN1010 Human Origins and Evolution
Select three other Anthropology courses, two of which must be 3000-level.

Course Offerings:
ANTH UN1002 The Interpretation of Culture. 3 points.
The anthropological approach to the study of culture and human society. Case studies from ethnography are used in exploring the universality of cultural categories (social organization, economy, law, belief system, art, etc.) and the range of variation among human societies.

ANTH UN3040 Anthropological Theory I. 4 points.
Open to majors; all others with instructor’s permission.

Prerequisites: an introductory course in anthropology. Institutions of social life. Kinship and locality in the structuring of society. Monographs dealing with both literate and nonliterate societies will be discussed in the context of anthropological fieldwork methods. Required of all Anthropology majors (and tracks) within the Barnard Department. As of Fall, 2018, UN 3040 replaces the two semester sequence of 3040/4041 Anthropological Theory I/II). Intended only for Barnard majors and minors.

**ANTH UN3041 Anthropological Theory II. 3 points.**
Prerequisites: Required of all Barnard Anthropology majors; open to other students with instructor's permission only. To be taken in conjunction with ANTH 3040, preferably in sequence. The second of a two semester sequence intended to introduce departmental majors to key readings in social theory that have been constitutive of the rise and contemporary practice of modern anthropology. The goal is to understand historical and current intellectual debates within the discipline. This course replaces ANTH V 3041 - Theories of Culture: Past and Present.

**ANTH BC3871 Senior Thesis Seminar: Problems in Anthropological Research. 4 points.**
Prerequisites: Limited to Barnard Anthropology Seniors. Offered every Fall. Research of methods and planning and writing of a Senior Essay in Anthropology will accompany research on problems of interest to students, culminating in the writing of individual Senior Essays. The advisory system requires periodic consultation and discussion between the student and her adviser as well as the meeting of specific deadlines set by the department each semester. Limited to Barnard Senior Anthropology Majors.

**ANTH BC3872 Senior Thesis Seminar: Problems in Anthropological Research. 4 points.**
Prerequisites: Must complete ANTH BC3871x. Limited to Barnard Senior Anthropology Majors.
Offered every Spring. Discussion of research methods and planning and writing of a Senior Essay in Anthropology will accompany research on problems of interest to students, culminating in the writing of individual Senior Essays. The advisory system requires periodic consultation and discussion between the student and her adviser as well as the meeting of specific deadlines set by the department each semester.

**EEEB 1010 Human Origins and Evolution. 3 points.**
CC/GS: Partial Fulfillment of Science Requirement Lab fee: $25. Taught every fall.
This is an introductory course in human evolution. Building on a foundation of evolutionary theory, students explore primate behavioral morphology and then trace the last 65 million years of primate evolution from the earliest Paleocene forms to the fossil remains of earliest humans and human relatives. Along with Behavioral Biology of the Living Primates this serves as a core required class for the EBHS program.

**ANTH V3810 Madagascar. 4 points.**
Enrollment limit is 15. Not offered during 2019-20 academic year.
Prerequisites: Non-Anthropology majors require the instructor’s permission. Critiques the many ways the great Red Island has been described and imagined by explorers, colonists, social scientists, and historians—as an Asian-African amalgamation, an ecological paradise, and a microcosm of the Indian Ocean. Religious diasporas, mercantilism, colonization, enslavement, and race and nation define key categories of comparative analysis.

**ANTH V3873 Language and Politics. 4 points.**
Not offered during 2019-20 academic year.
Language is central to political process. While all agree that language is used to symbolize or express political action, the main focus of this course is on how language and other communicative practices contribute to the creation of political stances, events, and forms of order. Topics addressed include political rhetoric and ritual; political communication and publics; discrimination and hierarchy; language and the legitimation of authority; as well as the role of language in nationalism, state formation, and in other sociopolitical movements, like feminism and diasporic communities. Since this course has the good fortune of coinciding with the 2012 U.S. Presidential election, we will make significant use of campaign rhetorics as a means of illustrating and exploring various themes.

**ANTH V3660 Gender, Culture, and Human Rights. 3 points.**

**ANTH BC3868 Ethnographic Field Research in New York City. 4 points.**
Prerequisites: Recommended for majors prior to the senior year. Open to non-majors by permission of the instructor. Enrollment limited to 20 students. A seminar-practicum on field research in New York City. Exploration of anthropological field research methods followed by supervised individual field research on selected topics in urban settings.

**EEEB 1010 Human Origins and Evolution. 3 points.**
EEEB 1010 001/54945 M W 11:40am - 12:55pm Jill Shapiro 3 74/86 517 Hamilton Hall

**ANTH V3917 Social Theory and Radical Critique in Ethnic Studies. 4 points.**

**ANTH UN3921 Anticolonialism. 4 points.**
Enrollment limited to 20.
Through a careful exploration of the argument and style of five vivid anticolonial texts, Mahatma Gandhi’s *Hind Swaraj*, C.L.R. James’ *The Black Jacobins*, Aimé Césaire’s *Discourse on Colonialism*, and *The Black Jacobins*, Aimé Césaire’s *Discourse on Colonialism*,
Albert Memmi’s *Colonizer and Colonized*, and Frantz Fanon’s *The Wretched of the Earth*, this course aims to inquire into the construction of the image of colonialism and its projected aftermaths established in anti-colonial discourse.

**ANTH V3922 The Emergence of State. 4 points.**
Not offered during 2019-20 academic year.

The creation of the earliest states out of simpler societies was a momentous change in human history. This course examines major theories proposed to account for that process, including population pressure, warfare, urbanism, class conflict, technological innovation, resource management, political conflict and cooperation, economic specialization and exchange, religion/ideology, and information processing.

**ANTH V3949 Sorcery and Magic. 4 points.**
Enrollment limited to 40.

Prerequisites: the instructor’s permission.
An introduction to the occult sides of making history, colonialism, and transforming reality through the study of south American shamanism, magic in Shakespeare’s Tempest, sexual magic in politics and dictatorships, the uncanniness in Freud’s hysterics, and William Burroughs’ Cities of the Red Night.

**ANTH V3970 Biological Basis of Human Variation. 4 points.**
Enrollment limited to 15. Not offered during 2019-20 academic year.

Prerequisites: ANEB V1010 and the instructor’s permission.
Biological evidence for the modern human diversity at the molecular, phenotypical, and behavioral levels, as distributed geographically.

**ANTH V3977 Trauma. 4 points.**
Enrollment limited to 20. Not offered during 2019-20 academic year.

Prerequisites: Instructor's permission.
Investing trauma from interdisciplinary perspectives, the course explores connections between the interpersonal, social, and political events that precipitate traumatic reactions and their individual and collective ramifications. After examining the consequences of political repression and violence, the spread of trauma within and across communities, the making of memories and flashbacks, and the role of public testimony and psychotherapy in alleviating traumatic reactions.

**ANTH V3979 Fluent Bodies. 4 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

The recent proliferation of writings on the social significations of the human body have brought to the fore the epistemological, disciplinary, and ideological structures that have participated in creating a dimension of the human body that goes beyond its physical consideration. The course, within the context of anthropology, has two considerations, a historical one and a contemporary one. If anthropology can be construed as the study of human society and culture, then, following Marcel Mauss, this study must be considered the actual, physical bodies that constitute the social and the cultural.

**ANTH V3980 Nationalism. 4 points.**
Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission. Intended for seniors, but not necessarily anthropology majors.

This course will cover the basic readings in the contemporary debate over nationalism. It will cover different disciplinary approaches and especially look at recent studies of nationalism in the formerly colonial world as well as in the industrial West. The readings will offer a mix of both theoretical and empirical studies. The readings include the following: 1) Eric Hobsbawm’s *Nationalism since 1780*; 2) Ernest Gilber’s *Nations and Nationalism*; 3) Benedict Anderson’s *Imagined Communities*; 4) Anthony Smith’s *The Ethnic Origins of Nations*; 5) Linda Coley’s *Britons*; 6) Peter Sahlins’s *Boundaries*; and 7) Partha Chatterjee’s *The Nation and Its Fragments.*

**ANTH W4065 Archaeology of Idols. 3 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

Prerequisites: Sophomore standing.
Explores 40,000 years of the human creation of, entanglement with, enchantment by, and violence towards idols. Case studies roam from the Paleolithic to Petra and from the Hopi to the Taliban, and the theoretical questions posed include the problem of representation, iconoclasm, fetishism and the sacred.

**Cross-Listed Courses:**
**Africana Studies (Barnard)**
**AFRS BC3556 Ethnography of Black America. 4 points.**
Not offered during 2019-20 academic year.

This course critically examines ethnographic texts about Blacks in the United States, focusing as much on what they proffer about Black American culture as on the various socio-political contexts in which this body of scholarship has been produced. The goal is to advance an understanding of the larger social forces undergirding the production not only of formations of Black culture, but also of knowledge about Black America. A further goal is to foster a critical understanding of the anthropological enterprise itself.

**Ecology, Evolution, and Environmental Biology**
**EEEB GU4700 Race: The Tangled History of a Biological Concept. 4 points.**
Enrollment limited to 15. Priority given to EBHS majors/concentrators. Not offered during 2019-20 academic year.

From Aristotle to the 2020 US census, this course examines the history of race as a biological concept. It explores the complex relationship between the scientific study of biological differences-real, imagined, or invented and the historical and cultural factors involved in the development and expression of “racial ideas.” Scientific background not required. [Additional hour for film screenings weekly in second half of the semester–attendance at films is mandatory.] Please note that this course DOES NOT fulfill the SC requirement at the College or GS.

**Other Offerings Not Taught This Year:**
**ANTH V3853 Moving Truths: The Anthropology of Transnational Advocacy Networks. 4 points.**
Not offered during 2019-20 academic year.

Transnational advocacy is an increasingly important dimension of contemporary globalization, reconfiguring relations of knowledge, power, and possibility across cultures and societies. As sites for enacting expertise, activism, and legality, transnational advocacy networks are crucial for not only making claims and causes mobile...
across locales, but for making them moving within locales — affective and effective. While transnational advocacy networks are often studied by political scientists, this course focuses on a growing body of anthropological and ethnographic research.

**ANTH V3015 Chinese Society. 3 points.**  
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).  
**Not offered during 2019-20 academic year.**

Social organization and social change in China from late imperial times to the present. Major topics include family, kinship, community, stratification, and the relationships between the state and local society.

**ANTH V3044 Symbolic Anthropology. 3 points.**  
Not offered during 2019-20 academic year.

Exploration of the manner in which various anthropologists have constructed “culture” as being constituted of a set of conventional signs called “symbols” and the consequences of such a construal. Among the authors read are the anthropologists Valentine Daniel, Mary Douglas, Clifford Geertz, Claude Levi-Strauss, Sherry Ortner, David Schneider, Margaret Trawick, and Victor Turner; the social theorists Emile Durkheim, Karl Marx, and Max Weber; the semioticians Ferdinand de Saussure and Charles Peirce; and the psychoanalysts Sigmund Freud and Jacques Lacan.

**ANTH V3055 Strategy of Archaeology. 3 points.**  
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).  
**Not offered during 2019-20 academic year.**

**ANTH W3201 Introductory Survey of Biological Anthropology. 4 points.**  
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).  
**Not offered during 2019-20 academic year.**

**ANTH UN3300 Pre-Columbian Histories of Native America. 3 points.**  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement  
Enrollment limited to 40.

This course explores 10,000 years of the North American archaeological record, bringing to light the unwritten histories of Native Americans prior to European contact. Detailed consideration of major pre-Columbian sites is interwoven with the insight of contemporary native peoples to provide both a scientific and humanist reconstruction of the past.

**ANTH V3525 Introduction to South Asian History and Culture. 3 points.**  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement  
**Not offered during 2019-20 academic year.**

Examines four major aspects of contemporary South Asian societies: nationalism, religious reform, gender, and caste. Provides a critical survey of the history of and continuing debates over these critical themes of society, politics, and culture in South Asia. Readings consist of primary texts that were part of the original debates and secondary sources that represent the current scholarly assessment on these subjects.

**ANTH V3700 Colloquium: Anthropological Research Problems in Complex Societies. 4 points.**  
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

This course will examine cities in comparative perspective, over time and space, from several viewpoints. We will examine how and when they develop, how they function, and what urban life is like. Is the urban experience the same for all residents? At all times? In all places? We will begin with theory and some urban history and then focus on New York as a laboratory, from its origins to the present. The course involves a kind of archaeology called "ethnoarchaeology" in which we look at living societies and communities in order to gain a better understanding of past and present. Our examination of contemporary urban life pays special attention to spatial organization and order, the geography of power in the urban landscape, and to material things, as these are the kinds of data that archaeologists typically focus on.

**ANTH V3913 Ancient Egyptian Culture. 4 points.**  
Not offered during 2019-20 academic year.

Ancient Egypt was one of the most advanced cultures in antiquity. This course will go beyond the pyramids and pharaohs to investigate the culture and daily life of the ancient Egyptians from the Old Kingdom to the Hellenistic period. Students will learn about ancient Egyptian magic, emotion, cosmogony, education, recreation, travel, and diplomacy by reading ancient Egyptian folklore, dream spells, love poetry, wisdom texts, religious hymns, and royal propaganda in translation. In addition to exploring the laws, occupations, and medical knowledge of the ancient Egyptians, we will also analyze how gender, race, sexuality, class, and disability were constructed and represented.

**ANTH V3920 Economy and Society in Prehistory. 4 points.**  
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).  
Enrollment limited to 15.  
**Not offered during 2019-20 academic year.**

Prerequisites: Introduction to Archaeology or permission of the instructor required.

**ANTH V3940 Ethnographies of the Mid East. 4 points.**  
Not offered during 2019-20 academic year.

Prerequisites: Previous enrollment in an Anthropology course. Sophomore standing. Enrollment limited to 20 students. Explores the themes that have shaped ethnographic literature of the Middle East. These include topics such as colonialism, gender, Islam, nationalism and the nation-state.

**ANTH V3943 Youth and Identity Politics in Africa. 4 points.**  
Enrollment limited to 15.  
**Not offered during 2019-20 academic year.**

Prerequisites: Permission of the instructor is required.
Examines ways in which African youth inevitably occupy two extremes in academic writings and the mass media: as victims of violence, or as instigators of social chaos. Considers youth as generating new cultural forms, as historically relevant actors, and informed social and/or political critics. At the core of such critiques lie possibilities for the agentic power of youth in Africa.

**ANTH V3946 African Popular Culture. 4 points.**
Enrollment limited to 15. Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor required.

**ANTH V3947 Text, Magic, Performance. 4 points.**
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.
This course pursues interconnections linking text and performance in light of magic, ritual, possession, narration, and related articulations of power. Readings are drawn from classic theoretical writings, colonial fiction, and ethnographic accounts. Domains of inquiry include: spirit possession, trance states, séance, witchcraft, ritual performance, and related realms of cinematic projection, musical form, shadow theater, performative objects, and (other) things that move on their own, compellingly. Key theoretical concerns are subjectivity - particularly, the conjuring up and displacement of self in the form of the first-person singular “I” - and the haunting power of repetition. Retraced throughout the course are the uncanny shadows of a fully possessed subject.

**ANTH V3951 Pirates, Boys, and Capitalism. 4 points.**
Not offered during 2019-20 academic year.

**ANTH V3961 Subsequent Performances. 4 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Enrollment limited to 15. Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission. Priority given to upper class Anthropology and Music majors; students must attend operas outside of class.
Explores the dynamic interaction between operatic compositions (especially Mozart's Don Giovanni and The Marriage of Figaro) and their subsequent performances, with particular emphasis on the cultural, political, and economic contexts that shape both the original composition and the following reproductions. Critical apparatus includes Abbate and Butler.

**ANTH V3962 History and Memory. 3 points.**
Not offered during 2019-20 academic year.

**ANTH V3975 Anthropology of Media. 4 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Enrollment limited to 16. Not offered during 2019-20 academic year.

Provides a critical overview of the theoretical engagement between anthropology and media theory. It explores the relationship between technologies and transformations in ideas of time, space, and sociability; and examines what it means to live in a mediated society.

**ANTH V3983 Ideas and Society in the Caribbean. 4 points.**
Enrollment limited to 20. Not offered during 2019-20 academic year.

Focusing on the Anglo-Creole Caribbean, this course examines some aspects of popular culture, literary expression, political change, and intellectual movements over the past thirty years.

**ANTH V3988 Race/Sexuality Science and Social Practice. 4 points.**
Enrollment limited to 26. Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.
Scientific inquiry has configured race and sex in distinctive ways. This class will engage critical theories of race and feminist considerations of sex, gender, and sexuality through the lens of the shifting ways in which each has been conceptualized, substantiated, classified, and managed in (social) science and medicine.

**ANTH UN3993 World Archaeologies/Global Perspectives. 4 points.**
Enrollment limited to 15.

Prerequisites: the instructor’s permission and at least one of the following: ANTH V1007, ANTH V1008, or ACLG V2028.
This capstone seminar explores global archaeology from a postcolonial perspective. We will address the history of archaeological interpretation and explore the politics and practice of archaeology by ,considering specific case studies from around the world. The seminar fulfills the major seminar requirement for the archaeology major.

**ANTH V3994 Anthropology of Extremity: War. 4 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

**ANTH W4002 Controversial Topics in Human Evolution. 3 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor and introductory biological/physical anthropology course.

**ANTH W4011 Critical Social Theory. 3 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Enrollment limited to 30. Not offered during 2019-20 academic year.

Prerequisites: junior standing.

**ANTH W4022 Political Ecology. 3 points.**
Enrollment limit is 15. Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.
Analyzes global, national, and local environment issues from the critical perspectives of political ecology. Explores themes like the production of nature, environmental violence, environmental justice,
political decentralization, territoriality, the state, and the conservation interventions.

**ANTH W4625 Anthropology and Film. 3 points.**
Not offered during 2019-20 academic year.

**ANTH V3899 Food, Ecology, Globalization. 4 points.**
Enrollment limited to 20. Not offered during 2019-20 academic year.
Prerequisites: the instructor’s permission.

**EEEB W3215 Forensic Osteology. 3 points.**
Not offered during 2019-20 academic year.
Prerequisites: No prior experience with skeletal anatomy required though students must contact instructor for permission to register. Not appropriate for students who have already taken either G4147 or G4148.
An exploration of the hidden clues in your skeleton. Students learn the techniques of aging, sexing, assessing ancestry, and the effects of disease, trauma and culture on human bone. Enrollment limited to 15. Priority given to EBHS majors/concentrators. [Taught every other year.]

### The Department of Architecture

**Mission**
The Architecture major establishes an intellectual context for students to interpret the relation of form, space, program, materials and media to human life and thought. Through the Architecture curriculum, students participate in the ongoing shaping of knowledge about the built environment and learn to see architecture as one among many forms of cultural production. At the same time, the major stresses the necessity of learning disciplinary-specific tools, methods, terms and critiques. Thus, work in the studio, lecture or seminar asks that students treat architecture as a form of research and speculation which complement the liberal arts mission of expansive thinking.

### Undergraduate Study in Architecture

Studying Architecture at Barnard College, Columbia College, and General Studies leads to a liberal arts degree – a Bachelor of Arts with a major in Architecture, and Barnard College is the administrative location for all undergraduate architecture studies at Columbia University and its partner institutions. A liberal arts education in architecture holds a unique position in academia and in relation to the discipline. If the goal of a professional education in architecture is to enable students to participate directly in the world as an architect – a liberal arts education asks that students consider the broader and myriad conditions in which architecture is conceived and practiced and, in turn, to understand how architecture inevitably alters those conditions. Students are asked to confront and interpret the complex social, cultural, political, and environmental processes that weave through architectural design and urbanism. The purpose of an undergraduate liberal arts degree in architecture is to educate students to think about the world through architecture.

The Architecture curriculum introduces design at a variety of scales, acknowledging that integrated design thinking is effective for problem solving at any scale and in any discipline. Students will experiment with full-scale installations and devices and make small-scale models of urban conditions from which they extract, interpret and invent new possibilities of inhabitation and use. The curriculum intentionally balances the traditions of handcrafted representation with evolving digital technologies of architectural design and communication.

The Architecture major complements, and makes great use of its University setting. With access to superb libraries, research centers, graduate programs, and abundant intellectual resources, our students have the opportunity to follow their creative instincts to great depth and breadth – and they do. The major depends on New York City as more than a convenient site for many design and research projects and frames the City as one of the key social and architectural, and thus didactic, markers of Modernity. Architecture students study with peers from countries around the world in one of the most diverse cities in the world. A large majority of the Architecture students expand their education by interning in Architecture or a related field during their undergraduate studies. Alumni of the Department are leaders in architecture and design fields around the world. The faculty teaching in the undergraduate program are dedicated teachers who are also at the forefront of practice and research and are similarly drawn to New York City as a nexus of global design thinking.

Students interested in obtaining a professional degree in Architecture continue on to graduate programs after their undergraduate degree, and students from the Barnard-Columbia program have enjoyed enormous success in their admissions to the most competitive graduate programs in the country. Students who study Architecture as undergraduates have also pursued graduate degrees in a variety of disciplines including Urban Planning, Law, and Media and Communications.

### Student Learning Outcomes

Students in the Architecture Majors who fully engage with the curriculum should be able to complete the following outcomes:

- Apply integrated design thinking to specific problems in and beyond the discipline;
- Visually communicate architectural concepts and research using discipline-specific techniques in multiple media;
- Verbally present independent, group or assigned research, in multiple media formats;
- Organize and concisely write in a variety of formats including reports, case studies, synthetic overviews, etc.;
- Understand and critically interpret major buildings and themes of Architectural history and theory;
• Be intellectually prepared for graduate studies in architecture and related disciplines.

Professors of Professional Practice:

Major in Architecture
The major in architecture requires a total of 14 courses, distributed as follows:

Studio Courses
Four studio courses, to be taken one per semester (studio courses have limited enrollment and priority is given to Architecture majors):

<table>

</tr>
<tr>
<td>Two electives (it is suggested that one of these be on a non-western topic)</td>
<td></td>
</tr>
</tbody>
</table>

Senior Courses
Either a second Senior Seminar (from our program), a seminar from a related department (and related to student’s disciplinary specialization/cluster), Architectural Design III, or Independent Research

Cluster of Related Courses
Three courses that relate to a single topic or theme that is relevant to architecture. Courses for the cluster may be taken in any department and may not overlap with any other courses for the major (e.g. history/theory courses or senior courses). All cluster courses should be selected in consultation with a major adviser.

Senior Requirements

Portfolio
Research Paper from Senior Seminar or Senior Course

• These are courses offered by the architecture department or other applicable departments offered within the University. Students should consult the program office for a list of applicable courses each semester.

Major in History and Theory of Architecture
The major in history and theory of architecture requires a total of 15 courses, including a senior thesis, distributed as follows:

Studio Courses
Two studio courses, to be taken one per semester:

Seven Lecture Courses
Three architecture lectures. One of these must be ARCH V3117.
Four art history lectures above and beyond the prior three. Two of these must be AHIS BC1001, AHIS BC1002

Three Seminars to be taken in the Junior or Senior Year
Two should be in Architecture (see Seminar List and Note under Studio Major), one in Art History

Three Cluster Courses in an Area of Study Related to Architecture
(See Description Under Studio Major)
The Architecture program is a liberal arts major, not a professional degree program. It does not qualify students for a license in Architecture

Minor in Architecture
The minor in architecture requires a total of five courses, distributed as follows:

Three history/theory courses
A fifth course to be chosen in consultation with the adviser

ARCH UN1010 Design Futures: New York City. 3 points.
How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design in contemporary culture – from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences.

ARCH UN1020 Introduction To Architectural Design and Visual Culture. 3 points.
Introductory design studio to introduce students to architectural design through readings and studio design projects. Intended to develop analytic skills to critique existing media and spaces. Process of analysis used as a generative tool for the students’ own design work. Must apply for placement in course. Priority to upperclass students. Class capped at 16.

ARCH UN2505 Architectural Histories of Colonialism and Humanitarianism. 3 points.
This course examines the connected histories of colonialism and humanitarianism through architecture. In doing so, it takes seriously the concerns and problems of decolonizing the study of architectural history. The central premise of the course is to reverse the terms by which humanitarianism and colonialism are usually understood and to excavate new meanings of each through histories of architectures and constructed environments. We will attempt this by studying iconic forms: refugee camps and detention centers, colonial expositions and museums, governmental headquarters and emergency field sites, and territories of consequence to colonial and national powers. Humanitarianism, an ideological manifestation of modernity and liberal thought, is governed by terms of urgency and rarely considered in a historical framing or seen as directly related to colonial structures. Meanwhile, colonialism is usually examined within particular places and narratives as a historical category, rather than a condition or process enacted by architectural forms, spaces, and practices. The paradoxes and problems of humanitarianism thus enable a rethinking of the extension of colonial practice into postcolonial environments, with architectures and their histories offering concrete iterations and theoretical models for understanding buried links between the two. This course has no prerequisites, and will introduce students to themes and cases (in Africa, Asia, and the Americas) through lectures, discussions of shared readings, and presentations of independent work by participants.

ARCH UN3101 Architectural Representation: Abstraction. 4 points.
Prerequisites: Enrollment limited to 16 students per section. Recommended for the sophomore year. Students work in a studio environment. Introduction to design through analyses of abstract architectural space and form. Emphasis on the design process and principles of representations through architectural drawing and model making.

ARCH UN3103 Architectural Representation: Perception. 4 points.
Prerequisites: Students work in a studio environment. Recommended for the sophomore year. Enrollment limited to 16 students per section. Introduction to design through studies in the perception of architectural space and form. Emphasis on exploratory, inventive processes for the generation, development, and representation of ideas in a variety of media. Must apply for placement in course. Class capped at 16.

ARCH UN3201 Architectural Design, I. 4 points.
Prerequisites: ARCH V3201 and ARCH V3103. Open to architecture majors or with permission of instructor. Introduction to architectural design taught in a studio environment, through a series of design projects requiring drawings and models. Field trips, lectures, and discussions are organized in relation to studio exercises. Portfolio of design work from Architectural Representation: Abstraction and Perception will be reviewed the first week of classes.

ARCH UN3202 Architectural Design, II. 4 points.
Prerequisites: ARCH V3201. Open to architecture majors or with permission of instructor. Studio workshop continuation of ARCH V3201. Emphasis on the manipulation of an architectural vocabulary in relationship to increasingly complex conceptual, social, and theoretical issues. Field trips, lectures, and discussions are organized in relation to studio exercises.
ARCH UN3211 Architectural Design, III. 5 points.
Prerequisites: A design portfolio and application is required for this course. The class list will be announced before classes start. Further exploration of the design process through studio work. Programs of considerable functional, contextual, and conceptual complexity are undertaken. Portfolio required for review first day of fall semester or earlier, as requested by the department. Class list based on portfolio review will be formed by first class meeting.

ARCH UN3117 Modern Architecture in the World. 3 points.
Prerequisites: Designed for but not limited to sophomores; enrollment beyond 60 at the discretion of the instructor. How has architecture been "modern"? This course will introduce students to things, practices, figures, and ideas behind this contentious and contradictory concept, emerging in multiple locations around the world. Students in this course will learn about architecture as it was practiced, taught, thought, and experienced across landscapes of social and cultural difference during the past two centuries. Learning about the past through historical consciousness around architecture and investigating the history of architecture as a discursive field are fundamental to liberal arts thinking generally, and important for students in architecture, the history and theory of architecture, art history, and urban studies. Students in this course will be introduced to:

Architecture as enmeshed with other forms of cultural production
Culturally-specific intellectual and public debates around the architectural and urban
Makers, thinkers, and organizers of the designed or built environment
Geographies, territories, and mobilities associated with architecture as an end or means for material extraction, refinement, trade, labor, and construction
Sites, institutions, media, events, and practices which have come to hold meaning
Modernity, modernism, and modernization in relation to each other, as social, cultural, and technological drivers holding stakes for past events as well their histories.

In this course, we will ask questions about ideas and practices within disparate socially-and culturally-constructed worlds, and across other asymmetries. For example, can we draw a coherent historical thread through Lisbon in 1755, Bombay in 1854, Moscow in 1917, the moon in 1969, and al-Za’atari refugee camp in 2016? Are such narratives of coherence themselves the trace of the modernist impulse in architectural history? In this course, we will study modern architecture’s references to an art of building as well the metaphors it gives rise to. Embedded in this examination are social and cultural questions of who made and thought modern architecture, and aesthetic and historical questions around the figure of the architect.

ARCH UN3312 Special Topics In Architecture. 3 points.

Department Administrator: Elisabeth Sher
The Department of Art History

Mission

Art History, which is devoted to the study of all the visual arts, is one of the broadest fields in the humanities. It is concerned not only with the nature of works of art -- their form, style, and content, but also with the social, political, and cultural circumstances that shape them.

The department, fortunate in being located in New York City, one of the world’s great art centers, takes full advantage of the rich resources of the city’s museums and galleries.

Introductory level courses encourage a basic and lifelong understanding and appreciation of works of art. The rest of the curriculum offers a more advanced and specialized knowledge of art, which can lead to many kinds of careers, including teaching, museum administration and curating, business positions in galleries or auction houses, publishing, criticism, collection advising, and conservation, as well as creative careers in any medium. Students in many fields may also find that art history is relevant to their studies.

Student Learning Outcomes

Students who graduate with a major or minor in art history will be able to attain the following outcomes:

- Demonstrate a critical understanding of the social, political, and cultural circumstances surrounding the making and viewing of works of art in a range of cultural traditions and time periods in a comparative way;
- Discuss the form, style, and content of a range of works of art;
- Recognize the methods and theories used to ask significant questions about works of art;
- Frame and execute their own research projects through the writing of papers, the production of art works or a combination of the two;
- Express themselves effectively orally, in writing, visually or materially;
- Study works of art in person.

The Department offers both a major in Art History and a major in Art History and Visual Arts. In each case, the student chooses a faculty adviser who assists her in planning a program incorporating personal interests while meeting departmental requirements.

Requirements for the Major in Art History requires a minimum of 12 Art History courses including:

Two Seminar Courses in Art History (may also be counted toward the historical and regional distribution requirement.)

Seven elective courses *See below for elective requirements

ART HISTORY MAJOR REQUIREMENTS

A minimum of 12 art history courses:

1. BC1001 and 1002 Introduction to Art History. This two-course sequence is required.
2. BC3970 Methods and Theories of Art History. To be taken during the fall of senior year or by permission of instructor and major advisor.
3. BC3959x and/or BC3960y Senior Research Seminar. Students write their senior thesis in conjunction with the Senior Research Seminar. Students will develop, research, and write their thesis project in consultation with an individual faculty member in Art History. They will also attend and participate in group seminars convened during the academic year in which all students will present their work. Students who plan to study abroad during their senior year and those who expect to graduate early must begin the senior research seminar sequence in the second semester of the junior year.
4. Two Seminar Courses in Art History (may also be counted toward the historical and regional distribution requirement.)
5. Seven elective courses, with the following requirements: Lecture or seminars courses can be used to fulfill the seven elective requirement. BC1001 and 1002 or any other broad survey cannot be used to fulfill this requirement. Courses in film are accepted toward the major requirements; studio courses are not.

Students must take at least one course in three of four historical periods:

- Ancient (up to 400 CE/AD), 400-1400, 1400-1700, 1700-present

*These chronological divisions are approximate. In case of ambiguities about the eligibility of a course to fill the requirement, please consult the department chair or your advisor.

An additional two courses must also be drawn from at least TWO DIFFERENT world regions, as listed: Africa, Asia and the Indigenous Pacific, Latin America/Caribbean/Indigenous Americas, Middle East

- Courses in film are accepted toward the major requirements; studio courses are not.
- Broad survey courses can not be counted towards the temporal requirements but can count towards regional requirements.
- Recommended: One or two studio courses should be taken.

Students who plan to undertake graduate work should acquire a reading knowledge of at least two foreign languages in which major contributions to the history of art have been made. Most graduate
schools require a reading knowledge of French, German, or Italian. The department strongly recommends a student's taking one of these languages while at Barnard.

**ART HISTORY WRITTEN SENIOR THESIS**

All art history majors write a substantial research paper in their senior year. There are two options for fulfilling this requirement: Seniors have the option of doing a year-long thesis, or reworking and developing a seminar paper into a thesis through a one-semester participation in the Senior Thesis Seminar. The Senior Thesis Seminar would function for those interested in working on a thesis over the course of a year, but those deciding for the option of expanding a seminar paper would only join the course in the second semester. The intent is to offer an alternative to those with less interest in a major writing project.

**WRITTEN SENIOR THESIS OPTIONS**

Students interested in participating in the year-long Senior Thesis Seminar should write a brief (one-page) description of their thesis topic and submit it to the appropriate adviser within the first two weeks of the fall semester. The potential adviser will determine the feasibility of the study in question and accept or decline to become the student's adviser. Such a thesis should ultimately be approximately 30-50 pages long.

Students interested in expanding and enhancing a seminar paper will find a faculty adviser, preferably the professor with whom they wrote the original paper, willing to help them in its transformation into a thesis. They will then join the Senior Thesis in the spring semester of their senior year. In this context they will have an opportunity to present their ideas to the rest of the graduating class as well as members of the faculty so as to receive comments and suggestions as to how to develop their arguments. These created by these means should aim to be approximately 30 pages long.

**GRADES**

Two grades will be awarded in connection with your work on the finished thesis. One will evaluate the way in which you have fulfilled the requirements of the Senior Research Seminar. That is, your participation and attendance in the Thesis Colloquium, the energy you have put into the research, the effort you have made in producing an original and challenging argument as well as a solidly constructed and polished piece of prose. Since the course is yearlong, students will receive a grade of Y (indicating year long course) for the fall semester and will receive their grade at the end of the spring term for the year. This grade will be assigned in the usual A through F spectrum. The other grade will be awarded on the basis of the evaluation of the thesis itself. This evaluation will consider whether or not the aims of the project were met: was the research sufficient to warrant the conclusions, is the argument of the thesis original as well as coherent and convincing, was the writing adequate to the ideas that had to be expressed? Very often the instructor will ask another member of the faculty to comment on the paper as well. This grade will either be a Pass with Distinction, a Pass or a Fail.

**NOTE ON SENIOR THESIS FOR DOUBLE AND COMBINED MAJORS**

Please note the distinctions between the Double Major, the Double Major with a Single Essay, and the Combined Major. In the Double Major with a Single Essay, and the Combined Major. In the Double Major students will do all of the required course work for both majors and write two different Senior Essays that fulfill the requirements of each department. In the Double Major with Single Essay students do all of the required course work for the two majors and write only one essay read by an adviser in each major field. In the Combined Major students follow the requirements for coursework for a combined major and write a single senior essay also read by an adviser in each major field. To do a combine Art History and another major you will need to obtain a special form from the Dean of Studies office. The form needs to be signed by both department chairs. On the form you will need to list the sponsors from both departments along with the 6 courses from each major you plan to count towards the combine major. Any questions, please contact the Art History office.

The Art History Department offers an Art History and Visual Arts major. Here, students have the option of doing a studio thesis instead of a written one. Art History and Visual Arts students work closely with faculty advisors who assist them in planning a program incorporating personal interests while meeting departmental requirements.

The requirements for the major in Art History and Visual Arts requires a minimum of 12 courses including:

<table>

**Five Studio courses:**

| AHIS BC3530 Advanced Senior Studio I (Fall semester) |
| AHIS BC3531 Advanced Senior Studio II (Spring semester) |
| Three additional Studio courses. |

**ART HISTORY AND VISUAL ARTS MAJOR REQUIREMENTS**

A minimum of 12 courses:

1. BC1001 and 1002 Introduction to Art History. This two-course sequence is required.

2. Art History: BC3031 Imagery and Form in the Arts. To be taken in the spring semester of the Junior year (or by permission of the instructor).

3. Studio courses: BC3530 Advanced Senior Studio I (Fall) and BC3531 Advanced Senior Studio II (Spring)

The Senior Visual Arts Thesis Projects for Art History and Visual Arts majors is done in conjunction with BC3530 Advance Senior Studio I (fall) and BC3531 Advanced Studio II (spring) courses. (Please see description of the senior thesis below). You will develop, research, and create your thesis project in consultation with faculty members and peers in the Visual Arts. You will also attend and participate in group critiques, and guest artist lectures scheduled during the academic year. You will present your visual art project in two group senior exhibitions scheduled at the end of the Fall and Spring semesters of the senior year.

4. One Seminar Course in Art History (may also be counted toward the historical and regional distribution requirement.)

5. One 19th, 20th or 21st century elective course in Art History.
MAJOR REQUIREMENTS FOR THE HISTORY AND THEORY OF ARCHITECTURE

1. Three studio courses
2. Construction Design Laboratory
3. History of Architecture
4. History of Architecture
5. Three additional courses

*Courses in film are accepted toward the major requirements.

*Studio courses cannot exceed 30 points of credits.

SENIOR THESIS PROJECT FOR ART HISTORY & VISUAL ARTS MAJORS

The Senior Visual Arts Thesis Project for Art History and Visual Arts majors is scheduled in the last year of the major. By that time, you will have taken Imagery and Form BC3031 and a variety of Art History and Studio courses, which may help form your approach to your thesis project.

BC3530 Advanced Senior Studio I (Fall) and BC3531 Advanced Studio II (Spring) provides a two-semester framework in which to complete a senior project. Your senior project should be a cohesive body of work based on original concepts and executed with some technical proficiency. A paper approximately seven-to-ten pages in length will accompany your senior project outlining your artistic goals. This paper will serve as an artist’s statement and should describe what your work would mean to viewers as well situate your work vis-a-vis artistic precedents.

You also will take part in a senior thesis exhibition, which will be accompanied by a catalog. Here, you will be responsible for both installing your work and for taking it down at the end of the show.

GRADES

Two grades will be awarded in connection with your work on the Senior Project. One will evaluate the way in which you have fulfilled the course requirements, that is, the regularity of your meetings and the effort you have made in completing your thesis. This grade will be a letter grade. The second grade will be awarded on the basis of the evaluation of the Senior Project itself. This evaluation will consider whether or not the aims of the project were met: a pass with distinction, a pass or a fail.

OPTION FOR ART HISTORY AND VISUAL ARTS - WRITTEN SENIOR THESIS

Art History Majors in Visual Arts may choose to do a written Art History Senior Thesis instead of the Visual Arts Senior Project. To do this they must: Notify their adviser of their intention to do so by the end of their junior year with permission from both the Visual Arts Director and Art History chair. They must then take both Methods and Theories of Art History (BC3970) & the written Art History senior research seminar (BC3959 and BC3960). These three courses required for the written thesis option replace the Visual Arts sequence, BC3031 Imagery and Form in the Arts and BC3530 Advanced Senior Studio I (Fall) and Advanced Studio II BC3531 (Spring).

• Notify their adviser of their intention to do so by the end of their junior year
• Take both AHIS BC3970 Methods and Theories of Art History and AHIS BC3959 Senior Research Seminar + AHIS BC3960 Senior Research Seminar.

See Architecture Program (p. 78) offerings.

ART HISTORY MINOR REQUIREMENTS

The minor in Art History consists of five courses, including BC1001, BC1002, and three courses in the following areas of which students must have at least one be Non-European

AHIS BC2001 Drawing Studio. 3 points.

Note course is limited to 15 students with instructor’s permission on the first day of class.

This course will explore drawing as an open-ended way of working and thinking that serves as a foundation for all other forms of visual art. The class is primarily a workshop, augmented by slides lectures and videos, homework assignments and field trips. Throughout the semester, students will discuss their work individually with the instructor and as a group. Starting with figure drawing and moving on to process work and mapping and diagrams, we will investigate drawing as a practice involving diverse forms of visual culture.

**AHIS BC3345 Islamic Architecture: the Mongol Legacy, 1250-1650. 3 points.**

Not offered during 2019-20 academic year.

The destruction of Baghdad in 1258 by the armies of the Golden Horde precipitated a profound change in Islamic society whose influence was felt from Egypt to India, and from Samarqand to Istanbul. This course examines the architecture commissioned by the Ottoman, Mamluk, Safavid, Uzbek and Mughal rulers and the new cities they founded to further their unique imperial visions.

**AHIS BC3530 Advanced Senior Studio. 4 points.**

Prerequisites: Limited to Senior Visual Arts Concentrators. Permission of the instructor.

The Fall Advanced Senior Studio serves as a forum for senior Visual Arts majors to develop their studio theses. The priorities are producing a coherent body of studio work and understanding this work in terms of critical discourse. The class is comprised of group critiques and small group meetings with the instructor. Visiting lecturers and professional workshops will also be scheduled and required. Each student will develop an independent body of visual work that is both personal, original and also speaks to the social conditions of our time. Each student will be able to articulate, verbally and in writing, their creative process. Each student will acquire professional skill that will support their artistic practice in the future. Each student will learn how to present and speak about their work publicly.

**AHIS BC3531 Advanced Senior Studio. 4 points.**

A requirement for senior Visual Arts Majors in which students develop their studio theses in consultation with faculty advisers. COURSE ONLY OPEN TO SENIOR BARNARD ART HISTORY and VISUAL ARTS MAJORS AND IS A BARNARD VISUAL ARTS MAJORS REQUIREMENT. To be taken during the spring semester of the Senior year.

**AHIS BC3626 In and Around Abstract Expressionism. 4 points.**

This course focuses on the history of modern art in the mid-twentieth century. To place mid-twentieth century modernism within its proper historical context, we will explore artistic practices elaborated between the 1920s and the 1960s in a wide range of different locations. We will also survey the major critical and historical accounts of modernism in the arts during these years.

The course will first introduce the development of modernism, anti-modernism and avant-gardism in the period between the two World Wars, exploring the changing relationship between these cultural formations in Europe, the U.S.S.R., Mexico, and North America.
second part of the course will study the vicissitudes of modernism and avant-gardism in Europe, Latin America, and the U.S. during the 1930s and 1940s that led to the formation of Concrete art in Europe and Abstract Expressionism and the New York School in the United States. The third part of the course will examine the challenges to modernism and the reformulation of avant-gardism posed by the neo-avant-garde in North America, South America, Europe and Japan in the 1950s and early 1960s.

The course will address a wide range of historical and methodological questions and problems. These include: the challenges to the idea of artistic autonomy, the evolving concept of avant-gardism, the ongoing problematic of abstraction, the formal principles of serialism and the grid, the logic of non-composition, the persistence of figuration, the changing role of cultural institutions, the impact of new technologies on cultural production, and the emergence of new audiences and patrons for art.

**AHIS BC3642 North American Art and Culture. 3 points. Not offered during 2019-20 academic year.**

An examination of North American painting, sculpture, photography, graphic art and decorative arts from the Colonial Period until World War I. Artists discussed will include Benjamin West, John Singleton Copley, Thomas Cole, Lilly Martin Spencer, Harriett Powers, Rafael Aragon, Robert Duncanson, Frederick Church, Winslow Homer, Thomas Eakins, James MacNeill Whistler, Mary Cassatt, Thomas Moran, Henry Ossawa Tanner and Edweard Muybridge.

**AHIS BC3654 Institutional Critique. 3 points.**

Examines precedents for institutional critique in the strategies of early twentieth-century historical avant-garde and the post-war neo-avant-garde. Explores ideas about the institution and violence, investigates the critique and elaboration of institutional critique from the late 1970s to the early 1990s, and considers the legacies of institutional critiques in the art of the present.

**AHIS BC3655 The Discourse of Public Art and Public Space. 3 points.**

Examination of the meaning of the term “public space” in contemporary debates in art, architecture, and urban discourse and the place of these debates within broader controversies over the meaning of democracy. Readings include Theodor Adorno, Vito Acconci, Michel de Certeau, Douglas Crimp, Thomas Crow, Jurgen Habermas, David Harvey, Fredric Jameson, Miwon Kwon, Henri Lefebvre, Bruce Robbins, Michael Sorkin, Mark Wigley, and Krzysztof Wodiczko.

**AHIS BC3658 History and Theory of the Avant Garde. 3 points.**

Prerequisites: Courses in nineteenth- and/or twentieth-century art are recommended as prerequisites for this course.
Introduces the history of contemporary artistic practices from the 1960s to the present, and the major critical and historical accounts of modernism and postmodernism in the arts. Focusing on the interrelationships between modernist culture and the emerging concepts of postmodern and contemporary art, the course addresses a wide range of historical and methodological questions.

**AHIS BC3682 Early Modernism and the Crisis of Representation. 4 points.**
Prerequisites: 20th Century Art recommended. The artistic phenomenon that came to be called Modernism is generally considered one of the most pivotal in the history of late nineteenth and twentieth century art. This course studies the emergence and development of Modernism in all of its complexity. Particular attention will be paid to the ways in which Modern artists responded to the dramatically changing notions of space, time and dimension in the late nineteenth and early twentieth century. What impact did these dramatic changes have on existing concepts of representation? What challenges did they pose for artists? To what extent did Modernism contribute to an understanding of the full consequences of these new ideas of time and space? These concerns will lead us to examine some of the major critical and historical accounts of modernism in the arts as they were developed in the late nineteenth and early twentieth century.

The course will focus specifically on the interrelationships between modernism and the expanding mass cultural formations of the industrial societies in Europe to address a wide range of historical and methodological questions. These include the emergence of modernism in the arts, the collapse of previous modes of representation, the development of new technologies of cultural production, the elaboration of the utopian projects of the avant-gardes, the unfolding of abstract art, the materialization of the readymade, as well as the transformation of concepts of artistic autonomy and cultural institutions.

We will first investigate key modernist concepts developed in the late nineteenth century, as well as the crucial work of some of the artists of that moment. This will lead to an examination of the unfolding and consolidation of Cubism in the first decade of the twentieth century, followed by the development of Synthetic Cubism early in the 1910s. The third part of the course will study the impact of Cubism on artistic production in the following decade, focusing primarily on the Italian artists of Futurism, the German avant-garde in the context of Weimar culture, Dadaism, and the Russian and Soviet avant-gardes in the 1910s and 1920's.

This class will explore Japanese painting, prints, photography and performance art from the mid-19th century to the present. We will consider artists’ responses to rapid modernization, debates over cultural identity, and the ever-changing role of "tradition" in modern art practice. We will also discuss the impact of natural disaster and war on the arts, and the role of art in mediating social conflict. There are no prerequisites, but the survey of Japanese art history and classes in modern Japanese studies would provide useful background.

**AHIS BC3842 Design Designing. 4 points.**
Everything we contact has been designed. Design makes and unmakes desires on a global scale. It organizes our lives—from the way we move to the interface that tracks our movements. We've trained for the end for a while now, apocalypse is announced on every image channel. In a world, soon impossible to physically inhabit, the things we consume now consume us. The stakes have never been higher. To make a new world, we must use design.

Our planet need not be disposed. It is an infrastructure for another one. To make contact with it we need to understand design as a value system for propelling possibility, not possession. The designed world requires new relation to things and fullness of use. As we read, write, experience and make our own projects, Designing Design helps us: acquire intimate knowledge of how we got here, recognize our historical allies and foes, and foster imagination and intelligence to live and make responsibly.

This course requires no prior design experience.

**AHIS BC3910 CONTEMPORARY PHOTOGRAPHY AND RELATED MEDIA: THE POLITICAL EXHIBITION. 4 points.**
An introductory survey of contemporary photography and related media through the framework of current exhibitions in New York City. Exhibitions of photography and video play a particular role in mirroring the present moment, which finds political themes front and center. Prevalent are exhibitions that redress (art) historical erasure, present counter histories, or take direct aim at specific governmental policies. Through group outings to NYC galleries and museums (approximately 8 trips) we will take stock of which artists are showing, in what contexts, and unpack both artistic and curatorial strategies. In addition to class discussion of what we've seen, during our time in the classroom we will look back at the select landmark photography exhibitions, to chart evolutions in the medium and their interrelation with politics.

**AHIS BC3939 Contemporary Photography. 4 points.**
**BC:** Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).
Undergraduate seminar course. Course limited to 15 Students with instructor's permission. Application process required. Applications are due in the Barnard Art History office April 7th. Not offered during 2019-20 academic year.

This undergraduate seminar will explore key texts that have informed the current condition and possibilities of the medium of photography. The course readings will consist of writings by critics and historians which reflect the unstable status of the photographic object between: technology and culture, mass culture and avant-garde art, discourse and documentation, analogue and digital.
AHIS BC3949 The Art of Witness: Memorials and Historical Trauma. 4 points.
Undergraduate seminar course. Course limited to 15 Students with instructor’s permission. Application process required. Applications are due in the Barnard Art History office April 9, 2015.
Examines aesthetic responses to collective historical traumas, such as slavery, the Holocaust, the bombing of Hiroshima, AIDS, homelessness, immigration, and the recent attack on the World Trade Center. Studies theories about trauma, memory, and representation. Explores debates about the function and form of memorials.

AHIS BC3950 Photography and Video in Asia. 4 points.
Undergraduate seminar course. Course limited to 15 Students with instructor’s permission. Application process required. Applications are due in the Barnard Art History office April 9, 2015.
East Asia is now perhaps the world’s most dynamic region, and its dramatic social and economic transformation has been mirrored in the work of a host of startlingly original and innovative visual artists. The class will explore the ideas and visual idioms that inform the leading contemporary photo artists in China, Korea, Japan, Taiwan, and Hong Kong. We will begin with a historical survey of the development of photography in East Asia since the mid-19th century, but we will concentrate on the period from 1960 to the present. Figures whose work will be explored include such Japanese artists and photographers as Eikoh Hosoe, Daido Moriyama, Tomatsu Shomei, Miyako Ishiuchi, Nobuyoshi Araki, Yasumasa Morimura, Moriko Mori, Naoya Hatakeyema, and Tomoko Sawada. From China, we will examine the work of artists like Zhang Huan, Hong Hao, Yang Fudong, Lin Tianmiao, and Xing Danwen, while Korean artists to be covered include Atta Kim and Yeondoo Jung. Since many of these artists work regularly in video as well as photography, there will be regular video screenings throughout the semester.

AHIS BC3951 Contemporary Art and the Public Sphere. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: AHIS BC1001 - AHIS BC1002 or equivalent. Enrollment Limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors.
Critically examines contemporary debates about the meaning of public art and public space, placing them within broader controversies over definitions of urban life and democracy. Explores ideas about what it means to bring the term “public” into proximity with the term “art.” Considers the differing ideas about social unity that inform theories of public space as well as feminist criticism of the masculine presuppositions underlying certain critical theories of public space/art.

AHIS BC3952 Art and Mass/Popular/Everyday Culture: 1850 to the Present. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: AHIS BC1001 - AHIS BC1002 or equivalent. Enrollment limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors.
Examines interactions between art in Europe and the United States during the 19th and 20th centuries, on the one hand, and non-art forms of culture that are called variously “mass,” “popular,” and “everyday” culture, on the other. Places art/mass culture interactions within the rise of bourgeois society, the invention of democracy, and relations of class, gender, sexuality, and race. Studies major critical theories and debates about the relationship between art and mass culture.

AHIS BC3957 1980s Feminism and Postmodernism in the Visual Arts. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: AHIS BC1001 - AHIS BC1002 or equivalent. Enrollment limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors.
Examines aesthetic responses to collective historical traumas, such as slavery, the Holocaust, the bombing of Hiroshima, AIDS, homelessness, immigration, and the recent attack on the World Trade Center. Studies theories about trauma, memory, and representation. Explores debates about the function and form of memorials.

AHIS BC3959 Senior Research Seminar. 3 points.
Prerequisites: Course open to Barnard Art History majors only.
Independent research for the senior thesis. Students develop and write their senior thesis in consultation with an individual faculty adviser in art history and participate in group meetings scheduled throughout the senior year.

AHIS BC3960 Senior Research Seminar. 3 points.
Prerequisites: Course open to Barnard Art History majors only.
Independent research for the senior thesis. Students develop and write their senior thesis in consultation with an individual faculty adviser in Art History and participate in group meetings scheduled throughout the senior year.

AHIS BC3961 Winslow Homer and American Realism. 4 points.
Seminar course limited to 15 undergraduates. Not offered during 2019-20 academic year.
Winslow Homer is in many ways the quintessential American Realist. One need only glance at his sunny pictures of women playing croquet or his stunning snapshots of surf breaking on the Maine Coast to recognize the bold graphic energy of his work and its seemingly national subject matter. Homer was promoted as an untrained and naive observer of his time, but in fact he was a sophisticated artists with extensive engagement in the evolving aesthetic and cultural dialogues of the late nineteenth century in America and abroad. In this course, we will get beyond the surface of Homer’s art, interrogating how these qualities have come to signal what they do while examining the course of his career in its art historical and historical contexts.
Rather than seeing Homer as a realist simply documenting his time, students will come to understand the ways in which his work raises and attempts to address key questions posed in the United States as it recovered from the Civil War and experienced the rapid urbanization and industrialization of the Post-War era. Through the close examination of Homer’s output in a variety of mediums, including illustration, painting, watercolor and etchings, we will explore Homer’s deep engagement with the international aesthetic developments of Impressionism, Aestheticism and Realism. Class meetings will be augmented by two field trips, one to the Metropolitan Museum of Art and the other to the Century Club.

AHIS BC3968 Art/Criticism I. 4 points.
Undergraduate seminar course. Course limited to 15 Students with instructor's permission. Application process required. Applications are due in the Barnard Art History office April 9, 2015.

This course is a seminar on contemporary art criticism written by artists in the post war period. Such criticism differs from academic criticism because it construes art production less as a discrete object of study than as a point of engagement. It also differs from journalistic criticism because it is less obliged to report art market activity and more concerned with polemics. Art/Criticism I will trace the course of these developments by examining the art and writing of one artist each week. These will include Brian O'Doherty/Patrick Ireland, Allan Kaprow, Robert Morris, Yvonne Rainer, Robert Smithson, Art & Language, Dan Graham, Adrian Piper, Mary Kelly, Martha Rosler, Judith Barry and Andrea Fraser. We will consider theoretical and practical implications of each artist's oeuvre.

AHIS BC3969 Art/Criticism II. 4 points.
Course Limited to 15 Students with Instructor's Permission.
Application due 11/13/15. Go to the BC AH website for more information and to download an application. www.barnard.edu/arthist

This course is a seminar on contemporary art criticism written by artists in the post war period. Such criticism differs from academic criticism because it construes art production less as a discrete object of study than as a point of engagement. It also differs from journalistic criticism because it is less obliged to report art market activity and more concerned with polemics. Artists will include Ad Reinhart, Daniel Buren, Helio Oiticica, Juan Downey, Hollis Frampton, Victor Burgin, Jeff Wall, Mike Kelley, Coco Fusco, Maria Eichhorn, Jutta Koether, Melanie Gilligan.

AHIS BC3970 Methods and Theories of Art History. 4 points.

Prerequisites: Barnard Art History Major Requirement. Enrollment limited only to Barnard Art History majors.
Introduction to critical writings that have shaped histories of art, including texts on iconography and iconology, the psychology of perception, psychoanalysis, social history, feminism and gender studies, structuralism, semiotics, and post-structuralism.

AHIS BC3971 Rococco and Its Revivals. 4 points.
Not offered during 2019-20 academic year.

The useful arts of eighteenth-century France – furniture, interior decoration, clothing etc. – have always been considered among the masterpieces of decorative arts history. A revolution in scholarship has made it possible to understand how these objects inaugurated some of modernity’s key values: individualism, private home life, consumer culture, women’s involvement in the arts, global capitalism, and an orientalist fascination with the Near and Far Easts. Several class sessions will take place in the great decorative arts galleries of the Metropolitan Museum and the Frick Collection, where students will give presentations on individual objects.

AHIS BC3976 Japanese Photography. 4 points.
Not offered during 2019-20 academic year.

This course will examine the history of Japanese photography from the middle of the 19th century to the present. The class will be organized both chronologically and thematically. Throughout its history, photography has been an especially powerful medium for addressing the most challenging issues facing Japanese society. Among the topics under discussion will be: tourist photography and the representation of women within that genre in the late 19th century, the politics of propaganda photography, the construction of Japanese cultural identity through the representation of “tradition” in photography, and the interest in marginalized urban subcultures in the photography of the 1960s and 1970s. Although the course will be focused on Japan, the class will read from the literature on photography elsewhere in order to situate Japanese work within a broader context.

AHIS BC3984 Curatorial Positions 1969 to the Present. 4 points.
Course Limited to 15 Students with Instructor’s Permission.
Application due 11/13/15. Go to the BC AH website for more information and to download an application. www.barnard.edu/arthist

Contemporary exhibitions studied through a selection of great shows from roughly 1969 to the present that defined a generation. This course will not offer practical training in curating; rather it will concentrate on the historical context of exhibitions, the theoretical basis for their argument, the criteria for the choice in artists and their work, and exhibitions’ internal/external reception.

AHIS BC3985 Introduction To Connoisseurship. 4 points.
Enrollment limited to 15.

Prerequisites: the instructor’s permission. Please see Barnard College Art History Department’s website for instructions.
Factors involved in judging works of art, with emphasis on paintings; materials; technique, condition, attribution; identification of imitations and fakes; questions of relative quality.

**AHIS BC3990 Japanese Prints: Images of Japan's Floating World. 4 points.**
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 15 students. Permission of the instructor. Sophomore standing.

_Ukiyo-e_, the so-called “images of the floating world,” present a vivid and highly romanticized vision of the dynamic urban culture of Japan during the 17th through 20th centuries. This class will examine the paintings and woodblock prints of the “floating world” and their relationship to literature and popular culture. We will consider ways in which prints glamorized life in the licensed prostitution quarters and represented sexuality and gender. We will discuss the role of _ukiyo-e_ in the promotion of _kabuki_ theater, and will study some of the strategies that print designers and publishers used to dodge government censorship as they ruthlessly parodied contemporary life, literature, and venerable artistic traditions. The class will draw on recent scholarship on prints, the novels of Ihara Saikaku, _kabuki_ plays, and writings in cultural studies.

**AHIS BC3999 Independent Research. 4 points.**
Independent research, primarily for the senior essay, under a chosen faculty adviser and with the chair’s permission

**AHIS V3080 Pre-Columbian Art and Architecture. 3 points.**

**AHIS V3400 Italian Renaissance Painting. 3 points.**
Not offered during 2019-20 academic year.

The origins and development of Renaissance painting: humanism and religion, perspective and art theory, the revival of the classical form and content. Emphasis on major centers, especially Florence and Venice and the courts, and on the major masters: Mascaccio, Fra Angelico, Piero della Francesca, Giovanni Bellini, Leonardo da Vinci.

**AHIS V3464 Later Italian Art. 3 points.**
Not offered during 2019-20 academic year.

This course offers an overview of painting, sculpture, and architecture in Italy from about 1475 to about 1600. It concentrates on artists in four geographical areas and periods: (1) Florence in the late-15th and early-16th centuries (Leonardo da Vinci, Michelangelo); (2) Rome from 1502 to about 1534 (Bramante, Michelangelo, Raphael); (3) Florence from 1520 to 1565 (Andrea del Sarto, Pontormo, Bronzino, Cellini); and (4) Venice from about 1500 to 1588 (Bellini, Giorgione, Titian, Veronese, Tintoretto, Jacopo Sansovino).

**AHIS V3607 Latin American Artists: Independence to Today. 3 points.**
Not offered during 2019-20 academic year.

The course looks at works produced in the more than 20 countries that make up Latin America. Our investigations will take us from the Southern Cone nations of South America, up through Central American and the Caribbean, to Mexico in the north. We will cover styles from the colonial influences present in post-independence art of the early 19th century, to installation art from the beginning of the 21st century. Along the way we will consider such topics as the relationship of colonial style and academic training to forging an independent artistic identity; the emergence and establishment of a modern canon; experimentations in surrealism, neo-concretism, conceptual art, and performance. We will end the course with a consideration of Latino artists working in the U.S.

**AHIS V3662 Eighteenth Century Art in Europe. 3 points.**
Not offered during 2019-20 academic year.

The term “Enlightenment” refers to the phenomenon of emancipation that spread across Europe in the 18th century, including emancipation from the religious discourse that regulated behaviors in the public and private spheres during the 17th century. In contrast, in the 18th century, human reason and human sensibility became the new dominant modes of apprehension of the world. This course examines how artists responded to this rise of subjectivity, in the context of the transformation of the 18th-century cultural, social and economic landscape. Topics of discussion will include: the birth of art criticism; the development of the art market; the phenomenon of “exoticisms;” domesticity and the cult of sensibility; the ascension of women artists and patrons; traveling artists and amateurs; and the new classicism.

**AHIS V3673 History of Photography. 3 points.**
Not offered during 2019-20 academic year.

Few media have shaped the course of modernity more powerfully than photography. Law, science, journalism, criminology, urban planning, and entertainment are but a handful of the fields remade by the introduction of photography. More ambivalent has been photography’s relationship to art. Once relegated to the margins, photographic practices now occupy the center of much artistic production. This course will not attempt a comprehensive survey of the medium. Rather, we will trace central developments through a series of case studies from photography’s 19th century birth to its current, digital afterlife. We
will cover seminal movements and figures as well as more obscure practices and discourses. Particular attention will be paid to the theoretical and methodological questions concerning the medium.

AHIS V3895 Introductory Colloquium: The Literature and Methods of Art History. 4 points.
Not offered during 2019-20 academic year.

An introduction to different methodological approaches to art history as well as a variety of critical texts by such authors as Wilfrid Price, Riegl, Panofsky, and Gombrich.

AHIS V4436 Florentine Sculpture From Donatello To Michelangelo. 3 points.
Not offered during 2019-20 academic year.

The origins of Renaissance sculpture in Florence, beginning with the competition of 1401 for the Baptistry doors. The art of Donatello, Ghiberti Desiderio, Bernardo Rosselino, Verrocchio, Antonio Pollaiuolo, Benedetto da Maiano and Michelangelo examined in detail.

AHIS W3020 Drawings and Prints. 3 points.
Not offered during 2019-20 academic year.

This course will consider the graphic media from the Renaissance to the 20th century, with particular attention to the analysis of linear structure and the phenomenology of drawing, the position of drawing, in both theory and practice, as the foundation of pictorial expression and representation. With attention to the full history of graphic expression, the course will focus on the work of individual artists— including Pisanello, Leonardo, Durer, Raphael, Michelangelo, Rembrandt, Tiepolo, Piranesi, Goya, Daumier, Picasso and Matisse.

AHIS W3110 The Athenian Acropolis in the 5th & 6th Centuries BCE. 3 points.
Not offered during 2019-20 academic year.

The course places the architecture and the sculptural decoration of the Parthenon in the centre of the scheduled class sessions. The course also aims at a contextualisation of the Parthenon within the broader architectural, artistic, and topographical context of the Athenian Acropolis during the sixth and fifth centuries BCE. The chosen chronological frame focuses on the period of the most intensive activity on the Acropolis. Two class sessions will, nevertheless, give a brief overview of the Acropolis after the end of the Peloponnesian war and concentrate on the transformation of the Acropolis into "Greece's museum of the past", an Arcadian topos of human imagination.

AHIS W3200 Medieval Millennium: Objects of Desire. 3 points.
Discussion Section Required
Not offered during 2019-20 academic year.

Undergraduate students must register for a discussion section, time tba on the Directory of Classes. Students are invited to construct the Middle Ages around a sequence of objects in the Metropolitan Museum of Art. These precious relics of a distant past, now made available as digital images on a website, invite interaction and response: they become objects of desire.

AHIS W3205 Introduction to Japanese Painting. 3 points.
Not offered during 2019-20 academic year.

A survey of the multifaceted forms of Japanese painting from antiquity through the early modern period. Major themes to be considered include: painting as an expression of faith; the interplay indigenous and imported pictorial paradigms; narrative and decorative traditions; the emergence of individual artistic agency; the rise of woodblock prints and their impact on European painting in the nineteenth century.

AHIS W3208 The Arts of Africa. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2019-20 academic year.

Introduction to the arts of Africa, including masquerading, figural sculpture, reliquaries, power objects, textiles, painting, photography, and architecture. The course will establish a historical framework for study, but will also address how various African societies have responded to the process of modernity.

AHIS W3230 Medieval Architecture. 3 points.
Not offered during 2019-20 academic year.

Developed collaboratively and taught digitally spanning one thousand years of architecture.

AHIS W3234 Medieval Art II: Romanesque and Gothic. 3 points.
Not offered during 2019-20 academic year.

This lecture course is intended for students with little or no background in medieval art. It provides an introduction to a period of one thousand years (fourth to fourteenth centuries) employing a dialectical interaction between memories of the imperial past and the dynamic, forward-moving force of "Gothic." We will survey all aspects of artistic production, with especial emphasis upon architecture and monumental sculpture. In the last part of the term we will turn to some of the principal themes of medieval art, focusing upon objects accessible to the students in the Metropolitan Museum of Art and the Cloisters.

AHIS W3340 Masterpieces of the Art of China, Korea, and Japan. 3 points.
Not offered during 2019-20 academic year.

The decorative arts of ceramics, lacquers, and jades; Buddhist art, architecture, sculpture; and later painting. Museum laboratory sessions.

AHIS W3407 Early Italian Art. 3 points.
Discussion Section Required
Not offered during 2019-20 academic year.

An introduction to the origins and early development of Italian Renaissance painting as a mode of symbolic communication between 1300-1600. Artists include Giotto, Fra Angelico, Masaccio, Mantegna, and Leonardo da Vinci. Emphasis on centers of painting in Florence, Siena, Assisi, Venice and Rome.

AHIS W3410 Approaches to Contemporary Art. 3 points.
Not offered during 2019-20 academic year.

This course examines the critical approaches to contemporary art from the 1970s to the present. It will address a range of historical and theoretical issues around the notion of "the contemporary" (e.g. globalization, participation, relational art, ambivalence, immaterial labor) as it has developed in the era after the postmodernism of the 1970s and 1980s.

AHIS W3508 Rembrandt. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: the instructor's permission.
Close study of Rembrandt’s inventiveness as both painter and draughtsman, and of his complicated relationship with both his contemporary culture and the art of the past

AHIS W3600 Nineteenth-Century Art. 3 points.
Discussion Section Required
Not offered during 2019-20 academic year.

The course examines selected topics in the history of European painting from the 1780s to 1900. It will explore a range of aesthetic, cultural and social issues through the work of major figures from David, Goya, and Turner to Manet, Seurat and Cezanne. This is a no laptop, no e-device course.

AHIS W3606 Visual Arts in Imperial Spain 1470-1600. 3 points.
Not offered during 2019-20 academic year.

The course will survey Renaissance art in Hapsburg Spain, considered in the wide geographical context of the extended and dispersed dominions of the different crowns of the Spanish monarchy, which connected the Iberian Peninsula with Italy, Flanders and the New World. It will concern visual art in its various media, mainly painting, sculpture and architecture, but also tapestries, prints, armor, goldsmithery and ephemeral decoration, among others. Works of the main artists of the period will be introduced and analyzed, giving attention to the historical and cultural context of their production and reception. The course will particularly focus on the movement of artists, works and models within the Spanish Hapsburg territories, in order to understand to what extent visual arts contributed to shaping the political identity of this culturally composite empire.

AHIS W3645 20th Century Architecture/City Planning. 3 points.
Not offered during 2019-20 academic year.

This undergraduate lecture course is an introduction to key topics in the history and theory of modern architecture and urbanism of the twentieth century, primarily focusing on developments in Europe and the United States, complemented with selected case studies from countries in Latin America and Asia. The course does not systematically cover all the major events, ideas, protagonists, and buildings of the period. It is organized around thematic and sometimes monographic lectures, which are intended to represent the essential character of modern architecture from its beginnings around 1900 until more recent developments at the end of the century.

AHIS W3650 Twentieth-Century Art. 3 points.
BC: Fulfillment of General Education Requirement: Reason and Value (REA), BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART), Discussion Section Required
Not offered during 2019-20 academic year.

The course will examine a variety of figures, movements, and practices within the entire range of 20th-century art—from Expressionism to Abstract Expressionism, Constructivism to Pop Art, Surrealism to Minimalism, and beyond—situating them within the social, political, economic, and historical contexts in which they arose. The history of these artistic developments will be traced through the development and mutual interaction of two predominant strains of artistic culture: the modernist and the avant-garde, examining in particular their confrontation with and development of the particular vicissitudes of the century’s ongoing modernization. Discussion section complement class lectures. Course is a prerequisite for certain upper-level art history courses.

AHIS W3770 Art, Media and the Avant-Garde. 3 points.
Not offered during 2019-20 academic year.

At the center of the avant-garde imagination—and the interwar period in Europe more broadly—were photography and film. Long relegated to the margins of art history and rarely studied together, photography and film were often the guiding lights and vehicles for mass dissemination of avant-garde images and techniques. This lecture course delves into interbellum art, photography, film, and critical writing as it surveys a range of avant-garde movements and national cinemas; seminal artists and theorists; and topics such as montage, abstraction, technological media, archives, advertising, sites and architectures of reception. Film screenings will take place most weeks.

AHIS W3810 Ivory Carvings, 400-1400: Cross Cultural Interactions. 4 points.
Not offered during 2019-20 academic year.

The art of carving ivory was (and still is) a craft contingent upon the availability of imported elephant tusks, from either South East Asia or, more frequently, from the African continent. The shifting winds of trade routes offer an interpretive paradigm with which to analyze ivory objects from a variety of different cultural groups: the lack or abundance of ivory and the resulting desire for or surfet of the material shapes its meaning and use throughout the Mediterranean basin. The study of ivory objects also allows us to investigate the rich intercultural interactions between Eastern and Western Christians, and both of these with the Islamic world. This class will include visits to the American Museum of Natural History, the Metropolitan Museum of Art, and the Cloisters. Reading knowledge of a foreign research language is strongly recommended (French, Italian, German, Spanish, Arabic).

AHIS W3812 The Study of Gothic Architecture. 4 points.
Not offered during 2019-20 academic year.

The seminar has three parts: first, after a brief exploration of issues of mapping and plotting Gothic, we will follow a sequence of readings in some of the giants of older historiography; second, we will study the sea change in the field that began in the 1980s and the work of some of the most dynamic scholars in the subsequent period, and third, students will present their research papers.

AHIS W3813 Materiality in the Middle Ages. 4 points.
Not offered during 2019-20 academic year.

This seminar will examine the significance of various materials and media in visual culture of the Mediterranean and Medieval Europe. From the sumptuous (gold, silver, ivory, gemstones, silk) to the sacred (earth, bones, blood, paint wood), we will address not only the symbolism of raw materials and the techniques of their manipulation, but their aesthetic, sensual, and cultural dimensions as well. How did particular materials shape the medieval viewer’s optic/haptic encounters with objects? Did their use in different spheres, whether cultic, courtly, or diplomatic, impact meaning? In addition to these questions, we will attend to the intercultural appeal of certain media along with the reuse and spoliation of specific objects among cultures: for instance, Sassanian rock crystal carvings in European courtly life, Byzantine silks in European funerary contexts, or ivories from Islamic Spain repurposed as Christian reliquaries. This course will include visits to the Metropolitan Museum of Art, The Cloisters, and The Hispanic Society of America Museum.
AHIS W3814 The Enchanted World of German Romantic Prints, 1750-1850. 4 points.
Not offered during 2019-20 academic year.

The Enchanted World of German Romantic Prints 1770 – 1850 will open in Philadelphia in late 2013 and travel to several venues. Drawn entirely from Philadelphia Museum of Art’s uniquely rich holdings of more than 8,000 prints by 800 German School painters and printmakers of this period, the exhibition will feature 125 works by leading Austrian, German, and Swiss artists working at home and abroad, including Josef Danhauser, Caspar David Friedrich, Ludwig Emil Grimm, Carl Wilhelm Kolbe, Ferdinand Olivier, Johann Christian Reinhart, Ludwig Richter, Karl Friedrich Schinkel, and Philipp Otto Runge, and Adrian Zingg. Spanning eight decades, from the first stirrings of a Romantic sensibility among German-speaking writers and artists in the 1770s to the pan-European uprisings of 1848/49, the selected works mirror many of the sweeping social and political changes that occurred during these turbulent times, reflecting such significant new trends in the arts as the growing appreciation of late Gothic and early Renaissance art – especially Dürer and Raphael – and the widespread enthusiasm for recently rediscovered medieval sagas, age-old fairy tales, popular ballads, and folk songs. The prints of the period document important shifts in taste in contemporary art circles, including the rise to prominence of landscape, informal portraiture, and scenes of everyday life alongside the more highly-ranked academic art categories of history and religion. The exhibition and catalogue will also treat a number of important printmaking innovations, among them the introduction of new technology (lithography and steel engraving) and new methods of print distribution (print albums, illustrated books and almanacs, annual print club editions), all of which served a rapidly expanding world of print collectors made up of a newly flourishing lesepublikum, or reading public.

AHIS W3816 Mapping Gothic England. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Some knowledge of medieval architecture.
In this seminar we will apply the notion of “mapping,” or spatial databasing to a corpus of English Gothic churches and cathedrals. We will, in addition, explore the notion of “Englishness” in architectural production of the twelfth to fifteenth centuries.

AHIS W3819 Contemporary British Art. 4 points.
Not offered during 2019-20 academic year.

TBA

AHIS W3833 Architecture, 1750-1890. 3 points.
Not offered during 2019-20 academic year.

Major theorists and designs of architecture, primarily European, from the Age of Enlightenment to the dawn of the art nouveau critique of historicism. Particular attention to changing conditions of architectural practice, professionalization, and the rise of new building types, with focus on major figures, including Soufflot, Adam, Boullee, Ledoux, Schinkel, Pugin, and Garnier.

AHIS W3845 The Grand Tour. 4 points.
Not offered during 2019-20 academic year.

This undergraduate seminar explores the origins and development of tourism by focusing on the eighteenth-century Grand Tour. The course will examine topics such as motion as a vehicle of aesthetic experience and the use of guidebooks and itineraries; the identification and codification of a canon of monuments and masterpieces; luxury, consumption, and the category of tourist art; copying, invention, and the role of the fragment; and the relationship between tourism, collecting, and the origin of museums.

AHIS W3849 Chichen Itza and its Sacred Well. 4 points.
Not offered during 2019-20 academic year.

In this seminar we will read seminal literature on Chichen Itza while analyzing its architecture and sculpture. Each student will select a major monument to work on as the class reconstructs the ancient city. It is hoped that information gleaned through the methods of art history will add to our knowledge of this complex and fascinating place. Undergraduates will have the chance to do some “pioneering” work instead of just repeating the literature.

AHIS W3854 Bernini, Baroque Sculpture, and the Painterly. 4 points.
Not offered during 2019-20 academic year.

This course will examine afresh the painterly illusionism of Bernini’s statues as well the intermediality of his ensembles of sculpture, painting, and architecture (known as bel composti). Rather than situate materiality and facture subordinate to illusion and ideation (as is typically the case), we will consider baroque sculpture as material as much as immaterial. What might be gained if we look beyond Bernini’s dematerializing illusionism, and consider the material presence of his work? Was Bernini interested in medium specificity? In what media do we have evidence of him thinking pictorially? Are Bernini’s processes, whether in drawing or in modeling, similar to those of painters who also drew and modeled? How does Bernini’s work and process compare to that of contemporary sculptors like Alessandro Algardi, Francesco Mochi and Giuliano Finelli, to name a few? The goal is to come away from this class with a better sense for how material and conceptual dialogues among the arts shaped Baroque sculpture.

AHIS W3865 Paris: Capital of the 19th Century. 4 points.
APPLICATION DUE TO B26 SCHERMERHORN. Not offered during 2019-20 academic year.

A travel seminar on Paris in its nineteenth-century heyday. Painting, prints, architecture, urban planning, fashion, romance, revolutions and death will all be studied. Assignments will include novels about Paris. During spring break, the class will travel to Paris to experience the city.

AHIS W3870 Rome and Florence: A Tale of Two Cities: Architecture and urban strategies in the Renaissance. 4 points.
Not offered during 2019-20 academic year.

Rome and Florence have been the two centers where the humanism and the study of antiquity started and developed. The seminar will explore differences and similarities produced in architecture and urban strategies by a different kind of patronage: the papacy in Rome and the Medici family in Florence.

AHIS W3885 Intellectuals, Gods, Kings & Fishermen. 4 points.
Not offered during 2019-20 academic year.

During the Hellenistic period (330-30 BCE), themes that were considered uninteresting, even inappropriate for the viewer of Classical and Late Classical sculpture became extremely attractive: old people, hard working peasants, old drunken prostitutes, fishermen in the big harbours, or persons ethnically different from the Greek ideals became the subject of the Hellenistic sculpture in the round that
also produced images of serene divinities and dynamic members of the elite in an entirely Classical tradition. Besides Athens, new cultural and artistic centres arose: Alexandria in Egypt, Antiocheia and Pergamon in Asia Minor, or Rhodes. Despite its importance as the birthplace of all arts, Athens did not dominate anymore the artistic language, so that an unprecedented variety of styles characterises the sculptural production of the Hellenistic period. The seminar will study the sculpture of the Hellenistic period as an extremely imaginative and dynamic artistic expression without the Classical bias. The styles of the various Hellenistic artistic centres will be individually analysed based on representative works and then compared to each other and to the sculptural traditions of the Classical period, so that Hellenistic sculpture can be understood both as a continuation of the Classical and especially Late Classical sculpture and as an artistic and intellectual revolt against the ideals of the past.

**AHIS W3886 Art Between the Wars 1919-1939. 4 points.**
*Not offered during 2019-20 academic year.*

Coming on the heels of the Guggenheim’s recent blockbuster exhibit, “Chaos and Classicism;” Art Between the Wars is a seminar dedicated to the investigation of interwar art, architecture, film and photography produced in France, Italy, Germany, and the USSR from 1919-1939. We will examine the widespread return to figuration, the rampant retour à l’ordre mentality, and the rapid replacement of the historical avant-garde movements of Cubism, Futurism, Expressionism and Suprematism (and Constructivism), with Purism, Novecento, Neue Sachlichkeit, and Soviet Socialist Realism, respectively. By way of contrast we will also consider the example of America’s own homegrown interwar movement, Regionalism.

**AHIS W3894 The Floating World. 4 points.**
*Not offered during 2019-20 academic year.*

Prerequisites: ArtHum, Preference given to students with some background in Asian Art

"Pictures of the Floating World" (Ukiyo-e) constitute one of the most significant developments in the history of Japanese art, and one that would have profound impact on the history of art in Europe and the west in the early modern period. These images were created on all pictorial formats, from scroll paintings and painted fans to woodblock prints, wooden posters, lanterns, and kites. Because these images pervaded so many different media, Ukiyo-e images offer a unique lens through which to examine the role art in early modern society as well as the very nature of that society. Our course will focus primarily on the woodblock print, a popular pictorial form that was accessible to broad sectors of society, and will focus on woodblock prints created in the city of Edo between 1700 and 1850. The course will be shaped around three approaches: brief weekly lectures to introduce prominent images and themes; discussion of readings that offer critical perspectives; and direct examination of works of art in the collections of Columbia University and other institutions and collections in New York.

**AHIS W3895 Majors' Colloquium: the Literature and Methods of Art History. 4 points.**
*Not offered during 2019-20 academic year.*

Prerequisites: Not open to Barnard or Continuing Education students. Majors must receive instructor’s permission. Students must sign-up online: http://goo.gl/forms/otfh8x5hqk

Introduction to different methodological approaches to the study of art and visual culture. Majors are encouraged to take the colloquium during their junior year.

**AHIS W3897 Black West: African-American Artists in the Western United States. 4 points.**
*Not offered during 2019-20 academic year.*

This course considers the creative production of African Americans primarily in California in the 19th and 20th centuries. Themes pertinent to the course include: how are African-American identities and cultural production imbricated with concepts of what is considered “western” or trends of west coast artmaking?; and what can these artists tell us about notions of space, place, and migration in the African-American imagination?

**AHIS W3898 Yoruba and the Diaspora. 4 points.**
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
*Not offered during 2019-20 academic year.*

We will study one of the great classical civilizations of Africa, the Yoruba kingdoms of Nigeria and Benin, and their impact on the arts of Cuba (Santería/Lucumi), Haiti (Vodoun and associated easel painting), Brazil (Candomblé, Umbanda), Surinam, and the U.S. There will be one or more museum field trips. For their research projects, students are free to work on a variety of topics, ranging from the subjects already listed to: the representation of Santería in Hollywood; the films of Maya Deren; Cuban modernism; Zora Neale Hurston in Haiti; etc.

**AHIS W3899 African American Visual and Decorative Arts, 1650-1900. 4 points.**
*Not offered during 2019-20 academic year.*

This course surveys the earliest forms of visual production by North Americans of African descent, spanning the period from 1640-1900. Our focus encompasses decorative arts and crafts (furniture, wrought iron, pottery, quilts), architecture and the emerging field of African American archeology, along with photography and the fine arts of painting and sculpture. We will consider how certain traditions brought from Africa contributed to the development of the early visual and material culture of what came to be called the United States. We will also reflect on how theories of creolization, diaspora, and resistance help us understand African American and American culture in general.

**AHIS W3904 Aztec Art and Sacrifice. 4 points.**
SEAS Interdisciplinary Course
*Not offered during 2019-20 academic year.*

This seminar explores the issues of art and sacrifice in the Aztec empire from the points of view of the 16th century and modern times.

**AHIS W3906 The Colonial View of Aztec and Inca Art. 4 points.**
*Not offered during 2019-20 academic year.*

Prerequisites: application required.

Aztec and Inca art and culture analyzed as seen through Spanish and Native eyes in the context of an increasingly hybrid Colonial world.

**AHIS W3907 Construction of Andean Art. 4 points.**
*Not offered during 2019-20 academic year.*

Explores various ways in which the West has made sense of Andean Art from the 16th century to the present.

**AHIS W3915 African Art: The Next Generation. Focus: Congo. 4 points.**

AHIS W3919 The French Renaissance 1450-1550. 4 points. 
Not offered during 2019-20 academic year.

Prerequisites: Reading knowledge of French
Renaissance art in France rarely receives the same attention as its counterpart in Italy. The beginning of the French Renaissance is usually defined by the influx of Italian artists and objects during the course of the military campaigns in Italy by Charles VIII as well as Louis XII and/or the reign of Francis I (1515-1547). Suggesting a different view on the French Renaissance, this seminar aims to investigate the history of French art from Jean Fouquet (fl. c. 1450-1480) to Henry II (r. 1547-1559), emphasizing the diversity of French artistic production of this period and suggesting a continuity usually not acknowledged. A focus will be on illuminated manuscripts and painting, but the course will also address other media, such as objet d’art, stained glass, tapestries, wall painting and architecture. This class will include visits to Columbia’s Rare Book & Manuscript Library, the Pierpont Morgan Library, the Metropolitan Museum of Art, and The Cloisters. Reading knowledge of French is strongly recommended.

AHIS W3921 Patronage and the Monuments of India. 4 points. 
Not offered during 2019-20 academic year.

Exploration of the multiple aspects of patronage in Indian culture – religious, political, economic, and cultural. Case studies focused on specific monuments will be the subject of individual lectures.

AHIS W3922 Rome, CA. 300-1300. 4 points. 
Not offered during 2019-20 academic year.

Prerequisites: basic Italian desirable; at least 2 classes in Ancient/Medieval art.
This seminar explores the art and architecture of the city of Rome from Late Antiquity through the Middle Ages, namely from the reign of Constantine the Great to the creation of the first Jubilee Year by Pope Boniface VIII in 1300. The course is offered in close collaboration with Ancient Rome and Its Monuments (F. de Angelis) and is conceived as a travel seminar, taking students to Rome during Spring Break.

AHIS W3923 The Public Monument in the Ancient Near East. 4 points. 
Not offered during 2019-20 academic year.

This seminar will focus on the invention of the public monument as a commemorative genre, and the related concepts of time, memory and history in the ancient Near East and Egypt. Public monuments will be studied in conjunction with readings from ancient texts (in translation), as well as historical criticism, archaeological and art historical theories.

AHIS W3930 Ancient Rome and its Monuments. 4 points. 
Not offered during 2019-20 academic year.

Prerequisites: Familiarity with Ancient Rome, to be demonstrated through courses taken (Roman Art, Roman History, Latin Literature, etc.)
This seminar is an introduction to the main monuments of ancient Rome from the Archaic period to the third century CE. A trip to Rome will take place during Spring Break.

AHIS W3944 Art and Performance in 19th Century Europe. 4 points.
This course explores how the notion of “performance” can help us conceptualize aspects of nineteenth-century visual culture. Part of our investigation will involve examining how artists and critics claimed theater, music, and dance as models for the visual arts. Additionally, we will consider the implications of recent theories of performance for an understanding of artmaking and viewing as social practices.

AHIS W3947 India’s Images of the Feminine. 4 points. 
Not offered during 2019-20 academic year.

Prerequisites: application required.

AHIS W3953 The Artist Reading: Illustration in the 19th Century. 4 points.
Around 1800, new printing techniques revolutionized bookmaking. This revolution included new layouts, new visual effects, as well as new levels of dissemination through higher editions and cheap mass production. Consequently, the book itself became an important field of experimentation in visual representation, and thus established a new relationship between text and image, seeing and reading. The seminar examines the technical as well as the artistic, theoretical, and social sides of nineteenth-century book making and illustration.

AHIS W3956 Medieval Art at the Cloisters. 4 points. 
Not offered during 2019-20 academic year.

Meeting at the Cloisters, this seminar will provide the opportunity to work directly with the works of art themselves. Having introduced the works of art and located them in their present context, we will use the works as a means of passage to the principal periods and great themes of medieval art.

AHIS W3960 Cathedral: Narrating Gothic. 4 points.
Application required. See department website for instructions. Not offered during 2019-20 academic year.

We have created “Gothic” as much with words as with stones. With a sequence of readings in the primary sources, we will explore the relationship between building and talking, with special reference to Gothic.

AHIS W3961 Major’s Colloquium: Intro to the Literature and Methods of Architectural History. 4 points. 
Not offered during 2019-20 academic year.

This course will combine practical training in visual analysis and architectural historical research – through a single writing assignment.
in three stages - with a close reading of key works of architectural historians since the emergence of the discipline as a free-standing field of inquiry in the late 19th century. In addition to course meetings occasional site visits will be arranged in the city and further afield. Majors must receive instructor’s permission. Students must sign-up online: http://goo.gl/forms/ofh8x5n9k

AHIS W3963 Readings in Modernism and Modernity in Architecture. 4 points.
Not offered during 2019-20 academic year.

This seminar, based on close readings of key texts in modern and contemporary architectural theory, addresses the question of how these writings have shaped the practice of architecture and critical writing about actual buildings and urban design. Writers covered will include Wagner, Le Corbusier, Moholy-Nagy, Gropius, Venturi, and Koolhaas. The seminar will give particular attention to the relationship between the manifestoes of architects and the buildings they produced.

AHIS W3966 The Printed Image and the Invention of the Viewer. 4 points.
Not offered during 2019-20 academic year.

By the third quarter of the fifteenth century, the mechanically reproduced image could offer a variety of visual experiences: occasions for devotional encounters, markers of scientific data, portraits substituting for real presence, moral commentaries, templates for designs, and performances of stylistic bravado. Some of these categories had never before been presented for ownership, nor in the format of a single sheet that could be bought, colored, cut, pasted, written upon, copied, or sent as a greeting card. In order to attune prospective buyers to the capabilities of this medium, artists developed different strategies for signaling how their images might be enjoyed, put to use, or interpreted. Structured around visits to work with originals in New York collections, this course aims to develop our skills at “reading” prints, to understand how they invited certain behaviors and practices and offered new kinds of pictorial experiences. Through close reading of texts and close analysis of images, we will discover how early modern prints created artistic conversations and trained the eyes and minds of their viewers.

AHIS W3967 Sacred Love in Italian Renaissance Art. 4 points.
Not offered during 2019-20 academic year.

What is the nature of sacred love? How is it different from love experienced within romance, marriage, and friendship? How does one love God? What role does art play in conceptualizing divine love? How does it stimulate desire in the viewer’s soul, mind, and body? Such questions structure this course’s investigation of sacred love in Italian Renaissance art. The course examines religious art created between 1250-1550 within the cities of Florence, Venice, Rome, Siena, and Mantua, while simultaneously exploring the changing theological notions of love from the late medieval period through the Counter-Reformation. Topics covered within the course include the adoration of Jesus’ body in the altarpiece; devotion in the context of Madonna and Child paintings; ecstatic transcendence in portrayals of saints like St. Mary Magdalene and St. Catherine of Siena; holy matrimony within the convent and monastery; as well as charity in the art of confraternities dedicated to amor deí and amor proximi.

AHIS W3971 Photographer/Ethnographer. 4 points.
Not offered during 2019-20 academic year.

This seminar explores the “creative uses of reality.” Modern and contemporary artists have become increasingly concerned to represent culture—their own but especially other people’s—through the media of film and photography. Are the resulting works products of art or science? Why is it so hard to tell? Has the opening of the archives through the internet and through globalization changed anything? Should artists who take on the role of cultural mediator be held to a code of ethics similar to the ”human subject” protocols imposed on anthropologists? In the seminar, we will examine influential models, such as Nanook of the North and the work of Jean Rouch, in relation to developing discourses on documentary photography, anthropology, primitivism, and contemporary art. The course will also take advantage of groundbreaking scholarship on postcolonial photographic practice in India and Africa that challenges assumptions that photography is somehow an inherently “Western” medium. The seminar has been timed to take advantage of the campus visits of contemporary artists from South Africa and Brazil whose work directly confronts the politics of representation.

AHIS W3974 Painting and Photography, From Daguerre To Richter. 4 points.
Not offered during 2019-20 academic year.

Application required. See department’s website for instructions. Not offered during 2019-20 academic year.

This class will survey the major movements in painting and photography in the 19th and 20th centuries, and examine methods for understanding the often-contested relationship between the two media. The guiding thread of the class will be a critical reading of Aaron Scharf’s classic text ‘Art and Photography’ (1968), expanding upon its strengths and commenting on its shortcomings. The class is a workshop to rethink the similarities and differences between painting and photography as means of representation.

AHIS W3982 The Shape of New York: Reconstructing Lower Manhattan. 4 points.
Not offered during 2019-20 academic year.

Studies the history of Lower Manhattan, its redevelopment around the World Trade Center in the 1960s, and rebuilding in the aftermath of 9/11. Topics include the rise of the financial district, the creation of Battery Park City, public policy and the process of city building, and issues relating to a proper memorial and transportation infrastructure. Students will hear from guest speakers involved in the rebuilding effort, and participate in a pilot digital project to explore the history and future of Lower Manhattan.

AHIS W4076 Arts of Sub-Saharan African. 3 points.
Not offered during 2019-20 academic year.

Survey of the arts of sub-Saharan Africa.

AHIS W4078 Art and Archaeology of West Africa. 3 points.
Not offered during 2019-20 academic year.

Reviews the history of West African art from circa 500 B.C.E. through 1900 C.E., using mostly evidence from sculpture, pottery, and textiles. Also critically assesses the current state of archaeological research and its value to art historical scholarship.

AHIS W4086 Aztec Art and Architecture. 3 points.
Open to graduate and undergraduate students. Not offered during 2019-20 academic year.
This course focuses on the visual and material culture of the Aztec (Mexica) Empire, from the fourteenth to sixteenth centuries CE. We will explore the Mexica civilization through their books, objects, buildings, and festivals, investigating topics such as communication, performance, religion and ritual, sacred landscapes, histories and origin stories, politics and empire, and other facets of society. In addition, we will consider interactions of Mexica and Europeans in New Spain in the sixteenth century and the transformations in arts and culture as a result of their interchange.

AHIS W4089 Native American Art. 3 points.
Not offered during 2019-20 academic year.

This introduction to Native North American art surveys traditions of painting, sculpture, ceramics, textiles, photography, and architecture, and traces the careers of contemporary Indian modernists and postmodernists. It emphasizes artistic developments as a means of preserving culture and resisting domination in response to intertribal contact, European colonization, and American expansion.

AHIS W4109 Vision and Imagination in Chinese Painting. 3 points.
Not offered during 2019-20 academic year.

AHIS W4111 The Japanese Temple. 3 points.
Not offered during 2019-20 academic year.

No other single institution has played a more crucial role in the development and preservation of Japanese art than the Buddhist temple. This course will examine the Buddhist temple in Japan from its beginnings in the late sixth and seventh century through the early modern period. Lectures will provide students with multiple perspectives on the architecture, art, and liturgy that comprise Buddhist houses of worship in Japan. Issues to be explored include: the adoption of continental practices at Hōryū-ji and Tōdai-ji; adaptations to the Japanese cities and landscape at Tōji, Murō-ji, and Sensō-ji; the impact of new sects such as Zen and Pure Land Buddhism in medieval Japan; and syncretism at sites such as Kumano.

AHIS W4127 Indian Painting. 3 points.
Not offered during 2019-20 academic year.

AHIS W4130 The Indian Temple. 3 points.
Not offered during 2019-20 academic year.

This course explores the emergence and development of the Indian temple, examines the relationship between form and function, and emphasizes the importance of considering temple sculpture and architecture together. It covers some two thousand years of activity, and while focusing on Hindu temples, also includes shrines built to the Jain and Buddhist faiths.

AHIS W4131 Medieval Art I: From Late Antiquity to the End of Byzantium. 3 points.
Not offered during 2019-20 academic year.

A survey of Early Christian and Byzantine art from its origins in the eastern provinces of the Late Roman Empire through the Ottoman Conquest of Constantinople in 1453. The course is first segment of a two-part survey of medieval monuments offered by the Department of Art History and Archaeology.

AHIS W4145 Women and Self-Representation in Islamic Societies. 3 points.
Not offered during 2019-20 academic year.

AHIS W4155 Art and Archaeology of Mesopotamia. 3 points.
Not offered during 2019-20 academic year.

This course surveys the art and architecture of Mesopotamia from the rise of the first cities, the invention of writing, and the development of monumental art and architecture in the fourth millennium BC through the Parthian-Roman era (3rd century AD). Within this historical framework the lectures will focus on the revolutionary ancient developments in art and architecture, including the origins of narrative representation, the first emergence of historical public monuments, and sacred architecture. We will also study some ancient texts on the making and uses of images and monuments, including rituals of animating statues, building rituals, treatment of images in wars, and visual performativity. At the same time, small scale and personal arts will be considered in the context of private ownership and the practices of daily life.

AHIS W4158 The Art of Mesopotamia: 4th To 2nd Millenium B.C.E. 3 points.
Not offered during 2019-20 academic year.

Introduction to ancient Near Eastern art as it developed on the background of the political and social changes from the earliest known urban civilization to territorial states. Questions of (dis-)continuity in the visual representation of gods or political rulers and in the selection of narrative scenes on seals, reliefs, in statues and terracottas are discussed in relation to ideological, ethnic, social and economical differences.

AHIS W4181 Art and Architecture of Ancient Assyria. 3 points.
Not offered during 2019-20 academic year.

Survey of the art and architecture of ancient Assyria (northern Iraq) from the Early Dynastic period (ca. 2500 B.C.E.) until the end of the Neo-Assyrian empire (612 B.C.E.). Surviving artifacts, excavation reports, ancient written records, and specialized studies on trade, state and imperial administration, cult and temple, history, and language.

AHIS W4215 Aegean Art and Architecture. 3 points.
Not offered during 2019-20 academic year.

An examination of the arts, architecture, and archaeology of the Aegean, inclusive of surrounding eastern and western Mediterranean regions, this survey includes material from the Bronze Age, with a particular focus on the visual culture of the Minoans and Mycenaeans.

AHIS W4235 Gore and Violence in Greek Art. 3 points.
Greek art is usually associated with beauty, symmetry, and formal perfection. However, both the historical context that led to the creation of artistic expressions in various media and the majority of topics Greek artists chose to depict clearly demonstrate the violent origins of Greek art. Aim of this course is to break through the frame of what is considered the canonical image of Classical antiquity and shed light on the darker aspects of Greek art. The course will try to demonstrate how art in Classical Greece was used as an effective means in both dealing and channeling violence. Nevertheless, violence in art also represented a sophisticated way to create and demolish the image of dangerous others: the aggressive barbarian (Persian), the uncontrolled nature outside the constraints of the polis (Centaurs), the all too powerful female (Amazons).

AHIS W4315 The Making of Medieval Art, 650-900. 3 points.
Not offered during 2019-20 academic year.
The development of medieval art in the Germanic kingdoms of western Europe from the mid-7th century to the end of the Carolingian empire

AHUM V3342 Masterpieces of Indian Art and Architecture. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement,
Discussion Section Required
Not offered during 2019-20 academic year.

Introduction to 2000 years of art on the Indian subcontinent. The course covers the early art of Buddhism, rock-cut architecture of the Buddhists and Hindus, the development of the Hindu temple, Mughal and Rajput painting and architecture, art of the colonial period, and the emergence of the Modern.

Mission

The Department's primary aim is to introduce major Asian and Middle Eastern civilizations and their works and values as a means of expanding knowledge of the varieties and unities of human experience. Students who major in the Department take a specific number of courses from the Barnard and Columbia curriculum, obtain three years of language proficiency in the language relevant to the world area under study, and hence become regional experts with specific disciplinary skills. The Department offers three tracks: the East Asian Track covers China, Japan, and Korea; the South Asian track covers India, Pakistan, and Bangladesh; and the Middle Eastern Track covers the Middle East, including Israel, the Gulf States, Armenia, Iran, Iraq, and Turkey, and North Africa. The Department's general courses are designed for all students, whatever their major interests, who wish to include knowledge of Asian and Middle Eastern life in their education. Study abroad is encouraged.

Student Learning Outcomes

Faculty in the Department of Asian and Middle Eastern Cultures hold the following learning outcomes for majors who take advantage of the opportunities offered through the program. Students will be able to:

- Speak, write, and read at an intermediate to advanced level in a language of the Middle East, South Asia, or East Asia;
- Demonstrate a basic understanding of the history and culture of their chosen area of the world;
• Exhibit in-depth knowledge of a particular aspect of it, such as the artistic, literary, religious, philosophical, sociological, anthropological, political, or economic elements;
• Demonstrate familiarity with leading theory on the study of non-Western cultures; and
• Produce a clearly and critically written senior thesis that draws upon the various aspects of their training – for instance, linguistic, historical, cultural, and political – in investigating a topic in detail and making a contribution to knowledge.

Students who wish to enter Chinese, Japanese, or Korean language courses above the introductory level must pass a language placement test before registering. Placement exams are given during the week before classes begin; contact the Department of East Asian Languages and Cultures (407 Kent) for exact dates. For placement above the introductory level in Arabic, Armenian, Bengali, Hindi-Urdu, Panjabi, Persian, Sanskrit, Tamil, Tibetan, or Turkish, contact the Department of Middle Eastern, South Asian, and African Studies (401 Knox). All students wishing to enter the Hebrew language program or wishing exemption from the Hebrew language requirement must take a placement test. Contact the Department of Middle Eastern, South Asian, and African Studies (401 Knox) for details.

### Requirements for the Major

A student who plans to major in Asian and Middle Eastern Cultures is advised to consult a member of the Department in the spring term of her first year in order to be sure to plan for an appropriate sequence of language study.

To major in Asian and Middle Eastern Cultures, a student will choose to follow one of three tracks, East Asian, Middle Eastern, or South Asian.

#### The East Asian Track

**Major Requirements**

The major requires a minimum of 11 courses, including the two senior thesis seminars (if student has already satisfied the language requirement in advance) or more (if she starts the language requirement from the beginning).

The requirements include:

**LANGUAGE**

3 years of Chinese, Japanese, or Korean, or the proficiency equivalent (to be demonstrated by a placement examination).

Third-year Chinese, Japanese, Korean, or Tibetan (completion of the CHNS UN3005 Third-Year Chinese I (W) - CHNS UN3006 Third-Year Chinese II (W) in Chinese, JPNS UN3005 Third-Year Japanese I - JPNS UN3006 Third-Year Japanese II in Japanese, or KORN UN3005 Third-Year Korean I - KORN UN3006 Third-Year Korean II in Korean; or TIBT UN3611 Third Year Modern Colloquial Tibetan I - TIBT UN3612 Third Year Modern Colloquial Tibetan II in Tibetan), or the proficiency equivalent (to be demonstrated by placement examination). Students of Chinese may also complete CHNS UN3003 Third-Year Chinese I (N) - CHNS UN3004 Third-Year Chinese II (N) to meet the third year requirement.

Students who test out of three years or more of a language must take an additional year of that language or another East Asian language in order to satisfy the Barnard language requirement.

*Note that in all East Asian language courses, the minimum grade required to advance from one level to the next is a B*.

### CORE COURSES

AHUM UN1400 Colloquium on Major Texts: East Asia

Two of the following survey courses:

- ASCE UN1359 Introduction to East Asian Civilizations: China
- ASCE UN1361 Introduction to East Asian Civilizations: Japan
- ASCE UN1363 Introduction to East Asian Civilizations: Korea
- ASCE UN1365 Introduction to East Asian Civilizations: Tibet
- ASCE UN1367 Introduction to East Asian Civilizations: Vietnam

All majors are required to take EAAS UN3990 Approaches to East Asian Studies, which is offered every spring.

### DISCIPLINARY COURSES

Three courses in either history, literature, philosophy, religion, art history, anthropology, political science, economics, or some other thematic cluster approved by the adviser. For further information, consult the online catalog or a departmental adviser.

### ELECTIVE COURSES
Two courses related to East Asia, to be chosen in consultation with the adviser.

SENIOR THESIS

Each student is expected to prepare, for her senior thesis, a research paper or an annotated English translation of an East Asian text. There will be two tracks for the senior thesis process. (1) Those who wish to write their senior theses under the aegis of EALAC at Columbia must apply to the Senior Thesis Program at the end of their junior year. The deadline will be May 1st at 5:00 p.m. [see EALAC’s website for application form], and the application must be delivered in hard copy to the EALAC Academic Coordinator in 407 Kent. Students must have at least a 3.6 GPA in courses taken in the major at the time of the application. Decisions will be made by June 1, when grades for the second semester have been received. All students accepted into the Program are required to enroll in the Senior Thesis Research Workshop (EAAS UN3999) for the fall of their senior year. Students who perform satisfactorily in this workshop, successfully complete a thesis proposal, and find a faculty advisor, will then write the Senior Thesis itself in the spring semester under the direction of the adviser and a graduate student tutor (EAAS UN3901). Successful completion of the thesis by the April 1 deadline in the spring semester will be necessary but not sufficient for a student to receive Departmental Honors. (Because honors can be awarded to a maximum of 20% of the majors, not all thesis writers will receive honors.) (2) Students who do not have a 3.6 average in the major OR who wish to write their senior theses at Barnard will do so under the direction of an East Asia faculty member at Barnard. Such students should enroll in two semesters of independent study (Asian Studies BC 3999) with their faculty adviser.

MINOR REQUIREMENTS

PREREQUISITES:

Students must meet the following prerequisite prior to declaring an AMEC minor in the East Asia Track: Two years of Chinese, Japanese, Korean, or Tibetan. These must be either taken at Columbia or proficiency proven through a placement examination.

LANGUAGES:

Two semesters of third-year work in the chosen language, or the proficiency equivalent (to be demonstrated by a placement examination).

Students who test out of the third-year level must take either an additional year of the same language or one year of an additional language in the same East Asia Track.

INTRODUCTORY COURSES (two courses):

- AHUM UN1400, Colloquium on Major Texts of East Asia
- One civilizations class relating to the language and region of study (China Civ, Japan Civ, Korean Civ, Tibetan Civ, or Vietnamese Civ.)

ELECTIVES (two courses):

Two electives in the world region under study, to be taken in any department in the university at the 3000- or 4000-level, subject to approval by the advisor.

The Middle East or South Asian Track

A minimum of 13 courses is required, including:

- Asian Humanities: AHUM UN3399 Colloquium on Major Texts: Middle East and South Asia
- Middle East & South Asia: MDES UN3000 Theory and Culture

Two of the following courses:

- Asian Civilizations-Middle East: ASCM UN2003 Introduction to Islamic Civilization
- Asian Civilizations-Middle East: ASCM UN2008 Contemporary Islamic Civilization
- Asian Civilizations-Middle East: ASCM UN2357 Introduction to Indian Civilization
- Asian Civilizations-East Asian: ASCE V2365 Introduction to East Asian Civilizations: Tibet

The equivalent of six courses (the completion of the 3rd year of advanced language study) of Arabic, Armenian, Bengali, Hebrew, Hindi, Persian, Punjabi, Sanskrit, Tamil, Turkish, or Urdu selected in consultation with the advisor.

A minimum of five courses chosen as a concentration. The concentration may be in the languages and cultures of ancient Semitic, Arabic, Armenian, Hebrew, Indic, Iranian, Persian, or Turkish.

A senior thesis, to be written under the supervision of a faculty member chosen in consultation with the adviser. Students whose sole major is Asian and Middle Eastern Cultures should take two semesters of ASST BC3999 Independent Study with their adviser for the purposes of producing the thesis. Students who are double-majoring in a second department that requires a group seminar should enroll in that seminar and work with the AMEC advisor on the side.

The courses listed under Middle East and South Asia below represent a selection among those required in one or another of the concentrations. Students should consult the office of Department of Middle Eastern, South Asian, and African Studies in 401 Knox Hall for a complete list of course offerings. Graduate courses at the 4000-level may be taken with permission of the instructor. See GSAS catalog (http://www.columbia.edu/cu/gsas/sub/bulletin/site/map/) for course listings.

Minor Requirements

Prerequisite:

For Middle East Track: Students must meet the following prerequisite prior to declaring an AMEC minor: Two years of Arabic, Armenian, Hebrew, Persian, or Turkish. These must be either taken at Columbia or proficiency proven through a placement examination.

For South Asian Track: Students must meet the following prerequisite prior to declaring an AMEC minor: Two years of Sanskrit, Hindi-Urdu, Bengali, Panjabi, or Tamil. These must be either taken at Columbia or proficiency proven through a placement examination.

Language Requirement (two courses):

Two semesters of third-year work in the chosen language, or the proficiency equivalent (to be demonstrated by a placement examination).
Students who test out of the third-year level must take either an additional year of the same language or one year of an additional language in the same Track.

**Introductory Courses (two courses):**
- AHUM UN1399, Colloquium on Major Texts of South Asia and the Middle East
- One civilizations class relating to the language and region of study (Indian Civ, Islamic Civ, or Tibetan Civ)

**Electives (two courses):**
Two electives in the world region under study, to be taken in any department in the university at the 3000- or 4000-level, subject to approval by the advisor.

**CSER UN3905 Asian Americans and the Psychology of Race. 4 points.**
This seminar provides an introduction to mental health issues for Asian Americans. In particular, it focuses on the psychology of Asian Americans as racial/ethnic minorities in the United States by exploring a number of key concepts: immigration, racialization, prejudice, family, identity, pathologization, and loss. We will examine the development of identity in relation to self, family, college, and society. Quantitative investigation, qualitative research, psychology theories of multiculturalism, and Asian American literature will also be integrated into the course.

**CSER UN3922 Race and Representation in Asian American Cinema. 4 points.**
Enrollment limited to 22.

This seminar focuses on the critical analysis of Asian representation and participation in Hollywood by taking a look at how mainstream American cinema continues to essentialize the Asian and how Asian American filmmakers have responded to Hollywood Orientalist stereotypes. We will analyze various issues confronting the Asian American, including yellowface, white patriarchy, male and female stereotypes, the "model minority" myth, depictions of "Chinatowns," panethnicity, the changing political interpretations of the term "Asian American" throughout American history, gender and sexuality, and cultural hegemonies and privileging within the Asian community.

**CSER UN3923 Latina/o and Asian American Memoir. 4 points.**
In this class, we will explore Latino and Asian American memoir, focusing on themes of immigration and duality. How do we construct identity and homeland when we are 'multiple'? How do we define ourselves and how do others define us? By reading some of the most challenging and exciting memoirs by Latino and Asian Americans, we will attempt to answer these questions and/or at least try to understand these transnational and multicultural experiences. This class combines the critical with the creative—students have to read and critc memoirs as well as write a final 10-page nonfiction creative writing piece. Students will also have the opportunity to speak to some Latino and Asian authors in class or via SKYPE. Students will be asked to prepare questions in advance for the author, whose work(s) we will have read and discussed. This usually arises interesting and thought-provoking conversations and debates. This 'Dialogue Series' within the class exposes students to a wide-range of voices and offers them a deeper understanding of the complexity of duality.

**EAAS UN3999 Research in East Asian Studies. 1 point.**
Introduces students to research and writing techniques and requires the preparation of a senior thesis proposal. Required for majors and concentrators in the East Asian studies major in the spring term of the junior year.

**CPLS GU4111 World Philology. 4 points.**
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Philology, broadly defined as the practice of making sense of texts, is a fundamental human activity that has been repeatedly institutionalized in widely separated places and times. In the wake of the formation of the modern academic disciplines in the nineteenth century and their global spread, it became difficult to understand the power and glory of older western philology, and its striking parallels with other pre- and early modern forms of scholarship around the globe. This class seeks to create a new comparative framework for understanding how earlier generations made sense of the texts that they valued, and how their practices provide still-vital models for us at a time of upheaval in the format and media of texts and in our scholarly approaches to them. Students will encounter key fields of philology—textual criticism, lexicography, grammar, and, above all, commentary—not in the abstract but as instantiated in relation to four foundational works—the Confucian Analects, the Rāmāyaṇa of Vālmīki, the Aeneid, and the Tale of Genji—and the scholarly traditions that grew up around them. We are never alone when we grapple with the basic question of how to read texts whose meaning is unclear to us. Over the course of the semester, this class will foster a global understanding of the deep roots and strange parallels linking contemporary reading and interpretation to the practices of the past.

**East Asian, General and Comparative**

**HIST UN2580 THE HISTORY OF UNITED STATES RELATIONS WITH EAST ASIA. 4 points.**
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This lecture course examines the history of the relationship between the United States and the countries of East Asia in the 19th and 20th
centuries. The first half of the course will examine the factors that drove the United States to acquire territorial possessions in Asia, to vie for a seat at the imperial table at China’s expense, and to eventual confrontation with Japan over mastery in the Pacific from the turn of the century leading to the Second World War. The second half of the course will explore the impact of U.S. policy toward East Asia during the Cold War when Washington’s policy of containment, which included nation-building, development schemes, and waging war, came up against East Asia’s struggles for decolonization, revolution, and modernization. Not only will this course focus on state-to-state relations, it will also address a multitude of Chinese, Japanese, Korean, and Vietnamese perspectives on the United States and American culture through translated text, oral history, fiction, and memoir.

Participation in weekly discussion sections, which will begin no later than the third week of classes, is mandatory.

EAAS UN3322 East Asian Cinema. 4 points.

This course introduces students to major works, genres and waves of East Asian cinema from the Silent era to the present, including films from Japan, Korea, Mainland China, Taiwan and Hong Kong. How has cinema participated in East Asian societies’ distinct and shared experiences of industrial modernity, imperialism and (post)colonialism? How has cinema engaged with questions of class, gender, ethnic and language politics? In what ways has cinema facilitated transnational circulations and mobilizations of peoples and ideas, and how has it interacted with other art forms, such as theatre, painting, photography and music? In this class, we answer these questions by studying cinemas across the region side-by-side, understanding cinema as deeply embedded in the region’s intertwining political, social and cultural histories and circulations of people and ideas. We cover a variety of genres such as melodrama, comedy, historical epic, sci-fi, martial arts and action, and prominent film auteurs such as Yasujirō Ozu, Akira Kurosawa, Yu Hyōnomi, Chen Kaige, Hou Hsiao-hsien, and Ann Hui. As cinema is, among other things, a creative practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects. As a global core course, this class does not assume prior knowledge of East Asian culture or of film studies.

EAAS UN3844 Culture, Health and Healing in East Asia. 3 points.

Why do certain mental illnesses only appear in specific regions of the world? What processes of translation, adaption, and “indigenization” take place when Western psychiatric diagnostic categories, pharmaceutical regimes, and psychodynamic treatments travel to China, South Korea and Japan? How do East Asian therapeutic modalities such as Traditional Chinese Medicine and the practice of qigong destabilize biomedical assumptions about the etiology and treatment of mental illness? This course engages these and other questions through anthropological analysis of the experiences of people struggling with mental illness, the mental health practitioners who treat them, and the broader economic, social and political contexts that shape these interactions.

EAAS UN3990 Approaches to East Asian Studies. 4 points.

Enrollment is limited to EALAC and AMEC majors and concentrators only.

This course is intended to provide a focal point for undergraduate majors in East Asian Studies. It introduces students to the analysis of particular objects of East Asian historical, literary, and cultural studies from various disciplinary perspectives. The syllabus is composed of a series of modules, each centered around an object, accompanied by readings that introduce different ways of understanding its meaning.

points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
This seminar asks what Chinese history tells us about global history
and vice versa. Taking a long-term and multiregional approach, it
invites you to develop your own answers to this question from
perspectives such as trade, war, religion, science, gender, ideology, and
modern state- and nation-building, and contemporary international
relations. We will not only challenge Eurocentric and Sinocentric
methodologies, but push toward new conceptual vocabularies
that aspire to the genuinely global.

EAAS GU4226 Gender, Class and Real Estate in Urbanizing China. 4
points.
This is a seminar for advanced undergraduates and master's degree
students, which explores the socioeconomic consequences of China's
development of a boom, urban residential real-estate market since
the privatization of housing at the end of the 1990s. We will use the
intersecting lenses of gender/sexuality, class and race/ethnicity to
analyze the dramatic new inequalities created in arguably the largest
and fastest accumulation of residential-real estate wealth in history.
We will examine topics such as how skyrocketing home prices and
state-led urbanization have created winners and losers based on
gender, sexuality, class, race/ethnicity and location (hukou), as China
strives to transform from a predominantly rural population to one that
is 60 percent urban by 2020. We explore the vastly divergent effects
of urban real-estate development on Chinese citizens, from the most
marginalized communities in remote regions of Tibet and Xinjiang to
hyper-wealthy investors in Manhattan. Although this course has no
formal prerequisites, it assumes some basic knowledge of Chinese
history. If you have never taken a course on China before, please ask
me for guidance on whether or not this class is suitable for you. The
syllabus is preliminary and subject to change based on breaking news
events and the needs of the class.

RELI GU4617 Image Theories in Chinese Religions. 4 points.
What does “image” mean in Chinese intellectual traditions? How did
proponents of different religious persuasions construe the relationship
between images and their referents differently and how did such
construal change over time? Why did the practice of fashioning images
often give rise to controversies in Chinese history? What makes images
the object of adoration as well as destruction? Throughout the course,
we will tackle these questions from diverse perspectives. The first half
of the course examines a variety of accounts from Chinese indigenous
classics and treatises. The second half looks at how discourses of the
image further diversified after the arrival of Buddhism in China.

EAAS GU4840 China and the Politics of Desire. 4 points.
A recent American newspaper headline announced that China has
become “the most materialistic country the world.” Globally circulating
narratives often interpret Chinese consumers’ demand for commodities
as an attempt to fill a void left by the absence of the Maoist state,
traditional religious life, and Western-style democracy. But things
aren’t as simple as they appear. This course explores the intertwined
questions of “Chinese” desire and the desire for China. Avoiding
reductionist understandings of desire as either a universal natural
human attribute or a particular Chinese cultural trait, we will track the
production and management of desire within a complex global field.
Drawing on ethnographies, films, short stories, and psychoanalytic
and postcolonial theory, this course will explore the shifting figure of desire
across the Maoist and post-Maoist eras by examining how academics,
government officials, intellectuals, and artists have represented
Chinese needs, wants and fantasies. From state leaders’ attempts to
improve the “quality” of the country’s population to citizens’ dreams of
home ownership, from sexualized desire to hunger for food, drugs and
other commodities, we will attend to the continuities and disjunctures
of recent Chinese history by tracking how desire in China has been
conceptualized and refracted through local and global encounters.

ASCE UN1371
A survey of important events and individuals, prominent literary and
artistic works, and recurring themes in the history of Japan, from
prehistory to the 20th century.
The readings will extend the realm of the course topics to include broader cultural criticism in an attempt to surface the interrelation of (audio-)visual media and culture in Japan.

**EAAS UN3343 Japanese Contemporary Cinema and Media Culture. 4 points.**

In this course, we will look at the contemporary history and theory of cinema and media culture in Japan. To be more specific, the course will closely examine 1) the various traits of postmodern Japanese cinemas in the 1980s and the 1990s after the phase of global cinematic modernism, 2) contemporary media phenomena such as media convergence and the media ecologies of anime, 3) media activism after the 2011 Tohoku earthquake, and beyond. We will proceed through careful analysis of films, anime, and digital media, while also addressing larger questions of historiography in general. In other words, this course asks, what is it to study Japanese cinema and media (outside Japan)? What would be a heuristic narrative mode to examine the (trans-)national history of Japanese cinema and media? Such inquiries will be integrated into the ways we analyze and discuss the films and media works selected for our weekly screenings.

**East Asian, Korea**

**EARL GU4324 Religion and Politics in Korea. 4 points.**

This course explores diverse aspects of the interactions between religion and politics in modern, pre-modern, and contemporary Korea. It focuses on how Korean religions such as Buddhism, Confucianism, Christianity, and new religions have influenced and been influenced by politics, thereby leading to the mutual transformation of the two major social phenomena.
The dramatic cultural and intellectual transformations that were respectively. Our class ends with the French colonization of the region, attention to the rise of an independent state out of the crumbling membership within successive Chinese empires. We pay special emphasis on the rise and development of independent kingship towards the introduction of high sinitic culture, and the region's long history of power.

This course seeks to introduce the sweep of Tibetan civilization and its history from its earliest recorded origins to the present. The course examines what civilizational forces shaped Tibet, especially the contributions of Indian Buddhism, sciences and literature, but also Chinese statecraft and sciences. Alongside the chronological history of Tibet, we will explore aspects of social life and culture.

HSEA GU4814 Space and Place in Urbanizing Tibet: Indigenous Experiences in China. 4 points.

This course engages with approaches from anthropology, geography, and indigenous studies to analyze contemporary urban transitions on the Tibetan plateau.

HSEA GU4815 Faith and Empire: Art and Politics in Tibetan Buddhism. 4 points.

Religious claims to political power are a global phenomenon, and Tibetan Buddhism once offered a divine means to power and legitimacy to rule. This class will explore the intersection of politics, religion, and art in Tibetan Buddhism—the force of religion to claim political power. Images were one of the primary means of political propagation, integral to magical tantric rites, and embodiments of power.

East Asian, Vietnam

ASCE UN1367 Introduction to East Asian Civilizations: Vietnam. 4 points.

Corequisites: ASCE UN1377

This course provides a survey of Vietnamese civilization from prehistoric origins to the French colonization in the 19th century, with special emphasis on the rise and development of independent kingship over the 2nd millennium CE. We begin by exploring ethnolinguistic diversity of the Red River plain over the first millennium BCE, culminating in the material bronze culture known as the Dong Son. We then turn towards the introduction of high sinic culture, and the region's long membership within successive Chinese empires. We pay special attention to the rise of an independent state out of the crumbling Tang Dynasty, and the specific nation-building effects of war with the Mongols and the Ming Dynasty, in the 14th and 15th centuries respectively. Our class ends with the French colonization of the region, and the dramatic cultural and intellectual transformations that were triggered as a result. Our course will interrogate Vietnamese culture as a protean object, one that is defined and redefined at virtually every level, throughout a history marked by foreign interest, influence, and invasion.

South Asian

ASCM UN2357 Introduction to Indian Civilization. 4 points.

Introduction to Indian civilization with attention to both its unity and its diversity across the Indian subcontinent. Consideration of its origins, formative development, fundamental social institutions, religious thought and practice (Vedic, Buddhist, Jain, Hindu, Muslim, and Sikh), literary and artistic achievements, and modern challenges. Discussion section is required.

MDES UN3046 The Intersectional Politics of Religion. 3 points.

The Islamic veil controversy in France, the Rohingya crisis in Myanmar, the Kashmir lockdown, the lynching of Dalits in India – all seem to be connected through the ideas of ‘religion’, and certain religious identities as the basis for violence. What is the understanding of the religious that seems to be the operative factor in these events? Is it a singular concept of religion or are there different connotations of this category? For instance, how do we understand religion when it bifurcates the women’s movement between Western ‘secular’ women and non-Western ‘Muslim’ women? Is it the same concept when we identify ‘religion’ as the basis for the harmonious coexistence of Hindus and Muslims among certain non-elite communities in India? In this course, we ask if it even possible to understand, ‘religious’ events in the modern political world, without asking what other categories implicitly inform our notion of the religious – such as, gender, caste, culture, race and historiography. We move beyond the strict dichotomy, of religion and secularism, as something given and unproblematic. Drawing from examples and events in modern South Asia as well as other postcolonial contexts, we attempt to respond to the concepts, contradictions, and dilemmas that accompany the question of when and how the religious becomes the political in the modern world.

Our weekly sessions will be devoted to reading texts from various disciplines and analyzing how the main argument is formulated and how that relates to a critique of the concept of religion in modern South Asia. Some weeks the scholarly texts will be supplemented by primary texts/case studies that will serve as direct demonstration of the problems that will be explored in the course. The engagement with sources from various disciplines will expose us to interdisciplinary content as well as diverse methods of critical analysis and argumentation. It will also help acquire the practice of identifying the central argument of the text, understand how the broad argument is actually formulated through smaller steps, and achieve the analytic skill to critically locate that single argument within a larger body of scholarship.
ASRL UN3974 Hindu Goddesses. 4 points.
Prerequisites: One course in Indian culture or religion or permission of the instructor.
Study of a variety of Hindu goddesses, focusing on representative figures from all parts of India and on their iconography, associated powers, and regional rituals. Materials are drawn from textual, historical, and field studies, and discussion includes several of the methodological controversies involving interpretation of goddess worship in India.

MDES 3644 Visual Cultures of Modern South Asia. 3 points.
This lecture course introduces students to the power and meaning of popular visual cultures of South Asia. Visual culture is a crucial arena for the enactment of social transformations and the creation of collective imaginaries. We will track such varied modern media types as calendar art, photography, film, architecture, clothing, and religious festivals, loosely following key chronological signposts in the shared histories of the subcontinent. Together, we will practice a new way of understanding history and society—a visual way that will make us aware of the diversity of hopes, fears, and dreams that comprise South Asia. Designed for students with a basic understanding of South Asian history, the course aims to familiarize you with key methodological approaches in visual culture studies and current debates in South Asian art history and media theory.

MDES UN3445 Societies & Cultures Across the Indian Ocean. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
The course is designed to introduce the Indian Ocean as a region linking the Middle East, East Africa, South and Southeast Asia. With a focus on both continuities and rupture from the medieval to the modern period, we study select cultures and societies brought into contact through interregional migration and travel from the 10th to 20th centuries. Different types of people—nobles, merchants, soldiers, statesmen, sailors, scholars, slaves—experienced mobility in different ways. How did different groups of people represent such mobilities? What kinds of cooperation, accommodation or conflict did different Indian Ocean encounters engender? Using an array of different primary sources, we look at particular case studies and their broader social and cultural contexts.

AHUM UN1399 Colloquium on Major Texts: Middle East and South Asia. 4 points.
Readings in translation and discussion of texts of Middle Eastern and Indian origin. Readings may include the Qur’an, Islamic philosophy, Sufi poetry, the Upanishads, Buddhist sutras, the Bhagavad Gita, Indian epics and drama, and Gandhi’s Autobiography.

RELI GU4228 South Asia and the Secular. 4 points.
This seminar explores different contestations and inflections of the secular in South Asia. We will begin by tracing a genealogy of the secular, which gave rise to a particular discursive grammar. Grounding ourselves in this formative space of the secular, we will study the constitutive nature of imperialism within the secular by examining the disciplining and conscripting role of Orientalism and the colonial state. Though noting these changes produced by colonial rule, this course also explores the arguments scholars of South Asia have made distinguishing between "secularisms" and the production of a tolerant and cosmopolitan South Asian orientation. In conjunction and against these possibilities, rather than consider the religious retrograde or communal, we will consider the continual striving toward political autonomy through disputation in the parameters of a given tradition—which resist incorporation into a broader pluralist or syncretic Indic model.

MDES GU4654 Gender, Power and Culture in Early Modern India. 4 points.
Explores gender, culture, power in India, c. 1500-1800 by reading theoretical works on gender and sexuality, historical scholarship relevant to early modern India, and a variety of primary sources. Topics include morality, mysticism, devotion, desire, kingship, heroism, homosocial relations, and homoerotic practices. The focus is largely on Persianate contexts, in conversation with broader South Asian and Islamic studies. This discussion seminar is designed for graduate and advanced undergraduate students, with some previous background in South Asian, Islamic, or gender studies.

MDES UN2000 Ethnicity, Race, Identity in the Pre-Modern Middle East.  4 points.
This seminar investigates the concepts of ethnicity, race, and identity, in both theory and practice,
through a comparative survey of several case studies from the Pre-Modern history of the Middle East.
The course focuses on symbols of identity and difference, interpreting them through a variety of
analytical tools, and evaluating the utility of each as part of an ongoing exploration of the subject. The
survey considers theories of ethnicity and race, as well as their critics, and includes cases from the
Ancient World (c. 1000 BCE) through the Old Regime (c. 1800 CE). Students in this course will gain a familiarity with major theories of social difference and alterity, and
utilize them to interpret and analyze controversial debates about social politics and identity from the
history of the Middle East, including ancient ethnicity, historical racism, Arab identity, pluralism in the
Islamic Empire, and slavery, among others. In addition, students will spend much of the semester
developing a specialized case study of their own on a historical community of interest. All of the case
studies will be presented in a showcase at the end of the semester.

All assigned readings for the course will be in English. Primary sources will be provided in translation.
The course meets once a week and sessions are two hours long.

MDES UN3000 Theory and Culture. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement, Discussion Section Required

Required of all majors. Introduces theories of culture particularly related to the Middle East, South Asia, and Africa. Theoretical debates on the nature and function of culture as a symbolic reading of human collectivities. Examines critical cultural studies of the Middle East, South Asia, and Africa. Enables students to articulate their emerging knowledge of Middle East, South Asian, and African cultures in a theoretically informed language.

MDES UN3003 Babylon-Baghdad: An Urban History. 4 points.
This seminar investigates the metropolitan site of Babylon-Baghdad as the focal center and built environment at the center of 4000 years of social history. Through a consideration of the historical and archaeological sources available, the course proceeds chronologically and surveys the urban history of the site from its ancient origins, c. 2000 BCE, all the way to the present day. The survey explores how the communities residing in the city shaped, and were shaped by, the city.

Students in this course will gain a familiarity with the major periods of Middle Eastern History — Ancient, Islamic, and Modern — and a detailed awareness of the metropolitan region of Babylon-Baghdad. In addition to the historical survey and engagement with primary sources and theoretical works, students will develop a research paper on a specialized topic of interest associated with the city. This investigation requires a synthesis of the ideas discussed in class, and presents an opportunity to investigate a specific feature or characteristic of the city in detail.

All assigned readings for the course will be in English. Primary sources will be provided in translation.

The course assumes that you have taken at least one introductory course on either the Ancient Near East or the Islamic Middle East to use as a foundation for further development. Students without a background in the Middle East may take the course if they are willing to do a little preparatory reading.

The course meets once a week and sessions are two hours long.

MDES UN3046 The Intersectional Politics of Religion. 3 points.
The Islamic veil controversy in France, the Rohingya crisis in Myanmar, the Kashmir lockdown, the lynching of Dalits in India — all seem to be connected through the ideas of ‘religion’, and certain religious identities as the basis for violence. What is the understanding of the religious that seems to be the operative factor in these events? Is it a singular concept of religion or are there different connotations of this category? For instance, how do we understand religion when it bifurcates the women’s movement between Western ‘secular’ women and non-Western ‘Muslim’ women? Is it the same concept when we identify ‘religion’ as the basis for the harmonious coexistence of Hindus and Muslims among certain non-elite communities in India? In this course, we ask if it even possible to understand, ‘religious’ events in the modern political world, without asking what other categories implicitly inform our notion of the religious — such as, gender, caste, culture, race and historiography. We move beyond the strict dichotomy, of religion and secularism, as something given and unproblematic. Drawing from examples and events in modern South Asia as well as other postcolonial contexts, we attempt to respond to the concepts, contradictions, and dilemmas that accompany the question of when and how the religious becomes the political in the modern world.

Our weekly sessions will be devoted to reading texts from various disciplines and analyzing how the main argument is formulated and how that relates to a critique of the concept of religion in modern South Asia. Some weeks the scholarly texts will be supplemented by primary texts/case studies that will serve as direct demonstration of the problems that will be explored in the course. The engagement with sources from various disciplines will expose us to interdisciplinary content as well as diverse methods of critical analysis and argumentation. It will also help acquire the practice of identifying the central argument of the text, understand how the broad argument is actually formulated through smaller steps, and achieve the analytic skill to critically locate that single argument within a larger body of scholarship.

MDES UN3920 Contemporary Culture in the Modern Arab World. 3 points.
Prerequisites: the instructor’s permission.
This seminar, designed for seniors, aims to acquaint students with the notion and theoretical understanding of culture and to introduce them to a critical method by which they can study and appreciate contemporary culture in the Arab World. The seminar will survey examples of written and cinematic culture (fiction and autobiography), as well as music, dance, and literary criticism in the contemporary Arab world. Students will be reading novels, autobiographies and literary criticism, as well as watch films and listen to music as part of the syllabus. All material will be in translation. Films will be subtitled. Songs will be in Arabic.
MDES UN3923 Central Questions in Islamic Law. 3 points.
Through detailed discussions of certain landmarks in Islamic legal history (e.g., origins; early formation; sources of law; intellectual make-up; the workings of court; legal change; women in the law; legal effects of colonialism; modernity and legal reform, etc.), the course aims at providing an introductory but integrated view of Islamic law, a definition, so to speak, of what it was/is. Please note, this course must be taken for a letter grade.

HIST 3930 The Eastern Mediterranean in the Late Bronze Age. 4 points.
This course presents a comparative study of the histories of Egypt, the Near East, Anatolia and the Aegean world in the period from c. 1500-1100 BC, when several of the states provide a rich set of textual and archaeological data. It will focus on the region as a system with numerous participants whose histories will be studied in an international context. The course is a seminar: students are asked to investigate a topic (e.g., diplomacy, kingship, aspects of the economy, etc.) in several of the states involved and present their research in class and as a paper.

MDES UN3960 MESAAS Honors Thesis Seminar. 4 points.
Open to seniors who have declared MESAAS as their major only.
Prerequisites: minimum GPA of 3.5 in MESAAS courses. The MESAAS honors seminar offers students the opportunity to undertake a sustained research project under close faculty supervision. The DUS advises on general issues of project design, format, approach, general research methodologies, and timetable. In addition, students work with an individual advisor who has expertise in the area of the thesis and can advise on the specifics of method and content. The thesis will be jointly evaluated by the adviser, the DUS, and the honors thesis TA. The DUS will lead students through a variety of exercises that are directly geared to facilitating the thesis. Students build their research, interpretive, and writing skills; discuss methodological approaches; write an annotated bibliography; learn to give constructive feedback to peers and respond to feedback effectively. The final product is a polished research paper in the range of 40-60 pages. Please note: This is a one-year course that begins in the fall semester (1 point) and continues through the spring semester (3 points). Only students who have completed both semesters will receive the full 4 points of credit.
Prerequisites: **NOTE**: Students must register for a discussion section. ASCM UN1366

ASCE UN1365 Introduction to East Asian Civilizations: Tibet. **4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course seeks to introduce the sweep of Tibetan civilization and its history from its earliest recorded origins to the present. The course examines what civilizational forces shaped Tibet, especially the contributions of Indian Buddhism, sciences and literature, but also Chinese statecraft and sciences. Alongside the chronological history of Tibet, we will explore aspects of social life and culture.

ASCE UN1367 Introduction to East Asian Civilizations: Vietnam. **4 points.**

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Corequisites: ASCE UN1377

This course provides a survey of Vietnamese civilization from prehistoric origins to the French colonization in the 19th century, with special emphasis on the rise and development of independent kingship over the 2nd millennium CE. We begin by exploring ethnolinguistic diversity of the Red River plain over the first millennium BCE, culminating in the material bronze culture known as the Dong Son. We then turn towards the introduction of high sinic culture, and the region’s long membership within successive Chinese empires. We pay special attention to the rise of an independent state out of the crumbling Tang Dynasty, and the specific nation-building effects of war with the Mongols and the Ming Dynasty, in the 14th and 15th centuries respectively. Our class ends with the French colonization of the region, and the dramatic cultural and intellectual transformations that were triggered as a result. Our course will interrogate Vietnamese culture as a protean object, one that is defined and redefined at virtually every level, throughout a history marked by foreign interest, influence, and invasion.

AHUM UN2901 Masterpieces of Indian Art and Architecture. 4 points. CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Introduction to 2000 years of art on the Indian subcontinent. The course covers the early art of Buddhism, rock-cut architecture of the Buddhists and Hindus, the development of the Hindu temple, Mughal and Rajput painting and architecture, art of the colonial period, and the emergence of the Modern.

AHIS UN3611 Korean Art in the Age of Global Encounters. 4 points.

This seminar explores the artistic developments in Korea with a focus on its encounter with the arts of China, Japan, and Europe from the fifteenth century to the present. Each class examines case studies of the works of a particular artist—to examine the way in which Korean artists developed their distinctive style and established the aesthetic values in response to specific historical junctures. There will be two field trips to the Metropolitan Museum of Art and the Brooklyn Museum.

AHUM 1399 Colloquium on Major Texts: East Asia. 4 points.

Readings in translation and discussion of texts of Middle Eastern and Indian origin. Readings may include the Qur’an, Islamic philosophy, Sufi poetry, the Upanishads, Buddhist sutras, the Bhagavad Gita, Indian epics and drama, and Gandhi’s Autobiography.

AHUM UN1400 Colloquium on Major Texts: East Asia. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores the core classical literature in Chinese, Japanese and Korean Humanities. The main objective of the course is to discover the meanings that these literature offer, not just for the original audience or for the respective cultures, but for us. As such, it is not a survey or a lecture-based course. Rather than being taught what meanings are to be derived from the texts, we explore meanings together, informed by in-depth reading and thorough ongoing discussion.

AHUM UN2604 Art In China, Japan, and Korea. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Asian Music Humanities

MUSI UN3343 Shades of Brown: Music in the South Asian Diaspora. 3 points.
This course explores the musical world of the South Asian diaspora in Europe and North America. We will read ethnomusicological accounts of diasporic musics and experiences and develop methods for analysis and interpretation of such accounts, situating the songs of the South Asian diaspora within its broader social history. We will address the concepts of belonging and identity, nostalgia and affect, and the dismantling or upholding of dominant discourses such as gender, race, and caste. Our focus will be on the last half century, although deeper histories will need to be considered. Students will learn to analyze instrumentation and lyrics in various genres and traditions of South Asian music, including both art, folkloric, and popular idioms, and to correlate these with aspects of the social context of diaspora. While the specific focus of the course is on a particular diasporic history, the class will help students understand and think critically about the broader phenomenon of “diaspora” and its cultural dimensions, and through this to engage critically with important aspects of cultural globalization and migration.

Students from all departments are welcome. Reading music not required.

African History

MDES UN2030 Major Debates in the Study of Africa. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course will focus on key debates that have shaped the study of Africa in the post-colonial African academy. We will cover seven key debates: (1) Historiography; (2) Slavery and slave trades; (3) State Formation; (4) Colonialism; (5) Underdevelopment; (6) Nationalism and the anti-colonial struggle; (7) Political Identity and political violence in the post-colony. Partial Fulfillment of Global Core Requirement.

HIST UN2772 West African History. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course offers a survey of main themes in West African history over the last millennium, with particular emphasis on the period from the mid-15th through the 20th century. Themes include the age of West African empires (Ghana, Mali, Songhay); re-alignments of economic and political energies towards the Atlantic coast; the rise and decline of the trans-Atlantic trade in slaves; the advent and demise of colonial rule; and internal displacement, migrations, and revolutions. In the latter part of the course, we will appraise the continuities and ruptures of the colonial and post-colonial eras. Group(s): C Field(s): AFR

Athena Center for Leadership Studies

Milstien Center, 4th Floor

athenacenter.barnard.edu (https://athenacenter.barnard.edu/)
Umbreen Bhatti ’00, Constance Hess Williams ’66 Director
Sarit Abramowicz, Administrative Director, Student Programs
Erika Guzman, Student Programs Administrator

Mission
The Athena Center for Leadership Studies was created to explore how women lead and how gender affects leadership styles and strategies.
Its interdisciplinary, innovative undergraduate program, the Athena Scholars Program, combines rigorous academic and experiential study which help students prepare to assume positions of leadership at the highest levels of achievement.

Athena Scholars Program

Barnard students of any major may participate in the Athena Scholars Program; the declaration of intent must be filed by the Fall of sophomore year. Participation in the Athena program does not constitute a major. Rather, completion of the program is typically done in conjunction with the College's general educational and the student's major requirements. Students who complete the program receive recognition on their transcripts indicating their standing as an Athena Leadership Scholar. Special opportunities, including fellowships and mentoring, are available to Athena Scholars.

Student Developmental Goals

The Athena Scholars Program aspires to develop leaders who are:

- Visionary
- Courageous and resilient
- Bold and innovative
- Globally aware and culturally sensitive
- Determined to make the world a better place

Athena leaders embrace diversity and encourage other women to lead.

Student Learning Outcomes

Athena Scholars Program participants will develop and enhance the above developmental goals through the following learning objectives:

- Identify and communicate the importance of women's leadership to an increasingly global, diverse and interconnected world.
- Think and write critically about gendered institutions, theories, and strategies, and how they affect leadership.
- Integrate theoretical frameworks on women and leadership with skills learned in the Athena Leadership Lab while completing an internship.
- Interpret the historical, social, economic and cultural influences that have shaped, and continue to shape, women's advancement, including (but not limited to) politics, family, business, and social reform.
- Apply concepts or methods from more than one social science, humanities, or adjacent discipline to analyze gendered leadership styles and strategies.
- Communicate ideas effectively in writing and oral presentations.
- Design, execute and present a social action project.

Adjunct Lecturers: Skye Cleary; Sylvie Honig

Faculty Advisory Committee: Belinda Archibong (Economics), Alexander Cooley (Political Science), Alan Dye (Economics), Margaret Ellsberg (English), Ross Hamilton (English and Film Studies), Brian Mailoux (Environmental Science), Robert McCaughey (History), Debra Minkoff (Sociology), Rae Silver (Natural and Physical Sciences), Joan Snitzer (Art History and Visual Art), David Weiman (Economics), and Page West (Anthropology)

Requirements

1. **Women and Leadership Course (ACLS BC3450 Women and Leadership)**: Students ideally take this class their sophomore or junior year.
2. **Athena Senior Leadership Seminar (ACLS BC3997 Interdisciplinary Senior Seminar/ACLS BC3998 Interdisciplinary Senior Seminar)**: Student can take this course either the Fall or Spring semester of their senior year; a main component of this class is the completion of a social action project which demonstrates leadership skills in an off-campus setting.
3. **Three Electives Courses**: Students choose three elective courses from Athena’s multi-disciplinary course offerings. Electives expose students to the interdisciplinary nature of leadership, the history and culture of women and leadership within society and organizations, and leadership skills. Elective courses may also be counted as credit toward one’s major. The complete listing of approved courses is below.
   - Please note: To fulfill one elective requirement, students may identify another course that fulfills the outlined learning objectives and petition the Director of Student Programs for approval using the appropriate Special Dispensation Form. Approval can be obtained before or after the course is taken. There is no guarantee the course will be approved in either case.
4. **Practicum**: Students must partake in an approved practicum during the school year or summer. A student’s practicum should relate to their post-undergraduate goals, including academic research for a professor, supervised laboratory work, and/or an internship. Practicums in all fields are welcome, and should uphold the leadership developmental goals of the Athena Center. Students submit a written reflection in the Senior Leadership Seminar.
5. **Athena Leadership Lab Workshops**: Students must complete six workshops of their choosing. (Please note: Students who joined the Scholars program prior to Fall 2017 only need to complete 3 workshops.) For workshop selection, see Athena Leadership Lab (http://athenacenter.barnard.edu/leadership-lab/course-catalog/).

Africana Studies (Barnard)

AFRS BC3055 Slave Resistance in the United States from the Colonial Era to the Civil War. 3 points.
Not offered during 2019-20 academic year.

Analyzes the multifaceted nature of slave resistance, its portrayal and theorization by scholars. Critically examines the various pathways of resistance of enslaved Africans and African-Americans, both individually and collectively (e.g., running away, non-cooperation, theft, arson, as well as verbal and physical confrontation, revolts and insurrections). Considers how gender shaped acts of resistance.

AFRS BC3121 Black Women in America. 4 points.

Prerequisites: Students must attend first day of class and admission will be decided then. Priority will be given to CCIS students (Africana Studies, American Studies and Women's Studies majors; minors in Race and Ethnic Studies). Enrollment limited to 20 students. Examines the roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as WMST BC3121.

AFRS BC3134 Unheard Voices: African Women's Literature. 4 points.
How does one talk of women in Africa without thinking of Africa as a 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the African Diaspora.

Committee on Global Thought

CGTH UN3401 Seminar in Global Thought: Inquiries into an Interconnected World. 4 points.
This course on global thought will consider the ways in which we think about, debate, and give meaning to the interconnected world in which we live. In thematically focused collaborative teams, students will examine how the flows of people, things, and ideas across national borders both connect our world and create uneven consequences within and among communities. We will locate ourselves in these processes, suggesting we need go no further than our closets, tables, and street corners to consider the meanings of globalization and our roles in the world today. This course has been approved to partially satisfy the Global Core requirement.

CGTH UN3402 Topics in Global Thought: Global 20—Youth in an Interconnected World. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
What does it mean to be 20 years old in our rapidly changing, interconnected world? There are more youth (aged 15-25) in the world today than at any other time in history, with the majority living in the developing world. They approach adulthood as the world confronts seismic shifts in the geopolitical order, in the nature and future of work, and in the ways we connect with each other, express identity, engage politically, and create communities of meaning. What unique challenges and opportunities confront young people after decades of neoliberal globalization? What issues are most pressing in developing nations experiencing a "youth bulge" and how do they compare to developed nations with rapidly aging populations? How do young people envision their futures and the future of the world they are inheriting? This course will examine recent scholarship while engaging the young people in the class to define the agenda and questions of the course, and to conduct their own research. This course is part of the Global Core curriculum.

"Global 20" complements a new research project of the Committee on Global Thought, "Youth in a Changing World," which investigates from the perspective of diverse participants and of young people themselves, the most pressing issues confronting young people in the changing world today. The course will serve as an undergraduate "lab" for the project, and among other involvements, students in the course will help conceive, plan, and take part in a NYC-wide "Youth Think-In" sponsored by the CGT during the Spring 2018 semester. Within the course, students will become "regional experts" and examine the primary themes of the class through the prism of specific areas or nations of their choosing. A final class project includes a "design session" that will consider how universities might better train and empower youth to confront the challenges and embrace the opportunities of our interconnected world of the 21st century.

Computer Science

COMS W1007 Honors Introduction to Computer Science. 3 points.
Lect: 3.
Prerequisites: AP Computer Science with a grade of 4 or 5 or similar experience.
An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.

COMS W3410 Computers and Society. 3 points.

ENGL BC3105 Fiction and Personal Narrative. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses (https://english.barnard.edu/english/creative-writing-courses/).

Section 1: In this workshop you will read and write across genre works of formally inventive and exciting contemporary prose, developing an innovative vocabulary to discuss writing. We will think of writing as process, from weekly exercises to longer pieces that will be workshopped twice a semester.

Section 2 (priority Barnard first-year students; transfer and returning students will be accommodated if there is room in the course): This class centers on the appreciation, analysis, and practice of short literary fiction, including personal narrative. In addition to weekly writing exercises, twice a semester each student will make available to the entire class longer pieces for "workshopping." These pieces will receive written evaluations from instructor and peers both. We will also read and study narrative by published authors – historical and contemporary. In both student-generated and published work we will consider elements of prose narrative from structure to characterization, plot to voice, etc., in the hopes that such consideration will encourage student writers to expand their writerly repertoire and improve their work in terms of both craft and literary substance.

ENGL BC3121 Public Speaking. 3 points.
Prerequisites: Enrollment limited to 14 students. Open only to undergraduates, preference to seniors and juniors. Attend first class for instructor permission. Registering for the course only through myBarnard or SSOL will NOT ensure your enrollment.
This course will introduce you to principles of effective public speaking and debate, and provide practical opportunities to use these principles in structured speaking situations. You will craft and deliver speeches, engage in debates and panel discussions, analyze historical and contemporary speakers, and reflect on your own speeches and those of your classmates. You will explore and practice different rhetorical strategies with an emphasis on information, persuasion and argumentation. For each speaking assignment, you will go through the speech-making process, from audience analysis, purpose and organization, to considerations of style and delivery. The key criteria in this course are content, organization, and adaptation to the audience and purpose. While this is primarily a performance course, you will be expected to participate extensively as a listener and critic, as well as a speaker.

ENGL BC3123 Rhetorical Choices: the Theory and Practice of Public Speaking. 4 points.
Prerequisites: Application process and permission of instructor. Enrollment restricted to Barnard students. Speaking involves a series of rhetorical choices regarding vocal presentation, argument construction, and physical affect that, whether
made consciously or by default, project information about the identity of the speaker. In this course students will relate theory to practice: to learn principles of public speaking and speech criticism for the purpose of applying these principles as peer tutors in the Speaking Fellow Program. Note: This course now counts as an elective for the English major.

ENGL BC3196 Home to Harlem: Literature of the Harlem Renaissance. 4 points.

In the spring of 2020, Home to Harlem will focus on Harlem as a crossroads, diasporic and transnational black mecca. Exploring the cultural contexts and aesthetic debates that animated Harlem in 1920s to 1930s, the course discusses the politics of literary and performative cultural production while exploring the fashioning of New Negro identity through fiction, poetry, essays, artwork and music. Topics considered include: role of Africa/slavery/the south in New Negro expression, patronage, passing, primitivism/popular culture, black dialect as literary language, and the problematics of creating a “racial” art in/for a diverse community comprised of differences in gender, class, sexuality, and geographical origin.

This course will partner with AfroSwedish hip-hop artist, writer, and activist Jason "Timbuktu" Diakité and Harlem Stage. Born to interracial American parents in Sweden (his father hails from Harlem), Diakité grew up between worlds, riding a delicate cultural and racial divide. His search to unify a complex system of family roots has taken him across continents, ethnicities, classes, colors, and eras to find a sense of belonging. In spring of 2020, he comes Home to Harlem when he performs a new stage version of his memoir, A Drop Of Midnight, at Harlem Stage.

Exploration of the impact of women in theatre history—with special emphasis on American theatre history—including how dramatic texts and theatre practice have reflected the ever-changing roles of women in society. Playwrights include Glaspell, Crothers, Grimke, Hellman, Finley, Hughes, Deavere Smith, and Vogel.

ENTH BC3144 Black Theatre. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 16 students. Exploration of Black Theater, specifically African-American performance traditions, as an intervening agent in racial, cultural, and national identity. African-American theatre artists to be examined include Amiri Baraka, Kia Corthron, W.E.B. Du Bois, Angelina Grimke, Langston Hughes, Georgia Douglas Johnson, Adrienne Kennedy, Suzan-Lori Parks, Adrian Piper, and August Wilson. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

Environmental Science

EESC BC3019 Energy Resources. 3 points.

Energy Resources utilizes the physical plant of Barnard and Columbia to involve students in a semester long real-life policy study that explores the interconnections between energy resources and sustainable energy efficiency. Students work collaboratively as a team and interface with college faculty, administration, staff and student organizations to produce and disseminate a professional level policy report describing existing usage of energy, analyzing where change is needed.

EESC BC3300 Workshop in Sustainable Development. 4 points.

Students address real-world issues in sustainable development by working in groups for an external client agency. Instruction in communication, collaboration, and management; meetings with and presentations to clients and academic community. Projects vary from year to year. Readings in the course are project-specific and are identified by the student research teams.

**FILM BC3702 Women Filmmakers. 4 points.**

Traditional film history has consigned a multitude of cinema practices to an inferior position. By accepting Hollywood’s narrative model as central, film scholars have often relegated non-male, non-white, non-Western films to a secondary role. Often described as “marginal” or “peripheral” cinemas, the outcomes of these film practices have been systematically excluded from the canon. Yet...are these motion pictures really “secondary”? In relation to what? And according to whom? This course looks at major films by women filmmakers of the 20th Century within a tradition of political cinema that 1) directly confronts the hegemonic masculinity of the Hollywood film industry, and 2) relocates the so-called “alternative women’s cinema” at the core of film history. Unlike conventional feminist film courses, which tend to be contemporary and anglocentric, this class adopts a historical and worldwide perspective; rather than focusing on female directors working in America today, we trace the origins of women's cinema in different cities of the world (Berlin, Paris, New York) during the silent period, and, from there, we move forward to study major works by international radical directors such as Lorenza Mazzetti, Agnès Varda, Forough Farrokhzad, Věra Chytilová, Chantal Akerman, Liliana Cavani, Barbara Kopple, Larisa Shepitko, and Mira Nair. We analyse how these filmmakers have explored womanhood not only as a source of oppression (critique of patriarchal phallocentrism, challenge to heteronormativity, etc) but, most importantly, as a source of empowerment (defense of matriarchy, equal rights, lesbian love, inter- and transexuality...). Required readings include seminal texts of feminist film theory by Claire Johnston, Laura Mulvey, Ann Kaplan, bell hooks, and Judith Butler. Among the films screened in the classroom are: silent movies – “Suspense” (Lois Weber, 1913), “The Smiling Madame Beudet” (Germaine Dulac, 1922)—, early independent and experimental cinema – “Girls in Uniform” (Leontine Sagan, 1931), “Ritual in Transfigured Time” (Maya Deren, 1946)—, “new wave” films of the 1950s and 1960s – “Together” (Mazzetti, 1956), “Cleò from 5 to 7” (Varda, 1962), “Daisies” (Chytilová, 1966)—, auteur cinema of the 1970s – “Jeanne Dielman” (Akerman, 1975), “The Ascent” (Shepitko, 1977)—, and documentary films – “Harlan County, USA” (Kopple, 1976), “Paris Is Burning” (Jennie Livingston, 1990).

**History (Barnard)**

**HIST BC2500 Poverty, Race, and Gender. 3 points.**

This course will begin with a theoretical overview of the relationship between race, gender and poverty. We will look at definitions and sources of economic inequality, emerging discourses of poverty in the early 20th century, and changing perceptions of “the poor” over the course of American history. We will examine race and gender segmentation in the labor market, racial and gender conflict in the union movement, ideological foundations of the welfare state, cultural constructions of single motherhood, political debates about the “underclass,” as well as contemporary campaigns to alleviate poverty. Our goal is to think critically about discourses of poverty and welfare as well as antipoverty, labor and feminist organizing.

**HIST BC2567 Women, Gender and Sexuality in the 20th Century U.S.. 3 points.**

Using an intersectional framework, this course traces changing notions of gender and sexuality in the 20th century United States. The course examines how womanhood and feminism were shaped by class, race, ethnicity, culture, sexuality and immigration status. We will explore how the construction of American nationalism and imperialism, as well as the development of citizenship rights, social policy, and labor organizing, were deeply influenced by the politics of gender. Special emphasis will be placed on organizing and women’s activism.

**HIST BC2803 Gender and Empire. 3 points.**

**Not offered during 2019-20 academic year.**

Examines how women experienced empire and asks how their actions and activities produced critical shifts in the workings of colonial societies worldwide. Topics include sexuality, the colonial family, reproduction, race, and political activism.

**HIST BC2865 Gender and Power in China. 3 points.**

This course explores the power dynamics of gender relations in Chinese history and contemporary society. Specifically, we seek to understand how a range of women--rulers, mothers, teachers, workers, prostitutes, and activists--exercised power by utilizing available resources to overcome institutional constraints.
HIST BC3323 The City in Europe. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preference to upper-class students. Preregistration required.
A social history of the city in Europe from early modern times; the economic, political, and intellectual forces influencing the growth of Paris, London, Vienna, and other urban centers.

HIST BC3491 Making Barnard History: The Research Process. 4 points.
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.
Introduction to historical research through a range of the historical sources and methods available for a comprehensive history of Barnard College. Will include a review of the secondary literature, the compiling and analysis of qualitative and quantitative data through archival research, the conduct of an oral history interview, and the construction of a historical narrative.

HIST BC3549 A History of Violence: Bloodshed and Power in Early America. 4 points.
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.
Coercion, war, rape, murder, and riots are common in American History from the European invasion to the Civil War. How did violent acts transform early American societies? Readings are a mix of primary sources and scholarship. First and second year students are welcome with permission.

HIST BC3780 Gender and Migration: A Global Perspective. 4 points.
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Sophomore Standing.
Explores migration as a gendered process and what factors account for migratory differences by gender across place and time; including labor markets, education demographic and family structure, gender ideologies, religion, government regulations and legal status, and intrinsic aspects of the migratory flow itself.

HIST BC3879 Feminist Traditions in China. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of the instructor. Background in Women’s Studies and/or Chinese Studies helpful, but not necessary. Sophomore standing. Enrollment limited to 15. Preregistration required.
Explores the intellectual, social and cultural grounds for the establishment and transmission of feminist traditions in China before the 19th century. Topics include pre-modern Chinese views of the body, self, gender, and sex, among others. Our goal is to rethink such cherished concepts as voice, agency, freedom, and choice that have shaped the modern feminist movement.

HIST BC3901 Reacting to the Past II. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of the instructor. Enrollment limited to 20. Preregistration required. Reacting I, a First-Year seminar, is recommended.
Collision of ideas in two of the following three contexts: "Rousseau, Burke and Revolution in France, 1791;" "The Struggle for Palestine: The British, Zionists, and Palestinians in the 1930s," or "India on the Eve of Independence, 1945".

HIST BC3999 Transnational Feminism. 4 points.
Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.
Examines the theory and practice of transnational feminist activism. We will explore the ways in which race, class, culture and nationality facilitate alliances among women, reproduce hierarchical power relations, and help reconstruct gender. The course covers a number of topics: the African Diaspora, suffrage, labor, development policy, colonialism, trafficking, consumerism, Islam, and the criminal justice system.

HIST GU4217 Women as Cold War Weapons . 4 points.
Cold War ideological campaigns for the "hearts and minds" abutted "hot war" confrontations between 1945 and 1991, and women engaged with both. This course has three purposes: (i) to examine the role of women in the United States as a reflection and enactment of Cold War politics; (ii) to provide an understanding of cultural forces in building ideas in foreign markets; (iii) to reframe the understanding of power as a strategy of United States Cold War battles. To this end, the class will open with a history and examination of women and the traditional narratives of the nation at "wars," and then continue to explore the political power of women, cultural diplomacy, military operations, and conclude with two case studies. This seminar examines the history of government and private sector mechanisms used to export national ideals by and about women in order to enact American foreign policy agendas in the Cold War. To build their knowledge, students will be asked to parse primary materials in the context of secondary readings. They will do class presentations and present at a conference, and will have the opportunity to discuss their interests with leading scholars of the Cold War. The requirements include significant weekly readings, postings, attendance at discussions, a class presentation, and participation in the class conference at the conclusion of the semester.

HIST UN2523 History of Health Inequality in the Modern United States. 4 points.
Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics since the turn of the
human rights law and institutions; their application with attention to universality within states, including the U.S., and internationally.

## Music

**MUSI BC3139 Introduction to Vocal Repertoire: Technique in Singing and Performance. 3 points.**

This course is designed for developing singers. Group vocalizing, learning of songs and individual workshop performances are aimed at improving the student’s technical skill and the elements necessary to create a meaningful musical and dramatic experience. Attention to text, subtext, emotional and psychological aspects of a piece and the performer’s relationship to the audience are included in the work. Repertoire is predominantly in English and comes from both classical and popular traditions. Individual coaching sessions are available with the class accompanist and help strengthen the students’ confidence and skill. The class culminates with an in-class performance.

**History-East Asian**

**HSEA W4888 Woman and Gender in Korean History. 4 points.**

While the rise of women’s history and feminist theory in the 1960s and 1970s fostered more general reevaluations of social and cultural history in the West, such progressions have been far more modest in Korean history. To introduce one of the larger challenges in current Korean historiography, this course explores the experiences, consciousness and representations of women Korea at home and abroad from premodern times to the present. Historical studies of women and gender in Korea will be analyzed in conjunction with theories of Western women’s history to encourage new methods of reframing “patriarchy” within the Korean context. By tracing the lives of women from various socio-cultural aspects and examining the multiple interactions between the state, local community, family and individual, women’s places in the family and in society, their relationships with one another and men, and the evolution of ideas about gender and sexuality throughout Korea’s complicated past will be reexamined through concrete topics with historical specificity and as many primary sources as possible. With understanding dynamics of women’s lives in Korean society, this class will build an important bridge to understand the construction of New Women in early twentieth-century Korea, when women from all walks of life had to accommodate their “old-style” predecessors and transform themselves to new women, as well as the lives of contemporary Korean women. This will be very much a reading-and-discussion course. Lectures will review the readings in historical perspective and supplement them. The period to be studied ranges from the pre-modern time up to the turn of twentieth century, with special attention to the early modern period.

## Human Rights Studies

Political Science (Barnard)
POLS BC3200 American Political Development, 1789-1980. 3 points.

Prerequisites: V 1201 or equivalent intro course in American Politics. American Political Development (APD) is an emerging subfield within American Politics that focuses on the ways that political culture, ideology, governing structures (executives, legislatures, judiciaries, and subnational governments) and structures of political linkage (political parties and organized interests) shape the development of political conflict and public policy. Rejecting the fragmentation of the field of American Politics into narrow specialties, it links government, politics, policy, culture, and economics in a broad-gauged search for understanding. (Cross-listed by the American Studies Program.)

POLS BC3254 First Amendment Values. 3 points.
Prerequisites: POLS W1201 or an equivalent. Not an introductory course. Not open to students who have taken the colloquium POLS BC3302.
Examines the first amendment rights of speech, press, religion and assembly. In-depth analysis of landmark Supreme Court rulings provides the basis for exploring theoretical antecedents as well as contemporary applications of such doctrines as freedom of association, libel, symbolic speech, obscenity, hate speech, political speech, commercial speech, freedom of the press and religion. (Cross-listed by the American Studies Program.)
POLS BC3402 The Comparative Politics of Gender Inequality. 3 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Prerequisites: Not an introductory-level course. Not open to students who have taken the colloquium POLS BC 3507. Enrollment limited to 20 students; L-course sign-up through eBear (http://ebear.barnard.edu/). Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).

Uses major analytical perspectives in comparative politics to understand the persistence of gender inequality in advanced industrial states. Topics include: political representation and participation; political economy and capitalism; the historical development of welfare states; electoral systems, electoral quotas; the role of supranational and international organizations; and social policy.

POLS BC3410 *Colloquium on Human Rights in a Diverse World. 4 points.

Prerequisites: Not open to students who have taken or are currently taking POLS UN3002. Prerequisites: POLS V1013 or HRTS UN3001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.

Examination of human rights within the context of international migration. The course covers topics such as citizenship, state sovereignty, border control, asylum-seekers, refugees, and undocumented immigrants. (Cross-listed by the Human Rights Program.)

POLS BC3445 Colloquium on Gender and Public Policy. 4 points.

In this course, we will examine how notions of sex and gender have shaped public policies, and how public policies have affected the social, economic, and political citizenship of men and women in the United States over time.

POLS BC3507 *Colloquium on Gender, Politics, and Markets. 4 points.

Prerequisites: POLS V1501 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).

Considers why men more than women control political and economic resources in advanced industrial states of the world. Examines how labor markets, welfare states, and political institutions have a different impact on women than men. Evaluates attempts at increasing gender equality in political representation, labor market participation, and household work. *Please note, students who have already taken BC 3402 The Comparative Politics of Gender Inequality may not register for this colloquium.* (Cross-listed by the Womens Studies Program.)

POLS BC3521 Civil Rights and Civil Liberties. 3 points.

Prerequisites: POLS W1201 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Not an introductory-level course. Not open to students who have taken the colloquium POLS BC3226. Enrollment limited to 25 students; L-course sign-up through eBear (http://ebear.barnard.edu/). Barnard syllabus (http://polisci.barnard.edu/syllabi/#ap).

Explores seminal caselaw to inform contemporary civil rights and civil liberties jurisprudence and policy. Specifically, the readings examine historical and contemporary first amendment values, including freedom of speech and the press, economic liberties, takings law, discrimination based on race, gender, class and sexual preference, affirmative action, the right to privacy, reproductive freedom, the right to die, criminal procedure and adjudication, the rights of the criminally accused post-9/11 and the death penalty. (Cross-listed by the American Studies and Human Rights Programs.)

Sociology (Barnard)
SOCI BC3903 Work and Culture. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Preference for Barnard Leadership Initiative participants, Juniors and Seniors. Permission of the instructor. Sociological approaches to understanding work and culture. Theoretical underpinnings of workplace interactions, with attention to ethnographies of work across a range of organizations. Externally examines changes in work due to technological advances and globalization. Special emphasis on gender.

SOCI BC3907 Communities and Social Change. 4 points.
Examines how changes in the economy, racial composition, and class relations affect community life-how it is created, changed and sometimes lost-with a specific focus on the local urban context. Student research projects will address how contemporary forces such as neoliberalization, gentrification and tourism impact a community’s social fabric.

SOCI BC3909 Ethnic Conflict and Unrest. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Sophomore Standing. SOCI BC1003 or permission of the instructor. Enrollment limited to 20 students. Post-1965 immigration in the U.S. has prompted conflicts between new immigrant groups and established racial and ethnic groups. This seminar explores ethnic conflict and unrest that takes place in the streets, workplace, and everyday social life. Focus is on sociological theories that explain the tensions associated with the arrival of new immigrants.

SOCI BC3913 Inequalities: Race, Class, Gender and Sexuality in U.S. Law and Society. 4 points.
This class will examine the historical roots and ongoing persistence of social, economic, and political inequality and the continuing role that it plays in U.S. society by examining how such issues have been addressed both in social science and in law.

SOCI BC3935 Gender and Organizations. 4 points.
This course examines the sociological features of organizations through a gender lens. We will analyze how gender, race, class, and sexuality matter for individuals and groups within a variety of organizational contexts. The course is grounded in the sociological literatures on gender and organizations.
SOCI UN3235 Social Movements. 3 points.
Prerequisites: One introductory course in Sociology suggested. Social movements and the theories social scientists use to explain them, with emphasis on the American civil rights and women’s movements. Topics include theories of participation, the personal and social consequences of social movements, the rationality of protest, the influence of ideology, organization, and the state on movement success, social movements, and the mass media.

SOCI UN3264 The Changing American Family. 3 points.
Worries and debates about the family are in the news daily. But how in fact is “the family” changing? And why? This course will study the family from a sociological perspective with primary emphasis on continuity and change and variation across different historical eras. We’ll examine how the diversity of family life and constellations of intimacy and care are shaped by gender, race, ethnicity, socioeconomic status, and sexuality. Discussion section (required) will engage with readings as well as events in the news/ social media of interest to students.

SOCI V3220 Masculinity: A Sociological View. 3 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).
Not offered during 2019-20 academic year.

Prerequisites: One introductory course in Sociology is suggested. Examines the cultural, political, and institutional forces that govern masculinity. Focuses on various meanings of “being a man” and the effects these different types of masculinity have on both men and women. Explores some of the variation among men and relationships between men and women.

SOCI V3318 The Sociology of Sexuality. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: Introductory course in Sociology is suggested. Social, cultural and organizational aspects of sex in the contemporary United States, stressing the plural in sexualities: sexual revolution and post-Victorian ideologies; the context of gender and inequality; social movements and sexual identity; the variety of sexual meanings and communities; the impact of AIDS.

SOCI V3324 Poverty, Inequality, and Policy: A Sociological Perspective. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Introductory course in Sociology is suggested. Examination of poverty, the “underclass,” and inequality in the United States. Part 1: The moral premises, social theories, and political interests shaping current debates about the poor. Part 2: A more concrete analysis of the lives of the poor and the causes of family breakdown, the drug economy, welfare, employment, and homelessness.

SOCI UN3265 Sociology of Work and Gender. 3 points.
This course examines gender as a flexible but persistent boundary that continues to organize our work lives and our home lives, as well as the relationship between the two spheres. We will explore the ways in which gender affects how work is structured; the relationship between work and home; the household as a place of paid (and unpaid) labor; and how changes in the global economy affect gender and work identities.

SOCI UN3936 Sociology and the Public. 4 points.
Prerequisites: Sociological Imagination (SOCI UN1202) or The Social World (SOCI UN1000) (not required).
This seminar will examine the practice of and—for those interested—allow for some engagement in “public sociology.” Public sociology is defined, accurately, on Wikipedia as “a subfield of the wider sociological discipline that emphasizes expanding the disciplinary boundaries of sociology in order to engage with non-academic audiences”; and as a sometimes controversial “movement” that “aims to revitalize the discipline . . . by leveraging its empirical methods and theoretical insights to contribute to debates not just about what is or what has been in society, but about what society might yet be.”

Spanish
SPAN BC3510 Gender and Sexuality in Latin American Cultures. 3 points.
Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).
Examines constructions of gender and sexuality in Latin American cultures. Through a close analysis of critical, literary, and visual texts, we explore contemporary notions of gender and sexuality, the socio-cultural processes that have historically shaped these, and some theoretical frameworks through which they have been understood.

Theatre
THTR UN2005 Acting Workshop. 3 points.
When offered in Fall semester, open only to first-year students.

Prerequisites: Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester’s stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult “Auditions” on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions.

women scientists, engineers, and physicians, issues of science

education. Feminist critiques of biological research and of the
institution of science.

WMST UN1001 Introduction to Women's and Gender Studies. 3 points.
An interdisciplinary introduction to key concepts and analytical
categories in women's and gender studies. This course grapples with
gender in its complex intersection with other systems of power and
inequality, including: sexuality, race and ethnicity, class and nation.
Topics include: feminism, feminist and queer theory, commodity
culture, violence, science and technology, visual cultures, work, and
family.

WMST UN3915 Gender and Power in Transnational Perspective. 4 points.
Enrollment limited to 15.
Prerequisites: Instructor approval required
Considers formations of gender, sexuality, and power as they circulate
transnationally, as well as transnational feminist movements that
have emerged to address contemporary gendered inequalities. Topics
include political economy, global care chains, sexuality, sex work and
trafficking, feminist politics, and human rights.

If it is a small world after all, how do forces of globalization shape and
redesign both men's and women's positions as as workers and political
subjects? And, if power swirls everywhere, how are transnational
power dynamics reinscribed in gendered bodies? How is the body
represented in discussions of the political economy of globalization?
These questions will frame this course by highlighting how gender and
power coalesce to impact the lives of individuals in various spaces
including workplaces, the home, religious institutions, refugee camps,
the government, and civil society, and human rights organizations. We
will use specific sociological and anthropological case studies, to look
at how various regimes of power operate to constrain individuals as
well as give them new spaces for agency. This course will enable us
to think transnationally, historically, and dynamically, using gender as
a lens through which to critique relations of power and the ways that
power informs our everyday lives and identities.

Women’s Studies (Barnard)
WMST V3312 Theorizing Activism. 4 points.
Prerequisites: Critical Approaches or Feminist Theory or permission of instructor.
Helps students develop and apply useful theoretical models to feminist organizing on local and international levels. It involves reading, presentations, and seminar reports. Students use first-hand knowledge of the practices of specific women's activist organizations for theoretical work.

WMST W4301 Early Jewish Women Immigrant Writers: 1900-1939. 4 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).
Enrollment limited to 15.
Prerequisites: students must attend first day of class and admission will be decided then.
Covers significant pre-Holocaust texts (including Yiddish fiction in translation) by U.S. Ashkenazi women and analyzes the tensions between upholding Jewish identity and the necessity and/or inevitability of integration and assimilation. It also examines women's quests to realize their full potential in Jewish and non-Jewish communities on both sides of the Atlantic.

WMST W4303 Gender, Globalization, and Empire. 4 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).
Prerequisites: Enrollment limited to 20 students.
Study of the role of gender in economic structures and social processes comprising globalization and in political practices of contemporary U.S. empire. This seminar focuses on the ways in which transformations in global political and economic structures over the last few decades including recent political developments in the U.S. have been shaped by gender, race, sexuality, religion and social movements.

WMST W4304 Gender and HIV/AIDS. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of instructor. Enrollment limited to 15 students.
An interdisciplinary exploration of feminist approaches to HIV/AIDS with emphasis on the nexus of science and social justice.

WMST W4307 Sexuality and the Law. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Because this seminar emphasizes weekly discussion and examination of the readings, enrollment is strictly limited to 20 students. Please read and follow the updated instructions: 1) Interested students must write a 50-100 word essay answering the following question: "What background, experience do you bring to the discussion of Sexuality and the Law that will help inform and challenge the other 19 students in the class?"; 2) Include the following: your name, institution you are graduating from, year of graduation, declared major, and whether you are working towards a Women's Studies major or minor; 3) Send your information and essay through email with the subject line "Barnard Sexuality & the Law"; 4) Send your email to Riya Ortiz, WS Department Assistant, at sortiz@barnard.edu no later than Wednesday, September 1, 2010. The final list of students who are registered for the course will be announced on Friday, September 3, 12 pm. Classes start on Monday, September 13. (Note: Students who have registered for the course must also submit the essay to guarantee their registration).
Explores how sexuality is defined and contested in various domains of law (Constitutional, Federal, State), how scientific theories intersect with legal discourse, and takes up considerations of these issues in family law, the military, questions of speech, citizenship rights, and at the workplace.

WMST W4308 Sexuality and Science. 4 points.
Not offered during 2019-20 academic year.
Examines scientific research on human sexuality, from early sexology through contemporary studies of biology and sexual orientation, surveys of sexual behavior, and the development and testing of Viagra. How does such research incorporate, reflect, and reshape cultural ideas about sexuality? How is it useful, and for whom?

WMST W4309 Sex, Gender and Transgender Queries. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Enrollment limited to 20 students.
Sex, sexual identity, and the body are produced in and through time. “Trans” – as an identity, a set of practices, a question, a site, or as a verb of change and connection – is a relatively new term which this course will situate in theory, time, discipline, and through the study of representation.

WMST W4320 Queer Theories and Histories. 4 points.
Enrollment limited to 20. Not offered during 2019-20 academic year.
The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldua, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

The Department of Biology

Biology explores the structure, function, and evolution of diverse living systems. It addresses some of the most important issues of our time—genetic engineering, stem cell research, obesity, cancer, and the effects of global warming. Majoring in Biology prepares students to pursue a career in research, teaching, or the allied health sciences. It is also relevant to careers as diverse as environmental policy, law, public health, creative writing, and textbook development.

Mission

The mission of the Biology major is to provide students with a broad education in biology. To this end, students are offered a range of lecture courses that span the molecular, physiological, and ecological levels of organization. Students also complete laboratory courses that help them learn how to design and test hypotheses, use modern scientific equipment, and interpret data. Finally, students learn scientific communication skills by critiquing research articles, writing laboratory reports and research papers, and participating in oral presentations and debates. The department encourages students to become involved in a research project under the guidance of a faculty member at Barnard or elsewhere in New York City.

Student Learning Outcomes

Students graduating with a major in Biology should be able to attain the following outcomes:

• Demonstrate an appreciation of the many different life forms on planet Earth.
• Have the ability to discuss a biological phenomenon from many different levels of organization (e.g., discuss HIV from the perspective of structure to host immune response to evolutionary and epidemiological issues).
• Describe the basic features of Mendelian genetics and the central dogma of molecular biology; understand the basic physiological processes of at least one organism; and demonstrate an understanding of population-level processes.
• Make an oral presentation on either an original research project or a published primary research paper.
• Generate a testable hypothesis and develop and execute a controlled experimental design.
• Write an original scientific paper and/or a review article.

Research

Students are strongly encouraged to engage in research at Barnard. Either or both year-long courses, BIOL BC3591 Guided Research and Seminar-BIOL BC3592 Guided Research and Seminar or BIOL BC3593 Senior Thesis Research & Seminar-BIOL BC3594 Senior Thesis Research & Seminar, may be used to fulfill major requirements while the variable-credit semester-long course, BIOL BC3597 Guided Research, may be used for degree credit.

In addition to conducting research during the academic year, students are encouraged to pursue summer research internships. Barnard faculty engage many students in paid research projects during the summer through the Summer Research Institute (SRI) (https://barnard.edu/summer-research-institute/) at Barnard. The departmental office also has information about summer internships outside of Barnard. In addition, the department awards funds on a competitive basis to support summer research not otherwise funded by internships.

Introductory Course Selection

The Biology Department offers several options at the introductory level; students should select courses on the basis of their preparation and background in biology.

Students who took advanced biology in high school should enroll in the 1500-level sequence. This sequence can be started either in the fall (BIOL BC1500 Introduction to Organismal and Evolutionary Biology & BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology) or the spring (BIOL BC1502 Introduction to Cell and Molecular Biology & BIOL BC1503 Introductory Lab in Cell and Molecular Biology) and fulfills the science lecture and laboratory portion of the General Education Requirements, as well as the premedical requirement in biology. Please note that the Foundations distributional requirements for the sciences includes two science lecture courses, one of which must include a laboratory, but both of which do not necessarily need to be taken from the same scientific discipline.

Students with little or no experience in biology should enroll in the 1000-level sequence, which provides an appropriate introduction to important concepts in the field. Offered in the fall, BIOL BC1002 Global Health and Ecology includes a laboratory component, while BIOL BC1001 Revolutionary Concepts in Biology, offered in the spring, consists only of a lecture component. Taken together, these two lectures and laboratory fulfill the science General Education Requirement.

Students who wish to move on to the 1500-level courses are eligible to do so upon completion of BIOL BC1002 Global Health and Ecology with lab in the fall. Students must complete the entire 1500-level sequence (BIOL BC1500 Introduction to Organismal and Evolutionary Biology, BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology, BIOL BC1502 Introduction to Cell and Molecular Biology, and BIOL BC1503 Introductory Lab in Cell and Molecular Biology) for the Biology major or minor and for the biology premedical requirements.

AP Course Credit

Students who have passed the Advanced Placement examination in biology with a grade of 4 or 5 receive 3 points of credit toward their degree. However, AP credit neither goes toward fulfillment of the science GER nor does it exempt a student from any introductory course.

AP degree credit is granted regardless of which introductory courses are completed at Barnard.

Requirements for the Major

There are four ways to complete a major in Biology. A student can obtain a general Biology Major or may complete one of the three majors that concentrate on a specific level of biological organization: Cellular and Molecular; Physiology and Organismal; or Ecology and Evolutionary.

Introductory Biology

You may begin the introductory sequence with BIOL BC1002 Global Health and Ecology and the co-requisite lab BIOL BC1012 in the fall of your freshman year, but for the major you must then complete the entire 1500-level sequence the subsequent spring and fall.

BIOL BC1500 Introduction to Organismal and Evolutionary Biology 3
BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology 2
BIOL BC1502 Introduction to Cell and Molecular Biology 3
BIOL BC1503 Introductory Lab in Cell and Molecular Biology 2

Genetics

BIOL BC2100 Molecular and Mendelian Genetics 3

It is recommended, but not required, that this be taken immediately following the completion of the 1500-level courses.

Five Upper Level Lecture Courses

All Biology majors must complete five upper-level courses, with category distribution requirements and the courses that fulfill each category listed below. To complete the Biology Major without a concentration, the five courses must include at least one course from each of the three categories. To complete one of the three concentrations, at least four courses must be from the appropriate category and at least one must be from another category. Although some courses are listed in multiple categories, a student can only use a course towards one of the categories. Additional Columbia courses that can be used to fulfill the major requirements are provided on the Biology website. If a student completes courses that make her eligible for more than one of the four majors, she may select which one is reflected on her transcript.

BIOL BC3380 Applied Ecology and Evolution 3
EEEB UN3087 Conservation Biology 3
EEEB W4110 Coastal and Estuarian Ecology 4

Three Upper Level Laboratory Courses

Students must complete at least three Biology laboratories beyond the 1500 level. Laboratories may require a lecture course as a co-requisite or prerequisite; such requirements are specified in the Barnard catalogue. A year-long research-seminar course (BIOL BC3591 followed by BIOL BC3592) may substitute for lab courses. Students may also take lab courses at Columbia (or other institutions) to satisfy the lab requirement, with permission from the Co-Chair.

Research Option

A student may count two consecutive semesters of Guided Research and Seminar (BIOL BC3591 followed by BIOL BC3592) as a laboratory course for the major. Guided Research (BIOL BC3597) counts for degree credit but does not count toward the major. A student may not receive credit for research that is paid.

Senior Capstone Experience

Students must enroll in one section of Senior Seminar (BIOL BC3590) or complete two semesters of Senior Thesis Research Seminar (BIOL BC3593 followed by BIOL BC3594). A student cannot take both Senior Thesis Research and Guided Research and Seminar at the same time.

Chemistry Requirement

One semester of General Chemistry (with laboratory) and one semester of Organic Chemistry (with laboratory) are required.

Requirement for the Minor

A minor in biology includes:

BIOL BC1500 Introduction to Organismal and Evolutionary Biology 3
BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology 2
BIOL BC1502 Introduction to Cell and Molecular Biology 3
BIOL BC1503 Introductory Lab in Cell and Molecular Biology 2

Three additional lecture courses at the 2100 level or higher
Two additional laboratory courses ***

* One of the lab courses may be replaced by two semesters of Guided Research and Seminar (BIOL BC3591 Guided Research and Seminar followed by BIOL BC3592 Guided Research and Seminar).
In addition to this exposure to research at Barnard, students will spend 3 hours per week shadowing a Barnard junior or senior rotation each semester. During the rotation period, each student conducts and the research opportunities available on campus.

Additionally, students will participate in a month-long laboratory rotation each semester. During the rotation period, each student will spend 3 hours per week shadowing a Barnard junior or senior Research Intern who is conducting a year-long research project. Seminar assignments will include readings about the research process, as well as short library-based research projects about scientific claims in textbooks. In the fall, students will develop their presentation skills in a session with Barnard's Speaking Fellows. In the spring, each student will deliver an oral presentation about the research career of a scientist of her choosing.

**Chemistry, environmental science, physics, and psychology majors need to take only one advanced laboratory instead of two. Students should check with their major advisor in order to determine whether a guided research course is a suitable selection for their major's requirements.**

**HSPP BC1001 Research Apprenticeship Seminar. 3 points.**
This year-long course is 3 pts (1.5/semester)

Prerequisites: This course is open to 16 first-year students who are also enrolled in an introductory lab science sequence; applications will be made available via the first-year class blog through the Dean of Studies Office. The course will meet in a seminar format, and will discuss how research problems are defined, how scientists immerse themselves in the existing literature on a topic, how researchers craft experimental protocols and collect data, and how data can be used to test hypotheses. Students will also consider science stories in the New York Times and lead formal debates about ethical and social issues. Occasionally, the seminar period will be devoted to tours of faculty science labs to learn about the research that Barnard professors conduct and the research opportunities available on campus.

Additionally, students will participate in a month-long laboratory rotation each semester. During the rotation period, each student will spend 3 hours per week shadowing a Barnard junior or senior Research Intern who is conducting a year-long research project. Seminar assignments will include readings about the research process, as well as short library-based research projects about scientific claims in textbooks. In the fall, students will develop their presentation skills in a session with Barnard's Speaking Fellows. In the spring, each student will deliver an oral presentation about the research career of a scientist of her choosing.

**BIOL BC1001 Revolutionary Concepts in Biology. 3 points.**
Prerequisites: This lecture course does not fulfill Biology major nor premedical requirements, but does count toward the Science Lecture GER requirement for students fulfilling a Foundations requirement. Exploration of the major discoveries and ideas that have revolutionized the way we view organisms and understand life. This is an introductory survey course that explores basic concepts of molecular and cellular biology, genetics and evolution. Students will focus on biological concepts, biotechnology and bioethics, which induct contemporary society.

**BIOL BC1002 Global Health and Ecology. 4.5 points.**
Prerequisites: BIOL BC1012 lab enrollment is required. This lecture & lab course does not fulfill biology major nor pre-health requirements, but is recommended for prospective biology majors who lack a high-school level background in biology. For students fulfilling a Nine Ways of Knowing lab science requirement, this course may be taken with AP/IB credit OR with BIOL BC1502 & BIOL BC1503 in the spring. Students fulfilling a Foundations requirement may take BIOL BC1002/BIOL BC1012 as a one-semester course in addition to another science lecture, such as BIOL BC1001 Revolutionary Concepts in Biology, to fulfill the lab science requirement.

What disease is the number one killer worldwide? What will be the next pandemic? Fundamentals of human physiology and microbiology are explored in the context of major global health issues. Principles of ecology are outlined, with an emphasis on the bidirectional impact of the interactions of humans with the global environment. Lab exercises introduce biological techniques for studying these topics. **Enrollment in BIOL BC1012 (BC1002 lab) is required, and limited to 16 students per section.**

**BIOL BC1012 BIOL BC1002 Lab. 0 points.**
Prerequisites: BIOL BC1002 Global Health & Ecology is a co-requisite. This lab course does not fulfill biology major nor pre-health requirements. Enrollment in each lab section is limited to 16 students per section. Students must attend the first lab to hold their place. Fundamentals of human physiology and microbiology are explored in the context of major global health issues. Principles of ecology are outlined, with an emphasis on the bidirectional impact of the
interactions of humans with the global environment. Lab exercises introduce biological techniques for studying these topics.

**BIOL BC1500 Introduction to Organismal and Evolutionary Biology. 3 points.**

Prerequisites: This course is suitable for majors & fulfillment of pre-health requirements. A high school biology background or equivalent preparation is highly recommended. For those without this background seeking to major in biology, BIOL BC1002 & BIOL BC1012 are recommended in the fall of their freshmen year; followed by the year-long 1500-level lecture & lab sequence. BIOL BC1500 & BIOL BC1502 do not have to be taken in a fall to spring sequence.

Detailed introduction to biological phenomena above the cellular level; development, anatomy, and physiology of plants and animals; physiological, population, behavioral, and community ecology; evolutionary theory; analysis of micro-evolutionary events; and systematics.

**BIOL BC1503 Introductory Lab in Cell and Molecular Biology. 2 points.**

Prerequisites: BIOL BC1502 lecture is a pre- or co-requisite (preferred). Students must also enroll for a section of BIOL BC1513 recitation. A high school biology background or equivalent preparation (such as BIOL BC1002 & BIOL BC1012) is highly recommended. This course is suitable for fulfillment of biology major and pre-health requirements. Enrollment is limited to 16 students per section; must attend first lab to hold place.
A laboratory-based introduction to cell and molecular biology. Both classic and modern approaches are used to investigate principles of heredity as well as the structure and function of cells and their molecular components. Lab exercises introduce practical techniques and data analysis.

BIOL BC1503 BIOL BC1503 Recitation. 0 points.
Prerequisites: BIOL BC1502 lecture is a pre- or co-requisite (preferred). This recitation (BIOL BC1513) is a co-requisite course for enrollment in BIOL BC1503 Introductory Lab in Cell & Molecular Biology. Each individual lab section is limited to 16 students per section, however all students must enroll in one of the two recitation sections offered. BIOL BC1599 Science Journal Club. 1 point.
Prerequisites: Limited to 16 students who are participating in the Science Pathways Scholars Program. Students in this seminar course will be introduced to the scientific literature by reading a mix of classic papers and papers that describe significant new developments in the field. Seminar periods will be devoted to oral reports, discussion of assigned reading, and student responses.

, Section 1: Limited to students in the Science Pathways Scholars Program.
,Section 2: Limited to first-year students who received a 4 or 5 on the AP and are currently enrolled in BIOL BC1500.

BIOL BC2100 Molecular and Mendelian Genetics. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. This course is a pre-requisite for most 3000-level courses. Mendelian and molecular genetics of both eukaryotes and prokaryotes, with an emphasis on human genetics. Topics include segregation, recombination and linkage maps, cytogenetics, gene structure and function, mutation, molecular aspects of gene expression and regulation, genetic components of cancer, and genome studies.

BIOL BC2240 Plant Evolution and Diversity. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. Survey of plant biology emphasizing evolutionary and ecological perspectives on mating and reproduction, physiology, anatomy, and morphology.

BIOL BC2262 Vertebrate Biology. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent. Systematic survey of the Phylum Chordata: fossil history, biogeography, systematics, natural history, body architecture, energetics, locomotion, feeding, and behavior.
BIOL BC2272 Ecology. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503
or the equivalent. This course is a pre- or co-requisite for BIOL BC2873
Laboratory in Ecology.
Introduction to evolutionary ecology; life history strategies, population
growth, competition, predator-prey interactions, population regulation,
species diversity, community organization, and biogeography. Lectures
integrate theory with empirical studies.

BIOL BC2272 Evolution. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503
or the equivalent.
Study of the process of evolution with an emphasis on the
mechanisms underlying evolutionary change. Topics include
the origins of life, rates of evolutionary change, phylogenetics, molecular
evolution, adaptive significance of traits, sexual selection, and human
evolution.

BIOL BC2280 Animal Behavior. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL
BC1503 or the equivalent.
This introduction to animal behavior takes an integrative approach
to understand the physiological and genetic basis of behavior, the
ecological context of behavior, and the evolutionary consequences of
behavior. This course focuses on the process of scientific research,
including current research approaches in animal behavior and practical
applications of these findings.

BIOL BC2281 Laboratory in Animal Behavior. 3 points.
standard for lab courses in Biology
Prerequisites: (BIOL BC1500) and (BIOL BC1502) and (BIOL BC2280)
and (BIOL BC1501) and (BIOL BC1503)
This lab provides an introduction to animal behavior research, including
current research approaches and practical applications of these
findings. Students will complete two main projects. The first is a
group project using the fruit fly, *Drosophila melanogaster*, which will
involve observing, recording, and analyzing reproductive behaviors.
The second is an independent project that will be designed, conducted,
and analyzed by students using publicly available animal behavior
resources and/or data. Both projects will incorporate critical thinking,
problem solving and experimental design, with an emphasize on
scientific writing and oral presentation skills.

BIOL BC2490 Coding in Biology. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503,
BIOL BC2100
An introduction to the basics of Python and R coding in the context
of solving basic problems in molecular biology. Python will be used
to write programs that analyze various features of DNA sequence
data and R will be used to analyze output from RNA-seq experiments.
No prior programming experience is necessary. The work will involve
modifying existing code as well as developing simple programs from
the ground up.

BIOL BC2500 MATLAB for Scientists. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1502, and MATH UN1101
Introduction to MATLAB programming and numerical methods applied
to the analysis of biological data. Topics range from foundational
programming concepts and algorithms and an introduction to MATLAB,
to more advanced concepts such as data visualization, curve fitting
data interpolation, basic statistical methods, modeling biological
systems of ordinary differential equations, and image analysis.

ANAT BC2574 Laboratory in Human Anatomy. 3 points.
Corequisites: ANAT BC2573
This new interdisciplinary laboratory course will introduce students
to the practices of creative and scientific research in anatomy. The
laboratory course will offer students “hands-on” opportunities to
view cadaveric specimens, to collect, analyze and communicate
scientific information/data related to anatomy and to explore the
use of anatomical information to generate creative movement and
choreography.
BIOL BC2841 Laboratory in Plant Evolution and Diversity. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, or equivalent. Enrollment is limited to 16; must attend first lab to hold place.

Through field observations, experiments, statistical analyses and data synthesis, gain coding skills and insights into key tools and techniques for studying, managing, and conserving botanical biodiversity. Digital projects are integrated with studies of structure, ecology, biogeography, and evolution. Emphasis on plants in NYC’s local environment.

BIOL BC3304 Topics in Molecular Genetics. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, or equivalent. Selected topics in molecular genetics and gene regulation, with a focus on examples from human evolution, physiology, and disease. The course will be organized into four modules with combined lecture and journal club-style discussion. Module topics include molecular regulation of transcription, epigenetic regulation of the genome, gene regulatory networks, and genome architecture and evolution. We will draw from examples in the current literature and explore current experimental approaches in molecular genetics of humans and model organisms.

BIOL BC3310 Cell Biology. 3 points.
Prerequisites: (BIOL BC1500)/(BIOL BC1501)/(BIOL BC1502)/(BIOL BC1503) and BIOL BC2100 or equivalent.

This course explores the components, systems, and regulatory mechanisms involved in eukaryotic cellular function. Topics include: signal transduction, translational, and protein quality control, organellar and cytoskeletal dynamics, and some coordinated responses such as proliferation and programmed cell death. Throughout the course we will see how general cell biology can be specialized to achieve specific cellular functions through regulation of the basic machinery. We will also explore the cellular and molecular bases for a variety of human pathologies, with an emphasis on cancer. In addition to lecture, we will spend some time discussing the material, including selected articles from the primary literature, and learning through group presentations.

BIOL BC3320 Microbiology. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent. This course is a pre-requisite for BIOL BC3321 Laboratory in Microbiology. Survey of the diversity, cellular organization, physiology, and genetics of the major microbial groups. Also includes aspects of applied microbiology and biotechnology, the function of microorganisms in the environment, and the role of microbes in human diseases.

BIOL BC3321 Laboratory in Microbiology. 3 points.
Prerequisites: BIOL BC3320 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

Provides experience in the isolation, cultivation, and analysis of microorganisms. Methods used for the study of cell structure, growth, physiology, and genetics of microbes will be incorporated into laboratory exercises.

BIOL BC3352 Development. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent.

Introduction to animal developmental biology and its applications. This course will examine the basic mechanisms through which animal bodies organize themselves, from an integrative perspective at the levels of genes and gene networks, cell properties and behaviors, coordinated interactions of cells in developing tissues, organs...
and organ systems, and the role of developmental processes in morphological evolution. Topics include: fertilization, cleavage and gastrulation, establishment of body axes, neural development, organ formation, tissue and organ regeneration, stem cells and medical applications, evolution of developmental programs, and teratogenesis.

**BIOL BC3360 Physiology. 3 points.**

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent.

This course examines how mammals carry out basic functions like manipulating objects, sensing the external world, oxygenating tissues, and processing food. Emphasis is placed on (a) how the body regulates itself through the integrated action of multiple organ systems and (b) what goes wrong in disease.

**BIOL BC3361 Laboratory in Physiology. 3 points.**

Prerequisites: BIOL BC3360 (or equivalent, which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

Provides a hands-on introduction to the different physiological systems in vertebrates and invertebrates. Emphasizes the operation of a variety of physiological monitoring devices and the collection and analysis of physiological data.

**BIOL BC3362 Molecular and Cellular Neuroscience. 3 points.**

Prerequisites: (BIOL BC1500)(BIOL BC1501)(BIOL BC1502)(BIOL BC1503) and CHEM BC3230 or the equivalent.

Structure and function of neural membranes; ionic basis of membrane potential and action potential; synaptic transmission and neurochemistry; sensory transduction and processing; reflexes and spinal cord physiology; muscle structure and function; neuronal circuitry; and nervous system development.

**BIOL BC3363 Laboratory in Molecular and Cell Neuroscience. 3 points.**

Prerequisites: BIOL BC3362 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

Introduction to techniques commonly used in current neurobiological research, including intracellular and extracellular recording of action potentials, neuroanatomical methods, and computer simulation of the action potential.
An independent research project in Biology under the guidance of a faculty member and suiting the needs of the individual student. A Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in this year-long course. A Project Approval Form (https://forms.gle/mDNyTScaEJkMMWct5/) must be submitted to the department in the fall.

Attendance at a weekly seminar is required. By the end of the year, students enrolled in BIOL BC3591-BIOL BC3592 will write a scientific paper and give a poster presentation of their work at the Barnard Biology Research Symposium. Completion of this year-long course fulfills two upper-level laboratory requirements for the major. Must be taken in sequence, beginning in the fall.

BIOL BC3593 Senior Thesis Research & Seminar. 4 points.
Per Semester
Prerequisites: Permission of a faculty sponsor and the department. Cannot be taken concurrently with BIOL BC3591 or BIOL BC3592. Same as BIOL BC3591-BIOL BC3592, including attendance at a weekly seminar. By the end of the year, students enrolled in BIOL BC3591-BIOL BC3592 will write a scientific paper and orally present their work at the Barnard Biology Research Symposium.

BIOL BC3597 Guided Research. 4 points.
Prerequisites: Permission of a faculty sponsor. Similar to BIOL BC3591-BIOL BC3592, this is a one-semester course that provides students with degree credit for unpaid research without a seminar component. You may enroll in BIOL BC3597 for between 1-4 credits per semester. As a rule of thumb, you should be spending approximately 3 hours per week per credit on your research project.

A Project Approval Form (https://forms.gle/mDNyTScaEJkMMWct5/) must be submitted to the department each semester that you enroll in this course. Your Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in BIOL BC3597. You should sign up for your mentor's section.

This course does not fulfill any Biology major requirements. It is open to students beginning in their first year.

BIOL BC2286 Statistics and Research Design. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent, college-level algebra or the equivalent. General Educational Requirement: Quantitative and Deductive Reasoning (QUA) Introduction to basic principles of statistics and experimental design. Topics include common statistical procedure, analysis of data, sampling populations, power analysis, and the design of experiments. This course differs from traditional statistics courses by explicitly integrating statistics into research process.

BIOL BC2873 Laboratory in Ecology. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: BIOL BC2272 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.
The definition of ecological problems in experimentally tractable ways; the design of experiments and analysis of ecological data; class projects on population ecology. Students conduct individual projects during last month of term.

BIOL BC2900 Research Methods Seminar. 1 point.
Not offered during 2019-20 academic year.

Prerequisites: Instructor’s permission required. Students must be sophomores with a strong interest in pursuing research in the biological or chemical sciences.
Skills to facilitate entry into biology and chemistry research. Students will learn to think and work like scientists and to identify, apply for, and gain entry to research lab groups. Focus on writing and oral presentation skills. Additional readings and discussions on laboratory safety, women in science, and scientific ethics.

BIOL BC3305 Project Laboratory in Molecular Genetics. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or permission of instructor. Enrollment limited to 16. Laboratory course in which students conduct original research projects in molecular genetics. Students will participate in experimental design, conduct and data analysis, and work with key techniques for studying gene structure, expression and function such as nucleic acid extraction and synthesis, cloning, bioinformatics analysis, PCR, and qPCR. Students will present their results orally and in writing. Enrollment in both semesters (BIOL BC3305 and BIOL BC3306) of this full-year course is required, and fulfills two upper-level lab courses for the Barnard Biology major. Must be taken in sequence, beginning in the fall.

BIOL BC3306 Project Laboratory in Molecular Genetics. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: BIOL BC2100 or permission of the instructors. Enrollment is limited to 16; must attend first lab to hold place. Laboratory course in which students conduct original research projects in molecular genetics. Students will participate in experimental design, conduct data analysis, and work with key techniques for studying gene structure, expression, and function including nucleic acid extraction and synthesis, cloning, bioinformatics analysis, PCR, and qPCR. Students will present their results orally and in writing. Enrollment in both semesters (BIOL BC3305 and BIOL BC3306) of this full-year course is required, and fulfills two upper-level lab courses for the Barnard Biology major. Must be taken in sequence, beginning in the fall.

BIOL BC3308 Genomics and Bioinformatics. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: (BIOL BC1500)(BIOL BC1501)(BIOL BC1502)(BIOL BC1503) and BIOL BC2100 or the equivalent. This course is an upper-level laboratory. Advanced topics in genetics focusing on genome-level features and methods of sequence analysis. The primary emphasis of the course will be on microbial genomic and metagenomic applications, but many of the techniques will be applicable to eukaryotic genomics and medical genomics as well. Through this course students will become comfortable with the command line interface, learn basic programming skills, be exposed to a variety of online tools, and become proficient in a number of genomic software packages.

BIOL BC3367 Ecophysiology. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503, or the equivalent. BIOL BC2280 is recommended. Individuals, communities and ecosystems are composed of complex organism-environment interactions. We will examine these dynamic relationships in animals at the physiological level, covering basic concepts as they specifically relate to animal fitness. Course focus: how changes in stress and reproductive endocrinology and ecoinmunology relate to individual and population dynamics.

The Department of Chemistry

The department aims to provide Barnard College students with a working knowledge of chemistry—the study of matter and its transformations, particularly at the molecular scale—within a vibrant community of students, faculty, and staff. Students gain familiarity with the core areas of the field: inorganic, physical, organic, analytical, and biological chemistry; while developing broadly applicable skills in problem solving and critical thinking. Through extensive laboratory work, students apply chemical concepts and theories to the tangible world, and there are ample opportunities for independent research with faculty members.

The laboratories of the department are modern and well-equipped for both coursework and independent projects. Students may undertake research projects under the guidance of members of the department during the academic year or the summer. Opportunities are also available for research with Columbia faculty as well as staff members of the many medical schools and research institutions in New York City.

AP Credit

Students with scores of 4 or 5 on the Chemistry AP test or a 5, 6 or 7 on the IB chemistry exam can receive 3 credits of unspecified chemistry credit. Students may not "place out" of CHEM BC2001 unless they have taken the equivalent course(s) in college.

Pre-Medical Program

Non majors who are interested in the pre-health professions should work with the pre-health adviser to determine the best selection of chemistry courses for their goals. Information about the topics covered in each chemistry course is available through the prehealth professions office to facilitate student choice.

Introductory Course Selection

Based on their preparation and background in chemistry, most students begin their study with CHEM BC2001 General Chemistry I, an integrated lecture and laboratory course. Some students will also...
take CHEM BC1003 Chemical Problem Solving, which is a one point corequisite of General Chemistry. Consult the department regarding this choice.

Regardless of a student’s background in chemistry, students may also take CHEM BC1050 From Forensics to Art Conservation - The Jazz of Chemistry. This 3.0-point seminar is limited to 24 students per section.

Chair: Rachel Narehood Austin (Professor)

Senior Associate Laboratory Director: Su Qing Liu

Laboratory and Facilities Administrator: Kenise Jefferson

Senior Lecturer: Jean Vadakkan

Laboratory Instructional Support Specialists: Grace Lee, Richard Denton

Requirements for the Major

Two majors are offered by the department: Chemistry and Biochemistry. There is also a special track within chemistry for students who are interested in pursuing graduate study in chemical engineering.

A student interested in chemistry or biochemistry should consult any member of the department during her first year. In the first year they should take CHEM BC2001 General Chemistry I, CHEM BC3328 Introductory Organic Chemistry Laboratory, and CHEM BC3230 Organic Chemistry I and start or continue the study of calculus.

In addition to required coursework, research experience is strongly recommended and may begin as early as the sophomore year. Interested students should consult with individual faculty members about research opportunities.

Rising seniors making good progress towards the degree may be invited by the faculty to participate in the senior honors thesis program in which students carry out a year-long research project leading to a thesis. Students who do not perform thesis research will satisfy the senior capstone requirement by taking a single semester of research their senior year.

Recommended

* For Class 2020 and before:
1) Two Semesters of math taken at college, including Cal. I or either II or III is required.
For Class of 2021 and beyond:
1) Two Semesters of math taken at college
2) Completion of Calculus through Calculus II.
Further mathematics experience is always encouraged strongly for Chemistry and Biochemistry majors.

† Students having advanced placement credit for one or two semesters of calculus may fulfill the two-semester requirement with additional mathematics, statistics, or computer science courses. Any calculus-based statistics course is acceptable. Also, many computer science courses are acceptable (e.g., COMS W1004 Intro to Programming in Java, COMS W3101 Program Languages (Python), ENV BC3050 Working with Big Data), although COMS W1002 Computing in Context is not.

A list of major requirements, several possible course sequences, and information about the senior requirement can be obtained from any member of the department.
Biochemistry

The courses required for the biochemistry major are:

**Core**
- CHEM BC2001 General Chemistry I 5
- CHEM BC3328 Introductory Organic Chemistry Laboratory 5.5
- CHEM BC3230 Organic Chemistry I and Organic Chemistry I 3
- CHEM BC3333 Modern Techniques of Organic Chemistry Laboratory 3
- CHEM BC3242 Quantitative Analysis 3
- CHEM BC3338 Quantitative and Instrumental Techniques Laboratory 3
- CHEM BC3253 Quantum Chemistry 3
- MATH UN1101 Calculus I* 3
- MATH UN1101 Calculus II 3
- MATH UN1201 Calculus III 3
- PHYS BC2001 Physics I: Mechanics and Physics II: Electricity and Magnetism 9
- BIOL BC1502 Introduction to Cell and Molecular Biology and Introductory Lab in Cell and Molecular Biology 5
- CHEM BC2001 General Chemistry I 9
- CHEM BC2001 General Chemistry I 3
- CHEM BC282 Biological Chemistry 3
- CHEM BC283 Biological Chemistry II 3
- CHEM BC3355 Biochemistry Laboratory Techniques 5

**Elective**

An elective course from the following list:
- CHEM BC3271 Inorganic Chemistry
- CHEM BC3280 Advanced Organic Chemistry
- CHEM BC3252 Thermodynamics and Kinetics
- CHEM BC3254 Methods and Applications in Physical Chemistry
- CHEM BC3348 Advanced Spectroscopy and Analysis Laboratory
- CHEM BC3358 Advanced Chemical Synthesis Laboratory

**Senior Requirement**

Select one of the following:
- Senior Honors Thesis
- CHEM BC3901 Senior Honors Thesis
- CHEM BC3902 Senior Honors Thesis (by invitation of the department)

Guided Research at Barnard or Columbia:
- CHEM BC3597 Problems in Chemistry
- CHEM BC3599 Problems in Chemistry

Elsewhere:
- CHEM BC3598 External Problems in Chemistry

**Recommended:**
- CHEM BC3230 Organic Chemistry I 3
- CHEM BC3231 Organic Chemistry II 3
- CHEM BC3333 Modern Techniques of Organic Chemistry Laboratory 3
- CHEM BC338 Quantitative and Instrumental Techniques Laboratory 3

Select one of the following: 3-3.5
- CHEM BC3232 Chemistry IV 3
- CHEM BC3242 Quantitative Analysis 3
- CHEM BC3252 Thermodynamics and Kinetics 3
- CHEM BC3271 Inorganic Chemistry 3
- CHEM BC3282 Biological Chemistry 3

Students having advanced placement credit for one or two semesters of calculus will fulfill this requirement with additional mathematics, statistics, or computer science courses.

A list of major requirements, including possible elective courses, and information about the senior requirement may be obtained from any member of the department.

CHEM 1050 From Forensics to Art Conservation - The Jazz of Chemistry. 3 points.
Counts towards the Sciences without Lab Foundations requirement.

The contribution of chemistry to everyday life is immense. The applications of chemistry in medicine, petrochemicals, cosmetics, and food are readily apparent. However, chemistry is a key part of many other fascinating fields, some of which may be less obvious. Examples of areas in which chemistry plays a key role include forensic science; art restoration and forgery detection; and flavors and fragrances in food, beverages and other consumer products. The goal of this course is to provide insights and spur discussion of several areas and applications of chemistry, and provide hands-on experience in techniques used in these fields sparking the curiosity of Barnard students into this marvelous field.

CHEM 2001 General Chemistry I. 5 points.
Students enrolled in CHEM BC2001 must also register for a section of CHEM BC2012.
Corequisites: CHEM BC2012
Atoms; elements and compounds; gases; solutions; equilibrium; acid-base, precipitation, and oxidation-reduction reactions; thermochemistry. Lecture MWF 11-11:50am or 12-12:50pm; laboratory one day a week. Laboratory experience with both qualitative and quantitative techniques. Counts towards Lab Science Requirement.

CHEM 2012 General Chemistry Lab. 0 points.
Corequisites: CHEM BC2001
Required laboratory section for BC2001 General Chemistry. All students enrolled in BC2001 must also be enrolled in one section of BC2012.

CHEM 2900 Research Methods Seminar. 1 point.
Instructor’s Permission Required
Prerequisites: Students must be sophomores with a strong interest in pursuing research in the biological or chemical sciences
Skills to facilitate into biology and chemistry research. Students will learn to think and work like scientists and to identify, apply for and gain entry to research lab groups. Focus on writing and oral presentation skills. Additional readings and discussions on laboratory safety, women in science, and scientific ethics.

CHEM 3230 Organic Chemistry I. 3 points.
Prerequisites: CHEM BC2001 or equivalent. Credit will not be given for any course below the 3000 level after completing CHEM BC3230 or its equivalent. Lecture: MWF: 10:00 - 10:50 AM
Corequisites: With lab, counts towards Lab Science requirement. Atomic and molecular structure; stereochemistry of organic molecules; introduction to organic reactions, reaction mechanisms, and synthesis.

CHEM 3242 Quantitative Analysis. 3 points.
This course is not a suitable substitute for CHEM BC3232 for students completing the pre-health requirements.
Prerequisites: CHEM BC3231, MATH V1101, and permission of instructor.
Corequisites: CHEM BC3338
Survey of topics appropriate for a student majoring in chemistry or biochemistry, including examinations of uncertainty analysis and data processing, use of basic laboratory equipment, complex equilibria (pH, solubility, etc.), advanced solution chemistry and chemical activity, and the theoretical foundations of modern techniques in electrochemistry, chromatography and analytical experimental techniques.
Introduction to the laws of thermodynamics; application primarily to ideal systems. Free energy and equilibrium. Kinetics: rate laws and mechanisms, experimental techniques.

**CHEM BC3253 Quantum Chemistry. 3 points.**
Prerequisites: (CHEM BC3253) CHEM BC3253 or permission of instructor. Lecture: TuTh 8:40-9:55.
Advanced topics in physical chemistry, including statistical mechanics, reaction dynamics, materials science, catalysis, and nanotechnology. Particular emphasis will be placed on topics related to climate and energy.

**CHEM BC3272 Advanced Inorganic Chemistry. 3 points.**
Prerequisites: CHEM BC3271 Inorganic Chemistry
This course combines builds on the foundation developed in Inorganic Chemistry (CHEM BC3271) and applies inorganic chemical concepts and techniques to specific applications. A particular focus will be on understanding the roles of the transition metals in biological systems.

**CHEM BC3280 Advanced Organic Chemistry. 3 points.**
Prerequisites: One year of organic chemistry.

Survey of topics in structural, mechanistic, and synthetic organic chemistry, including molecular orbital treatment of structure, bonding, and chemical reactivity; elucidation of organic reaction mechanisms; pericyclic reactions; stereoelectronic effects; reactive intermediates; asymmetric reactions; and natural product total synthesis.

**CHEM BC3282 Biological Chemistry. 3 points.**

Visible, infrared, near-infrared, fluorescence, and Raman spectroscopy. Techniques, calculations, and theories. Instrumentation will include UV-visible, infrared, near-infrared, fluorescence, and Raman spectroscopy.

Chemistry BC333 Modern Techniques of Organic Chemistry Laboratory. 3 points.
Prerequisites: (CHEM BC3328) or (CHEM BC3230) CHEM BC3328 with a grade of C- or better and CHEM BC3230.
Corequisites: CHEM BC3231, CHEM BC3334
Advanced experimental organic techniques and introduction to qualitative and quantitative organic analysis. Emphasis on instrumental and chromatographic methods. Selected reactions. Students enrolling in this course must register for CHEM BC3334x.

CHEM BC3338 Quantitative and Instrumental Techniques Laboratory. 3 points.
Prerequisites: (CHEM BC3231 and CHEM BC3333) Co-requisite for students not majoring in chemistry or biochemistry: CHEM BC3232. For students majoring in chemistry or biochemistry, CHEM BC3242.
Corequisites: CHEM BC3232, CHEM BC3242
Quantitative techniques in volumetric analysis, radiochemistry, spectrophotometry, and pH measurement. Data analysis with spreadsheets.

CHEM BC3346 Advanced Spectroscopy Laboratory. 0 points.
Corequisites: CHEM BC3348
This course combines chemical synthesis, inorganic chemistry, physical chemistry, and nanoscience into experiments with an emphasis using spectroscopy to determine chemical structure and reactivity. You will gain experience with a range of instruments, techniques, calculations, and theories. Instrumentation will include UV-Visible, infrared, near-infrared, fluorescence, and Raman spectroscopy.

CHEM BC3348 Advanced Spectroscopy and Analysis Laboratory. 3 points.
Prerequisites: CHEM BC3333 and CHEM BC3253
Corequisites: CHEM BC3271
This course combines chemical synthesis, inorganic chemistry, physical chemistry, and nanoscience into experiments with an emphasis using spectroscopy to determine chemical structure and reactivity. You will gain experience with a range of instruments, techniques, calculations, and theories. Instrumentation will include UV-Visible, infrared, near-infrared, fluorescence, and Raman spectroscopy.

CHEM BC3355 Biochemistry Laboratory Techniques. 5 points.
Prerequisites: Organic II lab (CHEM BC3333, BC3335, or equivalent); Quantitative analysis lab (BC3348, BC3340, or equivalent); Biochemistry (CHEM BC3282y, CHEM C3501, or equivalent). Lecture: T 1:10–12:50; Laboratory two afternoons: T 2:10–6:00 / TH 1:10–5:00. Theory and application of fundamental techniques for the isolation, synthesis and characterization of biological macromolecules including proteins, lipids, nucleotides and carbohydrates. Techniques include spectroscopic analysis, gel electrophoresis, chromatography, enzyme kinetics, immunoblotting, PCR, molecular cloning and cell culture, as well as modern laboratory instrumentation, such as UV-Vis, GC-MS and HPLC.
CHEM 3599 Problems in Chemistry. 4 points.
Prerequisites: CHEM BC328 and permission of instructor. 8 hours of laboratory work by arrangement.

Individual research projects at Barnard or Columbia, culminating in a comprehensive written report.

Greek and Roman Language, Literature, and Culture; Ancient Studies; Modern Greek

Department of Classics and Ancient Studies (see below for Modern Greek)

Mission
The department of Classics and Ancient Studies aims to introduce students to a knowledge of the languages and an understanding of the literature and culture of ancient Greece and Rome in a broader Mediterranean context, as well as to develop an appreciation of how Greco-Roman antiquity has been used and abused by later eras. The study of the languages enables access to a wide range of challenging and influential ancient texts, artifacts, and ideas and also makes the grammar, syntax, and vocabulary of English and other modern languages more comprehensible. The study of these texts, in turn, develops analytical and critical thinking about both
the past and the present, the ability to assess many different kinds of fragmentary evidence, as well as skills in writing, close reading and oral presentation, cultural awareness, and literary sensibility. Close cooperation between Barnard and Columbia enables ancient studies students to plan and implement an integrated, cohesive interdisciplinary study of the ancient world, including language, literature, mythology, history, religion, philosophy, law, political theory, comparative literature, medieval studies, gender studies, art history and material culture. The texts and monuments of the Greco-Roman world served as the basis of Western education until the twentieth-century and retain a core position in modern humanities and social thought that is currently expanding beyond the West. Exploring, analyzing, and assessing this legacy is the central goal of the program.

Majors
The department offers two majors. The majors in Classics (Greek, Latin, or Classics) center on work in the original languages, whereas the major in Ancient Studies has an interdisciplinary focus. All members of the department are available for major advising and students ideally choose an adviser who can help them develop their required senior essays.

The Major in Classics (Greek), Classics (Latin) or Classics (Latin and Greek)
Classics majors develop a knowledge of Greek and Latin as a gateway to the study of the literature, history, and culture of Greece and Rome. Students can start Greek and Latin at Barnard or build on skills acquired in high school. Second year courses introduce students to original texts in Greek or Latin by authors such as Homer, Plato, Herodotus, or the Greek orators or Vergil, Ovid, Horace, Cicero, Caesar, Livy or Sallust. A range of advanced courses in Greek or Latin focus on prose or poetic texts drawn from ancient epic, lyric poetry, philosophy, drama, history, rhetoric or the novel and introduce critical approaches and literary and historical scholarship. Students are encouraged to take more courses in ancient history and classical literature and civilization than the two required for the major. Students planning to go on to graduate work in Classics and related fields are advised to undertake at least three years in both languages as well as to begin acquiring the ability to read scholarship in French, German, or Italian. Study abroad for one semester in either Greece or Rome is common and encouraged.

Student Learning Objectives in Classics
Students successfully completing a major in Classics should be able to attain the following objectives:

- Translate a range of Greek or Latin texts at a moderately advanced level and demonstrate an understanding of the grammar and syntax of ancient languages.
- Read, analyze, and write about ancient texts persuasively and locate texts in their historical and cultural contexts.
- Achieve familiarity with the methodologies and critical approaches and research tools deployed in classical scholarship that will be demonstrated in the successful completion of a senior research project.
- Demonstrate familiarity with the work of a variety of ancient writers, literary styles, genres, and periods and their later influences.

The Major in Ancient Studies
All students in the department are encouraged to take courses in history and classical civilization that require no knowledge of the languages. Students in the more fully interdisciplinary Ancient Studies major combine study of at least one ancient language with a range of courses in various departments focusing on language, literature, mythology, history, religion, philosophy, political theory, law, film, comparative literature, medieval studies, gender studies, art history and material culture. Each student develops a concentration in one geographical area or period, but is encouraged to focus on a set of related issues and questions. Ancient Studies students will encounter many disciplinary approaches and investigate Greek and Roman and related ancient cultures in Egypt and the Near East and their influences on later Western (and to the degree possible, non-Western) culture. From this perspective the major can complement work in other liberal arts majors. Study abroad for one semester in either Greece, Rome, Egypt, or the Near East is common and encouraged.

Student Learning Objectives in Ancient Studies
Students successfully completing a major in Classics should be able to attain the following objectives:

- Read, analyze, and write about ancient texts persuasively and locate texts in their historical and cultural contexts.
- Achieve familiarity with the methodologies and critical approaches and research tools deployed in classical scholarship and in related disciplines studied by each individual student that is demonstrated in the successful completion of a senior research project.
- Engage in detail with the methods needed to analyze the range of fragmentary evidence, both written and material, required in an interdisciplinary study of the ancient Mediterranean world.
- Demonstrate familiarity with one geographical area or period in the Greek, Latin or related ancient Mediterranean worlds.
- Assess differences among and relations between ancient cultures and analyze the use and abuse of evidence about the ancient world by later cultures.

The Greek or Latin Play
The Classics Department is the beneficiary of the Matthew Alan Kramer Fund, whose principal purpose is to support the production of plays in Ancient Greek or Latin. Students of the department have produced Antigone, Medea, Alcestis, Persians, Eumenides, Cyclops, Electra, Clouds, Trojan Women, Rudens, Helen, Trachiniae, Bacchae, Hippolytus, Heracles, Birds, and Persa, which have provided an exciting and different learning experience for the participants.

Classics in New York
Every effort is made to introduce students to considerable resources for the study and influence of the Classics in New York City, including plays, films, and museum and gallery visits.

Careers Undertaken by Classics and Ancient Studies Majors
Our majors graduate well prepared for graduate careers in Classics and related academic fields such as history, philosophy, archaeology, art history or comparative literature. They also enter successful careers in secondary school teaching, museum work and arts administration, as well as law, medicine and biological sciences, business, politics, public service in both the government and non-profit sectors, journalism and creative writing, publishing, library science, and the arts (especially theater, film and dance).
Study Abroad
The following three programs are pre-approved, but students may discuss other options with their advisers.

ICCS in Rome
Barnard College participates in the program of the Intercollegiate Center for Classical Studies in Rome (http://globaled.duke.edu/Programs/Semester/ICCS_Rome/). Majors in Classics or Ancient Studies are eligible to apply for admission to the program of the Rome Center for one semester, preferably in the junior year. Courses taken at the Rome Center may be used in the major and, in some cases, may be used to satisfy distribution requirements. The program provides undergraduate students with an opportunity to study ancient history and archaeology in Rome, Greek and Latin literature, and ancient and renaissance art. Students planning to apply to the ICCS should plan to take Roman history before applying and preference is given to those with two or more years of Latin and Greek. Applications for the spring term are due in mid-October and for the fall term in mid-March. Because of Sicily’s ancient connections to Greece, the program focuses more on the Hellenic culture of Magna Graecia and Sicily’s place as a cultural crossroads in the ancient Mediterranean.

ICCS in Sicily
The focus of ICCS Sicily (http://studyabroad.duke.edu/), as in the original program in Rome, will be on classical languages as well as on local manifestations of history and civilization in the ancient Mediterranean world. Based at the University of Catania, in a city with a rich ancient, medieval and Baroque history, this program offers extensive local academic resources and close proximity to both the mainland and other towns on the island.

CYA: College Year in Athens
The College Year in Athens (http://www.cyathens.org/) (CYA) program offers either one semester or a full year of courses in ancient and modern Greek languages, history, art, and archaeology, as well as advanced Latin and courses in post-classical and modern Greek culture, politics, and history. Almost 200 colleges participate in the CYA. Applications for the spring term must be received by mid-October and by mid-May for the fall term.

Summer Study
Students interested in summer programs in archaeology should consult the website of the American Institute for Archaeology (http://www.archaeological.org/) (AIA) under fieldwork.

The CUNY Greek and Latin Workshops in midtown Manhattan offer special intensive summer language programs in Greek and Latin. Other institutions including Columbia offer summer language courses. The American Numismatics Society in Manhattan offers courses in the study of ancient coins.

Barnard College is a Supporting Institution of the American School of Classical Studies at Athens and the American Academy in Rome, and certain privileges of those schools are open without fee to graduates of the College.

Requirements for the Majors in Classics and Ancient Studies

Fulfilling the Foreign Language requirement
Students may fulfill the foreign language requirement in Greek by completing GREK UN1202, or in Latin by completing LATN UN1202, or by completing one course in Greek or Latin at the 3000 level or above. In rare instances, the language requirement may be fulfilled by passing an exemption examination with a sufficiently high grade. This examination tests the student’s knowledge of grammar and her ability to translate written Greek or Latin.

Major in Classics
Greek
The major in Greek is fulfilled by taking the following courses as well as five other courses above the elementary level in Ancient Greek.

Students planning to go on to graduate study in classics are strongly urged to take both semesters of GREK GU4105 History of Greek Literature I, GREK GU4106 History of Greek Literature II or LATN GU4105 Latin Literature of the Republic, LATN GU4106 Latin Literature of the Empire. Majors in Latin, especially those who have begun their study in high school, are strongly advised to take at least two semesters of Greek.

In addition, one semester of ancient history appropriate to the major and two relevant courses in ancient art, classical civilization or literature, ancient philosophy, or religion are required for either the Greek or the Latin major. Students who do not opt to take a term of either GREK GU4105 History of Greek Literature I-GREK GU4106 History of Greek Literature II or LATN GU4105 Latin Literature of the Republic-LATN GU4106 Latin Literature of the Empire are required to take CLLT GU4300 The Classical Tradition, as one of their three required courses in translation.

A student may elect to major in both Greek and Latin (Classics) by completing the major requirements in one language and five courses above the elementary level in the other.
Major in Ancient Studies
Each student, after consultation with the Barnard Chair, chooses an advisor whose field is closely related to her own and with whom she will plan her senior essay.

A total of 36 points are required in the major, including at least four courses in one geographical area or period; courses in at least three departments to ensure proper interdisciplinary training and expertise; the elementary sequence of a relevant ancient language; the appropriate history course; ANCS UN3995 The Major Seminar, and at least the first semester of Ancient Studies ANCS UN3998 Directed Research In Ancient Studies, ANCS V3999 Directed Research in Ancient Studies (senior essay). Ancient language courses may be used toward the major requirement; however, where a second ancient language is offered, one second-year sequence must be offered for a student to gain credit for the first year. As noted above, an annual list of the courses meeting the requirements for Ancient Studies in any particular year appears separately on the website.

Requirements for the Minors in Classics, Modern Greek, and Ancient Studies

Minor in Greek
The minor in Greek requires five courses in Greek at the 1200 level or above.

Minor in Latin
The minor in Latin requires five courses in Latin at the 1200 level or above.

Minor in Modern Greek
The Minor in Modern Greek requires five courses in Modern Greek at the 1200 level or above. Modern Greek courses are taught entirely at Columbia.

Minor in Ancient Studies
The minor in Ancient Studies requires five courses that focus on the ancient Mediterranean world. At least one course in ancient Mediterranean history is required. Interested students should consult the department and the Classics and Ancient Studies website on selecting a complimentary and coherent set of courses for this minor.

Ancient Studies

ANCS UN3997 Directed Readings In Ancient Studies. 3 points.
Prerequisites: the director of undergraduate studies’ permission. Program of readings in some aspect of ancient studies, supervised by an appropriate faculty member chosen from the departments offering courses in the program in Ancient Studies. Evaluation by a series of essays, one long paper, or oral or written examination(s).
Classics

**CLCV UN3059 WORLDS OF ALEXANDER THE GREAT. 3 points.**
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course looks at the narrative and the historical context for an extraordinary event: the conquest of the Persian empire by Alexander III of Macedonia, conventionally known as “Alexander the Great”. We will explore the different worlds Alexander grew out of, confronted, and affected: the old Greek world, the Persian empire, the ancient Near East (Egypt, Levant, Babylonia, Iran), and the worlds beyond, namely pre-Islamic (and pre-Silk Road) Central Asia, the Afghan borderlands, and the Indus valley. The first part of the course will establish context, before laying out a narrative framework; the second part of the course will explore a series of themes, especially the tension between military conquest, political negotiation, and social interactions. Overall, the course will serve as an exercise in historical methodology (with particular attention to ancient sources and to interpretation), an introduction to the geography and the history of the ancient world (classical and Near Eastern), and the exploration of a complex test case located at the contact point between several worlds, and at a watershed of world history. There will be two weekly lectures and one weekly discussion section.

**CLCV UN3125 Book Histories and the Classics. 3 points.**
Prerequisites: HUMA CC1001 or HUMA GS1001COCI CC1101, HUMA CC1001 or HUMA GS1001 or COCI CC1101

This seminar will introduce students of classical literature to the history of the Western book, and to the relationship between book history and the transmission and reception history of the literature of ancient Greece and Rome. Students will also learn how to make use of rare books materials including manuscripts and early printed books......

**CLCV UN3132 Classical Myth. 3 points.**
BC: Fulfillment of General Education Requirement: Literature (LIT).

Survey of major myths from the ancient Near East to the advent of Christianity, with emphasis upon the content and treatment of myths in classical authors (Homer, Hesiod, Aeschylus, Euripides, Sophocles, Vergil, Livy, Ovid).

**CLCV GU4110 Gender and Sexuality In Ancient Greece. 3 points.**
Prerequisites: sophomore standing or the instructor’s permission. Examination of the ways in which gender and sexuality are constructed in ancient Greek society and represented in literature and art, with attention to scientific theory, ritual practice, and philosophical speculation. Topics include conceptions of the body, erotic and homoerotic literature and practice, legal constraints, pornography, rape, and prostitution.

**CLLT GU4300 The Classical Tradition. 3 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Overview of Greek and Roman literature. Close analysis of selected texts from the major genres accompanied by lectures on literary history. Topics include the context out of which the genres arose, the suitability of various modern critical approaches to the ancient texts, the problem of translation, and the transmission of the classical authors and their influence on modern literature.

Greek

**GREK UN1101 Elementary Greek I. 4 points.**
For students who have never studied Greek. An intensive study of grammar with reading and writing of simple Attic prose.

**GREK UN1102 Elementary Greek II. 4 points.**
Prerequisites: GREK UN1101 or the equivalent, or the instructor or the director of undergraduate studies’ permission.

Continuation of grammar study begun in GREK UN1101; selections from Attic prose.

**GREK UN1121 Intensive Elementary Greek. 4 points.**
Covers all of Greek grammar and syntax in one term. Prepares the student to enter second-year Greek (GREK UN2101 or GREK UN2102).
GREK UN2102 Intermediate Greek II: Homer. **4 points.**
Prerequisites: GREK UN1101 - GREK UN1102 or GREK UN1121 or the equivalent.
Detailed grammatical and literary study of several books of the Iliad and introduction to the techniques or oral poetry, to the Homeric hexameter, and to the historical background of Homer.

GREK UN3309 Selections from Greek Literature. **3 points.**
Since the content of this course changes from year to year, it may be repeated for credit. The topic that will be taught in Fall 2018 is “Plato.”

GREK UN3310 Selections from Greek Literature II. **3 points.**
Prerequisites: GREK UN2101 - GREK UN2102 or the equivalent. Since the content of this course changes from year to year, it may be repeated for credit.

GREK UN3980 The Post-Baccalaureate Seminar. **3 points.**
Open only to students enrolled in the post-baccalaureate certificate program in Classics.

This seminar aims to provide students in the post-baccalaureate certificate program with opportunities 1) to (re-)familiarize themselves with a selection of major texts from classical antiquity, which will be read in English, 2) to become acquainted with scholarship on these texts and with scholarly writing in general, 3) to write analytically about these texts and the interpretations posed about them in contemporary scholarship, and 4) to read in the original language selected passages of one of the texts in small tutorial groups, which will meet every week for an additional hour with members of the faculty.

GREK UN3996 The Major Seminar. **3 points.**
Prerequisites: junior standing.
Required for all majors in classics and classical studies. The topic changes from year to year, but is always broad enough to accommodate students in the languages as well as those in the interdisciplinary major. Past topics include: love, dining, slavery, space, power.

GREK UN3997 Directed Readings. **3 points.**
Prerequisites: the director of undergraduate studies’ permission. A program of reading in Greek literature, to be tested by a series of short papers, one long paper, or an oral or written examination.
LATN UN1102 Elementary Latin II. 4 points.
Prerequisites: LATN UN1101.

LATN UN2101 Intermediate Latin I. 4 points.
Prerequisites: LATN UN1101-UN1102, or LATN UN1121, or the equivalent. Selections from Catullus and from Cicero or Caesar.

LATN UN2102 Intermediate Latin II. 4 points.
Prerequisites: LATN UN2101 or the equivalent. Selections from Ovid’s Metamorphoses and from Sallust, Livy, Seneca, or Pliny.
LATN UN3012 Augustan Poetry. 3 points.
Prerequisites: LATN UN2102 or the equivalent.
Selections from Vergil and Horace. Combines literary analysis with work in grammar and metrics.

LATN UN3033 Medieval Language and Literature. 3 points.
Prerequisites: four semesters of college Latin or the instructor’s permission.
This survey focuses on translation, grammatical analysis, and discussion of the literary and cultural contexts of medieval Latin prose and poetry. It includes widely read texts by major authors (e.g. Augustin, Boethius, Abelard and Heloise, Bernard of Clairvaux, Petrarch) as well as lesser-known anonymous pieces (e.g. love lyric from the Cambridge Songs and the Carmina Burana, poetic satire from a rotulus, and a novel, the Historia Apollonii).

LATN UN3035 Poetry as Neurosis: Lucan’s Bellum Civile. 3 points.
This course is an intensive study of Lucan’s revolutionary and enigmatic Bellum Civile, the epic masterpiece of the Neronian age, which was admired and imitated all through the history of Western culture by authors such as Dante, Montaigne, Milton, Voltaire, Goethe, Shelley, and Baudelaire among others. The course will examine major controversies concerning the form and meaning of the poem, with special emphasis on the poetic tension created by the narrator’s neurotic personality. The narration of the 49 BCE civil war between Caesar and Pompey is for Lucan the pretext for an original and intensely personal reflection on themes such as political oppression, the role of the individual in society, nihilism, self-destructiveness, mental disorder, and artistic creation. The poem will be analyzed from various critical perspectives that include rhetoric, intertextuality, deconstruction, reception theory, and psychoanalysis; no previous knowledge of any of these methodologies is required. Although an acceptable knowledge of Latin (intermediate or above) is assumed, the required reading assignments will be read entirely in English translation, allowing students to comprehend the whole while they engage with particular sections in the original language. The assignment for each class will include: (1) approximately five hundred lines to be read in English translation; (2) translation of short Latin passages, whose size may be adapted to the level of the class/student; (3) secondary readings.

LATN UN3309 LATIN LITERATURE SELECTIONS. 3 points.

Latin literature from the beginning to early Augustan times.

LATN 4106 Latin Literature of the Empire. 4 points.
Prerequisites: at least two terms of Latin at the 3000-level or higher.
Latin literature from Augustus to 600 C.E.
All students are required to take the following Twelve (12) courses ([link](https://complit.barnard.edu/sites/default/files/cpls_major.pdf)):

- CPLT BC3001 Introduction to Comparative Literature
- One (1) course in CPLT BC3143 Topics in Comparative Literature: Literature & Action
- Six (6) Courses = Three (3) courses in each of TWO distinct literary traditions studied in the original language
- Three (3) elective courses in literature, of which:
  - One (1) pre-modern
  - One (1) literary theory
  - One (1) open choice
- CPLT BC3997 Senior Seminar

*Students who wish to major in Comparative Literature, but who for valid reasons wish to pursue a program at variance with the above model, should consult the director.*

**Important note about studying abroad**

If you plan on spending part or all of junior year abroad, plan to take the CPLT BC3001 Introduction to Comparative Literature during the second semester of your sophomore year. This means contacting the director of Comparative Literature program during the first semester of your sophomore year. Indicate that you plan to be abroad one or both semesters during junior year and discuss when to take core courses.

If you plan to be away for the entire junior year, discuss with the program director which other courses can count toward the major when studying abroad. You should also plan to identify advisors before your departure so that you can contact them via e-mail and meet with them at the beginning of your senior year.

If you have further questions regarding the thesis process and its parts, please contact the Program Director (pconnor@barnard.edu).

**Requirements for the Minor in Translation Studies**

The Minor in Translation Studies allows students to explore the history and theory of translation practices, to consider the importance of translation in today’s world, and to complete a substantial translation or translation-related project.

The Minor in Translation Studies will not qualify students to work professionally as translators or interpreters upon graduation. The courses on a transcript that count toward the Minor will demonstrate professionally as translators or interpreters upon graduation. The Minor in Translation Studies will not qualify students to work professionally as translators or interpreters upon graduation.

Six (6) courses are required for the minor:

1. **CPLT BC3110 Introduction to Translation Studies**
2. Two or three elective courses dealing with the history and/or theory of translation, or with language from an anthropological, philosophical, psychological, social or cultural perspective. Example courses:
   - AFRS BC3563 Translating Hispaniola
   - ANTH UN1009 Introduction to Language and Culture
   - CPLS BC3170 Translating Madness: The Sciences and Fictions of Pathology
   - CPLT BC3200 The Visual and Verbal Arts
   - FREN BC3079 History of the French Language
   - FREN BC3063 Structuralism and Post-Structuralism
   - PHIL UN3685 Philosophy of Language
   - PSYC BC3164 Perception and Language
   - THTR UN3154 Theatre Traditions in a Global Context
   - THTR UN3167 Dramaturgy

3. One or two language-based courses at the advanced level offering practice in written or oral translation.
   - For example, a student working with French:
     - FREN BC3007 Commercial-Economic French
     - FREN BC3014 Advanced Translation into English
     - FREN BC3054 Translation Through Film
   - For example, a student working with Spanish:
     - SPAN BC3376 Rethinking Spanish Translation
     - SPAN UN3265 Latin American Literature in Translation

4. **CPLS BC3510 Advanced Workshop in Translation**

*Note:* the particular courses qualifying for the minor will vary according to the language chosen by the candidate.

With permission of the director of the minor, a student may request credit for an Independent Study involving substantial translation or interpreting work.

- **CPLT BC3000 Global Long-Form Photography: History and Memory. 4 points.**

In a time where almost everyone has a camera phone to capture the present, photographic artists are increasingly pointing their practice towards history and memory to give insight into the past. In weekly seminars, we will look at how contemporary global photographers are challenging national narratives and rewriting history. We will engage in the question of how photography, arguably the artistic medium most tied to the present, has been used to explore that which is no longer there. We will look at how photographers from Asia, Africa, Latin America and Middle East have used their contemporary practice to address issues of collective memory as it pertains to dictatorship,
state sponsored violence, and contested history. We will investigate
how artists from the world over have employed photographic
practices to explore the inherited legacies and injustices of previous
generations. And we will look at how artists have used re-enactment,
commemoration, re-imagining, and inclusive archive to explore history
and memory within the visual realm.

Over the course of the term, students will develop and deliver an in-
depth photographic essay on a subject of their choice that has been
approved by the instructor. We will explore subject matter, editing
and ways in which testimony and archive can be used to give a more
textual reading to long form photography.

We will study photography as an epistemology in and of itself – that
is we will look at long-form photography by the study and critique of
photographic essays and photographic monographs. Critically we
will be looking beyond the North American photographic canon to
view the works of global image-makers. Some of the photographers
whose in-depth work we will be exploring are: An My Le; Lu Guang;
Paula Lutteringer; Ori Gherst; Rula Halawani; Luis Gonzalez Palma; Jo
Ractcliffe; Shoemi Tomatsu; Fazal Sheikh; Sophie Ristelheber; Walid
Radd; Kikuje Kawada, Joshua Lutz; René Effendi and many others.
Viewings of their works will be augmented by weekly critical readings
in photography and memory. Students will discuss the photographic
essays viewed in class and critical readings in weekly seminars as well as
participate in weekly critiques of each other's works.

Explores the imagery of eating, drinking, spitting, choking, sucking (and
other unmentionables) in relation to insults and excessive behaviors.
Readings from Greek poetry (e.g., Homer, Aristophanes) to modern
toory (e.g., Kristeva, Powers of Horror, Bakhtin, Rabelais and His World),
including modern novels and films.

CPLT BC3123 Friend or Foe? World Literature and the Question of
Justice. 3 points.
With an emphasis on equality and social justice, this course examines and
compares significant 19th c./20th c. literary approaches to
friendship as intermediary between individualism and communal life.
Discussion of culturally formed concepts and attitudes in modern or
postcolonial settings. Reading of Dickens, Hesse, Woolf, Ocampo, Puig,
Fugard, Emerson, Derrida, Rawils.

CPLT BC3124 Utopian Literature. 3 points.
Oscar Wilde wrote that "a map of the world that does not include
Utopia is not even worth glancing at." This course reads the concept from
Christopher Columbus and Thomas More to the advent of modern
socialism. Readings by Campanella, Cavendish, Engels, Bellamy,
Gilman, and Portal.

CPLT BC3140 Europe Imagined: Images of the New Europe in 20th-
Century Literature. 3 points.
Prerequisites: Permission of the instructor.
Compares the diverse images of Europe in 20th-century literature,
with an emphasis on the forces of integration and division that shape
cultural identity in the areas of travel writings and transculturation/
cosmopolitanism; mnemonic narratives and constructions of the past;
borderland stories and the cultural politics of translation. Readings
include M. Kundera, S. Rushdie, H. Boell, C. Toibin and others.

CPLT BC3142 The Spanish Civil War in Literature and the Visual Arts. 3 points.
Not offered during 2019-20 academic year.

The Spanish Civil War (1936-39), which culminated with the beginning
of Francisco Franco’s long dictatorship, foreshadowed the WWII
European conflict. It generated unprecedented foreign involvement, as
well texts and images by artists from both within and outside Spain -
from film (documentary and fictional), through painting (Picasso), to
narrative and nonfiction.

CPLT BC3143 Topics in Comparative Literature: Literature & Action. 3 points.
Spring 2020: CPLT BC3143

CPLT BC3144 Stories and Storytelling: Introduction to Narrative. 3 points.
An introduction to narrative through texts that themselves foreground
acts of storytelling and thus teach us how to read them. Readings
range across periods and cultures - from fifth-century BCE Athens
to late twentieth-century Brazil - and include short stories, novellas,
novels, a ballad, film and a psychoanalytic case history. Texts by Conan
Doyle, Sophocles, Melville, Hitchcock, Augustine, Coleridge, Freud,

in this section we will read a full-length text – so that we can trace Derrida's train of thought from beginning to end. In Part 3 we will use an interview conducted by Derek Attridge, “This Strange Institution Called Literature,” as a template for thinking about Derrida's relation to literature, and in Part 4 we will read our second full-length text by Derrida, namely Given Time 1: Counterfeit Money, an in-depth analysis of a prose poem by the French poet Charles Baudelaire. Part 5 considers an aspect of Derrida's work that reveals the extent of his embrace of provisional, in-between positions for thought in general, and for literary texts in particular, namely translation. For deconstruction is keenly invested in words beginning with 'trans': transposition, transplant, trans-valuation, and indeed trans-gender. Translation provides Derrida with a scenario whereby crossings and transits can be imagined – for literary texts, and for identities that wish to remain un-determined by fixed poles or normative values. The course finishes with an assessment of Derrida's reflections on death, mourning, and the matter of leaving a legacy. In Part 6, we therefore read more of the essay “Living On,” and also Derrida's final interview, “Learning to Live, Finally.” Not even Derrida could deconstruct away the finality of death, but he did hope to live on. My corresponding hope is that you will feel sufficiently attuned to Derrida's thought that you consider it important to continue his legacy – to be one of the agents of his living on, survival or survie, a translator and transporter of his thought towards contexts that he could not have foreseen, but which he would doubtless have welcomed as a precious chance for his own work to be considered differently. Taking intellectual risks, thinking otherwise, and inventing new ways of knowing are, after all, the hallmarks of Derridean deconstruction.
to the strangeness of the body and the world? How is the literary text shaped by distinct aesthetic patterns? What kind of taboo subjects or problematic and ambiguous aspects of power dynamics in modern societies can be addressed by presenting humans and animals as grotesque figures? Our critical discussions of outstanding examples of are based on readings of major scholarly contributions to the field, in particular the studies of internationally recognized intellectuals such as M. Bakhtin, T. Todorov, J. Kristeva, and W. Kayser. You will be introduced to various historical types of the grotesque, ranging from the ornate and bombastic representations in Renaissance literature to the fantastic deformations and hybrid creatures in contemporary literature. The reading material is representative of different cultures, languages and literatures so that we can conceptualize the grotesque from a critical and comparative perspective. Ultimately, the grotesque is seen as a complicated product of social, political, and cultural conditions rather than merely a formal element of a literary discourse. The representation of “grotesque” settings as well as the formation of “grotesque” identities will be examined by considering aspects such as gender, class, race and ethnicity.

CPLT BC3200 The Visual and Verbal Arts. 3 points.
Analysis and discussion of the relation of literature to painting, photography, and film. Emphasis on artistic and literary concepts concerning the visual dimension of narrative and poetic texts from Homer to Burroughs. Explores the role of description, illustration, and montage in realist and modern literature.

CPLT BC3350 IN OTHER WORDS: WORLD POETRY & COSMOPOLITANISM. 3 points.
What is “world poetry”? This course will try to give an answer to this vexing question. You are being introduced to a number of influential poets who have entered a dialogue about what it means to write, read, translate and appreciate poetry in a global context. The impact of globalization is most visible in a number of anthologies which made considerable efforts to move beyond the existing range of national representatives and to make an English-speaking audience familiar with the names and works of poets who are bilingual or who write in their native language. Throughout the semester, we will read English translations of these poems (but feel free to read the original if you know the language). Secondly, the global context is of great importance for understanding each poet’s vision of the world since poets are involved in processes of “world-making” as well as reacting to the world’s past and present. s the semester progresses you will see that the poets are part of a larger conversation; some themes, forms and issues we discovered at the beginning will return in the middle or toward the end of the term. The selection of poets is based on considerations of gender, race, age and religious affiliation; many of the poets whose works we are going to discuss are iconic figures; in studying other cases, you will be exposed to new voices (for example, young South African poets) whose significance will emerge in a critical discussion of the anthologists’ rationale and criteria for selecting poets and marginalizing others.

A deep immersion in the theory and practice of translation with a focus on translating into English. The first half of the course is devoted to discussing readings in the history of translation theory while translating brief practical exercises; in the second half, translation projects are submitted to the class for critical discussion. The foreign texts for these projects, chosen in consultation with the instructor, will be humanistic, not only literature as conventionally defined (prose fiction and poetry, memoir and travel writing), but also the gamut of text types in the human sciences, including philosophy, history, and ethnography. The aim is not just to translate, but to think deeply about translating, to develop writing practices by drawing on the resources of theory, past and present, and by examining translations written by professionals. The workshop will be offered in two sections by Professor Peter Connor and Professor Emily Sun. The sections will share most of the common readings in the history of translation theory, but Professor Sun’s section will emphasize issues specific to translating East Asia. Enrollment in each workshop is limited to 12 students. CPLT BC3110 is a recommended prerequisite, plus, normally, two advanced courses beyond the language requirement in the language from which you intend to translate. Preference will be given to seniors and to comparative literature majors.

CPLT BC3551 The Arabian Nights and Its Influences. 4 points.
Prerequisites: Completion of one college-level literature course. Permission of instructor.
This course examines the enduring power of The Arabian Nights and some of the wide range of literary authors, genres and variations that it has influenced. The focus is, therefore, on this marvelous work—one of the earliest examples of the short story and the novel—but also on a selection of classical and contemporary works of fiction from around the world that have been informed by it. In this regard, this is a class interested in literary influence, reciprocity and exchange across time and languages.

CPLT BC3630 Theatre and Democracy. 4 points.
How does theatre promote democracy, and vice versa: how do concepts and modes of theatre prevent the spectators from assuming civic positions both within and outside a theatrical performance? This class explores both the promotion and the denial of democratic discourse in the practices of dramatic writing and theatrical performance.

CPLT BC3675 Mad Love. 3 points.
Not offered during 2019-20 academic year.
The history of irrational love as embodied in literary and non-literary texts throughout the Western tradition. Readings include the Bible, Greek, Roman, Medieval, and modern texts.

CPLT BC3899 Dada and Surrealism. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: NONE
This course focuses on two twentieth-century avant-garde art movements, Dada and Surrealism, that developed in response to the horrors of World War I, and that investigated the revolutionary potential of artistic experimentation. Both movements drew artists from many different national backgrounds (German, French, Belgian, British, Swiss, Spanish, Latin American, North American). These individuals worked in a wide range of media (fiction, poetry, painting, sculpture, drawing, photography, film) and pioneered several new or hybrid forms (automatic writing, chance collages, exquisite cadavers, found objects, ready-mades, solarizations, woven textiles). Studying works from all these categories, students will explore: the avant-garde critique of high culture; the reconceptualization of literary and artistic forms and practices; the politics of sexuality and gender; and the role and work of female artists too frequently excluded from the canon of Dada and Surrealist studies.

CPLT BC3950 Literary Theory. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 18. Examination of concepts and assumptions present in contemporary views of literature. Theory of meaning and interpretation (hermeneutics); questions of genre (with discussion of representative examples); a critical analysis of formalist, psychoanalytic, structuralist, post-structuralist, Marxist, and feminist approaches to literature.

CPLT BC3997 Senior Seminar. 4 points.
Designed for students writing a senior thesis and doing advanced research on two central literary fields in the student’s major. The course of study and reading material will be determined by the instructor(s) in consultation with student(s).

CPLT BC3999 Independent Research. 4 points.
Independent research, primarily for the senior essay, directed by a chosen faculty adviser and with the chair’s permission. The senior seminar for majors writing senior essays will be taught in the Spring term.

CPLT BC4152 Politics of Performance. 4 points.
Not offered during 2019-20 academic year.

CPLT BC4161 Tragic Bodies II: Surfaces, Materialities, Enactments. 4 points.

This is an upper-level seminar with quite a lot of reading and semester-long development of a substantial project

Prerequisites: CPLS BC3160 Tragic Bodies I, or permission of instructor.

This course is conceived as an advanced seminar (i.e., upper-level undergraduate and graduate) that addresses in more depth the themes of my lecture course Tragic Bodies (BC3160). It explores how dramatic enactment represents bodily boundaries and edges and thus skin, coverings, maskings, and dress-up in relation to gender, sexuality, race, and status / class. The course will focus on these edges and surfaces, as well as proximities, touching, and affect in ancient and modern drama (and occasionally film). The course treats the three ancient tragedians (Aeschylus, Sophocles, and Euripides) as unifying threads and centers on politically and aesthetically challenging re-envisionings of their plays.

Computer Science

Departmental Office: 450 Computer Science Building; 212-939-7000
http://www.cs.columbia.edu/

Director of Undergraduate Studies: Dr. Jae Woo Lee, 715 CEPSR; 212-939-7066; jae@cs.columbia.edu

The majors in the Department of Computer Science provide students with the appropriate computer science background necessary for graduate study or a professional career. Computers impact nearly all areas of human endeavor. Therefore, the department also offers courses for students who do not plan a computer science major or concentration. The computer science majors offer maximum flexibility by providing students with a range of options for program specialization. The department offers four majors: computer science; information science; data science; and computer science-mathematics, offered jointly with the Mathematics Department.

Computer Science Major

Students study a common core of fundamental topics, supplemented by a track that identifies specific areas for deeper study. The foundations track prepares students for advanced work in fundamental, theoretical, and mathematical aspects of computing, including analysis of algorithms, scientific computing, and security.

The systems track prepares students for immediate employment in the computer industry as well as advanced study in software engineering, operating systems, computer-aided digital design, computer architecture, programming languages, and user interfaces. The intelligent systems track provides specialization for the student interested in natural language processing and systems capable of exhibiting “human-like” intelligence. The applications track is for students interested in the implementation of interactive multimedia content for the Internet and wireless applications. The vision, graphics, interaction, and robotics track exposes students to computer vision, graphics, human-computer interaction, and robotics.

A combination track is available to students who wish to pursue an interdisciplinary course of study combining computer science and another field in the arts, humanities, mathematics, natural sciences, or social sciences. A student planning a combination track should be aware that one additional course is required to complete this option.

Advanced Placement

The department grants 3 points for a score of 4 or 5 on the AP Computer Science exam along with exemption from COMS W1004 Introduction to Computer Science and Programming in Java. However, we still recommend that you take COMS W1004 or W1007 even if you have credits from the CS AP exam. COMS W1007 Honors Introduction to Computer Science is recommended if you scored 5 on the AP exam, and COMS W1004 is recommended if you scored 4.

Pre-Introductory Courses

COMS W1004 is the first course in the Computer Science major curriculum, and it does not require any previous computing experience.
Before taking COMS W1004, however, students have an option to start with one of the pre-introductory courses: ENGI E1006 or COMS W1002.

ENGI E1006 Introduction to Computing for Engineers and Applied Scientist is a general introduction to computing for STEM students. ENGI E1006 is in fact a required course for all engineering students. COMS W1002 Computing In Context is a course primarily intended for humanities majors, but it also serves as a pre-introductory course for CS majors. ENGI E1006 and COMS W1002 do not count towards Computer Science major.

Laboratory Facilities
The department has well-equipped lab areas for research in computer graphics, computer-aided digital design, computer vision, databases and digital libraries, data mining and knowledge discovery, distributed systems, mobile and wearable computing, natural language processing, networking, operating systems, programming systems, robotics, user interfaces, and real-time multimedia.

Research labs contain several large Linux and Solaris clusters; Puma 500 and IBM robotic arms; a UTAH-MIT dexterous hand; an Adept-1 robot; three mobile research robots; a real-time defocus range sensor; interactive 3-D graphics workstations with 3-D position and orientation trackers; prototype wearable computers, wall-sized stereo projection systems; see-through head-mounted displays; a networking testbed with three Cisco 7500 backbone routers, traffic generators; an IDS testbed with secured LAN, Cisco routers, EMC storage, and Linux servers; and a simulation testbed with several Sun servers and Cisco Catalyst routers. The department uses a SIP IP phone system. The protocol was developed in the department.

The department’s computers are connected via a switched 1Gb/s Ethernet network, which has direct connectivity to the campus OC-3 Internet and internet 2 gateways. The campus has 802.11b/g wireless LAN coverage.

The research facility is supported by a full-time staff of professional system administrators and programmers.

Guidelines for all Computer Science Majors and Minors

Courses
Students may receive credit for only one of the following two courses:

- COMS W1004 Introduction to Computer Science and Programming in Java
- COMS W1005 Introduction to Computer Science and Programming in MATLAB.

Students may receive credit for only one of the following three courses:

- COMS W3134 Data Structures in Java
- COMS W3136 Data Structures with C/C++
- COMS W3137 Honors Data Structures and Algorithms

However, COMS W1005 and COMS W3136 cannot be counted towards the Computer Science major, minor, and concentration.

Transfer Credit
As a rule, no more than 12 transfer credits are accepted toward the major.

Grading
Courses in which the student receives the grade of D may not be counted toward the major requirement or the minor option.

Major in Computer Science

Please read Guidelines for all Computer Science Majors and Minors above.

All majors should confer with their program adviser each term to plan their programs of study. Students considering a major in computer science are encouraged to talk to a program adviser during their first or second year. A typical program of study is as follows:

In addition to the CS Core (22-24 points), all CS majors must complete the Calculus Requirement (3 points) and a Track Requirement (15 or 18 points). The CS major therefore requires 40-45 points total.

Mathematics (3 points)

Calculus II or Calculus III.

Note that Calculus III does NOT depend on Calculus II. You can take either Calculus II or III, but we recommend Calculus III, which covers topics that are a bit more relevant for upper-level Computer Science courses.

If you have received equivalent credits for Calculus I & II already (through a 4 or 5 on the AP Calculus exam for example), you are not required to take any more Calculus courses. But we recommend taking one more semester of Calculus, either Math UN1201 Calculus III or APAM E2000 Multivariate Calculus for Engineers and Scientists. APAM E2000 covers relevant topics from Calculus III and IV.

Track Requirement (15 or 18 points)

Students must select one of the following six upper-level tracks. Each track, except the combination track, requires five courses consisting of required, elective breadth, and elective track courses. The combination track requires a selection of six advanced courses: three 3000- or 4000-level computer science courses and three 3000- or 4000-level courses from another field. The elective breadth requirement in each track can be fulfilled with any 3-point computer science 3000-level or higher course that is not a computer science core course or a technical
elective course in that track. In addition to the breadth elective, the track requirements are as follows:

**Foundations Track (15 points)**
For students interested in algorithms, computational complexity, and other areas of theoretical Computer Science.

Note: Students who declared their Computer Science major prior to Fall 2016 may also count COMS 4241, COMS 4205, COMS 4281, COMS 4444, COMS 4771, and COMS 4772 as track elective courses.

**Required Courses**
- CSOR W4231 Analysis of Algorithms I
- COMS W4236 Introduction to Computational Complexity

**Track Electives**
Select 2 from:
- MATH UN3020 Number Theory and Cryptography
- MATH UN3025 Making, Breaking Codes
- COMS W4203 Graph Theory
- MATH GU4041 Introduction to Modern Algebra I
- MATH GU4042 Introduction to Modern Algebra II
- MATH GU4155 Introduction To Modern Analysis I

One Breadth Course
Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Vision, Graphics, Interaction, and Robotics Track (15 points)
For students in the vision, interaction, graphics, and robotics track. It focuses on visual information with topics in vision, graphics, human-computer interaction, robotics, modeling, and learning. Students learn about fundamental ways in which visual information is captured, manipulated, and experienced.

Required Courses
Select two of the following courses:
- COMS W4160 Computer Graphics

One Breadth Course
Any 3-point COMS 3000- or 4000-level course except those courses in the CS core or in the required or elective courses for this track

Combination Track (18 points)
For students who wish to combine computer science with another discipline in the arts, humanities, social or natural sciences. A coherent selection of six upper-level courses is required: three from computer science and three from another discipline.

The courses should be planned with and approved by the student’s CS faculty advisor by the first semester of the junior year. The six courses are typically 4000-level elective courses that would count towards the individual majors. Moreover, the six courses should have a common theme. The combination track is not intended for those students who pursue double majors.

Major in Computer Science—Mathematics
For a description of the joint major in mathematics—computer science, see the Mathematics (p. 333) section in this catalog.

Minor in Computer Science
Please read Guidelines for all Computer Science Majors and Minors above.

For students who declare in Spring 2014 and beyond:
The minor in computer science requires a minimum of 22-24 points, as follows:

- COMS W1004 Introduction to Computer Science and Programming in Java
- or COMS W1007 Honors Introduction to Computer Science
- COMS W3203 Discrete Mathematics: Introduction to Combinatorics and Graph Theory
- COMS W3134 Data Structures in Java
- or COMS W3137 Honors Data Structures and Algorithms
- COMS W3157 Advanced Programming
- COMS W3261 Computer Science Theory
- CSEE W3827 Fundamentals of Computer Systems (or any 3 point 4000-level computer science course)

Select one of the following courses:
- MATH UN2010 Linear Algebra
- APMA E2101 Introduction to Applied Mathematics
- APMA E3101 Linear Algebra
- MATH V2020 Honors Linear Algebra
- STAT GU4001 Introduction to Probability and Statistics
- SIEO W3600

For students who declared prior to Spring 2014:
The minor requires a minimum of 23 points, as follows:

- COMS W1004 Introduction to Computer Science and Programming in Java
- COMS W1007 Honors Introduction to Computer Science
- COMS W3157 Advanced Programming
- COMS W3261 Computer Science Theory
- CSEE W3827 Fundamentals of Computer Systems (or any 3 point 4000-level computer science course)

Computer Science
COMS W1001 Introduction to Information Science. 3 points. Lect: 3.

Basic introduction to concepts and skills in Information Sciences: human-computer interfaces, representing information digitally, organizing and searching information on the internet, principles of algorithmic problem solving, introduction to database concepts, and introduction to programming in Python.
COMS W1002 Computing in Context. 4 points.
CC/GS: Partial Fulfillment of Science Requirement

Introduction to elementary computing concepts and Python programming with domain-specific applications. Shared CS concepts and Python programming lectures with track-specific sections. Track themes will vary but may include computing for the social sciences, computing for economics and finance, digital humanities, and more. Intended for nonmajors. Students may only receive credit for one of ENGI E1006 or COMS W1002.

COMS W1004 Introduction to Computer Science and Programming in Java. 3 points.
Lect: 3.

A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: 1004 or 1005.

COMS W1005 Introduction to Computer Science and Programming in MATLAB. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

A general introduction to computer science concepts, algorithmic problem-solving capabilities, and programming skills in MATLAB. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: W1004 or W1005.

COMS W1007 Honors Introduction to Computer Science. 3 points.
Lect: 3.

Prerequisites: AP Computer Science with a grade of 4 or 5 or similar experience.

An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.

COMS W1404 Emerging Scholars Program Seminar. 1 point.
Pass/Fail only.

Prerequisites: the instructor’s permission. Corequisites: COMS W1002 or COMS W1004 or COMS W1007

COMS W3101 Programming Languages. 1 point.
Lect: 1.

Prerequisites: Fluency in at least one programming language. Introduction to a programming language. Each section is devoted to a specific language. Intended only for those who are already fluent in at least one programming language. Sections may meet for one hour per week for the whole term, for three hours per week for the first third of the term, or for two hours per week for the first six weeks. May be repeated for credit if different languages are involved.

COMS W3102 Development Technologies. 1-2 points.

Prerequisites: Fluency in at least one programming language. Introduction to software development tools and environments. Each section devoted to a specific tool or environment. One-point sections meet for two hours each week for half a semester, and two point sections include an additional two-hour lab.
COMS W3134 Data Structures in Java. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W1004) or knowledge of Java.
Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, COMS W3136, COMS W3137.

COMS W3136 Data Structures with C/C++. 4 points.
Prerequisites: (COMS W1004) or (COMS W1005) or (COMS W1007) or (ENGI E1006)
A second programming course intended for nonmajors with at least one semester of introductory programming experience. Basic elements of programming in C and C++, array-based data structures, heaps, linked lists, C programming in UNIX environment, object-oriented programming in C++, trees, graphs, generic programming, hash tables. Due to significant overlap, students may only receive credit for either COMS W3134, W3136, or W3137.

COMS W3137 Honors Data Structures and Algorithms. 4 points.
Prerequisites: (COMS W1004) or (COMS W1007)
Corequisites: COMS W3203
An honors introduction to data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Design and analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, W3136, or W3137.

COMS W3902 Undergraduate Thesis. 1-6 points.
Prerequisites: Agreement by a faculty member to serve as thesis adviser.
An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment.

COMS W3995 Special Topics in Computer Science. 3 points.
Prerequisites: the instructor's permission.
Consult the department for section assignment. Special topics arranged as the need and availability arise. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit.

COMS W3998 Undergraduate Projects in Computer Science. 1-3 points.
Prerequisites: Approval by a faculty member who agrees to supervise the work.
Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

COMS E3999 Fieldwork. 1 point.
Prerequisites: Obtained internship and approval from faculty advisor. May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off-campus work experience as part of their approved program of study. Final report and letter of evaluation required. May not be used as a technical elective. May not be taken for pass/fail credit or audited.

COMS W4111 Introduction to Databases. 3 points.
Lect: 3.
Prerequisites: (COMS W3134) or (COMS W3137) or (COMS W3136) and fluency in Java; or the instructor's permission.
The fundamentals of database design and application development using databases: entity-relationship modeling, logical design of relational databases, relational data definition and manipulation languages, SQL, XML, query processing, physical database tuning, transaction processing, security. Programming projects are required.

COMS W4112 Database System Implementation. 3 points.
Lect: 2.5.
Prerequisites: (COMS W4111) and fluency in Java or C++. CSEE W3827 is recommended.
The principles and practice of building large-scale database management systems. Storage methods and indexing, query processing and optimization, materialized views, transaction processing and recovery, object-relational databases, parallel and distributed databases, performance considerations. Programming projects are required.

COMS W4113 Fundamentals of Large-Scale Distributed Systems. 3 points.
Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119)
Design and implementation of large-scale distributed and cloud systems. Teaches abstractions, design and implementation techniques that enable the building of fast, scalable, fault-tolerant distributed systems. Topics include distributed communication models (e.g., sockets, remote procedure calls, distributed shared memory), distributed synchronization (clock synchronization, logical clocks, distributed mutex), distributed file systems, replication, consistency models, fault tolerance, distributed transactions, agreement and commitment, Paxos-based consensus, MapReduce infrastructures, scalable distributed databases. Combines concepts and algorithms with descriptions of real-world implementations at Google, Facebook, Yahoo, Microsoft, LinkedIn, etc.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (CSEE W3827) or equivalent, or the instructor's permission.

Modern programming languages and compiler design. Imperative, object-oriented, declarative, functional, and scripting languages. Language syntax, control structures, data types, procedures and parameters, binding, scope, run-time organization, and exception handling. Implementation of language translation tools including compilers and interpreters. Lexical, syntactic and semantic analysis; code generation; introduction to code optimization. Teams implement a language and its compiler.

Prerequisites: background in Computer System Organization and good working knowledge of C/C++

Corequisites: CSOR W4246, STAT GU4203

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers.

Prerequisites: (COMS W3134 or COMS W3137 or COMS W3136 and experience in Java) and basic understanding of analysis of algorithms.

An introduction to parallel software design. Topics include task and data decomposition, load-balancing, reasoning about correctness, determinacy, safety, and deadlock-freedom. Application of techniques through semester-long design project implementing performant, parallel application in a modern parallel programming language.

Prerequisites: (COMS W3134 or COMS W3137 or COMS W3136 and experience in Java) and basic understanding of analysis of algorithms. Principles of parallel software design. Topics include task and data decomposition, load-balancing, reasoning about correctness, determinacy, safety, and deadlock-freedom. Application of techniques through semester-long design project implementing performant, parallel application in a modern parallel programming language.

Application of techniques through semester-long design project implementing performant, parallel application in a modern parallel programming language.

Lect.: 3.

Prerequisites: (COMS W3135) or equivalent.

Software lifecycle using frameworks, libraries and services. Major emphasis on software testing. Centers on a team project.

Prerequisites: (CSEE W3827) and knowledge of C and programming tools as covered in COMS W3136, W3157, or W3101, or the instructor's permission.

Design and implementation of operating systems. Topics include process management, process synchronization and interprocess communication, memory management, virtual memory, interrupt handling, processor scheduling, device management, I/O, and file systems. Case study of the UNIX operating system. A programming project is required.
COMS W4160 Computer Graphics. 3 points.
Lect: 3.
Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137)  
COMS W4156 is recommended. Strong programming background and  
some mathematical familiarity including linear algebra is required.  
Introduction to computer graphics. Topics include 3D viewing and  
projections, geometric modeling with spline curves, graphics systems  
such as OpenGL, lighting and shading, and global illumination.  
Significant implementation is required: the final project involves writing  
an interactive 3D video game in OpenGL.

COMS W4162 Advanced Computer Graphics. 3 points.
Lect: 3.
Prerequisites: (COMS W4160) or equivalent, or the instructor’s  
permission.  
A second course in computer graphics covering more advanced topics  
including image and signal processing, geometric modeling with  
meshes, advanced image synthesis including ray tracing and global  
illumination, and other topics as time permits. Emphasis will be placed  
both on implementation of systems and important mathematical and  
geometric concepts such as Fourier analysis, mesh algorithms and  
subdivision, and Monte Carlo sampling for rendering. Note: Course will  
be taught every two years.  

COMS W4167 Computer Animation. 3 points.
Lect: 3.
Prerequisites: Multivariable calculus, linear algebra, C++ programming  
proficiency. COMS W4156 recommended.  
Theory and practice of physics-based animation algorithms, including  
animated clothing, hair, smoke, water, collisions, impact, and kitchen  
sinks. Topics covered: Integration of ordinary differential equations,  
formulation of physical models, treatment of discontinuities including  
collisions/contact, animation control, constrained Lagrangian  
Mechanics, friction/dissipation, continuum mechanics, finite elements,  
rigid bodies, thin shells, discretization of Navier-Stokes equations.  
General education requirement: quantitative and deductive reasoning  
(QUA).

COMS W4170 User Interface Design. 3 points.
CC/GS: Partial Fulfillment of Science Requirement
Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137)  
Introduction to the theory and practice of computer user interface  
design, emphasizing the software design of graphical user interfaces.  
Topics include basic interaction devices and techniques, human  
factors, interaction styles, dialogue design, and software infrastructure.  
Design and programming projects are required.  

COMS W4172 3D User Interfaces and Augmented Reality. 3 points.  
CC/GS: Partial Fulfillment of Science Requirement
Prerequisites: (COMS W4160) or (COMS W4170) or the instructor’s  
permission.  
Design, development, and evaluation of 3D user interfaces. Interaction  
techniques and metaphors, from desktop to immersive. Selection  
and manipulation. Travel and navigation. Symbolic, menu, gestural,  
and multimodal interaction. Dialogue design. 3D software support.  
3D interaction devices and displays. Virtual and augmented reality.  
Tangible user interfaces. Review of relevant 3D math.  

COMS W4180 Network Security. 3 points.
Lect: 3.
Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and  
(CSEE W4119) or instructor’s permission.  
Introduction to network security concepts and mechanisms.  
Foundations of network security and an in-depth review of commonly- 
used security mechanisms and techniques, security threats and  
network-based attacks, applications of cryptography, authentication,  
access control, intrusion detection and response, security protocols  
(IPsec, SSL, Kerberos), denial of service, viruses and worms, software  
vulnerabilities, web security, wireless security, and privacy. Note: May  
not earn credit for both W4180 and W4181.

COMS W4181 Security I. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: COMS W3157 or equivalent.  
Introduction to security. Threat models. Operating system security  
features. Vulnerabilities and tools. Firewalls, virtual private networks,  
viruses. Mobile and app security. Usable security.

COMS W4182 Security II. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: COMS W4181, COMS W4118, COMS W4119  
Advanced security. Centralized, distributed, and cloud system security.  
Cryptographic protocol design choices. Hardware and software

**COMS W4186 Malware Analysis and Reverse Engineering. 3 points. Not offered during 2019-20 academic year.**

Prerequisites: COMS W3157 or equivalent. COMS W3827 Hands-on analysis of malware. How hackers package and hide malware and viruses to evade analysis. Disassemblers, debuggers, and other tools for reverse engineering. Deep study of Windows Internals and x86 assembly.

**COMS W4187 Security Architecture and Engineering. 3 points.**

Lect: 3.

Prerequisites: (COMS W4118) COMS W4180 and/or CSEE W4119 recommended.

Secure programming. Cryptographic engineering and key handling. Access controls. Tradeoffs in security design. Design for security. Note: May not earn credit for both W4187 and W4182.

**COMS W4203 Graph Theory. 3 points.**

Lect: 3.

Prerequisites: (COMS W3203) General introduction to graph theory. Isomorphism testing, algebraic specification, symmetries, spanning trees, traversability, planarity, drawings on higher-order surfaces, colorings, extremal graphs, random graphs, graphical measurement, directed graphs, Burnside-Polya counting, voltage graph theory.

**COMS W4205 Combinatorial Theory. 3 points.**

Prerequisites: (COMS W3203) and course in calculus. Sequences and recursions, calculus of finite differences and sums, elementary number theory, permutation group structures, binomial coefficients, Stirling numbers, harmonic numbers, generating functions.

**COMS W4236 Introduction to Computational Complexity. 3 points.**

Lect: 3.

Prerequisites: (COMS W3251) Develops a quantitative theory of the computational difficulty of problems in terms of the resources (e.g. time, space) needed to solve them. Classification of problems into complexity classes, reductions, and completeness. Power and limitations of different modes of computation such as nondeterminism, randomization, interaction, and parallelism.
COMS W4419 Internet Technology, Economics, and Policy. 3 points.
Not offered during 2019-20 academic year.

Technology, economic and policy aspects of the Internet. Summarizes how the Internet works technically, including protocols, standards, radio spectrum, global infrastructure and interconnection. Micro-economics with a focus on media and telecommunication economic concerns, including competition and monopolies, platforms, and behavioral economics. US constitution, freedom of speech, administrative procedures act and regulatory process, universal service, role of FCC. Not a substitute for CSEE4119. Suitable for non-majors. May not be used as a track elective for the computer science major.

COMS W4444 Programming and Problem Solving. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (CSEE W3827)
Hands-on introduction to solving open-ended computational problems. Emphasis on creativity, cooperation, and collaboration. Projects spanning a variety of areas within computer science, typically requiring the development of computer programs. Generalization of solutions to broader problems, and specialization of complex problems to make them manageable. Team-oriented projects, student presentations, and in-class participation required.

COMS W4460 Principles of Innovation and Entrepreneurship. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor’s permission.
Team project centered course focused on principles of planning, creating, and growing a technology venture. Topics include: identifying and analyzing opportunities created by technology paradigm shifts, designing innovative products, protecting intellectual property, engineering innovative business models.

COMS W4560 Introduction to Computer Applications in Health Care and Biomedicine. 3 points.
Lect: 3.

Prerequisites: Experience with computers and a passing familiarity with medicine and biology. Undergraduates in their senior or junior years may take this course only if they have adequate background in mathematics and receive the instructor’s permission.
An overview of the field of biomedical informatics, combining perspectives from medicine, computer science and social science. Use of computers and information in health care and the biomedical sciences, covering specific applications and general methods, current issues, capabilities and limitations of biomedical informatics. Biomedical Informatics studies the organization of medical information, the effective management of information using computer technology, and the impact of such technology on medical research, education, and patient care. The field explores techniques for assessing current information practices, determining the information needs of health care providers and patients, developing interventions using computer technology, and evaluating the impact of those interventions.

COMS W4701 Artificial Intelligence. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and any course on probability. Prior knowledge of Python is recommended. Provides a broad understanding of the basic techniques for building intelligent computer systems. Topics include state-space problem representations, problem reduction and and-or graphs, game playing and heuristic search, predicate calculus, and resolution theorem proving, AI systems and languages for knowledge representation, machine learning and concept formation and other topics such as natural language processing may be included as time permits.

COMS W4705 Natural Language Processing. 3 points.
Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor’s permission.
Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora. Programming exercises in several of these areas.

Spring 2020: COMS W4705
COMS W4706 Spoken Language Processing. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor's permission.
Computational approaches to speech generation and understanding.
Topics include speech recognition and understanding, speech analysis for computational linguistics research, and speech synthesis. Speech applications including dialogue systems, data mining, summarization, and translation. Exercises involve data analysis and building a small text-to-speech system.

COMS W4725 Knowledge representation and reasoning. 3 points.

Prerequisites: (COMS W4701)
General aspects of knowledge representation (KR). The two fundamental paradigms (semantic networks and frames) and illustrative systems. Topics include hybrid systems, time, action/plans, defaults, abduction, and case-based reasoning. Throughout the course particular attention is paid to design trade-offs between language expressiveness and reasoning complexity, and issues relating to the use of KR systems in larger applications.

COMS W4731 Computer Vision. 3 points.
Lect: 3.

Prerequisites: Fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.
Introductory course in computer vision. Topics include image formation and optics, image sensing, binary images, image processing and filtering, edge extraction and boundary detection, region growing and segmentation, pattern classification methods, brightness and reflectance, shape from shading and photometric stereo, texture, binocular stereo, optical flow and motion, 2D and 3D object representation, object recognition, vision systems and applications.

COMS W4733 Computation Aspects of Robotics. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136COMS W3137)
Introduction to robotics from a computer science perspective. Topics include coordinate frames and kinematics, computer architectures for robotics, integration and use of sensors, world modeling systems, design and use of robotic programming languages, and applications of artificial intelligence for planning, assembly, and manipulation.

for robotics, integration and use of sensors, world modeling systems, design and use of robotic programming languages, and applications of artificial intelligence for planning, assembly, and manipulation.

COMS W4735 Visual Interfaces to Computers. 3 points.
Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137)
Visual input as data and for control of computer systems. Survey and analysis of architecture, algorithms, and underlying assumptions of commercial and research systems that recognize and interpret human gestures, analyze imagery such as fingerprint or iris patterns, generate natural language descriptions of medical or map imagery. Explores foundations in human psychophysics, cognitive science, and artificial intelligence.

COMS W4737 Biometrics. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a background at the sophomore level in computer science, engineering, or like discipline. In this course, we will explore the latest advances in biometrics as well as the machine learning techniques behind them. Students will learn how these technologies work and how they are sometimes defeated. Grading will be based on homework assignments and a final project. There will be no midterm or final exam. This course shares lectures with COMS E6737. Students taking COMS E6737 are required to complete additional homework problems and undertake a more rigorous final project. Students will only be allowed to earn credit for COMS W4737 or COMS E6737 and not both.

COMS W4771 Machine Learning. 3 points.
Lect: 3.

Prerequisites: Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence. Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov models. Algorithms implemented in MATLAB.

COMS W4772 Advanced Machine Learning. 3 points.
Lect: 3.
Prerequisites: (COMS W4771) or instructor’s permission; knowledge of linear algebra & introductory probability or statistics is required.
An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally? Topics include appearance-based models, principal and independent components analysis, dimensionality reduction, kernel methods, manifold learning, latent models, regression, classification, Bayesian methods, maximum entropy methods, real-time tracking, extended Kalman filters, time series prediction, hidden Markov models, factorial HMMs, input-output HMMs, Markov random fields, variational methods, dynamic Bayesian networks, and Gaussian/Dirichlet processes. Links to cognitive science.

COMS W4776 Machine Learning for Data Science. 3 points.
Lect.: 3
Prerequisites: (STAT GU4001 or IEOR E4150) and linear algebra. Introduction to machine learning, emphasis on data science. Topics include least square methods, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models, hidden Markov models, support vector machines kernel methods. Emphasizes methods and problems relevant to big data. Students may not receive credit for both COMS W4771 and W4776.

COMS W4901 Projects in Computer Science. 1-3 points.
Prerequisites: Approval by a faculty member who agrees to supervise the work. A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

COMS W4910 Curricular Practical Training. 1 point.
Prerequisites: obtained internship and approval from faculty advisor. Only for M.S. students in the Computer Science department who need relevant work experience as part of their program of study. Final report required. This course may not be taken for pass/fail credit or audited.

COMS W4995 Special topics in computer science, I. 3 points.
Lect: 3.
Prerequisites: Instructor’s permission. Special topics arranged as the need and availability arises. Topics are offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit. Consult the department for section assignment.
COMS W4996 Special topics in computer science, II. 3 points.

Prerequisites: Instructor’s permission.
A continuation of COMS W4995 when the special topic extends over two terms.

Computer Science - English
Computer Science - Electrical Engineering

CSEE W3827 Fundamentals of Computer Systems. 3 points.
Lect: 3.

Prerequisites: an introductory programming course.
Fundamentals of computer organization and digital logic. Boolean algebra, Karnaugh maps, basic gates and components, flipflops and latches, counters and state machines, basics of combinational and sequential digital design. Assembly language, instruction sets, ALU’s, single-cycle and multi-cycle processor design, introduction to pipelined processors, caches, and virtual memory.

CSEE W4119 Computer Networks. 3 points.
Lect: 3.

Prerequisites: Corequisites: IEOR E3658 or equivalent.
Corequisites: IEOR E3658
Introduction to computer networks and the technical foundations of the Internet, including applications, protocols, local area networks, algorithms for routing and congestion control, security, elementary performance evaluation. Several written and programming assignments required.

CSEE W4140 Networking Laboratory. 3 points.
Lect: 3.

Prerequisites: (CSEE W4119) or equivalent.
In this course, students will learn how to put "principles into practice," in a hands-on-networking lab course. The course will cover the technologies and protocols of the Internet using equipment currently available to large internet service providers such as CISCO routers and end systems. A set of laboratory experiments will provide hands-on experience with engineering wide-area networks and will familiarize students with the Internet Protocol (IP), Address Resolution Protocol (ARP), Internet Control Message Protocol (ICMP), User Datagram Protocol (UDP) and Transmission Control Protocol (TCP), the Domain Name System (DNS), routing protocols (RIP, OSPF, BGP), network management protocols (SNMP, and application-level protocols (FTP, TELNET, SMTP).

The Department of Dance

Mission

The Barnard College Department of Dance, located in a world dance capital, offers an interdisciplinary program that integrates the study of dance within a liberal arts setting of intellectual and creative exploration. The major builds upon studio courses, the Department’s productions at Miller Theater, New York Live Arts, and other venues, as well as a rich array of dance studies courses, allowing students’ creative work to develop in dialogue with critical inquiry into the history, culture, theory and forms of western and non-western performance, typically enhanced by study in other disciplines. Students work with accomplished artists whose work enriches contemporary American dance; they also study with outstanding research scholars.

Making, thinking about, and writing about art are an essential part of the liberal arts education. For this reason, the Department of Dance offers technique courses for students of all levels of expertise, while opening its other courses to majors and non-majors alike, who may also audition for its productions. The Department partners with cultural institutions in New York City to connect students with the professional world.

Student Learning Outcomes for the Major and Minor

Students graduating with a major in Dance should be able to attain the following outcomes:

• Apply critical thinking, reading, and writing skills to dance-related texts and choreography.
• Develop the knowledge and research skills to explore the dance past in writing, orally, and in performance.
• Present interpretations of dance-related texts orally, in writing, and in performance.
• Apply library, archival, and internet research skills to dance scholarship and choreography.
• Demonstrate improved efficiency and expressivity in dance technique.
• Demonstrate growing technical understanding and fluency in dance technique.
• Create original dances, dance/theater works or dance-based, mixed media works.
• Collaborate with an artist in the creation of original dance works.
• Participate in the creative process through the creation and interpretation of choreography.
• Apply interdisciplinary research methods to dance scholarship and choreography.
• Apply historical research methods to dance scholarship and choreography.
• Demonstrate conceptual and methodological approaches for studying world dance forms through research and writing.
• Demonstrate the ability to understand cultural and historical texts in relation to dance forms.

Computer Science - Biomedical Engineering

CBMF W4761 Computational Genomics. 3 points.
Lect: 3.

Prerequisites: Working knowledge of at least one programming language, and some background in probability and statistics.
Computational techniques for analyzing genomic data including DNA, RNA, protein and gene expression data. Basic concepts in molecular biology relevant to these analyses. Emphasis on techniques from artificial intelligence and machine learning. String-matching algorithms, dynamic programming, hidden Markov models, expectation-maximization, neural networks, clustering algorithms, support vector machines. Students with life sciences backgrounds who satisfy the prerequisites are encouraged to enroll.

CSEE W4868 System-on-chip platforms. 3 points.
Prerequisites: (COMS W3157) and (CSEE W3827)
Design and programming of System-on-Chip (SoC) platforms.
Topics include: overview of technology and economic trends, methodologies and supporting CAD tools for system-level design, models of computation, the SystemC language, transaction-level modeling, software simulation and virtual platforms, hardware-software partitioning, high-level synthesis, system programming and device drivers, on-chip communication, memory organization, power management and optimization, integration of programmable processor cores and specialized accelerators. Case studies of modern SoC platforms for various classes of applications.

The required courses for the major in dance are distributed as follows:

- Apply anatomical knowledge to movement and movement concepts.
- Evaluate the theoretical and artistic work of peers.
- Communicate with an audience in oral presentations and dance performance.
- Understand and interpret the language and form of an artist’s choreography.
- Solve technical problems in dance movement.
- Apply musical knowledge to movement and choreography.
- Design choreographic movement and structures.

### Major in Dance (for students entering in Fall 2011 or later)

Majors must complete eleven academic courses (six required, five elective) and a minimum of eight 1-point technique courses. All majors write a senior thesis as part of their coursework.

The required courses for the major in dance are distributed as follows:

**Dance History**

The following two courses in Dance History must be completed before the fall of the senior year:

- DNCE BC2565: World Dance History
- DNCE BC3001: Western Theatrical Dance from the Renaissance to the 1960s

**Movement Science**

Select one or more of the following:

- DNCE BC2501: Biomechanics for the Dancer: Theory and Practice
- DNCE BC2562: Movement Analysis

**Composition**

One course in Composition must be completed before the fall of the senior year.

- DNCE BC2564: Dance Composition: Content
- DNCE BC3565: Composition: Collaboration and the Creative Process

**DNCE BC3566**: Composition: Site Specific and Experimental Methods
**DNCE BC2563**: Dance Composition: Form

### Senior Work

Seniors planning to write a combined thesis must request approval from both departments and notify the Registrar. All majors must complete two semesters of senior work. The following course, which culminates in a 25-30-page written thesis and an oral presentation to the Department at the end of the semester, is required of all seniors:

- DNCE BC3591: Senior Seminar in Dance

In addition, all majors must take one of the following two courses, depending on whether the senior requirement is completed with a creative project or a two-semester written thesis:

- DNCE BC3592: Senior Project: Research for Dance
- DNCE BC3593: Senior Project: Repertory for Dance

Students who are double majors may request permission to write a two-semester combined thesis.

**Electives**

Five additional 3- or 4-point courses, chosen in consultation with the major advisor, are required. Electives may be chosen from among the departmental offerings listed above or below, including additional coursework in Composition, Movement Science, and/or Senior Work beyond the major requirement.

**History/Criticism:**

- DNCE BC2570: Dance in New York City
- DNCE BC2575: Choreography for the American Musical
- DNCE BC2580: Tap as an American Art Form
- DNCE BC3000: From Page to Stage: Interactions of Literature and Choreography
- DNCE BC3200: Dance in Film
- DNCE BC3567: Dance of India
- DNCE BC3570: Latin American and Caribbean Dance: Identities in Motion
- DNCE BC3575: George Balanchine and the Reinvention of Modern Ballet
- DNCE BC3576: Dance Criticism
- DNCE BC3577: Performing the Political: Embodying Change in American Performance
- DNCE BC3578: Traditions of African-American Dance
- DNCE BC3580: History of Social Dancing: Dance Craze from the Waltz to Flash Mobs
- DNCE BC3583: Gender and Historical Memory in American Dance of the 1930’s to the Early 1960’s
- DNCE BC3580: Performing the Political: Embodying Change in American Performance
- DNCE BC3581: Inventing American Modern Dance: Ruth St. Denis and Ted Shawn
- DNCE BC3582: Diaghilev’s Ballets Russes and Its World

**Studio/Performance:**

- DNCE BC2555: Ensemble Dance Repertory (Modern Dance)
- DNCE BC2556: Ensemble Dance Repertory: Ballet
- DNCE BC2557: Evolution of Spanish Dance Style
- DNCE BC2558: Tap Ensemble
- DNCE BC2567: Music for Dance
- DNCE BC3571: Solo Repertory, Performance Styles
- DNCE BC3560: Rehearsal and Performance in Dance
- DNCE BC3604: Rehearsal and Performance in Dance

Major in Dance
(for students declaring a major before Fall 2011)

Majors must fulfill an eleven-course requirement, including the DNCE BC3591 Senior Seminar in Dance and either Senior Project: Research in Dance (DNCE BC3592 Senior Project: Research for Dance) or DNCE BC3593 Senior Project: Repertory for Dance, in addition to taking a minimum of eight 1-point technique courses.

To fulfill the distribution requirements, one course must be taken in each of the following four areas:

Senior Work

All dance majors must complete two semesters of senior work. DNCE BC3591 Senior Seminar in Dance given in the fall semesters, requires a 25-30 page written thesis and an oral presentation to the Department at the end of the semester. The second semester is usually a performance project for which the student registers in DNCE BC3593 Senior Project: Repertory for Dance. Students may also choose to do a two-semester thesis, registering in DNCE BC3592 Senior Project: Research for Dance. Students who are double majors may request permission to do a two-semester combined thesis.

Overview of Major Requirements (11 total, plus 8 technique courses)

- 1 Movement Science
- 1 Composition
- 1 History
- 1 Writing
- 1 Senior Seminar
- 1 Senior Project (Research in Dance or Repertory for Dance)
- 5 Electives
- 8 Technique Classes

Minor in Dance

Six courses constitute a minor in dance. Normally, three history/criticism and three credit-bearing performance/choreography courses are taken. (Note: 1-point technique courses do NOT count toward the Dance minor.) Courses are to be selected on the basis of consultation with full-time members of the department.

School of Engineering and Applied Sciences

Minor in Dance

The SEAS Dance Minor consists of five 3-point courses. Please note that no performance/choreography courses below count toward the non-tech requirement for SEAS students:

DNCE BC2567 Music for Dance. 3 points.
Prerequisites: Previous dance experience is necessary, a comp course in the dpt is preferred, permission of instructor
This course covers basic music theory, ear training, and literature, incorporating practical exercises in which students apply musical understanding to compositional and performative modalities of movement. Students will investigate the elements of music that drive dance, the expressive influence dance can have on music, and the vital reciprocity between both activities. Emphasis will be placed on an historical survey and analysis of western musical forms from the Middle Ages to the present as well as influential music from other cultures, expanding students' awareness of the aural characteristics of a variety of musical styles while giving historical context and critical perspective on contemporary popular styles.

In addition to lectures and reading requirements, the course involves listening assignments and in-class exercises structured to develop basic musical literacy and skills. Students will be introduced to multiple approaches to listening and to creating music through a combination of studio practice, theoretical study and analysis. Exploration of musicality as perceived by performer and audience will be covered, as well as learning conventional music terminology.

Prerequisites: Dance Composition: Form (DNCE BC 2563) or Dance Composition: Content (DNCE BC 2564), or permission of the instructor.
This course is a study in dance composition with a focus on collaboration. Whether creating a solo or larger group piece, students are encouraged to collaborate with other artists. Methods employed by contemporary choreographers will be explored. Peer feedback and creative dialogue will be a component of every class.

DNCE BC3566 Composition: Site Specific and Experimental Methods. 3 points.
Focuses on collaborative creation as conceptual artists, choreographers, improvisers, and performers with an emphasis on site-specific projects and experimental methods.

DNCE BC3567 Dance of India. 3 points.
A range of dance genres, from the traditional to the innovative, co-exist as representations of “Indianness” in India, and beyond. Identities onstage and in films, morph as colonial, national, and global contexts change. This course zooms from micro to macro views of twentieth century staged dances as culturally inflected discourse. We review how Indian classical dance aligns with the oldest of performance texts, and with lively discourses (rasa as a performance aesthetic, Orientalism, nationalism, global recirculations) through the ages, not only in India but also in Europe, Britain and America. Throughout the course, we ask:- How is culture embodied? How do historical texts configure dance today? How might they affect our thinking on mind-body-practice-theory, and traditional-contemporary divides? How does bodily patterning influence the ways that we experience our surroundings and vice versa? Can cultural imaginaries instigate action? How is gender is performed? What are dance discourses?

Economic and Social History

1019 Milstein Learning Center
212-854-3454
Department Administrator: Robert O'Connor

Mission

The Economic and Social History major is an interdisciplinary major that combines economic reasoning with different historiographic approaches and quantitative analysis. The major encourages students to develop an understanding of the human experience through the record of the past and acquire intellectual tools to analyze historical changes from an economic and social perspective. Students are exposed to different ways of thinking about the origins of capitalism, the structural features of modern economies, regional differences or global diversity in long-run economic performance and socioeconomic well-being, and the challenges and opportunities facing the global economy today. By looking at both the social and the economic dimensions of the histories of one or more geographical regions, students gain a valuable interdisciplinary perspective that enables them to appreciate and think systematically and critically about the complexities of human interaction.

Student Learning Outcomes

Students who complete the major in Economic and Social History will be able to attain the following:

- Show fluency in basic concepts, models and tools of economic theory and economic history.
- Understand the difference between primary and secondary sources, and use and evaluate these materials through critical reading and interpretation.
- Demonstrate understanding of institutions, organizations and markets in their roles of coordinating economic and social activity.
- Use concepts or methods from multiple disciplines including economics to analyze the past.
- Articulate a well-defined research question and conduct independent research using economic reasoning and historical evidence.
- Communicate economic ideas and historical concepts effectively in written or oral form.
- Demonstrate knowledge and capacity to do in-depth research on a particular geographic area, time period, or central theme in economic and social history.
- Demonstrate knowledge of the history of economic thought, its relation to historical developments, and influence on past and present economic theory and ideas.
- Show an appreciation for different historiographic approaches to the study of economic and social history.
- Show familiarity with varied perspectives on the origins of capitalism and the diversity of economic development across regions.

Students who graduate with a major in Economic and Social History will be prepared to enter graduate programs in history, business, public policy/administration, or to pursue careers such as in public policy or business that call for diverse perspectives and skills.

This program is supervised by the Committee on Economic and Social History.

Program Committee: Alan Dye (Economics), Deborah Valenze (History), David Weiman (Economics), and Carl Wennerlind (History).

HIST BC1801 Colonialism and Nationalism in South Asia. 3 points.

Not offered during 2019-20 academic year.

Introduction to South Asian history (17-20 c.) that explores the colonial economy and state formation; constitution of religious and cultural identities; ideologies of nationalism and communalism, caste and gender politics; visual culture; and the South Asian diaspora.

HIST BC2116 The History of Money. 3 points.
Examining the history of money and the history of ways of thinking about money. We investigate how different monetary forms developed and how they have shaped and been shaped by culture, society, and politics. Tracing money from gift-giving societies to the European Monetary Union, the focus is on early modern Europe.

HIST BC2180 Merchants, Pirates, and Slaves in the Making of Atlantic Capitalism. 3 points.

Examines how the Atlantic Ocean and its boundaries were tied together through the flow of people, goods, and ideas. Studies the cultures of the communities formed by merchants, pirates, and slaves; investigates how their interactions and frictions combined to shape the unique combination of liberty and oppression that characterizes early modern capitalism.

HIST BC2321 Colonial Encounters: Europe and the Culture of Empire. 3 points.
Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism.

HIST BC3332 The Politics of Leisure in Modern Europe. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.
Transformations in the culture of leisure from the onset of industrialization to the present day. Relations between elite and popular culture and the changing relationship between the work world and the world of leisure will be among the topics considered in such settings as the department store, the pub, the cinema, and the tourist resort.

HIST W3411 The Rise of American Capitalism. 3 points.
E-Commerce & Internet Technologies Track, Managing Emerging Technologies Track, Project Management Track, Discussion Section Required, Lab Required

Examines the social conflicts that accompanied the transformation of the United States from an agrarian republic and slave society to one of the most powerful industrial nations in the world. Particular attention will be paid to the building of new social and economic institutions and to cultural and visual representations of the nation and its people. Readings include major secondary works and primary documents. Formerly American Society in the age of Capital, 1819-1897. Field(s): US
HIST W3503 Workers in Industrial and Post-Industrial America. 3 points.
Not offered during 2019-20 academic year.

The history of work, workers, and unions during the 20th century. Topics include scientific management, automation, immigrant workers, the rise of industrial unionism, labor politics, occupational discrimination, and working-class community life. Field(s): US

HIST BC3886 Fashion. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: At least one course in a Non-U.S. Area in History, Literature, Anthropology, Film Studies or Art History. Permission of the instructor. Enrollment limited to 15. Preregistration required.

Investigates the cultural, material and technological conditions that facilitated the development of "fashion systems" in early modern Europe, Japan and contemporary Asian diasporic communities. In the global framework, "fashion" serves as a window into the politics of self-presentation, community formation, structure of desires, and struggles over representation.

HIST BC3905 Capitalism, Colonialism, and Culture: A Global History. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Permission of Instructor. Enrollment limited to 15. Preregistration required.

From Indian Ocean worlds of the seventeenth century, to Atlantic world slavery, to the establishment of colonies in Asia and Africa during the nineteenth century, colonization was critical to the development of metropolitan ideas regarding politics and personhood. This seminar will examine these histories, along with emerging constructions of race and gender, as precursors to debates about human rights and humanitarianism in the twentieth century.

HSEA W4884 Merchants, Markets, Modernity - China. 4 points.
From Marx's Asiatic Mode of Production to contemporary notions of Confucian capitalism, theories abound to explain China's divergence from Western patterns of political and economic development. This course critiques these theories and looks at the Chinese economy starting with its own internal logic to explore the social, cultural, institutional and political forces that underlay Chinese economic practice, the role of markets, merchants, labor, and the state in the making of modern China. No prerequisite.

HIST W4434 The Atlantic Slave Trade. 4 points.
This seminar provides an intensive introduction to the history of the Atlantic slave trade. The course will consider the impact of the traffic on Western Europe and the Americas, as well as on Africa, and will give special attention to the experiences of both captives and captors. Assignments include three short papers and a longer research paper of 20 to 25 pages. Field(s): INTL

HIST W4569 American Consumer Capitalism: 1800-Present. 4 points.
This seminar studies the history of consumer capitalism in America from the early 19th century to the present. It will establish when capitalism emerged, what it meant, and how it challenged and transformed American Civilization

Economics and Statistics

The Economics-Statistics major provides the student with a grounding in economic theory comparable to that provided by the general economics major, and also exposes the student to rigorous and extensive training in Statistics. Students choose between two tracks of the major. The Computational Track consists of coursework in applied statistical methods. It is recommended for students preparing to apply statistical methods in the social sciences. The Theoretical Track consists of calculus-based probability, and the theory of statistical inference. It also provides some practical training in data analysis.

Available to students of the Class of 2021 and later.

Department Administrator: Robert O'Connor

Chair: Rajiv Sethi (Ann Whitney Olin Professor)
Professors: Elizabeth Ananat, André Burgstaller, Alan Dye, Daniel Hamermesh (Distinguished Scholar), Sharon Harrison, Shaw-Hwa Lo (Statistics), Lalith Munasinghe, David Weiman (Alena Wels Hirschorn '58 Professor)
Associate Professors: Yang Feng (Statistics), Jingchen Liu (Statistics), Randall Reback, Ashley Timmer (Adjunct)
Assistant Professors: Belinda Archibong, Biwei Chen (Term), Martina Jasova, Elizabeth Kopko (Adjunct), Peter Orbanz (Statistics), Sonia Pereira (Term), Anja Tolonen, Homa Zarghami
Associates: John Park

Lecturers in Statistics: Banu Baydil, Ronald Neath, David Rios, Joyce Robbins, Gabriel Young

Computational Track

A major in Economics-Statistics, Computational Track must complete the following 16 courses or their equivalents:

10 courses in Economics, Mathematics

ECON BC1003 Introduction to Economic Reasoning
MATH UN1102 Calculus II
MATH UN1201 Calculus III
MATH UN2010 Linear Algebra
ECON BC3033 Intermediate Macroeconomic Theory
ECON BC3035 Intermediate Microeconomic Theory
ECON BC3041 Theoretical Foundations of Political Economy

**STAT UN2102 Applied Statistical Computing. 3 points.**

Corequisites: An introductory course in statistic (STAT UN1101 is recommended).

This course is an introduction to R programming. After learning basic programming component, such as defining variables and vectors, and learning different data structures in R, students will, via project-based assignments, study more advanced topics, such as recursion, conditionals, modular programming, and data visualization. Students will also learn the fundamental concepts in computational complexity, and will practice writing reports based on their statistical analyses.

**STAT UN2104 Applied Categorical Data Analysis. 3 points.**

Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

This course covers statistical models and methods for analyzing and drawing inferences for problems involving categorical data. The goals are familiarity and understanding of a substantial and integrated body of statistical methods that are used for such problems, experience in analyzing data using these methods, and proficiency in communicating the results of such methods, and the ability to critically evaluate the use of such methods. Topics include binomial proportions, two-way and three-way contingency tables, logistic regression, log-linear models for multi-way contingency tables, graphical methods. The statistical package R will be used.

**STAT UN3105 Applied Statistical Methods. 3 points.**

Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

This course is intended to give students practical experience with statistical methods beyond linear regression and categorical data analysis. The focus will be on understanding the uses and limitations of models, not the mathematical foundations for the methods. Topics that may be covered include random and mixed-effects models, classical non-parametric techniques, the statistical theory causality, sample survey design, multi-level models, generalized linear regression, generalized estimating equations and over-dispersion, survival analysis including the Kaplan-Meier estimator, log-rank statistics, and the
Cox proportional hazards regression model. Power calculations and proposal and report writing will be discussed.

STAT UN3106 Applied Data Mining. 3 points.
Prerequisites: STAT UN2103. Students without programming experience in R might find STAT UN2102 very helpful. This course will be taught as a machine learning class. We will cover topics including data-based prediction, classification, specific classification methods (such as logistic regression and random forests), and basics of neural networks. Programming in homeworks will require R; students without programming experience in R might find STAT UN2102 helpful.

Economics

1019 Milstein Learning Center
212-854-3454

Department Administrator: Robert O'Connor

Mission

The primary aim of the Barnard Economics Department is to provide undergraduate liberal arts students with a rigorous, broad, and critical program in theoretical and empirical economics. To achieve this aim our curriculum

- Provides a thorough grounding in neoclassical economic theory, modern statistical method, and their applications in the traditional fields of economic science;
- Embeds that training in a broader conception of economic science and method with special emphasis on philosophical, historical, and institutional approaches that link economics with other social sciences and humanistic disciplines;
- Compares and contrasts alternative methodological approaches and types of evidence as ways of analyzing economic phenomena, evaluating policy debates, and assessing the broader social and political consequences of economic doctrines.

Student Learning Outcomes for the Economics Major, Economics and Political Economy Tracks

Having successfully completed the major in Economics, the student will be able to attain the following outcomes:

1. Show fluency in the basic concepts, models and tools of microeconomic and macroeconomic theory;
2. Think critically about economic phenomena and economic debates by using multiple kinds of texts, evidence and conceptual approaches;
3. Apply economic reasoning to understand the causal determinants of economic events, empirical regularities, and policy proposals;
4. Apply basic skills of empirical reasoning to economic problems;
5. Demonstrate knowledge of the history of economic thought, including important doctrines, their historical context, transformation over time, and influence on contemporary economic theory and ideas;
6. Demonstrate understanding of institutions, organizations and markets in their roles of coordinating economic activity;
7. Demonstrate knowledge of the historical origins of capitalism, modern economic growth and development, patterns of inequality, and globalization;
8. Articulate a well-defined research question and conduct independent research using economic reasoning and evidence;
9. Communicate economic ideas effectively in written or oral form.

Specific to the Economics Track

1. Understand and apply statistical techniques to make inferences about economic hypotheses.

Specific to the Political Economy Track

1. Use concepts or methods from at least one disciplinary approach other than economics to analyze an economic, political or other social problem.

Barnard will allow a total of 3 points AP credit in Economics only if the following conditions are satisfied: an AP score of 4 or 5 in either

COMS W1004 Introduction to Computer Science and Programming in Java. 3 points.
Lect: 3.
A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: 1004 or 1005.

COMS W1005 Introduction to Computer Science and Programming in MATLAB. 3 points.
CC/GS: Partial Fulfillment of Science Requirement
A general introduction to computer science concepts, algorithmic problem-solving capabilities, and programming skills in MATLAB. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: W1004 or W1005.

COMS W1007 Honors Introduction to Computer Science. 3 points.
Lect: 3.
Prerequisites: AP Computer Science with a grade of 4 or 5 or similar experience.
An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.
Macro or Micro (or both), or an International Baccalaureate (IB) score of 5 or higher. However, students who receive AP credit for economics and who go on to pursue any of the economics department majors (or an economics minor) must still take ECON BC1003 Introduction to Economic Reasoning or its equivalent. For Statistics, Barnard will allow 3 points credit with a score of 5 on the Statistics AP exam. Economics track majors, however, will not be exempt from the statistics requirement ECON BC2411 Statistics for Economics or the equivalent, even if they receive 3 points AP credit for Statistics.

Adjunct Professors: Claudia Halback, Tim Goodspeed, Edward Lincoln, Caterina Musatti, Waseem Noor, Ingmar Nyman
Lecturers: Iraysema Alonso, Tri Vi Dang, Susan Elmes, Seyhan Erden, Tamrat Gashaw, Sunil Gulati, Ronald Miller, Wouter Vergote

Requirements for the Major

There are two tracks for the major in Economics equal in rigor, but different in scope and focus. The track in Economics emphasizes modern economic theory along with associated analytical and mathematical tools. The track in Political Economy emphasizes the roots of modern economics in the history of economic thought and the interconnections between social forces, political institutions, and economic power. Either track offers excellent preparation for graduate study in a variety of professional schools and professional careers in many areas, including business and public administration.

Prospective majors should discuss their programs with any member of the department no later than the second semester of their sophomore year. At the time of declaring the major, the student meets with the department chair and chooses a major adviser, who will advise her on the choice of program and courses. Students planning to major in Economics or Political Economy should complete both intermediate macro- and microeconomic theory by the beginning of their junior year.

Students who wish to complete a double or joint major that includes Economics should consult the chair of the department or the major adviser as early as possible. Students interested in pursuing a Ph.D. in economics should take more mathematics than required for the economics major or choose the Economics and Mathematics interdisciplinary major. Any interested student should seek guidance from the Economics and/or Mathematics faculty on which mathematics courses to take.

All majors should file the “Major Requirements Declaration” form, available from the department office by the end of their sophomore year, or as soon as possible thereafter.

Economics

The Economics track major requires twelve courses in economics, including:

Three electives in economics, two of which must be upper-level (that is, they must have intermediate micro- or macroeconomic theory as a prerequisite).

One of the following two options:

- ECON BC3061 - ECON BC3062: Senior Thesis I and Senior Thesis II
- ECON BC3063: Senior Seminar (and an additional upper-level elective in economics)

* Students will not receive credit for ECON BC1007 Mathematical Methods for Economics if they have already taken ECON BC3035 Intermediate Macroeconomic Theory. Such students must instead complete the mathematics requirement by taking MATH UN1201 Calculus III (Calculus III).

Political Economy

The Political Economy track major requires thirteen courses, including:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Three electives in economics, two of which must be upper-level electives (that is, they must have intermediate micro- or macroeconomic theory as a prerequisite).

Three interdisciplinary electives (see further conditions below)

And one of the following two options:

- ECON BC3061 - ECON BC3062: Senior Thesis I and Senior Thesis II
- ECON BC3063: Senior Seminar (and an additional upper-level elective in economics)

We recommend that all Political Economy track majors—especially those who plan to go on to business school or to graduate school in public administration or international relations—take ECON BC2411 Statistics for Economics or equivalent.
Interdisciplinary Electives
The three interdisciplinary electives may be taken from any Related Area of Study (listed below), or in an area approved by the major adviser. Two of the interdisciplinary electives must be "linked" to one of the economics electives taken to fulfill the major requirement, and at least one of the linked interdisciplinary electives must be at the 3000-level or higher. The remaining "unlinked" interdisciplinary elective requirement may be satisfied by taking any course in a Related Area of Study, or a statistics course, such as ECON BC2411 Statistics for Economics, STAT UN1101 Introduction to Statistics, STAT UN1201 Calculus-Based Introduction to Statistics, or ECON BC3018 Econometrics.

Linking interdisciplinary electives to economics electives: If a course is "linked," this means that it addresses subject matter that is related to the subject matter of the economics elective to which it is paired. There are many possible ways to link a course to an economics elective. A weblink to some suggestions from the department website is given below. Whether a course qualifies as a linked course must be approved by the student's major adviser.

Follow this link (http://economics.barnard.edu/majors/descriptions/political-economy-track/interdisciplinary-thematic-focus/) for a list of suggestions for Interdisciplinary Electives that link to Economics Elective Courses. It is NOT an exhaustive list. You should feel free to propose alternative courses that form similar links. All linked courses must be approved by the student’s major adviser.

Mathematics Training for the Major
The department expects all majors to have a working knowledge of arithmetic, high school algebra, and the fundamentals of analytic geometry.

Majors in the economics track may complete the mathematics requirement by taking ECON BC1007 Mathematical Methods for Economics, or MATH UN1101 Calculus I and MATH UN1201 Calculus III. Students who have received advanced placement credit or have placed out of Calculus I may take either Math Methods or Calculus III to complete the requirement. (Students with 5 on the Calculus BC test may begin with Calculus III.)

Majors in the political economy track may complete the mathematics requirement by taking ECON BC1007 Mathematical Methods for Economics or MATH UN1101 Calculus I. Students who have received advanced placement college credit for calculus have satisfied the mathematics requirement for the political economy track, however they must take an additional economics elective as a substitute for the AP credit so that the total number of courses taken for the major remains the same.

Students interested in pursuing a Ph.D. in economics should take more mathematics than required for the economics major or choose the Economics and Mathematics interdisciplinary major. Any interested student should seek guidance from the Economics and/or Mathematics faculty on which mathematics courses to take.

Requirements for the Minor
The minor in economics consists of five courses, including ECON BC1003 Introduction to Economic Reasoning or equivalent, ECON BC3033 Intermediate Macroeconomic Theory or ECON BC3035 Intermediate Microeconomic Theory, and three electives, one of which must have an intermediate micro- or macroeconomic theory course as a prerequisite.

Introductory Courses
The principles of economics; may be taken without previous study of economics.

ECON BC1003 Introduction to Economic Reasoning. 3 points.

 Covers basic elements of microeconomic and marcoeconomic reasoning at an introductory level. Topics include Individual Constraints and Preferences, Production by Firms, Market Transactions, Competition, The Distribution of Income, Technological Progress and Growth, Unemployment and Inflation, the Role of Government in the Economy. Note: Students cannot get credit for ECON BC1003 if they have taken the Columbia introductory course ECON W1105 Principles of Economics.

ECON BC1007 Mathematical Methods for Economics. 4 points.
Covers basic mathematical methods required for intermediate theory courses and upper level electives in economics, with a strong emphasis on applications. Topics include simultaneous equations, functions, partial differentiation, optimization of functions of more than one variable, constrained optimization, and financial mathematics. This course satisfies the Calculus requirement for the Barnard Economics major. NOTE: students who have previously taken Intermediate Micro Theory (ECON BC3035 or the equivalent) are not allowed to take Math Methods for Economics.

ECON BC2010 The Economics of Gender. 3 points.
Examination of gender differences in the U.S. and other advanced industrial economies. Topics include the division of labor between home and market, the relationship between labor force participation and family structure, the gender earnings gap, occupational segregation, discrimination, and historical, racial, and ethnic group comparisons.

ECON BC2012 Economic History of Western Europe. 3 points.
Not offered during 2019-20 academic year.

The course is an introduction to the transformative economic developments that began in Western Europe and spread globally. It applies economic and empirical reasoning to analyze the underlying forces of modern economic development from pre-modern Europe to the Industrial Revolution and the emergence of a global economy.

ECON BC2017 Introduction to Health Economics. 3 points.
Prerequisites: (ECON BC1003 or ECON UN1105)
This course covers the core microeconomic theories and concepts needed to understand health and health care issues in the United States. It describes how the markets for health and health services are different from those for other goods, with an emphasis on providing the tools and skills for understanding health policy and regulations. In addition, it discusses theoretical and empirical aspects of key health economics issues, with a primary focus on applying the tools of economic analysis to understand the basic forces—supply and demand, asymmetric information, incentives, and externalities, for example—that influence health policies.

ECON BC2020 Introduction to Development Economics. 3 points.
Students will be introduced to current issues within development economics, and to fundamental economic concepts explaining economic growth. It will discuss the crosscutting themes of gender equality and environmental sustainability, while approaching topics within economic growth, population growth, human capital, health, agriculture, urbanization, natural resources, conflict, and institutions.

ECON UN2029 FED Challenge Workshop. 1 point.
Prerequisites: (ECON UN1105)
The workshop prepares students to compete in the annual College Fed Challenge sponsored by the Federal Reserve. Topics covered include macroeconomic and financial conditions, monetary policy, financial stability and the Federal Reserve System.

ECON BC2075 Logic and Limits of Economic Justice. 3 points.
Prerequisites: Introduction to Economic Reasoning (ECON BC 1003) or Principles of Economics (ECON W1105). An introductory course in political theory or political philosophy is strongly recommended, but not required. Introduce students to problems of economic justice under capitalism. Course has three goals: (1) expose students to debates between economics and philosophers about the meaning and nature of justice, (2) explore conflict between efficiency and justice, (3) examine implications of justice for gender equality, intergenerational equity and climate change.

STEM BC2223 Computer Programming for the Behavioral Sciences. 4 points.

Students will learn how to write computer programs that can test theories and predictions that arise in the behavioral sciences. For students with little or no programming background.

ECON BC2224 Coding Markets. 4 points.
Prerequisites: (ECON BC1003 or ECON UN1105)
Students will learn how to write computer programs that can be used to solve assignment problems, including matching buyers with sellers in electronic financial markets, as well as assignment problems that don't involve prices: matching organ donors with recipients, residents with hospitals, and students with high schools for example. The programming language used will be MATLAB. Suitable for students with little or no programming background.
IEOR E2261 Accounting and Finance. 3 points.
Lect: 3.

Prerequisites: (ECON UN1105)
For undergraduates only. This course examines the fundamental concepts of financial accounting and finance, from the perspective of both managers and investors. Key topics covered in this course include principles of accrual accounting; recognizing and recording accounting transactions; preparation and analysis of financial statements, including balance sheets, income statements, cash flow statements, and statements of owners’ equity; ratio analysis; pro-forma projections; time value of money (present values, future values and interest/discount rates); inflation; discounted-cash-flow (DCF) project evaluation methods; deterministic and probabilistic measures of risk; capital budgeting.

Core Theory Courses
The courses listed below, required of both Political Economy and Economics track majors, constitute the core of the Barnard Economics major.

ECON BC3033 Intermediate Macroeconomic Theory. 4 points.
Prerequisites: An introductory course in economics and a functioning knowledge of high school algebra and analytical geometry or permission of the instructor.
Systematic exposition of current macroeconomic theories of unemployment, inflation, and international financial adjustments.

ECHS BC2590 Measuring History: Empirical Approaches to Economic and Social History. 4 points.

This course examines big themes in economic and social history-population history and human well-being, inequality and poverty, and gender differences. Using these themes, it adopts a hands-on data-driven approach to introduce tools and concepts of empirical reasoning. Datasets related to each theme create opportunities for learning by doing.

Upper-Level Elective Courses

The following economics elective courses have as a minimum either ECON BC3033, ECON BC3035, or both as prerequisites.

ECON BC3010 American Wellbeing. *3 points.*

Prerequisites: (ECON BC 2411 or STAT W1111 or PSYCH BC1101 or BUSI G6014 or STAT W1211 or SIEO W3600 or SIEO W4150) and (ECON BC1003 or ECON W1105) Students using this course for an economics major must have also previously completed either Intermediate Microeconomic Theory (ECON BC3035) or Intermediate Microeconomics (ECON UN3211).

This course takes a novel approach to examining public policy concepts. The class mission is to construct a “U.S. Wellbeing Index,” a measure of people’s wellbeing in the United States. The process of constructing such an index and debating its shortcomings will provide students with a better understanding of the factors that should guide public policy decisions. Students successfully completing this course will: (1) develop skills for conducting and interpreting cost-benefit analyses, (2) search the web for relevant economic data and write efficient, well-documented code to download and format those data, (3) interpret time trends for data concerning the economy, human health, and environmental conditions, (4) develop an understanding of how various types of risks affect both individual and societal wellbeing, and (5) understand multiple perspectives in debates over the importance of equity considerations when considering the wellbeing of a society.

ECON BC3011 Inequality and Poverty. *3 points.*

Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor.

Conceptualization and measurement of inequality and poverty, poverty traps and distributional dynamics, economics and politics of public policies, in both poor and rich countries.

ECON BC3012 Economics of Education. *3 points.*

Prerequisites: ECON BC3035 and ECON BC2411 or permission of the instructor.

Analyzes education policies and education markets from an economic perspective. Examines challenges that arise when researchers attempt to identify the causal effects of inputs. Other topics: (1) education as an investment, (2) public school finance, (3) teacher labor markets, (4) testing/accountability programs, (5) school choice programs, and (6) urban public school reforms.

ECON BC3013 Economic History of the United States. *3 points.*

Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor.

Economic transformation of the United States from a small, open agrarian society in the late colonial era to the leading industrial economy of the 20th century. Emphasis is given to the quantitative, institutional, and spatial dimensions of economic growth, and the relationship between the changing structures of the economy and state.

ECON BC3017 Economics of Business Organization. *3 points.*

Not offered during 2019-20 academic year.

Prerequisites: ECON BC3035 or permission of the instructor.

Economics of firm organization and the evolution of the modern business enterprise. The function of organizations in coordinating the use of economic resources. The role of technology, labor, management, and markets in the formation of the business enterprise. Includes international comparisons and attention to alternative economic theories on the role of business organizations on national competitive advantage.
ECON BC3019 Labor Economics. 3 points.
Prerequisites: ECON BC3035, or permission of the instructor.
Factors affecting the allocation and remuneration of labor; population structure; unionization and monopsony; education and training, mobility and information; sex and race discrimination; unemployment; and public policy.

ECON BC3022 Economic History of Europe. 3 points.
Prerequisites: Econ BC3035 or Econ BC3033 (or their equivalents), or permission of the instructor.
An introduction to the transformative economic developments that began in Western Europe and spread globally. This course applies economic and empirical reasoning to analyze the industrial revolution, its underlying causes and consequences, from pre-modern times to the 20th-century emergence of a global economy.

Not offered during 2019-20 academic year.
Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor
Topics vary in content. Fall 2011 topic: The American Century.

ECON BC3024 Migration and Economic Change. 3 points.
Prerequisites: (Econ BC 3035) or (Econ BC 3033)
This course examines a wide variety of topics about migration and its relationship to economic development, globalization, and social and economic mobility. At its core, this course reflects a key reality: that the movement of people—within regions, within countries, and across borders—is both the result of and impetus for economic change.

ECON UN3025 Financial Economics. 3 points.
Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201

ECON BC3026 Economics of the Public Sector. 3 points.
Prerequisites: (ECON BC3035 or ECON UN3211)

The purpose of the course is to think about public policy issues through an economic lens. We will explore the basic economic foundations of individual decision-making and discuss the ways in which economists hypothesize that individuals respond to the incentives embedded within public policies. We will pay particular attention to the nature and detail of existing public policies, and use economic analysis to predict how these policies might influence behavior. We will also explore some of the relevant empirical literature on a set of policy topics, to see how these predictions hold up.

Prerequisites: (ECON BC3035 or ECON BC3033) and ECON UN3412 ECON BC3035 or ECON BC3033 and Econometrics, or permission of the instructor.
Examination of new challenges in the global economy from unequal income distribution and poor institutions to health epidemics and natural disasters. Accessing and analyzing real-time and historic data to understand the current global economy. Applied econometric techniques.

ECON BC3031 Economics of Life. 3 points.
Prerequisites: ECON BC3035 ECON BC3018 Econometrics previously or concurrently taken is highly recommended.
This course covers an immense variety of topics in what might be called demographic economics. Included are dating and marriage, along with the economics of beauty; fertility and its avoidance; how people use their time, and what determines those uses, including some discussion of labor-force behavior; interactions among family members—bargaining in the household and with family members outside the household; divorce; the economics of addiction, to such agents as alcohol, other drugs, tobacco and even work; religion, including its effects on economic outcomes; and death, including how we die, how long we live, and the nature and determinants of bequests. The central unifying feature throughout the course is the concentration on the economics of these activities and outcomes—the roles of incentives and institutions in affecting them.

ECON BC3045 Business Cycles. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: ECON BC3033.
Theories and policy implications of business cycles. IS/LM, AS/AD and the Phillips Curve; dynamic general equilibrium models based on microfoundations including the Real Business Cycle model; New Keynesian models; models of the political business cycle. Particular episodes in the macroeconomic history of the US will provide case studies in which to study these models and the application of policies within.

ECON BC3047 International Trade. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: (ECON BC3035 or ECON UN3211)(ECON BC3033 or ECON UN3213)
This course overviews global trade history and patterns, introduces the underlying international trade theories, and examines trade policies and institutions. The course weights empirical findings and theoretical models equally. Lectures focus on economic intuition behind the models and their applications. Topics cover patterns and trends in world trade history, classical/neoclassical/modern trade theories and models, trade policy and instruments, global production networks and value chains, U.S. trade and immigration policies. Throughout the course, registered students are required to complete assignments and exams, participate in research-based public debates, and submit a group research paper.

ECON BC3098 Guided Research. 1 point.
1 or 2 points
Prerequisites: Instructor’s permission
Provides students with the experience of participating in the research process by matching them to a faculty mentor who will put them to work on one of his or her current research projects.

Senior Requirement

Economics majors must take EITHER Senior Thesis I and Senior Thesis II OR a Senior Seminar plus an additional upper-level economics elective.

ECON BC3061 Senior Thesis I. 4 points.
Prerequisites: Permission of the instructor and completion of all courses (except for the senior requirement) required for the economics track, political economy track, or economics and mathematics majors. Exceptions to these prerequisites may be granted by the chair of the department only.
Tutorials and conferences on the research for and writing of the senior thesis. This is the 1st semester of a two-semester course sequence.

ECON BC3062 Senior Thesis II. 4 points.
Prerequisites: Permission of the instructor and completion of all courses (except for the senior requirement) required for the economics track, political economy track, or economics and mathematics majors. Exceptions to these prerequisites may be granted by the chair of the department only.
Tutorials and conferences on the research for and writing of the senior thesis. This is the 2nd semester of a two-semester course sequence.

ECON BC3063 Senior Seminar. 4 points.
Prerequisites: Permission of the instructor and the completion of all courses (except for the senior requirement) required for the economics track, political economy track, or economics and mathematics majors. Exceptions to these prerequisites may be granted by the chair of the department only. Seminar sections are limited to 15 students.
A topic in economic theory or policy of the instructor’s choice. See department for current topics and for senior requirement preference forms.

ECON 4230 Economics of New York City. 3 points.
Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201
This course takes New York as our laboratory. Economics is about individual choice subject to constraints and the ways that choices sum up to something often much more than the parts. The fundamental feature of any city is the combination of those forces that bring people together and those that push them apart. Thus both physical and social space will be central to our discussions. The underlying theoretical and empirical analysis will touch on spatial aspects of urban economics, regional, and even international economics. We will aim to see these features in New York City taken as a whole, as well as in specific neighborhoods of the city. We will match these theoretical and empirical analyses with readings that reflect close observation of specific subjects. The close observation is meant to inspire you to probe deeply into a topic in order that the tools and approaches of economics may illuminate these issues in a fresh way.
ECON GU4412 Advanced Econometrics. 4 points.
Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412 and MATH UN2010 Students must register for required discussion section.
The linear regression model will be presented in matrix form and basic asymptotic theory will be introduced. The course will also introduce students to basic time series methods for forecasting and analyzing economic data. Students will be expected to apply the tools to real data.

ECON G4526 Transition Reforms, Globalization and Financial Crisis. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: ECON W3211 and W3213.
Covers reform issues in transition economies such as price liberalization, currency reform, asset privatization, macroeconomic stabilization, trade liberalization and exchange rate policies, and foreign resource flows with suitable examples from the experience of the transition economies of Russia, the post-Soviet states, East-central Europe, China and Vietnam.

ECON GU4750 Globalization and Its Risks. 3 points.
Prerequisites: ECON UN3211 and ECON UN3213
The world is being transformed by dramatic increases in flows of people, goods and services across nations. Globalization has the potential for enormous gains but is also associated to serious risks. The gains are related to international commerce where the industrial countries dominate, while the risks involve the global environment, poverty and the satisfaction of basic needs that affect in great measure the developing nations. Both are linked to a historical division of the world into the North and the South-the industrial and the developing nations. Key to future evolution are (1) the creation of new markets that trade privately produced public goods, such as knowledge and greenhouse gas emissions, as in the Kyoto Protocol; (2) the updating of the Breton Woods Institutions, including the creation of a Knowledge Bank and an International Bank for Environmental Settlements.

ECON G4527 Economic Organization and Development of China. 3 points.
Prerequisites: ECON W3211 and W3213.
An analytical survey of the economic organization of China, with reference to population and land resources, agriculture, industries, transportation, trade, and finance. The social and cultural forces affecting economic development.

IEOR E2261 Accounting and Finance. 3 points.
Lect: 3.
Prerequisites: (ECON UN1105)
For undergraduates only. This course examines the fundamental concepts of financial accounting and finance, from the perspective of both managers and investors. Key topics covered in this course include principles of accrual accounting; recognizing and recording accounting transactions; preparation and analysis of financial statements, including balance sheets, income statements, cash flow statements, and statements of owners’ equity; ratio analysis; pro-forma projections; time value of money (present values, future values and interest/discount rates); inflation; discounted-cash-flow (DCF) project evaluation methods; deterministic and probabilistic measures of risk; capital budgeting.

Economics & Mathematics
1019 Milstein Learning Center
212-854-3454
Department Administrator: Robert O'Connor

Mission
The Economics and Mathematics major provides the student with a grounding in economic theory comparable to that provided by the general economics major and exposes the student to rigorous and extensive training in mathematics. The program will be particularly useful for students planning to do graduate work in economics, which frequently demands greater mathematical training than that acquired through the minimum requirements of the basic economics degree.

Economics Department Representative: Sharon Harrison
Mathematics Department Representative: David Bayer

Requirements for the Major
A major in Economics and Mathematics must complete the following 15 courses or their equivalents:

Economics (8 courses)
- ECON BC1003 Introduction to Economic Reasoning 3
- ECON BC3018 Econometrics 4
- ECON BC3033 Intermediate Macroeconomic Theory 4
- ECON BC3035 Intermediate Microeconomic Theory 4
- ECON BC3041 Theoretical Foundations of Political Economy 3
- Select one of the following: 4
  - ECON BC3062 Senior Thesis II (two semesters of the Senior Thesis are optional)
  - ECON BC3063 Senior Seminar *
Two economics electives with an intermediate micro- or macroeconomic theory course as prerequisite

Mathematics (7 courses)
- MATH UN1101 Calculus II 6
- MATH UN1201 and Calculus III 3
- MATH UN2010 Linear Algebra 3
- MATH UN2500 Analysis and Optimization ** 3
- SIEO W3600 (or STAT GU4001) 3
- Two electives at or above the 2000 level ***

* MATH UN3951 Undergraduate Seminars in Mathematics I, or an equivalent approved by the Chairs of the Mathematics and Economic departments is an acceptable alternative to ECON BC3063 Senior Seminar.
** MATH GU4061 Introduction To Modern Analysis I is an acceptable alternative to MATH UN2500 Analysis and Optimization.
*** MATH UN2030 Ordinary Differential Equations is an approved Mathematics elective. Also approved is MATH UN3951 Undergraduate Seminars in Mathematics I.

Students must obtain approval from each department representative before selecting electives. In exceptional cases, these may be from related fields; other courses can be taken with prior approval.
Cross-Listed Courses

Economics (Barnard)

**ECON BC3018 Econometrics. 4 points.**
Prerequisites: ECON BC3033 or ECON BC3035, and ECON BC2411 or STAT W1111 or STAT W1211, or permission of the instructor.

Specification, estimation and evaluation of economic relationships using economic theory, data, and statistical inference; testable implications of economic theories; econometric analysis of topics such as consumption, investment, wages and unemployment, and financial markets.

Education

335-336 Milbank Hall
212-854-7072
Department Assistant: Patricia Argueta

The Barnard Education Program is committed to strengthening public education and addressing issues of equity and social justice, particularly in urban schools. We offer three tracks in Education: Urban Teaching-Elementary/Childhood Education, Urban Teaching-Secondary/Adolescent Education, and Education Studies. In these tracks, students develop a critical lens for looking at the issues facing public schooling and consider ways to promote fair and inclusive policies and practices for all children in our public system. The program is open to all undergraduates at Columbia (BC, SEAS, GS, CC) who are interested in becoming certified teachers, working with young people in human service agencies, or preparing for careers related to education.

Urban Teaching Minors/Special Concentrations: Our goal is to prepare students to become skilled and reflective teachers who can effectively respond to the learning needs of diverse learners, and create supportive and intellectually stimulating classroom communities. Students learn to create innovative curriculum; gain experience observing, tutoring, and teaching a diverse range of children and young people; develop confidence in their role as teachers who can promote fair and inclusive school practices; and graduate with certification to teach in New York. (Note: we are part of an interstate agreement for reciprocal certification with many other states.)

This program is registered by the New York State Department of Education and accredited by the Association for Advancing Quality in Educator Preparation (AAQEP). These tracks prepare students to obtain a teaching position as a certified teacher upon graduation and/or to pursue graduate studies in education, public policy, sociology, youth studies, and other related fields.

Education Studies Minor/Special Concentration: This track prepares students to pursue graduate studies or positions in public policy, sociology, history, youth studies, philosophy, psychology, and other areas where K-12 education is frequently a focus of coursework and scholarship. Students learn to think deeply and knowledgeably about the manner in which schools socialize as well as educate citizens, and examine how the interests of different stakeholders are privileged or neglected. The courses are linked by a focus on educational inequality and youth studies. This track does not lead to certification.

All three tracks are minors (BC) or special concentrations (CC, GS, SEAS) and are intended to complement a major’s disciplinary specialization and methodological training. In addition to the requirements of the minor/special concentration, students must complete a major.

Student Learning Outcomes

1. Knowledge of Self: Students investigate how educational experiences in and out of school affect their vision for teaching
and learning, use that knowledge to reflect upon and critique their practice, and set goals for continuing growth as equitable, multicultural educators.

2. Knowledge of Students: Students understand the importance of getting to know the children and youth in their classrooms; develop specific strategies that aid in understanding students’ needs, capacities, interests, funds of knowledge, and social identities; and construct learning experiences that are responsive and relevant to their students.

3. Knowledge of Content: Students develop knowledge and skills to critique the social, political, cultural, and historical forces that construct traditional content knowledge and design academic content that is dynamic, inquiry-based, and encompasses multiple literacies, and cultural perspectives.

5. Knowledge of Context: Students investigate the complex ways in which social, political, cultural, and historical forces shape school contexts, including students’ opportunities in schools, teacher empowerment, effective leadership, roles of parents and the community, and patterns of similarity and difference across schools.

The Education Program is accredited by Teacher Education Accreditation Council (TEAC) to recommend students who complete the program for Initial Certification in either Childhood Education (Grades 1-6) or Adolescent Education (Grades 7-12). Graduates of the program are also eligible for membership in the Interstate Certification Agreement, a reciprocal certification among forty-one states. We provide ongoing support to those who teach in the New York City area through our New Teacher Network.

To apply, visit our website (https://education.barnard.edu/applytotheprogram/). Students are encouraged to apply for admission by March of the sophomore year but no later than the first Tuesday in September of the junior year. Those who plan to study abroad during junior year should apply by the spring of the freshman year, but no later than the first Tuesday in September of the sophomore year and take the Inclusive Approaches and Multicultural Pedagogy courses in the fall and spring of sophomore year. Admission criteria include good academic standing; evidence of commitment to the field of education; interest in issues of social justice issues as they affect education, particularly in urban schools; and capacity for growth as an intellectually resourceful and reflective teacher. Enrollment is limited.

Note: Senior year student teaching may conflict with other opportunities at Barnard (e.g., PSYC BC3465 Field Work and Research Seminar. The Barnard Toddler Center, PSYC BC3466 Field Work and Research Seminar: The Barnard Toddler Center). Students with these interests should arrange their schedules accordingly.
Secondary/Adolescent Education (To Teach Grades 7-12)

This program leads to the New York State Initial Certification in Adolescent Education (Grades 7-12) in the fields of English, Foreign and Ancient Languages, Mathematics, the Sciences, and Social Studies. Students must complete a total of 23-26 credits from the following course of study:

**Requirement A - Educational Foundations**

For students who have already taken EDUC BC3032, PHIL UN2100, SOCI UN3225, or ECON BC3012 to fulfill Requirement A prior to Fall 2018 do not need to enroll in EDUC BC1510 to fulfill the requirement.

**Additional Urban Teaching Certification Requirements: Adolescent/Secondary**

Students seeking certification in Adolescent Education must also complete 36 credits in the content area for which they seek certification. Typically, students major in the subject area for which they are seeking certification. Students must earn a grade of C or better for each course taken in the content core.

**English:**

A total of 36 credits of English.

**Foreign Languages:**

A total of 36 credits in French, German, Greek, Italian, Latin, or Spanish.

**Mathematics:**

A total of 36 credits of Mathematics.

**Science:**

A total of 36 credits in sciences including a minimum of 18 credits of collegiate-level study in the science or each of the sciences for which certification is sought: Biology, Chemistry, Physics, or Earth Science. Please note that psychology does not count as a science for NYS Teacher Certification.**

**Social Studies:**

A total of 36 credits, including 6 credits of American History; 6 credits of European or World History; 3 credits of non-Western study; and any other distribution to make 36 credits, chosen from credits in History, Political Science, Anthropology, Sociology, and Economics.

**Certification Requirements**

The Urban Teaching program is accredited by AAQEP and approved by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (grades 1-6) or Adolescent Education (grades 7-12). New York State has reciprocity with most other states, allowing graduates of the program the ability to apply for certification in another state through our membership in the Interstate Certification Agreement.

Certification is based on demonstrated competency in both academic and field settings. Students are required to complete a minimum of 360 hours of educational based field experiences. 260+ hours must be supervised field based experiences. Students must pass the New York State Teacher Certification Examinations and the edTPA performance assessment. Also required are workshops in Child Abuse Identification; School Violence Intervention and Prevention; and the Dignity for All Students Act (DASA), offered at Teachers College.

**Requirements for the Education Studies Minor/Special Concentration**

To complete the Minor (BC) or Special Concentration (CC/GS) in Education Studies, students must complete 20-24 points of course work, listed below.

The Education Studies track requires a minimum of six courses:

EDUC BC2045 Colloquium: Current Issues in STEM Education. 1 point.
Required for Barnard NOYCE Scholars.
Prerequisites: enrollment is open to all, including first-year students. This course introduces students to current topics in mathematics education through the Barnard College STEM Colloquium Series and discussion sessions. Students will explore the sociopolitical contexts in which STEM education takes place, and consider the implication of these contexts for mathematics teaching and learning in light of the topics presented.

EDUC BC2048 Fieldwork in Education. 1 point.
Investigates what it means to teach and what it means to learn in formal or informal urban educational settings. Fieldwork required.

EDUC BC2055 Urban School Practicum. 3 points.
Prerequisites: This course is a prerequisite for Student Teaching; grade of B or better required to continue. Enrollment is limited to students accepted into the Education Program (Urban Teaching or Education Studies). NYCDOE Fingerprinting required.
Corequisites: EDUC BC2052, EDUC BC2062
Consists of weekly class meetings combined with elementary, middle or high school classroom internship (depending on desired certification level). Students observe and apply theoretical principles of pedagogy to teaching and learning. Class meetings provide opportunities to reflect on internship and focus on instructional strategies and classroom management techniques. Meets for two hours per week, plus a minimum of six hours per week in the field.

, Section 001: Elementary Urban Teaching (Corequisite: EDUC BC2052)
, Section 002: Secondary Urban Teaching (Corequisite: EDUC BC2062)
, Section 003: Education Studies (no corequisite courses).

EDUC BC3025 Inclusive Approaches to Teaching Literacy: Theory and Practice. 4 points.
This seminar engages students in an exploration of how schools prepare students to be literate across multiple subject areas. Engaging with theory and practice, we will look at how students learn to read and write, considering approaches for literacy instruction from early childhood through adolescence. Understanding that schools are required to meet the needs of diverse learners, we will explore literacy instruction for K-12 students with special needs, multilingual learners, and students from diverse cultural backgrounds.

EDUC BC3032 Contemporary Issues in Education. 4 points.
Prerequisites: the instructor's permission. Course enrollment will be determined after the first class meeting; application is available on CourseWorks. Open to all students; preference given to Urban Teaching, Education Studies and Urban Studies students.
Contemporary Issues in Education is an introduction to the range of intellectual dilemmas that are a part of American schooling through the illumination of the various social, philosophical, economic, and institutional forces that shape the learning environment. The topics serve to promote critical thought of educational dilemmas stemming from issues such as power and authority, the intersection of race, gender, socio-economic inequity, and challenges that confront students such as identity, marginalization and resiliency. This course is open to all students interested in investigating one's best "fit" in the education realm, which may include classroom teaching, educational policy, reform, and NGO-based involvement.

EDUC BC3040 Migration, Globalization, and Education. 4 points.
Globalization and mass migration are reconfiguring the modern world and reshaping the contours of nation-states. New technologies that facilitate the movement of information, goods, and people across borders have made it easier for people to remain culturally, politically, economically and socially connected to the places from which they migrated. This seminar focuses on the experiences of the youngest members of these global migration patterns—children and youth—and asks: What do these global flows mean for educating young people to be members of the multiple communities to which they belong?

EDUC BC3042 Gender, Sexuality, and Schooling. 4 points.
Broadly, this course explores the relationship between gender, sexuality, and schooling across national contexts. We begin by considering theoretical perspectives, exploring the ways in which gender and sexuality have been studied and understood in the interdisciplinary field of education. Next, we consider the ways in which the subjective experience of gender and sexuality in schools is often overlooked or inadequately theorized. Exploring the ways that race, class, citizenship, religion and other categories of identity intersect with gender and sexuality, we give primacy to the contention that subjectivity is historically complex, and does not adhere to the analytically distinct identity categories we might try to impose on it.

EDUC BC3044 Education and Social Change in Comparative Global Contexts. 4 points.
This course will examine the relationship between education and social change in different regions of the world, with a focus on vulnerable populations (e.g., indigenous groups, street and working children, immigrants, women and girls; refugees).

EDUC BC3045 Complicating Class: Education and the Limits of Equity. 4 points.
In this course, we start from the premise that a failure to understand what social class is and how social class matters in daily life stops us from having conversations about the possibilities and limitations of schooling and, as such, prevents us from doing what we can to improve the schooling experiences of poor and working-class students. Throughout the semester, we will work to "complicate class", reconsidering what class is, why class matters, and how we can best think about the relationship between social class and schooling. You will develop a language for talking about class, considering the affordances and constraints of various conceptions of class. You will
also leave with critical questions about the possibilities and limitations of relying on schools as a solution to social problems. Recognizing restraints, we will conclude by reflecting on how we might work toward creating more equitable learning environments for poor and working-class students.

EDUC BC3050 Science in the City. 4 points.
Prerequisites: the instructor’s permission.
In partnership with the American Museum of Natural History students investigate science, science pedagogical methods, and ways to use New York City as a resource for science teaching and learning. Sessions will be held at Barnard and the museum. Field trips and fieldwork required. Non-science majors pre-service elementary students and first year students, welcome. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective.

EDUC BC3051 Seminar in Urban Education. 4 points.
This seminar serves as the capstone course for students pursuing the Education Studies minor/special concentration or the Urban Studies major/concentration with an Urban Education Specialization.

The Seminar in Urban Education explores the historical, political and socio-cultural dynamics of urban education in the U.S. context. Over time, a range of social actors have intervened in the “problem” of urban education, attempting to reshape and reform urban schools. Others have disputed this “problem” focused approach, arguing that policy makers, teachers, and researchers should start from the strengths and capacities located in urban communities. Despite decades of wide ranging reform efforts, however, many urban schools still fail to provide their students with an adequate, equitable education. Seminar in Urban Education investigates this paradox by pursuing three central course questions: 1) How have various social actors tried to achieve equity in urban schools over time? 2) What are the range and variation of assets and challenges found in urban schools? and 3) Considering this history and context, what would effective reform in a global city like NYC look like? Students will engage these questions not only through course readings and seminar discussions, but through a 40-hour field placement in a New York City public school classroom, extra-curricular program, or other educational site.

EDUC BC3052 Math and the City. 4 points.
Prerequisites: the instructor’s permission.

In partnership with NYC public school teachers, students will have opportunities to engage in mathematical learning, lesson study, curriculum development, and implementation, with a focus on using the City as a resource. Students will explore implications for working with diverse populations. Non-math majors, pre-service elementary students and first-year students welcome. Fieldwork and field trips required. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective.

EDUC BC3053 Multicultural Elementary Pedagogy. 4 points.
This seminar will engage prospective teachers in developing effective strategies for teaching at the elementary school level in ways that draw upon five specific domains of knowledge: knowledge of self, content, pedagogy, context and students. Students will be introduced to a variety of teaching approaches and develop ways to adapt them to teach various subjects to students in urban public school settings, understanding the intellectual, social and emotional needs of elementary school students. Students will learn to write lesson plans, develop assessments and practice teaching in “microteaching” sessions taught to peers. We will explore state standards, approaches to classroom management, and Universal Design for Learning as we develop approaches to create caring, democratic learning communities.

EDUC BC3054 Multicultural Secondary Pedagogy. 4 points.
What does it mean to be an excellent teacher? The Seminar in Secondary Multicultural Pedagogy will engage this question as you work to develop methods for teaching your subject(s) in ways that draw upon five specific domains of knowledge: knowledge of self, content, pedagogical methods, context, and students. You will be introduced to a variety of multicultural teaching approaches and develop ways to adapt them to your particular subject area and to the intellectual, social, and emotional needs of adolescent learners. Throughout the course, we will consider how to effectively differentiate instruction for and support ELL students and students with special needs. Seminar sessions will include discussions, presentations of lessons, group activities, and problem-solving issues teachers encounter in the classroom. We will explore culturally responsive approaches to: learning; learning standards; instruction and assessment; creating caring, democratic learning communities; selecting curriculum content, and engaging all students in learning. Assignments will ask you to reflect on the teaching/learning process in general, and on the particulars of teaching your academic discipline. We will accomplish this through lesson planning, practice teaching two mini-lessons, observing your peers teaching and offering feedback, and exploring stances and strategies for multicultural pedagogy in your content area.

EDUC BC3055 Arts and Humanities in the City: Critical Literacy and Digital Storytelling. 4 points.
Using the theme of “Arts and Humanities in the City”, this seminar will build participants’ knowledge of critical literacy, digital storytelling
methods, and ways to use New York City as a resource for teaching the Arts (Dance, Theatre, Music, and Visual Arts), Social Studies, and English Language Arts in grades K-12. Critical literacy is an approach to teaching and learning that focuses on developing students’ abilities to read, analyze, understand, question, and critique hidden perspectives and socially-constructed power relations embedded in what it means to be literate in a content area.

EDUC BC3058 Science in the City II: Preparing Future Scientists Now. 4 points.
Prerequisites: the instructor’s permission. Open to Non-science majors, pre-service elementary students, and first-year students. Students investigate the science of learning, the Next Generation Science Standards, scientific inquiry and engineering design practices, and strategies to include families in fostering student achievement and persistence in science. Fieldwork required. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective.

EDUC BC3250 EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY. 4 points.
The rise in political polarization and social inequality over the past few decades has challenged the ideals that public schools were founded on nearly two centuries ago. In the past few years, we have witnessed a surge in homophobic, racist, misogynist, and xenophobic rhetoric in our society and our schools. At the same time, teachers in classrooms across this country have been engaged in the difficult work of challenging oppression and injustice in their schools, communities, and nation. These teachers know that the future of our democracy is at stake. Using a historical and sociological framework, this course examines the past and present conditions that have led to political polarization, escalating inequality, and persistent injustice. It seeks to examine the lineage of racism, sexism, nativism, and imperialism on our nation and its schools and to consider the extent to which these challenges are uniquely American or part of a more global phenomenon. It offers an introduction to the deep current of American social, political, and economic culture that many argue has produced the challenges that our nation faces today: personal and political gain marred by intolerance, derived from wealth, and rooted in the history of segregation, sexism, and exploitation. Instead of seeing these challenges as separate entities, the course acknowledges the intersectional nature of power and politics. Students will consider how these conditions affect their roles as educators and the lives of
the youth and families in their schools and communities. They will leave the course with a deeper appreciation and understanding of the historical and sociological antecedents that have contributed to polarization, inequity, and injustice around the globe.

Cross-Listed Courses

PSYC BC2134 Educational Psychology. 3 points.
Prerequisites: BC1001 or permission of the instructor.
Through a participative classroom model, the major theories of child and adolescent development and learning fundamental to the educative process are examined. Analysis of applications and implications of psychological knowledge for classroom teaching through observations and research in elementary and secondary school classes. Examines models of instruction and assessment; motivation, teaching, and learning strategies; and gender, economic, and racial issues.

PSYC BC3382 Adolescent Psychology. 4 points.
Prerequisites: BC1001 and BC1129 Developmental Psychology or permission of the instructor. Enrollment limited to 20 senior majors. Barnard students receive priority.
Examines adolescent development in theory and reality. Focuses on individual physiological, sexual, cognitive, and affective development and adolescent experiences in their social context of family, peers, school, and community. Critical perspectives of gender, race and ethnicity, sexuality, and “teen culture” explored.

URBS UN3310 Race, Space, and Urban Schools. 3 points.
Many people don’t think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a “neighborhood school”? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory.

Mission

The offering in English is designed to foster good writing, effective speaking, and heightened understanding of culturally significant texts. We encourage students majoring in English to develop their responsiveness to the literary imagination and their sensitivity to literary form through disciplined attention to language, historical contexts, and critical and scholarly methods.

For all students, including transfers, a minimum of six semester courses must be completed while the student is in residence at Barnard.
Student Learning Objectives for the English Major and the American Literature, Film, Theatre, and Creative Writing Concentrations

Our objectives represent the teaching aims of the English Department. All instructors are free to decide which of these objectives are consistent with their particular courses and teaching methods.

Students who graduate with a major in English should be able to obtain the following objectives:

- demonstrate critical and analytical reading skills.
- demonstrate critical and analytical writing skills.
- display an understanding of literary genre, form, and language.
- show a familiarity with the issues of literary criticism and theory.
- show an awareness of literary history.
- engage deeply with at least one major author.
- incorporate secondary sources, with proper citations, in a larger essay.
- understand texts in their cultural contexts.

Specific to the America Literature Concentration:

- demonstrate familiarity with American authors and texts across the span of American literary history.
- analyze American texts of various genres including poetry, fiction, drama, autobiography, and political documents.
- write a substantial research project on American texts. This project should integrate primary and secondary materials, demonstrating the student's ability to analyze texts and her familiarity with the critical landscape.

Specific to the Creative Writing Concentration:

- develop a mastery of the linguistic demands of a variety of literary forms.
- demonstrate a critically sound grasp of structure in prose and poetry.
- explore the formal possibilities of the genres in which they are working.
- develop critical sophistication in reading and speaking about others' work.
- grasp the importance of thoroughly revising their own work.
- detect concrete and figurative language in others' work.
- achieve precision in their own use of concrete and figurative language.
- produce an original piece of fiction, a set of poems, a play, or a work of creative non-fiction.

Specific to the Film Studies Concentration:

- explain the major concepts or ideas of film theory.
- write a basic/elementary screenplay.
- demonstrate an understanding of film's relationship to a range of other disciplines across the humanities and social sciences.

- analyze dramatic literature in the context of theatre history, theory, criticism, and performance.
- develop skills in critical reading and writing, textual analysis, independent research, and oral presentation.

Requirements for the Major
A major program consists of at least ten courses. Six of the ten must be taken at Barnard or Columbia.

ENGL BC3193 Critical Writing (Formerly called Literary Criticism & Theory. Best taken in the sophomore year.) 4

ENGL BC3159 and ENGL BC3160 The English Colloquium. 1 8
Two courses in literature written before 1900. 2

Three electives chosen from the entire English Department offering, excluding The English Conference. One of these courses must be a literature class. 3 6-8

Two senior seminars given by the Barnard English Department. 4 8
A course in American literature. It can simultaneously fulfill other requirements (elective, before 1900, etc.) where appropriate. 3-4

1 Taken in the junior year. All sections of BC3159 (fall semester) are on the Renaissance; all sections of BC3160 (spring semester) are on the Enlightenment. Students may substitute three courses for the two semesters of Colloquium. At least one of these three must cover literature before 1660 (i.e., Medieval or Renaissance); one other must cover literature of the 17th or 18th century (i.e., The Age of Enlightenment); the last can cover either literature before 1660 or literature of the 17th or 18th century. Students may also take one Colloquium and two substitutions, as long as one of the substitutions covers literature of the same period as the Colloquium it replaces. The other substitution may cover either literature of that same time period or literature of the time period of the other Colloquium. In either case, one of the courses used as a substitution for either Colloquium will also count towards satisfying the "before 1900" requirement. Please note that only one Colloquium substitution may be a Shakespeare course. For further details, refer to the Substitutions tab above.

2 If you have substituted courses for the Colloquium requirement, one of the substitutions will count towards fulfillment of this requirement. For details, refer to the Substitutions tab above.

3 With the approval of the Chair of the Barnard Department of English, one course based in the literature of a foreign language (in English translation or in the original language) can count as an elective.

4 Seniors who wish to substitute an independent study for a senior seminar should consult the Chair of the English Department. Permission is given rarely and only to proposals meeting the criteria specified under the guidelines for ENGL BC3999 Independent Study.

Concentrations in the Major
American Literature
An English major with a concentration in American literature consists of 10 courses. Six of the 10 must be taken at Barnard or Columbia. Students interested in an American literature concentration should consult with Prof. Lisa Gordis (lgordis@barnard.edu).

ENGL BC3193 Critical Writing (Formerly called Literary Criticism & Theory. Best taken in the sophomore year.) 4

ENGL BC3159 and ENGL BC3160 The English Colloquium. 1 8
Two courses in literature written before 1900. One of these courses must be either 2

ENGL BC3179 or ENGL BC3180 American Literature to 1800
American Literature, 1800-1870 6-8

One survey course on American literature between 1871 and the present, either

ENGL BC3181 or ENGL BC3183 American Literature, 1871-1945
American Literature since 1945 3
An additional American literature course. 3-4

An elective chosen from the entire English Department offering, excluding The English Conference. 3 3-4
Two senior seminars, one of which must focus on American literature. 8
Students interested in a creative writing concentration should consult with Prof. Ross Hamilton (rhamilto@barnard.edu).

Creative Writing

An English major with a concentration in creative writing consists of 11 courses. Six of the 11 must be taken at Barnard or Columbia. The creative writing concentration differs from the others in that students must submit an application to be considered for it.

Interested majors must be in the second semester of their junior year to apply. Applications are due by the last day of the advanced registration period in that semester (occuring in mid-April for the spring semester or in mid-November for the fall semester). The application deadline for English majors who are second semester juniors in spring 2020 is Friday, April 24, 2020, 11:59 pm.

Applications must consist of 15-20 pages of prose (including fiction, personal narrative, creative non-fiction or playwriting) and/or poetry writing, and must be submitted online via the Barnard Creative Writing Concentration Application Form (https://goo.gl/forms/GOXDg580fqZ0bGv13/).

Students interested in a creative writing concentration should consult with Dr. Timea Szell (tszell@barnard.edu) or Nia Judelson (njudelso@barnard.edu).

ENGL BC3193 Critical Writing (Formerly called Literary Criticism & Theory: Best taken in the sophomore year.) 4

ENGL BC3159 and ENGL BC3160 The English Colloquium. 1 8

Two courses in literature before 1900. 2 6-8

Two creative writing courses, preferably one introductory and one advanced. 6

Introductory writing courses include

ENGL BC3105 through ENGL BC3113

ENGL BC3120 Creative Non-Fiction: Making Facts Sing

ENGL BC3122 Creative Non-Fiction: The Gendered Memoir

ENGL BC3134 Creative Non-Fiction

Advanced writing courses include

ENGL BC3114 through ENGL BC3118

ENGL BC3125 Advanced Poetry Writing II

ENGL BC3126 Advanced Projects in Prose Writing

ENGL BC3132 Fiction Writing: Longer Forms

ENGL BC3150 Invention, Revision, and Imagination

ENGL BC3152 Creative Nonfiction: The Queer Story

ENGL BC3208 What’s Your Story Anyway?—Trauma Resistance through Creative Writing

ENGL BC3229 American Lives, American Stories

Two electives chosen from the entire English Department offering, excluding The English Conference. One of these electives must be a literature class. The other elective may be in literature or creative writing. 3

One senior seminar given by the Barnard English Department. 4 4

A Senior Project 5

A course in American literature. It can simultaneously fulfill other requirements (elective, before 1900, etc.) where appropriate. 3-4

Students may substitute three courses for the two semesters of Colloquium. At least one of these three must cover literature before 1660 (i.e., Medieval or Renaissance); one other must cover literature of the 17th or 18th century (i.e., The Age of Enlightenment); the last can cover either literature before 1660 or literature of the 17th or 18th century.

Students may also take one Colloquium and two substitutions, as long as one of the substitutions covers literature of the same period as the Colloquium it replaces. The other substitution may cover either literature of that same time period or literature of the time period of the other Colloquium.

In either case, one of the courses used as a substitute for either the fall or spring Colloquium will also count towards satisfying the “before 1900” requirement.

Please note that only one Colloquium substitution in total may be a Shakespeare course.

To see if other courses may qualify, consult with your major adviser or the Chair of the English Department.

Courses which can serve as a Medieval/Renaissance substitution include

- ENGL BC3133 Early Modern Women Writers
- ENGL BC3135 Laughing: Wit and Humor in the Renaissance
- ENGL BC3136 Renaissance Epic
- ENGL BC3154 Chaucer Before Canterbury
- ENGL BC3155 Canterbury Tales
- ENGL BC3158 Medieval Literature: Literatures of Medieval Britain
- ENGL BC3165 The Elizabethan Renaissance: The Complete Nondramatic Poetry of Marlowe and Shakespeare
- ENGL BC3166 Seventeenth-Century Prose and Poetry
- ENGL BC3167 Milton
- ENGL BC3169 Renaissance Drama
- ENGL BC3170 English Literature and Science 1600-1800
- ENTH BC3190 Diabolical Drama of the Middle Ages

Only one substitution may be a Shakespeare course.

- ENTH BC3136 Shakespeare in Performance
- ENTH BC3147 Shakespeare, Theory, Performance

or ENGL BC3163 Shakespeare I
or ENGL BC3164 Shakespeare II

Courses which can serve as an Age of Enlightenment substitution include

- ENGL BC3133 Early Modern Women Writers
- ENTH BC3137 Restoration and 18th-Century Drama
- ENGL BC3166 Seventeenth-Century Prose and Poetry
- ENGL BC3167 Milton
- ENGL BC3170 English Literature and Science 1600-1800
- ENGL BC3173 The Eighteenth-Century Novel
- ENGL BC3174 The Age of Johnson
- ENGL BC3179 American Literature to 1800

1 This course may count as either a Renaissance/Medieval substitution or an Age of Enlightenment substitution. Please note that it cannot simultaneously count for both substitutions.

Courses in Literature Written before 1900

If you have substituted two or three courses for the Colloquium requirement, one of the substitutions will count towards fulfillment of this requirement. To see if a course not listed here may qualify for this requirement, consult your major adviser and the Chair of the English Department.

Qualifying courses in literature written before 1900 can include

- ENGL BC1982 American Fiction
- ENGL BC3129 Explorations of Black Literature: Early African-American Lit. 1760-1890
- ENGL BC3133 Early Modern Women Writers
- ENGL BC3135 Laughing: Wit and Humor in the Renaissance
- ENGL BC3136 Renaissance Epic
- ENTH BC3136 Shakespeare in Performance
- ENTH BC3137 Restoration and 18th-Century Drama
- ENGL BC3141 Major English Texts I
- ENTH BC3145 Early American Drama and Performance: Staging a Nation
- ENGL BC3154 Chaucer Before Canterbury
- ENTH BC3147 Shakespeare, Theory, Performance
- ENGL BC3155 Canterbury Tales

ENGL BC3920 Senior Seminar: Migration, Immigration, and the Borders of American Literature
ENGL BC3927 Senior Seminar: "a d—d mob of scribbling women": Nineteenth-century American Women Writers

Courses in American Literature

To see if a course not listed here may qualify for this requirement, consult your major adviser and the Chair of the English Department.

Please note that as ENGL BC3229 American Lives, American Stories is a creative writing course and not a literature course, it cannot count toward the American literature requirement.

Substituting with Courses from Other Departments

ENGL BC3193 Critical Writing: (formerly called Literary Criticism & Theory) must be taken in the Barnard English Department.

To Qualify as a Substitution

For a literary period requirement, the substituting course must cover material from the same literary period covered by the course it is replacing, not just include some of that period's material in a larger range of literature. With the approval of the Chair of the Barnard English Department, one literature course taken outside the department in English translation or in another language can count as an elective. If your adviser or the Chair is not familiar with the course (even if given at Columbia), you must provide the syllabus.

Please note that the English Department requires that six of the ten courses required for graduation as an English major be taken at Barnard or Columbia.

ENGL BC1212 First-Year Writing: Critical Conversations: The Americas. 3 points.

ENGL BC3101 The Writer's Process: A Seminar in the Teaching of Writing. 4 points.

Prerequisites: Application process and permission of instructor. Exploration of theory and practice in the teaching of writing, designed for students who plan to become Writing Fellows at Barnard. Students will read current theory and consider current research in the writing process and engage in practical applications in the classroom or in tutoring. Writer's Process is only open to those who applied to and were accepted into the Writing Fellows Program. Note: This course now counts as an elective for the English major.

ENGL BC3102 Academic Writing Intensive. 4 points.

Academic Writing Intensive is a small, intensive writing course for Barnard students in their second or third year who would benefit from extra writing support. Students attend a weekly seminar, work closely with the instructor on each writing assignment, and meet with an attached Writing Fellow every other week. Readings and assignments focus on transferable writing, revision, and critical thinking skills students can apply to any discipline. Students from across the disciplines are welcome. This course is only offered P/D/F. To be considered for the course, please send a recent writing sample to clie@barnard.edu, ideally from your First-Year Writing or First-Year Seminar course, or any other writing-intensive humanities or social sciences course at Barnard (no lab reports please).
ENGL BC3103 The Art of the Essay. 3 points.
Prerequisites: Students who are on the electronic waiting list or who are interested in the class but are not yet registered MUST attend the first day of class.
(Formerly called Essay Writing.) Essay writing above the first-year level. Reading and writing various types of essays to develop one’s natural writing voice and craft thoughtful, sophisticated and personal essays. This course is not offered to first-years.

ENGL BC3104 The Art of the Essay. 3 points.
Prerequisites: Students who are on the electronic waiting list or who are interested in the class but are not yet registered MUST attend the first day of class.
Essay writing above the first-year level. Reading and writing various types of essays to develop one’s natural writing voice and craft thoughtful, sophisticated and personal essays.

Creative Writing
A writing sample is required to apply to all Barnard creative writing courses. As space is limited in creative writing courses, not all students who apply are guaranteed admittance.

Students are unable to self-register for Barnard creative writing courses. Interested students who have submitted writing samples may put the course on their online schedule, which will automatically place them on the wait list. If they are accepted, the instructor will take them off the wait list, but until that time no one is officially registered for the class.

The spring 2020 submission deadline for all creative writing courses is 11:59 pm, January 5, 2020. Please see the Applying to Creative Writing Courses page (https://english.barnard.edu/english/creative-writing-courses/) of the English Department website for directions.

The Creative Writing Admission Lists page (https://english.barnard.edu/english/admission-lists/) of the English Department website will update with admission lists as the department receives them from the professors. If an admission list is not posted for a course before its first meeting, attend it.

Please note: if you are accepted into a creative writing course, attendance at the first meeting of the course is mandatory. If you do not show up for the first class, your spot may be given to someone else.

ENGL BC3105 Fiction and Personal Narrative. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/.

Section 1: In this workshop you will read and write across genre works of formally inventive and exciting contemporary prose, developing an innovative vocabulary to discuss writing. We will think of writing as process, from weekly exercises to longer pieces that will be workshopped twice a semester.

Section 2 (priority Barnard first-year students; transfer and returning students will be accommodated if there is room in the course): This class centers on the appreciation, analysis, and practice of short literary fiction, including personal narrative. In addition to weekly writing exercises, twice a semester each student will make available to the entire class longer pieces for “workshopping” These pieces will receive written evaluations from instructor and peers both. We will also read and study narrative by published authors – historical and contemporary. In both student-generated and published work we will consider elements of prose narrative from structure to characterization, plot to voice, etc., in the hopes that such consideration will encourage student writers to expand their writerly repertoire and improve their work in terms of both craft and literary substance.

ENGL BC3106 Fiction and Personal Narrative. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/.
Short stories and other imaginative and personal writing.

ENGL BC3107 Introduction to Fiction Writing. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/.
Practice in writing short stories and autobiographical narrative with discussion and close analysis in a workshop setting.
By the middle of the semester, students will choose the piece that feels respond to plays, identifying elements and strategies, and each week curiosity and audacity lead to new possibilities. Students will read and their strongest work. The practices of experimentation and analysis, courses/writing-courses form can be found here: Writing sample required to apply. Instructions and the application

The class will explore a broad range of approaches to playwriting (https://english.barnard.edu/english/creative-writing-courses/). Assignments designed to confront the difficulties and explore the resources of language through imitation, allusion, free association, revision, and other techniques.

ENGL BC3110 Introduction to Poetry Writing. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. Varied assignments designed to confront the difficulties and explore the resources of language through imitation, allusion, free association, revision, and other techniques.

ENGL BC3113 Playwriting I. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. The class will explore a broad range of approaches to playwriting in a workshop setting. Each week, students will write in response to prompts that are designed to explicate different elements and principles of the form. The work will culminate at the end of the semester with the writing of a one act play. Classes will largely be spent reading and discussing students’ work but students will also be choosing from a wide selection of plays to read two each week.

ENGL BC3114 Playwriting II. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. What makes a play alive? Often a playwright is surprised into their strongest work. The practices of experimentation and analysis, curiosity and audacity lead to new possibilities. Students will read and respond to plays, identifying elements and strategies, and each week bring in fragments and scenes written in response to weekly prompts. By the middle of the semester, students will choose the piece that feels the most viable and develop it into what in most cases will be a thirty page play. NOTE: Playwriting I (ENGL BC3113) is NOT a prerequisite, and students need not have written a play before.

ENGL BC3115 Story Writing I. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. A workshop in writing, with emphasis on the short story.

ENGL BC3116 Story Writing II. 3 points.
Prerequisites: Some experience in writing of fiction. Conference hours to be arranged. Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. Advanced workshop in writing, with emphasis on the short story. Some experience in the writing of fiction required. Conference hours to be arranged.

ENGL BC3117 Fiction Writing. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. Assignments designed to examine form and structure in fiction.

ENGL BC3118 Advanced Poetry Writing I. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. Weekly workshops designed to generate and critique new poetry. Each participant works toward the development of a cohesive collection of poems. Readings in traditional and contemporary poetry will also be included.
ENGL BC3120 Creative Non-Fiction: Making Facts Sing. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. This course will challenge students to take on what are considered either difficult topics (e.g. in science and math) or "mundane" topics and create convincing and clear narratives therefrom. We will consider writing from John McPhee, Natalie Angier, Oliver Sacks, Nicholson Baker, and others. Through iterative writing exercises, research, and interviews, students will learn how to breathe life into complex material.

ENGL BC3122 Creative Non-Fiction: The Gendered Memoir. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. A workshop in writing short autobiographical story with particular attention to the role gender plays in shaping experience. Focus on student writing, along with readings from the work of authors such as Augusten Buroughs; Alice Sebold; Alison Bechdel; Mary Karr, and others.

, PLEASE NOTE: This course has been renumbered. It was previously ENGL BC3120, section 3 and has not changed in content.

ENGL BC3125 Advanced Poetry Writing II. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/. A further study of poetic practice for committed student-writers with experience in writing and reading poems. In the classroom, student poems and ideas about poetics are shared, questioned, and critiqued. There will also be readings in and critical interpretation of traditional and contemporary poetry.

ENGL BC3126 Advanced Projects in Prose Writing. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: Writing sample required to apply. required cover sheet and instructions are available here: http://english.barnard.edu/forms-procedures/forms. Students cannot add this course to their schedules until after they are admitted.

Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/). Independent projects in imaginative writing in prose, including the genres of fiction, nonfiction, memoir, novellas, inter-related stories, and others. Class meetings consist of a few initial lectures on narrative followed by workshops focused on student writing in progress.

ENGL BC3132 Fiction Writing: Longer Forms. 3 points.
Not offered during 2019-20 academic year.

Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/). This course will explore longer fictional forms: linked stories, novels and novellas.

ENGL BC3134 Creative Non-Fiction. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/). Explores how to write essays based on life, with some comics and cartooning thrown in.

ENGL BC3150 Invention, Revision, and Imagination. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/). A creative writing workshop in fiction, devoted to the imaginative process, and most specifically, to the arts of invention and revision. In addition to considering the wellspring of creative ideas themselves, students will write stories in a variety of lengths—moderate, long, and as short-shorts. Through this process, apprentice writers will become intimate with the most essential aspect of creating imaginative work: the dedication to seeing one’s ideas morph and grow over time.

ENGL BC3152 Creative Nonfiction: The Queer Story. 3 points.
Not offered during 2019-20 academic year.

Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/). Stories created and edited in this creative nonfiction workshop will focus on the lives and experiences of LGBTQ people. Written work may include essays, memoir, reportage, and other nonfiction. This work will be augmented by lectures, trainings, and reading about media representation of queer lives.

ENGL BC3208 What’s Your Story Anyway?—Trauma Resistance through Creative Writing. 3 points.
Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses/). In this class we will explore the process of healing from trauma through the art of storytelling. We will ground ourselves in the writing of Latina authors whose work demonstrates the resistance from erasure in the United States. The goal of the class is to understand the connection between trauma and healing, through storytelling and creative writing. Moreover, we will develop three pieces
of creative non-fiction that will encompass this relationship over the three different lenses of place, person and personal experience.

**ENGL BC3229 American Lives, American Stories. 3 points.**

Writing sample required to apply. Instructions and the application form can be found here: https://english.barnard.edu/english/creative-writing-courses (https://english.barnard.edu/english/creative-writing-courses/).

In this class we will discuss the narrative of the "American" story, and how stories of immigrants and minority identities redefine and complicate it. The goal of the class is to investigate how writers frame a sense of identity in relation to the "American ideal". We will explore this theme through three creative non-fiction pieces each focusing on a different perspective of place, person, and personal experience. What are your stories, and what makes them "American"?

**Speech**

Registration in these courses is limited.

**ENGL BC3121 Public Speaking. 3 points.**

Prerequisites: Enrollment limited to 14 students. Open only to undergraduates, preference to seniors and juniors. Attend first class for instructor permission. Registering for the course only through myBarnard or SSOl will NOT ensure your enrollment. This course will introduce you to principles of effective public speaking and debate, and provide practical opportunities to use these principles in structured speaking situations. You will craft and deliver speeches, engage in debates and panel discussions, analyze historical and contemporary speakers, and reflect on your own speeches and those of your classmates. You will explore and practice different rhetorical strategies with an emphasis on information, persuasion and argumentation. For each speaking assignment, you will go through the speech-making process, from audience analysis, purpose and debate, and provide practical opportunities to use these principles as peer tutors in the Speaking Fellow Program. 

**ENGL BC3123 Rhetorical Choices: the Theory and Practice of Public Speaking. 4 points.**

Prerequisites: Application process and permission of instructor. Enrollment restricted to Barnard students. Speaking involves a series of rhetorical choices regarding vocal presentation, argument construction, and physical affect that, whether made consciously or by default, project information about the identity of the speaker. In this course students will relate theory to practice: to learn principles of public speaking and speech criticism for the purpose of applying these principles as peer tutors in the Speaking Fellow Program. Note: This course now counts as an elective for the English major.

**Theatre**

Registration in ENTH seminars is limited to 16 students. See Theatre Department course descriptions for Western Theatre Traditions: Classical to Romantic (THTR V 3150) and Western Theatre Traditions: Modern (THTR V 3151).

**ENTH BC3136 Shakespeare in Performance. 4 points.**

Shakespeare’s plays as theatrical events. Differing performance spaces, acting traditions, directorial frames, theatre practices, performance theories, critical studies, cultural codes, and historical conventions promote differing modes of engagement with drama in performance. We will explore Shakespeare’s plays in the context of actual and possible performance from the Renaissance to the twenty-first century.

**ENTH BC3137 Restoration and 18th-Century Drama. 4 points.**

**Not offered during 2019-20 academic year.**

Prerequisites: Enrollment limited to 16 students. Sign-up with the English Department is required. Registering for the course only through myBarnard or SSOl will NOT ensure your enrollment. The date, time, and location that sign-up sheets go up is listed here: http://english.barnard.edu/sign-ups

Performance conventions, dramatic structures, and cultural contexts from 1660 to 1800. Playwrights include Wycherley, Etherege, Behn, Trotter, Centlivre, Dryden, Congreve, Farquhar, Gay, Goldsmith, and Sheridan.

**ENTH BC3139 Modern American Drama and Performance. 4 points.**

Modern American drama in the context of theatrical exploration, cultural contestation, performance history, and social change. Playwrights include Cothersons, Glaspell, O’Neill, Odets, Wilder, Stein, Williams, Miller, Hansberry, Albee, Parks, Ruhl, and Svich.
ENTH BC3144 Black Theatre. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 16 students. Exploration of Black Theater, specifically African-American performance traditions, as an intervening agent in racial, cultural, and national identity. African-American theatre artists to be examined include Amiri Baraka, Kia Corthron, W.E.B. Du Bois, Angelina Grimke, Langston Hughes, Georgia Douglas Johnson, Adrienne Kennedy, Suzan-Lori Parks, Adrian Piper, and August Wilson. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts majors.

ENTH BC3145 Early American Drama and Performance: Staging a Nation. 4 points.
Not offered during 2019-20 academic year.

Competing constructions of American identity in the United States date back to the early republic when a newly emerging nation struggled with the questions: What makes an American American? What makes America America? From colonial times forward, the stage has served as a forum to air differing beliefs as well as medium to construct new beliefs about Nation, self and other. The texts we will read, from colonial times through WWI, explore diverse topics such as politics, Native American rights, slavery, labor unrest, gender roles, and a growing immigrant population.

ENTH BC3147 Shakespeare, Theory, Performance. 3 points.
Not offered during 2019-20 academic year.

Course focuses on the historical and theoretical implications of Shakespearean drama in performance; attention given to early modern and modern history of Shakespeare's plays onstage, and to film, television, and digital performance. Substantial engagement with literary, cultural, and performance theory. Fulfills one (of two) required courses in dramatic literature OR Shakespeare requirement for Theatre/Drama and Theatre Arts majors.

ENTH BC3186 Modern Drama. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT),
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 16 students. Sign-up with the English Department is required. Registering for the course only through myBarnard or SSOL will NOT ensure your enrollment. The date, time, and location that sign-up sheets go up is listed here: http://english.barnard.edu/sign-ups
Course traces the literary, theoretical, and historical development of drama from the 1850s onward, treating the plays of (among others) Ibsen, Strindberg, Chekhov, Brecht, Beckett, Soyinka, Churchill, and critical/theoretical texts by Nietzsche, Freud, Brecht, Artaud, Butler, and others.

ENTH BC3190 Diabolical Drama of the Middle Ages. 3 points.
Hell bursts onto the European stage at the end of the Middle Ages. Satan and his attendant devils, although present in earlier forms of Christian drama, become a defining feature of the dramatizations of Christian history and morality in Late Medieval England. The devils of these plays are disruptive, anarchic, seductive and repulsive. They are rhetorically bewitching and morally dangerous. This course will pay close attention to these devils and their devilry. What do they do? How do they speak? What do they know and what choice do they have in being so diabolical? Rather than viewing devils simply as spiritual antagonists, instead we will investigate them as complex creatures doing serious theological work in the difficult and spiritually tumultuous towns of late medieval England. Through close critical inquiry, contextual reading and some of our own imaginative stagings, we will explore the central role of the "diabolic" in late medieval drama and its sometimes troubling vision of Christian life.

Language and Literature

ENGLISH CONFERENCE (ENGL BC3091 through ENGL BC3099):
Various topics presented by visiting scholars in courses that will meet for two to four weeks during each semester. Topics, instructors, and times will be announced by the department. Students must attend all classes to receive credit for this course.

ENGL BC1982 American Fiction. 3 points.
An introduction to race, gender, indigeneity, colonialism and class in American fiction from the 18th to the mid-20th century. Writers include Rowson, Hawthorne, Melville, Stowe, Dunbar, James, Zitkala-Sa, Wharton, Faulkner, and Brooks.

ENGL BC3097 The English Conference: The Lucyle Hook Guest Lectureship. 1 point.
The English Conference: The Lucyle Hook Guest Lectureship is a two to four-week course each semester on a special topic presented by a visiting scholar. The series was endowed by a gift from Professor Emerita of English Lucyle Hook to bring our students and faculty the perspective of scholars of literature in English working outside the College community. It can only be taken for pass/fail for 1 point. Students must attend all four class sessions and write a final paper in order to receive credit for this course.

To see the dates/times that The English Conference will meet this semester, the current course description, and the biography of the visiting scholar, please visit the English Department website: https://english.barnard.edu/english/english-conference/.

ENGL BC3129 Explorations of Black Literature: Early African-American Lit. 1760-1890. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).
Prerequisites: Enrollment limited to 18 students. Poetry, prose, fiction, and nonfiction, with special attention to the slave narrative. Includes Wheatley, Douglass, and Jacobs, but emphasis will be on less familiar writers such as Brown, Harper, Walker, Wilson, and Forten. Works by some 18th-century precursors will also be considered.

ENGL BC3130 The American Cowboy and the Iconography of the West. 3 points.
We will consider the image and role of the cowboy in fiction, social history, film, music, and art. Readings will include Cormac McCarthy's The Border Trilogy.

ENGL BC3131 The Shadow Knows. 3 points.
Prerequisites: Enrollment limited to 25 students. The well-known story of Peter Pan's lost shadow, attached by Wendy, seems to belong to the world of fantasy. But it reminds us of an everyday fact: in the world of art, shadows are arbitrary. They can come and go at the whim of artist or writer. While in life we have shadows with us as long as we breathe, in literature and the visual arts, and often in our spoken words, they require--and deserve--constant attention. If on a literal level shadows emphasize light, space, and corporeal reality, in artistic uses and metaphoric speech they express some of our deepest emotions, from fear to desire; they invoke mystery and mystery; they teach us and tease us. This course will investigate shadows with us as long as we breathe, in literature and the visual arts, and often in our spoken words, they require--and deserve--constant attention. ENGL BC3133 Early Modern Women Writers. 4 points.
Prerequisites: Enrollment limited to 15 students. PLEASE NOTE: starting the spring 2015 semester, there will NOT be a departmental sign-up sheet for this class. Despite popular conceptions insisting that the ideal Renaissance woman was silent, as well as chaste and obedient, many women in the early modern period (c. 1550-1800) defied such sentiments by writing, circulating and publishing their own literature. Under the influence of humanism, a generation of educated women arose who would become both the audience for and contributors to the great flowering of literature written in sixteenth and seventeenth century England. As we examine how these women addressed questions of love, marriage, age, race and class, we will also consider the roles women and ideas about gender played in the production of English literature. We will read from a range of literary (plays & poetry) and non-literary (cookbooks, broadside, midwifery books) texts. Seminar participants will be asked to circulate a formal paper for peer review and complete two digital projects.

AFEN BC3134 Unheard Voices: African Women's Literature. 4 points.
How does one talk of women in Africa without thinking of Africa as a ‘mythic unity’? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora.

ENGL BC3135 Laughing: Wit and Humor in the Renaissance. 3 points.
Not offered during 2019-20 academic year.

USED TO BE 3137 SEC. 2: NUMBERING HAS CHANGED, NOT CONTENT.
An examination of the varieties of wit and humor in the European Renaissance, with an emphasis on England. How was wit imagined? What were its benefits? How did laughter affect the body? Why is sex funny? How does wit relate to cruelty? Authors include Arentino, Rabelais, Marguerite de Navarre, Louise Labé, Thomas More, Philip Sidney, John Harrington (inventor of the water closet), John Donne, Aphra Behn, and some joke collections.

ENGL BC3136 Renaissance Epic. 3 points.
The epic tradition raises crucial questions about the interrelationship of literature and power. In telling the story of war and empire building, how does epic both promote and also challenge the cause of the winner? How does epic preserve a space for more lyrical forms of subjectivity? What does this literary form tell about the role of women, the nameless majority and the global ‘other’ in the West? In this course, we will trace the European epic tradition, studying Homer’s Iliad, Virgil’s Aeneid, Spenser’s The Faerie Queen and Milton’s Paradise Lost. Finally, we will read a contemporary poet’s reflection on this tradition, Alice Oswald’s Memorial: An Excavation of the Iliad.

ENGL BC3141 Major English Texts I. 3 points.
Prerequisites: Application required: https://goo.gl/forms/ooLPXWnAYb7xetL72. Enrollment limited to 25 students.
Application required: https://goo.gl/forms/ooLPXWnAYb7xetL72.
A chronological view of the variety of English literature through study of selected writers and their works. Autumn: Beowulf through Johnson.

ENGL BC3142 Major English Texts II. 3 points.
A chronological view of the variety of English literature through study of selected writers and their works. Spring: Romantic poets through the present.

ENGL BC3143 Middle Fictions: Long Stories, Short Novels, Novellas. 3 points.
Discussion of fictions between 60-150 pages in length. Authors include James, Joyce, Mann, Nabokov, Cather, Welty, West, Porter, Olsen, Trevor.
AFEN BC3146 Resisting Stereotypy, Resisting the Spectral Self: African Diasporic Counter Images. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 14 students.

"Sticks and stones may break my bones, but names will never hurt..." Well. Hmm. This course focuses on theories of stereotypy and its mechanisms. We engage visual images (cinematographic, photographic and painterly) and print culture (novels, poems) that traffic in stereotypes and we consider resistances to these. We read comparatively across African American, African diasporic and African works. We do so by considering the arenas in which stereotyping practices and resistances to do battle: the public sphere and the private, the national and transnational/global. Our readings consider the psychic, political and economic violences of stereotypy as race, gender, sexuality, class, religion and nationality are invoked and manipulated.

ENGL BC3146 Walk This Way. 3 points.
Not offered during 2019-20 academic year.

What's in a walk? This course undertakes an interdisciplinary study of a fundamental human activity, focusing on philosophical and aesthetic treatments of human locomotion. After first examining the history of walking as a social, economic, religious, and political activity, the course will concentrate on urban walking and how it has been represented in text and image from ancient times to the present. Topics will include walking as introspection, escape, recreation, and discovery; walking and gender; the psychogeography of walking, walking in the city, etc. Readings from Austen, Wordsworth, Dickens, Thoreau, Whitman, Joyce, Woolf, O'Hara, De Certeau, and many others. Images from film, painting, and photography to be provided by student research. Ditto for musical strolls.

ENGL BC3147 Introduction to Narrative Medicine. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Post-bacc students require instructor permission. Narrative Medicine was designed to give doctors and healthcare professionals a more profound understanding of, and empathy for, the experience of illness. It teaches how to listen and what to listen for. While the skills developed are directly applicable to the practice of medicine, they are also important in any field in which human relationships are central: business, law, architecture, social work, and the creative arts. The multidisciplinary course entails a rigorous integration of didactic and experiential methodology to develop a heightened awareness of self and others and build a practical set of narrative competencies.

Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited 18 students. Explores, through fiction, poetry, essays, and film, the historical context and cultural content of the African American migration from the rural south to the urban cities of the north, with particular emphasis on New York, Chicago, Detroit, and Philadelphia.

ENGL BC3151 Bad Feelings: The Uses of Literature in Difficult Times. 4 points.
This course will explore the purposes of literary study—and, by extension, humanistic education—during periods of turmoil. Working in sustained dialogue with one another, we will explore the treatment of emotions such as despair, anxiety, loss, fury & ecstasy in a wide variety of literary texts, ranging from literature that is ancient (e.g., Sophocles, Euripides) to early modern (William Shakespeare, Margaret Cavendish) to modern (Virginia Woolf, Ralph Ellison, Elena Ferrante). In the process, we will explore various schools of critical theory, such as Aristotle's Poetics (including the ancient theory of catharsis), psychoanalysis, and feminism, in a context where the stakes of these intellectual traditions will come to the fore.

ENGL BC3154 Chaucer Before Canterbury. 3 points.
Not offered during 2019-20 academic year.

Chaucer's innovations with major medieval forms: lyric, the extraordinary dream visions, and the culmination of medieval romance, Troilus and Criseyde. Approaches through close analysis, and feminist and historicist interpretation. Background readings in medieval life and culture.

ENGL BC3155 Canterbury Tales. 3 points.
Not offered during 2019-20 academic year.

Chaucer as inheritor of late-antique and medieval conventions and founder of early modern literature and the fiction of character. Selections from related medieval texts.

ENGL BC3158 Medieval Literature: Literatures of Medieval Britain. 3 points.
Not offered during 2019-20 academic year.

It's easy to forget that medieval literature wasn't always old and "quaint" as it seems to many of us today. For writers and artists of that era, they were modern, too. But they also imagined their own past and (like many of us) they often had a nostalgic yearning for that lost time. This course will explore a number of forms of medieval literature, mostly British but also some continental, as it explores versions of its past, and especially the ultimately tragic story of King Arthur. We will read across many medieval genres, including some little known today, like lives of saints. But the course will focus on narratives of quest: heroic, psychological, and erotic. We will also explore some of the often beautiful medieval manuscripts in which these texts were often copied. We will read most Middle English texts in the original language; we'll study French and Latin texts in translation.

ENGL BC3159 The English Colloquium. 4 points.

Prerequisites: Enrollment limited to Barnard English majors. In the Renaissance colloquium we will examine English and European imaginative and intellectual life from the sixteenth to mid-seventeenth centuries. Defined by humanism, the Protestant Reformation, and revolution, this was a period of ideological struggle on many levels. Long-held ways of ordering the world came under increasing strain and sometimes ruptured irreparably. Writers discussed and debated
the aims of human knowledge, retooled old literary forms for new purposes, scrambled to take account of an expanded awareness of the globe, and probed the tension between belief and doubt. Throughout this process, they experimented with new literary styles to express their rapidly changing worldviews. This is an intensive course in which we will take multiple approaches to a variety of authors that may include Petrarch, Erasmus, Machiavelli, Castiglione, More, Rabelais, Luther, Calvin, Montaigne, Spenser, Bacon, Marlowe, Shakespeare, Milton, and Behn, among others.

ENGL BC3160 The English Colloquium. 4 points.

Prerequisites: Enrollment limited to Barnard English majors.
In the Enlightenment colloquium we will look at English and European imaginative and intellectual life during the late seventeenth and eighteenth centuries. During this period, writers tried in new ways to reconcile the tensions between reason and religion. Categories of thought that underlie our world today were taking shape: secularity, progress, the public and the private, individual rights, religious tolerance. Writers articulated principles of equality in an era of slavery. Literary forms like the novel, which emerges into prominence during this period, express in irreducibly complex ways these and other changes. In this intensive course, we will study from multiple angles a variety of authors that may include Hobbes, Dryden, Locke, Spinoza, Lafayette, Defoe, Swift, Pope, Richardson, Voltaire, Fielding, Johnson, Diderot, Sterne, and Wolstonecraft, among others.

ENGL BC3163 Shakespeare I. 3 points.
A critical and historical introduction to Shakespeare’s comedies, histories, tragedies, and romances. Please note that you do not need to take ENGL BC3163: Shakespeare I and ENGL BC3164: Shakespeare II in sequence; you may take them in any order.

ENGL BC3164 Shakespeare II. 3 points.
Prerequisites: Enrollment limited to 60 students.
Critical and historical introduction to selected comedies, histories, tragedies, and romances by Shakespeare. Please note that you do not need to take ENGL BC3163: Shakespeare I and ENGL BC3164: Shakespeare II in sequence; you may take them in any order.

ENGL BC3165 The Elizabethan Renaissance: The Complete Nondramatic Poetry of Marlowe and Shakespeare. 3 points.
In this course, we will read the complete nondramatic poetry of Christopher Marlowe and William Shakespeare, working closely through sonnets, epyllia (mini epics), and translations. How do Marlowe and Shakespeare put into play inherited and new ideas about history, gender, sexuality, politics, law, God, race, matter, print, and literary form (especially the sonnet)?

ENGL BC3166 Seventeenth-Century Prose and Poetry. 3 points.
Not offered during 2019-20 academic year.
The seventeenth-century produced great lyric poetry exploring love and desire, doubt and faith, sex and God. It was also a century of intellectual, political, and religious revolutions, giving birth to modern ways of thinking. We will read poetry by John Donne, Amelie Lanyer, George Herbert, Robert Herrick, Andrew Marvell, but we will begin with extended attention to Donne, whose poetry continues to influence contemporary poetry. For science, politics, religion, and philosophy and how they are intertwined, we will read prose by Francis Bacon (on "modern experimental science") and Thomas Browne (on science and faith), Thomas Hobbes (government as the solution to a brutish life) and the radical "Levelers" (early communists), "mad" Margaret Cavendish, and the Quaker Margaret Fell (defense of women's right to preach). Fascinating readings, understood in their historical context with a sense of their current resonance.

ENGL BC3167 Milton. 3 points.
Paradise Lost and selections of Milton’s earlier poetry and prose (defenses of free press, divorce, individual conscience, political and religious liberty) read within the context of religious, political, and cultural history (in early modern England and Europe but also, to some extent in America), but with a sense of connection to present issues. Ends with Mary Shelley's Frankenstein as rewriting of Paradise Lost.

ENGL BC3168 Lyric Poetry: an Introduction. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).
Not offered during 2019-20 academic year.
This course studies the lyric poem (primarily in English and English translation), its forms, features, and sources, its histories and traditions in print from the fourteenth to the twenty-first centuries. We will review sonnets, ballads, hymns, odes, and elegies; fragments and free verse; the pastoral and its relatives (nature poetry, political poetry); the roles
of allusion, metaphor, and figuration. Formal and historical questions will be central to discussions.

**ENGL BC3169 Renaissance Drama. 3 points.**
BC: Fulfillment of General Education Requirement: Literature (LIT).
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 25 students.
This class will examine English drama at the moment when it arose as a major art form. In Renaissance London, astonishingly complex plays emerged that reflected the diverse urban life of the city, as well as the layered and often contradictory inner life of the individual. This poetically rich theater was less concerned with presenting answers, and more with staging questions—about gender, race, religion, literary tradition, love, sex, authority, and class. In this course, we will try to tap into this theater's cosmopolitan, enlivened poetics by studying not only Shakespeare, but also the various other major authors who constituted this literary world: Christopher Marlowe, Ben Jonson, Thomas Dekker, Thomas Middleton, John Webster, and the female playwright Aphra Behn.

**ENGL BC3170 English Literature and Science 1600-1800. 3 points.**
Not offered during 2019-20 academic year.

The "Scientific Revolution" began in England in the early seventeenth century, with the experiments of John Dee and the reforming projects of Francis Bacon, to culminate in Isaac Newton's discovery of the natural laws of motion. This was also a period of great literary innovation, from Shakespeare's plays and the metaphysical poetry of Marvell and Donne, to the new genre of the novel. This course will explore both the scientific and literary "revolutions"- indeed we will attempt to put them in a kind of conversation with one another, as poets and scientists puzzled over the nature of spirit, body, and the world.

**ENGL BC3171 The Novel and Psychoanalysis. 3 points.**
The novel in its cultural context, with an accent on psychoanalysis (but no required reading). Austen, Emily Bronte, Dickens, Hardy, D.H. Lawrence, Didion, Duras, and W.G. Sebald.

**ENGL BC3173 The Eighteenth-Century Novel. 3 points.**
In the eighteenth century, a new genre appears across Europe: the novel. Why does it appear? What accounts for its increasing popularity across the eighteenth century? What role does it play, in personal psychology as well as society? To puzzle these questions, we will place the development of the novel within the history of art, philosophy and science, as well as psychology and literary theory. Novels by Mme. de La Fayette, Aphra Behn, Daniel Defoe, Henry Fielding, John Cleland, the Marquis de Sade, William Godwin, and Jane Austen. Readings in Benjamin, Adorno, Foucault, Elias, Moretti, and others.

**ENGL BC3174 The Age of Johnson. 3 points.**
The works of Johnson, Boswell, and their contemporaries in historic context; rise of the novel (Richardson, Fielding, and Sterne); poets from Pope to Blake and Wordsworth; women writers from Carter to Collier to Wollstonecraft; working class writers; topics include slavery and abolition in literature, the democratization of culture, and the transition to romanticism.

**ENGL BC3176 The Romantic Era. 3 points.**
Romantic writers in their intellectual, historical, and political context, with reference to contemporary movements in philosophy, music, and the plastic arts. Authors include Blake, Wordsworth, Coleridge, Byron, PB. Shelley, and Keats. An emphasis on close reading of the poetry.

**ENGL BC3177 Victorian Age in Literature: The Novel. 3 points.**
“We have become a novel-reading people,” wrote Anthony Trollope in 1870. “Novels are in the hands of us all; from the Prime Minister down to the last-appointed scullery maid.” This course will consider why the novel was so important to Victorian culture and society. What made the Victorian novel such a fertile form for grappling with the unprecedented cultural changes of the nineteenth century? To address this question, we will explore how Victorian novels both responded to, and participated in, major social and cultural shifts of the period, including industrialism and urbanization; colonialism and empire; the changing status of women, sexuality, and marriage; the emergence of Darwinism; class conflict and social reform; and the expansion of education and literacy. This course will also consider the role that novels play for the future of the world.

**ENGL BC3178 Victorian Poetry and Criticism. 3 points.**
Not offered during 2019-20 academic year.

Poetry, art, and aesthetics in an industrial society, with emphasis on the role of women as artists and objects. Poems by Tennyson, Arnold, Christina and D.G. Rossetti, Swinburne, and Elizabeth and Robert Browning; criticism by Ruskin, Arnold, and Wilde; paintings by the Pre-Raphaelites and Whistler; photographs by J.M. Cameron.

**ENGL BC3179 American Literature to 1800. 3 points.**
This course surveys American literature written before 1800. While we will devote some attention to the literary traditions that preceded British colonization, most of our readings will be of texts written in English between 1620 and 1800. These texts—histories, autobiographies, poems, plays, and novels—illuminate the complexity of this period of American culture. They tell stories of pilgrimage, colonization, and genocide; private piety and public life; manuscript and print publication; the growth of national identity (political, cultural, and literary); Puritanism, Quakerism, and Deism; race and gender;
slavery and the beginnings of a movement towards its abolition. We will consider, as we read, the ways that these stories overlap and interconnect, and the ways that they shape texts of different periods and genres.

**ENGL BC3180 American Literature, 1800-1870. 3 points.**

Texts from the late Republican period through the Civil War explore a range of intersecting literary, political, philosophical, and theological issues, including the literary implications of American independence, the status of Native Americans, the nature of the self, slavery and abolition, gender and woman's sphere, and the Civil War. Writers include Washington Irving, Ralph Waldo Emerson, Walt Whitman, Henry David Thoreau, Frederick Douglass, Margaret Fuller, Edgar Allan Poe, Nathaniel Hawthorne, Herman Melville, Harriet Beecher Stowe, Harriet Jacobs, and Emily Dickinson.

**ENGL BC3181 American Literature, 1871-1945. 3 points.**

Not offered during 2019-20 academic year.

This interdisciplinary course situates late nineteenth- and early twentieth-century American literature within the context of historical and cultural change. Students read works by Whitman, Twain, James, Griggs, Wharton, Faulkner, and Hurston alongside political and cultural materials including Supreme Court decisions, geometric treatises, composite photography and taxidermy.

**ENGL BC3183 American Literature since 1945. 3 points.**

In the wake of World War II, the so-called American Century rises out of the ashes of fascism, haunted by the specter of bombs blurring the boundary between victory and defeat. An ideological civil war ensues, punctuated by literary resistance to grand narratives and their discontents. Authors include Ellison, O’Connor, Ginsberg, Bishop, Pynchon, Robinson, Merrill, Morrison, Didion, and Wallace.

**ENGL BC3185 Modern British and American Poetry. 3 points.**

Not offered during 2019-20 academic year.

Poetry written in English during the past century, discussed in the context of modernism, postmodernism, literary theory, and changing social and technological developments. Students will participate in shaping the syllabus and leading class discussion. Authors may include Yeats, Williams, Eliot, Moore, Bishop, Rich, Ginsberg, Stevens, O’Hara, Plath, Brooks, Jordan, Walcott, Alexie, and many others.

**ENGL BC3187 American Writers and Their Foreign Counterparts. 3 points.**

Not offered during 2019-20 academic year.

Developments in modern literature as seen in selected 19th- and 20th-century American, European, and English works by Flaubert, James, Proust, Joyce, Chekhov, Porter, Cather, Ibsen, O’Neill, Fitzgerald, Rilke, and others.

**ENGL BC3188 The Modern Novel. 3 points.**

Not offered during 2019-20 academic year.

**ENGL BC3189 Postmodernism. 3 points.**

This course considers how Postmodernism’s profound distrust of language and narrative transforms the form and function of literature. Writers include Stoppard, Pynchon, Didion, Morrison, Robinson, Coetzee, Ishiguro, Wallace, Ashbery, and Hejinian.

**ENGL BC3192 Exile and Estrangement in Global Literature. 4 points.**

“...but she had no worldly wisdom; her powers were unadapted to the practical business of life; she would fail to defend her most manifest rights, to consult her most legitimate advantage. An interpreter ought always to have stood between her and the world.” Charlotte Brontë on her late sister the novelist Emily Brontë.

This course examines the development of literary fiction in response to history. Through a diverse selection of books—novels, novellas, and verse—spanning nearly 2400 years, we will investigate the seemingly contradictory condition of the author as both outsider and insider. We will look at how writers from various backgrounds have addressed social and political alienation, national and personal crisis, through narrative. The uniqueness of the texts lies not just in how implicated they are in history, but in their resistance against generalization and intolerance.

Two areas of critical concern govern the selection: Romanticism brings to focus responses to estrangement and injustice; and Modernism is seen as individual expression to alienation and exile. However, implicit also is the desire to complicate the distinction between those two schools. What unites these concerns, however, is how our writers’ artistic commitment, as both witnesses and participants, creates an opportunity for literature to reveal more than the author intends and, on the other hand, more than what power desires.

**ENGL BC3193 Critical Writing. 4 points.**

(Formerly called Literary Criticism & Theory.) Provides experience in the reading and analysis of literary texts and some knowledge of conspicuous works of literary criticism. Frequent short papers. Required of all English majors before the end of the junior year. Sophomores are encouraged to take it in the spring semester even
before officially declaring their major. Transfer students should plan to take it in the fall semester.

ENGL BC3195 Modernism. 3 points.

Psychoanalysis, world war, and shifting gender paradigms inspire fragmented narratives, stream-of-consciousness prose, and improbable blends of erudition and the avant-garde. Stylistic innovation notwithstanding, Modernism authorizes a remarkably traditional literary canon. Special attention will be devoted to how seminal manifestos, most notably "Tradition and the Individual Talent" and A Room of One's Own, frame the movement's embattled aesthetics. Works by Eliot, Woolf, Barnes, Faulkner, Hemingway, Joyce, Lawrence, Pound, Stein, Toomer, and Yeats.

ENGL BC3196 Home to Harlem: Literature of the Harlem Renaissance. 4 points.

In the spring of 2020, Home to Harlem will focus on Harlem as a crossroads, diasporic and transnational black mecca. Exploring the cultural contexts and aesthetic debates that animated Harlem in 1920s to 1930s, the course discusses the politics of literary and performative cultural production while exploring the fashioning of New Negro identity through fiction, poetry, essays, artwork and music. Topics considered include: role of Africa/slavery/the south in New Negro expression, patronage, passing, primitivism/popular culture, black dialect as literary language, and the problematics of creating a "racial" art in/for a diverse community comprised of differences in gender, class, sexuality, and geographical origin.

This course will partner with AfroSwedish hip-hop artist, writer, and activist Jason "Timbuktu" Diakité and Harlem Stage. Born to interracial American parents in Sweden (his father hails from Harlem), Diakité grew up between worlds, riding a delicate cultural and racial divide. His search to unify a complex system of family roots has taken him across continents, ethnicities, classes, colors, and eras to find a sense of belonging. In spring of 2020, he comes Home to Harlem when he performs a new stage version of his memoir, A Drop Of Midnight, at Harlem Stage.

ENGL BC3204 World Literature Revisited I. 3 points.

Across the street from Barnard College, Columbia College first-years must take Literature Humanities: Masterpieces of Western Literature and Philosophy. Student objections to this course primarily rest upon the fact that the syllabus consists of mostly white males, and that the course readings should be more global and diverse. In this course, we will imagine what a survey of World Literature Humanities (rather than a "Western" one) would look like. We will also investigate and challenge the categories of "Eastern" and "Western" literature, and think through the categories of "world" and "literature" in the course title. What/where/whom constitutes the world in World Literature? Traditionally, why have some types of writing and inscription been privileged over others when determining the category of literature? How can we read and trace literary influence across these literatures without reducing them to a mere repetition of the same themes and ideas? In other words, how do we read the similarities and differences in the texts we read in their particular contexts and histories? Finally, we will think about the role that translation plays in the production and politics of World Literature.

This course will be taught in two parts over one year. Taking both halves of the course is recommended, but not required. This semester we will deal with ancient texts until around the 14th century, and our focus will be origin stories and epic narratives, lyric poetry, historical narratives, and sacred/religious texts. Next semester, if you wish to take the second part, we will focus on drama, early modern and modern poetry, and the novel.

ENGL BC3205 World Literature Revisited II. 3 points.

(Please note that you do not need to take ENGL BC3204 World Literature Revisited I and ENGL BC3205 World Literature Revisited II in sequence; you may take them in any order.)

As a discipline, World Literature dates back to the early 19th century and Goethe’s concept of weltliteratur. Yet, despite the fact that Goethe was well-versed in the literature of the "Orient" and he emphasized their centrality in weltliteratur, the languages that he spoke of and underlined within the formation of this literature were mostly German and Romance languages. Institutionally speaking, not much has changed over the past couple of centuries. More often than not, studying the literature of locations such as the Middle East, Africa, or East Asia takes place in Area Studies departments, and offerings of these areas’ literatures in Comparative Literature departments are few and far in between.

In World Literature Revisited I, we imagined what a survey of World Literature in a literary studies department could look like, as we dealt with ancient texts until around the 14th century, with a focus on origin
stories and epic narratives, lyric poetry, historical narratives, and sacred/religious texts. In World Literature Revisited II, we will continue to investigate and challenge the categories of “Eastern” and “Western” literature and think through the categories of “world” and “literature” in the course title. In this part of the course, we will work on (classical, early modern, and modern) drama, modern poetry, and the novel, with a particular focus on reading in comparison adaptations, appropriations, and literary responses.

What/where/whom constitutes the world in World Literature? How can we read and trace literary influence across these literatures without reducing them to a mere repetition of the same themes and ideas? Finally, we will think about the role that translation plays in the production and politics of World Literature, particularly when it comes to adaptations and appropriations, and how the issue of translation differentiates between the disciplines of Comparative Literature and World Literature.

ENGL BC3205 THE "GLOBAL" NOVEL. 3 points.

"Yes, globalization can produce homogeneity, but globalization is also a threat to homogeneity." --Kwame Anthony Appiah, "The Case for Contamination," New York Times Magazine, 2006

Thinking through the arguments both in favor of and against globalization, particularly in the realm of cultural productions, in this course we will discuss the "global" novel. To that end, we will read essays from The Global Novel: Writing the World in the 21st Century about works such as Americanah, Snow, and The Reluctant Fundamentalist (along with the novels themselves) to investigate what is meant by "global" and what the criteria for including novels in this categorization are. We will also consider whether there is an erasure of cultural difference and nuance in reading novels using a globalizing perspective in order to render them more approachable for a (primarily) US audience.

In order to think through and challenge this category of the global, we will also read novels that can be roughly categorized as postcolonial. We will thus consider how struggles for independence and the desire to locate one's identity either within freshly liberated nation-states or in the process of immigrating to former metropoles could give rise to cultural and psychological anxieties. We will also consider the manner in which late-stage capitalism could indeed push toward homogenized senses of self that manifest in a category such as the "global novel" and whether arguments could be made in favor of such homogenization. Ultimately, we will think about the politics of globalization and the desire to include in or exclude from the "global" certain locations, cultural products, or peoples.

ENGL BC3214 Latinx and the ICE/Prison Industrial Complex—Access and Strategies for News Coverage. 4 points.

This course encompasses themes of race, ethnicity, mass incarceration, and immigration in the modern United States, with special attention to the stories of Latinx people. We will consider the roles of journalistic writing, documentaries, and personal narratives in shaping public policy and attitudes towards lives behind bars. Guest speakers will also provide personal experiences to help reframe our own narratives and perspectives on these issues. The course's primary goal is to challenge the process of how stories of race, immigration, and mass incarceration are written, by developing scholarly pieces.
ENGL BC3223 New York in Ten Objects. 4 points.

"New York in Ten Objects" introduces students to the creative possibilities of the podcast. Drawing on the possibilities of interdisciplinary analysis and creative non-fiction, this course will equip students with a new storytelling medium that critically engages the city in which they live. The goal is to render ordinary topics extraordinary.

The starting points for our investigation are ten objects – some iconic, some iconic, but all characteristic of New York City. Beginning with these quotidian objects, students will develop projects, in small groups and individually, that connect these objects with a broader societal movement, cultural idea, political cause, or scientific development significant to past or present New York City life.

To prepare students to develop their projects in an audio medium, we will first become familiar with a broad range of current podcasts, and will begin to break down the elements of podcast-storytelling as practiced today. Through workshops with IMATS in a weekly lab session, staged writing assignments and hands-on experience, students will learn how to collect audio interviews and ambient sound, to record voice-over narration, and to select and use musical and other sound snippets available on sound banks. Every student will storyboard their ideas, develop scripts, and produce a podcast by layering and editing their audio files.

In the end, this course will investigate how the popular medium of the podcast can serve as a locus of local conversation and public intellectual activity. Students will discover the community in which they live in profound and intellectually rigorous new ways by learning how ordinary objects can breathe life into a story, and how audio stories can advance critical analysis.

Applications are due by 1 May. https://goo.gl/forms/7HU2jZNfpxP0zV1k2 (https://goo.gl/forms/7HU2jZNfpxP0zV1k2/). Please note that this seminar is limited to 14 students. After receiving admittance into the course, you MUST come to the first class to secure your seat. You should hear about your admission in time to add the course to your program during the summer.

ENGL BC3250 Introduction to US Latinx Literature. 3 points.

This course introduces students to a growing body of work by Latina and Latino writers in the United States, and engages with the critical tools necessary for analyzing a field of inquiry and practice that continues to reframe itself, right down to the label "Latinx." What does that name include, and what does it exclude, in cultural productions born of conflicts of origin, language, race, gender, sexuality, and nationality? For some understanding of context, we will turn to the history and pressures of transnational migration, exile, assimilation, bilingualism and queerness as these variously affect the means and modes of the literary productions with which we're concerned. At the same time, the course will emphasize the invented and hybrid nature of Latinx literary and cultural traditions, and it will investigate the place of those inventions in the larger framework of American intellectual and literary traditions. Readings will be drawn from work written primarily in English, but we will also consider graphic novels, Latinx performance, and works in translation. Authors studied may include Rudolfo Anaya, Americo Paredes, Piri Thomas, Cherríe Moraga, Richard Rodriguez, Cristina Garcia, Ana Castillo, Victor Hernández Cruz, Lorna Dee Cervantes, Junot Díaz, Coco Fusco, Yury Herrera, and Juana María Rodriguez.

ENGL BC3252 Contemporary Media Theory. 4 points.

Prerequisites: Sophomore standing. Enrollment limited to 18 students. Attend first class for instructor permission. Registering for the course only through myBarnard or SSOL will NOT ensure your enrollment. Explores the transformation of sociality, consciousness and geopolitics by and as media technologies during the long 20th century. Students will read influential works of media analysis written during the past century, analyze audio-visual analog and digital media, and explore political theory and media theory written since the rise of the internet. Final projects on contemporary media forms.

AFEN BC3253 Before Black Lives Matter. 4 points.

Black Lives Matter is an American phenomenon. This course situates BLM in relation to other and earlier movements in the Global South and elsewhere. Through textual analysis and critical reading, we take up the discursive, rhetorical, and poetical strategies of opposition to marginalization, criminalization, and racial othering.

ENGL BC3281 Illegal Is Not a Noun: Disrupting Narratives of the Immigrant Experience. 4 points.

This course engages with narratives about detention and deportation in the modern United States, with special attention to the stories of Latinx people. We will analyze how journalistic writing, documentaries, and personal narratives shape public policy and American attitudes about the "immigrant experience." What are these narratives, how are they told, and what are their implications? How do writers disrupt these narratives? We will develop four scholarly essays over the course of the semester to investigate these questions.
have these borders shifted over time, and in social and cultural space? How has whiteness located itself at the center of political, historical, social and literary discourse, and how has it been displaced? How does whiteness mark itself, or mask itself, in literature and in larger cultural practices? What does whiteness look like, sound like, and feel like from the perspective of the racial "other"? And in what ways do considerations of gender and class complicate these other questions?

AFEN BC3815 The Worlds of Ntozake Shange and Digital Storytelling. 4 points.
Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at http://bit.ly/Ntozake2019. Students who successfully complete this course will be eligible to take the second half of the course in Spring 2019. NOTE: There will be three extra sessions scheduled in the Digital Humanities Center. A poet, performance artist, playwright and novelist, Ntozake Shange's stylistic innovations in drama, poetry and fiction and attention to the untold lives of black women have made her an influential figure throughout American arts and in Feminist history. This semester will examine Shange's works in the context of political and artistic organizing by women of color in the 1970s and 80s. In addition to our analysis of primary texts, students will be introduced to archival research in Ntozake Shange's personal archive at Barnard College. This in-depth exploration of Shange's work and milieu is complemented with an introduction to digital tools, public research and archival practice. You can find more information and apply for the course at http://bit.ly/Ntozake2019 (http://bit.ly/Ntozake2019/). On Twitter @ShangeWorlds.

AFEN BC3816 The Worlds of Ntozake Shange and Digital Storytelling. 4 points.
Prerequisites: AFEN BC3815 or equivalent. This course has a prerequisite and an application: http://bit.ly/AFEN3816 (http://bit.ly/AFEN3816/). This hands-on, project based course introduces students to the use of digital tools and sources to organize and manage their archival research in Ntozake Shange's personal archive at Barnard College. You will make plans to visit the archive appropriate to your project (in most cases this will be the Barnard Archives, but they might include sites such as The Billy Rose Theatre Division at the NYPL, or the Amiri Baraka collection at Columbia University) as well as doing background research for your project. By the end of the semester, you'll have sharpened your research skills while also acquiring digital, teamwork, and archival practice. You can find more information and apply for the course at http://bit.ly/AFEN3816/ (http://bit.ly/AFEN3816/). On Twitter @ShangeWorlds.

ENRE BC3810 Literary Approaches to the Bible. 4 points.
Interpretive strategies for reading the Bible as a work with literary dimensions. Considerations of poetic and rhetorical structures, narrative techniques, and feminist exegesis will be included. Topics for investigation include the influence of the Bible on literature.
ENGL BC3901 Senior Seminar: Women of Color in the US Public and Private Cultures. 4 points.
Enrollment limited to Barnard senior English majors. This course will explore cultural production and consumption by "women of color" in the U.S., with a focus on the way various groups have negotiated the presumed gap between private experience and public or political form. Historical, social, and cultural connections and disjunctions between African-American, Arab-American, Asian-American, Native American, Latina, and other women will be examined, especially in the context of feminism, cultural nationalism, and the scholarly discipline and practice of critical legal feminism and critical race studies. We will explore the varied ways in which family, labor, and leisure practices can place women of color in social positions which blur the distinction between private and public culture, and which call for a reconsideration of the notion of "experience," itself. Authors and critics to be considered may include Louise Erdrich, Cherrie Moraga, Valeria Luiselli, Chela Sandoval, Maxine Hong Kingston, Theresa Hak Kyung Cha, Cathy Hong Park, Mohja Kahf, and Chandra Mohanty.

ENGL BC3902 Sr. Sem: Adultery: Realism and Desire in Fiction and Film. 4 points.
Not offered during 2019-20 academic year.
Enrollment limited to Barnard senior Film Studies majors and Barnard senior English majors concentrating in Film Studies. "Rising from the most basic human needs, marriage is essential to our most profound hopes and aspirations." So writes the United States Supreme Court in Obergefell v. Hodges (2015), finding in marriage the "keystone of our social order" - the means by which individual desire is stably fixed within the family unit and, thereby, linked to civility and law. This course studies a rich counter-tradition of film and literature interested in adultery. These works suggest ways in which human desire and identity exceed social bonds; they also examine ways in which private desire is not only limited but formed by social forces. Works may include: fiction by Flaubert, Goethe, James, Laclos, Proust, Tolstoy; films by Frears, Kieslowski, Renoir, Resnais, Wilder, Wong; criticism and philosophy by Barthes, Beauvoir, Cavell, Cott, Freud, Hegel, Marx.

ENGL BC3903 Senior Seminar: Poets in Correspondence. 4 points.
Not offered during 2019-20 academic year.
(Formerly ENGL BC3997; this course has been renumbered but has not changed in content.) How do poets’ letters inform our understanding of their poetry? From the eighteenth to the twentieth century, poets have used their intimate correspondence to "baffle absence," as Coleridge remarked. This course will examine the ways several masters of the letter (including Cowper, Keats, Dickinson, Eliot, Bishop, and Lowell, among others) shaped their prose to convey spontaneity in paradoxically artful ways, illuminating their major work as poets and making the private letter a literary form in its own right.

ENGL BC3904 Senior Seminar: Charles Dickens. 4 points.
Not offered during 2019-20 academic year.
(Formerly ENGL BC3997; this course has been renumbered but has not changed in content.) Charles Dickens: the life, the works, the legend, in as much detail as we can manage in one semester. Reading will be selected by the class, and may include Pickwick Papers, A Christmas Carol, David Copperfield, Bleak House, and selections from his friend John Forster's Life of Charles Dickens. Special emphasis will be given to the question of what "Dickensian" means, in the context of Dickens's literary style, his genius for characterization, his love of conviviality, and Victorian extremes of wealth and poverty. Students will be expected to share in creating the syllabus, presenting new material, and leading class discussion.

ENGL BC3905 Sr. Sem: Amazing Grace: English and American Antislavery Literature. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Sign up through the "SR Seminar" section of myBarnard. Enrollment limited to senior Barnard English majors. Drawing on poems, plays, slave narratives, fiction and other genres, by both famous and non-canonical writers from 1660 to 1866, this seminar explores the ways that writers helped end slavery. Authors include Defoe, Johnson, Wheatley, Equiano, Blake, Wordsworth, Coleridge, Longfellow, Alcott, Stowe, Douglass, Melville, and Harriet Jacobs, among others. Final projects may take the form of extended critical essays or original anthologies.

ENGL BC3906 Sr. Sem: Black Literature Now. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Sign up through the "SR Seminar" section of myBarnard. Enrollment limited to senior Barnard English majors. (Formerly ENGL BC3997; this course has been renumbered but has not changed in content.) Examines contemporary African American literature, in particular the ways in which recent authors are reconceiving literary notions of blackness. Beginning in the 1980s with the emergence of "post-soul" literature, this class explores the ways in which authors one or two generations after the Civil Rights Movement reconceive their sense of racial "belonging" and notions of how to write "blackness" into a text. Authors may include Ellis, Whitehead, Southgate, Everett, Senna, Sapphire, Beatty, Toure, Packer, Johnson and Morrison.

ENGL BC3907 Senior Seminar: The Brontës. 4 points.
Prerequisites: Sign up through the "SR Seminar" section of myBarnard. Enrollment limited to senior Barnard English majors. Enrollment limited to Barnard senior English majors. In this course, we will closely study the works of the three Brontë sisters, Charlotte, Emily, and Anne. Although the Brontës are famous for their secluded lives on the moors of Yorkshire, their novels brilliantly engage many of the most urgent cultural concerns of the Victorian era, including poverty and social alienation; colonialism and empire; psychology, desire, and repression; religious belief and spirituality; the role of art and the imagination; and, especially, the social, economic, and political condition of women in the nineteenth century. We'll explore these topics and others through readings of the Brontës’ major novels (Jane Eyre, Villette, Wuthering Heights, and The Tenant of Wildfell Hall), as well as some of their less well-known works, including their poetry and their astonishing juvenile literary experiments. We'll also consider the enduring influence of the Brontës’ novels in film and literature; additional texts may thus include recent film adaptations of the novels, as well as works such as Jean Rhys's Wide Sargasso Sea and Daphne Du Maurier's Rebecca.

move to Mary Wolstonecraft’s *Rights of Women*, Hawthorne’s *Scarlet Letter* (religion, sexuality, women), and then to the twentieth and twenty-first century, considering a variety of genres, mainly (but not exclusively) writings by women. Writers and texts may include: W.G. Sebald’s *The Emigrants*; Deborah Feldman’s *Unorthodox*; Toni Morrison’s *Others* and Ta-Nehisi Coates’ *Between the World and Me*; Tayari Jones, *An American Marriage*; Jeanette Winterson, *Oranges are Not the Only Fruit*, Arundhati Roy, *The God of Small Things*; Stephanie Land, *Maid*; and Tara Westover, *Educated*.

**ENGL BC3913 Sr. Sem: Human and Other Animal Identities. 4 points. Not offered during 2019-20 academic year.**

(Formerly ENGL BC399; this course has been renumbered but has not changed in content.) In this seminar, we will engage in an interdisciplinary study of intersections of human and non-human animal identities in selected literary, philosophical and theoretical texts. We will examine how constructions and representations of non-human animal identities confirm understandings and experiences of human ones, including racialized and gendered identities and study the ways in which non-human identities challenge claims to human exceptionalism. Some of the topics along which the readings will be arranged include liminality, (mis-)recognition, metamorphoses, suffering, as well as love. Readings include Aristotle, Euripides, Ovid, Montaigne, Descartes, Shakespeare, Kafka, Woolf, Morrison, Coetzee, Szymborska, Hughes, Haraway, and Derrida and essays by contemporary scholars such as Kim Hall and Karl Steel. Some class time will be devoted to the process of writing the thesis at all significant critical junctures.

**ENGL BC3914 Sr. Sem: Exploring the 18th Century. 4 points. Not offered during 2019-20 academic year.**

This seminar will explore selected topics in the 18th century, including the transformation in print culture and development of new genres such as the novel, biography, and popular journalism; the emergence of women writers; the interplay between canonical authors and newcomers such as working class and Black writers; the literature of slavery and abolition; poetic experimentation; and the turn to Romanticism. Writers include Behn, Defoe, Pope, Johnson, Richardson, Sterne, Wheatley, Blake, Cowper, Equiano, Boswell, Wollstonecraft, Wordsworth, and Austen. Students will be invited to propose additional writers for our weekly discussions and to include in their projects writers beyond the syllabus.

**ENGL BC3915 Sr. Sem: Late Shakespeare: Visions and Revisions. 4 points. Not offered during 2019-20 academic year.**

Shakespeare’s last plays as both experimental and re-visionary. Topics will include aesthetics, philosophy, politics, sexuality, and gender, as well as post-1950 literary criticism’s reconstruction of these final plays. Probable texts: *Othello*, *King Lear*, *Antony and Cleopatra*, *The Winter’s Tale*, and *The Tempest*.

**ENGL BC3916 Sr. Sem: Gender, Sexuality and the American Stage: Performing the Body Politic. 4 points. Not offered during 2019-20 academic year.**
(Formerly ENGL BC3998; this course has been renumbered but has not changed in content.) This seminar investigates how American theatre/performance, as read through the lens of gender and sexuality, operates as a cultural force. Simply put, the U.S. is obsessed with sex; theatre/performance has proven a fertile medium for America’s expression of this obsession. Exploring texts from the seventeenth through the twenty-first centuries, we will consider how performance intersects with the nation state’s desire to regulate how we “practice” gender both publicly and behind closed doors. How is performance, which always includes gendered/raced/classed/sexuated bodies, situated in relationship to ideas of a national body politic? How does the American nation state hinge on how gender and sexuality are performed both on-stage and off? Authors include John Winthrop, Dion Boucicault, Lillian Hellman, Tennessee Williams, David Henry Hwang, Michel Foucault, Jose Muñoz, Jill Dolan, Suzan-Lori Parks, Holly Hughes, Tony Kushner, Lisa Kron, Margaret Cho and performance groups Split Britches, Five Lesbian Brothers, Pomo Afro Homos.

ENGL BC3917 Senior Seminar: Words and Pictures: The Intersection of Literary and Visual Art. 4 points.
Enrollment limited to Barnard senior English majors. In this class we will explore literary texts that focus on visual experience, especially painting and sculpture. What kinds of questions do these texts raise about the nature of aesthetic experience? How does what we mean by aesthetic experience change through time? Our readings will range from ancient to modern: Homer, Ovid, Chaucer, Spenser, Marlowe, Shakespeare, Herder, Barthes, Woolf, Ishiguro, Dove, Howe, Sebald, among others. We will also read widely in the history of aesthetic philosophy and critical theory.

ENGL BC3918 Senior Seminar: Late Victorian and Modern Drama. 4 points.
Drama in a period of rapid transition. The interaction of changing social structures and performative traditions. Protest plays, problem plays, and plays pursuing new social and aesthetic possibilities vie for attention and authority. Our seminar will explore fluid relationships between realism and theatricalism, historicism and modernism, convention and invention, adaptation and interpretation. We will read texts, view films and stage adaptations, and attend NYC productions. Playwrights may include Dion Boucicault, Branden Jacobs-Jenkins, Arthur Wing Pinero, Patrick Marber, Elizabeth Robins, Evelyn Glover, Oscar Wilde, George Bernard Shaw, Henrik Ibsen, Anton Chekhov, Caryl Churchill, Noel Coward, and Emma Rice.

ENGL BC3919 Senior Seminar: Virginia Woolf. 4 points.
We will read all eight novels of Virginia Woolf, as well as *A Room of One's Own* and *Three Guineas* and selections from her diaries and criticism.
ENGL BC3927 Senior Seminar: "a d—d mob of scribbling women": Nineteenth-century American Women Writers. 4 points. (Formerly ENGL BC3997.06; this course has been renumbered but has not changed in content.) In 1855, Nathaniel Hawthorne complained that American publishing was "wholly given over to a d—d mob of scribbling women," and that he could not hope to compete with women writers for popularity or sales. Yet Hawthorne's texts were canonized as American classics, while texts by nineteenth-century women writers were largely ignored by the academy until late in the twentieth century. This course considers a variety of texts by nineteenth-century American women, including novels, short fiction, poetry, and journalism. We'll consider women's writing and women's reading through a variety of lenses, including domesticity and women's sphere, political action and suffrage, slavery and abolition, the economics of writing and publishing, sentimentality and anger, and canon formation and literary merit. Authors include Elizabeth Stuart Phelps, Harriet Beecher Stowe, Susan Warner, Fanny Fern, Harriet Jacobs, Elizabeth Drew Stoddard, Louisa May Alcott, Emily Dickinson, Sarah Winnemucca Hopkins, Nellie Bly, Frances Ellen Watkins Harper, and Mary E. Wilkins Freeman.

ENGL BC3936 Senior Seminar: The Novel and Economic Justice. 4 points. The industrial revolution inspired novelists to explore the ways in which money, or the lack of it, forms or deforms our characters. It also inspired the writings of Karl Marx, the great theorist of economic justice. In this seminar we will read five of the greatest nineteenth-century novels – Godwin's Caleb Williams, Austen's Persuasion, Flaubert's Madame Bovary, Eliot's Middlemarch and Hardy's Jude the Obscure – alongside Marx's most influential writings. We will pay special attention to Marxist notions of materialism; alienation and ideology. Special emphasis will also be given to the Marxist approach in the study of culture, the role of intellectuals (such as ourselves) and the relationship between capitalism and culture – through theorists like Gramsci, the Frankfurt School, and Raymond Williams.

ENGL BC3996 Special Project in English. 1 point. Application required: https://english.barnard.edu/english/independent-studies/. Senior English majors who are concentrating in writing and who have completed two creative writing courses will normally take this Special Project in combination with an additional creative writing course. Senior English majors who are concentrating in theatre and who have completed three courses in theatre history/dramatic literature will normally take this Special Project in combination with an additional dramatic literature course.

For both writing and theatre concentrators, this combined special project counts in place of one senior seminar.

ENGL BC3999 Independent Study. 4 points. Application required: https://english.barnard.edu/english/independent-studies/. Senior majors who wish to substitute Independent Study for one of the two required senior seminars should consult the chair. Permission is given rarely and only to students who present a clear and well-defined topic of study, who have a department sponsor, and who submit their proposals well in advance of the semester in which they will register. There is no independent study for screenwriting or film production.

Cross-Listed Courses

DNCE BC3000 From Page to Stage: Interactions of Literature and Choreography. 3 points. A survey of how dance and embodied performance adapt textual sources and even generate text. How do moving bodies enhance or subvert words in order to tell a story, and whose story do they tell? Includes the study of plays, poems, and political speech; and of ballet, experimental dance, dance-theater, silent film, physical theater, and puppetry.
Environmental Biology major provides students with an understanding of the structure, function and interrelationships of diverse living systems within the context of Earth's changing environment. It addresses some of the most important issues of our time—climate change and declining biological diversity—and efforts to address these problems. To this end, students take courses in both the Environmental Science and Biology departments, including laboratory and field courses that help them learn how to design and test hypotheses, use modern scientific equipment, interpret data, and evaluate and solve problems. Students learn scientific communication skills by critiquing research articles, writing laboratory reports and research papers, and participating in oral presentations and debates.

Environmental Biology students are encouraged to become involved in research under the guidance of a faculty member at Barnard or elsewhere in New York City. Our urban setting, the proximity to the Hudson River, and the numerous affiliations we maintain with Columbia University through Lamont-Doherty Earth Observatory, the Earth Institute, and the School of Public Health, as well as Black Rock Forest, the American Museum of Natural History, and other institutions, allow us to offer undergraduates unparalleled opportunities for student research and educational experiences. Upon successful completion of our program, our students are well prepared to pursue successful careers in research, teaching or the allied health sciences. The Environmental Biology major is appropriate for students interested in careers as diverse as university-level research and teaching, curatorial work and research in natural history museums and parks, environmental education, and decision-making in environmental policy, law, public health, and government agencies.

Student Learning Outcomes

- Discuss the structure, function, and interrelationships of key environmental systems: climate, earth, life
- Demonstrate an appreciation of the many different life forms on planet Earth
- Design and execute an independent scientific analysis, including the formulation of a testable hypothesis and assembling a logical chain of reasoning ranging from observation to inference
- Locate, integrate, and evaluate information from multiple and disparate sources
- Apply appropriate analytical and quantitative approaches including calculating statistics and displaying data to interpret relationships, trends and make predictions about past and future changes
- Resolve uncertain, complex problems in the lab and field
- Clearly communicate analyses, interpretations and significance through variable media: oral presentation, poster, proposal, research or review article, report

The program in Environmental Biology is jointly administered by the departments of Biology and Environmental Science, and students should maintain contact with the advisers in both departments. A major in Environmental Biology provides a strong background for students interested in the intersection of Biology and Environmental Science. The major is suitable for students who intend to pursue a research career in conservation biology, ecology, or environmental biology as well as for students interested in environmental law or policy. Students who elect the Environmental Biology major will enroll in introductory and advanced courses in Biology and Environmental Science and related fields. All Environmental Biology majors complete a senior essay either in the Biology or Environmental Science departments.

Students may substitute courses taught at Columbia (in the Departments of Biology, E3B, Earth and Environmental Sciences, or

FILM BC3119 Screenwriting. 3 points.
Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.
Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)
Practical workshop in dramatic writing for the screen. Through exercises and games specifically catered to the writing of scenes and concrete scene work, students explore and develop an understanding for the basic principles of screenwriting, learn how to find the right form and structure for each story, and how to achieve thematic richness, emotional depth, and narrative rhythm. By the end of the class students will have written a 10-12 page short and/or have material for the development of a feature screenplay.

FILM BC3120 Feature Film Screenwriting. 3 points.
Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.
Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)
Workshop in feature film writing. Students will enter the course with a story idea, ready to start a feature screenplay. Through lectures and workshop discussions, the course will critique the details of character development and scene construction. Analysis of student work will prompt generalized conversations/lectures on the fundamentals of film writing. Emphasis will be placed on character as the engine of story.

FILM BC3201 Introduction to Film and Media Studies. 3 points.
BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART), Discussion Section Required
Prerequisites: Open to first-year students.
Corequisites: Enroll in the required Discussion Section through FILM BC 3204: Discussion Section.
Introductory survey of the history, aesthetics and theories of film. Topics in American and International cinema are explored through weekly screenings, readings, discussion, and lecture. A complete introduction to cinema studies, this course is also the prerequisite for further film courses at Columbia and Barnard.

Mission
The mission of the Environmental Biology major is to provide students with an understanding of the structure, function and interrelationships of diverse living systems within the context of earth's changing
Requirements for the Major

For requirement details, see Environmental Biology Major Worksheet, envbioworksheet.doc (http://envsci.barnard.edu/sites/default/files/envbioworksheet_revised_73014.doc).

Advisors: Hilary Callahan (Biological Sciences), Paul Hertz (Biological Sciences), Brian Mailloux (Environmental Science), Krista McGuire (Biological Sciences), Martin Stute (Environmental Science)

There is no minor in Environmental Biology.

Advice for the Environmental Biology Major

Adviser: Co-Chair, Brian Mailloux

Students may substitute courses taught at Columbia (in the Departments of Biology, Earth and Environmental Sciences, or Statistics) or at other institutions with the prior approval of both major advisers. Calculus, Physics, and a second year of Chemistry are recommended for students planning advanced study in Environmental Biology.

Students interested in Environmental Biology often choose to spend a semester "abroad", at the School for Field Studies (http://www.fieldstudies.org/), the Organization for Tropical Studies (http://www.ots.ac.cr/), or at comparable programs offered by other institutions. We encourage students to take advantage of such opportunities, and we expect that most of the courses they complete in these programs will be accepted in lieu of some of the major requirements. In addition, we recommend that those students planning to go abroad in the junior year elect to do so in the Fall Semester rather than the Spring Semester in order to take best advantage of senior seminar research planning and programming.

Students who elect a major in Environmental Biology will have a major adviser in each department. Although one member of the faculty will serve as the primary adviser, requests to substitute courses from Columbia or other institutions must be approved by both major advisers.

Internships or some type of work or field experience are extremely valuable in preparing students for careers in the environment. Go to the Environmental Science website for Opportunities & Affiliations (https://envsci.barnard.edu/node/1888/) for listings or see Beyond Barnard (https://barnard.edu/beyond-barnard/). Studies have shown that students who have had related work experience are more attractive to employers and graduate schools.

Students should check the catalogue and the department for additional information on the major and courses offered by Barnard and

**BIOL BC1500 Introduction to Organismal and Evolutionary Biology. 3 points.**

Prerequisites: This course is suitable for majors & fulfillment of pre-health requirements. A high school biology background or equivalent preparation is highly recommended. For those without this background seeking to major in biology, BIOL BC1002 & BIOL BC1012 are recommended in the fall of their freshmen year, followed by the year-long 1500-level lecture & lab sequence. BIOL BC1000 & BIOL BC1002 do not have to be taken in a fall to spring sequence. Detailed introduction to biological phenomena above the cellular level; development, anatomy, and physiology of plants and animals; physiological, population, behavioral, and community ecology; evolutionary theory; analysis of micro-evolutionary events; and systematics.

This course differs from traditional statistics courses by explicitly integrating statistics into research process.

**BIOL BC2873 Laboratory in Ecology. 3 points.**
Not offered during 2019-20 academic year.

Prerequisites: BIOL BC2272 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place. The definition of ecological problems in experimentally tractable ways; the design of experiments and analysis of ecological data; class projects on population ecology. Students conduct individual projects during last month of term.

**BIOL BC3320 Microbiology. 3 points.**
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent. This course is a pre-requisite for BIOL BC3321 Laboratory in Microbiology. **BIOL BC3591 Guided Research and Seminar. 4 points.**
Per Semester

An independent research project in Biology under the guidance of a faculty member and suiting the needs of the individual student. A Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in this year-long course. A Project Approval Form (https://forms.gle/mDNyT5CaEJKMMWCt5/) must be submitted to the department in the fall.

Attendance at a weekly seminar is required. By the end of the year, students enrolled in BIOL BC3591-BIOL BC3592 will write a scientific paper and give a poster presentation of their work at the Barnard Biology Research Symposium. Completion of this year-long course fulfills two upper-level laboratory requirements for the major. Must be taken in sequence, beginning in the fall.

Environmental Science (Barnard)

EESC V2100 Earth’s Environmental Systems: Climate. 4.5 points.
BC: Partial Fulfillment of General Education Requirement: Laboratory Science (SCI), BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA), Lab Required
Prerequisites: High school algebra. Recommended preparation: High school chemistry/physics, and one semester college science. Enrollment limited.
Studies formation of winds, storms, and ocean currents. Recent influence of human activity global warming, and climate change. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling.

EESC V2200 Earth’s Environmental Systems: Solid Earth. 4.5 points.
BC: Partial Fulfillment of General Education Requirement: Laboratory Science (SCI), Lab Required
Studies plate tectonics: Origin and development of continents, ocean basins, mountain systems on land and sea. Earthquakes, landslides, volcanoes, diamonds, oil. Land-use planning for resource development and conservation. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling.

EESC BC3014 Field Methods in Environmental Science. 3 points.
Prerequisites: Enrollment limited. Five required field trips that take a substantial portion of the day. Problem-oriented, hands-on approach emphasizing the tools, techniques, and observational skills necessary for the understanding of forest ecology and deer management. Field and laboratory work as well as data analysis and interpretation. Field Methods utilizes the outdoor resources of the Hudson River Valley, especially the forest environment at Black Rock Forest, a 4,000-acre preserve near Cornwall, N.Y.

EESC BC3016 Environmental Measurements. 3 points.
Prerequisites: Enrollment limited. Required field trip on first Friday of the semester.
Hands-on approach to learning environmental methods. Students take a one-day cruise on the Hudson River to collect environmental samples. These samples are then analyzed throughout the semester to characterize the Hudson River estuary. Standard and advanced techniques to analyze water and sediment samples for nutrients and contaminants are taught.

EESC BC3017 Environmental Data Analysis. 3 points.
Prerequisites: One year of college science or EESC V2100 or permission of the instructor.
Acquisition, analysis, interpretation, and presentation of environmental data, assessment of spatial and temporal variability. Focus on water quality issues and storm surges. Uses existing and student-generated data sets. Basic principles of statistics and GIS, uses standard software packages including EXCEL and ArcGIS. Includes a half-day field trip on a Saturday or Sunday. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

EESC BC3025 Hydrology. 3 points.
Prerequisites: EESC V2100, physics, or permission of instructor. Includes a weekend field trip. Alternate years.
Hands-on study and discussion of the basic physical principles of the water cycle (evaporation, condensation, precipitation, runoff, and subsurface flow), as well as environmentally relevant applications based on case studies. Special focus on the New York City area, the arid Southwest, and the developing world. Coverage of contemporary global water resources issues, including pollution control, sustainable development, and climate change. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

EESC BC3800 Senior Research Seminar. 3 points.
Enrollment limited to senior majors (juniors with the instructor’s permission). Provides credit for the senior thesis. The Senior Research Seminar can be taken Spring/Fall or Fall/Spring sequence.
Guided, independent, in-depth research culminating in the senior thesis in the spring. Includes discussion about scientific presentations and posters, data analysis, library research methods and scientific writing.
Students review work in progress and share results through oral reports. Weekly seminar to review work in progress and share results through oral and written reports. Prerequisite to EESC W3901.

### The Department of Environmental Science

#### Mission

Barnard College’s Environmental Science Department provides highly motivated young women with challenging and rewarding programs in Environmental Science, Environmental Biology, and Environmental Policy. High academic standards, multidisciplinary courses, and training in methodologies such as field work, measurements, and data analysis, ready our students with the tools needed to think critically, evaluate and solve problems, and understand and communicate science to address the needs of society. Faculty members are nationally and internationally recognized scholars and educators, active in research and curriculum development. Courses are innovative, featuring multimedia and technologically advanced resources. The urban setting, the proximity to the Hudson River, and the numerous affiliations we maintain with Columbia University through Lamont-Doherty Earth Observatory, the Earth Institute, and the School of Public Health, as well as Black Rock Forest, the American Museum of Natural History and other institutions, allow us to offer undergraduates unparalleled opportunities for student research and educational experiences. Upon successful completion of our program, our students are well prepared to continue their academic studies as graduate students or to pursue successful careers in a wide range of fields.

### Student Learning Outcomes

We expect that students graduating with an environmental major will learn to:

- recognize the history, structure, function, interactions, and trends of key environmental systems: climate, earth, life, socio-political;
- assemble a logical chain of reasoning ranging from observation to inference and action, not only to identify and characterize a problem, but also to find solutions:
  - design an independent scientific inquiry, from methods to interpretation;
  - locate, organize, analyze, integrate, synthesize, and evaluate complex information from multiple and disparate sources;
- apply appropriate analytical and quantitative approaches:
  - organize, visualize, and statistically analyze environmental data, and interpret relationships, trends and make predictions about future changes;
- handle uncertain, complex, real-world problems in the lab, field, community, and workplace;
- observe analytically and integrate diverse information from variable sources outside of the classroom;
- think critically, creatively, resourcefully, and strategically, including identifying steps needed to reach goals, manage projects, evaluate progress, and adapt approaches, developing both self reliance, and civic-mindedness;
- develop spatial literacy, understand the role of maps and 2-3 dimensional spatial systems; effectively process, reason, problem solve and communicate issues within a spacial context;
- utilize advances in environmental sciences and technology to resolve issues and anticipate implications;
- clearly communicate complex analyses, interpretations and significance through variable media (oral presentation, poster, proposal, research article, report), to audiences ranging from scientific to policy, and the general public;
- collaborate in teams, with peers and mentors, and work with others in diverse group settings, developing flexibility and leadership skills.

Environmental Science provides a scientific basis for management of earth systems. It focuses on the interaction between human activities, resources, and the environment. As human population grows and technology advances, pressures on earth’s natural systems are becoming increasingly intense and complex. Environmental Science is an exciting field where science is used to best serve society. The department offers two majors, Environmental Science and Environmental Policy. A third major, Environmental Biology, is offered in conjunction with the Department of Biological Sciences.

The curriculum recognizes the need for well-trained scientists to cope with balancing human requirements and environmental conservation. Majors acquire an understanding of earth systems by taking courses in the natural sciences, as well as courses investigating environmental stress. Students learn to critically evaluate the diverse information necessary for sound environmental analysis. Our courses foster an interdisciplinary approach to environmental problem-solving.

Internships or some type of work or field experience are extremely valuable in preparing students for a career in Environmental Science. We strongly encourage students to consider an internship in the summer before the senior year because it may lay the foundation for the senior thesis. Studies have shown that students who have had related work experience are more attractive to employers and graduate schools.

Students interested in environmental science might want to consider a semester or summer program at the SEE-U (http://www.ots.ac.cr/), the School for Field Studies (http://www.fieldstudies.org/), the Organization for Tropical Studies (http://www.ots.ac.cr/), or some other field program. In addition, we recommend that those students planning to go abroad in the junior year elect to do so in the Fall Semester rather than the Spring Semester in order to take best advantage of senior seminar research planning and programming.

Students wishing to go on to graduate school or careers in earth science and the physical sciences should take at least two semesters each of calculus, physics, and chemistry. Those considering graduate school or careers in biological/chemical fields are recommended to take calculus as well as upper-level courses in biology and chemistry.

Advice for the Environmental Science Major

Adviser: Co-Chair, Brian Mailloux

Students with a strong science background who are interested in majoring in Environmental Science are advised to take EESC UN2100 Earth's Environmental Systems: The Climate System early on, followed by EESC UN2200 Earth's Environmental Systems: The Solid Earth System. These two courses are required for all Environmental Science majors.

If you are interested in exploring Environmental Science or are concerned about your science background, you could take EESC BC1001 Environmental Science I in the fall. In the spring, you can shift into the major sequence of EESC UN2100 Earth's Environmental Systems: The Climate System.

EESC BC1001 Environmental Science I may be taken as a major elective*, however, the course must be completed prior to taking EESC UN2100, UN2200 or UN2300.

We recommend that Environmental Science majors take CHEM BC2001 General Chemistry I and BIOL BC1500 Introduction to Organismal and Evolutionary Biology, plus the corresponding lab, BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology, early in their academic career at Barnard in order to prepare for upper level courses with prerequisites. Students with concerns about their science preparation should not take both at the same time. If you want advice on taking an Introductory Biology course, visit Biology (http://physics.barnard.edu/academics/introductory-sequence/), and for advice on taking an Introductory Physics course, visit Physics (http://physics.barnard.edu/department-astronomy-physics/).

Students should check the catalogue and the department for additional information on the major, minor and courses offered by Barnard and Columbia. Classes with grades less than C- or taken pass/fail can not be counted towards the major.

See also Senior Research Seminar for information on senior thesis requirements.

Requirements for the Environmental Science Minor

Students wishing to minor in Environmental Science must have a plan approved by the Environmental Science Department Co-Chair, Martin Stute. For requirement details see Environmental Science Minor Worksheet (http://envsci.barnard.edu/sites/default/files/minorworksheet__040214.doc) for a list of qualifying electives.
some cases, courses in other sciences can be substituted with the approval of the chair. Five courses are required including:

Select three electives (two of which are at the 3000-level or higher) that form a coherent program. (For Electives for the Environmental Science Minor, please see link for Minor Requirements Worksheet above.) 9

Students wishing to minor in Environmental Science who are interested in field programs and seek minor credit must contact the department Co-Chair, Martin Stute. The only current field program within Columbia University is SEE-U.

There is no minor in Environmental Biology or Environment and Sustainability.

Environment and Sustainability Major

Sustainability is a growing field focusing on finding solutions in an ever-changing environment. Majors develop an understanding of the processes and stresses of earth’s systems, handle environmental data and make reasoned assessments, and engage in collaborative and interdisciplinary work required for developing approaches to maintain a sustainable environment.

The Environment and Sustainability major is designed to equip students to play effective roles as citizens or career professionals who can actively engage in environmental decision-making and policy in a rapidly changing environment. Majors learn to analyze and evaluate environmental, political, and economic systems and public policies in the context of environmental concerns, and to use these interdisciplinary skills to navigate development with the environment in mind. The major begins with foundations in the natural sciences, social sciences, and quantitative analysis, followed by upper level electives in both the natural and social sciences, as is a required hands-on, client-based collaborative workshop at the junior level is required. Many exciting opportunities for student research exist on this campus and in the greater metropolitan community.

Environment and Sustainability as did Policy graduates will go on to a variety of careers, including national and international environmental policy, law, economics, journalism, business, public administration, government agencies, corporations, multilateral institutions, nongovernmental organizations, academia, and consulting firms. There is no minor in Environment and Sustainability.

Advice for the Environment and Sustainability Major

Advisers: Co-Chair, Martin Stute

Because this Major was approved by the Faculty in Fall 2017 as a updated replacement for the Environmental Policy, any student may elect the Environment and Sustainability major, but only students in the Class of 2019 or 2018 can graduate with a major in Environmental Policy because it is being phased out.

Students with a strong science background who are interested in majoring in Environment and Sustainability are advised to take Earth's Environmental Systems: Climate (EESC UN2100 Earth's Environmental Systems: The Climate System).

If you are interested in exploring Environment and Sustainability or are concerned about your science background, you could take EESC BC1001 Environmental Science I in the fall. In the spring, you would need to find another introductory level Environmental Science course such as EESC UN1011, Earth, Origin, Evolution, Processes, Future (with Lab) or shift into the major sequence of EESC UN2100 Earth's Environmental Systems: The Climate System which is a Natural Science Foundation course. Please also note the following:

For the second Natural Science Foundation course requirement can be fulfilled by Majors in Environment and Sustainability with either CHEM BC2001, General Chemistry or EESC BC3016x, Environmental Measurements along with either another Additional Science Foundations Course or a Quantitative Foundations Analysis/ Skills course. There are a few options to fulfill the 3rd Natural Foundation course requirements, so see above the Environment and Sustainability Major Requirement Worksheet, envsustworksheet.doc (http://bulletin.columbia.edu/barnard-college/courses-instruction/environmental-science/EnvSustWorksheet_Revised_011017.doc) for more specifics.

We recommend that Environment and Sustainability majors take CHEM BC2001 General Chemistry I and BIOL BC1500 Introduction to Organismal and Evolutionary Biology plus the corresponding lab, BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology, early in their academic career at Barnard in order to prepare for upper level courses with prerequisites, but it is not recommended that they be taken concurrently. Students with concerns about their science preparation should realize the option of taking EESC BC2016, Environmental Measurements (plus the additional course). If you want advice on taking an Introductory Biology course, visit Biology (p. 132), and for advice on taking an Introductory Physics course, visit Physics (p. 374).

Students should check the catalogue and the department for additional information on the major, minor and courses offered by Barnard and Columbia. Classes with grades less than C- or taken pass/fail cannot be counted towards the major.

EESC BC1001 Environmental Science I. 4.5 points.
Prerequisites: Prerequisites: Enrollment limited. Students must also sign up for the corresponding lab course, EESC BC1011 to receive credit. Note BC1001 is not required for an environmental policy major. This class examines the basic principles of environmental science using current local and global environmental news as case studies. Issues covered are climate change, invasive species, water resources, sustainability, etc. A major goal is for students to understand the science behind environmental issues. Readings from the scientific literature, various newspaper articles, magazines and an online textbook are carefully coordinated with the topics. Because of our location, the lab curriculum features studies of the Hudson River and its forested shorelines. The lab is closely paired with the lecture and features hands-on and inquiry-based lab and field studies of statistics, data presentation, writing in the format of a scientific paper, data collection (on land and on the Hudson River), water chemistry, microbiology, microscopic and macroscopic life in the river, birds and plants in Riverside Park, biodiversity on a green roof, local geology, topographical maps, compass use, and museum studies. Students must also register for one of the eight lab sections EESCX1011. Students must take both lecture and lab.

EESC BC1011 Environmental Science I Lab. 0 points.
Corequisites: EESC BC1001

Students enrolled in EESC BC1001 must enroll in this required lab course. Students cannot enroll in this course unless also enrolled in BC1001.

EESC UN2100 Earth’s Environmental Systems: The Climate System. 4.5 points.

Prerequisites: high school algebra. Recommended preparation: high school chemistry and physics; and one semester of college science. Origin and development of the atmosphere and oceans, formation of winds, storms and ocean currents, reasons for changes through geologic time. Recent influence of human activity: the ozone hole, global warming, water pollution. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling. Students majoring in Earth and Environmental Sciences should plan to take EESC V2100 before their senior year to avoid conflicts with Senior Seminar.

EESC UN2200 Earth’s Environmental Systems: The Solid Earth System. 4.5 points.
CC/GS: Partial Fulfillment of Science Requirement
Priority given to Columbia and Barnard earth science, environmental science, and environmental biology majors should enrollment limits be necessary.

Prerequisites: high school algebra and chemistry. Recommended preparation: high school physics.
Prerequisites: high school algebra, chemistry, and physics. Exploration of how the solid Earth works, today and in the past, focusing on Earth in the Solar system, continents and oceans, the Earth’s history, mountain systems on land and sea, minerals and rocks, weathering and erosion, glaciers and ice sheets, the hydrological cycle and rivers, geochronology, plate tectonics, earthquakes, volcanoes, energy resources. Laboratory exploration of topics through examination of rock samples, experimentation, computer data analysis, field exercises, and modeling. Columbia and Barnard majors should plan to take W2200 before their senior year to avoid conflicts with the Senior Seminar.

Co-meets with EEEB 2002

Conservation and preservation is an interdisciplinary study of earth materials, their transformation into art objects and architectural structures, and the philosophy and analytical techniques required to prepare conservation and preservation strategies for these objects and structures. The course is Beyond Barnard being hands-on and field trip oriented with a focus on the Metropolitan Museum of Art and local geology and infrastructure.

EESC BC3012 Brownfields. 3 points.
Prerequisites: One college level science course or permission of the instructor. Anyone who has taken EESC BC1002 Introduction to Environmental Science cannot take this course. Brownfields considers interconnections between groundwater contamination, toxics, human health, government, economics, and law using the award-winning interactive learning simulation Brownfield Action. Through a semester-long, laboratory exploration of a simulated brownfield, students engage in an environmental site assessment and development of a plan for remediation and revitalization.

EESC BC3013 Shorelines and Streams. 3 points.
Prerequisites: Enrollment limited. Four required field trips that take a substantial portion of the day. An interdisciplinary study of shoreline processes, the larger ecosystems of which they are a part, and the geologic events and human impacts that have brought them through time to their current state. A problem-oriented, field-methods course, providing hands-on experience with tools and observational methods in a variety of outdoor environments. Involves sampling and measurement techniques for rocks and minerals, fossils, water, soil, flora, and fauna, as well as field and laboratory work, data interpretation and analysis, and the creation of a sample collection. Emphasis on the writing process through the reading of Rachel Carson’s The Edge of the Sea, a daylong field trip to Montauk Point, and the writing of a term essay on the natural history and origin of a grain of garnet found at the top of the dune at Napeague Bay.

EESC BC3014 Field Methods in Environmental Science. 3 points.
Prerequisites: Enrollment limited. Five required field trips that take a substantial portion of the day. Problem-oriented, hands-on approach emphasizing the tools, techniques, and observational skills necessary for the understanding of forest ecology and deer management. Field and laboratory work as well as data analysis and interpretation. Field Methods utilizes the outdoor resources of the Hudson River Valley, especially the forest environment at Black Rock Forest, a 4,000-acre preserve near Cornwall, N.Y.

EESC BC3016 Environmental Measurements. 3 points.
Prerequisites: Enrollment limited. Required field trip on first Friday of the semester. Hands-on approach to learning environmental methods. Students take a one-day cruise on the Hudson River to collect environmental
samples. These samples are then analyzed throughout the semester to characterize the Hudson River estuary. Standard and advanced techniques to analyze water and sediment samples for nutrients and contaminants are taught.

**EESC BC3017 Environmental Data Analysis. 3 points.**
Prerequisites: One year of college science or EESC V2100 or permission of the instructor.
Acquisition, analysis, interpretation, and presentation of environmental data, assessment of spatial and temporal variability. Focus on water quality issues and storm surges. Uses existing and student-generated data sets. Basic principles of statistics and GIS, uses standard software packages including EXCEL and ArcGIS. Includes a half-day field trip on a Saturday or Sunday. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

**EESC BC3019 Energy Resources. 3 points.**
Energy Resources utilizes the physical plant of Barnard and Columbia to involve students in a semester long real-life policy study that explores the interconnections between energy resources and sustainable energy efficiency. Students work collaboratively as a team and interface with college faculty, administration, staff and student organizations to produce and disseminate a professional level policy report describing existing usage of energy, analyzing where change is needed.

**EESC BC3021 Forests and Environmental Change. 4 points. Not offered during 2019-20 academic year.**
Prerequisites: Enrollment limited to 12 students. One year of college science or permission of instructor. Alternate years.
Seminar on forests in global change framework: forest distribution and link to climate, forest ecology, paleoecology, role of forests in global ecosystem, biological invasions, habitat fragmentation, biodiversity, conservation and management strategies. Format: class discussion of readings, student presentations on scientific papers, field trips, data collection and analysis.

**EESC BC3023 The Hudson: The Estuary, The River, and Our Environment. 3 points.**
An interdisciplinary study of the relationship between ecosystem function and sustainable human habitation for one of the great rivers of the world. Topics include: geological origins, the watersheds, basic hydrology, and estuarine dynamics; habitats and plants, energy flow, and nutrient dynamics; the invertebrates; fishes, fisheries, and other animals; water quality, water supply, and sewage treatment; sediment dynamics and PCBs; colonization and revolution; industrialization and transformation of the landscape; the Storm King controversy, conservation and environmentalism.

**EESC BC3025 Hydrology. 3 points.**
Prerequisites: EESC V2100, physics, or permission of instructor. Includes a weekend field trip. Alternate years.
Hands-on study and discussion of the basic physical principles of the water cycle (evaporation, condensation, precipitation, runoff, and subsurface flow), as well as environmentally relevant applications based on case studies. Special focus on the New York City area, the arid Southwest, and the developing world. Coverage of contemporary global water resources issues, including pollution control, sustainable development, and climate change. General Education Requirement: Quantitative and Deductive Reasoning (QUA).

**EESC BC3026 Bird, Plant and Land-use Dynamics. 3 points.**
Prerequisites: Enrollment limited to 12 students. Permission of the instructor required.
This class looks at the response of wildlife (birds and plants) to climate change and land-use issues from the end of the last glaciation to the present. We visit wildlife refuges along a rural-suburban-urban gradient in order to observe and measure the role refuges play in conservation. Case study topics are: (1) land-use change over time: a paleoenvironmental perspective, (2) environmental transformations: impact of exotic and invasive plants and birds on local environments and (3) migration of Neotropical songbirds between their wintering and breeding grounds: land-use, crisis and conservation. Format: lecture, student presentations, field trips and data collection/analysis.

**EESC BC3032 Agricultural and Urban Land Use: Human-Environment Interactions. 4 points.**
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.
Prerequisites: One year of college science or permission of instructor. Alternate years.

**EESC BC3033 Waste Management. 3 points.**
Alternate years.
Project-oriented study of waste management issues and policy. Cradle-to-grave analysis of product and waste streams. Analysis of municipal
solid waste, landfills, incineration, recycling, sewage waste and sewage treatment.

Process-oriented introduction to the law and its use in environmental policy and decision-making. Origins and structure of the U.S. legal system. Emphasis on litigation process and specific cases that elucidate the common law and toxic torts, environmental administrative law, and environmental regulation through application and testing of statutory law in the courts. Emphasis also on the development of legal literacy, research skills, and writing.

**EESC BC3043 Water, Sanitation, and Health. 3 points.**

This course focuses on understanding water, sanitation and health in the developing world and how these factors interact to affect people's lives. Specifically, what are the options for providing cleaner water and improved sanitation in order to reduce the incidence of waterborne diseases in the developing world?

**EESC BC3045 Responding to Climate Change. 3 points.**

Prerequisites: One of the following courses that introduces the structure and functioning of the climate system and processes underlying climate change: EESC V1002, Climate and Society: Case Studies; EESC V2100 Earth’s Environmental Systems: Climate; EESC W2330, Science of Sustainable Development; or EAAE E1100, A Better Plant by Design.

Analysis of climate change adaptations, responses, and mitigation options. Consideration of impacts of projected climate changes including global water, food and health complemented by regional case studies. Scientific, technologic, economic, political, and behavioral aspects of potential solutions.

**EESC BC3050 Big Data with Python: Python for Environmental Analysis and Visualisation. 3 points.**

Big Data is changing how we interact with and understand the environment. Yet analyzing Big Data requires new tools and methods. Students will learn to use Python programming to analyze and visualize large environmental and earth’s systems data sets in ways that Excel is not equipped to do. This will include both time series and spatial analyses with programming occurring interactively during class and assignments designed to strengthen methods and results. Students will learn to write code in Python, plot, map, sub-select, clean, organize, and perform statistical analyses on large global scale data sets, using the data in analysis, and take any data set no matter how large or complicated.

**EESC BC3200 Ecotoxicology. 3 points.**

Not offered during 2019-20 academic year.

Prerequisites: CHEM BC1601, BIOL BC2002, or permission of instructor. Alternate years.

The study of anthropogenic contaminants within our natural environment and their subsequent effects on biological organisms. Effects to be examined: the molecular scale (biochemical pathways of metabolism and detoxification), the organismal scale (target organs, behavioral effects), and the ecosystem scale (species viability). Lectures and hands-on activities are used to teach the material.

**EESC BC3300 Workshop in Sustainable Development. 4 points.**

Students address real-world issues in sustainable development by working in groups for an external client agency. Instruction in communication, collaboration, and management; meetings with and presentations to clients and academic community. Projects vary from year to year. Readings in the course are project-specific and are identified by the student research teams.

**EESC BC3800 Senior Research Seminar. 3 points.**

Enrollment limited to senior majors (juniors with the instructor’s permission). Provides credit for the senior thesis. The Senior Research Seminar can be taken Spring/Fall or Fall/Spring sequence.

Guided, independent, in-depth research culminating in the senior thesis in the spring. Includes discussion about scientific presentations and posters, data analysis, library research methods and scientific writing. Students review work in progress and share results through oral reports. Weekly seminar to review work in progress and share results through oral and written reports. Prerequisite to EESC W3901.

**EESC BC3801 Senior Research Seminar. 3 points.**

Enrollment limited to senior majors (juniors with the instructor’s permission). Provides credit for the senior thesis. The Senior Research Seminar can be taken Spring/Fall or Fall/Spring sequence.

Guided, independent, in-depth research culminating in the senior thesis in the spring. Includes discussion about scientific presentations and posters, data analysis, library research methods and scientific writing. Students review work in progress and share results through oral reports. Weekly seminar to review work in progress and share results through oral and written reports. Prerequisite to EESC W3901.

European Studies

422A Lehman Hall
212-854-4733

Mission

The European Studies program at Barnard College enables students to combine disciplinary approaches to the study of Europe. Students ground themselves in a core discipline (history, political science, anthropology, sociology, theater, and philosophy, among others) that provides them with methodological expertise. They also take courses in the language and literature of a chosen region of Europe and complement this program with a selection of courses exploring Europe from other disciplinary perspectives. Students are encouraged to study abroad in the region of their interest.

Student Learning Outcomes

Students who graduate with a major in European Studies will be able to attain the following outcomes:

- Demonstrate an understanding of the breadth of Europe’s cultural heritage as well as its distinctive components;
- Explain the role of language and literature within culture;
- Apply different disciplinary perspectives to the study of a single region.

This program is supervised by the Committee on European Studies:

Co-Chairs: Erk Grimm (Associate Professor of German), Lisa S. Tiersten (Professor of History)

Requirements for the Major

Students who intend to major in European Studies should consult a member of the department in their sophomore year to plan their academic programs.

The senior requirements vary according to the discipline studied. Majors should consult their advisers for details.

Students may focus on one country or one region of Europe. Competence in the language of the region is expected. The major includes:

1. A concentration consisting of five courses in an academic discipline chosen in consultation with the major adviser. A maximum of two of these courses that deal with European topics may be counted among the ten courses in the regional concentration (Part B).
2. Ten courses focusing on a country or region to include:
   - Two courses in European History;
   - Two courses in the literature or cultural studies of one country in the original language;
   - Two semester senior projects under the direction of the program adviser or an adviser in the minor field;
   - Four courses outside the field of concentration dealing with the selected country or region.

The following list is only a sample selection of courses that may be applied to the major.

HIST BC3062 Medieval Economic Life and Thought ca 1000 to 1500. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Traces the development of economic enterprises and techniques in their cultural context: agricultural markets, industry, commercial partnerships, credit, large-scale banking, insurance, and merchant culture. Examines usury and just price theory, the scholastic analysis of price and value, and the recognition of the market as a self-regulating system, centuries before Adam Smith.

HIST BC2116 The History of Money. 3 points.
Examining the history of money and the history of ways of thinking about money. We investigate how different monetary forms developed and how they have shaped and been shaped by culture, society, and politics. Studies the cultures of gift-giving societies to the European Monetary Union, the focus is on early modern Europe.

HIST BC2180 Merchants, Pirates, and Slaves in the Making of Atlantic Capitalism. 3 points.

Examines how the Atlantic Ocean and its boundaries were tied together through the flow of people, goods, and ideas. Studies the cultures of the communities formed by merchants, pirates, and slaves; investigates how their interactions and frictions combined to shape the unique combination of liberty and oppression that characterizes early modern capitalism.

HIST BC2230 Central Europe: Nations, Culture, and Ideas. 3 points.
Not offered during 2019-20 academic year.

The making and re-making of Central Europe as place and myth from the Enlightenment to post-Communism. Focuses on the cultural, intellectual, and political struggles of the peoples of this region to define themselves. Themes include modernization and backwardness, rationalism and censorship, nationalism and pluralism, landscape and the spatial imagination.

HIST BC2321 Colonial Encounters: Europe and the Culture of Empire. 3 points.
Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism.

Film Studies

Department Assistant: Rio Santisteban

The Film Studies Program

The Program in Film Studies at Barnard College offers a theoretical, historical and practical approach to the study of film. Through this course of studies, students come to understand film as a dominant cultural medium of the twentieth century and its influence on the present, as well as as an art form with profound and continuing connections to a range of disciplines that span the humanities and the social sciences.

Mission

The educational goal of the film major is to provide a solid grounding in the history and theory of film and as well as place the study of film in relation to other art forms. Students are introduced to visual storytelling, film technology, and the economic and sociopolitical context of the film industry. The trajectory of the major moves from introductory level courses (primarily surveys) to intermediate level courses (that introduce the mechanics of writing for film as well as film making), to advanced level courses (including two labs and the senior seminar), plus two electives from the approved list. While the course of study is rooted in film history and theory, all majors take workshops in screenwriting and filmmaking and produce a script and a short film. Our place in a premier college for women invites our Program to pay special attention to questions of gender, and our home in New York City allows students to connect their study to the city's vibrant film industry as well as range of film in arts houses and revival theaters.

Student Learning Outcomes

Students who graduate in Film Studies will be able to attain the following outcomes:

- Demonstrate in-depth knowledge of film history;
- Explain the major concepts or ideas of film theory;
- Communicate in-depth knowledge of film in one other language tradition;
- Write a basic/elementary screenplay;
- Create a short film;
- Demonstrate an understanding of film’s relationship to a range of other disciplines across the humanities and social sciences;
- Conduct original research on a film (usually one film) intensively in the context of a limited enrollment senior seminar.

For questions about Film Studies contact Ross Hamilton (rhamiltn@barnard.edu), Director.

The program is supervised by the Barnard Committee on Film Studies:

Director: Ross Hamilton (Professor, English)
Associate Professors: Kaiama L. Glover (African Studies, French, Women Studies), Erik Grimm (Comparative Literature, European Studies, German)
Term Professor: Maura Spiegel (English/Film)
Professor of Professional Practice: Meg McLagan (Visiting)
Adjunct Professors: Jonathan Beller (English/Women's Studies), Sandra Luckow, Ben Philippe, Charles Schulze, Breixo Viejo Vinas,
Columbia University Faculty: Annette Insdorf, Milena Jelinek, Christina Kallas, Sandra Luckow, Richard Pena, Andrew Sarris, James Schamus, Maura Spiegel

Requirements for the New Major

Current juniors and seniors (classes of 2017 and 2016) may choose to fulfill the requirements of the earlier major (listed at the bottom of this page). Please consult your major adviser for more details.

Please note that Columbia courses have been renumbered and retitled, but content remains the same.

The major requirements remain at a total of 36 credits, namely twelve 3-point courses. However, only 6 classes are required, and 6 are electives. Moreover, we will no longer separate survey courses into “American” and “International.” Please note that most classes are offered only one semester per academic year.

Requirements for the New Major

Current juniors and seniors (classes of 2017 and 2016) may choose to fulfill the requirements of the earlier major (listed at the bottom of this page). Please consult your major adviser for more details.

Please note that Columbia courses have been renumbered and retitled, but content remains the same.

The major requirements remain at a total of 36 credits, namely twelve 3-point courses. However, only 6 classes are required, and 6 are electives. Moreover, we will no longer separate survey courses into “American” and “International.” Please note that most classes are offered only one semester per academic year.

FILM BC3119 Screenwriting. 3 points.

Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.

Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)

Practical workshop in dramatic writing for the screen. Through exercises and games specifically catered to the writing of stories and scenes, students will develop their understanding of how to create a compelling narrative, build characters, and structure scenes. The course will culminate in a final screenplay, which will be critiqued in class.

FILM BC3120 Feature Film Screenwriting. 3 points.

Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.

Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)

Workshop in feature film writing. Students will enter the course with a story idea, ready to start a feature screenplay. Through lectures and workshop discussions, the course will critique the details of character development and scene construction. Analysis of student work will prompt generalized conversations/lectures on the fundamentals of film writing. Emphasis will be placed on character as the engine of story.

FILM BC3200 Film Production. 3 points.

Prerequisites: FILM BC3201 or equivalent. Sophomore standing.

Interested students MUST attend the first day of class for instructor permission-registering for the course only through myBarnard or SSOL will NOT ensure your enrollment.

This workshop introduces the student to all the cinematic tools necessary to produce their own short narrative work. Using what the student has learned in film studies, we'll break down shot syntax, mise-en-scene and editing strategies and master them in weekly video exercises. We'll include casting, working with actors and expressive camera work in our process as we build toward a final video project. By the end of the course, the student will have created a DVD containing a collection of their video pieces and their final project. Priority given to junior and senior film majors.

FILM BC3201 Introduction to Film and Media Studies. 3 points.

This course will focus on the primary pillar of television production: the
teleplay. Through a number of creative exercises, students will learn
the intricacies of the unique screenwriting formats that are the half-
hour and hour-long teleplays. Together we will cover the differences
between an episode arc and a seasonal one, the requirements of A/
B/C story plotting, and how to write an effective show bible. We will
survey the existing pantheon of great television writing in order to help
students narrow in on their individual sensibilities. By the end of the
course, students will have a written original pilot.

Prerequisites: Open to first-year students.
Corequisites: Enroll in the required Discussion Section through FILM BC
3204: Discussion Section.
Introductory survey of the history, aesthetics and theories of film.
Topics in American and International cinema are explored through
weekly screenings, readings, discussion, and lecture. A complete
introduction to cinema studies, this course is also the prerequisite for
further film courses at Columbia and Barnard.

FILM BC3204 Discussion Section. 0 points.
Enrollment in one of the following sections is required when registering
for FILM BC 3201: Introduction to Film and Film Theory.

FILM BC3225 Independent Cinema. 3 points.
Prerequisites: FILM BC 3201 or equivalent.
In 1989, the Hollywood studio system was languishing in a creative
drought, until Steven Soderbergh’s sex, lies, and videotape blew up the
dam. Suddenly, audiences were eager for new, exciting visions free
from establishment oversight. The next ten years saw the emergence
of directors like Quentin Tarantino, Spike Lee, Kevin Smith, Richard
Linklater, Jim Jarmusch, Lisa Cholodenko and many others. This
course, arranged chronologically, will look at different filmmakers each
week, while exploring the circumstances that allowed this movement to
exist; what caused it to thrive, and what lingering effects did it have on
today’s cinema.

FILM BC3225 American Television Drama. 3 points.
Between prestige and streaming, the medium of television has never
covered a wider breadth of narratives, voices, and concerns. This
course will take a closer look at the format of the American Drama
and how it has served as a cultural tool since its inception, reflecting
the concerns of the time in one form or another. Through theoretical
readings and sociological texts, the course will survey and sharpen
our understanding of the power of the medium when placed in
conversation with the greater American discourse.

FILM BC3260 Non-Fiction Digital Video Production. 3 points.
Prerequisites: Enrollment limited to 12 students. Registering for the
course only through myBarnard or SSOL will NOT ensure your enrollment. Attend first class for instructor permission. Lab section
required.
Enrollment limited to 12 students. Registering for the course only
through myBarnard or SSOL will NOT ensure your enrollment. Attend first class for instructor permission. Lab section required. This
workshop course is designed to familiarize students with digital video
technologies while they investigate various aesthetic and theoretical
concepts related to nonfiction cinema and its engagement with the
real. Through weekly readings, discussions, screenings, critiques, and
practical exercises, students will develop a solid understanding of how
to use digital video as an expressive tool. The course will culminate in
the completion of a short video work by each student. Students should be both self-directed and interested in developing a support system for
each others work.

FILM BC3301 Advanced Production. 3 points.
Prerequisites: FILM BC3201 or equivalent. Sophomore standing.
Enrollment limited to 12 students. Attend first class for instructor
permission.
Advanced Film Production will teach students how to create a
short narrative film; emphasizing the steps taken in pre-production,
production and post-production. Through hands-on workshops and
teaching, students will learn narrative editing, shot progression, camera
lenses, lighting and audio equipment. Students will work in teams
of four, learning the roles and responsibilities of the different crew
members.

Cross-Listed Courses
Anthropology (Barnard)
ANTH V3824 Fantasy, Film, and Fiction in Archaeology. 4 points.

Not offered during 2019-20 academic year.
Classics (Barnard)
CLLT V3230 Classics and Film. 3 points.
Considers cinematic representations of the ancient Mediterranean world, from early silent film to movies from the present day. Explores films that purport to represent historical events (such as Gladiator) and cinematic versions of ancient texts (Pasolini’s Medea). Readings include ancient literature and modern criticism.

Comparative Literature (Barnard)
East Asian Languages and Cultures
EAAS W4106 Global Genres and East Asian Cinema. 3 points.
Discussion Section Required
Not offered during 2019-20 academic year.
This course explores East Asian Cinema from the perspective of film genre. In particular, the course examines East Asian genre films as active interaction with the circulation of global film genres as well as mass mediated engagement with specific economic, social, and political histories of East Asia. We will study contemporary theories of film genre, examine how the case of East Asian genre films complicate existing theories, while paying due attention to the parallel transnational traffics—between East Asian Cinema and global film genre, and across East Asian Cinema in their history of cultural and economic flow as well as political confrontation. We will integrate our investigations of genre-specific questions (industry, style, reception, spectatorship, affect) with those of gender, ethnicity, power as well as nation and transnational/transregional identity.

English (Barnard)
ENGL W4670 American Film Genres. 3 points.
Not offered during 2019-20 academic year.
(Lecture). Some critics contend that all Hollywood film is either melodrama or morality play, no matter what its claims to the contrary; others see it as purely wish-fulfillment fantasy. This course will examine a range of genres in Hollywood film, while also scrutinizing and questioning the formation and usefulness of genre distinctions. Our orientation will be formal as well as social and historical, as we examine codes and conventions of generic illusion and verisimilitude, the look and sound of different genres; genre and acting style; the rise and fall of specific genres (the Western, the slasher film, etc.), increasing self-reflexiveness in especially such genres as noir, the musical, romantic comedy; genre-bending and postmodernity; and genre as projection and organization of public sentiment. We will also explore why certain genres are linked to political parties, as are specific styles of heroism. Genres will include: the combat movie, romantic comedy, horror, action, animation, musicals and “independent” films.

French (Barnard)
FREN BC3062 Women in French Cinema since the 60s. 3 points.
Not offered during 2019-20 academic year.
This course traces the evolving nature of the relationship between women and society in French cinema from the New Wave of the 60’s to the present. Attitudes of women and towards women will be examined in the light of the changing social, political, and intellectual context. FREN BC1204: French Intermediate II or the equivalent level is required.
FREN BC3064 France on Film. 3 points.
Not offered during 2019-20 academic year.
Films on and of the period from the 1930s to the present, focusing on the interplay between history, ideology, and culture. FREN BC1204: French Intermediate II or the equivalent level is required.
FREN BC3065 Surrealism. 3 points.
Not offered during 2019-20 academic year.
An examination of the relationship between traditional & avant-garde literature and visual culture; the use of word-play & language games as tools of artistic expression; the thematization of the unconscious and dreams; the vexed relationship between aesthetics & politics; the poetics and politics of sexuality & gender. Authors and artists will include Andre Breton, Louis Aragon, Man Ray, Dorothea Tanning, and Salvador Dali. FREN BC1204: French Intermediate II or the equivalent level is required.
FREN BC3073 Africa in Cinema. 3 points.
Not offered during 2019-20 academic year.

Italian (Barnard)
ITAL UG3642 Road Trips: Travel in Italian Cinema. 3 points.
Corequisites: Cap at 25.
Explores the representation of national identity in Italian cinema from the Fascist era to the present. Examines how both geography and history are used to construct an image of Italy and the Italians. Special focus on the cinematic representation of travel and journeys between North and South. Films by major neo-realist directors (Rossellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Amelio).

Religion (Barnard)
RELI V3610 Religion in American Film. 3 points.
Exploration of relationships between religion and popular film with particular attention to the way religious narratives and symbols in film uphold and critique norms of race, class and gender in the formation of American societal institutions (political structures, economy, family and community organization).

Spanish and Latin American Cultures (Barnard)
SPAN BC3151 Spanish Film: Cinematic Representation of Spain. 3 points.
Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).
Examination of Spanish film in both theoretical and historical terms. Considers political and ideological changes through the 20th century and their repercussions in cinematic representation. Topics include: surrealism and Bunuel’s legacy; representations of Franco and the civil war; censorship and self-censorship; gender, sexualities, and national identities; film, literature relations.

Latin American and Iberian Cultures
SPAN W3520 Dirty Realism in Latin America. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: SPAN W3349 or SPAN W3350 or the instructor’s permission.
The course will examine recent texts and films from Latin America and the United States to analyze the many configurations of the genre of dirty realism. The class gives a culturally and historically specific context for what has been a major trend in the film and book market of the last fifteen years.

First-Year Writing
417 Barnard Hall
212-854-2116

Mission
First-Year Writing: Critical Conversations courses invite students into the vibrant scholarly life of the college by honing their critical reading and academic writing skills. Working in small, discussion-based seminar classes over the course of one semester, we read challenging literary texts and critical scholarship, helping students to develop fundamental skills in analysis and academic writing that allow them to take their place in vitally important scholarly conversations. Students choose one of three rubrics – Legacy of the Mediterranean, Women and Culture, or The Americas – each of which explores and questions a particular literary tradition.

Student Learning Outcomes
Students who successfully complete this one-semester course should be able to:
• closely analyze evidence to develop persuasive claims
• develop claims into sophisticated, consequential ideas
• communicate ideas clearly through well-organized, lucid writing
• develop skills in critical reading and academic writing that transfer to courses across the curriculum
• conduct interdisciplinary research to ground literary works in different contexts (historical, theoretical, etc.)
• document sources and incorporate scholarship into original analytical arguments
• avoid plagiarism and other academic violations of Barnard’s Honor Code
• gain confidence in speaking as well as writing skills in a small seminar setting

Director: Wendy Schor-Haim (Senior Lecturer in English)
Associate Director: Cecelia Lie-Spahn (Term Associate, English; Director, First-Year Writing (Workshop))

Lecturers: Meredith Benjamin, Benjamin Breyer, Vrinda Condillac, Andrew Lynn, Alexandra Watson
Post-Doctoral Fellow: Duygu Ula
Adjunct Lecturers: Mary Helen Kolisnyk, Linn Cary Mehta, Barbara Morris, Jennifer Rosenthal
Adjunct Associates: Elizabeth Auran, Penelope Meyers Usher

Every Barnard first-year student is required to take First-Year Writing (formerly known as First-Year English) during her first or second semester at Barnard. Students choose to study one of three rubrics: I. Legacy of the Mediterranean investigates and interrogates formative texts whose ideologies have shaped Western culture; II. Women and Culture challenges traditional dichotomies that cast gender as an essential attribute rather than a cultural construction, and interrogates the categories of both ”woman” and ”culture” themselves; or III. The Americas features a curriculum of texts that exemplifies the dynamic relationship between North, South, and Central American literatures. All three rubrics develop critical reading and academic writing skills that are central to courses across the curriculum.

Transfer students who did not pass a satisfactory course at their previous institution are not required to take First-Year Writing, but must take ENGL BC3103 The Art of the Essay or ENGL BC3104 The Art of the Essay or a 3-point literature course (not a creative writing course) from the Barnard English department offerings.

First-Year Seminar

332G Milbank Hall
212-854-3577
Department Assistant: Marsha Peruo

Mission

Every Barnard first-year student is required to take a First-Year Seminar during her first or second semester at Barnard. First-Year Seminars are designed to develop further the essential and prerequisite skills a student brings to Barnard in critical reading and analysis, writing, and effective speaking. First-Year Seminars are intellectually challenging interdisciplinary courses which explore important issues through significant texts ranging across genres and historical periods. Seminars also serve to initiate students into the intellectual community of the college.

Student Learning Outcomes

1. Students in First-Year Seminars will develop their skills in critical reading and analysis, writing, and effective speaking.

2. They will assess and use textual evidence in support of oral and written arguments.

3. Students will explore important issues through significant texts ranging across genres, disciplines, and historical periods.

First-Year Seminars fall into two categories: Special Topics and Reacting to the Past.

Special Topics seminars reflect the variety of faculty interests and expertise, and thus vary in topic from year to year. They offer
students and faculty opportunities to explore topics of interest across disciplinary lines, genres, and historical periods. Use the "Courses" tab above to view the full Special Topics offerings; current semester offerings are indicated with schedule details.

In Reacting to the Past seminars, students participate in role-playing games that enable them to relive important intellectual debates in three separate historical moments.

In The Threshold of Democracy: Athens in 403 B.C., students draw on Plato's Republic as well as excerpts from Thucydides, Xenophon, and other contemporary sources to debate the prospects for Athenian democracy in the wake of the Peloponnesian War.

In Confucianism and the Succession Crisis of the Wanli Emperor, students study the Analects of Confucius and apply Confucian thought to issues of governance during the Ming dynasty. The final semester's final game varies by section. Some sections explore seventeenth-century Massachusetts, drawing on the Bible, Calvin's Institutes, and colonial trial testimony to participate in The Trial of Anne Hutchinson. Other sections draw on texts by Marx, Freud, and Wollstonecraft to explore the contest between women's suffrage advocates and labor activists for the hearts and minds of "Bohemian" Greenwich Village in the spring of 1913.

This program is supervised by the First-Year Seminar Committee:

Directors: Pamela Cobrin (Senior Lecturer in English), Laurie Postlewate (Senior Lecturer in French)

First-Year Class Dean: Rebecca Grabiner

Director of First-Year Writing: Wendy Schor-Haim

Professors: Robert McCaughey (History), Kristina Milnor (Classics), Stephanie Pfirman (Environmental Science)

Associate Professors: Ronald Briggs (Spanish)

Assistant Professor of Professional Practice: Alice Reagan (Theatre)

Instruction in the First-Year Seminar Program is provided by the following regular members of the Barnard College faculty:

Professors: Elizabeth Bernstein (Sociology), André Burgstaller (Economics), Mark Carnes (History), Robert McCaughey (History), Kristina Milnor (Classics), Stephanie Pfirman (Environmental Science), Herb Sloan (History), Jonathan Rieder (Sociology), Herb Sloan (Professor Emeritus), Patricia Stokes (Psychology), Caroline Weber (French), Jennifer Worth (Reacting to the Past)

Associate Professors: Severin Fowles (Anthropology), Elizabeth Hutchinson (Art History), Brian Mailloux (Environmental Science), Lisa Son (Psychology), Claire Ullman (Political Science),

Assistant Professors: Orlando Bentancor (Spanish), Michael Campbell (Chemistry), Ralph Ghoche (Architecture), Sandra Goldmark (Theatre), Bradley Gorski (Slavic), Ayten Gundogdu (Political Science), Daniel Kato (Political Science), Gale Kenny (Religion), Ellen Morris (Classics), Elliot Paul (Philosophy), Sonia Pereira (Economics), Alice Reagan (Theatre), Aaron Schneider (English), Michelle Smith (Political Science), Claire Ullman (Political Science), Manu Vimalassery (American Studies)

Lecturers and Other Faculty: Maureen Chun (English), Monica Cohen (English), Pamela Cobrin (English), Dennis Dalton, Margaret Ellsberg (English), Katie Glasner (Dance), Andrew Lynn (English), Linn Cary Mehta (English), Barbara Morris (English), John Pagano (English), Stefan Pedatella (English), Laurie Postlewate (French), Jennifer Rosenthal (English), Wendy Schor-Hlewate (English), Timea Szell (English), Margaret Vandenburg (English)

Courses of Instruction

Every Barnard first-year student is required to take a First-Year Seminar during her first or second semester at Barnard. Transfer students are not required to take First-Year Seminars.

Special Topics

FYSB 1105 Language and Power. 3 points.

This course will address the relationship between language and power from a philosophical perspective. We will investigate questions such as: How does language influence the way we think of gender, race, society, and politics? What are the limits, if any, on free speech? In what ways, if any, can language be used to harm people? Some topics we will discuss include hate speech, trigger warnings, slurs, dog whistles, propaganda, and silencing. Readings will include philosophical papers and recent op-eds.

FYSB 1107 RACE, SCIENCE, & REPRODUCTIVE JUSTICE (WKSHOP). 4 points.

This course is about reproduction—a biological and social process that is often the target of deep-seated ideas about nation, culture, conflict, and definitions of life. Looking at the relationships between reproduction, science, and identity formation, we will explore a variety of literary works, films, journalism, public health studies, and policy/legal texts, all of which differently narrate, debate, script, and theorize about reproduction. Questions we will explore include: what is reproduction—scientificaly, culturally, politically, historically? How do recent medical/technological/pharmaceutical developments shape reproductive experiences? What are the distinctions between reproductive rights, health, and justice, particularly in their responses to long histories of reproductive violence? How do different historical and geopolitical contexts shape our understandings and management of reproduction, from ancient Egyptians who used pebbles as IUDs, to in-vitro fertilization and so-called "DIY" abortions, to population and development projects all over the world? Our conversations will both reveal and challenge the way we understand reproduction and the contradictory beliefs and actions associated with it.

NOTE: This 4-credit version of First-Year Seminar (FYS)—FYS "Workshop"—is specially designed for students who believe they would benefit from extra support with their critical reading and academic writing skills. In addition to regular seminar meetings twice per week, students are also required to participate in six "writing labs" over the course of the semester. The writing labs for this section will take place on the following Fridays, 11:40 am-12:55 pm: 1/31, 2/7, 2/28, 3/6, 4/3, and 4/17.

FYSB BC1113 Feminist Futures. 3 points.
This course develops interdisciplinary approaches to the study of power by surveying forms of speculation in fiction, cinema, music, theater, visual culture, and political discourse. Topics include: feminist utopias and dystopias; afrofuturism and technological approaches to gender; and discourses of population control, reproduction, and predictive policing.

FYSB BC1114 Hot Stuff. 3 points.

Long before humans walked the earth; before dinosaurs were wiped out; before any sign of sentient life on earth; volcanoes were a feature of our planet. With the power to help create life, as well as wreak devastation and destruction, volcanoes inspire awe and terror in equal measure. This seminar will explore the science behind volcanoes, their impact on the environment and societies, as well as our enduring fascination with them through the lenses of history, arts, mythology and religion. Where and why do volcanoes erupt? How do they affect nature, climate and society? How has our understanding of these amazing natural phenomena evolved over time? Why do people stay in close proximity to volcanoes, despite the dangers? Can we predict when the next catastrophic eruption will occur? Can we harness the power of volcanic activity as alternative energy source? These are some of the many questions that students will seek to answer and will serve as a starting point for our deeper investigation into the subject throughout the semester. Students will study historical texts, case studies, current data and methods of analysis, as well as depictions of volcanoes in art and film. Group discussion, independent study and individual and group presentations. Students will research case studies and present their findings to the class.

FYSB BC1138 Free Speech in the Age of Neoliberalism. 3 points.

Despite the fact that free speech is seen a fundamental right and venerated by individuals across the political spectrum, it nonetheless is continually at the heart of social and political debate in the United States. What speech and which speakers are protected and what limits and burdens can be placed on speech are topics of perennial debate. In the United States our concept of free speech rights stems from the language of the First Amendment which has not changed since it was drafted in 1789. Nevertheless, our understanding of the value and meaning of free speech has changed and continues to change depending on social, political, and economic contexts. This course will explore free speech rights and principles within the social contexts that have shaped them in three ways. First, we will explore the development of free speech doctrines and philosophies in U.S. law. Second, it will explore the challenges to and limits on free speech. Third, we will explore how the contemporary social and political era is shaping ideas about free speech and its protection.

FYSB BC1189 Enchanted Imagination. 3 points.
A survey of fantasy works that examines the transformative role of the imagination in aesthetic and creative experience, challenges accepted boundaries between the imagined and the real, and celebrates Otherness and Magicality in a disenchanted world. Readings will be selected from fairy tales, Shakespeare’s *A Midsummer Night’s Dream* and *The Tempest*; Romantic poetry by Blake, Coleridge, Keats, and Dickinson; Romantic art by Friedrich, Waterhouse, and Dore; Mary Shelley’s *Frankenstein*, Lewis Carroll’s *Alice* books, Tennyson’s *Idylls of the King*, Tolkien’s *Lord of the Rings*; Magical Realist works by Borges, Garcia Marquez, and Allende; Sondheim & Lapine’s *Into the Woods*, Rushdie’s *Haroun and the Sea of Stories*.

FYSB BC1199 Losing Yourself: Absorption in Visual Media. 3 points.
How do we pay attention now: too well, or not well enough? This course aims to clarify the ongoing debate about both the value and the meaning of absorption in visual media. We will begin by comparing contemporary polemics on the decline of attention with writings by a generation of cultural critics writing in Germany in the 1920s and 30s, for whom distraction was both a symptom of and a response to an increasingly commodified culture. Next, we’ll draw on recent theorists to help us consider how three representative works (a painting, a sequence in a video game, and a chapter from a novel) shape the way we attend to them. When we imagine the way we pay attention now, we tend to think of ourselves as not reading, and of the book as a medium in decline. In the second half of the class, we’ll therefore turn our attention to the late eighteenth century, when it was widespread reading that seemed strange and new. Together, we’ll focus on two mixed forms from the period — the epistolary novel and the ballad collection — that helped make reading itself at once troublingly distracting and dangerously absorbing.

FYSB BC1200 Banned: Dangerous Art. 3 points.
In this course we will engage with various forms of artistic production (literary, cinematic, pictorial, musical) that have been banned or censored by religious authority, governmental institutions, or by public opinion. While discussing these primary texts we will investigate who gets to censor art, to what ends, and according to which criteria. Who is protected from tasteless, subversive, or obscene art? How do these categories change with time, and from culture to culture?
FYSB BC1228 Ethnicity and Social Transformation. 3 points.
Novels, memoirs, films and fieldwork based on the American experience of immigration during the twentieth century. Readings will include works by Bernard Malamud, Philip Roth, Christina Garcia, Julia Alvarez, Fae Ng, Gish Jen, Langston Hughes, Toni Morrison, and Malcolm X.

FYSB BC1278 Economic Life and Human Character. 3 points.
In a society governed by markets and economic competition, which human traits flourish and which decay? Through an examination of four novels and some classic writings in social theory we seek to understand how modern capitalism builds on an unchanging set of human needs and aspirations, yet reshapes both their expression and the relative importance they possess in individual lives and across social groups. Our readings comprise Dickens, Oliver Twist, Gissing, The Odd Women, William Dean Howells, A Hazard of New Fortunes, Marx, Economic and Philosophic Manuscripts of 1844 and Communist Manifesto, Tawney, Religion and the Rise of Capitalism, Weber, The Protestant Ethic and the Spirit of Capitalism, Wharton, The House of Mirth. The seminar’s practical goal is to develop your communication, presentation, and expository writing skills.

FYSB BC1286 Culture, Ethics and Economics. 3 points.
What if humans were only capable of caring for their own interests? What kind of economic world could we expect to find? One in which the common good would be attained by market forces, or one in which many would be left behind? This course uses a diversity of sources to examine the interplay of culture, ethics and economics. The starting point is Adam Smith’s work. Economists and policy makers have focused on one side of Adam Smith’s work represented by self-regarding behavior and the supremacy of the invisible hand in market functioning. However, Adam Smith also pointed out that one of humans’ central emotions is “sympathy”, a natural tendency to care about the well-being of others. In light of the recent events as well as research this other side of Adam Smith’s work appears now more relevant. We analyze evidence of cooperative versus self-regarding behaviors and its relationship with the economy, human evolution and cultural values in a variety of settings. Readings include works from Adam Smith, Milton Friedman, Charles Dickens, David Rockefeller and Chris Gardner.

FYSB BC1291 Utopias. 3 points.
In his 1516 work Utopia, Englishman Thomas More created a name for a perfect society from Greek roots meaning either no-place or the good place (eutopia). More’s vision of an ideal alternative world reflected his worries about social problems in England as well as the possibilities he imagined in America, which offered a real new world for most Europeans in the early 1500s. More was neither the first nor last person to imagine an alternate world, and this class will examine the ways writers, politicians, social critics, and revolutionaries have constructed utopias (or good societies) as well as dystopias (bad societies) in fiction and in real life. We will ask how utopian fiction has developed as a distinctive genre, and we will also ask how utopian thought is a product of its particular time. What motivates writers and thinkers to come up with alternative models of society? What has made utopian fiction and science fiction so interesting to so many different kinds of writers? Additionally, what is the relationship between people who have written fictional visions of the future and those people who have tried to create real utopian societies? Can one person’s eutopia become another’s dystopia? Readings in the class will range from Plato’s Republic through modern science fiction and studies of surbubia. Texts include More’s Utopia, Columbus’s journals, Shakespeare’s The Tempest, the Communist Manifesto, Gilman’s Herland, and Hopkins’s Of One Blood. We will also examine attempts to create utopias, including several American experimental communes from the early 1800s, nationalist racial dystopias such as Nazi Germany, and master-planned communities in the modern United States.

FYSB BC1294 Art, Sex and American Culture. 3 points.
Sex is the ultimate forbidden public topic and yet from the New England Puritans’ sermons to Bill Clinton’s (in)famous affair, sex has often been publicly staged in dramatic, literary, religious, political, legal and social forums. In this seminar, we will explore how issues of sex and sexuality have insinuated themselves into the formation of American identity. We will examine texts from the seventeenth century to the present with a particular emphasis on the arts, politics and sex. Texts include Puritan sermons, Nathaniel Hawthorne’s The Scarlet Letter, Tennessee Williams’s Cat on a Hot Tin Roof, Suzan-Lori Parks’s Venus, photographs by Robert Mapplethorpe, literature from Margaret Sanger’s birth control movement, and theoretical works by Michel Foucault, Laura Mulvey and Judith Butler.

FYSB BC1295 Imagining Equality Between the Sexes. 3 points.
What constitutes equality between the sexes? By studying visions of equality between the sexes offered in law, politics, international development, religion, literature, psychology, anthropology, and the writings of activists, we will explore what such equality must or might look like. Focusing on western authors, we will consider issues such as rights, equality and difference, reproductive roles, violence, and language. Texts will include Elizabeth Cady Stanton, A Woman’s Bible; the U.N.’s “Convention on the Elimination of Discrimination Against Women”; Marge Piercy, Woman on the Edge of Time; Catherine MacKinnon, Only Words; and Rebecca Walker, “Becoming the Third Wave.”
meaning with it, identifying its contributions to discourses of nation and nature, but also race, gender, art and science. Readings will include literary works by Washington Irving and James Fenimore Cooper as well as essays and poems on subjects from fairies to trees to architecture to railroad travel. Close analysis of works of architecture, landscape design, and the iconic paintings of the Hudson River School will be accompanied by an exploration of the various methods for "reading" these objects and paintings. Visits to Museum collections and to sites along the river will be an important part of the curriculum.

**FYSB BC1298 The American Middle Class. 3 points.**

The focus on the "middle class" in American politics is not new. Indeed, the size and (seeming) success of the American middle class has long been treated as a mark of American exceptionalism. Why is the "middle class" so important in American politics? What does its much-reported decline mean? What, for that matter, is the middle class—a subdivision of American income? Personal rank? Status? If the middle class is such an important site of economic, social and political aspiration, why is it also so often a site for scathing criticism and cutting satire about the challenges of modern (suburban) life? What do we think about when we think about the middle class?

**FYSB BC1336 Witches. 3 points.**

From ancient Greece to "Wicked," the figure of the witch has fascinated and frightened, compelled and repulsed. In this seminar, we'll analyze written and visual texts from Homer to The Brothers Grimm and beyond to develop a deeper understanding of the witch and the anxieties about gender and power that she represents.

**FYSB BC1337 Feminism & Politics of Anger. 3 points.**

Of late, much attention has been given to the political role of feminist anger. However, not all feminist anger is received or interpreted in the same way; not all women have had the same freedom to express or represent anger. This course asks us to think critically about expressions and perceptions of anger. How do race, sexuality, gender identity, class, and ethnicity shape who is perceived as "angry" and whose anger is taken seriously? What other affects circulate and interact with anger: from rage and irritation to wonder and joy? We'll begin with the figure of the "feminist killjoy," as theorized by Sara Ahmed and will consider texts by authors including Audre Lorde, Adrienne Rich, June Jordan, Susan Stryker, and Nella Larsen, alongside Ahmed and will consider texts by authors including John Locke, the Brothers Grimm, Lewis Carroll, Harriet Jacobs, Freud, and Hillary Rodham.

**FYSB BC1400 Walking and Looking. 3 points.**

Walking and looking are among the most "natural" of human activities. But what really goes on—physiologically, culturally, socially—when we engage in them? And what can we learn if we examine the two practices together, as fundamental parts of how humans explore their world? This course will study how the interacting behaviors of walking and looking have been represented in word and image, from the Bible to Impressionist painters to Hollywood films. Our base texts will be *Wanderlust: A History of Walking* by Rebecca Solnit (2000) and *On Looking: A Walker’s Guide to the Art of Observation* by Alexandra Horowitz (2013).

**FYSB BC1421 Crossing Borders: Americas. 0 points.**

This course cuts across the borders between North, South and Central America and the Caribbean, in a search for the ways in which literature illuminates different aspects of American identity. We see the Americas as active historical and aesthetic agents, acting and interacting with each other. We might even say that modernity, in the sense of freedom from tradition, first developed in the Americas; as a result, the literatures of the Americas are characterized by diversity and innovation from their beginning. We will devote particular attention to the roots of Modernism in North and South America at the end of the 19th century, and the development of modernism, post-modernism and post-colonialism in the 20th and early 21st centuries.

**FYSB BC1422 Art, AIDS, Activism. 3 points.**

This seminar explores the varied ways artists responded to the AIDS crisis of the 1980s and 90s. As government indifference persisted and deaths soared, artists became radicalized and contemporary art became a vehicle for activism. We will follow different tactics in artwork responding to AIDS including the use of gay desire as a weapon and emblem of the fight for visibility. The work we will view, think about, discuss, and write about is political, often angry, and always tinged with loss. Because AIDS affected marginalized communities, whose histories are still being told, we will examine a range of artists and materials that includes but also moves beyond the...
gay white male perspective. We will spend time with videos by Juanita Mohammad, visual art by Kia LaBeija, Feliz Gonzalez-Torres, and David Wojnarowicz, plays by Reza Abdoh and Tony Kushner, and the writings of Audre Lorde, Essex Hemphill, and Sarah Schulman. The final project will be an academic/creative hybrid: students will develop and pitch their own activist artwork.

**FYSB BC1460 Memory. 3 points.**
Memory is arguably the most important faculty that we possess. Not surprisingly, memory has been a ubiquitous topic in poetry, science, fiction, and in the media. Ironically, memory's value is perhaps best understood when it ceases to exist. Indeed, it isn't hard to imagine the devastation that comes with memory loss. In this course, we will survey various components of memory, including its role in writing and history, and its existence in various non-human populations. In addition, we will explore the fragility of memory, including distortions, unusual memories, and basic forgetting. Readings will include poems, theoretical essays, scientific articles, and fiction. Assignments will consist of essays, opinion pieces, and creative stories. Students will also participate in a final in-class debate. Readings will include works from William Blake, James Joyce, Mary Elizabeth Coleridge, Emily Dickinson, Ben Jonson, Mary Carruthers, Francis Yates, Aristotle, William James, Elizabeth Loftus, Spinoza, Luria, J.L. Borges, S. Freud, Oliver Sacks, Truman Capote.

**FYSB BC1465 On Dreams and Nightmares. 3 points.**
In the dead of night it is not uncommon for even the most socially staid of individuals to fly, to ride an elephant at breakneck speed, to visit with the dead, or to expose themselves in public. Ancient Egyptians struggled to understand how and why we dream, as have countless individuals in other times and cultures. Some thinkers, ancient and modern, have dismissed dreams as essentially meaningless byproducts of natural processes. Others have taken dreams seriously as a primary means of access to an ordinarily imperceivable world in which one can commune with spirits and deities and receive from them valuable information about future events or even one's own health. The implications of this belief have led to vigorous theological debates as to whose dreams may be trusted (and, alternatively, whose need to be addressed). Our course will trace the many ways in which activism has been defined over time, situating them within different historical social movements. We will also explore contemporary debates about the re-conceptualization of activism in the age of social media and the internet. Readings include texts from such canonical authors as Plato, Mary Wollstonecraft and Martin Luther King, as well as more contemporary works by Clay Shirky, Malcolm Gladwell and Alissa Quart. Questions that this class will examine include: what are the different ways in which activism has been defined, practiced and justified? To what degree do new forms of activism expand on or refute more traditional forms of activism? How do social movements define, shape and challenge activists? What are some inherent problems within activist groups, and what are some of the challenges facing activists today?

**FYSB BC1466 Sustainability. 3 points.**
Sustainability is being hailed as the solution that is going to link activists, citizens, and corporations to solve the world's environmental problems. However, there are many ways to define the term and assess the long-term effects of so-called sustainable measures. In this course, we will examine current and historical writings about human interactions with the environment in order to understand and identify our most profound environmental challenges and the most appropriate responses. Responding critically to the ideas of the past, we will also ask how our views have changed over time and what it might take to tackle the current large-scale.

**FYSB BC1467 Activism and Social Change. 3 points.**
Frederick Douglass famously stated, 'if there is no struggle, there is no progress.' This quote captures the essence of activism, which is the struggle between that which is and that which ought to be. This course will trace the many ways in which activism has been defined over time, situating them within different historical social movements. We will also explore contemporary debates about the re-conceptualization of activism in the age of social media and the internet. Readings include texts from such canonical authors as Plato, Mary Wollstonecraft and Martin Luther King, as well as more contemporary works by Clay Shirky, Malcolm Gladwell and Alissa Quart. Questions that this class will examine include: what are the different ways in which activism has been defined, practiced and justified? To what degree do new forms of activism expand on or refute more traditional forms of activism? How do social movements define, shape and challenge activists? What are some inherent problems within activist groups, and what are some of the challenges facing activists today?

**FYSB BC1469 Liberation. 3 points.**
Liberation can be defined as freedom from limits on thought or behavior. More specifically, it can be defined as setting someone (or oneself) free from imprisonment, slavery, or oppression. This seminar examines political, philosophical, aesthetic, and theological traditions and movements for liberation, with an emphasis on collective liberation.

**FYSB BC1471 The Body Social. 3 points.**
At once material and symbolic, our bodies exist at the intersection of multiple competing discourses (including biomedicine, law, and mass media, among others). In this discussion-based seminar, we will draw upon both sociological and interdisciplinary literatures to consider some of the ways in which the body is constituted by such discourses, and itself serves as the material basis for social and cultural life. Among the key questions we will consider are the following: What is "natural" about the body? How are distinctions made between normal and pathological bodies, and between psychic and somatic experiences? How do historical and political-economic forces shape the perception and meaning of bodily existence? And finally: how do bodies that are multiply constituted by competing logics of gender, race, and class offer up resistance to these and other categorizations?
FYSB BC1474 Think Like A Scientist: From Plato to Hawking. 3 points.
This course will examine the "scientific worldview" throughout the history of the Western world. Key questions will include: how do science and philosophy intersect to influence our views of nature?; how does science help us to understand our place in the world and in the universe?; what happens when objective scientific inquiry clashes with political and societal interests?; how does popular opinion affect the way that science is conducted? In attempting to answer these questions, we will reflect on what it means to use what we have learned (from both science and history) to synthesize new viewpoints that can have a positive impact on our future.

FYSB BC1475 Texts of Protest in the Americas. 3 points.
This interdisciplinary course examines the rich tradition of progressive protest texts in the Americas. Using a broad definition of "texts of protest", we focus on the cultural production and consumption of dissent as a site of social critique, using a wide variety of print and visual forms, such as essay, fiction, painting, and film. We examine the historical links between forms of protest, social change, and meanings of literature and visual art, and we explore how various expressions of dissent function as political, ideological, rhetorical, aesthetic, and performative texts within specific cultural contexts.

FYSB BC1546 Shapes and Shadows of Identity. 3 points.
A look at the elusive meaning of "black," "white," and other group identities in the United States and the forms—novel, literary essay, stand-up comedy, ethnography, performance, film, television, magazines, radio, memoir, sermon—through which such identities are depicted. Readings will include: Johnny Otis; Upside You Head; Upsky; Bomb the Suburbs; Nelson George, The Death of Rhythm and Blues; Mary Waters, Black Identities; James McBride, The Color of Water: A Black Man's Tribute to His White Mother; Ann Douglas, Mongrel Manhattan; selected sermons and speeches of Martin Luther King Jr.

FYSB BC1572 Animals in Text and Society. 3 points.
Interdisciplinary examination of the intimate and fraught connections between animals and humans in literature, philosophy and culture. We will consider topics such as the historical constructions of species boundaries and of the multiple meanings and uses of animals in human life; animal and human identity; emotions evoked by animals; and conceptualizations of animals as colonized "others." Readings include Aesop, Edward Albee, Angela Carter, John Coetzee, Geoffrey Chaucer, Gustave Flaubert, Jean LeFontaine, Marie de France, Michael Pollan, Ovid, selections from Genesis (in the Hebrew Bible), and Virginia Woolf.

FYSB BC1597 Taboo and Transgression. 3 points.
This seminar explores taboo and transgression within a range of mythic, scientific, anthropological, psychoanalytical, feminist, and literary work. Topics include the treatment of the corpse during the Paleolithic, the centrality of the incest taboo in kinship studies, and the equation of secular modernity with the successive breaking of taboos.

FYSB BC1598 Building Utopia. 3 points.
Building Utopia examines the rich tradition of utopian thinking in literature, social philosophy, architecture, and the visual arts. Here, utopia is explored in its modern form: as a call to transform the world through human planning and ingenuity. Aside from an important excursus on Thomas More’s pivotal novel Utopia (1516), the course centers on nineteenth- and twentieth-century thinkers whose often wild and idealistic imaginings profoundly affected the shape of the real world. We’ll read and explore the works of Charles Fourier, Edward Bellamy, the Italian Futurists, and Le Corbusier, among many others. The purpose of the course is to better understand the role that the utopian imagination has played in the construction of power.

FYSB BC1599 Tipping Points. 3 points.
The printing press helped pave the way for the scientific revolution and the invention of human rights. What will transpire in the digital age of artificial intelligence and globalization? This seminar questions whether intellectual, economic, technological, and ethical tipping points transform what it means to be human. Authors include Locke, Jefferson, Shelley, Freud, Rushdie, Ishiguro, McLuhan, Lyotard, and Offill.

FYSB BC1707 Confession. 3 points.
Not offered during 2019-20 academic year.

This seminar explores the notion of "confession" in many manifestations (autobiography, memoir, sacrament/ritual, political/judicial performance, public spectacle/confessional culture) and from a variety of disciplinary perspectives (history, literature, psychoanalysis, theology, cultural studies). Readings include: Augustine, Confessions; Foucault, History of Sexuality; vol. 1; Ginsberg, The Cheese and the Worms; Dostoyevsky, Notes from Underground; Miranda v. Arizona; Gillian Slovo, Red Dust; Jackson, The Politics of Storytelling; Bauer, The Art of the Public Grovel; Cole, The Torture Memos; Asad, Genealogies of Religion; "The Lives of Others" (film; 2006, Florian Henckel von Donnersmark).
how our decisions about “things and stuff” might change our stories moving forward.

**FYSB BC1715 Arts of Adaptation: From Snow White to Sidney White. 3 points.**

Can a ballet tell the same story as a Shakespeare tragedy? Do the violent fantasies of a fairytale shape romantic comedy? What does Bollywood have to do with Victorian England? Using as textual anchors Grimm’s Snow White, Shakespeare’s *Romeo and Juliet*, Hardy’s *Tess of the D’Urbervilles*, and Woolf’s *Mrs Dalloway*, this course will explore poems, paintings, films, musicals, dance, illustration, advertisement and song to consider the accretion of meaning that results when stories cross, historical, cultural, and generic borders.

**Fall 2019: FYSB BC1721 Fact, Fiction, & Truth. 3 points.**

Truth is stranger than fiction,” wrote Mark Twain in 1897, “because fiction is obliged to stick to possibilities; truth isn’t.” In our era of “reality TV” and “fake news,” Twain’s observation gains new relevance and meaning. In this course, we will investigate the complicated relationship between documentary evidence and artistic creativity in twentieth-century literature, theater, poetry, film, and visual art that purports to tell a (mostly) true story. When you tell the truth creatively, blending fact with fiction, is it still the truth? What do authors and artists gain from taking this risk? What do we lose?

**FYSB BC1717 The Woman in the Mirror. 3 points.**

This seminar will examine women’s creative self-representation through writing—diaries, letters, poetry, essays, memoirs—the visual arts, and film. We will think about the possibilities each form elicits and excludes, and discuss such issues as self-assertion and self-exposure, creative ambition, social critique and social taboos, femininity and queer identity, the family and motherhood, desire, bodies, and shame. Theoretical writings on gender, female development, creativity, and the self will anchor our analysis of the works we study. Writers, artists, and filmmakers may include Virginia Woolf, Anne Carson, Maggie Nelson, Roxane Gay, Mary Karr, Maxine Hong Kingston, Sheila Heti, Sarah Manguso, Alison Bechdel, Louise Bourgeois, Adrian Piper, Paula Modersohn-Becker, Dee Rees, Greta Gerwig, Agnès Varda, others.

**FYSB BC1719 Short Stories: Big Moments. 3 points.**

In this course, we’ll read and analyze a range of short stories, most of which will be stories of initiation: that is, stories in which the protagonist, often young, undergoes some kind of a significant rite of passage—an initiation through crisis or conflict into a new stage of life, into the adult world, or into new ways of thinking about, seeing, experiencing, or understanding the world. We’ll focus mainly on American and British writers, but will also read a few stories by writers from Canada, South Africa, and New Zealand. We’ll also consider the theme of initiation as it’s expressed in at least one other medium—dance, theater, possibly film—depending on what’s on stage locally in the fall. Also, we’ll focus a bit, at least initially—as a kind of introduction—on some of the formal properties of short stories. How do they differ from novels? When did the short story form begin to flourish in English? What early forms—such as the fable, the exemplum, the folktale—influenced the development of the short story form?

**FYSB BC1722 Writing American Lives. 3 points.**

This interdisciplinary course explores the problem of representing American experience, one’s own or someone else’s, in the context of a nation-state’s fraught history of self-fashioning. What motivates a person to tell his or her life story, or to investigate someone else’s, and how are these stories bound by both authors and readers to narratives of citizenship, belonging, and/or exclusion? What motivates a writer to share what she shares, and what motivates an audience to demand what it demands from her? What claims about the exemplary or excessive qualities of the life story are made, or are emulated, by the life story’s readers? In addition to critical consideration of biography and memoir in traditional media, your work in this class will include examinations of the fake memoir and the digital overshare; you will also be invited to curate a branded footprint of your own, using tools of new media.

**FYSB BC1723 Intimate Partnerships. 3 points.**

We shall investigate how the concept and practice of intimate partnership has developed from ancient days to the present, with readings from the Bible, classic fairy tales, a Victorian novel, love poetry, a YA novel about a teenage single mother, and a selection of contemporary short stories and novellas. How do these texts account for race, ethnicity, class, sexuality, and gender within the context of love and marriage? We will also explore marriage, commitment, and partnership in film and television.

**FYSB BC1724 Postcolonial Comics. 3 points.**

In postcolonial studies, we look at the history, politics, and culture of countries that were once colonized. In literature, this work is done through careful close-reading and paying attention to how the struggle for independence is represented in literary texts, both on an individual and collective level. In this course, we will push the boundaries of the discipline of postcolonial studies and use its methodologies to read about locations and peoples that weren’t formerly (or formally) colonized (for example, Ancient Greece, New Orleans during Hurricane Katrina, 20th-century Iran, and female Jewish immigrants in New York
city circa 1910). We'll also investigate why graphic novels present an appropriate medium for studying postcolonialisms.

**FYSB BC1725 Mystics: Medieval and Modern. 3 points.**  
This course will compare and contrast medieval and modern mysticism, or aspirations toward the sublime. Through careful examination of literature, art, and music, we will explore how peoples from distinct cultures and time periods engaged in various rhetorical strategies to express their union with God. We will discuss how mystics of all stripes, from Hildegard of Bingen, a twelfth-century German nun, and Rebecca Cox Jackson, a formerly enslaved person in antebellum Philadelphia, to Kazimir Malevich, the founder of Soviet Suprematism, enlisted the written word, bodily gesture, vocalized song, and painted form in their attempts to convey the transcendent. Museum visits are required.

**FYSB BC1726 Girl Talk: Language & Femininity. 3 points.**  
Women are often described as talking differently than men do, of having a different relationship to language than men do. Is this true? If so, how? What are the implications? This seminar explores the relationship between language and femininity in works of literature, psychology, sociolinguistics, anthropology, feminist sociology, and philosophy, literary theory, and popular media including film and music. In addition to investigating these questions across disciplines, we consider them in a wide variety of social contexts including 19th century American circles, Tanzanian beauty pageants, Chicana girl gangs, Bedouin nomadic women’s poetry, Japanese animation, and ancient Greek lyric. Topics include “good girls” and “bad girls,” talking about feelings, silencing and the right to be heard, language and femininity as labor, and the role of language in judgments of feminine beauty in pageants and drag balls.

**FYSB BC1727 Periodic Tales of the Elements. 3 points.**  
What is the “cosmic history” of the atoms that compose our bodies and the world around us? How do these elements come together to make us during life’s fleeting journey? What becomes of our atoms after we die? In happy coincidence, 2019 is the 150th anniversary of Dimitri Mendeleev’s publication of an organized chart of the chemical elements, as well as the year of Walt Whitman’s 200th birthday. We will celebrate the Periodic Table with Mendeleev as one of humanity’s great intellectual achievements and sing elemental songs with Whitman on scales minute and enormous, instantaneous and eternal. Readings to include Whitman’s “Song of Myself;” Primo Levi’s The Periodic Table, Oliver Sacks’s Uncle Tungsten, and a selection of Shakespeare’s Sonnets.

**FYSB BC1728 Worlds of Science Fiction. 3 points.**  
Since its beginnings, science fiction has offered places to explore both our dreams and our nightmares. This course will investigate how science fiction writers and filmmakers imagine other worlds as a way of reflecting on our own. Ranging through science fiction past and present, we’ll examine how SF’s most enduring features—time travel, aliens, cyborgs, utopias and dystopias—have enabled writers to explore questions we face in the real world. How might SF help us better understand our relationship to technology, or to nature? What new perspectives can it offer on issues of race, class, gender, and sexuality? Course materials will include readings by such authors as Mary Shelley, H.G. Wells, Ursula Le Guin, Octavia Butler, and Ted Chiang, as well as a number of science fiction films, including Fritz Lang’s Metropolis and Denis Villeneuve’s Arrival.

**FYSB BC1729 AMERICA’S SOCIAL DIVIDES. 3 points.**  
This first year seminar explores some of the central cleavages dividing American society today, along such lines as social class, region, race, and political ideology. We will focus how social divisions are constituted, experienced, questioned, and bridged. Most of the assigned material will be based on primary research in the social sciences, along with a small number of documentaries, novels, and/or memoirs. Assigned books may include Arlie Hochschild, Strangers in their Own Land; Eric Klinenberg, Palaces for the People; Barbara Ransby, Making All Black Lives Matter; Rachel Sherman, Uneasy Street: The Anxieties of Affluence; and Jeffrey M. Berry and Sarah Sobieraj, The Outrage Industry: Political Opinion Media and the New Incivility.

**FYSB BC1730 THINKING THE ECOLOGICAL CRISIS: A LATIN AMERICAN PERSPECTIVE. 3 points.**  
What is the origin of the notion of “natural resource”? What is the connection between past and present colonialism and the current ecological crisis in Latin America? And, what is the relation between cultural diversity and a sustainable economy? In this seminar, we will explore these questions (and more) by looking at the history of Latin America through primary and secondary texts, including Latin American literary, philosophical, aesthetic, legal, political, and economic texts. We will read both canonical and non-canonical writings from the colonial and modern periods as well as indigenous literature. The course will place this tradition in dialogue with the most recent developments of eco-feminism, materialist ontologies, discussions of environmental justice, “deep ecology,” and the rights of non-human nature. Readings will be selected from Domingo Sarmiento, Jose de Acosta, Andres Bello, Domitila Barrios, Ivonne Guevara, Enrique Leff, Luis Sepulveda, Donna Haraway, Jason Moore, McKenzie Wark, Timothy Morton, Naomi Klein, and John Clark. Throughout the course,
we will consider how indigenous ideals of solidarity, reciprocity, and emancipation offer an alternative to strategies of domination.

**FYSB BC1731 FROM EPIC HERO TO SUPER HERO. 3 points.**

The enormous box office success of recent moves like Avengers: Endgame, Wonder Woman and the Batman franchise attests to our present societal fascination with heroes. Yet this fascination is a millennia-old phenomena. Gilgamesh, one of the oldest surviving literary works in the world, tells the story of a great hero and his accomplishments. What accounts for the enduring appeal of heroes throughout history, across cultures and in different forms of media? What connects ancient epic heroes like Gilgamesh to modern superheroes like Batman? This seminar will seek answers to these questions by comparatively studying a range of artistic texts depicting heroes. Course readings will include Gilgamesh, Beowulf, Watchmen, The Dark Knight Returns, as well as studies by Marco Arnaudo, Joseph Campbell and Grant Morrison, among others. Students in this seminar will have the option of taking part in a class excursion to see Marvel’s upcoming Black Widow movie.

**FYSB BC1732 FEMINISM & POLITICS OF ANGER. 4 points.**

Of late, much attention has been given to the political role of feminist anger. However, not all feminist anger is received or interpreted in the same way; not all women have had the same freedom to express anger. This course asks us to think critically about expressions and perceptions of anger. How do race, sexuality, gender identity, class, and ethnicity shape who is perceived as “angry” and whose anger is taken seriously? What other affects circulate and interact with anger: from rage and irritation to wonder and joy? We’ll begin with the figure of the “feminist killjoy,” as theorized by Sara Ahmed and will consider texts by authors including Audre Lorde, Adrienne Rich, June Jordan, Susan Stryker, and Nella Larsen, alongside manifestos, comics, film, visual art, and zines. NOTE: This 4-credit version of First-Year Seminar (FYS) – FYS “Workshop” – is specially designed for students who believe they would benefit from extra support with their critical reading and academic writing skills. In addition to regular seminar meetings twice per week, students are also required to participate in six “writing labs” over the course of the semester. The writing labs for this section will take place on the following Fridays, 11:40 am-12:55 pm: 1/31, 2/14, 2/28, 3/6, 3/27, and 4/3.

**FYSB BC1601 Reacting to the Past. 3 points.**

In these seminars, students play complex historical role-playing games informed by classic texts. After an initial set-up phase, class sessions are run by students. These seminars are speaking- and writing-intensive, as students pursue their assigned roles’ objectives by convincing classmates of their views. Examples of games played in First-Year Seminar Reacting classes include: 1) The Threshold of Democracy: Athens in 403 B.C. explores a pivotal moment following the defeat of Athens in the Peloponnesian War, when democrats sought to restore democracy while critics, including the supporters of Socrates, proposed alternatives. The key text is Plato's Republic. 2) Confucianism and the Succession Crisis of the Wanli Emperor examines a dispute between Confucian purists and pragmatists within the Hanlin Academy, the highest echelon of the Ming bureaucracy, taking Analects of Confucius as the central text. 3) The Trial of Anne Hutchinson revisits a conflict that pitted Puritan dissenter Anne Hutchinson and her supporters against Massachusetts Governor John Winthrop and the orthodox ministers of New England. Students work with testimony from Hutchinson’s trial as well as the Bible and other texts. 4) Greenwich Village, 1913: Suffrage, Labor and the New Woman investigates the struggle between radical labor activists and woman suffragists for the hearts and minds of "Bohemians," drawing on foundational works by Marx, Freud, Mary Wollstonecraft, and others.

**Reacting to the Past**

In these seminars, students play complex historical role-playing games informed by classic texts. After an initial set-up phase, class sessions are run by students. These seminars are speaking- and writing-intensive, as students pursue their assigned roles’ objectives by convincing classmates of their views. Examples of games played in First-Year Seminar Reacting classes include: 1) The Threshold of Democracy: Athens in 403 B.C. explores a pivotal moment following the defeat of Athens in the Peloponnesian War, when democrats sought to restore democracy while critics, including the supporters of Socrates, proposed alternatives. French Mission

The Department's primary goals are firstly to enable students to develop competence in spoken and written French, and secondly to expose students to the literature and culture of French and French-speaking countries. An important additional objective of the French Department is to encourage students to consider studying in France or a Francophone country.

In regard to students' linguistic competence, our specific goals are:

1. To enable students to express themselves on a range of topics with an acceptable degree of fluency and accuracy.
2. To facilitate their comprehension of a variety of texts (both from literature and the media) written in French.
3. To foster students' confidence in the possibility of their living and studying in a French environment.

In the context of the language requirement (the first and second years), this implies a competence premised on students' ability to achieve, by Intermediate French II, oral and written fluency. Students will be able to use all tenses in the indicative and subjunctive, to deploy pronouns appropriately and understand the expressive and grammatical utility of conjunctions, rhetorical devices, and so on. Students will have the ability to write a cogent essay in French on a literary or cultural topic, and will possess a vocabulary beyond basic French, including rhetorical and conceptual vocabulary. In the context of the major requirement (the third and fourth years), students will progress to a greater competence in French, including advanced speaking skills, particularly in terms of discussing literary and cultural topics, and writing extended analytical essays. The culmination of a student's progress is the one-semester capstone experience in the spring semester of the senior year, where she will write a substantial thesis on a topic of her choice, supervised by senior members of the department, and defended before an appropriately selected committee.

Student Learning Outcomes

Students majoring in French are expected to satisfy the following learning outcomes:

- Read literary texts closely and critically (explication de texte).
- Discuss complex ideas in French with satisfactory proficiency.
- Write analytical papers in French using appropriate theoretical and exegetical on given literary or cultural topics with satisfactory proficiency.
- Demonstrate knowledge of French literature and other cultural materials.
- Engage fully with another culture in a variety of intellectually sophisticated ways, including close textual analysis.
- Conduct original research on a literary or cultural topic culminating in a 30 page thesis. For students in the Translation and Literature track the ability to translate a 30 page text from French into English accompanied by an introduction to the work.

All first-year, transfer, and/or returning students who studied French prior to entering Columbia/Barnard must take the placement exam before taking any Barnard French courses. Questions about the exam should be directed to the department chair.

Students entering Barnard in Fall 2016 and thereafter will receive points of credit for Advanced Placement (AP) and International Baccalaureate (IB) credit, but these credits will not exempt students from General Education Requirements. Further information may be found on the Registrar's website. For additional information about language courses, students should consult the department chair.

Students who have satisfied the language requirement may immediately enroll in literature and culture courses (FREN BC3021 Major French Texts I, FREN BC3022 Major French Texts II, FREN BC3037 Baudelaire, Rimbaud, Mallarmé); and advanced language courses (FREN BC3006 Composition and Conversation-FREN BC3019 Advanced Phonetics).

In cooperation with Columbia College, the department offers a program at Reid Hall in Paris open to majors and non-majors. Visit the Study Abroad website (http://barnard.edu/global/study-abroad/) for more information.

Requirements for the Major

There are three majors available to prospective students in the department:

- **Language and Literature**: This program emphasizes the language, culture, and literature of France and other French-speaking countries.
- **Translation and Literature**: This program teaches students to translate from French into English and English into French, within a context of French culture and literature.
- **French and Francophone Studies**: This program emphasizes the historical and contemporary interrelationship between France and the French-speaking world in their social, literary, and cultural aspects.

Students are expected to declare an option by the end of the junior year. Programs may include additional courses in French literature, culture, and language, or in other subjects which vary with the interest of the student. Certain courses in the French and Romance Philology Department at Columbia University may be substituted with the approval of the chair.
All students are required to write a thesis in their senior year. This thesis, of about 30 pages in length, will be written while the student is enrolled in FREN BC3091 Senior Thesis Seminar. Thesis specification will vary depending on the major program that has been chosen.

A student who elects French as part of a combined double or interdisciplinary major will establish her individualized program with the departments concerned. All combined or interdisciplinary majors require approval from the Committee on Petitions and Academic Standing.

FREN BC1203 Intermediate I.  3 points.
Prerequisites: FREN BC1001, BC1002, BC1102, and C1101 or an appropriate score on the placement test.
Further development of oral and written communication skills. Readings in French literature.

FREN BC1204 Intermediate II.  3 points.
Prerequisites: FREN BC1203 or an appropriate score on the placement test.
Advanced work in language skills. Readings in French literature.

A workshop in which students from the BC/CU community collaborate with a team of students from the École Normale Supérieure-Lyon on two translation projects. In addition to video-conférence group sessions, students will work virtually with their translation partner in France, and consult in-person with their Barnard instructor.

FREN BC3002 Translating Theatre Workshop.  3 points.
Prerequisites: Application required through Prof Laurie Postlewate
A workshop format course offered at Reid Hall in Paris, France combining hands-on translation (French to English) with study and discussion of theoretical and dramaturgical issues specific to translating theatre. Students will attend performances of the plays from which they are translating. One week of the course will include collaborative work with a student group from the École Normale Supérieure-Paris.

FREN BC3006 Composition and Conversation.  3 points.
Prerequisites: Enrollment limited to 12 students.
Discussions on contemporary issues and oral presentations. Creative writing assignments designed to improve writing skills and vocabulary development. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3010 Textual Analysis.  3 points.
This course is designed for students who have completed Intermediate French II or its equivalent. The aim is to help you transition from language courses to upper-level literature and culture classes, and specifically to equip you with the tools you will need to analyze literary texts and to comment upon them effectively in both oral and written form. Through close reading of selected texts and practice in the form of analysis known as the explication de texte, you will become familiar with a number of different methods of reading, and develop the critical thinking and interpretive skills you need to analyze arguments, and to speak and write persuasively in French. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3012 Advanced Grammar.  3 points.
Not offered during 2019-20 academic year.

FREN BC3025 Theater of the Classical Age. 3 points.
Not offered during 2019-20 academic year.

This course will provide a detailed introduction to the three great French dramatists of the seventeenth century, rightly known as the golden age of French theatre. Reading several canonical works by each of these three playwrights—Corneille, Racine, and Molière—students will closely examine the thematic concerns (the relationship between love and duty, the individual and the state, free will and divine providence; the problems of hypocrisy, dishonesty, sexual jealousy, and avarice; the nature of kingship and the extent or the limits of royal control; the differences between prescribed gender roles for men and for women; the recourse to and reworking of mythological and Biblical sources) the plays set forth, and the rhetorical strategies they employ (from classical, Greco-Roman devices such as metaphor, apostrophe, irony, preterition, prosopopoeia, and anagnorisis to the specifically French metrical pattern of the alexandrin). FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3032 Women and Writing in Early Modern France. 3 points.
Examination of cultural and literary phenomena in 15th through 17th century France, focusing on writings by and about women. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3035 Eighteenth-Century French Fiction. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.
Readings of novels and novellas by Prevost, Rousseau, Diderot, Charriere, Laclos, and Sade, with a particular focus on issues of selfhood, gender, sexuality, authority, and freedom. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3036 The Age of Enlightenment/L’AGE DES LUMIERES. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.
This course examines the phenomenon that dominates and revolutionizes 18th-century philosophical, religious, sociological, and political discourse in the West: the Enlightenment. Calling into question the hitherto uncontested authority of an all-powerful church and state, the Enlightenment calls for the freedom of expression and of worship; condemns religious intolerance and cultural prejudice; denounces societal inequality; examines the merits and shortcomings of different forms of government; and subverts the oppressive and often hypocritical dogmas of the Catholic church and the absolutist monarchy—with far-reaching political and historical consequences (e.g., the American and the French Revolutions). With the exception of one German text (by Immanuel Kant, and assigned in English translation), readings will be limited to texts by the Enlightenment’s leading Francophone authors: Montesquieu, Voltaire, Diderot, and...
Rousseau, as well as by two "dystopian" novelists, Charrière et Sade. All discussion, coursework, and examinations will be in French.

FREN BC3037 Baudelaire, Rimbaud, Mallarmé. 3 points.
Prerequisites: (FREN BC1204) FREN BC1204: French Intermediate II or the equivalent level is required.
Through close readings of majors texts, an examination of how these 19th-century poets brought about a "revolution" in language and thought that gave rise to the Modernism that transformed literature and the arts and whose influence is still with us today.

FREN BC3038 The Nineteenth-Century French Novel. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.
Evolution of the novel, aesthetics of Romanticism, Realism, Naturalism, and Symbolism. Particular attention is paid to the formal problems of narrative, the rhetoric of sentiment, decadence, and issues of sexual identity. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3043 Twentieth-Century French Women Writers. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.
Writings by women will be analyzed in the changing philosophical and literary contexts of the 20th century: Simone de Beauvoir, Nathalie Sarraute, Marguerite Duras, Hélène Cixous, and others.

FREN BC3044 Theater of the Absurd. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.
Close reading and occasional screening of major plays associated with the Theater of the Absurd. Philosophical and literary origins of the concept of the absurd; social and political context of its emergence; theatrical conventions of early performances; popular and critical reception. Authors include: Jarry, Adamov, Arrabal, Beckett, Genet, Ionesco, Maeterlinck, Sartre, Camus.

FREN BC3056 Proust. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.
In this course, we will read the whole of Marcel Proust's 7-volume novel, A la Recherche du temps perdu. One of the greatest novels of all time, the Recherche addresses issues of: romantic and familial love; hetero- and homosexuality; social class; anti-Semitism; social life and friendship; the persistence of memory; and the relationship between art and life.

FREN BC3062 Women in French Cinema since the 60s. 3 points.
Not offered during 2019-20 academic year.
This course traces the evolving nature of the relationship between women and society in French cinema from the New Wave of the 60's to the present. Attitudes of women and towards women will be examined in the light of the changing social, political, and intellectual context. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3063 Structuralism and Post-Structuralism. 3 points.
Not offered during 2019-20 academic year.
Introduction to the conceptual foundations of structuralism and post structuralism or to what is known as French Theory. Readings include works by Saussure, Levi Strauss, Lacan, Foucault, Cixous, and Deleuze. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3064 France on Film. 3 points.
Not offered during 2019-20 academic year.
Films on and of the period from the 1930s to the present, focusing on the interplay between history, ideology, and culture. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3065 Surrealism. 3 points.
Not offered during 2019-20 academic year.
An examination of the relationship between traditional & avant-garde literature and visual culture; the use of word-play & language games as tools of artistic expression; the thematization of the unconscious and dreams; the vexed relationship between aesthetics & politics; the poetics and politics of sexuality & gender. Authors and artists will include Andre Breton, Louis Aragon, Man Ray, Dorothea Tanning, and Salvador Dali. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3067 Golden Age of Versailles. 4 points.
Explores the cultural production emanating from the court of Louis XIV at Versailles combining the reading of literary texts with consideration of the arts, architecture, dance and music. Special focus on the court as spectacle, woman writers of the court, and the classical period as close to consecutive interpretation (oral translation), will help students to augment and refine their fluency in French. All aspects of language will be involved: grammar, vocabulary, tone, register and context, but in a manner more "immediate" than with the translation of written texts. Six French films will be chosen from a variety of periods and genres from which segments will be isolated for interpretation (oral translation). A preliminary discussion of each film will precede the work in translation. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3054 Translation Through Film. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: Course capped at 15.
Using filmic dialogue as a medium, this course seeks to develop skills in "spoken" or "live" translation from French into English. This practice,
FREN BC3070 Negritude. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.
Analysis of the theoretical and literary precursors of négritude; major figures of the movement; relations with the Harlem Renaissance; and the formulation of creoly by contemporary Caribbean writers and thinkers. Authors will include Gobineau, Maran, Price-Mars, Hughes, McKay, Césaire, Senghor, Damas, Fanon, Sartre, Giassant, and Chamoiseau. Taught in French. General Education Requirement: Cultures in Comparison (CUL).

FREN BC3071 Major Literary Works of the French-Speaking World. 3 points.
Not offered during 2019-20 academic year.

Introduction to major works of fiction from the French speaking countries of the Caribbean, West Africa, North Africa and Indochina. Considers some of the principal authors of these regions, and examines the sociopolitical, historical, and aesthetic considerations that have influenced Francophone literary production in the twentieth century. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3072 Francophone Fiction: Special Topics. 4 points.
Looks at the portrayal of women as unsettling figures in the Francophone Caribbean literary universe. Examining the uncanny heroines in the novels of both male and female writers, students will identify the thematic commonalities and specific configurative strategies that emerge in the fictional representation of women in the region. The symbolic import of zombies, schizophrenics, and other "disordering" characters will be analyzed as indicators of and reflections on broader social realities. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3073 Africa in Cinema. 3 points.
Not offered during 2019-20 academic year.

FREN BC3074 Women in Francophone Africa: Historical and Cultural Perspectives. 3 points.
Not offered during 2019-20 academic year.

Emphasizes cultural and historical representation of Francophone women by both women and men. Works will include novels, films, and poems, by authors such as Sembène Ousmane, Mariama Ba, Amadou Kourouma, Camara Laye, Calixthe Beyala.

FREN BC3077 La Jalousie dans la Litterature Francais. 3 points.
Not offered during 2019-20 academic year.

This course takes jealousy-in its psychosexual, socio-political, ontological dimensions, and in its formal implications-as a lens through which to view a series of seminal works of French literature from the Middle Ages to the 21st century. These works include: 12th-century Arthurian legend (Béroul); a late-medieval, proto-feminist short story (Navarre); 17th-century neo-classical tragedy (Corneille); 12th and 17th-century folkloric forms (Marie de France's Iai and Perrault's fairy tale, respectively); the Enlightenment "philosophical" novel (Montesquieu); the 19th-century realist novel (Balzac); the early 20th-century modernist novel (Proust); and the nouveau roman (Robbe-Grillet). Two contemporary adaptations (Singer's 2008 novel based on the Navarre story, and Chabrol's 1996 film based on Proust's novel) will also be studied. In addition, a selection of highly condensed, relevant secondary readings (excerpts of 10 pages of less) will provide students with an introduction to an array of theoretical approaches to literary study: most notably, psychoanalysis, political philosophy, and literary theory. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3078 Literature of Francophone North America. 3 points.
Not offered during 2019-20 academic year.

Discussion of the literary production in French emanating from Canada, New England, and Louisiana with special consideration of the sociohistorical context of North American Francophone culture. Texts to include fiction, correspondence, historical narrative, theater and poetry. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3079 History of the French Language. 3 points.
Not offered during 2019-20 academic year.

Transformation and evolution of the French languages from the early Middle Ages to the present are studied from a socio-historical perspective. Primary texts include literary, legal, political, scientific, administrative, liturgical, and epistolary documents. Includes consideration of French outside of France and variations on the continent in the 20th century. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3080 Advanced Seminar: Flaubert. 3 points.
Prerequisites: Limited to 15 students; priority given to French majors and seniors.
In depth study of the life and works of Gustave Flaubert (1821-1880). Exploration of 'literary realism' and the novelist's representation of money, marriage, ambition, class, sex, stupidity, and sinthood. While you will be expected to read all of Flaubert's major works, we will concentrate in class on Madame Bovary (1857), L'Education sentimentale (1869), Trois Contes (1877), Bouvard et Pécuchet (1881), and the Correspondance. We will also consider some adaptations of Madame Bovary and Un Coeur simple. FREN BC1204: French Intermediate II or the equivalent level is required.
FREN BC3091 Senior Thesis Seminar. 4 points.
French majors will write their senior thesis under the supervision of the instructor.

FREN BC3101 Love and Literature. 3 points.
This course offers an in-depth study of love as it has been treated in a variety of French literary texts. These texts will be related to a number of important philosophical and theological approaches to love, particularly in respect of certain ideas concerning ethical love, erotic love, and religious faith as an act of loving God. The first objective of this class is to show how one can relate literature to philosophy and theology; the second is to gain a broad, but thematically focused familiarity with French literature, and with some literary works beyond the French tradition. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3102 Women of the Left Bank. 3 points.
This course will group together the women who shaped and epitomized Left Bank culture in Paris from the Belle Époque to the mid-twentieth century; it will also situate these women in relation to their male peers whose works went on to establish the canons of Symbolism, Dadaism, Surrealism, and Existentialism. We will focus primarily on the realms of literature, philosophy, and art, but we will also examine how some of these women advanced cultural production more broadly—by starting publishing presses, opening bookshops, holding salons, etc. Readings will be primarily in French (Colette, Anna de Noailles, Renée Vivien, Simone de Beauvoir; Breton, Valéry, Aragon, Sartre) but will also include some English-language authors (Gertrude Stein, Djuna Barnes, Anaïs Nin). All discussions, coursework, and examinations will be in French.

FREN BC3105 Existentialism. 3 points.
Prerequisites: Successful completion of Intermediate II French or the equivalent.
In-depth survey of the writers who exemplified French existentialism: Albert Camus, Jean-Paul Sartre, and Simone de Beauvoir. The texts have been chosen for the richness with which they address fundamental philosophical questions about the meaning of life, especially questions of death and suffering, freedom and responsibility, legitimate and illegitimate violence. The first objective of this class is to show how existentialist thought combines literature and philosophy; the second objective is to gain a broad, but also deep familiarity with 20th-century French literature and thought. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN UN3421 Introduction To French and Francophone Studies I. 3 points.
Prerequisites: FREN UN3405 Advanced Grammar and Composition or an AP score of 5 or the director of undergraduate studies’ permission. Examines conceptions of culture and civilization in France from the Enlightenment to the Exposition Coloniale of 1931, with an emphasis on the historical development and ideological foundations of French colonialism. Authors and texts include: the Encyclopédie; the Déclaration des droits de l’homme et du citoyen; the Code noir; Diderot; Chateaubriand; Tocqueville; Claire de Duras; Renan; Gobineau; Gauguin; Drumont.

FREN UN3421 Introduction To French and Francophone Studies II. 3 points.
Prerequisites: FREN UN3405 Advanced Grammar and Composition or an AP score of 5 or the director of undergraduate studies’ permission. Universalism vs. exceptionalism, tradition vs. modernity, integration and exclusion, racial, gender, regional, and national identities are considered in this introduction to the contemporary French-speaking world in Europe, the Americas, and Africa. Authors include: Aimé Césaire, Léopold Sedar Senghor, Frantz Fanon, Maryse Condé.

Mission
The German Department’s mission is to engage a wider audience of students within the Barnard Community. Its curricular program and cultural events serve a large and diverse academic community on the Barnard and Columbia campuses. The Department is committed to creating venues for students, faculty and the public interested in the many facets of cultural life in the German-speaking countries or communities.

As an active contributor to campus life, the Department has constantly initiated new venues—from readings, lectures and film screenings to excursions—to supplement and enrich its annual course offerings. In disciplines such as Art History, Philosophy or History, a familiarity with the German language is an asset; in interdisciplinary areas such as Comparative Literature or European Studies, German often serves as the main or second language of study.

It is the goal of our department:
• to teach the German language in a professionally reflected manner through a clear sequence of courses
• to help attain and expand knowledge of Austrian, German and Swiss literatures through reading exemplary texts in theme- or period-oriented courses
• to make familiar with characteristic features of Germanophone cultures by raising awareness of their geographical diversity and their historical richness in introductory survey courses
• to give students the rhetorical and intellectual tools for moving confidently between two languages’ cultural traditions by offering exercises, sketches and other forms of active participation from elementary to advanced levels of expression
• to create a learning environment that instills appreciation for critical thought and is conducive to acquiring a clearly defined set of skills, from language proficiency to interpretive adroitness and intercultural literacy

Courses in German are designed to develop proficiency in language skills and to present the traditions as well as the current developments in the literature and culture of the German-speaking countries: Austria, Germany, and Switzerland. Courses in Dutch, Finnish, Swedish, and Yiddish are offered by the Department of Germanic Languages. For information contact 319 Hamilton Hall.

Student Learning Outcomes

Students who graduate with a German major should be able to attain the following outcomes:

1. Write, speak, read, and listen in German at the intermediate-high level in German language using ACTFL; and carry-on an everyday conversation
2. Identify and discuss the historical significance of major cultural works such as film, plays, opera, telenovela, audiovisual media
3. Recognize cultural manifestations of social values and practices and apply effectively knowledge about cultural perspectives of majorities, minorities and underrepresented bi-cultural communities in German-speaking countries
4. Discuss the regional and historical differences among the three German-speaking countries and communities in the European and global contexts by demonstrating knowledge of representative cultural products and practices as well as common social perceptions and values
5. Demonstrate awareness of the relevant features of German language, culture or literature
6. Apply the key elements of literary and cultural theory in an analysis and interpretation of literary or cultural works
7. Complete an original research project about German literature and culture (includes finding and selecting appropriate sources; assessing their heuristic value; composing a concise research plan and a thesis statement; organizing a long piece of writing; establishing a reliable bibliography and proper citation practice)
8. Compose a closely argued, coherently presented and well-documented essay or a well-organized portfolio in German, relevant to a genre, medium, period, author, theoretical issue, cultural context or creative goal

The Major in German Studies

This major combines a study of literature with other aspects of German culture and civilization by choosing courses from the social sciences such as history, political science, and economics, and from other humanities dealing with German-speaking regions or communities. The department will assist and advise students interested in studying in Germany, Austria, or Switzerland. It should be noted that Barnard College is a member of the Berlin Consortium for German Studies and strongly encourages those students wishing to study abroad to do so through this program administered by Columbia University and conducted in association with the Freie Universität Berlin.

GERM BC2212  Grammatik Aktiv.  3 points.
Students have the option to register for 2-point or 3-point. Please check the course number when registering.

An intensive study of key features of German grammar, with an emphasis on skill-building exercises and practical solutions to common problems of writing and speaking on the intermediate level; aims at building confidence in using simple and more complex sentence structures.

For an additional point, students will hand in a weekly 150-200 word summary in German in which they highlight what they have learned, explain the rules and applications of the linguistic feature on hand. In the last portion of the summary students will reflect on their learning process during each week to document their progress. Individual meetings with the Professor to clarify and practice student specific grammar issues will be scheduled.

History

Department Administrative Assistant: Sully Rios

Mission
History encompasses the whole of human experience, helping us understand ourselves in the context of our times and traditions through the study of times and traditions other than our own. History means not only the record of the past but also the discipline of investigating and interpreting the past. The study of history develops habits of critical thinking and effective writing, as well as it cultivates the careful analysis of various types of quantitative and qualitative evidence. It should be of value not only to undergraduates who intend to pursue advanced degrees in the field, but also to students interested in exploring the diversity and complexity of the human past, even as they hone their analytical and expository skills.

Student Learning Outcomes
Students graduating with a major in History should be able to attain the following objectives:

- Use and evaluate primary materials through critical reading and interpretation

New Requirements for the Major
**Students who declare after September 1, 2019 will follow the new requirements; students who have already declared will have a choice between the old and new requirements- please scroll down for the old requirements**

Students who are interested in majoring in History should consult a History professor or the Chair in their sophomore year to plan their academic programs. They may choose to focus their study of history on a region (such as Africa, Asia, Europe, Latin America, South Asia, U.S., transnational), period (such as ancient, medieval, early modern), or theme.

The History major consists of eleven courses: six in the area of concentration; the other five may be either within or without. Six of the eleven courses must be taken at Barnard or Columbia.

The eleven required courses should include:

1. Three introductory lecture courses (at least one 1000-level course; the two others may be 1000- or 2000-level courses. Note that a Columbia global core course is listed at 2000 level but counts as a 1000-level course);
2. Two seminars (3000- or 4000-level courses), one of which must be taken at Barnard or Columbia;
3. At least one course (lecture or seminar) must demonstrate your temporal breadth. This usually means one course that covers themes and topics related to the pre-modern period (generally taken to mean the period before the nineteenth century);

4. At least one course (lecture or seminar) must demonstrate a geographic range unless your area of concentration already does so. If your concentration is geography-based, this means a geographical area or region that is outside your field of study;

5. The two-semester senior research seminar (HIST BC3391 Senior Research Seminar-HIST BC3392 Senior Research Seminar), normally taken in sequence, beginning in the Fall and continuing into Spring of the senior year.

Majors may, with the approval of their advisers, include two non-history courses in their list of eleven if the subjects are closely related to their concentrations.

**Old Requirements for the Major**

**For Students declaring before September 2019 ONLY!**

Students who are interested in majoring in History should consult a History professor or the Chair in their sophomore year to plan their academic programs. They may choose to focus their study of history on a region (such as Africa, Asia, Europe, Latin America, South Asia, U.S., transnational), period (such as ancient, medieval, early modern), or theme (self-designed; see samples of popular ones under the “Thematic Concentration” tab).

The History major consists of eleven courses, eight in the area of concentration and three outside. Six of the eleven courses must be taken at Barnard or Columbia.

The eleven required courses should include:

1. Three introductory survey courses (all 1000- and some 2000-level lecture courses);

2. Two seminars (3000- or 4000-level courses), one of which must be taken at Barnard or Columbia.

3. The two-semester senior research seminar (HIST BC3391 Senior Research Seminar-HIST BC3392 Senior Research Seminar), normally taken in sequence, beginning in the Fall and continuing into Spring of the senior year.

Majors may, with the approval of their advisers, include two non-history courses in their list of eleven if the subjects are closely related to their concentrations.

Senior Research Seminar
The senior research seminar, in which students write their senior essays (30-50 pages), represents the culmination of the undergraduate history major. Students should discuss tentative topics with their advisers by the end of the junior year. Halfway through the first semester of the senior year students must submit a formal prospectus defining the problem under investigation, outlining the issues involved, and identifying the primary and secondary sources consulted. They must draft part of the essay by the end of the Fall semester, then complete their research and writing in the Spring.

Requirements for the Minor
The minor in history requires five courses, four in an area of concentration and one outside the concentration. The five courses must include one seminar. At least three of the minimum five courses must be Barnard or Columbia courses. Students planning to minor in history should consult the department chair.

HIST BC2388 Introduction to History of Science since 1800. 3 points.

How has modern science acquired its power to explain and control the world? What are the limits of that power? Topics: the origins of scientific institutions and values; the rise of evolutionary thought and Darwin's impact; the significance of Einstein's physics; ecology and environmental politics; the dilemmas of scientific warfare.

This course will examine the historical development of crime and the criminal justice system in the United States since the Civil War. The course will give particular focus to the interactions between conceptions of crime, normalcy and deviance, and the broader social and political context of policy making.

HIST BC2482 Revolutionary American 1763-1815. 3 points.
How did thirteen diverse British colonies become a single boisterous but fragile new nation? Historians still disagree about the causes, motives, and meanings surrounding the founding of the United States of America. Major themes include the role of ideologies, material interests, global contexts, race, gender, and class.

HIST BC2500 Poverty, Race, and Gender. 3 points.
This course will begin with a historical overview of the relationship between race, gender and poverty. We will look at definitions and sources of economic inequality, emerging discourses of poverty in the early 20th century, and changing perceptions of “the poor” over the course of American history. We will examine race and gender segmentation in the labor market, racial and gender conflict in the union movement, ideological foundations of the welfare state, cultural constructions of single motherhood, political debates about the “underclass,” as well as contemporary campaigns to alleviate poverty. Our goal is to think critically about discourses of poverty and welfare as well as antipoverty, labor and feminist organizing.

HIST BC2567 Women, Gender and Sexuality in the 20th Century U.S.. 3 points.
Using an intersectional framework, this course traces changing notions of gender and sexuality in the 20th century United States. The course examines how womanhood and feminism were shaped by class, race,
ethnicity, culture, sexuality and immigration status. We will explore how the construction of American nationalism and imperialism, as well as the development of citizenship rights, social policy, and labor organizing, were deeply influenced by the politics of gender. Special emphasis will be placed on organizing and women’s activism.

Not offered during 2019-20 academic year.

Prerequisites: NONE
The founding, growth, and present condition of American colleges and universities, with particular attention to the social history of Columbia University. Issues of governance, faculty rights and responsibilities, student activism and the public perception of institutions of higher learning will be considered.

HIST UN2661 LATIN AMERICAN CIVILIZATION II. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
This course explores major themes in Latin American history from the independence period (ca 1810) to the present. We will hone in on Latin America’s “chronic” problems of social inequality, political polarization, authoritarianism, incomplete democratization, and acrimonious memory politics. The course covers economic, social, and cultural histories, and gives special weight to the transformations of intimate life and political culture in colonial Latin American ideological struggles — from its dependency on Western capital to its unique “inner Cold War” — and the way they influenced the subaltern strata of society. The section discussions are a crucial component of the course and will focus on assigned historiography. While the lecture centers on constructing a cogent meta-narrative for Latin America’s modern era, in the section we will explore not only the historical “facts,” but will instead ask: how do historians know what they know about the past? What sources and analytic methods do they use to write history? And what ethical dilemmas do they confront when narrating politically-sensitive topics?

HIST BC2664 Reproducing Inequalities: Families in Latin American History. 3 points.
Explores changing structures and meanings of family in Latin America from colonial period to present. Particular focus on enduring tensions between “prescription” and “reality” in family forms as well as the articulation of family with hierarchies of class, caste, and color in diverse Latin American societies.

HIST BC2676 Latin America: Migration, Race, and Ethnicity. 3 points.
Not offered during 2019-20 academic year.

Examines immigrations to Latin America from Europe, Africa, and Asia and the resulting multiracial societies; and emigration from Latin America and the formation of Latino communities in the U.S., Europe, and elsewhere. Analyzes the socioeconomic and discursive-cognitive construction of ethno-racial identities and hierarchies, and current debates about immigration and citizenship.

HIST BC2681 Women and Gender in Latin America. 3 points.
Not offered during 2019-20 academic year.

Examines the gendered roles of women and men in Latin American society from the colonial period to the present. Explores a number of themes, including the intersection of social class, race, ethnicity, and gender; the nature of patriarchy; masculinity; gender and the state; and the gendered nature of political mobilization.

HIST BC2682 Modern Latin American History. 3 points.
Not offered during 2019-20 academic year.

See W3661 Modern Latin American History (Latin American Civ II). Explores major themes in Latin American history from independence to the present, with a special focus on the evolution of socio-racial inequality, political systems, and U.S.-Latin America relations. We will discuss not only “what happened” in Latin America’s past, but how historians know what they know, the sources and methods they use to write history, and the theoretical frameworks they employ to interpret the past.

HIST BC2803 Gender and Empire. 3 points.
Not offered during 2019-20 academic year.

HIST BC3119 Capitalism and Enlightenment. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.
Traces the lively debates amongst the major European Enlightenment figures about the formation of capitalism. Was the new market society ushering in an era of wealth and civilization or was it promoting corruption and exploitation? Particular emphasis on debates about commerce, luxury, greed, poverty, empire, slavery, and liberty.

HIST BC3177 SCARCITY: ECONOMY AND NATURE. 4 points.
Current patterns of economic growth are no longer environmentally sustainable. Global industrialization and the associated transference of carbon from the ground to the air are leading to a rapid exhaustion of resources and a warming of the planet. These changes have triggered a set of dangerous climatic transformations that are likely to cause massive ecological disruptions and disturbances of food production systems. These changes, in turn, might have a profound impact on poverty, migration, and geopolitics. To better understand how we have arrived at the present predicament, this seminar explores the history of how social and economic theorists have conceptualized the interaction between the economy and nature. The focus will be on the concept of scarcity as a way of understanding the relationship between economic growth and environmental sustainability. The course begins in the Renaissance and traces the evolution of the nature/economy nexus to the present.

HIST W3411 The Rise of American Capitalism. 3 points.
E-Commerce & Internet Technologies Track, Managing Emerging Technologies Track, Project Management Track, Discussion Section Required, Lab Required

Examines the social conflicts that accompanied the transformation of the United States from an agrarian republic and slave society to one of the most powerful industrial nations in the world. Particular attention will be paid to the building of new social and economic institutions and to cultural and visual representations of the nation and its people. Readings include major secondary works and primary documents. Formerly: American Society in the age of Capital, 1819-1897. Field(s): US

HIST W3412 Revolutionary America, 1750-1815. 3 points.

This course examines the cultural, political, and constitutional origins of the United States. It covers the series of revolutionary changes in politics and society between the mid-18th and early 19th centuries that took thirteen colonies out of the British Empire and turned them into an independent and expanding nation. Starting with the cultural and political glue that held the British Empire together, the course follows the political and ideological processes that broke apart and ends with the series of political struggles that shaped the identity of the US. Using a combination of primary and secondary materials relating to various walks of life and experience from shopping to constitutional debates, students will be expected to craft their own interpretations of this fundamental period of American history. Lectures will introduce students to important developments and provide a framework from them to develop their own analytical skills. Group(s): D Field(s): US

HIST W3523 History of Health Inequality in the Modern United States. 3 points.

Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics since the turn of the twentieth century. Topics to be examined will include, but will not be limited to, black women's health organization and care; HIV/AIDS politics, policy, and community response; "benign neglect"; urban renewal and gentrification; medical abuses and the legacy of Tuskegee; tuberculosis control; and environmental justice. There are no required qualifications for enrollment, although students will find the material more accessible if they have had previous coursework experience in United States history, pre-health professional (pre-med, pre-nursing, or pre-public health), African-American Studies, Women and Gender Studies, Ethnic Studies, or American Studies.

HIST UN1020 The Romans and Their World. 4 points.

This course examines the history of the Roman Empire from the formation of the Roman monarchy in 753 BCE to the collapse of the Western Empire in 476 CE. At the heart of the class is a single question: how did the Roman Empire come to be, and why did it last for so long? We will trace the rise and fall of the Republic, the extension of its power beyond Italy, and the spread of Christianity. Epic poetry, annalistic accounts, coins, papyri, inscriptions, and sculpture will illuminate major figures like Cleopatra, and features of daily life like Roman law and religion. The destructive mechanisms by which Rome sustained itself—war, slavery, and environmental degradation—will receive attention, too, with the aim of producing a holistic understanding this empire. Discussion Section Required.
HIST W4180 Conversion in Historical Perspective. 4 points. 
Priority given to majors and concentrators, seniors, and juniors. Not offered during 2019-20 academic year.

Prerequisites: the instructor’s permission.

Boundary crossers have always challenged the way societies imagined themselves. This course explores the political, religious, economic, and social dynamics of religious conversion. The course will focus on Western (Christian and Jewish) models in the medieval and early modern periods. It will include comparative material from other societies and periods. Autobiographies, along with legal, religious and historical documents will complement the readings. Field(s): *JWS

HIST GU4223 Personality and Society in 19th-Century Russia. 4 points.
Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor’s permission.

A seminar reviewing some of the major works of Russian thought, literature, and memoir literature that trace the emergence of intelligentsia ideologies in 19th- and 20th-century Russia. Focuses on discussion of specific texts and traces the adoption and influence of certain western doctrines in Russia, such as idealism, positivism, utopian socialism, Marxism, and various 20th-century currents of thought. HIST W4604 Jews and the City. 4 points.
Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor’s permission.

This course will survey some of the major historical, cultural, intellectual and social developments among Jews from the fourth century CE through the fifteenth. We will study Jewish cultures from alleged popular roots and wanted to overcome underdevelopment. At the time there was a revolutionary romanticism which involved the utopia of integrating intellectuals with the common man of the people, which could give life to an alternative project of society that was eventually defeated by the military dictatorship (1964-1985). Many artists and intellectuals engaged in the opposition to the regime, in spite of its efforts of modernization, which gave them good job opportunities, in a complex process that involved both dissent and integration to the established order. The lectures will analyze different conjunctures, from the years before the coup of 1964 until the end of the democratization process that was completed with the free elections of 1989. Particularly the decades of 1960 and 1970 were some of the most creative periods of Brazilian culture, including the Cinema Novo, the Teatro de Arena, the Bossa Nova and the Tropicalism. The topics will be examined in the light of concepts such as structures of feeling (Raymond Williams), field (Bourdieu), engagement (Sartre), commodity fetishism and reification (Karl Marx, G. Lukacs, Walter Benjamin, F. Jameson), society of the spectacle (Guy Debord), culture industry (Theodor Adorno and Max Horkheimer), revolutionary romanticism (Michael Löwy and Robert Sayre), among others. The course also introduces students to critical interpretations of society and culture produced by Brazilian and Brazilianist historians and social scientists.

HIST W4928 Comparative Slavery and Abolition in the Atlantic World. 4 points. 
Not offered during 2019-20 academic year.

Prerequisites: seminar application required. SEE UNDERGRADUATE SEMINAR SECTION OF THE HISTORY DEPARTMENT’S WEBSITE. 
This seminar investigates the experiences of slavery and freedom among African-descended people living and laboring in the various parts of the Atlantic World. The course will trace critical aspects of these two major, interconnected historical phenomena with an eye to how specific cases either manifested or troubled broader trends across various slaveholding societies. The first half of the course addresses the history of slavery and the second half pertains to experiences in emancipation. However, since the abolition of slavery occurs at different moments in various areas of the Atlantic World, the course will adhere to a thematic rather than a chronological structure, in its examination of the multiple avenues to freedom available in various regions. Weekly units will approach major themes relevant to both slavery and emancipation, such as racial epistemologies among slaveowners/employers, labor regimes in slave and free societies, cultural innovations among slave and freed communities, gendered discourses and sexual relations within slave and free communities, and slaves’ and freepeople’s resistance to domination. The goal of this course is to broaden students’ comprehension of the history of slavery and freedom, and to promote an understanding of the transition from slavery to freedom in the Americas as creating both continuities and ruptures in the structure and practices of the various societies concerned. HIST W3772 West African History. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
This course offers a survey of main themes in West African history over the last millennium, with particular emphasis on the period from the mid-15th through the 20th century. Themes include the age of West African empires (Ghana, Mali, Songhay); re-alignments of economic and political energies towards the Atlantic coast; the rise and decline of the trans-Atlantic trade in slaves; the advent and demise of colonial rule; and internal displacement, migrations, and revolutions. In the latter part of the course, we will appraise the continuities and ruptures of the colonial and post-colonial eras. Group(s): C Field(s): AFR

HIST W3902 History of the World to 1450 CE. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement, Discussion Section Required
This course presents and at the same time critiques a narrative world history from prehistoric times to 1500. The purpose of the course is to convey an understanding of how this rapidly growing field of history is being approached at three different levels: the narrative textbook level, the theoretical-conceptual level, and through discussion sections, the research level. All students are required to enroll in a weekly discussion section. Graded work for the course consists of two brief (5 page) papers based on activities in discussion sections as well as a take-home midterm and a final examination. Field(s): *ANC/ME

Human Rights Studies
226-D Milbank Hall
212-854-5420
Department Assistant: Maia Bernstein, 326 Milbank, 212-854-4689

Mission
The Human Rights Studies Program introduces Barnard undergraduates to the basic normative, theoretical and empirical knowledge and skills necessary to contribute cogently to public debates and policy initiatives related to social justice in the modern world. This mission reflects the proliferation of human rights concerns and the associated growth of public and private human rights institutions over the past half century, but more importantly the daunting theoretical and practical challenges that still remain. Human Rights Studies at Barnard is an interdisciplinary program, a joint major that combines the study of human rights with a complementary disciplinary, regional or other expertise at the choice of each student. These options include but are not limited to Africana Studies, American Studies, Anthropology, Asian and Middle Eastern Cultures, Comparative Literature, English, French, German, History, Italian, Political Science, Psychology, Religion, Slavic, Sociology, Spanish, and Women’s Studies.

Student Learning Goals
Human rights learning objectives fall into four broad categories:

- Competence with respect to the normative dimensions concerned with social justice, and the related institutions.
- Mastery of the empirical skills required to collect, evaluate and report accurately data on human rights abuses and institutional activities.
- A basic knowledge of the causes and effects associated with human rights situations, including the factors that ameliorate or aggravate violations.
- An understanding of the factors that contribute to effective remedial or response strategies and take into account the different political, economic, social and cultural contexts of each set of problems.

Student Learning Outcomes
In the case of undergraduate women majoring in human rights, these four broad goals would require students to possess the following knowledge and skills. The capacity to:

1. Identify, and understand the work of, the main public and private institutions that comprise the modern international human rights regime.
2. Identify the main past and present currents of theory and practice that define and challenge the contemporary consensus on human rights norms, particularly with respect to the core concepts of discrimination, equality, diversity, pluralism and human dignity.
3. Identify and trace the impact of the major events over the last hundred years that have led to the formation of the contemporary human rights norms and institutions.
4. Understand the major taxonomies, paradigms and current debates in the field of international human rights.
5. Exhibit competency in the integration of normative, institutional, public policy and empirical materials.
6. Understand the ways in which international standards are implemented and enforced in both international and domestic fora, including the nature of the obligations on states and other national and international actors.
7. Think and write critically about human rights institutions, theories, strategies and their relationship to other social priorities.
8. Discuss in detail two or more case studies, groups at risk, or specific human rights problems such as public health, specific rights, refugees, indigenous people, poverty etc., incorporating as appropriate the resources of other Barnard departments and programs.
9. Identify the ways in which the human rights regime offers tools to address violations of women's human rights as well as the ways in which women have been influential in the field.

10. Examine the relationships between human rights paradigms and those in related fields, notably development studies, peace and conflict management, security studies, social work, refugee and migration studies and especially women's studies.

11. Complete and defend advanced original research that draws on diverse sources and addresses one or more of the above questions.

Human rights studies at Barnard is designed to contribute to a liberal arts curriculum. Its cross-disciplinary character enriches and benefits from Barnard's teaching in the humanities and social sciences. Its core courses examine critically universally accepted intellectual and political frameworks for debates on social justice, i.e. international human rights law. Many of these debates focus on domestic and international issues that are the gist of ongoing political and ethical debates that are legitimately the concern of all citizens and for which they ought to be well prepared. As such, human rights studies forms an integral part of the expanding field of international education at Barnard. The Program draws on Columbia's and NYC's unique human and documentary resources. It also provides an intellectual base and appropriate skills for social advocacy. These different dimensions do not coincide with individual disciplines. The range of issues that now fall within the field of human rights is extensive, reflecting the scope of the Universal Declaration of Human Rights and its subsequent associated treaties. The unique and defining dimensions of human rights studies are the problems raised by its normative and prescriptive or remedy-oriented dimensions (the first and the fourth of the fields of study above).

**Requirements for the Combined Major**

A minimum of six courses in the Human Rights Program, including either HRTS BC1025 Human Rights in Theory and Practice or HRTS UN3001 Introduction to Human Rights and at least two other courses from among those designated "core courses", three "related" courses; and a complete major in a relevant department. Where courses in the Human Rights Program also satisfy departmental requirements, no more than three Human Rights courses may count toward the major. Besides the six courses in the Human Rights Program, students submit a senior thesis or project in the area of human rights, written in the major department. Those interested in a combined major should consult with the Director or other members of the Committee on Human Rights Program.

Independent research and writing project. See the website or the program office for application details and deadlines.

POL UN3173 Power, Rights, and Social Change: Achieving Justice. 4 points.
This lecture course, accompanied by its weekly discussion section, will introduce students to the field of justice. It will combine an intellectual history of conceptions of justice and modes of political change with an exploration of the main areas of public interest and advocacy. The course is intended to serve as a bridge from the Columbia Core to present issues of social justice. Throughout, the discussion will question how we—contemporary subjects and citizens—can improve our social and political condition and achieve justice.

HRRTS UN3190 International Human Rights Law. 3 points.
This course will introduce students to the international law of human rights, and give a basic orientation to fundamental issues and controversies. The course has two principal focal points: first, the "nuts and bolts" of how international law functions in the field of human rights, and second, the value and limitations of legal approaches to a variety of human rights issues. Throughout the course, both theoretical and practical questions will be addressed, including who bears legal duties and who can assert legal claims, how these duties might be enforced, and accountability and remedy for violations. Attention will be given to how international law is made, what sorts of assumptions underlie various legal mechanisms, and how the law works in a variety of contexts.

POL BC3410 *Colloquium on Human Rights in a Diverse World. 4 points.
Prerequisites: Not open to students who have taken or are currently taking POLS UN3002. Prerequisites: POLS V1013 or HRRTS UN3001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Examination of human rights within the context of international migration. The course covers topics such as citizenship, state sovereignty, border control, asylum-seekers, refugees, and undocumented immigrants. (Cross-listed by the Human Rights Program.)

POL BC3505 * Colloquium on Making Democracy Work. 4 points.
Prerequisites: POLS V1501 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp). Examination of democratic consolidation and promotion. What makes democracy work and what, if anything, can outside actors do to
help this process along? Topics include the theoretical literature on
democratic consolidation, historical cases of intervention, debates
about America's role in promoting democracy, and examination of
some of the research on democracy promotion. (Cross-listed by the
European Studies and Human Rights Programs.)

POLS BC3521 Civil Rights and Civil Liberties. 3 points.
Prerequisites: POLS W1201 or the equivalent (http://
polisci.barnard.edu/introductory-courses/). Not an introductory-
level course. Not open to students who have taken the colloquium
POLS BC3326. Enrollment limited to 25 students; L-course sign-up
through eBear (http://ebear.barnard.edu/). Barnard syllabus (http://
polisci.barnard.edu/syllabi/#ap).
Explores seminal caselaw to inform contemporary civil rights and civil
liberties jurisprudence and policy. Specifically, the readings examine
historical and contemporary first amendment values, including freedom
of speech and the press, economic liberties, takings law, discrimination
based on race, gender, class and sexual preference, affirmative action,
the right to privacy, reproductive freedom, the right to die, criminal
procedure and adjudication, the rights of the criminally accused
post-9/11 and the death penalty. (Cross-listed by the American Studies
and Human Rights Programs.)

HRTS BC3601 International Law and the United Nations in Practice. 4 points.
Prerequisites: POLS UN1601 or HRTS UN3001 An equivalent course to
POLS UN1601 or HRTS UN3001 may be used as a pre-requisite, with
departmental permission.
Examines the development of international law and the United Nations,
their evolution in the Twentieth Century, and their role in world affairs
today. Concepts and principles are illustrated through their application
to contemporary human rights and humanitarian challenges, and with
respect to other threats to international peace and security. The course
consists primarily of presentation and discussion, drawing heavily on
the practical application of theory to actual experiences and situations.
For the Barnard Political Science major, this seminar counts as elective
credit only. (Cross-listed by the Human Rights Program.)

POLS UN3690 International Law. 4 points.
What is public international law, and what does it influence the
behavior of states, corporations, and individuals in the international
system? This introductory course engages these questions as well as
the politics of applying and enforcing public international law in various
contexts and issue areas. An understanding of basic international legal
principles, institutions, and processes is developed through exploration
of foundational cases, and by means of (required) participation in a
multi-week group simulation of an international legal dispute.

HRTS BC3850 Human Rights and Public Health. 4 points.
Prerequisites: Enrollment in the course is open to 18 undergraduates
who have completed at least one core course in human rights and/or
international law.

This seminar introduces students to the field of health and human
rights. It examines how to advocate for and implement public health
strategies using a human rights framework. It takes note of current
international and domestic debates about the utility of a “human rights-
based approach” to health, discusses methods and ethics of health-
related human rights research, and examines case studies of human
rights investigations to explore the role of human rights analysis in
promoting public health.
ANTH BC3932 Climate Change, Global Migration, and Human Rights in the Anthropocene. 4 points.
While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third, the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific.  Human Rights elective.

HRTS 4215 NGOs and the Human Rights Movement: Strategies, Successes and Challenges. 3 points.
This class takes a social movement perspective to analyze and understand the international human rights movement. The course will address the evolution of the international human rights movement and focus on the NGOs that drive the movement on the international, regional and domestic levels. Sessions will highlight the experiences of major human rights NGOs and will address topics including strategy development, institutional representation, research methodologies, partnerships, networks, venues of engagement, campaigning, fundraising and, perhaps most importantly, the fraught and complex debates about adaptation to changing global circumstances, starting with the pre-Cold War period and including some of the most up-to-date issues and questions going on in this field today.

HRTS GU4230 Refugees, Forced Migration, and Displacement. 3 points.
Refugees, forced migration, and displacement: these subjects top the headlines of the world’s newspapers, not to mention our social media feeds. Over a million refugees have reached Europe’s shores in recent years, and conflicts in the Middle East and elsewhere continue to force people to flee their homes. In the aftermath of the financial crisis and 9/11, politicians in the Global North have focused on borders: who crosses them and how. Walls are being erected. Referendums are being held. We are consumed with thorny questions about who gets to join our political communities. Today there are over 65 million refugees, displaced persons, and stateless persons in the world, represented at last summer’s Olympics by their own team for first time, a testament to their increasing visibility on the world stage. Global forced displacement recently hit a historical high. And while numbers are increasing, solutions are still elusive. The modern refugee regime, the collection of laws and institutions designed to address the problems faced by refugees, has developed slowly over the course of the last 100 years, first in response to specific crises. That regime has been shaped by a changing geopolitical landscape. At the end of the Cold War, institutions in the field expanded their mandates and preferred solutions to the “problem” of refugees changed. And yet today many scholars and policy makers argue the regime is not fit for purpose. They point to the European refugee crisis as the latest
case in point. Why? What went wrong and where? Can it be fixed?
This course will largely focus on the issues of forced migration, displacement and refugees related to conflict, although this subject is inevitably intertwined with larger debates about citizenship and humanitarianism. Taking an interdisciplinary perspective, this course will address both scholarly and policy debates. Utilizing human rights scholarship, it will draw on work in history that charts the evolution of institutions; legal scholarship that outlines international and domestic laws; work in political science that seeks to understand responses in a comparative perspective, and anthropological studies that address how refugees understand these institutions and their experiences of exile and belonging. These topics are not only the purview of those in the academy, however. Investigative journalists have most recently provided trenchant coverage of the world’s refugees, especially the current European crisis, where many have reported from the shores of the Mediterranean Sea. Policy makers scramble to keep up with a crisis literally in motion. We will read their communiqués as well. While we will only begin to skim the surface of these issues, in this course you should expect to gain the following expertise: 1) Knowledge of the modern refugee regime and its origins 2) An analysis of actors and institutions who are tasked with responding to refugee crises and how their roles have changed 3) An understanding of the critical historical case studies, both in the United States and abroad 4) Critical analysis of the current refugee crisis in Europe and the Middle East 5) Knowledge of asylum process in the US and in comparative perspective 6) An understanding of the debates about conducting research with vulnerable populations such as refugees and displaced persons

HRTS GU4270 Social Media and Human Rights: Actors, Advocacy and Analytics. 3 points.
PRIORITY: HRSMA. GRAD & UNDERGRAD(3&4YR) ON 1ST DAY OF TERM

This course examines how changes in information and communications technology have, over the past two decades, fundamentally transformed the practices of civil society actors engaged with human rights issues. New communications tools such as Twitter, blogs, and Facebook have changed the ways that organizations communicate with their followers and seek to influence public debate. The increasing accessibility of analytic tools for researching and communicating with their followers and seek to influence public debate.

HRTS GU4300 Economic and Social Rights in Policy and Practice. 3 points.
This course will address economic and social human rights through the lens of what is happening now in the early 21st century, in light of the enormous shifts that have taken place since the modern human rights movement first emerged in the aftermath of WWII. The course will address many of the central debates about economic and social rights and then examine how those debates apply to specific rights and topics including development, health, housing, work, food and education. Throughout, the course will examine how activists and policymakers have responded to all these changes, and ask what mightlie ahead for the human rights movement in addressing economic and social rights in a multilateral, globalized world.

HRTS GU4340 Human Rights Accountability & Remedies. 3 points.
Not offered during 2019-20 academic year.

Effective remedies for violations of human rights is a core tenet of human rights law. Yet in practice, victims are rarely able to rely on formal accountability mechanisms to deliver remedies. This course examines how advocates combine political, legal and reputational accountability strategies to hold violators accountable where formal enforcement mechanisms are unavailable. The course will look beyond the international criminal legal system, and instead draw on case studies from contexts where the accountability gap is particularly stark: transnational actors who lack direct accountability relationships with rights-holders, including in international development, peacekeeping and corporate activities.

By delving into practical and tactical considerations, students will build an understanding of how various strategies work together to build a successful campaign for accountability that results in remedies for victims. Students will engage in simulated exercises in media advocacy, political lobbying, engaging with the UN human rights system, and public campaigning. Students will learn how to build empowering narratives that shape public opinion, center victims in their work, and nurture transnational partnerships to overcome power differentials. Through discussions grounded in both theory and practice, students will also critically interrogate the practice of human rights advocacy.

HRTS GU4360 Menstruation, Gender, and Rights: Interdisciplinary Approaches. 3 points.
The course will explore the contemporary discourse around menstruation in global and local contexts. The recent shift in public discourse around menstruation is crucial because efforts to support menstruators across the lifespan not only confer health benefits but are also part of an enduring project of pursuing gender equality and women’s rights. Centering attention on menstrual health resists pernicious social control of women’s bodies and recognizes the body as foundational, urgent and politically relevant. This is why menstruation matters: it unites the personal and the political, the intimate and the public, the physiological and the socio-cultural.

The course examines gender justice and women’s rights through the lens of menstruation, discussing questions of gender stereotyping, transnational feminism, and gender identity. Students will gain an understanding of the relevance of menstruation across different spheres of life combining bio-medical and socio-cultural factors. We will ask: What is the relationship between menstruation, human rights and gender equality? What does it mean to approach menstrual health research from an interdisciplinary perspective? - Over the course of the semester, we will examine different spheres of life, including health, education, equality in the work place, freedom of religion, and cultural rights. In doing so, the course will pay particular attention to
the intersection of gender and other markers of inequalities, including disability, socio-economic status, age, caste, and gender identity.

**HTRS GU4380 Advocating and Campaigning for Social and Economic Rights. 3 points.**

This course will examine practical issues, opportunities, tactics and strategies to advocate for economic and social rights. The course will incorporate central debates about economic and social rights, such as how to identify violators and define state responsibility, whether these rights can be litigated, and how to make implementable recommendations for change, measure implementation and measure impact. The course will also look more in depth at the standards and fulfillment challenges on several of the key rights including health, housing, education, and labor.

Throughout the course, you will focus on one economic and social rights topic of your choice. Through the lens of your chosen topic, you will review how organizations and social movements have engaged to affect change on similar issues, and use that research to explore many of the practical skills of advocacy and campaigning: framing recommendations and calls to action; drafting policy briefs; crafting media pitches and social media content; and designing and evaluating an overall advocacy strategy.

**HTRS GU4400 Sexual Orientation, Gender Identity, and Human Rights. 3 points.**

PRIORITY:HRSM. GRAD & UNDERGRAD (3&4YR) ON 1ST DAY OF TERM

Debates over the rights of lesbian, gay, bisexual and transgender people have never been more visible in the international arena. Advocates are beginning to have some success in putting sexual orientation and gender identity on the agenda for inclusion in human rights instruments. But in many local and regional contexts, state-sanctioned homophobia is on the rise, from the official anti-gay stance of Russia featured during the Sochi Winter Games to the passage of Mississippi’s anti-gay bill and Uganda’s anti-homosexuality act. This course examines these trends in relation to strategies pursued by grassroots activists and NGOs and the legal issues they raise, including marriage and family rights, discrimination, violence, torture, sex classification, and asylum. We will also focus on current debates about the relation between sexual rights and gender justice, tensions between universalist constructions of gay/trans identity and local formations of sexual and gender non-conformity, and legacies of colonialism.

**HRTS GU4500 SOCIO-ECONOMIC RIGHTS. 3 points.**

Socio-economic rights have emerged from the margins into the mainstream of human rights. We will explore conceptual issues through the lens of specific rights which will help us ground these principles and ideas in concrete cases. We will discuss developments on socio-economic rights and examine their relevance in the United States as well as selected other countries, particularly those with progressive legislation, policies and jurisprudence.

**HRTS GU4600 Human Rights in the Anthropocene. 3 points.**

In August 2016, a working group of the International Geological Congress voted to acknowledge a new geological epoch, following 11,700 years of the Holocene, and that it would be called The Anthropocene. The announcement indicated a new era in the earth’s chronology marked by the consequences of human activity on the planet’s ecosystems. Closely related to discussions of sustainability, investigations into the Anthropocene tend to focus on environmental and ecological issues while ignoring its social justice dimensions. This course will investigate how Human Rights has and will be impacted by the Anthropocene, with special attention paid to the human dimensions and consequences of anthropogenic change. Do new and troubling revelations about anthropogenic mistreatment of the earth and its resources modify or amplify the kinds of responsibilities that govern activity between individuals and communities? How do we scale the human response from the urban, to the periurban, to the rural? How must the study of Human Rights evolve to address violence and mistreatment associated not just among humans but also amid human habitats? What sorts of juridical changes must occur to recognize and respond to new manifestations of social injustice that relate directly to consequences of anthropogenic changes to the Earth system? Topics will include discussions of the Environmental Justice movement, agribusiness, access to (and allocation of) natural resources, population growth; its global impact, advocacy for stronger and more accountability through environmental legal change, biodiversity in urban environments, and the growing category of environmental refugees.

**HRTS GU4650 Children’s Rights Advocacy. 3 points.**

This course is designed to introduce contemporary children’s rights issues and help students develop practical advocacy skills to protect and promote the rights of children. Students will explore case studies of advocacy campaigns addressing issues including juvenile justice, child labor, child marriage, the use of child soldiers, corporal punishment, migration and child refugees, female genital mutilation, and LBGT issues affecting children. Over the course of the semester, students will become familiar with international children’s rights standards, as well as a variety of advocacy strategies and avenues, including use of the media, litigation, and advocacy with UN, legislative bodies, and the private sector. Written assignments will focus on practical advocacy tools, including advocacy letters, op-eds, submissions to UN mechanisms or treaty bodies, and the development
of an overarching advocacy strategy, including the identification of goals and objectives, and appropriate advocacy targets and tactics.

HRTS GU4700 Ethical Dilemmas in Healthcare: A Human Rights Approach. 3 points.
This course examines major ethical dilemmas that emerge in the convergence between human rights and public health at the national and international levels. Using specific case studies, Attention will be given to the rationales, meaning and implementation of the right to health across borders; the theories and practices of allocation of scarce resources; the challenges of providing care for minority groups—including sexual minorities, children, and persons with disabilities; and the ethical, legal, and social implications of international health governance. This is an interactive course, with interdisciplinary scholarship and exploration of issues in historical, cultural and political contexts.

HRTS GU4810 Religion and Human Rights. 3 points.
Priority given to human rights studies M.A. students. Open to 3rd and 4th year undergraduates on first day of term with the instructor’s permission.

The resurgence of religion over the past three decades has had a transformative influence globally and within nations. Religious nationalism, fundamentalism, and communalism have arisen to forcefully compete with secular democracy. With the fall of the Soviet bloc and the bilateralism of the Cold War, ethnic particularism, often of a religious character, has emerged as the locus of identity for people on all continents. These rapid changes engendered by a new, often commanding, role for religion challenge the very concept of individual and universal human rights. They raise difficult theoretical and painfully practical questions as to the preservation of individual human rights, and the relationship of democracy to religion. At the same time, current currents such as economic globalization, the triumph of the free market, and the communications revolution promote individual autonomy, a cornerstone of human rights. There can be no doubt that religion will occupy an increasingly salient role in the social and political life of nations during the course of the 21st century. The relevance of religion to human rights in our time cannot be undervalued. The course examines the relationship of religion to human rights from several standpoints, including religion’s role in abetting intolerance, religious minorities as victims of human rights violations, and religion as a framer of human rights ideals which inspire action.

HRTS GU4880 Human Rights in the United States. 3 points.
The United States sees itself as a country founded on the norms of equality under the law and inalienable rights but the modern reality is quite different. Police brutality in Ferguson, Executive Orders banning Muslims, protests at the Dakota Pipeline, the water crisis in Flint, Michigan, raids by Immigration and Customs Enforcement, high levels of domestic violence, wage stagnation, and the lack of a right to health care, all point to a human rights crisis at home. Some scholars have even argued that, for the majority of its citizens, the United States has the standards of a “third world” country.

In which areas are the most violations of human rights occurring and why? How have long term trends, including historical legacies, contributed to the current state of affairs? This survey course will provide an overview of contemporary human rights issues in the United States and will analyze them through the theoretical lenses of scholarship in the fields of comparative politics (including social movements) and law and society. It will outline the different actors in the human rights landscape, and focus on the various forms and strategies of mobilization around human rights issues with an eye to what has helped increase the enjoyment of rights.

HRTS GU4900 UN HUMAN RIGHTS BODIES: IMPACT – REFORM – ADVOCACY. 4 points.
The course is part of the program’s offerings in experiential learning. Students will engage in an applied research project with an NGO partner focused on the role of UN Special Rapporteurs and the strategies they employ. Students will become familiar with the intricacies of the UN human rights system, while also taking a bird’s-eye view on the system, its challenges and the need for reform, The course seeks to combine critical reflection with practical application, including through the perspectives of practitioners and guest speakers who discuss their strategies for advocacy.

HRTS GU4910 Children’s Rights, Armed Conflict, and Peacebuilding. 3 points.
According the UN Secretary-General's (SG) annual report on children and armed conflict last year armed conflicts around the world led to at least 4,000 verified rights violations against children committed by government forces and over 11,500 by non-state armed groups. The violations include killing or maiming, recruitment or use of children in hostilities, sexual violence, using children as human bombs, abductions, the denial of humanitarian access, and attacks on schools and hospitals. About 50 per cent of the estimated 26 million people currently displaced by armed conflicts and violence are children.

This course examines global approaches, challenges and problems associated with providing resources, implementing laws and guidelines, and ensuring education to children before, during and after armed conflicts. Students will be asked to interrogate current approaches and literature in light of critical theories of childhood, human rights and children's rights more specifically. The course utilizes case studies that show the failures of international human rights and NGOs to address the needs of children before, during, and after conflict, as well as the problems with not taking into account children's perspectives and lived experience. The course seeks to the extent possible to incorporate children’s views on conflict through a review of children’s drawings, writing, and interviews. It questions the common representations about children and armed conflict that mass media, international development literature, children’s literature, and film promote. The course will also explore the international norms for protecting children in emergencies which have also been strengthened considerably, by a number of UN Security Council resolutions, notably resolutions 1612 and 1820, aimed at ending the abuse of children and civilians in the context of war. What are the responsibilities
of the International Community to protect and support children of war? What preventative measures can be taken to better ensure children do not fall victims to armed conflict? Finally, the course takes a special look at education prior to, during conflict, and post-conflict, to understand how and whether the root causes of conflict—discrimination, intolerance, economic inequality—are addressed by educational systems.

HRTS GU4915 Human Rights and Urban Public Space, 3 points.
Priority for 3rd & 4th yr CC/GS HUMR studs & to HRSMA studs

This course will explore the often-contested terrain of urban contexts, looking at cities from architectural, sociological, historical, and political positions. What do rights have to do with the city? Can the ancient idea of a “right to the city” tell us something fundamental about both rights and cities? Our notion of citizenship is based in the understanding of a city as a community, and yet today why do millions of people live in cities without citizenship? The course will be organized thematically in order to discuss such issues as the consequences of cities’ developments in relation to their peripheries beginning with the normative idea of urban boundaries deriving from fortifying walls, debates around the public sphere, nomadic architecture and urbanism, informal settlements such as slums and shantytowns, surveillance and control in urban centers, refugees and the places they live, catastrophes natural and man-made and reconstruction, and sovereign areas within cities the United Nations, War Crimes Tribunals. At the heart of our inquiry will be an investigation of the ways in which rights within urban contexts are either granted or withheld.

Fall 2019: HRTS GU4915

HRTS GU4930 International Humanitarian Law and Human Rights. 4 points.
This seminar will cover various issues, debates, and concepts in the international law of armed conflict (known as international humanitarian law), particularly as it relates to the protection of non-combatants (civilians and prisoners of war). In doing so, we will examine how international humanitarian law and human rights law intersect. Both sets of legal norms are designed to protect the lives, well-being, and dignity of individuals. However, the condition of armed conflict provides a much wider set of options for governments and individuals to engage in violent, deadly action against others, including killing, forcibly detaining, and destroying the property of those designated as combatants. At the same time, the means of waging war are not unlimited, but rather are tightly regulated by both treaty and customary law. This course will examine how these regulations operate in theory and practice, focusing on the principles of distinction, proportionality, and military necessity.

Spring 2020: HRTS GU4930

HRTS GU4950 Human Rights and Human Wrongs. 3 points.
MAIL INSTR FOR PERM. PRIORITY: 3 & 4 YR HUMAN RIGHT & HRSMA
Prerequisites: the instructor’s permission. Please e-mail the instructor at bc14@columbia.edu.

This course will examine the tension between two contradictory trends in world politics. On the one hand, we have emerged from a century that has seen some of the most brutal practices ever perpetrated by states against their populations in the form of genocide, systematic torture, mass murder and ethnic cleansing. Many of these abuses occurred after the Holocaust, even though the mantra “never again” was viewed by many as a pledge never to allow a repeat of these practices. Events in the new century suggest that these trends will not end anytime soon. At the same time, since the middle of the twentieth century, for the first time in human history there has been a growing global consensus that all individuals are entitled to at least some level of protection from abuse by their governments. This concept of human rights has been institutionalized through international law, diplomacy, international discourse, transnational activism, and the foreign policies of many states. Over the past two decades, international organizations, non-governmental organizations, and international tribunals have gone further than any institutions in human history to try to stem state abuses. This seminar will try to make sense of these contradictions.

Fall 2019: HRTS GU4950

HRTS GU4955 Narrative and Representation in Post-Conflict Societies. 3 points.
This course explores the relationship between narrative and the legacy of violence and atrocity in post-conflict societies, focusing particularly on the Holocaust, Cambodia, Rwanda and the former Yugoslavia (and more briefly Indonesia and Armenia). Examining a range of medium—including, but not limited to, eye-witness accounts, memoirs, history books, government reports, film, theater, memorials—we will consider how different narratives address issues of history and memory, justice and judgment. We will also discuss how narrative influences efforts to achieve reconciliation and come to terms with the past on both personal and societal levels. Does revisiting the past allow people who either suffered or inflicted terrible violence—or both—once again live together? Are there particular modes or genres of narrative that are particularly successful in terms of enabling societies to reflect on their past and respond adequately? Can justice and accountability ever be achieved? These are some of the questions we will consider as we examine the ways in which atrocities are written about, remembered, judged and interpreted.

Related Courses
POLS UN1101 Political Theory I. 4 points.
What is the relationship between law and justice? Are capacities of political judgment shared by the many or reserved for the few? What does human equality consist of and what are its implications? Can individual freedom be reconciled with the demands of political community? What are the origins and effects of persistent gender inequalities? These are some of the crucial questions that we will address in this introductory course in political theory. The course is divided into five thematic sections, each addressing an enduring political problem or issue and centered on a key text in the history of political thought: 1. Laws, Obligations, and the Question of Disobedience; Sophocles, Antigone; 2. Democratic Citizenship and the Capacities of Political Judgment; Plato, Republic; 3. Origins and Effects of (In)equality; John Locke, Second Treatise of Civil Government; 4. Paradoxes of Freedom; Jean Jacques Rousseau, On the Social Contract; 5. The Woman Question; John Stuart Mill, The Subjection of Women.
ECON BC2010 The Economics of Gender. 3 points.
Examination of gender differences in the U.S. and other advanced industrial economies. Topics include the division of labor between home and market, the relationship between labor force participation and family structure, the gender earnings gap, occupational segregation, discrimination, and historical, racial, and ethnic group comparisons.

ECON BC2075 Logic and Limits of Economic Justice. 3 points.
Prerequisites: Introduction to Economic Reasoning (ECON BC1003) or Principles of Economics (ECON W1105). An introductory course in political theory or political philosophy is strongly recommended, but not required.
Introduce students to problems of economic justice under capitalism. Course has three goals: (1) expose students to debates between economics and philosophers about the meaning and nature of justice, (2) explore conflict between efficiency and justice, and (3) examine implications of justice for gender equality, intergenerational equity and climate change.

PHIL UN2110 Philosophy and Feminism. 3 points.
Is there an essential difference between women and men? How do questions about race conflict or overlap with those about gender? Is there a "normal" way of being "queer"? Introduction to philosophy and feminism through a critical discussion of these and other questions using historical and contemporary texts, art, and public lectures. Focus includes essentialism, difference, identity, knowledge, objectivity, and queerness.

POLS UN3002 Human Rights and Immigration. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: Not open to students who have taken or are currently taking POLS BC3410. Prerequisites: POLS V1013 or HRTS UN3001 or the equivalent. Enrollment limited to 25 students
Examination of human rights within the context of international migration. The course covers topics such as citizenship, state sovereignty, border control, asylum-seekers, refugees, and undocumented immigrants.

ECON BC3011 Inequality and Poverty. 3 points.
Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor.
Conceptualization and measurement of inequality and poverty, poverty traps and distributional dynamics, economics and politics of public policies, in both poor and rich countries.

ECON BC3029 Empirical Development Economics. 3 points.
Prerequisites: (ECON BC3035 or ECON BC3033) and ECON UN3412 ECON BC3035 or ECON BC3033 and Econometrics, or permission of the instructor.
Examination of new challenges in the global economy from unequal income distribution and poor institutions to health epidemics and natural disasters. Accessing and analyzing real-time and historic data to understand the current global economy. Applied econometric techniques.

HIST UN3030 Immigration and Citizenship in American History. 4 points.
This course explores the meaning of American citizenship in connection with the country’s immigration history. Topics include historic pathways to citizenship for migrants; barriers to citizenship including wealth, race, gender, beliefs and documentation; and critical issues such as colonialism, statelessness, dual nationality, and birthright citizenship. We will ask how have people become citizens and under what authority has that citizenship been granted? What are the historic barriers to citizenship and how have they shifted over time? What major questions remain unanswered by Congress and the Supreme Court regarding the rights of migrants to attain and retain American citizenship?

ECON BC3039 Environmental and Natural Resource Economics. 3 points.
Prerequisites: ECON BC1003 or ECON W1105. Prerequisite for Economics majors: ECON BC3035.
Link between economic behavior and environmental quality; valuation of non-market benefits of pollution abatement; emissions standards; taxes; and transferable discharge permits. Specific problems of hazardous waste; the distribution of hazardous pollutants across different sub-groups of the U.S. population; the exploitation of commonly owned natural resources; and the links between the environment, income distribution, and economic development.

ECON BC3049 Economic Evaluation of Social Programs. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: ECON BC3035 Intermediate Micro Theory and ECON BC2411 Statistics for Economics, or the equivalents
A study of the effectiveness of social programs and the different quantitative techniques economists use to evaluate policy interventions. Cost-benefit analysis, testing predictions of economic
theories. Specific examples of successful and unsuccessful social programs in the U.S. and around the world.

POLS UN3100 Justice. 3 points.
An inquiry into the nature and implications of justice in areas ranging from criminal justice to social justice to the circumstances of war and peace, considering issues such as abortion, the criminalization of behavior, the death penalty, climate change, global poverty, civil disobedience, and international conflict.

POLS BC3102 * Colloquium on Race and Modern Political Thought. 4 points.
Admission by application through the Barnard department only. Enrollment limited to 16 students.

Prerequisites: POLS 1013 or the equivalent.
Race and Modern Political Thought is a Political Theory colloquium that explores how the concept of race became available to modern thought as a legitimate conceptualization of human being and difference and to political thought as an idea useful to structuring political communities. Is race best understood in ideological terms, i.e., as a viewpoint shared by philosophers and lay-persons alike about difference that usefully reflected the needs and aspirations of slaveholders and colonialists? Or is race instead an artifact of modern forms of reasoning? Or should we ignore questions of origin and simply take seriously the notion that the only practical—ethically correct or politically progressive—approach to theorizing race is to attend critically to the organization of racial power? What kind of idea is race?

WMST BC3132 Gendered Controversies: Women's Bodies and Global Conflicts. 4 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).
Investigates the significance of contemporary and historical issues of social, political, and cultural conflicts centered on women’s bodies. How do such conflicts constitute women, and what do they tell us about societies, cultures, and politics? - D. Ko

SOCI BC3214 Sociology of African American Life. 3 points.
Emphasizes foundations and development of black communities post-1940, and mechanisms in society that create and maintain racial inequality. Explores notions of identity and culture through lenses of gender, class and sexual orientation, and ideologies that form the foundation of black politics. Primarily lecture with some discussion.
POLS BC3307 *Colloquium on Racial Violence. 4 points.
Prerequisites: POLS 1201 Intro to American Politics or an equivalent American Politics course. Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students.
This colloquium examines two particular episodes of racial violence, each of which situates the political differently: lynchings and prisons. The goal is to not only explore how to bring the state back in but also examine the differences, similarities and points of intersections across disciplines.

WMST UN3312 Theorizing Activism. 4 points.
Prerequisites: Critical Approaches or Feminist Theory or permission of instructor.
Helps students develop and apply useful theoretical models to feminist organizing on local and international levels. It involves reading, presentations, and seminar reports. Students use first-hand knowledge of the practices of specific women's activist organizations for theoretical work.

POLS UN3401 Democracy and Dictatorship in Europe. 3 points.
Not offered during 2019-20 academic year.
This course will examine the development of democracies and dictatorships in Europe from the French Revolution to the present day. It will analyze the nature and dynamics of European political history and use the European experience as a foundation upon which to build a broader understanding of how different types of political regimes emerge, function and are sustained over time. Prior knowledge of European history and comparative politics is welcome, but not presumed.

RELI UN3401 MUSLIMS IN DIASPORA-DISC. 0 points.
Corequisites: RELI UN3407
Discussion section associated with RELI UN3407-MUSLIMS IN DIASPORA.

POLS BC3402 The Comparative Politics of Gender Inequality. 3 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).
Prerequisites: Not an introductory-level course. Not open to students who have taken the colloquium POLS BC 3507. Enrollment limited to 20 students; L-course sign-up through eBear (http://ebear.barnard.edu/). Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).
Uses major analytical perspectives in comparative politics to understand the persistence of gender inequality in advanced industrial states. Topics include: political representation and participation; political economy and capitalism; the historical development of welfare states; electoral systems, electoral quotas; the role of supranational and international organizations; and social policy.

POLS BC3411 *Colloquium on Building Peace. 4 points.
Prerequisites: POLS 1601 (Intro to International Politics) or equivalent. Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students.
How can we build peace in the aftermath of extensive violence? How can international actors help in this process? This colloquium focuses on international peacemaking, peacekeeping, and peacebuilding efforts in recent conflicts. It covers general concepts, theories, and debates, as well as specific cases of peacebuilding successes and failures. Cross-listed with Human Rights.

WMST UN3450 Topics in Sexuality and Gender Law. 3 points.
As society shifts in its views about sexuality and gender, so too does the law. Indeed, legal developments in this area have been among the most dynamic of the past couple of decades. Yet law does not map easily or perfectly onto lived experience, and legal arguments do not necessarily track the arguments made in public debate.
In this seminar, we will explore the evolving jurisprudence of sexuality and gender law in a variety of areas. Our goal throughout the semester will be to understand and think about these issues as lawyers do - with our primary focus on understanding and evaluating the arguments that can be made on both (or all) sides of any particular case, with some attention to the factors outside of the courtroom that might shape how courts approach their work. Related to this, we will also seek to understand how and why some of the jurisprudence has changed over time.

CSER UN3490 Post 9/11 Immigration Policies. 4 points.
Enrollment limited to 22.

Since September 11, 2001, there has been an avalanche of immigration enforcement policies and initiatives proposed or implemented under the guise of national security. This course will analyze the domino effect of the Patriot Act, the Abscender Initiative, Special Registration, the Real I.D. Act, border security including the building of the 700-mile fence along the U.S./Mexico border, Secured Communities Act that requires the cooperation of state and local authorities in immigration enforcement, the challenge to birthright citizenship, and now the congressional hearings on Islamic radicalization. Have these policies been effective in combating the war on terrorism and promoting national security? Who stands to benefit from these enforcement strategies? Do immigrant communities feel safer in the U.S.? How have states joined the federal bandwagon of immigration enforcement or created solutions to an inflexible, broken immigration system?

WMST BC3514 Historical Approaches to Feminist Questions. 4 points.
This course will provide students with a comparative perspective on gender, race, and sexuality by illuminating historically specific and culturally distinct conditions in which these systems of power have operated across time and space. In particular, the course seeks to show how gender has not always been a binary or primary category system. Such approach is also useful in understanding the workings of race and sexuality as mechanisms of differentiation. In making these inquiries, the course will pay attention to the intersectional nature of race, gender, and sexuality and to strategic performances of identity by marginalized groups.

POLS UN3528 New and Old Forms of Political Protest. 3 points.
This course will introduce the students to the important topic of political protest. Each week we will address different aspects of the phenomenon: from the determinant to the actors and strategies of protest. We will discuss how the forms of protest have changed and the current role of the internet in general and social media in particular. Finally, we will discuss the role of the state and state repression, in particular censorship in the dynamics of protest. Since this is a comparative politics course, we will cover a range of different countries, including the United States, as well as both democratic and authoritarian regimes.

POLS UN3623 Ending War & Building Peace. 3 points.
This course provides an introduction to the politics of war termination and peace consolidation. The course examines the challenges posed by ending wars and the process by which parties to a conflict arrive at victory, ceasefires, and peace negotiations. It explores how peace is sustained, why peace lasts in some cases and breaks down in others and what can be done to make peace more stable, focusing on the role of international interventions, power-sharing arrangements, reconciliation between adversaries, and reconstruction.

PHIL UN3752 Philosophy of Law. 3 points.
This course explores philosophical reflection on the relationship between law, society and morality. We discuss the nature of law, the nature of legal reasoning, the relationship between law and social
policy, and central concepts in civil and criminal law. Readings are
drawn from such sources as the natural law tradition, legal positivism,
legal realism, and Critical Legal Theory. Readings will be supplemented
by analysis of classic cases.

**POLS BC3810 *Colloquium on Aid, Politics & Violence in Africa. 4 points.***
Prerequisites: POLS UN1601 or the equivalent. Admission by
application through the Barnard department only.
Explores the concepts, theoretical traditions and debates around
development and humanitarian aid, focusing on the relationships
between aid, politics, and violence. It looks at the political and military
impacts of aid, the linkage between humanitarian aid and conflict
resolution, and aid's contribution to perpetuating subtle forms of
domination. (Cross-listed by the Afrikan Studies and the Human
Rights Programs.)

**ANTH UN3878 Neoliberal Urbanism and the Politics of Exclusion. 4 points.***
Enrollment limit is 20.
This seminar examines the impact of neo-liberal strategies and
practices of urban development and governance on contemporary
American cities with special emphasis on the dividing practices
that have led to the segregation, stigmatization and exclusion of
urbanites on the basis of class, race, sex/gender and other power-
laden ascriptions of difference and pathology. We will situate the
formative period of neoliberal urbanism in the urban renewal or "slum
clearance" programs of the 1950s and 1960s-initiatives that registered
post-war anxieties concerning civil defense, urban disinvestment
and growing populations of racial-cum-ethnic "minorities." Through
a reading of key anthropological ethnographies and other literature
described across disciplines, we will examine topics including: deindustrialization
and the construction of the inner city and "ghetto underclass," the
political politics of neo-liberal governance, the privatization and policing of
public space, gated communities, gentrification and socioeconomic
polarization, and homelessness.

Prerequisites: Sophomore Standing, SOCI BC1003 or permission of the
instructor. Enrollment limited to 20 students.
Post-1965 immigration in the U.S. has prompted conflicts between
new immigrant groups and established racial and ethnic groups. This
seminar explores ethnic conflict and unrest that takes place in the
streets, workplace, and everyday social life. Focus is on sociological
theories that explain the tensions associated with the arrival of new
immigrants.

**SOCI UN3915 Stigma and Discrimination. 4 points.***
This course considers stigma and discrimination as general processes
that apply to a broad range of phenomena, from mental illness
to obesity to HIV/AIDS to racial groups. We will use a conceptual
framework that considers power and social stratification to be central
to stigma and discrimination. We will focus on both macro- and micro-
level social processes and their interconnections, and we will draw on
literature from both sociology and psychology.
WMST UN3915 Gender and Power in Transnational Perspective. 4 points.
Enrollment limited to 15.

Prerequisites: Instructor approval required
Considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist movements that have emerged to address contemporary gendered inequalities. Topics include political economy, global care chains, sexuality, sex work and trafficking, feminist politics, and human rights.

If it is a small world after all, how do forces of globalization shape and redefine both men’s and women’s positions as both workers and political subjects? And, if power swirls everywhere, how are transnational power dynamics reinscribed in gendered bodies? How is the body represented in discussions of the political economy of globalization? These questions will frame this course by highlighting how gender and power coalesce to impact the lives of individuals in various spaces including workplaces, the home, religious institutions, refugee camps, the government, and civil society, and human rights organizations. We will use specific sociological and anthropological case studies, to look at how various regimes of power operate to constrain individuals as well as give them new spaces for agency. This course will enable us to think transnationally, historically, and dynamically, using gender as a lens through which to critique relations of power and the ways that power informs our everyday lives and identities.

CSER UN3924 Latin American and Latina/o Social Movements. 4 points.
In Latin America, a wave of new popular social movements have been transforming politics and social reality. In the United States, latino/as are building on decades of organizing and demographic growth to claim a new public persona and challenge their marginal status. What are the significant areas of political action, and how can we understand them? What claims can those disenfranchised for reasons of race, class, or national origin make on societies? Indigenous survival
movements in Brazil, multi-ethnic electoral alliances in Bolivia, growing Afro-Colombian assertion, Dominican community organizing in New York City, and poetic post-marxist guerillas in Mexico are just a few of the new forms of social activism that are transforming class, ethnic identity, and citizenship throughout the Americas, and combating the dominance of free-market social and economic policies. We will discuss a number of important social movements throughout the region, while developing tools for understanding social movements and their possibilities. This class is designed to give you an opportunity to do independent research; as a result, it will demand your intensive engagement, and your willingness both to master the information and tools we go over in class, and to pursue a specific topic of your own choosing. Students will all write a term paper based on independent research.

POLS UN3930 Constitutional Law Seminar. 4 points.

Prerequisites: the instructor’s permission.

This seminar explores major features of U.S. constitutional law through close examination of selected decisions of the U.S. Supreme Court. Through student discussion and some lecturing, the seminar addresses issues arising from the Constitution’s allocation of power among the three branches of government; the allocation of powers between the National and State governments, including, in particular, the scope of Congress’ regulatory powers; and the protection of the individual from arbitrary and discriminatory government conduct, including the protections of the Fifth, Fourteenth and Fifteenth Amendments against unequal treatment based on race, gender and sexual orientation, the evolution of the concept of liberty from its protection of economic interests before the New Deal to its current role in protecting individual autonomy and privacy, and some aspects of the First Amendment’s protection of freedom of speech and press. More generally the seminar aims to enhance understanding of some main aspects of our constitutional tradition and the judicial process by which it is elaborated.

ANTH BC3932 Climate Change, Global Migration, and Human Rights in the Anthropocene. 4 points.

While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third, the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific. Human Rights elective.

SOCI UN3937 Sociology of Human Rights. 4 points.

Sociology came to the study of human rights much later than law, philosophy, or political science. In this course, you'll learn (1) what constitutes a sociology of human rights and (2) what sociology, its classics, and its diverse methods bring to the empirical study and theory of human rights.

We'll explore the history, social institutions and laws, ideas, practices, and theories of human rights. We'll become familiar with the social
actors, social structures, and relationships involved in practices such
as violation, claims-making, advocacy, and protection. We'll consider
how social, cultural, political, and economic forces affect human rights
issues.

We'll learn about the questions sociologists ask, starting with the most
basic (but far from simple) question, "what is a human right?"

We'll tackle key debates in the field, considering – for instance –
whether human rights are universal and how human rights relate to
cultural norms/values, national sovereignty, and national security.

Finally, we'll apply the concepts we've learned to a wide range of issues
(ex: how racial, ethnic, gender, and other social inequalities relate to
human rights), rights (ex: LGBTQ rights, the rights of laborers, the rights
of refugees), and cases (ex: enslavement, the separation of children
from their families, circumcision, sterilization, the use of torture). We'll
consider human rights cases in the United States and across the
globe, and how events and actions in one place relate to human rights
violations in another.

### CSER UN3940 Comparative Study of Constitutional Challenges Affecting African, Latino, and Asian American Communities. 4 points.

This course will examine how the American legal system decided
constitutional challenges affecting the empowerment of African,
Latino, and Asian American communities from the 19th century to the
present. Focus will be on the role that race, citizenship, capitalism/
labor, property, and ownership played in the court decision in the
context of the historical, social, and political conditions existing at
the time. Topics include the denial of citizenship and naturalization
to slaves and immigrants, government sanctioned segregation, the
struggle for reparations for descendants of slavery, and Japanese
Americans during World War II.

### SOCI UN3960 Law, Science, and Society. 4 points.

This course addresses basic contemporary social issues from several
angles of vision: from the perspective of scientists, social scientists,
legal scholars, and judges. Through the use of case studies, students
will examine the nature of theories, evidence, "facts," proof, and
argument as found in the work of scientists and scholars who have
engaged the substantive issues presented in the course.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be
allowed to register with the instructor's permission.

This course explores the centrality of colonialism in the making of
the modern world, emphasizing cross-cultural and social contact,
exchange, and relations of power; dynamics of conquest and
resistance; and discourses of civilization, empire, freedom, nationalism,
and human rights, from 1500 to 2000. Topics include pre-modern
empires; European exploration, contact, and conquest in the new world;
Atlantic-world slavery and emancipation; and European and Japanese
colonialism in Asia, Africa, and the Middle East. The course ends with
a section on decolonization and post-colonialism in the period after
World War II. Intensive reading and discussion of primary documents.

WMST GU4000 Genealogies of Feminism. 4 points.
The rights of women and sexual minorities have been central to feminist theory and activism. What is the genealogy of "rights talk"? What is its feminist genealogy? As the liberal language of rights has become hegemonic, in particular through international instruments that have linked women's and sexual rights to human rights and as liberal reform goes global, what is hidden from view? What understandings are foreclosed? What politics are blocked? This course will examine these key questions by exploring feminist and other critiques of liberal paradigms; considering alternative languages and practices for emancipation, and reflecting on assumptions about the human embedded in liberalism, including the idea of human development and capability. We will track the issues by focusing in particular on changing approaches to violence against women (VAW) and gender based violence (GBV).

ANTH GU4118 Settler Colonialism in North America. 3 points.
Enrollment limited to 20 and instructor’s permission. Upper level undergrads with background in poli theory and anthropological theory

This course examines the relationship between colonialism, settlement and anthropology and the specific ways in which these processes have been engaged in the broader literature and locally in North America. We aim to understand colonialism as a theory of political legitimacy, as a set of governmental practices and as a subject of inquiry. Thus we will re-imagine North America in light of the colonial project and its ? technologies of rule? such as education, law and policy that worked to transform Indigenous notions of gender, property and territory. Our case studies will dwell in several specific areas of inquiry, among them: the Indian Act in Canada and its transformations of gender relations, governance and property, the residential and boarding school systems in the US and Canada, the murdered and missing women in Juarez and Canada and the politics of allotment in the US. Although this course will be comparative in scope, it will be grounded heavily within the literature from Native North America.

WMST W4307 Sexuality and the Law. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Because this seminar emphasizes weekly discussion and examination of the readings, enrollment is strictly limited to 20 students. Please read and follow the updated instructions: 1) Interested students must write a 50-100 word essay answering the following question: "What background, experience or expertise do you bring to the discussion of Sexuality and the Law that will help inform and challenge the other 19 students in the class?"; 2) Include the following: your name, institution you are graduating from, year of graduation, declared major, and whether you are working towards a Women's Studies major or minor; 3) Send your information and essay through email with the subject line "Barnard Sexuality & the Law"; 4) Send your email to Riya Ortiz, WS Department Assistant, at sortiz@barnard.edu no later than Wednesday, September 1, 2010.

The final list of students who are registered for the course will be announced on Friday, September 3, 12 pm. Classes start on Monday, September 13. (Note: Students who have registered for the course must also submit the essay to guarantee their registration).

CSER GU4340 Visionary Medicine: Racial Justice, Health and Speculative Fictions. 4 points.
In Fall 2014, medical students across the U.S. staged die-ins as part of the nationwide #blacklivesmatter protests. The intention was to create a shocking visual spectacle, laying on the line “white coats for black lives.” The images were all over social media: students of all colors, dressed in lab coats, lying prone against eerily clean tile floors, stethoscopes in pockets, hands and around necks. One prone
student held a sign reading, "Racism is Real." These medical students’ collective protests not only created visual spectacle, but produced a dynamic speculative fiction. What would it mean if instead of Michael Brown or Eric Garner or Freddie Gray, these other, more seemingly elite bodies were subjected to police violence? In another viral image, a group of African American male medical students from Harvard posed wearing hoodies beneath their white coats, making clear that the bodies of some future doctors could perhaps be more easily targeted for state-sanctioned brutality. “They tried to bury us,” read a sign held by one of the students, “they didn’t realize we were seeds.” Both medicine and racial justice are acts of speculation; their practices are inextricable from the practice of imagining. By imagining new cures, new discoveries and new futures for human beings in the face of illness, medicine is necessarily always committing acts of speculation. By imagining ourselves into a more racially just future, by simply imagining ourselves any sort of future in the face of racist erasure, social justice activists are similarly involved in creating speculative fictions. This course begins with the premise that racial justice is the bioethical imperative of our time. It will explore the space of science fiction as a methodology of imagining such just futures, embracing the work of Asian- and Afrofuturism, Cosmos Latinos and Indigenous Imaginaries. We will explore issues including Biocolonialism, Alienation, nation, Transnational Labor and Reproduction, the Borderlands and Other Diasporic Spaces. This course will be seminar-style and will make central learner participation and presentation. The seminar will be interdisciplinary, drawing from science and speculative fictions, cultural studies, gender studies, narrative medicine, disability studies, and bioethics. Ultimately, the course aims to connect the work of science and speculative fiction with on the ground action and organizing.

**MDES GU4349 Concentration Camps from Cuba to East Asia. 3 points.**

Forcibly moving civilians to designated areas as a wartime measure has constituted a widely practiced military strategy for centuries. In the late 19th and early 20th centuries, colonial powers increasingly provided more structure and organization to these policies of relocation and internment in the Americas, Africa, and East Asia. This course provides a social history of civilian internment and mass murder from late-19th century colonial cases to World War II.

Through case studies of the Spanish-Cuban war, the South African War, the Philippines-American War, the genocide of the Herrero and Nama in Southwest Africa, the Armenian Genocide, and the Holocaust, the course traces the evolution of the concentration camp from a counter-insurgency strategy in wartime to a weapon of mass murder. The course also examines the internment of Japanese Americans, and the Japanese “comfort stations” in comparative perspective.

**POLS GU4409 Political Activism and Social Movements. 3 points.**

How do ordinary citizens participate in democratic politics? The course examines main concepts in the comparative study of political participation and social and political movements to address this question. The first part of the course focuses on normative and methodological aspects related to the study of political activism. In this part, we examine the role that citizens’ political activism plays in democratic politics and look at how these normative views are reflected in the methods used to study political activism (individual and organizational surveys, protest event analysis, participant observation). In the second part of the course, we focus on the individual-level political participation. Here we discuss various modes of political action available to citizens of contemporary democracies and examine micro-, meso-, macro-factors that determine people’s willingness to get involved in politics. The third part of the course focuses on the meso-level of political actors that organize and coordinate people’s political activism – social movements, interest groups and civil society organizations. This part of the course discusses the role of organizational resources, strategic action repertoire, political opportunities and framing and campaigning strategies of mobilizing actors.

**INAF U4420 Oil, Rights and Development. 1 Point.**

Category: EE: GEMP, EE, EE: EPM, HRHP, MIA/MPA: Short Course
Spring 2020 Course Dates: April 17 & 18; IMPORTANT: The final day to drop this course, without receiving a failing grade is 1 WEEK BEFORE THE START OF THE COURSE. Students who have a legitimate and unforeseen emergency after the final drop date, must get written permission from Professor Jenik Radon (jr2218@columbia.edu)

This multi-layered role-playing simulation, based on a fictitious country, allows exploration of the challenges associated with initiation of a major industrial venture in a developing country as regards any or all of the following: macro-economic and political factors; identification of priorities; environmental management; complications arising from ethnic and religious conflicts; health management (including HIV/AIDS); community development aspects; reconciliation of the interests of a wide variety of stakeholders; media management; achievement of the largest possible Circle of Consensus. The simulation is conducted over two consecutive days and some 50 to 80 participants role-play up to twenty separate entities, including an international industrial company and its competitor, government factions, opposition groups, a local community and wide varieties of non-governmental organizations (NGOs) and of media. As in real life, some more general knowledge of the situation is available to all entities, but each one has sole access to information (which may overlap with that of others) which is unique to its own perspective. The emphasis is therefore on sharing and on cooperation to make progress against tight deadlines, on managing information of various degrees of reliability and of balancing conflicting demands. There is no "single right answer" but through the process participants have an opportunity to explore the interplay of a very wide range of factors and develop strategies which are based on a holistic appreciation of the problems involved and on creation of alliances which are by no means obvious at the beginning of the simulation.

**POLS GU4474 Politics, Justice and Human Rights in Southeast Asia. 4 points.**

The course starts from the premise that questions of justice are essentially political, and their study cannot be safely left in the sole hands of lawyers and legal experts. In recent years, a number of important global trends have become evident in the study of justice. These include a growing focus on transitional justice – especially how the transition from an authoritarian regime, or from conditions of
violent conflict, may best be handled. Another important trend is the so-called ‘new constitutionalism’ – efforts to strengthen checks and balances through establishing new institutions such as constitutional courts. A third trend concerns disturbing developments in the use of the criminal justice system for essentially political purposes. This course will explore how these recent trends are being played out in various parts of Southeast Asia.

**ECON GU4480 Gender and Applied Economics. 3 points.**
Prerequisites: ECON UN3211 and ECON UN3213
This course studies gender gaps, their extent, determinants and consequences. The focus will be on the allocation of rights in different cultures and over time, why women’s rights have typically been more limited and why most societies have traditionally favored males in the allocation of resources.

**CSER GU4484 Cultural Rights as Human Rights. 4 points.**
The seminar will situate the historical, legal and political analysis within the context of current debates of human rights theory, cultural relativism, racism, "dialogue among civilizations", the post-September 11th era and the increasingly prominent phenomenon of destruction of cultural heritage. Reviewing international legal instruments, national and international practice, jurisprudence and literature of the last sixty years, and using a multidisciplinary approach, the seminar will explore what cultural rights mean both as individual and as collective human rights, with special references to the rights of minorities and indigenous peoples, women, migrants and other groups, offering a vision for pluricultural democratic and peaceful societies.

**WMST GU4506 Gender Justice. 3 points.**
This course will provide an introduction to the concrete legal contexts in which issues of gender and justice have been articulated, disputed and hesitatingly, if not provisionally, resolved. Readings will cover issues such as Workplace Equality, Sexual Harassment, Sex Role Stereotyping, Work/Family Conflict, Marriage and Alternatives to Marriage, Compulsory Masculinity, Parenting, Domestic Violence, Reproduction and Pregnancy, Rape, Sex Work & Trafficking. Through these readings we will explore the multiple ways in which the law has contended with sexual difference, gender-based stereotypes, and the meaning of equality in domestic, transnational and international contexts. So too, we will discuss how feminist theorists have thought about sex, gender and sexuality in understanding and critiquing our legal system and its norms.

**HIST GU4518 Research Seminar: Columbia and Slavery. 4 points.**
In this course, students will write original, independent papers of around 25 pages, based on research in both primary and secondary sources, on an aspect of the relationship between Columbia College and its colonial predecessor King’s College, with the institution of slavery.
Undergraduate instruction in Italian has long been fully and successfully integrated among the various undergraduate schools-Barnard College, Columbia College, and the School of General Studies. All courses are open to Barnard students. The Advanced Italian courses, though part of the requirement for a major in Italian, are open to all qualified students whose main goal is to improve their competence in the language.

A major in Italian offers the advantages of closely supervised work for a small number of students. Through the senior tutorial, students pursue research in a chosen area of Italian culture under the guidance of a specialist.

The courses given in English have no prerequisites and are open to students majoring in other departments who nevertheless wish to study Italian literature and culture.

The Barnard Italian office is located in 320 Milbank, and the Columbia department is housed in 502 Hamilton.

Graduate courses are open to qualified students with permission of the instructor.

ITAL V1202 Intermediate Italian I. 4 points.

ITAL V2101 Intermediate Italian II. 4 points.
ITAL UN2121 Intensive Intermediate Italian. 6 points.  
Limited enrollment. 
Prerequisites: ITAL UN1102 or the equivalent, with a grade of B+ or higher. 
An intensive course that covers two semesters of Intermediate Italian in one, and prepares students for advanced language and literature study. Grammar, reading, writing, and conversation. Exploration of literary and cultural materials. This course may be used to fulfill the basic foreign language requirement.

ITAL UN2221 Intermediate Conversation. 2 points.  
Prerequisites: ITAL W1112 or sufficient fluency to satisfy the instructor. Corequisites: Recommended: ITAL V1201-V/W1202 or ITAL W1201-W1202. 
Conversation courses may not be used to satisfy the language requirement or fulfill major or concentration requirements. Intensive practice in the spoken language, assigned topics for class discussions, and oral reports. 

Advanced Language and Literature/ Culture Courses 
ITAL UN3333 Introduction To Italian Literature, I. 3 points.  
Prerequisites: Intermediate Italian II ITAL UN2102 or the equivalent. 
UN3333x-UN3333y is the basic course in Italian literature. 

ITAL UN3333: This course, entirely taught in Italian, introduces you to Medieval and early modern Italian literature. It will give you the opportunity to test your ability as a close-reader and discover unusual and fascinating texts that tell us about the polycentric richness of the Italian peninsula. We will read poems, tales, letters, fiction and non-fiction, travel writings and political pamphlets. The great “Three Crowns” - Dante, Petrarch and Boccaccio - as well as renowned Renaissance authors such as Ludovico Ariosto and Niccolò Machiavelli, will show us the main path to discover Italian masterpieces and understand the European Renaissance. But we will also explore China with Marco Polo and the secrets of the Medieval soul diving into the mystical poems by Jacopone da Todi. We will study parody and laughter through the “poesia giocosa” (parodic poetry) by Cecco Angiolieri and the legacy of Humanism through the letters of Poggio Bracciolini. This first overview will allow you to explore Italian literature from its complex and multicultural beginnings to its diffusion across Europe during the Renaissance. 

ITAL UN3334 Introduction To Italian Literature, II. 3 points.  
Prerequisites: ITAL UN2102 or the equivalent. 
UN3334-UN3333 is the basic course in Italian literature. UN3334: Authors and works from the Cinquecento to the present. Taught in Italian. 

ITAL UN3335 Advanced Italian. 3 points.  
Prerequisites: ITALUN2102 or the equivalent. If you did not take Intermediate Italian at Columbia in the semester preceding the current one, you must take the placement test, offered by the Italian Department at the beginning of each semester. 
Written and oral self-expression in compositions and oral reports on a variety of topics; grammar review. Required for majors and concentrators. 

ITAL UN3336 Advanced Italian II: Italian Language & Culture. 3 points.  
Prerequisites: ITAL V3335 
Advanced reading, writing, speaking with emphasis on authentic cultural materials. Topic and semester theme varies. 

ITAL UN4444 Advanced Italian III. 3 points.  
Prerequisites: ITAL V4444 
Intensive reading, writing, speaking, and composition of Italian literature and culture. Topic and semester theme varies. 

ITAL UN4555 Advanced Italian IV. 3 points.  
Prerequisites: ITAL V4555 
Advanced reading, writing, speaking, and composition of Italian literature and culture. Topic and semester theme varies.
ITAL UN3337 Advanced Italian Through Cinema. 3 points.
Prerequisites: ITAL UN3335
Students will develop advanced language competence while analyzing and discussing Italian film comedies and their reflection of changing Italian culture and society. Films by Monicelli, Germi, Moretti, Wertmuller, Soldini and others.

ITAL UN3338 Italiana. Introduction to Italian Culture, the High, the Low, and the In-between. 3 points.
"Italiana. Introduction to Italian Culture, the High, the Low, and the In-between" aims at expanding the students' knowledge of Italian culture and improving and refining their language skills, through writing, reading, speaking, and listening. This is a content based course in which the students familiarize with the most crucial moments of Italian history and are exposed to the issues that are currently debated in Italy, such as national identity, immigration, emigration, homoparental family, and the truthfulness or deceptiveness of the brand Made in Italy. Naturally, considerable attention is given to the distinctive geographical, economical, and cultural traits of Italian regions and their cities. The students apply their communicative skills in Italian by conversing with the Italian students currently registered at Columbia University and by conducting interviews within New York's Italian communities on the subjects studied and discussed in class.

ITAL UN3590 Anatomy of Fantastic Fiction: The Uncanny, the Monstrous and the Other in Modern and Contemporary Italy. 3 points.
What is a fantastic text and what renders it “scandalous” (R. Caillois)? How do nineteenth-century fantastic tropes and motifs survive in present-day narratives? What assumptions about “real” and “reality” do they reveal? How can fantastic representations of the inexplicable, supernatural and inhuman shape and enrich our understanding of the human mind and the world around us? And finally, why are we so fascinated by that which frightens us? In this course, we will address these and many other questions by looking at short stories, films, TV shows and comic books from the Italian and other traditions, from the 19th century to the present day. The course will be loosely chronological, but will be based mainly around thematic units. Through a comparative approach, we will explore the relationship between the fantastic mode and notions such as the uncanny, the repressed and the unconscious. We will look at our primary texts through an interdisciplinary lens spanning literary theory and genre studies to psychoanalysis and reader-response theory. Some primary texts are only available in Italian; however, accommodations can be made for non-Italian speakers.

ITAL UN3642 Road Trips: Travel in Italian Cinema. 3 points.
Explores the representation of national identity in Italian cinema from the Fascist era to the present. Examines how both geography and history are used to construct an image of Italy and the Italians. Special focus on the cinematic representation of travel and journeys between North and South. Films by major neo-realist directors (Rossellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Amelio).

ITAL UN3993 Senior Thesis/Tutorial. 3 points.
Prerequisites: the faculty adviser's permission.
Senior thesis or tutorial project consisting of independent scholarly work in an area of study of the student's choosing, under the supervision of a member of the faculty.

ITAL GU4089 Petrarch's Canzoniere. 3 points.
This course presents a reading of Petrarch's Canzoniere and a theory of the lyric sequence as a genre. In this course we examine Petrarch as he fashions himself authorially, especially in the context of Ovid, Dante, and previous lyric poets. We bring to bear ideas on time and narrative from authors such as Augustine and Ricoeur in order to reconstruct the metaphysical significance of collecting fragments in what was effectively a new genre. We will consider Petrarch's lyric sequence in detail as well as read Petrarch's Secretum and Trionfi. Lectures in English; text in Italian, although students from other departments who can follow with the help of translations are welcome.

ITAL GU4100 Narratives of Modernity. 3 points.
In revisiting two major authors of the Italian modern novel, the course investigates the relation between fiction and the "conditions of modernity" (personal risk, anxiety and lack of control on reality, secularization, to name a few). Special attention will be paid to the response of the novelistic discourse to modernity, and to Italy's peculiarly peripheral position in the modern world. Primary texts will be read in Italian, while theoretical references will be in English.

ITAL GU4395 Fifty Years of Impatience: The Italian Novel between 1950-2000. 3 points.
The course examines some of the most important novels that belong to Italy's period of major social and economic transformations. Only after WWII Italy finally becomes a modern nation, i.e. a republic based on truly universal suffrage, and an industrialized country. Such accelerated progress, though, causes deep social instability and mobility which obviously results in heavy psychological pressures on the people: adaptation becomes crucial and inevitable. Fiction therefore resumes the task to represent such awkwardness of integration into a modern bourgeois society that, contrarily to its European and American counterpart, is extremely tentative and insecure per se, since it's political
identity has extremely precarious grounds. Among other authors, primary
readings include Giuseppe Tomasi di Lampedusa’s The Leopard and Italo
Calvino’s If on a Winter’s Night a Traveler. Primary Readings in Italian.

CLIA 3660 Mafia Movies: From Sicily to The Sopranos. 3 points.
Examines representations of the mafia in American and Italian film and
literature. Special attention to questions of ethnic identity and immigration.
Comparison of the different histories and myths of the mafia in the U.S.
and Italy. Readings includes novels, historical studies, and film criticism.

(NOTE: This is the graduate section of CLIA GU3660 which meets W

Jewish Studies

218 Milbank Hall
212-854-2597

Chair: Beth A. Berkowitz, Professor of Religion and Ingeborg Rennert
Chair of Jewish Studies

Mission

The program in Jewish Studies enables undergraduates to acquire a
thorough knowledge of the most important aspects of Jewish culture,
civilization, and history in an interdisciplinary setting. The purpose of
the program is to help the student identify resources for constructing
rigorously detailed and methodological majors.

The program begins from the assumption that a meaningful major can
be most profitably framed in one of the existing departments-such as,
but not limited to, American Studies, Ancient Studies, Anthropology,
Art History, Asian and Middle Eastern Cultures, Classics, Comparative
Literature, English, History, Music, Religion, Sociology, and Women’s
Studies. The program director would then certify that the subject
matter of that major contains enough interest in Jewish subjects and is
rigorous enough in methodology.

Faculty at Barnard and Columbia who teach courses in Jewish Studies
Include:

Chair: Beth A. Berkowitz, Professor of Religion and Ingeborg Rennert
Chair of Jewish Studies

Professors: Gil Anidjar (Religion), Elisheva Carlebach (History), Yinon
Cohen (Sociology), Jeremy Dauber (Cultural Studies and History), Zohar Goshen (Law),
Achsah Guibbory (English), Billy Fromkess (Religion), Joe Katznelson
(Political Science and History), Jose Moya (History), Seth Schwartz
(History), Michael Stanislavski (History)

Associate Professor: Gil Eyal (Sociology), Rebecca Kobrin (History)

Assistant Professors: Clémence Boulouque (Religion), Tina Fruehauf
(Music)

Lecturer: Naama Harel (Lecturer in Hebrew), Agnieszka Legutko
(Lecturer in Yiddish)

Requirements for the Combined Major

--RELI UN2306 Intro to Judaism
--Five additional courses in Jewish Studies

A complete major in a relevant department is required for a combined
major in Jewish Studies. Where courses in Jewish Studies also satisfy
departmental major requirements, the student must complete at least
three courses in Jewish Studies over and above what is required for
the other major. Students are encouraged to consult the offerings of
other relevant departments and frame a major by centering on the
methodological requirements of that major and utilizing the advising
capacities of that department. Students, especially those who plan
to continue in graduate Jewish Studies of any kind, are strongly
encouraged to seek competence in Hebrew and other languages
which were used by Jews in their particular area of concentration.
Where possible, the courses in Jewish Studies should be taken across
the major areas of Jewish history: Ancient (biblical); Hellenistic and Talmudic; Medieval; and Modern. Besides the six courses specifically in Jewish Studies, students must submit a Senior Thesis or project in the area of Jewish Studies, written in the major department.

For a complete list of faculty and courses visit the Columbia University Institute for Israel and Jewish Studies (http://www.iijs.columbia.edu/).

Requirements for the Minor

~RELI UN2306 Intro to Judaism
~Four additional courses in Jewish Studies

A Jewish Studies minor comprises five courses in Jewish Studies (minimum 15 credits). The five courses must include RELI UN2306 Intro to Judaism as well as at least one seminar. Students are encouraged to distribute their Jewish Studies courses across different disciplines, historical eras, and geographical regions.

Eligible courses include those listed each semester by the Columbia University Institute for Israel and Jewish Studies or that contain a majority of Jewish Studies content (to be determined by the Jewish Studies Chair based on the course syllabus). Departments that normally host Jewish Studies courses include the Institute for Israel and Jewish Studies, Germanic Languages, History, MESASS, Political Science, Religion, Sociology, and Women’s and Gender Studies. Please consult the Columbia University Institute for Israel and Jewish Studies (http://www.iijs.columbia.edu/) for eligible courses.

Three of the five courses must be taken at Barnard/Columbia. Students are encouraged to study Jewish languages such as Hebrew or Yiddish, but only two of the five courses required for the minor may be fulfilled by language courses. All eligible courses must be offered by an accredited academic institution.

Students interested in minoring in Jewish Studies should contact the Chair of Jewish Studies at Barnard. Although Barnard policy allows for students to sign up for the minor through the end of senior year, the Program in Jewish Studies encourages students to sign up early and to consult with the Chair regarding selection of courses and completion of requirements.

Department Assistant: Marsha Peruo

General Information

Students who have special placement problems, or are unclear about their level, should make an appointment with a faculty member or the chair.

Two help rooms, one in 404 Mathematics and one in 333 Milbank, will be open all term (hours will be posted on the door and the online) for students seeking individual help and counseling from the instructors and teaching assistants. No appointments are necessary. However, resources are limited and students who seek individual attention should make every effort to come during the less popular hours and to avoid the periods just before midterm and final exams.

Courses for First-Year Students

The systematic study of Mathematics begins with one of the following alternative sequences:

<table>
<thead>
<tr>
<th>Calculus I, II, III, IV</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH UN1101 Calculus I</td>
</tr>
<tr>
<td>MATH UN1102 Calculus II</td>
</tr>
<tr>
<td>MATH UN1201 Calculus III</td>
</tr>
<tr>
<td>MATH UN1202 Calculus IV</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Honors Math A-B</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH UN1207 Honors Mathematics A</td>
</tr>
<tr>
<td>MATH UN1208 Honors Mathematics B</td>
</tr>
</tbody>
</table>

Credit is allowed for only one of the calculus sequences. The calculus sequence is a standard course in differential and integral calculus. Honors Mathematics A-B is for exceptionally well-qualified students who have strong advanced placement scores. It covers second-year Calculus (MATH UN1201 Calculus III–MATH UN1202 Calculus IV) and MATH UN2010 Linear Algebra, with an emphasis on theory.

Calculus II is NOT a prerequisite for Calculus III, so students who plan to take only one year of calculus may choose between I and II or I and III. The latter requires a B or better in Calculus I and is a recommended option for some majors.

MATH UN2000 An Introduction to Higher Mathematics is a course that can be taken in their first or second year by students with an aptitude for mathematics who would like to practice writing and understanding mathematical proofs.

Placement in the Calculus Sequence

College Algebra and Analytical Geometry is a refresher course for students who intend to take Calculus but do not have adequate background for it.

Advanced Placement: Students who have passed the advanced placement test for Calculus AB with a grade of 4 or 5 or BC with a grade of 4 receive 3 points of credit. Those who passed Calculus BC with a grade of 5 will receive 4 points of credit or 6 points on placing into Calculus III or Honors Math A and completing with a grade of C or better.

Calculus I, II, III: Students who have not previously studied calculus should begin with Calculus I. Students with 4 or higher on the Calculus AB or BC advanced placement test may start with Calculus II. Students with 5 on the Calculus BC test should start with Calculus III.

Honors Mathematics A: Students who have passed the Calculus BC advanced placement test with a grade of 5, and who have strong mathematical talent and motivation, should start with Honors Mathematics A. This is the most attractive course available to well-prepared, mathematically talented first-year students, whether or not they intend to be mathematics majors. Students who contemplate taking this course should consult with the instructor. If this is not possible ahead of time, they should register and attend the first class.

Computer Science

Select at least one of the following programming courses:

COMS W1002 Computing in Context
COMS W1004 Introduction to Computer Science and Programming in Java (preferred)
COMS W1005 Introduction to Computer Science and Programming in MATLAB
COMS W1007 Honors Introduction to Computer Science

Possible further courses selected from the following:

Other classes from the Computer Science Core
COMS W3203 Discrete Mathematics: Introduction to Combinatorics and Graph Theory
COMS W3210 Scientific Computation
ENGI E1006 Introduction to Computing for Engineers and Applied Scientists

More generally, electives may be any course with a prerequisite of at least one semester of Calculus, Statistics or Computer Science with the prior approval of the Mathematics Chair.

The Capstone Experience can be fulfilled by a significant thesis written under the supervision of faculty of any one of the three departments or by the Undergraduate Seminar in Mathematics.

For a major in Mathematics-Statistics: 14 courses:

STAT GU4202 Stochastic Processes for Finance
STAT GU4264 STOCHASTIC PROCESSES-APPLIC
STAT GU4265 Stochastic Methods in Finance

Computer Science

Select one of the following courses:

COMS W1004 Introduction to Computer Science and Programming in Java
COMS W1005 Introduction to Computer Science and Programming in MATLAB
COMS W1007 Honors Introduction to Computer Science

Electives

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

Students should plan to include a senior thesis or the Undergraduate Seminar in Mathematics in their program, in consultation with their advisors.

Note: Students must obtain approval from an adviser in each of the two departments before selecting electives. Students should take MATH UN2010 Linear Algebra in the second semester of the second year.

For a major in Mathematics-Computer Science 15 courses:

Mathematics

Four courses in calculus or Honors Mathematics A-B, including Advanced Placement Credit, and the 3 following courses:

MATH UN2010 Linear Algebra (also satisfied by Honors Math A-B)
MATH GU4041 Introduction to Modern Algebra I
MATH UN3951 Undergraduate Seminars in Mathematics I (at least one term)

or MATH UN3952 Undergraduate Seminars in Mathematics II

Computer Science

COMS W3157 Advanced Programming
COMS W3203 Discrete Mathematics: Introduction to Combinatorics and Graph Theory
COMS W3261 Computer Science Theory
CSEE W3827 Fundamentals of Computer Systems

Note A: AP Computer Science with a grade of 4 or 5 or similar experience (e.g., COMS W1004) is a prerequisite for COMS W1007

Electives: 2 of the following:

CSOR W4231 Analysis of Algorithms I
COMS W4241 Numerical Algorithms and Complexity
MATH UN3020 Number Theory and Cryptography
MATH BC2006 Combinatorics
MATH GU4061 Introduction To Modern Analysis I
MATH UN2500 Analysis and Optimization
MATH UN3007 Complex Variables
MATH UN3386 Differential Geometry
MATH GU4051 Topology

Students seeking to pursue a Ph.D. program in either discipline are urged to take additional courses, in consultation with their advisers.

For a major in Economics and Mathematics, see the catalogue.
### Requirement for the Minor in Mathematics

For a minor in Mathematics or Applied Mathematics: Six courses from any of the courses offered by the department except MATH UN1003 College Algebra and Analytic Geometry, MATH UN1101 Calculus I / MATH UN1102 Calculus II. Some cognate courses are also acceptable with prior approval from the department chair.

### Requirements for the Minor in Mathematical Sciences

The minor in Mathematical Sciences comprises 6 courses, at least two from Mathematics and one from each of Statistics and Computer Science. There should be a minimum of three courses in Statistics and Computer Science. Eligible courses are any listed in the Mathematical Sciences Major with the exception of Calculus I and II.

**MATH UN1003 College Algebra and Analytic Geometry. 3 points.**

Prerequisites: score of 550 on the mathematics portion of the SAT completed within the last year or the appropriate grade on the General Studies Mathematics Placement Examination. Columbia College students do not receive any credit for this course and must see their CSA advising dean. For students who wish to study calculus but do not know analytic geometry. Algebra review, graphs and functions, polynomial functions, rational functions, conic sections, systems of equations in two variables, exponential and logarithmic functions, trigonometric functions and trigonometric identities, applications of trigonometry, sequences, series, and limits.

MATH BC2001 Perspectives in Mathematics. 1 point.
Prerequisites: some calculus or the instructor’s permission. Intended as an enrichment to the mathematics curriculum of the first years, this course introduces a variety of mathematical topics (such as three dimensional geometry, probability, number theory) that are often
not discussed until later, and explains some current applications of mathematics in the sciences, technology and economics.

**MATH UN2030 Ordinary Differential Equations. 3 points.**
Not to be taken in addition to Math V1207-Math V1208.

**MATH BC2006 Combinatorics. 3 points.**
Corequisites: MATH V2010 is helpful as a corequisite, but not required. Honors-level introductory course in enumerative combinatorics. Pigeonhole principle, binomial coefficients, permutations and combinations. Polya enumeration, inclusion-exclusion principle, generating functions and recurrence relations.

**MATH UN2010 Linear Algebra. 3 points.**
Prerequisites: MATH UN1201 or the equivalent.
Matrices, vector spaces, linear transformations, eigenvalues and eigenvectors, canonical forms, applications. (SC)

**MATH 2030 Number Theory and Cryptography. 3 points.**
Prerequisites: one year of calculus. Congruences. Primitive roots. Quadratic residues. Contemporary applications.

**MATH BC2006 Combinatorics. 3 points.**
Prerequisites: MATH UN1201 or the equivalent.

**MATH UN2010 Linear Algebra. 3 points.**
Prerequisites: MATH UN1201 or the equivalent.
Matrices, vector spaces, linear transformations, eigenvalues and eigenvectors, canonical forms, applications. (SC)

**MATH V2030 Analysis and Optimization. 3 points.**
Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent and MATH UN2010.

**MATH UN2010 Linear Algebra. 3 points.**
Prerequisites: MATH UN1201 or the equivalent.
Matrices, vector spaces, linear transformations, eigenvalues and eigenvectors, canonical forms, applications. (SC)

**MATH UN3020 Analysis and Optimization. 3 points.**
Prerequisites: MATH UN1102 and MATH UN1201 or the equivalent and MATH UN2010.

**MATH UN3007 Complex Variables. 3 points.**
Prerequisites: MATH UN1202 An elementary course in functions of a complex variable. Fundamental properties of the complex numbers, differentiability, Cauchy-Riemann equations. Cauchy integral theorem. Taylor and Laurent series, poles, and essential singularities. Residue theorem and conformal mapping. (SC)

**MATH UN3007 Complex Variables. 3 points.**
Prerequisites: MATH UN1202 An elementary course in functions of a complex variable.
Fundamental properties of the complex numbers, differentiability, Cauchy-Riemann equations. Cauchy integral theorem. Taylor and Laurent series, poles, and essential singularities. Residue theorem and conformal mapping. (SC)

**MATH UN3007 Complex Variables. 3 points.**
Prerequisites: MATH UN1202 An elementary course in functions of a complex variable.
Fundamental properties of the complex numbers, differentiability, Cauchy-Riemann equations. Cauchy integral theorem. Taylor and Laurent series, poles, and essential singularities. Residue theorem and conformal mapping. (SC)
MATH UN3025 Making, Breaking Codes. 3 points.
Prerequisites: (MATH UN1101 and MATH UN1102 and MATH UN1201) and MATH UN2010.
A concrete introduction to abstract algebra. Topics in abstract algebra used in cryptography and coding theory.

MATH UN3027 Ordinary Differential Equations. 3 points.
Prerequisites: MATH UN102 and MATH UN1201 or the equivalent.

MATH UN3028 Partial Differential Equations. 3 points.
Prerequisites: MATH UN3027 and MATH UN2010 or the equivalent. Introduction to partial differential equations. First-order equations. Linear second-order equations; separation of variables, solution by series expansions. Boundary value problems.

MATH UN3050 Discrete Time Models in Finance. 3 points.
Prerequisites: (MATH UN1102 and MATH UN1201) or (MATH UN101 and MATH UN1102 and MATH UN1201) and MATH UN2010.
Elementary discrete time methods for pricing financial instruments, such as options. Notions of arbitrage, risk-neutral valuation, hedging, term-structure of interest rates.

MATH UN3386 Differential Geometry. 3 points.
Prerequisites: MATH UN1202 or the equivalent. Local and global differential geometry of submanifolds of Euclidean 3-space. Frenet formulas for curves. Various types of curvatures for curves and surfaces and their relations. The Gauss-Bonnet theorem.
MATH UN3952 Undergraduate Seminars in Mathematics II. 3 points.
Prerequisites: two years of calculus, at least one year of additional mathematics courses, and the director of undergraduate studies' permission.

The subject matter is announced at the start of registration and is different in each section. Each student prepares talks to be given to the seminar, under the supervision of a faculty member or senior teaching fellow. Prerequisite: two years of calculus, at least one year of additional mathematics courses, and the director of undergraduate studies’ permission.

MATH V3997 Supervised Individual Research. 3 points.
Prerequisites: the written permission of the faculty member who agrees to act as a supervisor, and the director of undergraduate studies’ permission.

For specially selected mathematics majors, the opportunity to write a senior thesis on a problem in contemporary mathematics under the supervision of a faculty member.

MATH V3998 Supervised Individual Research. 3 points.
Prerequisites: the written permission of the faculty member who agrees to act as a supervisor, and the director of undergraduate studies’ permission.

For specially selected mathematics majors, the opportunity to write a senior thesis on a problem in contemporary mathematics under the supervision of a faculty member.

MATH UN1003 College Algebra and Analytic Geometry. 3 points.
Prerequisites: score of 550 on the mathematics portion of the SAT completed within the last year or the appropriate grade on the General Studies Mathematics Placement Examination. Columbia College students do not receive any credit for this course and must see their CSA advising dean. For students who wish to study calculus but do not know analytic geometry. Algebra review, graphs and functions, polynomial functions, rational functions, conic sections, systems of equations in two variables, exponential and logarithmic functions, trigonometric functions and trigonometric identities, applications of trigonometry, sequences, series, and limits.

**MATH GU4065 Honors Complex Variables. 3 points.**
Prerequisites: (MATH UN1207 and MATH UN1208) or MATH GU4061
A theoretical introduction to analytic functions. Holomorphic functions, harmonic functions, power series, Cauchy-Riemann equations, Cauchy’s integral formula, poles, Laurent series, residue theorem. Other topics as time permits: elliptic functions, the gamma and zeta function, the Riemann mapping theorem, Riemann surfaces, Nevanlinna theory.

**MATH W4071 Introduction to the Mathematics of Finance. 3 points.**
Prerequisites: MATH V1202, MATH V3027, STAT W4150, SEIOW4150, or their equivalents.
The mathematics of finance, principally the problem of pricing of derivative securities, developed using only calculus and basic probability. Topics include mathematical models for financial instruments, Brownian motion, normal and lognormal distributions, the Black-Scholes formula, and binomial models.

**MATH GU4081 Introduction to Differentiable Manifolds. 3 points.**
Prerequisites: (MATH GU4051 or MATH GU4061) and MATH UN2010

**MATH GU4155 Probability Theory. 3 points.**
Prerequisites: MATH GU4061 or MATH UN3007

**MATH W4391 Intro to Quantum Mechanics: An Introduction for Mathematicians and Physicists I. 3 points.**
CC/GS: Partial Fulfillment of Science Requirement
Prerequisites: MATH V1202 or the equivalent and MATH V2010.
This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as well as their physical motivations and consequences. It is meant for undergraduates with no previous formal training in quantum theory. The measurement problem and issues of non-locality will be stressed.

**MATH W4392 Quantum Mechanics: An Introduction for Mathematicians and Physicists II. 3 points.**
Not offered during 2019-20 academic year.
Prerequisites: MATH V1202 or the equivalent, MATH V2010, and MATH W4391.
This course will focus on quantum mechanics, paying attention to both the underlying mathematical structures as well as their physical motivations and consequences. It is meant for undergraduates with no previous formal training in quantum theory. The measurement problem and issues of non-locality will be stressed.

### Cross-Listed Courses

**Computer Science**

**COMS S3251 Computational Linear Algebra. 3 points.**
Not offered during 2019-20 academic year.
Prerequisites: two terms of calculus. Computational linear algebra, solution of linear systems, sparse linear systems, least squares, eigenvalue problems, and numerical solution of other multivariate problems as time permits.

**COMS W4203 Graph Theory. 3 points.**
Lect: 3.
Prerequisites: (COMS W3203)
General introduction to graph theory. Isomorphism testing, algebraic specification, symmetries, spanning trees, traversability, planarity, drawings on higher-order surfaces, colorings, extremal graphs, random graphs, graphical measurement, directed graphs, Burnside-Polya counting, voltage graph theory.

**COMS W3203 Discrete Mathematics: Introduction to Combinatorics and Graph Theory. 3 points.**
Lect: 3.
Prerequisites: Any introductory course in computer programming. Logic and formal proofs, sequences and summation, mathematical induction, binomial coefficients, elements of finite probability, recurrence relations, equivalence relations and partial orderings, and topics in graph theory (including isomorphism, traversability, planarity, and colorings).
Industrial Engineering and Operations Research
CSOR E4010 Graph Theory: A Combinatorial View. 3 points.

Prerequisites: Linear Algebra, or instructor's permission.
Graph Theory is an important part of the theoretical basis of operations research. A good understanding of the basic fundamentals of graph theory is necessary in order to apply the theory successfully in the future. This is an introductory course in graph theory with emphasis on its combinatorial aspects. It covers basic definitions, and some fundamental concepts in graph theory and its applications. Topics include trees and forests graph coloring, connectivity, matching theory and others. This course will provide a solid foundation for students in the IEOR department, on which further courses may build.

Medieval & Renaissance Studies
312 Milbank
212-854-5321

Mission
The Medieval and Renaissance program at Barnard College is designed to enable students to acquire both a broad knowledge of the European Middle Ages and/or Renaissance and a richer and more detailed understanding in one area of concentration chosen by the student. Students can elect to concentrate in one of the following disciplines: art history, history, literature, philosophy, romance languages and cultures, music, or religion. We encourage our students to take advantage of relevant courses taught at Columbia as well as at Barnard, with the result that more than sixty courses are currently listed as approved for the major.

Student Learning Outcomes
Students who graduate with a major in Medieval and Renaissance Studies will be able to attain the following outcomes:

- Demonstrate a broad knowledge of the European Middle Ages and/or Renaissance.
- Show they also have in-depth knowledge in their chosen concentration of study.
- Create an original research project centered in primary sources.

This program is supervised by the Committee on Medieval and Renaissance Studies:

- **Director:** Rachel Eisendrath (English)
- **Professors:** Christopher Baswell (English), Elizabeth Castelli (Religion), Achsah Guibbory (English), Kim Hall (English), Joel Kaye (History), Keith Moxey (Art History), Peter Platt (English), Anne Lake Prescott (English), Deborah Valenze (History)
- **Assistant Professors:** Orlando Bentancor (Spanish and Latin American Cultures)
- **Senior Lecturer:** Laurie Postlewate (French), Timea Szell (English)

Columbia University Faculty:

- **Professors:** Peter Awn (Religion), Teodolinda Barolini (Italian), Susan Crane (English), Kathy Eden (English), Carmela Franklin (Classics), Jean Howard (English), Martha Howell (History), Christia Mercer (Philosophy), Stephen Murray (Art History), David Rosand (Art History), James Shapiro (English), Robert Somerville (Religion), Paul Strohm (English),

Associate Professor: Jo Ann Cavallo (Italian), Julie Crawford (English), Matthew Jones (History), Holger Klein (Art History), Adam Kosto (History), Pamela Smith (History)
Assistant Professors: Patricia Dailey (English), Molly Murray (English), Neslihan Senocak (History)

Requirements for the Major
Major programs are established individually with a concentration in one of these disciplines: art history, history, literature, philosophy, romance philology, music, or religion. Each student, after consultation with the chair, chooses an adviser in her area of concentration who guides her in developing a sequence of courses to be taken in the field.

A minimum of 11 courses are required for the major in Medieval and Renaissance Studies:

- Five courses in the area of concentration;
- Two history courses for students who are not concentrating in history;
- Two courses in the other disciplines mentioned above for those who are;
- Two electives in areas outside the concentration, to be chosen in consultation with the adviser; and
- MEDR BC3998 Directed Research for the Senior Project and MEDR BC3999 Directed Research for the Senior Project, a two-semester program of interdisciplinary research leading to the writing of the senior essay.

(In some cases, a senior seminar in one of the departments may be substituted for MEDR BC3998 Directed Research for the Senior Project or MEDR BC3999 Directed Research for the Senior Project.)

Students are required to write an interdisciplinary senior essay based on two semesters of research in their field of concentration and in another discipline, carried out under the supervision of their area adviser and another from the second discipline. The choice of topic for this senior project and the appointment of a second adviser are determined in consultation with the area adviser and the chair of the program.

In addition to the language used to fulfill the general four-semester requirement for graduation, the student must have completed two semesters of a second language (or the equivalent) relevant to her area of concentration.

The following courses represent only a sample of those that can be taken to satisfy the program requirement. Other relevant courses may be taken with the permission of the chair.

No minor is offered in Medieval and Renaissance Studies.

MEDR BC3998 Directed Research for the Senior Project. 4 points.
Two semesters of supervised interdisciplinary research in Medieval or Renaissance Studies terminating in the writing of a senior essay. The program of research is determined in consultation with the chair and under the guidance of the area adviser. It is supervised by the latter and an adviser from the second discipline involved in the project.

MEDR BC3999 Directed Research for the Senior Project. 4 points.
Two semesters of supervised interdisciplinary research in Medieval or
Renaissance Studies terminating in the writing of a senior essay. The
program of research is determined in consultation with the chair and
under the guidance of the area adviser. It is supervised by the latter and
an adviser from the second discipline involved in the project.

Cross-Listed Courses

Art history and Archaeology
AHIS W3230 Medieval Architecture. 3 points.
Not offered during 2019-20 academic year.

AHIS W3407 Early Italian Art. 3 points.
Discussion Section Required
Not offered during 2019-20 academic year.

An introduction to the origins and early development of Italian
Renaissance painting as a mode of symbolic communication between
1300-1600. Artists include Giotto, Fra Angelico, Masaccio, Mantegna,
and Leonardo da Vinci. Emphasis on centers of painting in Florence,
Siena, Assisi, Venice and Rome.

Classics

LATN UN3033 Medieval Language and Literature. 3 points.
Prerequisites: four semesters of college Latin or the instructor’s
permission. This survey focuses on translation, grammatical analysis, and
discussion of the literary and cultural contexts of medieval Latin
prose and poetry. It includes widely read texts by major authors (e.g.
Augustin, Boethius, Abelard and Heloise, Bernard of Clairvaux, Petrarch)
as well as lesser-known anonymous pieces (e.g. love lyric from the
Cambridge Songs and the Carmina Burana, poetic satire from a rotulus,
and a novel, the Historia Apolloni).

LATN GU4152 Medieval Latin Literature. 3 points.
Prerequisites: the instructor’s permission.
This course covers various topics in Medieval Latin Literature.

English & Comparative Literature

ENGL UN3336 Shakespeare II. 3 points.
(Lecture). Shakespeare II examines plays from the second half of
Shakespeare’s dramatic career, primarily a selection of his major
tragedies and his later comedies (or “romances”).

ENGL BC3154 Chaucer Before Canterbury. 3 points.
Not offered during 2019-20 academic year.

Chaucer’s innovations with major medieval forms: lyric, the
extraordinary dream visions, and the culmination of medieval romance,
Troilus and Criseyde. Approaches through close analysis, and feminist
and historicist interpretation. Background readings in medieval life and
culture.

ENGL BC3155 Canterbury Tales. 3 points.
Not offered during 2019-20 academic year.

Chaucer as inheritor of late-antique and medieval conventions and
founder of early modern literature and the fiction of character.
Selections from related medieval texts.

ENGL BC3158 Medieval Literature: Literatures of Medieval Britain. 3
points.
BC: Fulfillment of General Education Requirement: Reason and Value
(REA), BC: Fulfillment of General Education Requirement: Literature
(LIT).
Not offered during 2019-20 academic year.

It’s easy to forget that medieval literature wasn’t always old and
“quaint” as it seems to many of us today. For writers and artists of
that era, they were modern, too. But they also imagined their own past
and (like many of us) they often had a nostalgic yearning for that lost
time. This course will explore a number of forms of medieval literature,
mostly British but also some continental, as it explores versions of its
past, and especially the ultimately tragic story of King Arthur. We will
read across many medieval genres, including some little known today,
like lives of saints. But the course will focus on narratives of quest:
heroic, psychological, and erotic. We will also explore some of the often
beautiful medieval manuscripts in which these texts were often copied.
We will read most Middle English texts in the original language; we’ll
study French and Latin texts in translation.

ENGL BC3163 Shakespeare I. 3 points.
A critical and historical introduction to Shakespeare’s comedies,
histories, tragedies, and romances. Please note that you do not need
to take ENGL BC3163: Shakespeare I and ENGL BC3164: Shakespeare II in
sequence; you may take them in any order.

English (Barnard)

ENGL BC3164 Renaissance Epic. 3 points.
The epic tradition raises crucial questions about the interrelationship of
literature and power. In telling the story of war and empire building, how
does epic both promote and also challenge the cause of the winner?
How does epic preserve a space for more lyrical forms of subjectivity?
What does this literary form tell about the role of women, the nameless
majority and the global ‘other’ in the West? In this course, we will trace
the European epic tradition, studying Homer’s Iliad, Virgil’s Aeneid,
Spenser’s The Faerie Queene and Milton’s Paradise Lost. Finally, we will
read a contemporary poet’s reflection on this tradition, Alice Oswald’s
Memorial: An Excavation of the Iliad.

ENGL BC3163 Shakespeare I. 3 points.
Not offered during 2019-20 academic year.

ENGL BC3164 Shakespeare II. 3 points.
Prerequisites: Enrollment limited to 60 students.
Critical and historical introduction to selected comedies, histories,
tragedies, and romances by Shakespeare. Please note that you do not
need to take ENGL BC3163: Shakespeare I and ENGL BC3164: Shakespeare II in
sequence; you may take them in any order.
ENGL BC3165 The Elizabethan Renaissance: The Complete Nondramatic Poetry of Marlowe and Shakespeare. 3 points.
In this course, we will read the complete nondramatic poetry of Christopher Marlowe and William Shakespeare, working closely through sonnets, epyllia (mini epics), and translations. How do Marlowe and Shakespeare put into play inherited and new ideas about history, gender, sexuality, politics, law, God, race, matter, print, and literary form (especially the sonnet)?

ENGL BC3166 Seventeenth-Century Prose and Poetry. 3 points.
Not offered during 2019-20 academic year.

The seventeenth-century produced great lyric poetry exploring love and desire, doubt and faith, sex and God. It was also a century of intellectual, political, and religious revolutions, giving birth to modern ways of thinking. We will read poetry by John Donne, Aemelia Lanyer, George Herbert, Robert Herrick, Andrew Marvell, but we will begin with extended attention to Donne, whose poetry continues to influence contemporary poetry. For science, politics, religion, and philosophy and how they are intertwined, we will read prose by Francis Bacon (on "modern experimental science") and Thomas Browne (on science and faith), Thomas Hobbes (government as the solution to a brutish life) and the radical "Levelers" (early communists), "mad" Margaret Cavendish, and the Quaker Margaret Fell (defense of women's right to preach). Fascinating readings, understood in their historical context with a sense of their current resonance.

ENGL BC3167 Milton. 3 points.
Paradise Lost and selections of Milton's earlier poetry and prose (defenses of free press, divorce, individual conscience, political and religious liberty) read within the context of religious, political, and cultural history (in early modern England and Europe but also, to some extent in America), but with a sense of connection to present issues. Ends with Mary Shelley's Frankenstein as rewriting of Paradise Lost.

ENGL BC3169 Renaissance Drama. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 25 students.
This class will examine English drama at the moment when it arose as a major art form. In Renaissance London, astonishingly complex plays emerged that reflected the diverse urban life of the city, as well as the layered and often contradictory inner life of the individual. This poetically rich theater was less concerned with presenting answers, and more with staging questions—about gender, race, religion, literary tradition, love, sex, authority, and class. In this course, we will try to tap into this theater's cosmopolitan, enlivened poetics by studying not only Shakespeare, but also the various other major authors who constituted this literary world: Christopher Marlowe, Ben Jonson, Thomas Dekker, Thomas Middleton, John Webster, and the female playwright Aphra Behn.

ENGL BC3998 Senior Seminars: Human & Other Animal Identities. 4 points.
Prerequisites: Sign up through the "SR Seminar" section of myBarnard. Enrollment limited to Barnard senior English majors.

In this seminar, we will engage in an interdisciplinary study of intersections of human and non-human animal identities in selected literary, philosophical and theoretical texts. We will examine how constructions and representations of non-human animal identities confirm understandings and experiences of human ones, including racialized and gendered identities and study the ways in which non-human identities challenge claims to human exceptionalism. Some of the topics along which the readings will be arranged include liminality, (mis)-recognition, metamorphoses, suffering, as well as love. Readings include Aristotle, Euripides, Ovid, Montaigne, Descartes, Shakespeare, Kafka, Woolf, Morrison, Coetzee, Szymborska, Hughes, Haraway, and Derrida and essays by contemporary scholars such as Kim Hall and Karl Steel. Some class time will be devoted to the process of writing the thesis at all significant critical junctures.

French (Barnard)
FREN BC3021 Major French Texts I. 3 points.
Medieval, Renaissance, and Classical literature in their cultural context. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3023 The Culture of France I. 3 points.
Not offered during 2019-20 academic year.

FREN BC3029 Laughter in the Middle Ages and Renaissance. 3 points.
Not offered during 2019-20 academic year.

Explores both the traditional comic forms of early French literature (farce, sottie, fabliau, burlesque, grotesque) and comedic elements of serious genres such as chanson de geste, saint's lives, and romance. An investigation into the mentalites of the Middle Ages and Renaissance through an understanding of what made people laugh. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3032 Women and Writing in Early Modern France. 3 points.
Examination of cultural and literary phenomena in 15th through 17th century France, focusing on writings by and about women. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3033 Literature of the French Renaissance and the Baroque. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.
Experimentation and discovery in the arts, in science and technology, and in the understanding of the human experience. Explores how the works of French poets, prosateurs, and playwrights reflect both the
vibrancy and splendor of the time, as well as the struggle of an era preoccupied with death and rebirth.

FREN BC3034 French Baroque and Classical Literature. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.

Interdisciplinary exploration of the literature and culture of the Grand Siecle.

History

HIST W4083 Crime and Punishment in the Middle Ages. 4 points.
Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor's permission.

How a society defines crime, and how it deals with the criminals tells us a lot about the moral values, and the political and economic structure of that society, as well as its internal conflicts, superstitions, and fears. Often supposed to be a barbaric community of ignorant unruly men governed by greedy kings and popes, the medieval society in the popular culture is often an inspiration to the grotesque representations of violence and torture. Even an intellectual like Michel Foucault did not hesitate to advance a theory of medieval punishment, albeit a terribly wrong one, as one that focuses on the body and spectacle. This course is designed to trace the origins of the modern criminal legislation and practices to the Middle Ages, some of which were jury trial, public persecution, and prisons. How did these practices come about, and under which social conditions? The focus of the course will be on violent crimes, such as murder, robbery, assault and suicide, and some particularly medieval crimes like sorcery, blasphemy and sodomy. The geographical scope will be limited to England, Italy and France. The class discussions are expected to take the form of collective brainstorming on how the political powers, social classes, cultural values, and religious beliefs affect the development of criminal legislation and institutions. Whenever possible the weekly readings will feature a fair share of medieval texts, including trial records, criminal laws, a manual for trying witches, and prison poetry. Field(s): *MED

HIST W4101 The World We Have Lost: Daily Life in Pre-Modern Europe. 4 points.
Not offered during 2019-20 academic year.

What was daily life like for the "average" European in pre-industrial society? This course will examine the material circumstances of life in Europe from 1400-1800, and will investigate how historians are able to enter into the inner life and mental world of people who lived in past. How did people respond intellectually and emotionally to their material circumstances? The readings and discussions in the course aim to examine such questions, with an eye both to learning about the material conditions of life in pre-modern Europe, and to understanding the techniques by which historians are able to make the imaginative leap back into the mental world of the past. Field(s): *EME

History (Barnard)

HIST BC1062 Introduction to Later Middle Ages: 1050-1450. 4 points.

Social environment, political, and religious institutions, and the main intellectual currents of the Latin West studied through primary sources and modern historical writings.

HIST BC3062 Medieval Economic Life and Thought ca 1000 to 1500. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15.

Traces the development of economic enterprises and techniques in their cultural context: agricultural markets, industry, commercial partnerships, credit, large-scale banking, insurance, and merchant culture. Examines usury and just price theory, the scholastic analysis of price and value, and the recognition of the market as a self-regulating system, centuries before Adam Smith.

HIST BC3064 Medieval Science and Society. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15.

The evolution of scientific thinking from the 12th to the 16th centuries, considering subjects such as cosmology, natural history, quantification, experimentation, the physics of motion, and Renaissance perspective. At every point we link proto-scientific developments to social and technological developments in the society beyond the schools.

HIST BC3360 London: From Great Wen to World City. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15.

Social and cultural history of London from the Great Fire of 1666 to the 1960s. An examination of the changing experience of urban identity through the commercial life, public spaces, and diverse inhabitants of London. Topics include 17th-century rebuilding, immigrants and emigrants, suburbs, literary culture, war, and redevelopment.
Italian
ITAL W4091 Dante's <i>Divina Commedia</i> I. 4 points.
ITALIAN MAJORS AND ITALIAN DEPT GRADUATE STUDENTS MUST REGISTER FOR SECTION 001. Not offered during 2019-20 academic year.

Prerequisites: SECTION 001: reading knowledge of Italian. SECTION 002: none.

A year-long course in which the "Commedia" is read over two consecutive semesters; students can register for the first, the second, or both semesters. This course offers a thorough grounding in the entire text and an introduction to the complexities of its exegetical history. Attention not only to historical and theological issues, but also to Dante's mimesis, his construction of an authorial voice that generations of readers have perceived as "true," and the critical problems that emerge when the virtual reality created in language has religious and theological pretensions. SECTION 001: Lectures in English, text in Italian; examinations require the ability to translate Italian. SECTION 002: Lectures in English, examinations in English; students who can follow lectures with the help of translations but who cannot manage the Italian should register for this section.

Philosophy (Barnard)
PHIL UN2201 History of Philosophy II: Aquinas to Kant. 4 points.
Prerequisites: PHIL UN2211 Required Discussion Section (0 points). PHIL UN2101 is not a prerequisite for this course. Exposition and analysis of the metaphysics, epistemology, and natural philosophy of the major philosophers from Aquinas through Kant. Authors include Aquinas, Galileo, Gassendi, Descartes, Spinoza, Leibniz, Berkeley, Hume, and Kant. This course has unrestricted enrollment.

PHIL V3237 Late Medieval and Modern Philosophy. 3 points.
BC: Fulfillment of General Education Requirement: Reason and Value (REA).

Religion
RELI V3140 Early Christianity. 3 points.
Examination of different currents in early Christianity. Discussion of gnosticism, monasticism, conflicts of gender and class, and the work of writers such as Origen and Augustine.

RELI W4170 History of Christianity: Topics in Pre-Modern Papal History. 4 points.
Prerequisites: the instructor’s permission.
An examination of a series of episodes that are of special consequence for papal history in Late Antiquity and the Middle Ages. Readings in both primary and secondary sources in English translation.

Music
Barnard College Department of Music
319 Milbank Hall
212-854-5096
Columbia University Department of Music
621 Dodge Hall
212-854-3825
Department Assistant: Mary Missirian

Mission
The Barnard Music Program provides the vocal program for the university, which includes the Barnard-Columbia Chorus and Chamber Choir, solo studio voice lessons and two levels of limited-enrollment vocal classes, Technique in Singing, and the Vocal Repertoire Class.
In addition, the program provides a music history course, Introduction to Music, which is a year-long survey of Western European art music, from six-century Gregorian Chant to the work of living composers. The course fulfills the Fine and Performing Arts requirement of the General Education Requirements and also serves as a pre-requisite for the music major. Students may complete a senior project in music repertoire by presenting an hour-long recital, or may write a fifty-page thesis project in music research. The successful student will gain professional level performance skills though studio lessons and the theory and ear training sequence, and gain a comprehensive knowledge of music history from the courses in historical musicology and ethnomusicology provided by the Music Department at Columbia University.

Student Learning Outcomes
Students who successfully graduate with a major in music will be able to attain the following outcomes:

1. Analyze the harmonic structure of art music and identify schools of composition by historic period and nationality;
2. Read music at sight at the keyboard, with their instrument, or sight sing representative excerpts from all periods of Western European art music;
3. Perform at a professional level vocally or instrumentally;
4. Demonstrate in-depth knowledge of the diversity of style, musical period and mastery of the representative literature for voice or instrument.
5. Apply knowledge of musical theories, traditions and periods to the study of the major;
6. Communicate effectively orally and in writing;
7. Explain the theoretical concepts and organizational principles, harmony, pitch, and rhythm of both non-Western and Western art music.

**Director:** Gail Archer, Professor of Professional Practice

Other officers of the University offering courses listed below:

**Professors:** Susan Boynton(on leave for the year 2019-20), Joseph Dubiel, Walter Frisch, Brad Garton, Ana Maria Ochoa Gautier (Chair), Giuseppe Gerbino(on leave for the year 2019-20), Georg Friedrich Haas(on leave Spring 2020), Ellie Hisama(on leave 2019-20), George Lewis(on leave Fall ’19), Elaine Sisman

**Associate Professors:** Aaron Fox, Christopher J. Washburne

**Assistant Professors:** Alessandra Ciucci(on leave Fall ’19), Zosha Di Castri, Julia Doe, Kevin Fellez, Mariusz Kozak, Benjamin Steege

**Lecturers:** Taylor Brook, Mahir Cetiz, Rachel Chung, Galen DeGraf, Tom Fog, Ted Gordon, Marc Hannaford, Anne Levitsky, Jeffrey Miarsky, Jushua Navon, Matthew Ricketts, Peter Susser, Yun Emily Wang, Ralph Whyte

**BC Music Associates:** Jean-Paul Björlin, Marilyn Blackwell, Coralie Gallet, Jane McMahan, Josephine Mongiardo-Cooper, Robert Osborne

### Requirements for the Music Major

**Program of Study:** To be planned with the department consultant before the end of the sophomore year. Prospective music majors should complete the prerequisites by the end of their sophomore year and are encouraged to complete them by the end of their first year. By the end of her first year as a music major, the student should select a faculty advisor.

**Prerequisite:** MUSI BC1001 An Introduction to Music I or MUSI BC1002 An Introduction to Music II, MUSI UN1002 Fundamentals of Music, and MUSI UN1312 Introductory Ear Training. Prospective music majors are advised to satisfy the prerequisites prior to their declaration as majors or before the end of their sophomore year. This requirement may be fulfilled either through successful completion of the courses or satisfactory performance on examinations administered each semester by the department.

**Courses:** At least 40 points, including MUSI UN2318 Music Theory I - MUSI UN2319 Music Theory II; MUSI UN3321 Music Theory III - MUSI UN3322 Music Theory IV; four semesters of ear training, unless the student is exempt by exam; the following two history courses: MUSI UN3128 History of Western Music I: Middle Ages To Baroque and MUSI UN3129 History of Western Music II: Classical To the 20th Century; and at least three 3000- or 4000-level electives in her area of interest (theory, history, composition, or ethnomusicology). The remaining points are chosen from 2000- to 4000-levels. No more than 6 points of 2000-level courses and no more than 4 points of instrumental or vocal lessons will count toward the major.

**Senior Project:** In the fall semester of the senior year, a major must enroll in MUSI BC3992 Senior Seminar for Music Majors in which she will write a paper which deals with primary sources. In the spring semester of the senior year, a student will either work with her adviser to expand the paper written in the senior seminar by taking MUSI BC3990 Senior Project: Senior Research, or she will take MUSI BC3991 Senior Project: Music Repertoire and prepare an hour-long vocal or instrumental recital, or compose an original composition.

**Keyboard Proficiency:** Music majors will be required to take a keyboard proficiency exam, which must be arranged by making an appointment with a member of the piano faculty, immediately upon declaration of the major. Those who do not pass the exam will be required to take MUSI W1517 Keyboard Harmony and Musicanship - MUSI UN1518 Keyboard Harmony and Musicanship, for 1 point each term, which will count against the maximum 4 points allowed toward completion of the major.

**Languages:** For students who plan to do graduate work in music, the study of German, French, Italian, and/or Latin is recommended.

**Note:** With the permission of Gail Archer, Barnard Director, students may take lessons at the Manhattan School of Music or the Julliard School. For non-majors, there is a six semester limit, but majors may continue for the remainder of their program.

**Practice Rooms:** Piano practice rooms are available, at a nominal fee, upon application to the Music Department in 319 Milbank. Application should be made during the first week of classes. Preference in assigning hours is given to students taking piano instruction, majors, and concentrators, in order of application. The organ studio in St. Paul’s Chapel is available for organ practice. Arrangements should be made with Mary Monroe, Associate in Organ Performance, during the first week of classes.

### Requirements for Ethnomusicology Track in the Music Major

The ethnomusicology track combines the social science of music in such courses as the Social Science of Music and Asian Music Humanities, together with anthropology as a regular option for all students. All special majors in ethnomusicology must take two courses in anthropology at the recommendation of the Barnard anthropology department in consultation with ethnomusicology faculty at Columbia.

**Courses for an ethnomusicology track in the music major**

Pre-requisite: One semester of Introduction to Music MUSI BC1001 An Introduction to Music I or MUSI BC1002 An Introduction to Music II

MUSI BC3139 Introduction to Vocal Repertoire: Technique in Singing and Performance. 3 points.
This course is designed for developing singers. Group vocalizing, learning of songs and individual workshop performances are aimed at improving the student’s technical skill and the elements necessary to create a meaningful musical and dramatic experience. Attention to text, subtext, emotional and psychological aspects of a piece and the performer’s relationship to the audience are included in the work. Repertoire is predominantly in English and comes from both classical and popular traditions. Individual coaching sessions are available with the class accompanist and help strengthen the students’ confidence and skill. The class culminates with an in-class performance.

MUSI BC3992 Senior Seminar for Music Majors. 3 points.
The goals of this seminar are a) to introduce senior music majors to ethnographic, bibliographic, and archival research methods in music and b) to help the same students develop, focus, implement, draft, revise, and polish a substantive, original piece of research (25-30 pages) which will serve as the senior project. The course will begin with a survey of academic literature on key problems in musicological research and writing, and will progress to a workshop/discussion format in which each week a different student is responsible for
assigning readings and leading the discussion on a topic which s/he has formulated and deemed to be of relevance to her own research.

MUSI UN2021 Music in Contemporary Native America. 3 points.
This course focuses on contemporary Native American (Native American, First Nations Canadian, Alaska Native, Native Hawaiian) music cultures through a framework combining historical and ethnomusicological readings in a topical examination of contemporary Native American musical practices. The course emphasizes popular, vernacular, and mass mediated musics, and calls into question the distinction between “traditional” and “modern” aspects of Native American cultures. There will be a special emphasis on Native American perspectives on these topics.

MUSI UN2030 Jewish Music of New York. 3 points.
Prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard).
With the arrival of the first Jewish immigrants in New York in the mid-1600s until today, Jewish music in the City has oscillated between preserving traditions and introducing innovative ideas. This course explores the variety of ways people have used music to describe, inscribe, symbolize, and editorialize their Jewish experience. Along these lines, it draws upon genres of art music, popular music, and non-Western traditions, as well as practices that synthesize various styles and genres, from hazzanut to hiphop. Diverse musical experiences will serve as a window to address wider questions of identity, memory, and dislocation. We will also experience the Jewish soundscape of New York’s dynamic and eclectic music culture by visiting various venues and meeting key players in today’s music scene, and thus engage in the ongoing dialogues that define Jewishness in New York. A basic familiarity with Judaism and Jewish culture is helpful for this course, but it is by no means required. You do not need to know Jewish history to take this class, nor do you need to be able to read music. Translations from Hebrew and Yiddish will be provided, and musical analysis will be well explained.

MUSI UN2205 Introduction to Digital Music (Previously called MIDI Music Production Techniques). 3 points.
Prerequisites: Permission of Instructor required to enroll. Music Majors/Music Concentrations have priority for enrollment.

An introduction to the potential of digital synthesis and signal processing. Teaches proficiency in elementary and advanced digital audio techniques. Challenges some of the assumptions about music built into various interfaces and fosters a creative approach to using DAW software and machines.

MUSI UN2319 Music Theory II. 3 points.
Prerequisites: Passing score on the placement exam administered prior to the first day of class or Music Theory I/UN2318
Corequisites: one course from Ear-Training I-IV (V2314, V2315, V3316, or V3317, as determined by placement exam.)
Elementary analysis and composition in a variety of tonal idioms. A one-hour weekly lab is required, to be scheduled at the beginning of the term. Course to be taken in conjunction with the Ear-Training sequence, up through Ear-Training IV.

MUSI UN2582 Jazz improvisation: theory, history and practice. 3 points.
This course offers an introduction to jazz improvisation for instrumentalists. Through recordings, transcriptions, daily performance and selected readings, students will actively engage the history of jazz through their instruments and intellect. The idea of improvisation will be explored in an historical context, both as a musical phenomenon with its attendant theory and mechanics, and as a trope of American history and aesthetics. This class is for instrumentalists who wish to deepen their understanding of the theory, history and practice of jazz improvisation. The history of jazz will be used as a prism through which to view approaches to improvisation, from the cadences of the early Blues through the abstractions of Free Jazz and beyond. The student will be exposed to the theory and vocabularies of various jazz idioms, which they will also learn to place in their social and historical contexts.

MUSI UN3023 Late Beethoven. 3 points.
Prerequisites: MUSI UN2318-UN2319 MUSI UN2318-UN2319 or the instructor’s permission.
An examination of the visionary works of Beethoven’s last dozen or so years as a composer, beginning with the revision of his only opera, Fidelio, in 1814, and continuing with the late piano sonatas, cello sonatas, string quartets, Diabelli variations, Ninth Symphony, and the Missa Solemnis. Topics will include late style, romanticism, politics, deafness, and the changing nature of the musical work and its performance.
MUSI UN3310 Techniques of 20th-Century Music. 3 points.
Prerequisites: MUSI UN2319 or the instructor’s permission.
Materials, styles, and techniques of 20th and 21st century music. Musical concepts and compositional techniques related to serialism and atonality, timbre, orchestration, indeterminacy, rhythm and temporality, electronic and electro-acoustic music, site-specific composition, graphic notation, recomposition, minimalism, and spectralism.

MUSI UN3342 Beyond Boundaries: Radical Black Experimental Music. 3 points.
This discussion seminar focuses on African American composer/improvisers in the twentieth- and twenty-first centuries whose work rejects and critiques simplistic compartmentalization in terms of improvisation, composition, genre, gender, race, and place. On the contrary, these musicians embody Duke Ellington’s famous dictum regarding great music being “beyond category.” Students will critically discuss some of the common threads in this network—musicians’ means of creating and performing their original music, its distribution in the marketplace and surrounding critical discourse, their engagement with issues of race, gender, and class within and outside of their communities, and interdisciplinary and community-based collaboration. Musical communities such encompassed in this course include the Association for the Advancement of Creative Musicians (AACM), Sun Ra’s Arkestra, and the Jazz Composers Guild and extends up to the current day to include contemporary artists such as Nicole Mitchell, Matana Roberts, and Tyshawn Sorey. The incredibly rich multifarious pieces and performances that we will listen to and discuss reference and incorporate elements of improvisation, theatre, twelve-tone serialism, aleatoric composition, bebop, electro-acoustic
and computer music, conduction, popular music, the voice, free jazz, Afrofuturism, the blues, orchestral music, opera, and graphic notation.

MUSI UN3343 Shades of Brown: Music in the South Asian Diaspora. 3 points.

This course explores the musical world of the South Asian diaspora in Europe and North America. We will read ethnographic accounts of diasporic musics and experiences and develop methods for analysis and interpretation of such accounts, situating the songs of the South Asian diaspora within its broader social history. We will address the concepts of belonging and identity, nostalgia and affect, and the dismantling or upholding of dominant discourses such as gender, race, and caste. Our focus will be on the last half century, although deeper histories will need to be considered. Students will learn to analyze instrumentation and lyrics in various genres and traditions of South Asian music, including both art, folkloric, and popular idioms, and to correlate these with aspects of the social context of diaspora. While the specific focus of the course is on a particular diasporic history, the class will help students understand and think critically about the broader phenomenon of "diaspora" and its cultural dimensions, and through this to engage critically with important aspects of cultural globalization and migration.

Students from all departments are welcome. Reading music not required.

MUSI UN3344 Curating Popular Music: From Song Pluggers to Spotify. 3 points.

How is popular music made popular? And who makes it popular? This discussion-based course seeks to answer these questions by focusing on the critical role that music industry professionals—song pluggers, sheet music publishers, producers, talent scouts, record executives, and content curators—have played in shaping the markets of production, circulation, and consumption of popular music in the United States from the beginning of the twentieth century to the present day. Readings, listening selections, and class discussion will address a number of key genres of American popular music—Tin Pan Alley, folk, blues, country, rock, pop, and hip hop—while individual assignments (including a final project centered on creating and producing a podcast) will allow students to apply the knowledge gained in class to genres, styles, and works of their own choosing. Students will not be required to have prior knowledge of music theory or to be able to read music. Completion of Masterpieces of Western Music: "Music Humanities" (HUMA UN 1123) is preferred, but not required.

MUSI UN3344 Topics in Music and Society. 3 points.

Music Majors and Concentrators.

This course seeks to approach the study of music and society by comparatively studying repertoires from different parts of the world, how the history of ideas and methods of studying such repertoires shaped them, the practices that constitute them and the ways they are understood and used by different peoples. Central to this course is the interrelationship between the constitution of a repertoire and the history of the construction of knowledge about it.

MUSI UN3998 Supervised Independent Study. 3 points.

Prerequisites: approval prior to registration; see the director of undergraduate studies for details.

A creative/scholarly project conducted under faculty supervision.
What does this shift mean for today's practicing artist or composer? Change comes the opening – and closing – of doorways of possibility. Music, and the music industry itself, is changing rapidly, and with that by an ever-evolving landscape of technological capability. The world of music moves into the 21st century.

MUSI GU4801 Music and the Electrical Imaginary. 3 points.

This undergraduate seminar explores the long history of how people have imagined the relationship between music and electricity. An interdisciplinary seminar, this course uses methodologies from historical musicology, ethnomusicology, and science and technology studies to map the scientific concepts, technological instruments, and musical practices that have contributed to what is now an abstract noun: "electronic music." Beginning with early modern fantasies of magnetic and electrical music, it continues through 19th century developments in acoustics and electroacoustics; examines early 20th century systems of networked electrical control and communication; explores the consequences of magnetic audio tape; surveys electronic music studios in Cologne, Buenos Aires, Toronto, New York, and San Francisco; traces the development of voltage-controlled synthesizers in the 1960s; meditates on music, mathematics, and mysticism; and historically situates the development of computer music. This course is intended to foster interdisciplinary dialogue between students interested in the study of music (including historians, ethnomusicologists, theorists, and composers) and the study of science and technology (including historians, researchers, and engineers).

MUSI GU4630 Recorded Sound. 3 points.

This seminar is an exploration of the roles of sound and music play in people's attempts to grapple with death and its many auras. We will read literature from ethnomusicology, anthropology, and sound studies, and listen to musics from many parts of the world, so as to investigate how 1) the processes of aging, decay, and mourning; 2) metaphorical deaths including war and exile; and 3) imaginations of afterlives resound among the living.

MUSI GU4360 ANALYSIS OF TONAL MUSIC. 3 points.

Detailed analysis of selected tonal compositions. This course, for advanced undergraduates and beginning graduates, is intended to develop understanding of tonal compositions and of theoretical concepts that apply to them, through study of specific works in various forms and styles.

MUSI GU4525 Instrumentation. 3 points.

Open to both graduate and advanced music major undergraduate students.

Prerequisites: extensive musical background.

Analysis of instrumentation, with directional emphasis on usage, ranges, playing techniques, tone colors, characteristics, interactions and tendencies, all derived from the classic orchestral repertoire. Topics will include theoretical writings on the classical repertory as well as 20th century developments and electrical music, it continues through 19th century developments in acoustics and electroacoustics; examines early 20th century systems of networked electrical control and communication; explores the consequences of magnetic audio tape; surveys electronic music studios in Cologne, Buenos Aires, Toronto, New York, and San Francisco; traces the development of voltage-controlled synthesizers in the 1960s; meditates on music, mathematics, and mysticism; and historically situates the development of computer music. This course is intended to foster interdisciplinary dialogue between students interested in the study of music (including historians, ethnomusicologists, theorists, and composers) and the study of science and technology (including historians, researchers, and engineers).

Prerequisites: The instructor's permission.

As music moves into the 21st century, we find ourselves surrounded by an ever-evolving landscape of technological capability. The world of music, and the music industry itself, is changing rapidly, and with that change comes the opening – and closing – of doorways of possibility.

What does this shift mean for today's practicing artist or composer? With big label recording studios signing and nurturing fewer and fewer artists, it seems certain that, today, musicians who want to record and distribute their music need to be able to do much of the recording and production work on their own. But where does one go to learn how to do this – to learn not only the "how to" part of music production, but the historical underpinnings and the development of the music industry as well? How does one develop a comprehensive framework within which they can place their own artistic efforts? How does one learn to understand what they hear, re-create what they like and develop their own style?

This class, "Recorded Sound," aims to be the answer. It's goal is to teach artists how to listen critically to music from across history and genres in order to identify the production techniques that they hear, and reproduce those elements using modern technology so they can be incorporated into the artist's own musical works.

MUSI GU4810 Sound: Foundations . 3 points.
This foundational course in sound will begin by exploring how listening happens as well the tools necessary capture and present that listening. Through hands-on experimentation and demonstration, this seminar will examine both the technical and semiotic use of sound as a material within creative practice. Fundamental studio techniques will be explored including soldering for building cables, microphones, and loudspeakers. We will also explore the building blocks of analog and digital processes for the creation of sound, including microphones (types, patterns, and placement), basic synthesis, and techniques for recording, mixing, editing, and mastering. Through creative projects that implement these skills we will learn by doing. We will study theories of sound and listening that determine or are determined by technology, from the physical and social dimensions of the sounds we use to create, language (sound as a symbol or object), acoustics (sound in space), acousmatics (sound without a visual reference), and psycho-acoustics (sound as cognitive process). This class assumes no prior knowledge or technical skill. Some reading will be assigned and we will look and listen to a lot of work, students are encouraged to participate actively in discussions.

Students graduating with a major in Neuroscience and Behavior should be able to attain the following outcomes:

- Acquire a strong intellectual foundation in neuroscience.
- Develop competence in the interpretation and evaluation of neuroscience research.
- Understand the role of experimentation in neuroscience.
- Learn basic methods of experimental design and hypothesis testing.
- Acquire effective oral presentation skills.
- Demonstrate a capability to write a scientific paper.
- Understand statistical approaches to the analysis of data.

**Student Learning Outcomes**

Upon successfully completing the major, students should have the ability to

- Discuss neuroscience phenomena from many different levels of organization (e.g., explain how the destruction of myelin in people with multiple sclerosis leads to cognitive and motor deficits);
- Describe the basic features of nervous system development, organization, signaling, integration, and higher-level processing;
- Explain the neural basis of sensory-motor integration, learning and the generation of complex behaviors;
- Conceive of, implement, and present an original research project;
- Generate a testable hypothesis and develop a controlled experimental design;
- Perform modern scientific measurement techniques;
- Write an original research paper.

To elect the major in Neuroscience and Behavior, a student must have completed these courses by the end of the sophomore year with an average grade of B- or better in the four Biology courses, an average grade of B- or better in the three Chemistry courses, and a grade of B- or better in the Psychology course.

**Mission**

The Neuroscience and Behavior major provides a strong background in the neural underpinnings of behavior and cognition. It is intended for students who plan to pursue a research career in neuroscience or a related discipline. Students electing this major are exposed to basic courses in biology, psychology and statistics, and to advanced courses in neuroscience and behavior. Majors must choose one of two areas of concentration. The behavior concentration places greater emphasis on behavioral and systems neuroscience, while the cellular concentration places greater emphasis on cellular and molecular neuroscience.

All majors engage in two semesters of independent research during the senior year while taking the Senior Research Seminar. In the junior year, majors must begin developing a plan for the senior research project. There is a meeting for junior majors during the spring semester to begin this process.

**Student Learning Goals**

- Students graduating with a major in Neuroscience and Behavior should be able to attain the following outcomes:

  - Understand statistical approaches to the analysis of data.
  - Write an original research paper.
  - Perform modern scientific measurement techniques.
  - Acquire effective oral presentation skills.
  - Demonstrate a capability to write a scientific paper.
  - Understand the role of experimentation in neuroscience.
  - Learn basic methods of experimental design and hypothesis testing.
  - Acquire a strong intellectual foundation in neuroscience.
  - Develop competence in the interpretation and evaluation of neuroscience research.
  - Discuss neuroscience phenomena from many different levels of organization (e.g., explain how the destruction of myelin in people with multiple sclerosis leads to cognitive and motor deficits).

**NSBV BC2154 Hormones and Behavior. 3 points.**

Prerequisites: BC1001 or BIOL BC1101, BC1102, or permission of the instructor. Enrollment limited to 45 students.

This class explores the complex interactions among genetics, hormones, environment, experience, and behavior. Topics covered include the endocrine system, sexual development, reproductive behavior, and social interactions such as affiliation, aggression, parenting, as well as homeostasis, biological rhythms, stress, memory, and mood.

**NSBV BC2180 Neurodevelopmental Processes and Cognitive/Behavioral Disorders. 3 points.**

Not offered during 2019-20 academic year.

Prerequisites: BC1118/1119, BC3177, BC3380, or BIOL BC3362. Enrollment limited to 30 students.

Explores the evolution of disorders affecting children due to some impairment in the brain or nervous system. Constitutional vulnerabilities demonstrate that nervous system injury varies as a function of neurodevelopmental stage. Disorders to be studied include those impacting language, hearing, vision, movement, mood and emotion, and learning.

**NSBV BC3099 INDEPENDENT STUDY. 1 point.**

This course can be worth 1 to 4 credits (each credit is equivalent to approximately three hours of work per week) and requires a Barnard faculty as a mentor who has to provide written approval. The course entails a scholarly component; for this, a research report is required by the end of the term. The research report can take the form that best suits the nature of the project. The course will be taken for a letter grade, regardless of whether the student chooses 1, 2, 3, or 4 credits.

NSBV BC3367 Transformative Landmarks in Neuroscience. 4 points.
Not offered during 2019-20 academic year.
Modern neuroscience incorporates topics from molecular neurobiology to cognition. Cognate disciplines include psychology, biology, biochemistry, chemistry, neuropharmacology, neurology and psychiatry, physics, computational science. We review neuroscience landmarks through readings of scientific publications, news reports, and controversies surrounding apparently transformative research, and contemplate contemporary viewpoints that have the benefit of hindsight.

NSBV BC3376 Psychobiology of Infant Development. 4 points.
Prerequisites: BC1001 and BC1128/1129 Developmental (lab and lecture taken together) or BC1129 (only lecture). Or permission of the instructor. Enrollment limited to 15 students.
Analysis of human development during the fetal period and early infancy. Review of effects of environmental factors on perinatal perceptual, cognitive, sensory-motor, and neurobehavioral capacities, with emphasis on critical conditions involved in both normal and abnormal brain development. Other topics include acute and long term effects of toxic exposures (stress, smoking, and alcohol) during pregnancy, and interaction of genes and the environment in shaping the developing brain of "high-risk" infants, including premature infants and those at risk for Sudden Infant Death Syndrome.

NSBV BC3377 Adolescent Neurobehavioral Development. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: PSYC BC1001 Introduction to Psychology, or its equivalent; and permission of the instructor.
This seminar will explore neurobehavioral development throughout pubertal and adolescent stages of development. Specifically, topics will include how neuroendocrine changes induce pubertal onset, structural and functional changes in the adolescent brain, and how these developmental changes influence normal and abnormal psychophysiological processes. Students who complete this seminar will learn to: 1) demonstrate experimental methods used in developmental psychobiological research; 2) demonstrate the impact of structural and functional changes in the nervous system on the physiology and behavior of an individual; 3) critically read and interpret the primary research literature and discuss the strengths and weaknesses of experimental results; 4) conduct literature searches and synthesize these searches in to a comprehensive literature review; and 5) write a scientific literature review.

NSBV BC3380 Cognitive Neuroscience. 4 points.
Prerequisites: BC1001 and permission of the instructor. Enrollment limited to 20 students.
Exposition of research and theory in neuroscience with an emphasis on the use of neural imaging techniques (EEG, evoked potentials, MEG, PET, fMRI) for exploring sensation, perception, and cognition in the healthy, intact brain.

NSBV BC3383 Neuropharmacology and Behavior. 4 points.
Prerequisites: BC1001 and one of the following: BC1115, BC1119, or BIOL BC3280. Permission of the instructor is required. Enrollment limited to 20 students.
Basic principles of the study of drugs that influence the neural systems and induce changes in behavior. Molecular, biochemical and behavioral characterization of psychotropic drugs: stimulants, sedative-hypnotics, anxiolytics, alcohol, hallucinogens, and opiates. Etiology and treatment of psychological and neurological disorders.

NSBV BC3387 Topics in Neuroethics. 4 points.
Prerequisites: BC1001 and one of the following: Neurobiology, Behavioral Neuroscience, Fundamentals of Neuropsychology, or permission of the instructor. Enrollment limited to 20 students.
Recent advancements in neuroscience raise profound ethical questions. Neuroethics integrates neuroscience, philosophy, and ethics in an attempt to address these issues. Reviews current debated topics relevant to the brain, cognition, and behavior. Bioethical and philosophical principles will be applied allowing students to develop skill in ethical analysis.

Fall 2019: NSBV BC3392 Psychobiology of Stress. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: BC1001 and one of the following: BC1117, BC1119, BC3362, or permission of the instructor. Enrollment limited to 15 students.
This seminar will explore factors that modulate stress reactivity and the impact of stress on the structure and function of the nervous system and behavior. Topics will include how developmental stage, sex/gender, time of day, and experience influence how an organism responds to stress at endocrinological, neurobiological, and behavioral levels.

NSBV BC3394 Neurobiology of Social Behaviors . 4 points.
Prerequisites: (PSYC BC2119) or (PSYC BC3362)
This course explores behavioral neuroscience through a guided reading and discussion of recent scientific literature involving research in two "opposite" behaviors, sexual courtship and aggression. These are complex social behaviors that are highly conserved across species. Although some of their features are species-specific, there are broad similarities throughout the animal kingdom. Complex interactions between genes, environmental signals, and hormones influence the development and manifestation of these behaviors, but the core circuits involved appear to be pre-wired in the nervous system, as animals with no previous social experience can engage in normal encounters that are characterized by stereotyped behavioral patterns. The study of innate social behaviors in genetically tractable organisms offers unique opportunities to identify underlying neuronal circuitry, understand how this circuitry is genetically specified and elucidate the contributions of neuronal sexual dimorphism.

NSBV BC3396 Topics in Systems Neuroscience: The Receptive Field. 4 points.
Prerequisites: (Psyc BC1119) or (Biol BC3362)
How should we think about the brain? How can we simplify and interpret its dizzying complexities? And specifically, what conceptual frameworks are useful in constraining our interpretations of neuronal activity? This seminar – Topics in Systems Neuroscience – is aimed at defining and dissecting the ideas and models that guide our thinking about the brain. This semester the focus will be on the concept of the receptive field. We will examine how this idea has been applied across brain regions and sensory modalities and has been examined with experimental/computational approaches. Attention will be paid to both the historical background and contemporary views. The receptive field has provided a useful conceptual framework since the early 20th century. After developing the traditional concept of a sensory receptive field, we will critically examine the limits of this concept. This potentially simplifying concept underlying brain function also contains open questions regarding perception, cognition and behavior. By the end of the course we will develop a richer understanding of how conceptual frameworks, in general, can help (and hurt!) but ultimately hone our thinking.

**NSBV BC3397 Neural Modulation. 4 points.**

Prerequisites: BC1001 and permission of the instructor. Enrollment determined at first class meeting.

Excitatory and inhibitory neurotransmission is often influenced and altered by neuromodulators such as dopamine, acetylcholine, and serotonin. Imbalances in neuromodulation are implicated in many psychiatric disorders. This course will assess the role of neuromodulation under normal circumstances and how dysfunction in neuromodulation can lead to psychiatric disorders. This course will draw from ground breaking primary literature and review articles published in the field of neuroscience.

**NSBV BC3398 Psychobiology of Sleep. 4 points.**

Prerequisites: PSYC BC 1001, or equivalent, and permission of instructor. Enrollment limited to 20 students.

This seminar will explore sleep and circadian rhythms, emphasizing how these factors and their disruption influence health, function, and well-being. Topics will include the physiological and neurobiological generation of sleep and circadian rhythms, and the interaction between these systems with cognitive, behavioral, endocrine, metabolic, and mood/psychiatric variables in humans.

**NSBV BC3405 The Neuroscience of Trauma: Theory, Research and Treatment. 4 points.**

Prerequisites: PSYBC1119

This course provides a comprehensive overview of theoretical models and research relevant to the neurobiology, neurophysiology, neuroanatomy and neurodevelopmental processes underlying psychological trauma. Cognitive, emotional and behavioral symptoms associated with post traumatic experience are examined from a neuroscience perspective. Neurotherapeutic treatment interventions are reviewed and critiqued as models of applied clinical neuroscience.

### Cross-Listed Courses

**Biological Sciences (Barnard)**

**BIOL BC1500 Introduction to Organismal and Evolutionary Biology. 3 points.**

Prerequisites: This course is suitable for majors & fulfillment of pre-health requirements. A high school biology background or equivalent preparation is highly recommended. For those without this background seeking to major in biology, BIOL BC1002 & BIOL BC1012 are recommended in the fall of their freshmen year, followed by the year-long 1500-level lecture & lab sequence. BIOL BC1500 & BIOL BC1502 do not have to be taken in a fall to spring sequence.
Detailed introduction to biological phenomena above the cellular level; development, anatomy, and physiology of plants and animals; physiological, population, behavioral, and community ecology; evolutionary theory; analysis of micro-evolutionary events; and systematics.

BIOL BC2100 Molecular and Mendelian Genetics. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. This course is a pre-requisite for most 3000-level courses. Mendelian and molecular genetics of both eukaryotes and prokaryotes, with an emphasis on human genetics. Topics include segregation, recombination and linkage maps, cytotypics, gene structure and function, mutation, molecular aspects of gene expression and regulation, genetic components of cancer, and genome studies.

BIOL BC2272 Ecology. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. This course is a pre- or co-requisite for BIOL BC2873 Laboratory in Ecology. Introduction to evolutionary ecology; life history strategies, population growth, competition, predator-prey interactions, population regulation, species diversity, community organization, and biogeography. Lectures integrate theory with empirical studies.

BIOL BC2280 Animal Behavior. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent. This course is a pre-requisite for BIOL BC2281 Laboratory in Animal Behavior. This introduction to animal behavior takes an integrative approach to understand the physiological and genetic basis of behavior, the ecological context of behavior, and the evolutionary consequences of behavior. This course focuses on the process of scientific research, including current research approaches in animal behavior and practical applications of these findings.

BIOL BC2286 Statistics and Research Design. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent, college-level algebra or the equivalent. General Educational Requirement: Quantitative and Deductive Reasoning (QUA) Introduction to basic principles of statistics and experimental design. Topics include common statistical procedure, analysis of data, sampling populations, power analysis, and the design of experiments.

This course differs from traditional statistics courses by explicitly integrating statistics into research process.

BIOL BC3303 Laboratory in Molecular Biology. 3 points.
Prerequisites: BIOL BC2100 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place. Introduction to the use of molecular techniques to answer questions about subcellular biological phenomena. Techniques include isolation of genomic and plasmid DNAs, restriction enzyme analysis, DNA and protein electrophoresis, bacterial transformation, and plasmid subcloning.

BIOL BC3310 Cell Biology. 3 points.
Prerequisites: (BIOL BC1500)(BIOL BC1501)(BIOL BC1502)(BIOL BC1503) and BIOL BC2100 or equivalent. This course explores the components, systems, and regulatory mechanisms involved in eukaryotic cellular function. Topics include: signal transduction, translational and protein quality control, organelar and cytoskeletal dynamics, and some coordinated responses such as proliferation and programmed cell death. Throughout the course we will see how general cell biology can be specialized to achieve specific cellular functions through regulation of the basic machinery. We will also explore the cellular and molecular bases for a variety of human pathologies, with an emphasis on cancer. In addition to lecture, we will spend some time discussing the material, including selected articles from the primary literature, and learning through group presentations.

BIOL BC3311 Laboratory in Cell Biology. 3 points.
Prerequisites: BIOL BC3310 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place. Introduction to cell biological techniques used to investigate structural, molecular, and physiologic aspects of eukaryotic cells and their organization into tissues. Techniques include light and electron microscopy, cell culture, isolation of cellular organelles, protein electrophoresis, and Western Blot analysis.

BIOL BC3352 Development. 3 points.
Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent. Introduction to animal developmental biology and its applications. This course will examine the basic mechanisms through which animal bodies organize themselves, from an integrative perspective at the levels of genes and gene networks, cell properties and behaviors, coordinated interactions of cells in developing tissues, organs and organ systems, and the role of developmental processes in...
marginal morphological evolution. Topics include: fertilization, cleavage and gastrulation, establishment of body axes, neural development, organ formation, tissue and organ regeneration, stem cells and medical applications, evolution of developmental programs, and teratogenesis.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent. Enrollment is limited to 12; must attend first class to hold place.
Required for all majors who do not select the year-long Senior Thesis Research & Seminar (BIOL BC3593 & BC3594) to fulfill their senior capstone requirement. These seminars allow students to explore the primary literature in the Biological Sciences in greater depth than can be achieved in a lecture course. Attention will be focused on both theoretical and empirical work. Seminar periods are devoted to oral reports and discussion of assigned readings and student reports.
Students will write one extensive literature review of a topic related to the central theme of the seminar section. Topics vary per semester and include, but are not limited to: Plant Development, Animal Development & Evolution, Molecular Evolution, Microbiology & Global Change, Genomics, Comparative & Reproductive Endocrinology, and Data Intensive Approaches in Biology.

CHEM BC3328 Introductory Organic Chemistry Laboratory. 2.5 points.
Prerequisites: (CHEM BC2001) General Chemistry I with lab.
Corequisites: CHEM BC3230
Basic techniques of experimental organic chemistry. Principles and
methods of separation, purification, and characterization of organic
compounds. Selected organic reactions.

Psychology (Barnard)
PSYC BC1001 Introduction to Psychology. 3 points.
Prerequisites: This course is prerequisite for all other psychology
courses.
Prerequisites: This course is prerequisite for all other psychology
courses. Lecture course introducing students to the chief facts,
principles, and problems of human and animal behavior, through
systematic study of a text, lectures, exercises, reading in special
fields, and participation in several current experiments (an alternative
to participation in experiments can be arranged at the start of the
semester at the student's request.)

PSYC BC1101 Statistics. 4 points.
Prerequisites: BC1001 and instructor permission. Enrollment limited to
20 students per recitation section. Lecture course introducing students to statistics and its applications
to psychological research. The course covers basic theory, conceptual
underpinnings, and common statistics.

PSYC BC2106 Psychology of Learning Laboratory. 1.5 point.
Prerequisites: BC1001 Introduction to Psychology and instructor
permission. Enrollment limited to 24 students per section.
Corequisites: PSYC BC1107
Laboratory course to accompany BC1107. Students conduct
experiments analyzing learning and memory in rats and humans.

Mission
哲学是探索世界的方式，它不拘泥于具体的事物和人，而是探索思想、概念、原则和价值——它们结合在一起。哲学问题探索存在的基础和界限，以及人类思想和经验的界限。我们生活中的知识有何意义？我们如何决定？我们如何判断？我们应该如何生活？我们应该做什么？我们应该拥有什么？哲学家教授学生思考、写作和表达的技巧，并教授他们批判性思维、概念分析、论证和密切阅读能力。学生通过哲学学位课程了解未来研究和职业发展的基本技能。

Student Learning Outcomes

1. Demonstrate their knowledge of major thinkers (such as Plato, Aristotle, Descartes, Hume, Kant) and texts of the ancient and modern philosophical traditions;
2. Demonstrate their understanding of central problems and dominant theoretical traditions in moral theory (Kantianism, utilitarianism) and either epistemology (skepticism, other minds, the problem of induction, decision theory), metaphysics (the mind-body problem, free will and determinism, causation, the nature of space and time), or the philosophy of language;
3. Construct and evaluate deductive arguments using formal symbolic notation;
4. Discuss and reflect critically on difficult philosophical texts and outstanding problems in a seminar setting with their fellow majors.

Although it is not required for the major or for the minor, students who have not had previous training in philosophy are advised to take PHIL UN1001 Introduction to Philosophy.

Chair: Taylor Carman
Professor: Frederick Neuhausser
Associate Professor: John Morrison
Assistant Professor: Karen Lewis
Assistant Professor: Francey Russell
Term Assistant Professor: Kyle Driggers

**Associate Professor:** Justin Clarke-Doane, Jessica Collins

**Assistant Professors:** Melissa Fusco, Dhananjay Jagannathan, Tamar Lando

### Requirements for the Major

A major in Philosophy consists of at least 10 courses, as follows:

1. One of the following in ancient or medieval philosophy:
   - **PHIL UN2101** The History of Philosophy I: Presocratics to Augustine
   - **PHIL V3121** Plato
   - **PHIL V3131** Aristotle

2. One of the following in early modern philosophy:
   - **PHIL UN2201** History of Philosophy II: Aquinas to Kant
   - **PHIL V3237** Late Medieval and Modern Philosophy
   - **PHIL UN3251** Kant

3. One course in logic:
   - **PHIL UN3411** Symbolic Logic
   - **PHIL UN1401** Introduction to Logic

4. One course in ethics:
   - **PHIL UN3701** Ethics

5. One of the following courses:
   - **PHIL UN3601** Metaphysics
   - **PHIL UN3960** Epistemology

6. The Senior Seminar
   - **PHIL BC4050** Senior Seminar (This course is required for the major and is offered only in the fall semester of each year.)

7. Either of the two-course groups below:
   - **PHIL BC4051** Senior Thesis
   - **PHIL BC4052** Senior Thesis

OR: One advanced seminar (PHIL UN 3912 or a PHIL seminar above 4000, other than PHIL BC 4050), plus one elective beyond the two stipulated in 8 (below).

8. Two electives in addition to the eight courses stipulated above.

**PLEASE NOTE:** "Elective" refers to any PHIL course not already used to satisfy a major requirement. Only one course at the 1000 level can be counted toward the ten PHIL courses required by the major.

### Requirements for the Minor

Five courses constitute a minor in philosophy. The courses must be selected in consultation with the department chair.

**PHIL UN1001 Introduction to Philosophy. 3 points.**

Survey of some of the central problems, key figures, and great works in both traditional and contemporary philosophy. Topics and texts will vary with instructor and semester.

---

### PHIL UN1010 Methods and Problems of Philosophical Thought. 3 points.

Critical introduction to philosophical problems, ideas and methods.

PHIL UN2108 Philosophy and History. 3 points.
An introduction to historical (from 1800) and contemporary themes in the philosophy of history. Themes include Historicism, Histroricty, Universality and Particularity; the debate over Positivism; the historical nature of concepts and meaning; time and tense: Past, Present Future; the Temporality of experience; the nature of Tradition and Practice; Epistemic, Revolutionary, and Paradigmatic change; Memory and the writing of one's history (Autobiography).

PHIL UN2110 Philosophy and Feminism. 3 points.
Is there an essential difference between women and men? How do questions about race conflict or overlap with those about gender? Is there a "normal" way of being "queer"? Introduction to philosophy and feminism through a critical discussion of these and other questions using historical and contemporary texts, art, and public lectures. Focus includes essentialism, difference, identity, knowledge, objectivity, and queerness.

PHIL UN2201 History of Philosophy II: Aquinas to Kant. 4 points.
Prerequisites: PHIL UN2211 Required Discussion Section (0 points). PHIL UN2101 is not a prerequisite for this course. Exposition and analysis of the metaphysics, epistemology, and natural philosophy of the major philosophers from Aquinas through Kant. Authors include Aquinas, Galileo, Gassendi, Descartes, Spinoza, Leibniz, Berkeley, Hume, and Kant. This course has unrestricted enrollment.

PHIL UN2301 History of Philosophy III: Kant to Nietzsche. 4 points.
Prerequisites: None. Exposition and analysis of major texts and figures in European philosophy since Kant. Authors include Kant, Hegel, Schopenhauer, Kierkegaard, and Nietzsche. Required discussion section (PHIL UN2311). Attendance in the first week of classes is mandatory.

PHIL UN2685 Introduction to Philosophy of Language. 3 points.
This course gives students an introduction to various topics in the Philosophy of Language.

PHIL UN2702 Contemporary Moral Problems. 3 points.
Questions about how people should act have historically been central to philosophy. This course introduces students to philosophy through an examination of some important moral problems that arise in the twenty-first century. The aim is not only to offer ideas for thinking through the issues covered, but also to provide tools for general moral reflection. Topics covered will include: the legitimacy of asking migrants to abandon their traditional practices, responsibilities to distant people and to future generations, abortion and genetic testing of the unborn, the proper treatment of animals, and the permissibility of war and terrorism.

PHIL V3121 Plato. 3 points.
Not offered during 2019-20 academic year.

PHIL V3131 Aristotle. 3 points.
Not offered during 2019-20 academic year.

PHIL V3190 Topics in Epistemology. 3 points.
Not offered during 2019-20 academic year.

PHIL V3237 Late Medieval and Modern Philosophy. 3 points.
BC: Fulfillment of General Education Requirement: Reason and Value (REA).

PHIL V3248 Darwin. 3 points.
Darwin's theory of evolution by natural selection has been revolutionary, not just for scientists but for everyone who reflects on human nature and human destiny. The first aim of this course is to separate Darwin's own theory from its scientific, religious, and cultural aftershocks, and to consider how its influence developed and changed over the century and a half since On the Origin of Species was published in 1859. After careful consideration of Darwin's own life and historical context, we will read our way through the Origin, and then consider reactions to to it starting Darwin's own day, proceeding through the "Modern Synthesis," and ending in our present moment. The final sessions of the course will explore Darwin's impact on contemporary philosophical debates over faith, ethics, and scientific knowledge.

PHIL UN3251 Kant. 3 points.
Explores the connections between theoretical and practical reason in Kant's thinking with special attention to the Critique of Pure Reason and the project of "transcendental" philosophy.
PHIL UN3252 Philosophy of Language and Mind. 3 points.
This course will provide an introduction to meaning, reference, understanding, and content in language, thought, and perception. A central concern will be the question of the relation of meaning to truth-conditions, and what is involved in language and thought successfully latching on to reality. If you have not already taken an elementary course in first order logic, you will need to catch up in that area to understand some crucial parts of the course. All the same, the primary concerns of the course will be philosophical, rather than technical.

PHIL UN3252 19th Century Philosophy: Hegel. 3 points.
Prerequisites: Phil UN2201 or PHIL UN3251
Examines major themes of Hegel's philosophy, with emphasis on social and political thought. Topics include Hegel's critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in a rational society. Readings from Kant's Third Critique help explain how Hegel's project develops out of Kant's transcendental idealism. Some knowledge of Kant's moral theory and his Critique of Pure Reason is presupposed. Prerequisite: at least one of PHIL UN2201, PHIL UN2301, or PHIL UN3251.

PHIL UN3278 Nietzsche. 3 points.
Prerequisites: one prior course in the history of philosophy (either ancient or modern).
An examination of major themes in Nietzsche's thought. Topics include the philosophical significance of Greek tragedy, the nature of truth, the possibility of knowledge, the moral and metaphysical content of Christianity, the death of God, perspectivism, eternal recurrence, and the power to will.

PHIL UN3351 Phenomenology and Existentialism. 3 points.
Prerequisites: Two prior philosophy courses. Enrollment limited to 30. Survey of selected works of Husserl, Heidegger, Sartre, and Merleau-Ponty. Topics include intentionality, consciousness and self-consciousness, phenomenological and hermeneutical method, the question of being, authenticity and inauthenticity, bad faith, death, and the role of the body in perception.

PHIL UN3352 Twentieth Century European Philosophy. 3 points.
Prerequisites: one prior philosophy course.
A survey of European social philosophy from the 18th to the 20th century, with special attention to theories of capitalism and the normative concepts (freedom, alienation, human flourishing) that inform them. Also: the relationship between civil society and the state.

PHIL UN3353 European Social Philosophy. 3 points.
Prerequisites: one philosophy course.
A survey of European social philosophy from the 18th to the 20th century, with special attention to theories of capitalism and the normative concepts (freedom, alienation, human flourishing) that inform them. Also: the relationship between civil society and the state.
PHIL UN3576 Physics and Philosophy. 3 points.
Philosophical problems at the foundations of quantum theory, especially those having to do with the uncertainty of relations and nature of quantum mechanical indeterminacy. Exploration of a variety of interpretation and hidden variable theory.

Spring 2020: PHIL UN3576
Course Number: PHIL 3576
Section/Call Number: 001/11566
Times/Location: M W 4:10pm - 5:25pm

Instructor: Justin Clarke-Doane
Enrollment: 20/86

PHIL UN3654 Philosophy of Psychology. 3 points.
Considers psychology from the perspective of philosophy of science and the plausibility of various philosophical positions in light of the best current theories of psychology. Examines the assumptions and explanatory strategies of past and present "schools of psychology" and the implications of recent work in psychology for such perennial philosophical problems as moral responsibility and personal identity.

Spring 2020: PHIL UN3654
Course Number: PHIL 3654
Section/Call Number: 001/00065
Times/Location: M W 2:40pm - 3:55pm
Room: TBA
Instructor: John Morrison, Raphael Gerzatz
Enrollment: 50/80

PHIL UN3685 Philosophy of Language. 3 points.
This course is a survey of analytic philosophy of language. It addresses central issues about the nature of meaning, including: sense and reference, speech acts, pragmatics, and the relationship between meaning and use, meaning and context, and meaning and truth.

Spring 2020: PHIL UN3685
Course Number: PHIL 3685
Section/Call Number: 001/34913
Times/Location: M W 8:40am - 9:55am
Room: TBA
Instructor: Melissa Fusco
Enrollment: 3/28

PHIL UN3701 Ethics. 4 points.
Prerequisites: one course in philosophy.
Corequisites: PHIL V3711 Required Discussion Section (0 points).
This course is mainly an introduction to three influential approaches to normative ethics: utilitarianism, deontological views, and virtue ethics. We also consider the ethics of care, and selected topics in meta-ethics.

Fall 2019: PHIL UN3701
Course Number: PHIL 3701
Section/Call Number: 001/45366
Times/Location: M W 8:40am - 9:55am
Room: TBA
Instructor: Carol Rovane
Enrollment: 29/80

PHIL V3710 Law, Liberty and Morality. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 40 students.
Examination of classic philosophical theories about the rule of law, relations between law and morality, legal reasoning, and their implications for selected contemporary legal problems.

PHIL V3713 Varieties of Liberalism. 3 points.
Not offered during 2019-20 academic year.

Seven formulations of Liberalism from Hobbes, Locke, Rousseau, and Mill through Hobhouse, Dewey, and Rawls have generated the issues which remain central for current political divisions and divergent directions for social policy. This course will examine each of these seven formulations with a focus upon the emerging issues that have been central for Liberalism. These issues range from such theoretical questions as the grounds for contractual nature of the State, the justification of natural rights, and the perfectability of society through the application of the social sciences, to such policy debates as the scope and limits of individual freedom, the place of free markets and of the public sector in a political economy, political realism and political idealism in international relations, and the role of interest groups in democratic society. In addition to the seven texts of a liberal and democratic theory, there are readings from Berlin, Burnham, Devlin, Hayek, Hook, Oakeshott, Popper, Schumpeter, and Weber.

PHIL V3716 Topics in Ethics. 3 points.
Enrollment limited to 40.

PHIL V3720 Ethics and Medicine. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: Limited enrollment by permission of the instructor. First-day attendance required.
Philosophical examination of moral issues in medical theory and practice. Analysis of the ethics of the doctor-patient relationship, e.g., informed consent, truth-telling, paternalism; topics in bioethics, e.g., abortion, euthanasia, experimentation on humans; justice and access to health care; human genetics.

PHIL UN3751 Political Philosophy. 3 points.
Six major concepts of political philosophy including authority, rights, equality, justice, liberty and democracy are examined in three different ways. First the conceptual issues are analyzed through contemporary essays on these topics by authors like Peters, Hart, Williams, Berlin, Rawls and Schumpeter. Second the classical sources on these topics are discussed through readings from Hobbes, Locke, Hume, Marx, Plato, Mill and Rousseau. Third some attention is paid to relevant contexts of application of these concepts in political society, including such political movements as anarchism, international human rights,
conservative, liberal, and Marxist economic policies as well as competing models of democracy.

PHIL UN3752 Philosophy of Law. 3 points.
This course explores philosophical reflection on the relationship between law, society and morality. We discuss the nature of law, the nature of legal reasoning, the relationship between law and social policy, and central concepts in civil and criminal law. Readings are drawn from such sources as the natural law tradition, legal positivism, legal realism, and Critical Legal Theory. Readings will be supplemented by analysis of classic cases.

PHIL UN3800 Philosophy, Justice, and Social Activism. 4 points.
This course will do three things: (1) critically examine the works of philosophers who have argued for justice reform and social change, (2) set this philosophical work next to writings by prominent activists, especially those interested in criminal justice reform, and (3) work with students to do semester-long activist work. Local activists will visit class and discuss their work. Students must petition to take the course. The petition must include a 2-3 sentence statement about the student’s training in or commitment to activist work

PHIL UN3840 The Nature and Significance of Animal Minds. 3 points.
Humans have a complicated relationship with other animals. We love them, befriend them and save them. We hunt, farm and eat them. We experiment on and observe them to discover more about them and to discover more about ourselves. For many of us, our pets are amongst the most familiar inhabitants of our world. Yet when we try to imagine what is going on in a dog or cat’s mind—let alone that of a crow, octopus or bee—many of us are either stumped about how to go about this, or (the science strongly suggests) getting things radically wrong. Is our thought about and behavior towards animals ethically permissible, or even consistent, Can we reshape our habits of thought about animals to allow for a more rational, richer relationship with the other inhabitants of our planet? In this course, students will reflect on two closely intertwined questions: an ethical question, what sort of relationship ought we to have with animals?; and a metaphysical question, what is the nature of animal minds? Readings will primarily be from philosophy and ethics and the cognitive sciences, with additional readings from literature and biology. There are no prerequisites for this class—it will be helpful but certainly not necessary to have taken previous classes in philosophy (especially ethics and philosophy of mind) or in cognitive science.

PHIL W3852 Philosophy of Literature. 3 points.
Not offered during 2019-20 academic year.

The course reviews and analyzes topics including meaning, interpretation, authorship, fiction, morality, and the historicity of literary genres. Texts to be covered will be historical and contemporary, analytical and continental. We will read texts by Adorno, Borges, Cavell, Danto, Foucault, Goodman, Ingarden, Sartre, and others. Comparative readings will also be offered regarding the relation of literature to the other arts.

PHIL UN3855 The Potential and Actual Infinite. 3 points.
This course examines the concept of infinity throughout the history of western philosophy, looking at how the puzzles that surround the concept led to the construction and defense of many different philosophical positions on the infinite. In particular, we will examine how many different historical figures have attempted (in many different ways) to draw a distinction between what is potentially infinite and what is actually infinite, and further, how this distinction is used in attempts to solve puzzles of the infinite. We move chronologically, starting with Zeno and Aristotle, through the invention of calculi of infinitesimals, to the development of set theory, model theory, and modern mathematical logic. We will also use the tools we develop in our historical investigation to address modern discussions in philosophy about the infinite, such as the debates about supertasks and the limitations of computation. This course has no prerequisites (although having taken Symbolic Logic may be useful), and it serves as an introduction to philosophy of mathematics because of its chronological presentation. It also intersects with a wide range of topics in other fields, such as mathematics, logic, physics, computer science, religion, and artificial intelligence, which should make it of interest even to those who may not have a strong formal background.

PHIL UN3856 Political Realism and Social Injustice. 3 points.
Rectifying injustice remains a central motivation for social and political thought. The aim of a theory of justice or injustice is often to guide us in dealing with the grave wrongs in our social world. But how should philosophy support the advancement of justice, and what do its moral ideals have to do with the political realities of power and conflict? Do we need an “ideal theory” of a perfectly just society to set the aims of social progress? Can we properly respond to racial and gendered injustices without understanding how they wrong people as members of social groups (e.g. as black Americans, women, etc.)? What limits do our theories face in helping us navigate real political decisions and problems? This course will examine different answers to these questions as well as their substantive consequences for addressing pressing injustices based on race and gender. Our investigations will emphasize the relations between political philosophy, social science, the social construction of identity, and real-world politics.

PHIL UN3867 Philosophy & Literature: Jane Austen & Moral Philosophy. 3 points.
In the 1790s, when Jane Austen was beginning to write fiction, there was much debate over the value and function of the novel. Some argued that novels were dangerous to their readers, inciting violent emotional responses and corrupting the imagination (especially in women and children, who were believed to be more sensitive to such stimuli). Others saw potential in this narrative form, arguing that novels could contribute to the moral and sentimental education of their readers. Adam Smith, for example, claims that “[t]he poets and romance writers, who best paint the refinements and delicacies of love and friendship, and of all other private and domestic affections, Racine and Voltaire; Richardson, Mauvieux, and Riccoboni; are, in such cases, much better instructors than Zeno, Chrysippus, or Epicteetus” (Theory of Moral Sentiments III.3.14). And David Hume argues that there is a kind of moral philosophy that paints virtue and vice rather than anatomizing it. Such philosopher-painters, he says, “make us feel the difference between vice and virtue; they excite and regulate our sentiments” (Enquiry Concerning Human Understanding 1.1).

In this course, we will keep these questions about one possible function of literature in the back of our minds as we read through four
of Austen's novels. With each novel, we will focus on a specific ethical theme treated in and by that novel: with Sense and Sensibility we'll focus on the role of the emotions in morality; with Mansfield Park we'll focus on questions about moral education and virtue; with Emma we'll focus on the difficulties of accurate discernment and judgment in moral matters; and with Persuasion we'll focus on the relation between the individual and society and the complications caused by differences in gender, class, and social status. Each novel will be paired with selections from authors who were near contemporaries of Austen's, including Samuel Johnson, David Hume, Jane Collier, Hannah More, Adam Smith, and Mary Wollstonecraft.

Two warnings/things to be aware of: first, this course will require a significant amount of reading; and second, in this course, we will be approaching literature with an interest in philosophical themes and questions. We will occasionally discuss formal and stylistic aspects of Austen's novels (for example, her use of irony and of a technique referred to as "free indirect discourse"), but these sorts of concerns will not be our main focus

**PHIL UN3912 Seminar. 3 points.**

Required of senior majors, but also open to junior majors, and junior and senior concentrators who have taken at least four philosophy courses. This exploration will typically write a substantial research paper. Capped at 20 students with preference to philosophy majors.

**PHIL W3953 Philosophy and Literature: Shakespeare. 3 points.**

Open to students majoring either in philosophy or in English and comparative literature. Not offered during 2019-20 academic year.

The seminar will consider seven plays by Shakespeare, devoting two sessions to each, and pairing each with other texts (typically with philosophical texts). Among the plays considered will be Merchant of Venice, All's Well that Ends Well, Midsummer Night's Dream, Henry IV Part I, and King Lear. The readings will also include extracts from the writings of Edmund Burke, Adam Smith, Anthony Appiah, Plato, Camus, Schopenhauer, and Stanley Cavell.

**PHIL UN3960 Epistemology. 4 points.**

Discussion Section Required

Corequisites: PHIL W3963 Required Discussion Section (0 points). What can we know? What is knowledge? What are the different kinds of knowledge? We will read classic and contemporary texts for insight into these questions.
PHIL V4350 Heidegger. 3 points.
Not offered during 2019-20 academic year.

A study of selected works from Heidegger's middle and later period, from the 1930s to the 1960s, concerning the history of metaphysics, the nature of art and technology, and the problem of nihilism.

PHIL GU4424 Modal Logic. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

PHIL GU4490 LANGUAGE AND MIND. 3 points.

PHIL GU4561 Probability and Decision Theory. 3 points.
Examines interpretations and applications of the calculus of probability including applications as a measure of degree of belief, degree of confirmation, relative frequency, a theoretical property of systems, and other notions of objective probability or chance. Attention to epistemological questions such as Hume's problem of induction, Goodman's problem of projectibility, and the paradox of confirmation.

PHIL GU4569 Critical Social Theory. 3 points.
A close reading of Jürgen Habermas's Theory of Communicative Action. Prerequisite: PHIL V3353 or PHIL G9755

PHIL GU4675 The Direction of Time. 3 points.
A survey of the various attempts to reconcile the macroscopic directionality of time with the time-reversibility of the fundamental laws of physics. The second law of thermodynamics and the concept of entropy, statistical mechanics, cosmological problems, the problems of memory, the possibility of multiple time direction.

PHIL GU4900 Topics in Early Modern Philosophy. 3 points.
Open to undergraduates with previous work in the history of philosophy and to graduate students. Focuses either on an important topic in the history of early modern philosophy (e.g., skepticism, causation, mind, body) or on the philosophy of a major figure in the period (e.g., Descartes, Leibniz, Spinoza, Gassendi, Conway).

PHIL GU4910 Topics in Metaphysics. 3 points.
Not offered during 2019-20 academic year.

Physical Education
200 Barnard Annex
212-854-2085
Department Assistant: Susan Campbell

Mission
The Physical Education Department subscribes fully to the College's commitment to help women realize their full potential. The diversity of the curriculum and the specialization of the faculty permit the student to focus on personal interests and learn the importance of regular participation in physical activity as a lifetime choice. These opportunities instill the basic principles of physical activity in the pursuit of wellness.

The curriculum is driven by the seven components of wellness: physical, occupational, social, intellectual, environmental, emotional, and spiritual, using the physical dimension as a foundation. Through regular participation in guided physical movement, the student gains enhanced physical fitness, improved self-esteem, and stress management techniques. Physical Education and the extra-curricular programs address the body-mind connection as the student learns skills that will influence the quality of her life currently in academic achievement and in all future endeavors.

Student Learning Outcomes
Students will be able to:
1. Demonstrate an exercise to increase muscular endurance;
2. Identify methods of assessing body composition;
3. Demonstrate knowledge of a method for monitoring cardiovascular fitness;
4. Perform pertinent warm-up and cool down exercises;
5. Recognize the benefit of physical activity in reducing stress;
6. Demonstrate increased kinesthetic awareness in chosen activity;
7. Demonstrate proper safety techniques in chosen activity;
8. Demonstrate an exercise to increase muscular strength; and
9. Perform pertinent movement activities to increase flexibility

Chair: Laura Masone (Senior Associate)
Senior Associates: Lisa Northrop
Term Associate: Kate Thompson
Adjunct Associates: Stephen Shulman, India Choquette

Degree Requirement
One Physical Education course is required and must be completed by the end of the first year. One point will be earned for this one course. Students in the Barnard/JTS dual program must complete one Physical Education course by the end of the junior year. One additional point of elective Physical Education may be counted towards the 122 points required for graduation. Transfer students must complete one semester of Physical Education by the end of the junior year and are
not eligible for the second point of credit. One-point studio courses in the Dance Department also fulfill the Physical Education requirement.

Health Status: Students with permanent or temporary disabilities will be individually advised and placed in a suitable activity, based upon the recommendations of the Director of Health Services or Disability Services.

Curriculum: The curriculum is organized and administered by the faculty of the Department of Physical Education. Instruction is offered in the areas of fitness, mind/body, and self-paced courses. Courses are designed to promote the development and enjoyment of lifetime motor skills, which will afford opportunities to realize one’s potential and to provide vigorous exercise to release tensions often generated by strong academic commitments and intense urban life.

Extracurricular Fitness: Recreational use of the Barnard Fitness Center and Fitbear group fitness program is encouraged. All Barnard students, faculty, and staff are eligible to use these programs.

Intercollegiate Athletics: The Barnard/Columbia Athletic Consortium provides the opportunity for eligible undergraduate women to compete together as members of University-wide athletic teams. Sixteen varsity sports are currently sponsored: archery, basketball, crew, cross country, fencing, field hockey, golf, lacrosse, soccer, softball, squash, swimming & diving, tennis, indoor and outdoor track & field, and volleyball. Governed by NCAA and Ivy League rules, all teams are Division I. Competition is scheduled with teams from the Ivy League, the metropolitan area, and the eastern region. In addition, students are eligible to qualify for regional and national championships. Physical Education credit may be earned through satisfactory participation on a varsity team.

Registration: Registration takes place during assigned Registration window. Information is available in the Registrar’s Office or web site. Students should include the Physical Education course by number, section, title, and I.D. number on final programs filed with the Registrar.

Cross Registration: Barnard students may receive credit for a Columbia Physical Education course. Admittance is at the discretion of the Columbia Physical Education Chair.

CARDIOVASCULAR COURSES

MIND/BODY COURSES

Self-Defense (PHED BC1690)

T’ai Chi (PHED BC1691)

Yoga (PHED BC1693)

An introduction to Hatha Yoga focusing on the development of the physical body to increase flexibility and strength. Breathing practices and meditation techniques that relax and revitalize the mind and body are included.

Mission

The mission of the Physics and Astronomy Department at Barnard College is to provide students with an understanding of the basic laws of nature, and a foundation in the fundamental concepts of classical and quantum physics, and modern astronomy and astrophysics. Majors are offered in physics, astronomy, or in interdisciplinary fields such as, astrophysics, biophysics, or chemical physics. The goal of the department is to provide students (majors and non-majors) with quality instruction and prepare them for various post-graduate career options, including graduate study in physics and/or astronomy, professional careers in science, technology, education, or applied fields, as well health-related professions. The department strives to be a source of distinguished women scientists. The faculty in the department maintain NSF or NASA-sponsored active research programs that involve undergraduate students. All majors engage in at least one summer of independent research that is often continued during the semester, or the following summer. Students may also carry out their research at other institutions nationally, through NSF-REU (Research Experience for Undergraduates) programs. Students are required to present the results of their research in the annual departmental “Senior Talks,” held in May.

Student Learning Goals

• Acquire a strong intellectual foundation in physics and/or astronomy.
• Apply scientific thinking to problems in physics and/or astronomy, and translate this to real life problems.
• Use mathematics to describe and manipulate abstract concepts in physics and/or astronomy.
• Perform laboratory experiments to study various physical phenomena, and use statistical approaches to analyze and interpret the data obtained in these experiments.
• Acquire effective oral and written presentation skills to communicate scientific ideas.
• Participate in a research project and stimulate the ability of empirical thought.
• Demonstrate the ability to give a scientific talk on a research topic.

Student Learning Outcomes

Upon successfully completing the major, students should have the ability to:

• demonstrate a conceptual understanding of the physical laws of nature.
• demonstrate a thorough knowledge of the various subject areas of physics (e.g. classical mechanics, quantum physics, electromagnetism, and thermodynamics) and/or astronomy (e.g. stellar structure and evolution, physics of the solar system, physical cosmology, and observational astronomy).
• apply problem-solving skills beyond graduation in advanced physics and/or astronomy courses in graduate school and independent research projects.
apply problem-solving and computation skills in future situations in applied or technical jobs, or careers in finance and industry.

• make an effective oral presentation to an audience of peers and faculty on a particular research topic.

From Aristotle’s Physics to Newton’s Principia, the term “physics,” taken literally from the Greek φυσις (= Nature), implied natural science in its very broadest sense. Physicists were, in essence, natural philosophers, seeking knowledge of the observable phenomenal world. Astronomy originally concentrated on the study of natural phenomena in the heavens with the intent to understand the constitution, relative positions, and motions of the celestial bodies in our universe. Though practitioners of these disciplines have become somewhat more specialized in the past century, the spirit that guides them in their research remains the same as it was more than two millennia ago.

In cooperation with the faculty of the University, Barnard offers a thorough pre-professional curriculum in both physics and astronomy. The faculty represents a wide range of expertise, with special strength and distinction in theoretical physics, condensed matter physics, and observational astrophysics.

Separate majors in physics and astronomy are offered. A major in astrophysics is also possible. Furthermore, there are many special interdisciplinary majors possible, such as biophysics, chemical physics, engineering physics, and mathematical physics. There is a physics minor as well. Students should consult members of the department early on in their undergraduate careers in order to plan the most effective course of study. Qualified seniors are invited to participate in the seniors honors program, in which they carry out a year-long research project leading to the thesis.

There are several quite distinct introductory sequences in physics, only one of which may be taken for credit:

1. PHYS UN1001 Physics for Poets - PHYS UN1001 Physics for Poets is a lecture course in physics intended for liberal arts students. A seminar of this CU lecture course satisfies the BC Quantitative Reasoning requirement. Note, however, that 1001-2 does not satisfy the premedical nor physics requirement for any major. It should also not be taken to satisfy the BC lab science requirement.

2. PHYS UN1201 General Physics I - PHYS UN1202 General Physics II is satisfactory preparation for medical school and is appropriate for most non-science major premedical students. This course is taught at Columbia in a large lecture hall setting. It is not recommended as a foundation for more advanced work in the field. Taken in conjunction with PHYS UN1291 General Physics Laboratory - PHYS UN1292 General Physics Laboratory II, this sequence does satisfy the college LAB requirement, but the student population is essentially premed. Note that PHYS UN1201 General Physics I / PHYS UN1202 General Physics II are required in order to take the lab course.

3. PHYS BC2001 Physics I - Mechanics - PHYS BC2002 Physics II: Electricity and Magnetism, PHYS BC3001 Physics III: Classical Waves & Optics is Barnard’s own three-semester, calculus based introductory sequence in physics. Characterized by modest class sizes, it is designed specifically for Barnard women with a serious interest in any of the natural sciences or mathematics. Moreover, it is especially appropriate for majors in physics, chemistry, or biochemistry, whether premedical or not. Biology majors with some calculus background are also encouraged to take this sequence. Finally, Barnard women contemplating a major in physics or astronomy should take PHYS BC2001 Physics I:

Mechanics - PHYS BC2002 Physics II: Electricity and Magnetism in their first year, if possible, or in their second at the latest, to be followed by the third-semester course, Classical Waves and Optics.

4. First-year students with exceptional aptitude for physics (as evidenced, for example, by scores of 4 or 5 on the advanced placement C exam) and a good mathematical background may be admitted into the Columbia-taught two-semester sequence PHYS UN2801 Accelerated Physics I - PHYS UN2802 Accelerated Physics II, which replaces all three terms of the sequence for majors. Students considering this sequence are strongly encouraged to consult a Barnard faculty member at the start of the term.

Students unsure about the most appropriate sequence should consult members of the department.

The following courses may be substituted for each other:

PHYS BC3001 Physics III: Classical Waves & Optics (sect.1; 5pts) = PHYS UN2601 Physics III: Classical and Quantum Waves (3.0pts) + PHYS BC3001 Physics III: Classical Waves & Optics (sect.3; 2pts)

ASTR BC1753 Life in the Universe - ASTR BC1754 Stars, Galaxies, and Cosmology = ASTR UN1403 Earth, Moon and Planets (Lecture) - ASTR C1404 Stars, Galaxies, and Cosmology

Chair: Laura Kay
Profs: Timothy Halpin-Healy (Ann Whitney Olin Professor), Reshma Mukherjee (Helen Goodhart Altschul Professor)
Associate Prof: Janna Levin
Lab Director: Stiliana Savin

Other officers of the University offering courses listed below:

Professors: James Applegate, Norman Christ, Brian Cole, Arlin Crotts, Charles Hailey, Jules Halpern, Tony Heinz, David Helfand, Robert Mawhinney, John Parsons, Frederik Paerels, Joseph Patterson, Michael Shaevitz, Michael Tuts, Jacqueline van Gorkom, William Zajc

* Students may substitute a Columbia College three-semester calculus-based introductory physics sequence with lab taken at Barnard, as in the physics major.
** Students who have taken ASTR BC 1753 Life in the Universe-ASTR BC 1754 Stars, Galaxies, and Cosmology or ASTR UN1403 Earth, Moon and Planets (Lecture)-ASTR UN1404 Stars, Galaxies and Cosmology (Lecture) may substitute an additional 3000-level ASTR course for ASTR UN 2001 Introduction To Astrophysics, I-ASTR UN 2002 Introduction To Astrophysics, II.

Requirements for the Physics Major

Students who have taken PHYS BC3006 Quantum Physics, PHYS UN3003 Mechanics, PHYS UN3007 Electricity and Magnetism-PHYS UN3008 Electromagnetic Waves and Optics, PHYS GU4023 Thermal and Statistical Physics, some additional courses in mathematics, and Computer Science COMS W1001 Introduction to Information Science or COMS W1004 Introduction to Computer Science and Programming in Java. Note: When any of the required courses is not being given, the department will recommend appropriate substitutions.

The courses required for the major in physics are:

PHYS BC2001 Physics I: Mechanics * 4.5
PHYS BC2002 Physics II: Electricity and Magnetism * 4.5
PHYS BC3001 Physics III: Classical Waves & Optics * 5

Calculus through IV is required, with additional work in mathematics recommended; e.g., MATH E1201x,y, APMA E3102y. The calculus sequence should be completed by the end of the sophomore year.

PHYS UN3003 Mechanics 3
PHYS BC3006 Quantum Physics 3
PHYS UN3007 Electricity and Magnetism 3
PHYS UN3008 Electromagnetic Waves and Optics 3
PHYS GU4023 Thermal and Statistical Physics 3

PHYS BC3086-3088 Quantum Physics Laboratory and Advanced Electromagnetism Laboratory (taken concurrently with their cognate lecture courses) 6

Select one of the following: 3

COMS W1001 Introduction to Information Science 3
COMS W1004 Introduction to Computer Science and Programming in Java 3
PHYS UN3083 Electronics Laboratory 3

* In lieu of the above, any three-semester Columbia introductory sequence acceptable for the physics major in Columbia College will do (e.g., PHYS UN1601 Physics, I: Mechanics and Relativity-PHYS UN1602 Physics, II: Thermodynamics, Electricity, and Magnetism, PHYS UN2601 Physics, III: Classical and Quantum Waves, taken with labs at Barnard). The accelerated two-semester Columbia College sequence PHYS UN2801 Accelerated Physics I-PHYS UN2802 Accelerated Physics II is also acceptable.

Students planning to study physics in graduate school should include several 4000-level electives in their senior year program.

Interdisciplinary Major

Special majors in, for example, astrophysics, biophysics, chemical physics, engineering physics, or mathematical physics are all possible and are arranged in conjunction with the relevant second department at Barnard. A student interested in such possibilities should speak to a faculty member early on (i.e., by late fall of her sophomore year) in order to permit the most effective construction of her program of study and the appropriate petition to be made to the Committee on Programs and Academic Standing. The latter is a straightforward procedure associated with the declaration of all special majors at Barnard.

Requirements for the Physics Minor

Five courses are required for the minor in physics. They are: any three-semester introductory sequence acceptable for the major (see above) plus two additional 3-point courses at the 3000-level.

Astronomy Courses

ASTR BC1753 Life in the Universe. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Introduction to astronomy intended primarily for nonscience majors. Includes the history of astronomy; the apparent motions of the moon, sun, stars, and planets; gravitation and planetary orbits; the physics of the earth and its atmosphere; and the exploration of the solar system. This course is similar to ASTR W1403. You cannot enroll in both courses and receive credit for both.

ASTR BC1754 Stars, Galaxies, and Cosmology. 3 points.

Prerequisites: Recommended preparation: A working knowledge of high school algebra.

Corequisites: Suggested parallel laboratory course: ASTR C 1904y. Examines the properties of stars, star formation, stellar evolution and nucleosynthesis, the Milky Way and other galaxies, and the cosmological origin and evolution of the universe. Students may not receive credit for both ASTR BC 1754 and ASTR C1404.
ASTR 1404 Stars, Galaxies and Cosmology (Lecture). 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Distances to, and fundamental properties of, nearby stars; nucleosynthesis and stellar evolution; novae and supernovae; galaxies; the structure of the universe and theories concerning its origin, evolution, and ultimate fate. You can only receive credit for ASTR UN1404 if you have not taken ASTR BC1754, ASTR UN1420 or ASTR UN1836.

Spring 2020: ASTR UN1404

ASTR 1420 Galaxies and Cosmology. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Galaxies contain stars, gas dust, and (usually) super-massive black holes. They are found throughout the Universe, traveling through space and occasionally crashing into each other. This course will look at how these magnificent systems form and evolve, and what they can tell us about the formation and evolution of the Universe itself. You cannot enroll in ASTR UN1420 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

Fall 2019: ASTR UN1420

ASTR 1453 Another Earth. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

This course cannot be taken for credit if BC1753 has been taken.

This course will explore the unique properties of Earth, compared to other planets in the Solar System, and the possibility of Earth-like planets around other stars. The basics of the Solar System, gravity, and light will be covered, as well as the geology and atmospheres of the terrestrial planets. The properties of Earth that allowed life to develop and whether life can develop on other planets will be discussed. Finally, the discovery of planets beyond our Solar System and the likelihood of another Earth will be a key component of the course.

ASTR 1610 Theories of the Universe: From Babylon to the Big Bang. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Milestones in the science of cosmology over the past 6000 years. Skylore and observation in ancient cultures. The twin revolutions of the Greeks: Pythagoras and Ptolemy; and Aristotle, Aquinas, and the Great Chain of Being. The "scientific revolution": the impersonal and deterministic world-order of Newton, Laplace, and Kelvin. The erosion of that world-order by mathematics and experiment in the 20th century (relativity, quantum physics, dark matter, and the expanding universe). Today's searches for a new grand order in the Universe, which can cope - or maybe not - with these blows to yesterday's comfortable wisdom.

ASTR 1836 Stars and Atoms. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

ASTR UN2001 Introduction To Astrophysics, I. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a working knowledge of calculus. Corequisites: a course in calculus-based general physics. First term of a two-term calculus-based introduction to astronomy and astrophysics. Topics include the physics of stellar interiors, stellar atmospheres and spectral classifications, stellar energy generation and nucleosynthesis, supernovae, neutron stars, white dwarfs, and interacting binary stars.

ASTR UN2002 Introduction To Astrophysics, II. 3 points.

Prerequisites: a working knowledge of calculus. Corequisites: the second term of a course in calculus-based general physics. Continuation of ASTR UN2001; these two courses constitute a full year of calculus-based introduction to astrophysics. Topics include the structure of our galaxy, the interstellar medium, star clusters, properties of external galaxies, clusters of galaxies, active galactic nuclei, and cosmology.

ASTR UN3101 Modern Stellar Astrophysics II. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. Introductory astronomy is not required, but some exposure to astronomy is preferable. In the first half of the course, we will examine the physics of stellar interiors in detail, leading us to develop models of stellar structure and consider how stars evolve. In the second half of the course, we will discuss special topics, such as pre-main sequence evolution, the late stages of stellar evolution, and supernovae and compact objects.

ASTR UN3102 Planetary Dynamics and Physics of the Solar System. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

ASTR UN3103 Galaxies. 3 points.

Prerequisites: one year of calculus-based general physics. Galaxies fill the universe with structure. They are bound objects that harbor stars, gas, dust and dark matter. This course will discuss the content and structure of galaxies. It will start with the Milky Way, a rotating spiral galaxy, with a particular emphasis on the properties of the interstellar medium. Dwarf galaxies, the building blocks of larger galaxies, will subsequently be discussed, followed by spiral, elliptical
and irregular galaxies. The formation and evolution of these different galaxy types will be an important focus of the course, as well as the environment in which the galaxies reside. We will intersperse reviews of current papers on galaxies throughout the semester.

**ASTR UN3105 Extrasolar Planets and Astrobiology. 3 points.**
Prerequisites: One year of calculus-based physics.

The emerging field of extrasolar planets and astrobiology will be covered at a quantitative level, with a major emphasis on astrophysical phenomenae and techniques. The subject will be introduced through an investigation of current planetary formation theories and approaches to planet detection, including what we currently know about extrasolar planets and detailed reference to state-of-the-art studies. An astronomer’s view of the origin of life and extreme biology will be developed and applied to questions of cosmo-chemistry, observable life-signatures, habitable zones and other astrophysical constraints on the development of organisms.

**ASTR UN3106 The Science of Space Exploration. 3 points.**
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one semester course in introductory astronomy or astrophysics (e.g., ASTR UN1403, ASTR UN1404, ASTR UN1420, ASTR UN1836, ASTR UN2001, ASTR UN2002, ASTR BC1753, ASTR BC1754).

Ability in mathematics up to and including calculus is strongly urged. How and why do humans explore space? Why does it require such extraordinary effort? What have we found by exploring our Solar System? We investigate the physics and biological basis of space exploration, and the technologies and science issues that determine what we can accomplish. What has been accomplished in the past, what is being explored now, and what can we expect in the future? How do space scientists explore the Solar System and answer science questions in practice? What do we know about solar systems beyond our own?

**ASTR UN3273 High Energy Astrophysics. 3 points.**
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. No previous, nonastronomy background required.

A survey of the most energetic and explosive objects in the Universe and their radiation. Topics include: techniques of X-ray and gamma-ray astronomy; observations of neutron stars (pulsars) and black holes; accretion disks and relativistic jets; supernovae, supernova remnants, gamma-ray bursts, quasars and active galactic nuclei; clusters of galaxies; cosmic rays and neutrinos.

**ASTR UN3602 Physical Cosmology and Extragalactic Astronomy. 3 points.**
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.

The standard hot big bang cosmological model and modern observational results that test it. Topics include the Friedmann equations and the expansion of the universe, dark matter, dark energy, inflation, primordial nucleosynthesis, the cosmic microwave background, the formation of large-scale cosmic structures, and modern cosmological observations.

**ASTR UN3646 Observational Astronomy. 3 points.**

Prerequisites: one year of general astronomy

Introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on ‘ground-based’ methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs. In research projects, students also work on the analysis of data obtained at National Observatories.

**ASTR UN3985 Statistics and the Universe (Seminar). 3 points.**

Prerequisites: First year calculus required, introductory physics or astronomy

Essential statistical methods will be applied in a series of case studies and research projects taken from the latest advances in cosmology, astronomy and physics. Statistics of measurement and detection, fundamentals of hypothesis testing, classifications, data modeling, time-series analysis, correlation and clustering will be explored through hands-on investigation using data from recent experiments and surveys.

**ASTR UN3996 Current Research in Astrophysics. 1 point.**

Prerequisites: two semesters of astronomy classes and two semesters of physics classes.

The goal of this course is to introduce astronomy and astrophysics majors to the methods and topics of current astronomical research. The course will also help with the development of critical thinking skills. Each week, the topic of the course will be centered on the subject of the Astronomy department colloquium; this may include research on planets, stars, galaxies or cosmology. There will be two required meetings per week: the first will be to discuss papers related to the colloquium (time TBD), and the second will be the colloquium itself (at 4:15 pm each Wednesday). Grading is Pass/Fail.

**ASTR UN4302 General Relativity, Black Holes, and Cosmology. 3 points.**
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.

Einstein’s General Theory of Relativity replaced Newtonian gravity with an elegant theory of curved spacetime. Einstein’s theory led to unforeseen and unnerving predictions of singularities and cosmological instabilities. Nearly a century later, these mathematical oddities have been confirmed astrophysically in the existence of black holes, an expanding universe, and a big bang. The course will cover Einstein’s
General Theory, beginning with special relativity, with an emphasis on black holes and the big bang.

**Physics Courses**

**PHYS BC2001 Physics I: Mechanics. 4.5 points.**
BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA)., Lab Required

Corequisites: Calculus I or the equivalent.
Fundamental laws of mechanics. Kinematics, Newton's laws, work and energy, conservation laws, collisions, rotational motion, oscillations, gravitation.

**PHYS BC2002 Physics II: Electricity and Magnetism. 4.5 points.**
BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA), Lab Required

Prerequisites: Physics BC2001 or the equivalent.
Corequisites: Calculus II.

**PHYS BC3001 Physics III: Classical Waves & Optics. 5 points.**

Prerequisites: Physics BC2002 or the equivalent.
Corequisites: Calculus III.
Nonlinear pendula, transverse vibrations-elastic strings, longitudinal sound waves, seismic waves, electromagnetic oscillations & light, rainbows, haloes, the Green Flash; polarization phenomena - Haidinger’s Brush, Brewster’s angle, double refraction, optical activity; gravity & capillary waves; interference, diffraction, lenses & mirrors.

**PHYS BC3006 Quantum Physics. 3 points.**
Prerequisites: BC3001 or C2601 or the equivalent.

**PHYS BC3082 Advanced Physics Laboratory. 1.5 point.**
Barnard College physics laboratory has a variety of experiments meant to complement 3000-level lecture courses. Each experiment requires substantial preparation, as well as written and oral presentations. Elementary particle experiments: detectors, cosmic ray triggers, muon lifetime.

**PHYS BC3086 Quantum Physics Laboratory. 3 points.**

Experiments illustrating phenomenological aspects of the early quantum theory: (i) Hydrogenic Spectra: Balmer Series & Bohr-Sommerfeld Model; (ii) Photoelectric Effect: Millikan’s Determination of h/e; (iii) Franck-Hertz Experiment; and (iv) Electron Diffraction Phenomena. Substantial preparation required, including written and oral presentations, as well as an interest in developing the knack and intuition of an experimental physicist. This course is best taken concurrently with PHYS BC3006 Quantum Physics.

**PHYS BC3088 Advanced Electromagnetism Laboratory. 3 points.**

Classical electromagnetic wave phenomena via Maxwell’s equations, including: (i) Michelson and Fabry-Perot Interferometry, as well as a thin-film interference and elementary dispersion theory; (ii) Fraunhofer Diffraction (and a bit of Fresnel); (iii) Wireless Telegraphy I: AM Radio Receivers; and (iv) Wireless Telegraphy II: AM Transmitters. Last two labs pay homage to relevant scientific developments in the period 1875-1925, from the discovery of Hertzian waves to the Golden Age of Radio. Complements PHYS W3008 Electromagnetic Waves and Optics.

**PHYS BC3900 Supervised Individual Research. 1-5 points.**

1-5 points per term.
Prerequisites: Permission of the departmental representative required. For specially selected students, the opportunity to do a research problem in contemporary physics under the supervision of a faculty member. Each year several juniors are chosen in the spring to carry out such a project beginning in the autumn term. A detailed report on the research is presented by the student when the project is complete.
PHYS 1201 General Physics I. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: some basic background in calculus or be concurrently taking MATH UN1101 Calculus I. The accompanying laboratory is PHYS UN1291-UN1292.

The course will use elementary concepts from calculus. The accompanying laboratory is PHYS UN1291 - UN1292. Basic introduction to the study of mechanics, fluids, thermodynamics, electricity, magnetism, optics, special relativity, quantum mechanics, atomic physics, and nuclear physics.

PHYS UN1202 General Physics II. 3 points.
CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: This course will use elementary concepts from calculus. Students should therefore have had some high school calculus, or be concurrently enrolled in MATH UN1101. Taken with accompanying lab PHYS UN1291- PHYS UN1292, the sequence PHYS UN1201- PHYS UN1202 satisfies requirements for medical school. Electricity, magnetism, optics, and modern physics.

PHYS UN1291 General Physics Laboratory. 1 point.
Same course as PHYS W1291x, but given off-sequence.

Corequisites: PHYS UN1201
PHYS 1292 General Physics Laboratory II. 1 point.

Corequisites: PHYS UN1201, PHYS UN1202

This course is the laboratory for the corequisite lecture course (PHYS UN1201 - PHYS UN1202) and can be taken only during the same term as the corresponding lecture.

PHYS UN2801 Accelerated Physics I. 4.5 points.

Prerequisites: Advanced Placement in physics and mathematics, or the equivalent, and the instructor's permission. (A special placement meeting is held during Orientation.)

This accelerated two-semester sequence covers the subject matter of PHYS UN1601, PHYS UN1602 and PHYS UN2601, and is intended for those students who have an exceptionally strong background in both physics and mathematics. The course is preparatory for advanced work in physics and related fields. There is no accompanying
laboratory; however, students are encouraged to take the intermediate laboratory, PHYS UN3081, in the following year.

Physics

PHYS UN3002 From Quarks To the Cosmos: Applications of Modern Physics. 3.5 points.
Not offered during 2019-20 academic year.
Prerequisites: PHYS UN2601 or PHYS UN2802
This course reinforces basic ideas of modern physics through applications to nuclear physics, high energy physics, astrophysics and cosmology. The ongoing Columbia research programs in these fields are used as practical examples. The course is preparatory for advanced work in physics and related fields.

Political Science

205 Lefrak
212-854-8422
Department Administrator: Madeleine Lloyd-Davies

The Department of Political Science

Political Science explores questions about power: what it is, where it comes from, who exercises it, how it is used and legitimized. Concretely, political scientists study the processes, policies and institutions of different political systems as well as critical issues such as health care policy, civil rights, the origins of wars, the nature of democracy, the causes of authoritarianism, the meaning of justice, and the genesis of terrorism.

Mission

In accordance with the mission of Barnard College, the political science department aims to create a community of teachers and students committed to intellectual discovery, rigorous analysis, and independent thought. The department’s courses emphasize reflection, discussion, deliberation and intensive interactions between faculty members and students. The Barnard political science department strives to help students think clearly and methodically about the questions and issues that make up political science, equip them with the intellectual and presentational skills necessary to understand and address practical political issues as well as prepare them for a wide range of careers in federal, state and local governments; law; business; international organizations; nonprofit associations and organizations; campaign management and polling; journalism; pre-collegiate education; electoral politics; research and university and college teaching. The department recognizes four subfields of the discipline:

Political Theory: the study of the conceptual foundations of political systems and behavior.

- Student learning outcome: after completing one or more courses in Political Theory students should have a familiarity with some of the key concepts, theories and debates that have defined thinking about politics over time.

American Government and Politics: the study of all aspects of the American political system, including its development, institutions, procedures, and actors.

- Student learning outcome: after completing one or more courses in American Government and Politics students should understand the basic structure of the American political system and how some of its institutions, procedures, and actors function.

Comparative Politics: the study of the political systems of other countries and regions, including the use of comparisons across cases in order to gain a broader and deeper understanding of events, institutions, and processes.

- Student learning outcome: after completing one or more courses in Comparative Politics students should have a familiarity with the political systems of other countries and regions, and be able to use comparisons across cases in order to gain a broader and deeper understanding of political events, institutions, and processes.

International Relations: the study of relations between countries and the dynamics and development of the international system.

- Student learning outcome: after completing one or more courses in International Relations students should understand the key approaches to the study of the relations between countries and a familiarity with the basic dynamics and development of the international system.

Student Learning Outcomes

Upon completion of the Barnard Political Science major, students should be able to:

- Analyze, speak and write about the subject matter and major theories of at least three of the four subfields of political science;
- Apply social scientific reasoning and theories to the analysis of a wide range of political issues and problems;
- Generate and test hypotheses about political processes, relationships and institutions or engage in conceptual analysis and interpretation of political ideas, arguments, and phenomena;
- Complete independent research projects in political science, particularly via the capstone senior project.

Five-Year Bachelors/Master of Arts Programs

Students interested in public careers should consider the five-year joint-degree programs at Columbia University’s School of International & Public Affairs (SIPA).

- The SIPA programs include the Graduate Program in Public Policy & Administration (MPA) and the Master of International Affairs Program (MIA). For information, please contact the Department Representative (http://polisci.barnard.edu/faculty-directory/).

Chair: Kimberly Marten (Professor)
Professors: Alexander A. Cooley, Sheri E. Berman, Xiaobo Lu, Severine Autesserre, Paula A. Franzese (Visiting)
Associate Professors: Ayten Gündoğdu
Assistant Professors: Katherine Krimmel, Michael G. Miller, Eduardo Moncada, Michelle Smith, Claire Ullman (Adjunct)

Other Officers of the University Offering Courses in Political Science: Columbia Political Science Faculty (http://www.columbia.edu/cu/polisci/fac/facbyfield/faclistbyfield/)
Requirements for the Major—students who were first-years in Fall 2015 or earlier

A total of nine courses are necessary to complete the Political Science major:

- Three introductory lecture courses at the 1000-level or 3000-level (http://polisci.barnard.edu/introductory-courses/#3000) from different subfields,
- Three elective courses,
- Three colloquia

Please use the Major Audit (http://polisci.barnard.edu/sites/default/files/audit.2013_update.pdf) to plan your program and track your courses for the major.

The department recognizes four subfields of the discipline:

- American Government and Politics: the study of all aspects of the American political system, including its development, institutions, procedures, and actors.
- Comparative Politics: the study of the political systems of other countries and regions, including the use of comparisons across cases in order to gain a broader and deeper understanding of events, institutions, and processes.
- International Relations: the study of relations between countries and the dynamics and development of the international system.
- Political Theory: the study of the conceptual foundations of political systems and behavior.

The three colloquia must be taken with faculty at Barnard College. Many of the lecture courses may be taken with faculty at Columbia College, if these courses are cross-listed. Various study-abroad options and summer courses also may meet your specialized interests, but these require

1. prior consultation with your major adviser, as well as
2. prior approval by the Departmental C (http://polisci.barnard.edu/faculty-directory/#dept-)(hair and
3. subsequent approval by the Department Chair once you apply to transfer the credit to Barnard (use the Course Approval Request Form for steps 2 and 3).

Students interested in the Sciences Po–Barnard five-year joint-degree program are encouraged to meet with the Dean for Study-Abroad, also regarding the political science aspects of this BA/MA program. The requirements are at the end of this page.

Please use the Major Audit (http://polisci.barnard.edu/sites/default/files/audit.2013_update.pdf) to plan your program and track your courses for the major.

Introductory-level Lecture Course Requirement (three lecture courses)

The political science department requires all students to take at least one introductory 1000- or 3000-level lecture course (http://polisci.barnard.edu/introductory-courses/) in three of the four subfields of political science (listed above). These courses are designed to provide an introduction to the main subject matter and major theories of each subfield.

These courses also serve to familiarize students with the analytic approaches that political scientists use. After taking lecture courses in the relevant subfields, students are eligible to take the two required colloquium courses.

Advanced Placement Credit

A student granted Advanced Placement (AP) credit by the College in either American Politics or Comparative Politics with an exam score of 5 will have fulfilled the prerequisite for courses that require the prior completion of POLS UN1201 Introduction To American Government and Politics or POLS UN1501 Introduction to Comparative Politics, respectively. If the student wants to take the introductory American Politics or Comparative Politics course, she may do so, but she will forfeit her corresponding AP credit.

AP credit does not count toward the number of courses required for the major or minor, i.e. the student still needs to complete the nine courses for the major or the five for the minor.

Electives Requirement (three additional courses)

All political science courses emphasize social scientific reasoning and theory application. In addition, political science majors chose three electives (http://polisci.barnard.edu/electives/) (normally at the 3000- or 4000-level). These courses are designed to deepen and expand students’ knowledge base and encourage them to apply social scientific reasoning and theories to the analysis of a broad range of political issues and problems.

What fulfills the Three-Course Electives requirement

1. All courses offered at Barnard or Columbia in political science listed in the Barnard Course Catalogue, including introductory lecture courses and colloquia, satisfy elective course requirements. Courses listed in Columbia catalogues which are not listed in the Barnard catalogue require approval by Barnard Department Representative (http://polisci.barnard.edu/faculty-directory/#dept-rep), before counting toward the major or concentration (use the Course Approval Request Form (http://polisci.barnard.edu/sites/default/files/inline/pols_approval-request.pdf)).

2. The Independent Study Option (http://polisci.barnard.edu/independent-study/) POLS BC3799 Independent Study. Students who wish to do an independent study project (ISP) should first speak to a political science faculty member willing to sponsor it. Credit is given for an academic research paper written in conjunction with an internship, but no academic credit is given for an internship or job experience per sé. The student must then apply to the Committee on Programs and Academic Standing (CPAS), which must approve all Independent Study requests. Once the request is granted, the Registrar creates a section and assigns a call number, and the student is notified of the call number so she can enter the course on her program. (Each instructor has a separate section and assigns a call number. Each instructor is limited to sponsoring one independent study per semester.) Students will consult with the sponsoring instructor as to workload and points of credit for the independent study course. Independent study counts as a course for the purpose of the nine-course requirement, provided the project is approved for 3 or 4 points. A project taken for 1 or 2 points does not count as a course toward the major, the minor, or the concentration requirement.

3. With pre-approval, first from the individual Major Advisor and then from the Department Representative, a student may substitute a course in another department for one of the three elective courses. This course cannot be an introductory course and it must have
significant political science content (use the Course Approval Request Form (http://polisci.barnard.edu/sites/default/files/inline/pols_approval-request.pdf)). Approval after the fact will not be granted.

4. Six of the nine courses for the major must be taken from courses listed in the political science section of the Barnard Course Catalogue. Within the three-course limit of courses taken elsewhere, the following caps traditionally apply: three transfer courses; two Reid Hall courses; two study-abroad courses; one summer session course. On rare occasions the Department Representative may grant an exception (use the Course Approval Request Form (http://polisci.barnard.edu/sites/default/files/inline/pols_approval-request.pdf)).

What does not fulfill the Three-Course Electives requirements

The Independent Study Option POLS BC3799 Independent Study does not satisfy the course requirement if the project is for 1 or 2 points.

College-granted AP credit for American Politics or Comparative Politics does not count as major course credit. (See Advanced Placement Credit, above.)

Courses taken at other colleges, in summer sessions, or abroad, which are not equivalent in rigor and workload to Barnard courses, as determined by the Department Representative, in consultation with other faculty of the department, will not count toward the major or minor requirements.

Colloquium Requirement (three one-semester courses)

Although all political science courses teach students to generate and test hypotheses about political processes, relationships and institutions and/or engage in conceptual analysis and interpretation of political ideas, arguments and phenomena, students are encouraged to do this at a higher level in their three required colloquia (http://polisci.barnard.edu/colloquia/). These colloquia feature intensive, small group discussions and a major research paper, and provide students with an opportunity to work more independently than they probably have in previous courses.

The colloquium format involves weekly discussion of readings, and development of research skills through completion of a 25- to 30-page research paper, constituting the major piece of written work for the course. Admission is limited to sixteen students who are assigned by the department, not by individual instructors. Students must have completed one lecture course in the relevant subfield before enrolling in the colloquium (or must receive special permission from the instructor for that requirement to be waived). It is recommended but not required that the three required colloquia be taken with different Barnard instructors and selected from the asterisked colloquium offerings listed in the Barnard course catalogue. Columbia seminars do not fulfill this requirement.

If you plan on spending part or all of junior year abroad

Plan to take a colloquium during the second semester of your sophomore year. This means applying for the colloquium during the first semester of your sophomore year. Indicate on your colloquium application that you plan to be abroad one or both semesters during junior year.

If you plan to be away for the entire junior year, you must plan on taking a colloquium in your sophomore year. Please be sure to e-mail both your academic major advisor and the department administrator by the middle of March of your year abroad, in order to apply for a colloquium if you need to take one in the fall of your senior year.

Senior Projects and the Third Colloquium

Students must designate one of the three colloquia to fulfill the Senior Project. Students must indicate their intention to take a colloquium for the Senior Project colloquium on their application and work completed in this colloquium will be considered for Senior Project Distinction. The designated Senior Project colloquium cannot be changed after the Add/Drop deadline of the semester in which the colloquium is being offered.

All students will display a summary poster of their designated Senior Research Paper written for the third colloquium at the Political Science Majors Senior Event at the end of the Spring semester. Early graduates will be required to submit their poster to the Department prior to graduating. Posters can be displayed in absentia for those students who graduate early.

Requirements for the Combined Major

A student doing a combined major in Human Rights (p. 308) and Political Science must complete the full nine-course requirements for the Political Science major in addition to Human Rights courses. Both departments must agree on the potential departmental honors nomination.

A student doing a combined major in Jewish Studies (p. 332) and Political Science must complete the full nine-course requirements for the Political Science major in addition to Jewish Studies courses. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

A student doing a combined major in Women's Studies (p. 480) and Political Science must complete the full nine-course requirements for the Political Science major in addition to Women's Studies courses. She must consult both thesis advisors (=sponsors) on a regular basis throughout the colloquium and the completed thesis must integrate the two fields of inquiry. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

Any other combined major (for example, Art History-Political Science), or a special major, requires a petition to the Committee on Programs and Academic Standing (CPAS) and the approval of the Chairs of the sponsoring departments. (For Political Science, obtain the approval of the Department Representative (http://polisci.barnard.edu/faculty-directory/#dept-rep).) Obtain forms and instructions from the Class Dean in the Dean of Studies Office. The student will be required to take a minimum of seven political science courses of at least three points each, including two lecture courses and three colloquia, to be selected in consultation with the Departmental Representative. The student is expected to take a third colloquium. She must consult both essay advisors (=sponsors) on a regular basis throughout the colloquium, assuring integration of the two fields of inquiry. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

Requirements for the Double Major with One Integrating Senior Essay

The student is required to complete the coursework for each major with no overlapping courses, but will undertake only one integrating senior requirement project with two thesis advisors (=sponsors), one from
Requirements for the Minor

A total of five courses are necessary to complete a minor. Four of these courses must be taken from courses listed in the Political Science section of the Barnard Course Catalogue. Only one political science course taken in a summer session, study-abroad program, Reid Hall Program, or another undergraduate college may be used to satisfy the five-course requirement for the minor, with the approval of the Department Representative.

Faculty and Staff members designated to answer questions:

Kimberly Marten, Professor & Department Chair, (x4-4440 or 4-7912), kmarten@barnard.edu

Madeleine Lloyd-Davies, Department Administrator, (x 4-8422), mlloydda@barnard.edu

Introductory Courses

Three introductory-level lecture courses, each from a different subfield, are required of all Barnard majors and concentrators. These courses are designed to provide an introduction to the main subject matter and major theories of each subfield. Any lecture course at the 1000-level that is listed in this section fulfills this requirement. In addition, selected lecture courses at the 3000-level may be substituted for a 1000-level course in the same subfield. A list of appropriate Barnard and Columbia 3000-level political science lecture courses is (http://polisci.barnard.edu/introductory-courses/#3000). The subfields of all Barnard courses are listed. These are:

- Political Theory: the study of the conceptual foundations of political systems and behavior.
- American Government and Politics: the study of all aspects of the American political system, including its development, institutions, procedures, and actors.
- Comparative Politics: the study of the political systems of other countries and regions, including the use of comparisons across cases in order to gain a broader and deeper understanding of events, institutions, and processes.
- International Relations: the study of relations between countries and the dynamics and development of the international system.

Advanced Placement Credit

A student granted Advanced Placement (AP) credit by the College in either American Politics or Comparative Politics with an exam score of 5 will have fulfilled the prerequisite for courses that require the prior completion of POLS BC 1201 or V 1501, respectively. If the student wants to take the introductory American Politics or Comparative Politics course, she may do so, but she will forfeit her corresponding AP credit.

AP credit does not count toward the number of courses required for the major or minor, i.e. the student still needs to complete the nine courses for the major or the five for the minor.

Introductory Courses

POLS UN1101 Political Theory 1. 4 points.

What is the relationship between law and justice? Are capacities of political judgment shared by the many or reserved for the few? What does human equality consist of and what are its implications? Can individual freedom be reconciled with the demands of political community? What are the origins and effects of persistent gender inequalities? These are some of the crucial questions that we will address in this introductory course in political theory. The course is divided into five thematic sections, each addressing an enduring political problem or issue and centered on a key text in the history of political thought: 1. Laws, Obligations, and the Question of Disobedience; Sophocles, Antigone; 2. Democratic Citizenship and the Capacities of Political Judgment; Plato, Republic; 3. Origins and Effects of (In)equality; John Locke, Second Treatise of Civil Government; 4. Paradoxes of Freedom; Jean Jacques Rousseau, On the Social Contract; 5. The Woman Question; John Stuart Mill, The Subjection of Women.
POLS 1201 Introduction To American Government and Politics. 4 points.

This course provides a broad overview of the comparative politics subfield by focusing on important substantive questions about the world today. The course is organized around four questions. First, why can only some people depend upon the state to enforce order? Second, how can we account for the differences between autocracies and democracies? Third, what different institutional forms does democratic government take? Finally, are some institutions more likely than others to produce desirable social outcomes such as accountability, redistribution, and political stability?

Lecture Courses

POLS BC3200 American Political Development, 1789-1980. 3 points.

Prerequisites: V 1201 or equivalent intro course in American Politics. American Political Development (APD) is an emerging subfield within American Politics that focuses on the ways that political culture, ideology, governing structures (executives, legislatures, judiciaries, and subnational governments) and structures of political linkage (political parties and organized interests) shape the development of political conflict and public policy. Rejecting the fragmentation of the field of American Politics into narrow specialties, it links government, politics, policy, culture, and economics in a broad-gauged search for understanding. (Cross-listed by the American Studies Program.)

POLS BC3025 American Political Parties. 3 points.
Political parties have evoked widespread scorn in the U.S. since the founding era, and yet, they arose almost immediately and have endured for over two centuries. In this course, we will examine why parties formed despite the Founders' disdain for them. (In 1789, Thomas Jefferson wrote, "If I could not go to heaven but with a party, I would not go at all." In 1800, he won the presidency as a candidate of a major party.) We will dig into scholarly debates about what exactly parties are, what purpose they serve, and how and why they have changed over time as organizations, in the electorate, and in government.

Topics will include the presidential nomination process from the founding through the much-discussed 2016 primary election season, the life cycle of third parties, and the relationship between political parties and interest groups. Students will learn what is and is not unique about the current historical moment, and how history might shape our expectations of parties moving forward.

Throughout the course, we will pay particularly close attention to the roots of contemporary party polarization, and the implications of this phenomenon for representation and governance. In 1950, the American Political Science Association released a report criticizing the two major parties for excessive similarity; today, party polarization evokes widespread concern. Is there an ideal level of party difference? How much is too much? We will address these difficult questions, among others, in this broad survey of American political parties.

POLS BC3030 Drawing Conclusions – Political Cartoons, Comix and the Uncensored Artistic Mind. 3 points.
This course examines the past, present and future of political cartooning, satire and protest art. The work presented will be chosen for its unique ability to demonstrate the inflammatory effect of humor, uncensored commentary and critical thinking on a society so often perplexed by artistic free expression and radicalized creative candor.

POLS BC3254 First Amendment Values. 3 points.
Prerequisites: POLS W1201 or an equivalent. Not an introductory course. Not open to students who have taken the colloquium POLS BC3302.
Examines the first amendment rights of speech, press, religion, and assembly. In-depth analysis of landmark Supreme Court rulings provides the basis for exploring theoretical antecedents as well as contemporary applications of such doctrines as freedom of association, libel, symbolic speech, obscenity, hate speech, political speech, commercial speech, freedom of the press and religion. (Cross-listed by the American Studies Program.)
POLS BC3402 The Comparative Politics of Gender Inequality. 3 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Prerequisites: Not an introductory-level course. Not open to students who have taken the colloquium POLS BC 3507. Enrollment limited to 20 students; L-course sign-up through eBear (http://ebear.barnard.edu/). Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).

The practical application of theory to actual experiences and situations. Uses major analytical perspectives in comparative politics to understand the persistence of gender inequality in advanced industrial states. Topics include: political representation and participation; political economy and capitalism; the historical development of welfare states; electoral systems, electoral quotas; the role of supranational and international organizations; and social policy.

POLS BC3403 Psychology and Decision-Making in Foreign Policy. 3 points.
Not offered during 2019-20 academic year.

Why do leaders make the decisions they do? International Relations scholars are increasingly recognizing the importance of psychological approaches to understanding world affairs, particularly the crafting and implementation of foreign policy. We examine humans’ cognitive biases and other dynamics that produce often surprising, suboptimal outcomes in international politics.

POLS BC3521 Civil Rights and Civil Liberties. 3 points.
Prerequisites: POLS W1201 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Not an introductory-level course. Not open to students who have taken the colloquium POLS BC3326. Enrollment limited to 25 students; L-course sign-up through eBear (http://ebear.barnard.edu/). Barnard syllabus (http://polisci.barnard.edu/syllabi/#ap).

Explores seminal caselaw to inform contemporary civil rights and civil liberties jurisprudence and policy. Specifically, the readings examine historical and contemporary first amendment values, including freedom of speech and the press, economic liberties, takings law, discrimination based on race, gender, class and sexual preference, affirmative action, the right to privacy, reproductive freedom, the right to die, criminal procedure and adjudication, the rights of the criminally accused post-9/11 and the death penalty. (Cross-listed by the American Studies and Human Rights Programs.)

For the Barnard Political Science major, this seminar counts as elective credit only. (Cross-listed by the Human Rights Program.)

POLS BC3615 Globalization and International Politics. 3 points.
Not offered during 2019-20 academic year.

Explores how globalization affects the structures and functions of the international economy, state sovereignty, international security, and international civil society. Emphasis on problems of international governance, legitimacy and accountability, and the evolving organizational processes that characterize contemporary international politics.

POLS UN3103 Great Political Thinkers in the Black Intellectual Tradition. 3 points.
Prerequisites: None.

In this course, we examine how the black intellectual tradition’s best political thinkers grappled with a concrete and particular instance of a universal problematic of domination and submission, inclusion and exclusion, power and powerlessness, and the question of how subaltern groups can find liberation from their subalternity. Though many of the thinkers under consideration are significant as political actors, we understand their writings to provide a complex and contested theoretical backdrop for political action. We explore how black thinkers 1) criticize and American democracy corrupted by slavery 2) articulate the ideological functions of ‘race’; 3) redefine race consciousness in terms of linked fate.

POLS UN3213 American Urban Politics. 3 points.
This course examines the pattern of political development in urban America, as the country’s population has grown in urbanized locations. It explores the process by which cities and suburbs are governed, how immigrants and migrants are incorporated, and how people of different races and ethnicities interact in urbanized settings as well as the institutional relations of cities and suburbs with other jurisdictions of government. The course focuses both on the historical as well the theoretical understandings of politics in urban areas.

POLS BC3601 International Law and the United Nations in Practice. 4 points.
Prerequisites: POLS V1601 or POLS/HRTS V3001 or equivalent (http://polisci.barnard.edu/introductory-courses/). Limited to 20 students. Admission by approval from Professor J. Paul Martin, jmartin@barnard.edu, Director of the Human Rights Program. For the Barnard Political Science major, this seminar counts as elective credit only.

Examines the development of international law and the United Nations, their evolution in the Twentieth Century, and their role in world affairs today. Concepts and principles are illustrated through their application to contemporary human rights and humanitarian challenges, and with respect to other threats to international peace and security. The course consists primarily of presentation and discussion, drawing heavily on the practical application of theory to actual experiences and situations.

Examination of economic and political development in China in a broader context of global transition from authoritarianism and state socialism.

**POLS W4205 Politics, Crime and Punishment. 0 points.**

Not offered during 2019-20 academic year.

Prerequisites: POLS W1201 Intro to American Politics or the equivalent. This course investigates the politics of crime and the criminal justice system. We investigate the origins of the politics of law and order from the mid-twentieth century to today, against a broader backdrop of partisan competition, urban de-industrialization, and socio-cultural tensions. Particular attention is paid to the role of politicians and political institutions such as the Congress, the Judiciary and federal, state and local bureaucracies such as local police in conceptualizing the need for a “war on crime,” and developing the political and institutional mechanisms for carrying out this war. The course reviews the current political, institutional and societal developments arising from the war on crime and current debates amongst politicians and policymakers. Issues such as sentencing disparities; racial differences in death penalty cases; New York City’s “stop and frisk” policy; and, felon disenfranchisement, are among some of the topics that will be covered in this course. Students will analyze a mix of social science research, legal cases, and policy analyses, as a means of understanding the political development of the American criminal justice. Readings and in-class discussions will be supplemented by guest speakers drawn from organizations involved in the crime/criminal justice system.

**POLS W4316 The American Presidency. 3 points.**

Not offered during 2019-20 academic year.

Prerequisites: POLS W1201 or any course that qualifies for the introductory-level (http://polisci.barnard.edu/introductory-courses/) American Politics course. Barnard syllabus (http://polisci.barnard.edu/syllabi/#ap). 

Growth of presidential power, creation and use of the institutionalized presidency, presidential-congressional and presidential-bureaucratic relationships, and the presidency and the national security apparatus. (Cross-listed by the American Studies Program.)

**POLS W4321 The Constitutional Law of Presidential-Congressional Relations. 3 points.**

POLS BC3055 * Colloquium on Political Violence and Terrorism. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: POLS V1501 or POLS V1601 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#ir).

What causes political violence and terrorism? How should we define “terrorism”—is it true, as the old saw goes, that one man’s terrorist is another man’s freedom fighter? What is the role of religious belief, as opposed to more immediate political goals, in fomenting terrorist action? Are al Qaeda and those linked to it different from terrorists we’ve seen in various places around the world in the past, or does all terrorism and political violence stem from the same variety of goals and purposes? Can governments take effective action to prevent or counter terrorism, or are we all doomed to live in insecurity? What is the proper balance between protection against terrorism and protection of civil liberties? This course examines these questions through weekly assigned readings, analysis and discussion.

POLS BC3101 * Colloquium on Black Political Thought. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: POLS W1013 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#pt).

Advanced political theory colloquium treats black political thought as concerned with the universal problem of domination. Examines how black thinkers relate democracy, slavery and race; redefine race consciousness as linked fate; articulate new social theories to suggest new “meanings” for race; redefine the political to address social and aesthetic concerns.

POLS BC3102 * Colloquium on Race and Modern Political Thought. 4 points.
Admission by application through the Barnard department only. Enrollment limited to 16 students.
Prerequisites: POLS 1013 or the equivalent.
Race and Modern Political Thought is a Political Theory colloquium that explores how the concept of race became available to modern thought as a legitimate conceptualization of human being and difference and to political thought as an idea useful to structuring political communities. Is race best understood in ideological terms, i.e., as a viewpoint shared by philosophers and lay-persons alike about difference that usefully reflected the needs and aspirations of slaveholders and colonialists? Or is race instead an artifact of modern forms of reasoning? Or should we ignore questions of origin and simply take seriously the notion that the only practical—ethically correct or politically progressive—approach to theorizing race is to attend critically to the organization of racial power? What kind of idea is race?

POLS BC3329 * Colloquium on Harlem in Theory. 4 points.
Prerequisites: Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students.
Harlem in Theory is an advanced political theory colloquium. Its focus is both thematic and methodological. Joining a two-thousand-year tradition of doing philosophy in and for the city, we theorize Harlem as urbs and civitas (place and socio-political association) and bring Harlem to bear on philosophy. We explore the political theorist’s craft by engaging different theoretical approaches and methodologies used by political, social and critical theorists. Our readings include political philosophy, critical frameworks for interpretation and historical, social scientific and literary works about Harlem - supplemented by film, music and of course periodic trips to various Harlem venues. General Education Requirement: Social Analysis (SOC).

POLS BC3330 Women in American Politics. 4 points.
Admission by application through the Barnard department only. Enrollment limited to 16 students.
Prerequisites: V1201 or equivalent
A well-functioning democracy should certainly reflect the intent of its citizens, but it is worthwhile to consider whether this goal is achievable when the legislative assembly does not take on the characteristics of the population. In Congress, membership is comprised of fewer than 20% of women. Women constitute a somewhat greater proportion of the various state assemblies, but still not at levels that approach their share of the population. In this class, we will discuss the electoral experiences of women who run for office. We will also consider whether the women who are elected to public office behave differently, and what, if any, implications such a difference might have for public policy. We will also study how gender intersects with race and socio-economics in American political life. This course will introduce students to the concepts, major themes, and debates in the study of gender in American politics. Students who complete the class will learn how to: 1. Identify the key concepts, trends, and debates in the empirical study of women in American politics. 2. Draw linkages between theoretical political science and practical politics in describing how gender affects political outcomes. 3. Critically engage media coverage of women in politics. 4. Assess the theoretical and/or empirical quality of academic arguments about women in politics. 5. Use empirical evidence to present an effective argument, both written and verbal. 6. Produce a high-quality, original research paper that contributes to our understanding of gender in American political life.

POLS BC3331 * Colloquium on American Political Decisionmaking. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: POLS W1201 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#ap).

Readings on decisionmaking, policy analysis, and the political setting of the administrative process. Students will simulate an ad hoc Cabinet Committee assigned to prepare a presidential program to deal with aspects of the foreign aid program involving hunger and malnutrition. (Cross-listed by the American Studies Program and by the Athena Center for Leadership Studies.)

POLS BC3332 * Colloquium on Exploring Political Leadership in the U.S.. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: POLS W1201 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#ap).

Exploration of the effect of political leadership on political outcomes in the United States, with special attention to how individual characteristics, like personality, political style, ideology, gender, race and class, interact with the political environment in shaping political outcomes. (Cross-listed by the American Studies Program and by the Athena Center for Leadership Studies.)

POLS BC3334 * Colloquium on American Elections and Campaigns. 4 points.
Prerequisites: POLS V1201 or equivalent American Politics course. POLS V3222 or equivalent Research Methods course is recommended. Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students.

The purpose of this course is to examine how political science can inform the real-world campaign environment, improving our understanding of strategy and outcomes in American elections.

POLS BC3337 Reforming American Elections. 3 points.
Prerequisites: POLS 1201 or an equivalent intro-level course in American Politics.

The purpose of this course is to examine problems in American democracy, and to critically evaluate proposals for reform. We will examine the manner in which political science has engaged "real-world" problems in election systems and administration, campaign finance, and fraud.

POLS BC3410 * Colloquium on Human Rights in a Diverse World. 4 points.
Prerequisites: Not open to students who have taken or are currently taking POLS UN3002. Prerequisites: POLS V1013 or HRTS UN3001 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students.

Examination of human rights within the context of international migration. The course covers topics such as citizenship, state sovereignty, border control, asylum-seekers, refugees, and undocumented immigrants. (Cross-listed by the Human Rights Program.)

POLS BC3411 * Colloquium on Building Peace. 4 points.
Prerequisites: POLS 1601 (Intro to International Politics) or equivalent. Admission by application (http://polisci.barnard.edu/colloquia/)

through the Barnard department only. Enrollment limited to 16 students.

How can we build peace in the aftermath of extensive violence? How can international actors help in this process? This colloquium focuses on international peacemaking, peacekeeping, and peacemaking efforts in recent conflicts. It covers general concepts, theories, and debates, as well as specific cases of peacemaking successes and failures. Cross-listed with Human Rights.

POLS BC3435 Law and Violence. 4 points.
Prerequisites: Admission by application through the Barnard Political Science Department only. Enrollment limited to 16 students. Requires POLS 1011 (Political Theory) or equivalent.

This colloquium examines how the law can participate in the justification of various forms of violence, exclusion, and inequality. It focuses on the power of law to determine which subjects get recognized as persons entitled to rights. Possible topics include slavery, migration, gender, sexual orientation, disability, homelessness, and nonhuman animals.

POLS BC3501 Urban Violence In Comparative Perspective. 4 points.
Admission by application through the Barnard department only.
Enrollment limited to 16 students.
Prerequisites: V 1501 or equivalent
One of the key contemporary challenges for democracy and development across both the developing and developed worlds is urban violence. From urban gangs to paramilitaries to vigilantes to citizen defense committees, the city is increasing a key setting for a range of armed actors that engage in equally diverse forms of criminality and the exercise of coercive force. Major cities throughout the world thus lead two lives: as control and command centers in a globalized (and urbanized) economy, and as the stages where the monopoly over the legitimate use of violence that Max Weber identified as a defining attribute of the state is contested on a daily basis. This course has two overarching objectives. The first objective is to examine and critically assess existing theories of the drivers, functions, and consequences of urban crime and violence. The second objective is to situate existing research within a broader range of classic and emerging political science research on state building, institutions, democracy, and development. 4. Use existing theories to analyze, assess, and present empirical data, both written and verbal.
5. Produce a major, original research paper that advances existing knowledge of the origins, dynamics, and/or consequences of urban crime and violence.

POLS BC3504 * Colloquium on Social Movements Across Time and Space. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: POLS V1501 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).
Examines the origins, trajectories, and effects of social movements, from 18th century Britain to 19th century Iran to late 20th century Argentina, China, and the United States. Focuses on social movements’ relation to political parties, the state, and transnational forces and asks whether social movements promote or undermine democratization.

POLS BC3505 * Colloquium on Making Democracy Work. 4 points.
Prerequisites: POLS V1501 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).
Examination of democratic consolidation and promotion. What makes democracy work and what, if anything, can outside actors do to help this process along? Topics include the theoretical literature on democratic consolidation, historical cases of intervention, debates about America’s role in promoting democracy, and examination of some of the research on democracy promotion. (Cross-listed by the European Studies and Human Rights Programs.)

POLS BC3507 *Colloquium on Gender, Politics, and Markets. 4 points.
Prerequisites: POLS V1501 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#cp).
Considers why men more than women control political and economic resources in advanced industrial states of the world. Examines how labor markets, welfare states, and political institutions have a different impact on women than men. Evaluates attempts at increasing gender equality in political representation, labor market participation, and household work. *Please note, students who have already taken BC 3402 The Competitive Politics of Gender Inequality may not register for this colloquium.* (Cross-listed by the Womens Studies Program.)

POLS BC3540 COMPARATIVE POLITICS OF RACE. 4 points.
Prerequisites: POLS V1501 or the equivalent. Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students.
The course will examine the development of, and relationship among, the three constituent features of the modern political world: states, nations and democracy. The course will analyze both historical and contemporary cases, tracing how causal processes unfold over time and space and what past conditions and experiences lie behind today’s political dynamics and problems.
POLS BC3543 Non-State Governance in Settings of Crime and War. 4 points.
Prerequisites: (POLS UN 501)
The conventional wisdom is that crime and civil war are linked to
disorder. But these are far from disorderly and ungoverned spaces.
Unpacking these settings reveals complex forms of non-state
governance constructed by a range of actors, including rebel and
guerillas, gangs, vigilantes, and protection rackets – sometimes
facilitated by the state.

POLS BC3555 Political Behavior. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Application through Political Science department
(https://polisci.barnard.edu/colloquia). Prerequisite: Introduction to
American Government and Politics (POLS UN1201) or equivalent;
Strongly recommended: Empirical Research Methods in
Political Science (POLS 3706) or equivalent
This course explores how and why people take action in the political
sphere. We will pay particular attention to questions such as why
people vote, form interest groups, and/or contribute money to
candidates. We will also study the origins of partisanship, polarization,
opinion, and political ideology. Finally, we will cover topics in "elite"
behavior, examining candidates, lawmakers, and party officials.

POLS BC3611 Colloquium on Unconventional Approaches to
International Relations. 4 points.
Prerequisites: (POLS UN 1601)
This class will examine modern issues in international relations
(e.g., drones, global financial crises, cyber warfare, international
terrorism) by drawing from unconventional theories of international
relations (including feminist, critical, postcolonial, and geopolitical
approaches). To begin, we will briefly review "old," or conventional,
approaches to international relations that you likely learned about in
your Intro to IR class—realism, liberalism, constructivism, etc. We
will also consider how these approaches do and/or do not help us make
sense of the contemporary, global political landscape. From there,
we will move on to explore contemporary challenges and problems
in IR. As we analyze these new issues, we will review unconventional
approaches to international relations and use new, or unconventional,
IR lenses to shed light on these problems.

POLS BC3621 Race and Ethnic Politics. 4 points.
Not offered during 2019-20 academic year.
This seminar is about race and ethnic politics in the United States,
with a focus on Blacks, Latinos, Asian Americans, and Anglos. This
course serves as an introduction to this scholarship, both in terms of
thinking about how this scholarship is conducted, as well as the sorts
of questions this scholarship seeks to answer. Throughout, we grapple
with (a) the definitions and concepts used in race and ethnic politics,
(b) the strengths and weaknesses of various research designs, and
(c) various topics in race and ethnic politics. We conclude with a final
paper project.

POLS BC3810 *Colloquium on Aid, Politics & Violence in Africa. 4 points.
Prerequisites: POLS UN1601 or the equivalent. Admission by
application through the Barnard department only.
Explores the concepts, theoretical traditions and debates around
development and humanitarian aid, focusing on the relationships
between aid, politics, and violence. It looks at the political and military
impacts of aid, the linkage between humanitarian aid and conflict
resolution, and aid’s contribution to perpetuating subtle forms of
domination. (Cross-listed by the Africana Studies and the Human
Rights Programs.)

POLS BC3812 * Colloquium on State Failure, Warlords, and Pirates. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: POLS V1501 or POLS V1601 or the equivalent (http://
polisci.barnard.edu/introductory-courses/). Admission by application
(http://polisci.barnard.edu/colloquia/) through the Barnard department
only. Enrollment limited to 16 students. Barnard syllabus (http://
polisci.barnard.edu/syllabi/#ii).
What are sovereign states, why do they fail, does their failure matter,
and can the international community help? This course examines these
questions using social science theories and historical case studies. It
focuses on the political economy and security consequences of two
current forms of state failure: warlordism and piracy.

POLS BC3800 * Colloquium on International Political Economy. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: POLS V1601 or the equivalent (http://www.barnard.edu/

POLS BC3801 Politics of Economic Development In the World. 4 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC
II).
Admission by application through the Barnard department only.
Enrollment limited to 16 students.
Prerequisites: V 1501 or equivalent
Description: The semester-long course aims to study political and
social factors behind economic development and examine empirical
cases of the success and failure in economic growth in order to
understand the key features of the development processes. In the last two centuries, some countries successfully achieved economic growth and development, while other failed to do so. Even in the post-WWII period, the world has witnessed the rise and decline of economies around the world. Why do nations succeed or fail in economic development? How do political institutions affect economic outcomes? What are the ways in which state and market interact and influence each other? Can democracy be considered a cause of development, an outgrowth of development, or neither and to which extent? How do external factors such as foreign aid encourage or discourage development? We will try to examine these questions by taking a historical-institutional and comparative approach and take a critical look at the role of political and other institutions by applying theoretical guidelines and empirical cases. We will explore competing explanations for the successes and failures of economic development in the world. Objective: 1. Understand some important concepts and theories within the fields of comparative politics and political economy. To explore the interconnections between politics, economy, and society in the context of development policy and practice. 2. Develop basic analytic skills to explore various factors that shape political, economic, and social development and underdevelopment in the world. 3. Understand some country-specific political economy processes and how these processes prove or disprove certain theories and policies.

POLS BC3805 *Colloquium on International Organization. 4 points.
Prerequisites: POLS V1601 or the equivalent (http://polisci.barnard.edu/introductory-courses/). Admission by application (http://polisci.barnard.edu/colloquia/) through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus (http://polisci.barnard.edu/syllabi/#/517). Exploration of the various structures, institutions, and processes that order relations among states and/or actors in the international system. Emphasis will be placed on contemporary issues such as dilemmas of humanitarian intervention, the politics of international institutions, the extent? How do external factors such as foreign aid encourage or discourage development? We will try to examine these questions by taking a historical-institutional and comparative approach and take a critical look at the role of political and other institutions by applying theoretical guidelines and empirical cases. We will explore competing explanations for the successes and failures of economic development in the world. Objective: 1. Understand some important concepts and theories within the fields of comparative politics and political economy. To explore the interconnections between politics, economy, and society in the context of development policy and practice. 2. Develop basic analytic skills to explore various factors that shape political, economic, and social development and underdevelopment in the world. 3. Understand some country-specific political economy processes and how these processes prove or disprove certain theories and policies.

HRTS BC3061 Human Rights & the UN in Practice. 4 points.
POLS UN1201 Introduction To American Government and Politics. 4 points.
Lecture and discussion. Dynamics of political institutions and processes, chiefly of the national government. Emphasis on the actual exercise of political power by interest groups, elites, political parties, and public opinion.

POLS UN1501 Introduction to Comparative Politics. 4 points.
This course provides a broad overview of the comparative politics subfield by focusing on important substantive questions about the world today. The course is organized around four questions. First, why can only some people depend upon the state to enforce order? Second, how can we account for the differences between autocracies and democracies? Third, what different institutional forms does democratic government take? Finally, are some institutions more likely than others to produce desirable social outcomes such as accountability, redistribution, and political stability?

POLS W3120 Democratic Theory. 3 points.
Not offered during 2019-20 academic year.

Focuses on the theory and practice of democracy, from the examination of its classic and modern foundations to the analysis of its transformations in advanced industrial societies facing class, gender, race, and regional differences.

POLS W3125 Citizenship and Exclusion. 3 points.
Not offered during 2019-20 academic year.

Citizenship has always been a battleground in struggles for inclusion and exclusion. This course aims to familiarize students with contemporary theories of citizenship from the lens of boundaries. What kind of ‘good’ is citizenship, and why is it denied to some? How do politically, socially or culturally marginalized groups use the discourse of citizenship to claim equal participation and recognition? How is access to citizenship status and rights regulated in contemporary democracies?
POLS W3165 Secularism and its Critics. 0 points.
Not offered during 2019-20 academic year.

In recent years, the role of religion in the social and political life has increasingly become a subject of debate and controversy. As an important dimension of this debate, the idea of secularism and the main assumptions behind the secularization thesis have been questioned. Sharing the fate of many other dualities of modernity, the distinction between the secular and the sacred has also been challenged. The aim of this course is to study the main arguments behind secularism and secularization thesis and those behind its contemporary critics. In the first part of the course, we will explore the meaning of the secular and the main arguments behind secularism and the secularization thesis. The aim is to understand the role of the distinction between the secular and the sacred in the emergence of the idea of modern self, modern society and modern state. These debates would set the background for the analysis of contemporary debates on and critics of secularism, which will be the subject of the second part of the course. Readings include Kant, Marx, Weber, Blumenberg, Gauchet, Chadwick, Casanova, Keddie, Asad, Connolly, Taylor and Habermas.

POLS UN3170 Nationalism, Republicanism and Cosmopolitanism. 3 points.
Do we have obligations to our co-nationals that we do not owe to others? Might our loyalties or obligations to our fellow citizens be based on a commitment to shared political principles and common public life rather than national identity? Do we have basic duties that are owed equally to human beings everywhere, regardless of national or political affiliation? Do our commitments to co-nationals or compatriots conflict with those duties we might owe to others, and if so, to what extent? Is cosmopolitanism based on rationality and patriotism based on passion? This course will explore these questions from the perspectives of nationalism, republicanism and cosmopolitanism. We will consider historical works from Herder, Rousseau, Kant, Fichte, Mill, Mazzini and Renan; and more contemporary contributions from Berlin, Miller, Canovan, MacIntyre, Viroli, Sandel, Pettit, Habermas, Nussbaum, Appiah, and Pogge, among others.

POLS UN3190 Republicanism: Past and Present, or Plato to Pettit. 3 points.
The course is divided into two main parts. The first half examines features of classical republicanism and its developments from Greece and Rome up to the late eighteenth century. We will analyze the relationship between ethics and politics, the significance of the mixed constitution, the problem of political instability, the role of character in political action, and the relationship between virtuous citizens, good arms and good laws. The second half will be more issue-based, as we will examine the resurgence of republicanism in the late twentieth and early twenty-first centuries, in part as a critique of liberal democracy. We will explore the efforts to define “republican” freedom, the relationship between equality and freedom (and the challenges posed by the market and inequality in resources), the relationship between republicanism and democracy, and the role and nature of civic virtue. The class will end with consideration of recent efforts on the part of some political theorists to redefine patriotism or loyalty to one's particular state in the modern world and to think about what republicanism might require on a global scale.

POLS UN3210 Judicial Politics. 3 points.
Law and courts as political institutions. Considers the role of the judiciary within the American system of government, power relations within the judicial hierarchy, politics of decision making on the Supreme Court, the politics of Supreme Court nominations, the role of interest groups and public opinion in shaping judicial doctrine, the social impact and legitimacy of courts, and the political history of the legal system.

POLS UN3220 Logic of Collective Choice. 3 points.
Much of politics is about combining individual preferences or actions into collective choices. We will make use of two theoretical approaches. Our primary approach will be social choice theory, which studies how we aggregate what individuals want into what the collective “wants.” The second approach, game theory, covers how we aggregate what individuals want into what the group gets, given that social, economic, and political outcomes usually depend on the interaction of individual choices. The aggregation of preferences or choices is usually governed by some set of institutional rules, formal or informal. Our main themes include the rationality of individual and group preferences, the underpinnings and implications of using majority rule, tradeoffs between aggregation methods, the fairness of group choice, the effects of institutional constraints on choice (e.g., agenda control), and the implications for democratic choice. Most of the course material is highly abstract, but these abstract issues turn up in many real-world problems, from bargaining between the branches of government to campus elections to judicial decisions on multi-member courts to the allocation of relief funds among victims of natural disasters to the scoring of Olympic events. The collective choice problem is one faced by society as a whole and by the smallest group alike.

POLS W3230 Politics of American Policy Making. 3 points.
Not offered during 2019-20 academic year.

This is a course on US federal level domestic policymaking. It is a study of the theoretical foundations of public policy research, of alternative models of public policy formation, their methodologies, and the relationship between the theory and practice of the policy sciences. We look at the institutional framework, procedures and interests that shape American public policy and examine American political institutional behavior (Congress, the bureaucracy, federalism...) and their role in producing public policy. The course considers policymaking, implementation, and policy analysis in the US political framework and focuses on substantive policy areas in a case study format. Attention will be paid to the budget process and specific policy areas including economic policy, employment policy, healthcare policy, antipoverty policy and environmental policy.

POLS W3280 20th Century American Politics. 3 points.
Not offered during 2019-20 academic year.

In what sense was the New Deal/Fair Deal era led by Presidents Franklin Roosevelt and Harry Truman a 'watershed' and a 'defining time'? What policy choices were made, and which were not? What has been their enduring impact? Probing these issues at the crossroads of political science and history, the class aims both to explore key themes in American politics and to examine how approaches scholars use in each of the major subfields of political science—Comparative Politics,
International Relations, Political Theory, and American Politics—can clarify important historical subjects.

POLS UN3285 Freedom of Speech and Press. 3 points.
Examines the constitutional right of freedom of speech and press in the United States. Examines, in depth, various areas of law, including extremist or seditious speech, obscenity, libel, fighting words, the public forum doctrine, and public access to the mass media. Follows the law school course model, with readings focused on actual judicial decisions.

Elections and public opinion; history of U.S. electoral politics; the problem of voter participation; partisanship and voting; accounting for voting decisions; explaining and forecasting election outcomes; elections and divided government; money and elections; electoral politics and representative democracy.

POLS W3503 Political Economy of African Development. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: there are no prerequisites, but introductory or intermediate macroeconomics is recommended.
This course is concerned with a few key questions: Why has Africa remained poor, volatile, and violent? Will Africa see future growth in incomes, stability, and freedom? What role has the West played in past failures, and what role (if any) should it play in the future? The course will cover the history, politics and economics of development in Africa, and dabbles in geography, sociology, and anthropology as well. We start in prehistory and work our way up to the present day, with a focus on the 20th and 21st centuries. We interrogate the effects of Western intervention in Africa, from slavery and colonialism to modern-day foreign policy, aid, trade, peacekeeping, and democratization. We cover material ranging from qualitative case studies to formal theories of growth to statistical analyses to post-modern critiques. No prior exposure to any of these fields is required—the material is designed to be accessible to all, and technical material is presented in a relatively non-technical fashion.

POLS W3506 Comparative Party Politics. 3 points.
Not offered during 2019-20 academic year.
In this course, we will study political parties and party systems in an attempt to understand why they exist and to what degree they promote or harm representative democracy. Questions to be explored include the following: Why do some countries have only a few parties in their parliament/congress while other countries have many? Why does the United States have only two major parties while countries with similar electoral systems—Great Britain, India, Canada—have more? Why do major parties generally survive over decades and even centuries while new parties often collapse rapidly? Why do professional politicians lead most political parties, and does this undermine democratic principles?

POLS W3585 Political Economy of Development. 3 points.
Not offered during 2019-20 academic year.
Why are some countries rich and other countries poor? This course examines the politics of economic reform and development.
of foundational cases, and by means of (required) participation in a multi-week group simulation of an international legal dispute.

POLS UN3704 Data Analysis and Statistics for Political Science Research. 3 points.
This course examines the basic methods data analysis and statistics that political scientists use in quantitative research that attempts to make causal inferences about how the political world works. The same methods apply to other kinds of problems about cause and effect relationships more generally. The course will provide students with extensive experience in analyzing data and in writing (and thus reading) research papers about testable theories and hypotheses. It will cover basic data analysis and statistical methods, from univariate and bivariate descriptive and inferential statistics through multivariate regression analysis. Computer applications will be emphasized. The course will focus largely on observational data used in cross-sectional statistical analysis, but it will consider issues of research design more broadly as well. It will assume that students have no mathematical background beyond high school algebra and no experience using computers for data analysis.

POLS W3708 Empirical Research Methods. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: this course is intended for political science majors, and some exposure to political science is assumed. Familiarity with statistical software is helpful but not required. Students will be working with data in class throughout the term. This course provides an introduction to selected research methods that are widely used in political science. The aim of the course is to familiarize students with the conceptual and methodological challenges that arise when researchers attempt to measure political phenomena, assess change over time, or demonstrate a causal relationship between policies and social outcomes. In order to reinforce core ideas and link them to ongoing political debates, students will conduct a series of small research projects that will involve statistical software, sampling, questionnaire development, and experimental design.

POLS UN3720 Scope and Methods. 4 points.
This class aims to introduce students to the logic of social scientific inquiry and research design. Although it is a course in political science, our emphasis will be on the science part rather than the political part—we’ll be reading about interesting substantive topics, but only insofar as they can teach us something about ways we can do systematic research. This class will introduce students to a medley of different methods to conduct social scientific research.

POLS W4205 Politics, Crime and Punishment. 0 points.

Not offered during 2019-20 academic year.

Prerequisites: POLS W1201 Intro to American Politics or the equivalent.

This course investigates the politics of crime and the criminal justice system. We investigate the origins of the politics of law and order from the mid-twentieth century to today, against a broader backdrop of partisan competition, urban de-industrialization, and socio-cultural tensions. Particular attention is paid to the role of politicians and political institutions such as the Congress, the Judiciary and federal, state and local bureaucracies such as local police in conceptualizing the need for a "war on crime," and developing the political and institutional mechanisms for carrying out this war. The course reviews the current political, institutional and societal developments arising from the war on crime and current debates amongst politicians and policymakers. Issues such as sentencing disparities; racial differences in death penalty cases; New York City's "stop and frisk" policy; and, felon disenfranchisement, are among some of the topics that will be covered in this course. Students will analyze a mix of social science research, legal cases, and policy analyses, as a means of understanding the political development of the American criminal justice. Readings and in-class discussions will be supplemented by guest speakers drawn from organizations involved in the crime/criminal justice system.

POLS GU4461 Latin American Politics. 4 points.

This is a lecture class that seeks to introduce students to social scientific analysis while discuss the shifting dynamics of political representation in Latin America. In analyzing political representation in the region, it focuses on demands for political inclusion by different actors and how they were resisted or accepted by established elites in a process that moved from regime change to electoral rotation in power. The course covers these political dynamics and their institutional consequences since the onset of the twentieth century, starting with the Mexican Revolution, until the contemporary period where democracy is the predominant form of government and elections a crucial tool for social and political change. While analyzing the politics of Latin America, we will cover important political science concepts associated with democratic representation, social inclusion and the rule of the law, such as social movement mobilization, political regime change, presidentialism, political party systems, political identities, state capacity, and institutional weakness.

POLS G4471 Chinese Politics. 4 points.

Not offered during 2019-20 academic year.

An introduction to the politics of the People's Republic of China since 1978 that examines why and how a Leninist system attempts to reform and the consequences. Topics covered include one party rule, market transition, property rights, and grassroots democracy among many others.

POLS G4491 Post-Soviet States and Markets. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Recommended preparation: some familiarity with Communist or post-Communist states.

Considers the collapse of Communism in the Soviet Union and the challenge of building new political and economic systems in the post-Communist space. Evaluates contending theories of markets, transitions, constitutions, federalism, and democratic institutions. Primary focus on the post-Soviet states, with some reference to Eastern Europe and China.

POLS G4610 Recent Continental Political Thought. 4 points.

Not offered during 2019-20 academic year.
This course will compare and contrast the theories of the political, the state, freedom, democracy, sovereignty and law, in the works of the following key 20th and 21st century continental theorists: Arendt, Castoriadis, Foucault, Habermas, Kelsen, Lefort, Schmitt, and Weber. It will be taught in seminar format. As of academic year 2016-2017, this course is now POLS 4110.

POLS GU4496 Contemporary African Politics. 3 points.
This course aims to teach students what, if any, answers social scientists have to the questions that concern anyone with an interest in African politics: 1) Why have democratic governments flourished in some countries and not others? 2) What institutions may enable Africans to hold their leaders accountable? 3) How do people participate in politics? 4) In what ways do aspiring African political leaders build public support? 5) To what extent does persistent poverty on the continent have political causes? and 6) Why is violence used to resolve some political disputes and not others?

URBS V3833 New York City: Politics and Governing. 4 points.
This course will examine through readings, class discussions, and in class debate, the complex politics and governing of New York City: the key political institutions, and who holds urban political power, voting and elections, and the changing roles of the electorate will be covered.

We will examine the structure of New York City government and how the New York City Budget is developed and adopted; the interplay between Mayoral and City council powers, the city charter, the process of governing and the role of political parties, special interest groups, lobbyists and labor unions. We will look back in the City’s political history and consider that time in the mid 1970’s when New York City suffered a major fiscal crisis and was close to financial bankruptcy. In this context, New York City’s relationships with the state and federal governments will also be covered.

Psychology
415 Milbank Hall
212-854-2069
Department Administrator: Danielle Feinberg

The Department of Psychology
Psychology is the scientific study of the mind and behavior. The concerns of the discipline range widely, from fundamental questions about human nature to applications of psychology in daily life. Research conducted by faculty members in the Department examine growth and development, learning and memory, perception, language, social knowledge and behavior, the self, the effects of stress, conflict and cooperation, and the neural functions that underlie behavior. Students who choose the major concentration in Psychology study the literature and empirical practices across the discipline, and can gain direct experience by participating in laboratory settings on campus and in the wider community, and in health centers nearby. Many Psychology majors continue for graduate training in psychology, neuroscience, or education, while others enter professional schools for training in medicine, law, or business.

Mission Statement
Through courses, advising and laboratories, the Department of Psychology educates students about the intellectual perspectives and empirical methods of the contemporary discipline of Psychology. Introductory courses provide an overview of the field and its major components, emphasizing the practices by which hypotheses are formed and new evidence is created. Middle-level courses consider significant topics in sharp focus, while upper-level seminars use classic and recent technical literature as a springboard for discussion in groups of advanced students. The Department also encourages students to participate in research and in the many different Departmental and College-wide forums for discussion and refinement of scientific work.

Student Learning Goals
A student graduating with a major concentration in Psychology will know how to:

- Describe the historical foundations and contemporary problems in psychology;
- Portray the sub-disciplines in psychology;
- Explain the application of psychological knowledge to questions of behavior and mental processes;
- Identify and assemble current research literature about a topic within psychology;
- Critique a psychological theory and the evidence offered to secure its premises;
- Design a study to test a psychological hypothesis;
- Weigh the strengths and weaknesses of a research design and method;
- Perform basic descriptive and inferential statistical tests to summarize measures and to identify reliable results;
Communicate theories, hypotheses, empirical methods, and research findings in written and spoken form.

Research
There are many opportunities for a student to participate in research in laboratories and in the field. Each member of the full time faculty supervises research by students, and many nearby laboratories, health centers and research institutions welcome the participation of our students in their projects. Independent Study, the Senior Research Seminar and the Toddler Center Seminar are courses for student researchers.

Field Work
The Field Work Seminar in Psychological Services and Counseling combines a placement in a clinical, educational, medical, and other institutional settings, with a weekly discussion of applied aspects of psychology. Drawing on a student’s experience in the field, the discussions examine theoretical approaches to clinical problems and cases.

Teaching
Introductory and Laboratory courses provide opportunities for student teaching under the supervision of a member of the faculty. Teaching assistants are typically recruited for this role.

College Science Requirement
A student who wishes to fulfill the College science requirement in Psychology is encouraged to take her lab courses early in her career at Barnard. Senior students do not receive priority for placement in a lab course.

Requirements for Students following the Foundations Curriculum
Important Changes: As of Fall 2019, the course numbers of PSYC topical labs and associated lectures have been changed to 2000-level (from 1000-level) but the general course material remains the same. The groupings of the lectures and labs has also been changed from three to two, now called “Group 1” and “Group 2.” Lastly, BC1015 will not be offered, and instead BC1010 will be offered in its place going forward.

Summary of PSYC Major Requirements: Eight PSYC/NSBV courses, worth three or more credits, including: Introduction to Psychology, Statistics, three lectures from Groups 1 & 2, a 3000-level course senior year, and two electives; Additionally, one cognate course, and two courses in an outside science; Plus four lab courses: two PSYC labs, one outside lab, and one lab (experience) in any science. These requirements apply to all students regardless of what year you entered Barnard.

Note that at least six of the required PSYC courses, worth three or more credits each, must be taken at Barnard or Columbia. All PSYC courses must be taken for a letter grade (C- or better).

OR...
One laboratory course with its associated lecture from Group 1 or 2

**One Senior Requirement**

Includes Thesis, and Capstone Project written in any PSYC/NSBV 3000-level seminar, taken during the final two semesters, including:

- PSYC BC3465 Field Work and Research Seminar: The Barnard Toddler Center (PSYC BC3465 and PSYC BC3466 is a year-long course)
- PSYC BC3473 Clinical Field Practicum
- PSYC BC3606 Independent Study (taken for 3 or 4 credits)

**Outside Courses**

One course from a cognate discipline (ANTH, COMS, ECON, LING, PHIL, SOCI, and STEM)

Two lectures in another science, plus one laboratory course (ASTR, BIOL, CHEM, EESC, or PHYS)

**One Additional Research Experience**

Choose from the following:

- a third PSYC lab (with lecture); or
- a lab in a science outside of PSYC; or
- one semester of BC3601-3608 Independent Study (taken for 3 or 4 credits)

**Requirements for the Minor**

The minor consists of six courses in Psychology. All courses must be taken for a letter grade (C- or better). Exemption and substitutions are as noted for the major.

**Two Introductory PSYC Courses**

- PSYC BC1001 Introduction to Psychology
- PSYC BC1101 Statistics (lecture with recitation)

**One Core PSYC Lecture**

chosen from the following courses:

**GROUP 1**

- PSYC BC2107 Psychology of Learning
- PSYC BC2110 Perception
- PSYC BC2115 Cognitive Psychology
- PSYC BC2119 Systems and Behavioral Neuroscience

**GROUP 2**

- PSYC BC2118 Systems and Behavioral Neuroscience Laboratory
- PSYC BC2125 Psychology of Personality
- PSYC BC2129 Developmental Psychology
- PSYC BC2156 Clinical Psychology

**One PSYC Laboratory Course**

chosen from the following courses:

**GROUP 1**

- PSYC BC2106 Psychology of Learning Laboratory
- PSYC BC2109 Perception Laboratory
- PSYC BC2114 Cognitive Laboratory

**GROUP 2**

- PSYC BC2124 Psychology of Personality Laboratory
- PSYC BC2128 Developmental Laboratory
- PSYC BC2137 Social Psychology Laboratory
- PSYC BC2155 Clinical Psychology Laboratory

Additional PSYC or NSBV Courses

- One or two lecture or seminar courses, bringing the total to 8 PSYC courses worth 3 or more credits each.

**Outside Courses**

One course from a cognate discipline (ANTH, COMS, ECON, LING, PHIL, SOCI, and STEM)

Two lectures in another science, plus one laboratory course (ASTR, BIOL, CHEM, EESC, or PHYS)

**One Additional Research Experience**

Choose from the following:

- a third PSYC lab (with lecture); or
- a lab in a science outside of PSYC; or
- one semester of BC3601-3608 Independent Study (taken for 3 or 4 credits)

Approval for an introductory course taken at another school can be granted by the Departmental Representative. A student who receives a score of 4 or 5 on the Advanced Placement (AP) examination in Psychology, or a score of 5 or 6 on the International Baccalaureate (IB) exam in Psychology can choose not to enroll in PSYC BC1001 Introduction to Psychology. She must, however, enroll in another PSYC course, worth three or more credits, in its place. Also please note, that even with experience in a high school AP course, the Department highly recommends that all students enroll in PSYC BC1001. If a student with acceptable AP/IB scores chooses to enroll in BC1001, she will receive both major and college credit for the course, as well as three points toward graduation (for the AP/IB credit).

If a student would like to enroll in a Statistics course outside of the Barnard Department of Psychology to fulfill this portion of the major requirements she should obtain prior approval from the Chair or the Departmental Representative.

Students are strongly advised to enroll in only one PSYC laboratory course per semester.

Also, students should check their calendar of commitments and review the lab attendance policy before signing up for a lab. Each laboratory follows the same policy about attendance:

- You must attend every Laboratory meeting, and you must be present for the duration of the meeting.
- You may not arrive late.
- You may not depart before you complete the day's procedure.
- If you miss more than a single Laboratory session you will be dismissed from the Laboratory and you will not be permitted to remain enrolled.

PSYC BC1010 is intended for younger students who have not previously taken any psychology labs. It is not a requirement, however, if taken, it should be taken prior to one of the Group 1 and 2 topical labs.

A student may elect to fulfill the Senior Requirement with a Columbia Psychology Department Seminar or Supervised Individual Research with a Columbia faculty member. prior approval for this is needed. For all other 3000-level courses, you must notify the professor at the beginning of the semester that the course will be used as your senior requirement.

A maximum of two of the following courses may count toward the major (though more could count toward College requirements):

- PSYC BC3465 Field Work and Research Seminar: The Barnard Toddler Center (fall semester)
- PSYC BC3466 Field Work and Research Seminar: The Barnard Toddler Center (spring semester)
- PSYC BC3606 Independent Study (Formerly PSYC BC3601-3608)

The Psychology Department defaults to rules and exemptions allowed by the home department. Meaning, if Biology, for example, accepts a course substitution for one of its labs, Psychology will honor this course as fulfilling part of the Outside Science component of the Psychology Major. Also, the two science courses can be from different departments.
Lectures and/or seminars chosen from any course offered by the Department that is three or more credits each.

**PSYC BC1001 Introduction to Psychology. 3 points.**
Prerequisites: This course is prerequisite for all other psychology courses.
Prerequisites: This course is prerequisite for all other psychology courses. Lecture course introducing students to the chief facts, principles, and problems of human and animal behavior, through systematic study of a text, lectures, exercises, reading in special fields, and participation in several current experiments (an alternative to participation in experiments can be arranged at the start of the semester at the student’s request.)

**Fall 2019: PSYC BC1001**

**PSYC BC1010 Introductory Laboratory in Experimental Psychology. 1.5 point.**
Prerequisites: Note: This introductory lab course is intended for students who have not previously been enrolled in a psychology lab course. It is also highly recommended for First Year and Sophomore students.
Corequisites: PSYC BC1001
A laboratory-based introduction to experimental methods used in psychological research. Upon successful completion of this course, students will know how to review the primary literature and formulate a hypothesis, design an experiment, analyze data using statistical methods, communicate the results of a scientific study through oral presentation and written manuscript, and carry out research studies under ethical guidelines. Students will be able to apply the acquired knowledge in all disciplines of Psychology and will be prepared to engage in advance research in fields including, but not limited to, Cognition, Learning, Perception, Behavioral Neuroscience, Development, Personality, and Social Psychology. A student must be enrolled in or have already completed BC1001 or its equivalent.

**Spring 2020: PSYC BC1010**

**PSYC BC1020 Behavioral Research Methods and Analysis. 3 points.**
This class will introduce students to the fundamental scientific principles, experimental methods, and analytical approaches involved in the study of human behavior. The initial major topics to be covered include how basic scientific approach can be gainfully and ethically used to study human behavior. The following topics in the course will cover the most prevalent manners of collecting data in behavioral research and the most common types of statistical analyses and tests such data is subjected to. The latter topics in the course will introduce some of the more advanced experimental designs and statistical approaches that are more specific to the social sciences.

**PSYC BC1088 The Science of Living Well. 4 points.**
3 points for lecture + 1 point for recitation
What does it mean to live a life well lived? The main mission of this course is to provide an up-to-date understanding of theoretical, empirical, and applied advances in the science of well-being and self-actualization. Consideration will be given to conflicting viewpoints and their respective empirical support, including the benefits of embracing both comfortable and uncomfortable emotions, the measurement and development of different models of well-being, and the implications of deliberately attempting to increase well-being. Throughout the course we will engage in experiential learning and practical exercises which will inform our theoretical and empirical understanding of the latest scientific findings and help you in your own personal journey to satisfy the fundamental needs of human existence and bring out the best in yourself. This course is comprised of a lecture and a discussion section.

**PSYC BC2155 Clinical Psychology Laboratory. 1.5 point.**

Corequisites: PSYC BC2156

This is a laboratory course designed to accompany the Introduction to Clinical Psychology lecture (BC2156). The purpose of the lab is to teach students the research methods involved in creating clinical psychological science. Students gain hands-on practice with clinical psychology research methods. In the first half of the lab students conduct classroom exercises demonstrating concepts such as reliability and validity and research methodologies such as randomized controlled trials (RCTs) and treatment fidelity. In the second half of the class students design and run a research study. Basic methodological issues will be explored in depth, including research ethics, conducting literature reviews and writing up a scientific report in APA style.

PSYC BC2175 Addictive Behaviors. 3 points.
Not offered during 2019-20 academic year.

Prerequisites: PSYC BC1001 or PSYC UN1001 or BIOL BC1001 or BIOL BC1002 or BIOL BC1500 or BIOL BC1502
This class will explore the topic of addiction at multiple levels, from how drugs affect neurons to how drugs affect society. The course will also cover addictive behaviors that do not appear to have a pharmacological foundation, including pathological gambling, compulsive buying, hypersexual behavior, food addiction, and internet addiction.

PSYC BC2177 Psychology of Drug Use and Abuse. 3 points.
Prerequisites: BC1001 or permission of the instructor. Enrollment limited to 75 students.
Examines the biological, psychological, and social factors that lead to drug use and abuse. A biopsychosocial model will be used to examine the behavioral effects of prescription, over the counter, and street drugs. Treatments, therapies, and theories of addictive behaviors will be explored.

PSYC BC2178 Forensic Psychology. 3 points.
Prerequisites: PSYC BC1001 Introduction to Psychology, or its equivalent. Or permission of the instructor.
Every day there are thousands of individuals interacting with the legal system. Are they mentally competent to stand trial? How can a judge decide if it is in the best interests of a child to live with one, or both (or neither) parents? What is the risk of a violent offender reaping the offense? What kinds of information influence juries? Does mediation work to solve disputes? Forensic psychologists apply their knowledge of psychology specifically in legal matters. This semester will focus on the broad area of forensic psychology, exploring important legal cases relevant to forensic psychology, police psychology, what constitutes expert testimony, how assessments are conducted, and working as a psychologist in the correctional system.

PSYC BC3153 Psychology and Women. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Junior or senior standing, BC1001 and two other psychology courses and permission of the instructor. Enrollment limited to 20 students.
This seminar is a critical examination of research and theory in human sexuality. The first part of the course is an overview of influential social science research on sexuality during the 20th century. The second part is a detailed investigation of contemporary research and writing on selected issues in human sexual behavior, including sexual socialization, gender and sexuality, and contemporary approaches to understanding psychosexual disorders.

Not offered during 2019-20 academic year.

Prerequisites: BC1001 and BC2156 Introduction to Clinical Psychology. Or permission of the instructor. Enrollment limited to 20 students. Introduces the major contributors to contemporary psychoanalysis. Surveys changes in theory and technique covering Freud, Ego Psychology and Contemporary Freudian views, Object Relations Schools (e.g. Klein, Winnicott), Self Psychology, and Interpersonal and relational approaches. Additional topics may include relevant psychoanalytic research and applications to art, cultural considerations, and current controversies.

PSYC BC3179 Cephalopod Cognition. 4 points.
This seminar is designed to introduce you to the methods used to discern and describe the cognitive repertoire of novel, understudied, animals. The animals which we will specifically examine in the class are octopuses and cuttlefish. Over the course of the semester you will learn how we define cognitive abilities in humans and examine them in various animal species for modeling and comparison purposes. Each week you will examine one specific ability in humans, a traditional animal model, and a cephalopod. In this manner you will come to understand the historical process of understanding animal cognition, the current state of the literature in at least one area of cephalopod cognition and be capable of proposing a novel experiment as a way to extend our knowledge of that area of cephalopod cognition.

PSYC BC3606 Independent Study. 4 points.
Prerequisites: Open to majors and non-majors with written permission of the department member who will supervise the project.
This course can be worth 1 to 4 credits (each credit is equivalent to approximately three hours of work per week), and requires a Barnard faculty as a mentor. The course will be taken for a letter grade, regardless of whether the student chooses 1, 2, 3, or 4 credits. The expectations for each of these options are as follows: 1 credit, 3h/week commitment, 5-10 page "Research Report" at the end of the term; 2 credits, 6h/week commitment, 5-10 page "Research Report" at the end of the term; 3 credits, 9h/week commitment, 15-20 page "Research Report" at the end of the term; 4 credits, 12h/week commitment, 15-20 page "Research Report" at the end of the term. "Research Report" is a document submitted to the person grading the student, the instructor of record for the section in which the student has enrolled. If a student is working off-site, then input from the off-site research mentor will inform the grading. The "Research Report" can take a variety of forms: progress reports on data collected, training received, papers read, skills learned, etc.; or organized notes for lab notebooks, lab meetings, etc.; or manuscript-like papers with Intro, Methods, Results, Discussion; or some combination thereof, depending on the maturity of the project. Ultimately, this will take different forms for different students/labs.

PSYC BC3607 Independent Study. 4 points.

PSYC BC3608 Independent Study. 4 points.
Prerequisites: Open to majors and non-majors with written permission of the department member who will supervise the project.
Research projects planned in consultation with members of the department.

PSYC BC3617 Senior Research Thesis. 1 point.
Prerequisites: BC1001, BC1101, a minimum of five other completed psychology courses, and permission of the instructor. This is a year-long course. Open to senior psychology majors who submit a research proposal which has been approved by the course instructor and the project supervisor.
Discussions of the student's Independent Research project during the fall and spring terms that culminate in a written and oral senior thesis. Each project must be supervised by a scientist working at Barnard or at another local institution.

Cross-Listed Courses
Neuroscience and Behavior (Barnard)
NSBV BC1001 INTRODUCTION TO NEUROSCIENCE. 3 points.
This course is required for all the other courses offered in Neuroscience and Behavior. The course introduces students to the anatomy and physiology of the nervous system. The topics include the biological structure of the nervous system and its different cell types, the basis of the action potential, principles of neurotransmission, neuronal basis of behavior, sleep/wake cycles, and basic aspects of clinical neuroscience.

NSBV BC2154 Hormones and Behavior. 3 points.
Prerequisites: BC1001 or BIOL BC1101, BC1102, or permission of the instructor. Enrollment limited to 45 students. This class explores the complex interactions among genetics, hormones, environment, experience, and behavior. Topics covered include the endocrine system, sexual development, reproductive behavior, and social interactions such as affiliation, aggression, parenting, as well as homeostasis, biological rhythms, stress, memory, and mood.

NSBV BC2180 Neurodevelopmental Processes and Cognitive/Behavioral Disorders. 3 points.
Not offered during 2019-20 academic year.
Prerequisites: BC1118/1119, BC3177, BC3380, or BIOL BC3362. Enrollment limited to 30 students. Explores the evolution of disorders affecting children due to some impairment in the brain or nervous system. Constitutional vulnerabilities demonstrate that nervous system injury varies as a function of neurodevelopmental stage. Disorders to be studied include those impacting language, hearing, vision, movement, mood and emotion, and learning.

NSBV BC3367 Transformative Landmarks in Neuroscience. 4 points.
Not offered during 2019-20 academic year.
Modern neuroscience incorporates topics from molecular neurobiology to cognition. Cognitive disciplines include psychology, biology, biochemistry, chemistry, neuropharmacology, neurology and psychiatry, physics, computational science. We review neuroscience landmarks through readings of scientific publications, news reports, and controversies surrounding apparently transformative research, and contemplate contemporary viewpoints that have the benefit of hindsight.

NSBV BC3376 Psychobiology of Infant Development. 4 points.
Prerequisites: BC1001 and BC1128/1129 Developmental (lab and lecture taken together) or BC1129 (only lecture). Or permission of the instructor. Enrollment limited to 15 students. Analysis of human development during the fetal period and early infancy. Review of effects of environmental factors on perinatal perceptual, cognitive, sensory-motor, and neurobehavioral capacities, with emphasis on critical conditions involved in both normal and abnormal brain development. Other topics include acute and long term effects of toxic exposures (stress, smoking, and alcohol) during pregnancy, and interaction of genes and the environment in shaping the developing brain of “high-risk” infants, including premature infants and those at risk for Sudden Infant Death Syndrome.

NSBV BC3377 Adolescent Neurobehavioral Development. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: PSYC BC1001 Introduction to Psychology, or its equivalent; and permission of the instructor. This seminar will explore neurobehavioral development throughout pubertal and adolescent stages of development. Specifically, topics will include how neuroendocrine changes induce pubertal onset, structural and functional changes in the adolescent brain, and how these developmental changes influence normal and abnormal psychophysiological processes. Students who complete this seminar will learn to: 1) demonstrate experimental methods used in developmental psychobiological research; 2) demonstrate the impact of structural and functional changes in the nervous system on the physiology and behavior of an individual; 3) critically read and interpret the primary research literature and discuss the strengths and weaknesses of experimental results; 4) conduct literature searches and synthesize these searches in to a comprehensive literature review; and 5) write a scientific literature review.
NSBV BC3383 Neuropharmacology and Behavior. 4 points.
Prerequisites: BC1001 and one of the following: BC1115, BC1119, or BIOL BC3280. Permission of the instructor is required. Enrollment limited to 20 students.
Basic principles of the study of drugs that influence the neural systems and induce changes in behavior. Molecular, biochemical and behavioral characterization of psychotropic drugs: stimulants, sedative-hypnotics, anxiolytics, alcohol, hallucinogens, and opiates. Etiology and treatment of psychological and neurological disorders.

NSBV BC3387 Topics in Neuroethics. 4 points.
Prerequisites: BC1001 and one of the following: Neurobiology, Behavioral Neuroscience, Fundamentals of Neuropsychology, or permission of the instructor. Enrollment limited to 20 students. Recent advancements in neuroscience raise profound ethical questions. Neuroethics integrates neuroscience, philosophy, and ethics in an attempt to address these issues. Reviews current debated topics relevant to the brain, cognition, and behavior. Bioethical and philosophical principles will be applied allowing students to develop skill in ethical analysis.

NSBV BC3392 Psychobiology of Stress. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: BC1001 and one of the following: BC1117, BC1119, BC3362, or permission of the instructor. Enrollment limited to 15 students.
This seminar will explore factors that modulate stress reactivity and the impact of stress on the structure and function of the nervous system and behavior. Topics will include how developmental stage, sex/gender, time of day, and experience influence how an organism responds to stress at endocrinological, neurobiological, and behavioral levels

NSBV BC3394 Neurobiology of Social Behaviors. 4 points.
Prerequisites: (PSYC BC2119) or (PSYC BC3362)
This course explores behavioral neuroscience through a guided reading and discussion of recent scientific literature involving research in two “opposite” behaviors, sexual courtship and aggression. These are complex social behaviors that are highly conserved across species. Although some of their features are species-specific, there are broad similarities throughout the animal kingdom. Complex interactions between genes, environmental signals, and hormones influence the development and manifestation of these behaviors, but the core circuitry associated with these behaviors is pre-wired in the nervous system, as animals with no previous social experience can engage in normal encounters that are characterized by stereotyped behavioral patterns. The study of innate social behaviors in genetically tractable organisms offers unique opportunities to identify underlying neuronal circuitry, understand how this circuitry is genetically specified and elucidate the contributions of neuronal sexual dimorphism.

NSBV BC3396 Topics in Systems Neuroscience: The Receptive Field. 4 points.
Prerequisites: (Psych BC1119) or (Biol BC3362)
How should we think about the brain? How can we simplify and interpret its dizzying complexities? And specifically, what conceptual frameworks are useful in constraining our interpretations of neuronal activity? This seminar – Topics in Systems Neuroscience – is aimed at defining and dissecting the ideas and models that guide our thinking about the brain. This semester the focus will be on the concept of the receptive field. We will examine how this idea has been applied across brain regions and sensory modalities and has been examined with experimental/computational approaches. Attention will be paid to both the historical background and contemporary views. The receptive field has provided a useful conceptual framework since the early 20th century. After developing the traditional concept of a sensory receptive field, we will critically examine the limits of this concept. This potentially simplifying concept underlying brain function also contains open questions regarding perception, cognition and behavior. By the end of the course we will develop a richer understanding of how conceptual frameworks, in general, can help (and hurt!) but ultimately hone our thinking.

NSBV BC3397 Neural Modulation. 4 points.
Prerequisites: BC1001 and permission of the instructor. Enrollment determined at first class meeting.
Excitatory and inhibitory neurotransmission is often influenced and altered by neuromodulators such as dopamine, acetylcholine, and serotonin. Imbalances in neuromodulation are implicated in many psychiatric disorders. This course will assess the role of neuromodulation under normal circumstances and how dysfunction in neuromodulation can lead to psychiatric disorders. This course will draw from groundbreaking primary literature and review articles published in the field of neuroscience.

NSBV BC3398 Psychobiology of Sleep. 4 points.
Prerequisites: PSYC BC 1001, or equivalent, and permission of instructor. Enrollment limited to 20 students.
This seminar will explore sleep and circadian rhythms, emphasizing how these factors and their disruption influence health, function, and well-being. Topics will include the physiological and neurobiological generation of sleep and circadian rhythms, and the interaction between these systems with cognitive, behavioral, endocrine, metabolic, and mood/psychiatric variables in humans.

NSBV BC3405 The Neuroscience of Trauma: Theory, Research and Treatment. 4 points.
Prerequisites: PSYBC1119
This course provides a comprehensive overview of theoretical models and research relevant to the neurobiology, neurophysiology, neuroanatomy and neurodevelopmental processes underlying psychological trauma. Cognitive, emotional and behavioral symptoms associated with post traumatic experience are examined from a neuroscience perspective. Neurotherapeutic treatment interventions are reviewed and critiqued as models of applied clinical neuroscience.

NSBV BC3593 Senior Research Seminar: Neuroscience and Behavior. 4 points.
Prerequisites: Open to senior Neuroscience and Behavior majors.
Permission of the instructor. This is a year-long course. By the end of the spring semester program planning period during junior year, majors should identify the lab they will be working in during their senior year. Discussion and conferences on a research project culminate in a written and oral senior thesis. Each project must be supervised by a scientist working at Barnard or at another local institution. Successful completion of the seminar substitutes for the major examination.

Philosophy (Barnard)
PHIL V2400 Psychology and Philosophy of Human Experience. 3 points.
Not offered during 2019-20 academic year.

We will discuss some of the most fundamental questions that one can pose about human experience. For example, we will investigate how we experience time, whether anything really has color, the difference between imagining and seeing, whether beauty is subjective, how we understand other people’s emotions, the ways in which the human mind is structured and the extent to which our minds are functionally fractionable. By drawing on both scientific and philosophical texts we hope to combine the best features of both approaches.

Science/Technology/Engineering/Math (STEM)
STEM BC2223 Computer Programming for the Behavioral Sciences. 4 points.
Students will learn how to write computer programs that can test theories and predictions that arise in the behavioral sciences. For students with little or no programming background.

Race & Ethnic Studies
221 Barnard Hall
212-854-6146
ccis@barnard.edu

Mission
The purpose of the Interdisciplinary Concentration on Race and Ethnicity (ICORE) and Minor on Race and Ethnicity (MORE) is to make available to Barnard students the interdisciplinary and critical study of race and ethnicity in their mutual constitution with gender, class, and nation. ICORE and MORE provide an intersectional and international framework for thinking through issues of ethnicity and race in both local and global contexts and in relation to other forms of social difference. Advanced seminars allow students to use this framework for the in-depth study of a particular topic. For those students who desire to pursue graduate education in the field of Ethnic Studies, ICORE and MORE will provide background preparation.

Student Learning Outcomes
Students who complete either the Interdisciplinary Concentration or Minor on Race and Ethnicity will learn how to:
1. Gain exposure to the theories and methods of Ethnic Studies;
2. Interpret arguments in light of the expanding literature in Ethnic Studies;
3. Understand processes of racialization in historical and geographical context;
4. Understand the mutual constitution and relative autonomy of axes of social differentiation;
5. Comprehend how national boundaries, as well as local, national and transnational cultures and politics affect the constitution of racial and ethnic categories;
6. Compare representations of borderlands, hybridity, migration and diaspora from different cultures; and
7. Identify and communicate the importance of ethnic and racial diversity to an increasingly global and interconnected world.

Interdisciplinary Concentration on Race and Ethnicity (ICORE) and Minor on Race and Ethnicity (MORE)
This program is supervised by the Steering Committee of the Consortium for Critical Interdisciplinary Studies (CCIS) at Barnard:
Professors: Tina Campt (Women’s, Gender and Sexuality Studies and Director of Africana Studies), Neferti X. M. Tadiar (Chair of Women’s, Gender and Sexuality Studies)

Associate Professors: Jennie Kassanoff (English and Director of the American Studies), Monica Miller (English and Coordinator of the Consortium for Critical Interdisciplinary Studies)

Cross-Listed Courses

Africana Studies (Barnard)
AFRS BC2005 Caribbean Culture and Societies. 3 points.
Not offered during 2019-20 academic year.

Multidisciplinary exploration of the Anglophone, Hispanic, and Francophone Caribbean. Discusses theories about the development and character of Caribbean societies; profiles representative islands; and explores enduring and contemporary issues in Caribbean Studies (race, color and class; politics and governance; political economy; the struggles for liberation; cultural identity and migration.) BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

AFRS BC3020 Harlem Crossroads. 3 points.

Not offered during 2019-20 academic year.

Studies Harlem in the context of African-American and African diaspora culture and society as well as American urbanization. Primarily focusing on Harlem of the nineteenth and twentieth centuries, the course offers students opportunities to discuss political economy, immigration, migration and the role of the city in social life.

AFRS BC3055 Slave Resistance in the United States from the Colonial Era to the Civil War. 3 points.
Not offered during 2019-20 academic year.

Analyzes the multifaceted nature of slave resistance, its portrayal and theorization by scholars. Critically examines the various pathways of resistance of enslaved Africans and African-Americans, both individually and collectively (e.g., running away, non-cooperation, theft, arson, as well as verbal and physical confrontation, revolts and insurrections). Considers how gender shaped acts of resistance.

AFRS BC3110 The Africana Colloquium: Caribbean Women. 4 points.
Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 18 students. Priority will be given to Africana majors and CCIS students (Africana Studies, American Studies and Women’s Studies majors; minors in Race and Ethnic Studies).

Not offered during 2019-20 academic year.

An examination of African-American music in the 20th century. Survey of important works and performers in a variety of genres - such as blues, jazz, gospel, soul, funk, R&B, hip-hop, classical and their ever changing same/names viewed as complex human activities daringly danced at dangerous discourses inside and outside the American cultural mainstreams.

AFRS BC3120 History of African-American Music. 3 points.
Not offered during 2019-20 academic year.

AFRS BC3120 History of African-American Music. 3 points.
Not offered during 2019-20 academic year.

Focuses on the context and history of representations of African Americans and Africans in early American and other cinematographies; the simultaneous development of early film and the New Negro, Negritude and Pan African movements; and pioneer African American and African cinema.

AFRS BC3146 African American and African Writing and the Screen. 4 points.
Not offered during 2019-20 academic year.

(Also ENGL BC 3148) Examination of fiction, poetry, essays and films about the Great Migration (1910-1950) of African-Americans from the rural South to the urban North, focusing on literary production in New York and Chicago. (This course satisfies the Harlem Requirement for the Africana Studies major).
AFRS BC3150 Race and Performance In The Caribbean. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Permission of the instructor. Sophomore Standing. Enrollment limited to 18 students.
Analysis of the shifting place and perception of Afro-Caribbean performance in Caribbean societies. This course takes a cross-cultural approach that examines performance through the lens of ethnography, anthropology, music and literary criticism.

AFRS BC3550 Harlem Seminar: Gay Harlem. 4 points.
Prerequisites: This course is limited to 20 students and by permission only.
This course explores Harlem's role in the production of sexual modernity and in particular as a space of queer encounter. While much of our investigation will be devoted to the intersection of race and sexuality in African American life, we also consider Harlem's history as a communal space for Italian, Puerto Rican, and more recent immigrants. Students will be encouraged to distinguish and connect contemporary sites of sexual culture in Harlem to the historical articulations of race and sexuality examined in the course.

AFRS BC3570 Africana Issues: Diasporas of the Indian Ocean. 4 points.
Not offered during 2019-20 academic year.
The Indian Ocean has been called the cradle of globalization, a claim bolstered by seasonal monsoon winds and the trade that these enabled. We will consider the aesthetic histories of such trade by engaging literary and other cultural exchanges (including film, visual arts, music, and dance). What did the Zulu prophet Isaiah Shembe learn from Gujarati poets? Other than a major slaving center and source of spices, what role did Zanzibar play in the development of music and literary forms that look to Oman as well as the East Coast of Africa? We focus on four sites: Durban (South Africa), Bombay (India), Zanzibar (Tanzania) and Port Louis (Mauritius). This course will be taught simultaneously between Barnard in New York and the University of Witwatersrand in Johannesburg, South Africa. Students from both campuses will be encouraged to interact electronically and to establish a blog and website. The course will also have live-streamed guest speakers from chosen sites around the Indian Ocean.

AFRS BC3589 Black Feminism(s)/Womanism(s). 4 points.
Black Feminism(s)/Womanism(s)

Anthropology (Barnard)

ANTH V3160 The Body and Society. 3 points.
Enrollment limited to 40; not open to first-years.Not offered during 2019-20 academic year.
Prerequisites: Non-anthropology majors require the instructor's permission.
Introduction to medical anthropology, exploring health, affliction, and healing cross-culturally. Draws from theory and methods to address critiques of biomedical, epidemiological, and other models of disease; the roles of healers in different societies; the inseparable nature of religion and healing; and different conceptions of the body and how this affects cultural conceptions of health.

ANTH UN3300 Pre-Columbian Histories of Native America. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement Enrollment limited to 40.
This course explores 10,000 years of the North American archaeological record, bringing to light the unwritten histories of Native Americans prior to European contact. Detailed consideration of major pre-Columbian sites is interwoven with the insight of contemporary native peoples to provide both a scientific and humanist reconstruction of the past.

ANTH V3910 Madagascar. 4 points.
Enrollment limit is 15.Not offered during 2019-20 academic year.
Prerequisites: Non-Anthropology majors require the instructor’s permission.
Critiques the many ways the great Red Island has been described and imagined by explorers, colonists, social scientists, and historians—as an Asian-African amalgamation, an ecological paradise, and a microcosm of the Indian Ocean. Religious diasporas, mercantilism, colonization, enslavement, and race and nation define key categories of comparative analysis.

ANTH V3928 Religious Mediation. 4 points.
Enrollment limited to 16. Instructor’s permission is required.Not offered during 2019-20 academic year.
Reading theories of media and of religion, we will examine how transformations in media technology shift the ways in which religion is encoded into semiotic forms, how these forms are realized in performative contexts, and how these affect the constitution of religious subjects and religious authority. Topics include word, print, image, and sound in relation to Islam, Pentecostalism, Buddhism and animist religions.

ANTH V3988 Race/Sexuality Science and Social Practice. 4 points.
Enrollment limited to 26.Not offered during 2019-20 academic year.
Prerequisites: the instructor’s permission.
Scientific inquiry has configured race and sex in distinctive ways. This class will engage critical theories of race and feminist considerations of sex, gender, and sexuality through the lens of the shifting ways in which each has been conceptualized, substantiated, classified, and managed in (social) science and medicine.

Art History (Barnard)

AHIS W4089 Native American Art. 3 points.
Not offered during 2019-20 academic year.
This introduction to Native North American art surveys traditions of painting, sculpture, ceramics, textiles, photography, and architecture, and traces the careers of contemporary Indian modernists and postmodernists. It emphasizes artistic developments as a means of preserving culture and resisting domination in response to intertribal contact, European colonization, and American expansion.

Comparative Literature (Barnard)

CLRS W4190 Race, Ethnicity, and Narrative, in the Russian/Soviet Empire. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement Not offered during 2019-20 academic year.
This course examines the literary construction of ethnic and cultural identity in texts drawn from the literatures of ethnic minorities and non-
Slavic nationalities that coexist within the Russian and Soviet imperial space, with attention to the historical and political context in which literary discourses surrounding racial, ethnic, and cultural particularity develop. Organized around three major regions—the Caucasus, Central Asia, and the Russian Far East—readings include canonical "classics" by Aitmatov, Iskander, and Rytkheu as well as less-known texts, both "official" and censored.

Center for the Study of Ethnicity and Race

CSER W1012 History of Racialization in the United States. 3 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2019-20 academic year.

The History of Racialization in the United States examines the development of race and racism through the study of significant historical circumstances that define the institutional structure of American Empire and of the resulting interactions among its peoples. Race is not static. Consequently, it is not an ahistorical object, nor a predetermined identity, nor a uniform category of analysis. Traditionally, the history of American race relations is the contact between racially defined groups over time and space of the effort required to maintain social and economic differences among them. Racialization, then, refers to the process by which one population group or many are "placed" in distinct racial categories.

CSER V3440 The Changing American City. 4 points.
Not offered during 2019-20 academic year.

After decades of economic disinvestment, physical decline and social out-migration, the 1990s ushered in an era of urban revitalization in many U.S. cities, the effects of which resonate today. How can we situate these recent changes within a longer trajectory of urban change in the United States? What do we make of the contested claims on space, belonging and identity made by, or on behalf of, people living in changing urban places? How should we evaluate development interventions whose end results seem so often to diverge from their intentions? This course will develop practical inroads into the problem of the changing American city that will both complement and complicate commonplace intuitions about the urban change we witness unfolding around us. Readings stay close to anthropological and ethnographic perspectives. We will consider how focusing on the meanings and experiences of everyday life in urban spaces can problematize ideals often associated with urban living, including various forms of diversity. Additional readings will introduce students to analytical perspectives on urbanism, race, ethnicity, space and citizenship. Taken together, readings, primary materials, discussions and a field trip will equip students with the tools to approach contemporary urban change with an anthropological lens.

CSER W3510 Novels of Immigration, Relocation, and Diaspora. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Course listed as ENGL W3510.

The master narrative of the United States has always vacillated between valorizations of movement and settlement. While ours is a nation of immigrants, one which privileges its history of westward expansion and pioneering, trailblazing adventurers, we also seem to long for what Wallace Stegner called a "sense of place," a true belonging within a single locale. Each of these constructions has tended to focus on individuals with a tremendous degree of agency in terms of where and whether they go. However, it is equally important to understand the tension between movement and stasis within communities most frequently subjected to spatial upheavals. To that end, this course is designed to examine narratives of immigration, migration, relocation, and diaspora by authors of color in the United States.

CSER UN3904 Rumor and Racial Conflict. 4 points.
This course will take a transnational look at the strange ways that race and mass rumors have interacted. From the judicial and popular riots in the U.S. justified by recurrent rumors of African-American insurrection, to accusations that French Jews were players in the ‘white slave trade,' to tales of white fat-stealing monsters among indigenous people of Bolivia and Peru, rumors play a key role in constructing, enforcing, and contesting regimes of racial identity and domination. In order to grasp rumor's importance for race, we will need to understand how it works, so our readings will cover both instances of racialized rumor-telling, conspiracy theories and mass panics, and some key approaches to how rumors work as a social phenomenon. The instructor will expect you to post a response to the reading on Courseworks each week and to engage actively in class discussion. There will be an in-class midterm exam, and you will be able to choose between writing an independent research project or doing a take-home exam.

CSER W3906 Race in Scientific and Social Practice. 4 points.
Not offered during 2019-20 academic year.

This class presents a genealogy of the development of the race concept since the 19th century. Most centrally, we will examine the ways in which race has been conceptualized, substantiated, classified, managed and “observed” in (social) science and medicine. We will read history of science in tandem with philosophical, anthropological, and historical literatures on race and the effects of racial practices in the social and political world writ large. This class will address a series of questions, historical and contemporary. For example, how has the relationship between “race” and “culture” been articulated in the history of anthropology in particular, and in racial theory more broadly? How and why were particular phenotypes understood to signify meaningful biological and social differences? Can there be a concept of race without phenotype—a solely genotypic racial grouping? More broadly, we will examine how particular scientific projects have intersected with, authorized, or enabled specific social and political imaginations.

CSER UN3928 Colonization/Decolonization. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructor’s permission.
This course explores the centrality of colonialism in the making of the modern world, emphasizing cross-cultural and social contact, exchange, and relations of power; dynamics of conquest and resistance; and discourses of civilization, empire, freedom, nationalism, and human rights, from 1500 to 2000. Topics include pre-modern empires; European exploration, contact, and conquest in the new world; Atlantic-world slavery and emancipation; and European and Japanese colonialism in Asia, Africa, and the Middle East. The course ends with
a section on decolonization and post-colonialism in the period after World War II. Intensive reading and discussion of primary documents.

CSER UN3940 Comparative Study of Constitutional Challenges Affecting African, Latino, and Asian American Communities. 4 points.
This course will examine how the American legal system decided constitutional challenges affecting the empowerment of African, Latino, and Asian American communities from the 19th century to the present. Focus will be on the role that race, citizenship, capitalism/labor, property, and ownership played in the court decision in the context of the historical, social, and political conditions existing at the time. Topics include the denial of citizenship and naturalization to slaves and immigrants, government sanctioned segregation, the struggle for reparations for descendants of slavery, and Japanese Americans during World War II.

Dance (Barnard)

DNCE BC3570 Latin American and Caribbean Dance: Identities in Motion. 3 points.
Not offered during 2019-20 academic year.

Examines the history and choreographic features of Latin American and Caribbean dance forms. Dances are analyzed in order to uncover the ways in which dancing shapes national, racial, and gender identities. Focuses on the globalization of these dances in New York City.

DNCE BC3578 Traditions of African-American Dance. 3 points.
Not offered during 2019-20 academic year.

Traces the development of African-American dance, emphasizing the contribution of black artists and the influence of black traditions on American theatrical dance. Major themes include the emergence of African-American concert dance, the transfer of vernacular forms to the concert stage, and issues of appropriation, cultural self-identification, and artistic hybridity.

DNCE BC3980 Performing the Political: Embodying Change in American Performance. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: An introductory course in dance or theatre history or permission of instructor. Enrollment limited to 12 students. Exploration into the politics of performance and the performance of politics through the lens of 20th-century American dance.

ENTH BC3144 Black Theatre. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 16 students.

ENWS BC3144 Minority Women Writers in the United States. 3 points.
BC: Fulfillment of General Education Requirement: Literature (LIT).
Not offered during 2019-20 academic year.

Literature of the 20th-century minority women writers in the United States, with emphasis on works by Asian, Black, Hispanic, and Native American women. The historical and cultural as well as the literary framework.

ENGL BC3190 Global Literature in English. 3 points.
Not offered during 2019-20 academic year.

Selective survey of fiction from the ex-colonies, focusing on the colonial encounter, cultural and political decolonization, and belonging and migration in the age of postcolonial imperialism. Areas covered include Africa (Achebe, Aidoo, Armah, Ngugi); the Arab World (Mahfouz, Munif, Salih, Souief); South Asia (Mistry, Rushdie, Suleri); the Carribean (Kincaid); and New Zealand (Hulme).
ENGL BC3196 Home to Harlem: Literature of the Harlem Renaissance. 4 points.

In the spring of 2020, Home to Harlem will focus on Harlem as a crossroads, diasporic and transnational black mecca. Exploring the cultural contexts and aesthetic debates that animated Harlem in 1920s to 1930s, the course discusses the politics of literary and performative cultural production while exploring the fashioning of New Negro identity through fiction, poetry, essays, artwork, and music. Topics considered include: role of Africa/slavery/the south in New Negro expression, patronage, passing, primitivism/popular culture, black dialect as literary language, and the problematic of creating a "racial" art in/for a diverse community comprised of differences in gender, class, sexuality, and geographical origin.

This course will partner with AfroSwedish hip-hop artist, writer, and activist Jason 'Timbuktu' Diakité and Harlem Stage. Born to interracial American parents in Sweden (his father hails from Harlem), Diakité grew up between worlds, riding a delicate cultural and racial divide. His search to unify a complex system of family roots has taken him across continents, ethnicities, classes, colors, and eras to find a sense of belonging. In spring of 2020, he comes Home to Harlem when he performs a new stage version of his memoir, A Drop Of Midnight, at Harlem Stage.

HIST BC2321 Colonial Encounters: Europe and the Culture of Empire. 3 points.

Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism.

HIST BC2840 Topics in South Asian History. 3 points.

Not offered during 2019-20 academic year.

Prerequisites: Some background in non-Western history is recommended.

Examines caste and gender as an important lens for understanding the transformations of intimate life and political culture in colonial and post-colonial India. Topics include: conjugality; popular culture violence, sex and the state; and the politics of untouchedability.

HIST BC2980 World Migration. 3 points.

Overview of human migration from pre-history to the present. Sessions on classical Rome; Jewish diaspora; Viking, Mongol, and Arab conquests; peopling of New World, European colonization, and African slavery; 19th-century European mass migration; Chinese and Indian diasporas; resurgence of global migration in last three decades, and current debates.

HIST BC3546 The Fourteenth Amendment and Its Uses. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The role of the 14th Amendment in shaping the modern American Constitution; theories of judicial review; the rise and fall of economic due process; the creation of civil liberties; the civil rights revolution; and the end of states’ rights.

HIST BC3587 Remembering Slavery: Critiquing Modern Representations of the Peculiar Institution. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The enslavement of people of African descent signifies a crucial historical and cultural marker not only for African-Americans but also for Americans in general. We will interrogate how and why images of slavery continue to be invoked within the American sociocultural landscape (e.g., in films, documentaries, historical novels, and science fiction).

HIST BC3669 Inequalities: Interdisciplinary Perspectives on Latin America. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

A general background on Latin America recommended but not absolutely required. Course limited to 15 students.

Latin America has long been characterized by extreme and enduring inequalities of class, income, race, and ethnicity. Examines patterns of inequality from different disciplinary perspectives, both historically and in the present. Examines not only causes and solutions but how scholars have approached inequality as an intellectual problem.

HIST BC3672 Perspectives on Power in 20th Century Latin America. 4 points.

Not offered during 2019-20 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.
Examination of recent Latin American historiography concerns with power in the context of 20th-Century Latin America. Focus on such diverse topics as the Mexican Revolution and migrant culture in Costa Rica, labor mobilization in Chile and the dirty war in Argentina. Themes include the relationship between popular culture and the state; the power of words and the power of symbols; structure and agency; the role of the law; the relationship between leaders and followers; and the intersections of gender, race, and power.

**HIST BC3791 Lagos: From Pepper Farm to Megacity. 4 points. Not offered during 2019-20 academic year.**

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Examines the many Lagoses that have existed over time, in space, and in the imagination from its origins to the 21st century. This is a reading, writing, viewing, and listening intensive course. We read scholarly, policy-oriented, and popular sources on Lagos as well as screening films and audio recordings that feature Lagos in order to learn about the social, cultural, and intellectual history of this West African megacity.

**HIST BC3870 Gender and Migration: A Global Perspective. 4 points.**

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Sophomore Standing.

Explores migration as a gendered process and what factors account for migratory differences by gender across place and time; including labor markets, education demographic and family structure, gender ideologies, religion, government regulations and legal status, and intrinsic aspects of the migratory flow itself.

**Political Science (Barnard)**

**POLS V3604 Civil Wars and International Intervention in Africa. 3 points.**

Enrollment limited to 110. Not offered during 2019-20 academic year.

Prerequisites: at least sophomore standing, except in consultation with the instructor.

This course analyzes the causes of violence in civil wars. It examines the debates around emergency aid, peacekeeping and peacebuilding. In addition, it focuses on recent conflict situations in Africa – especially Congo, Sudan, and Rwanda -- as a background against which to understand the distinct dynamics of violence, peace, and international interventions in civil conflicts. (Cross-listed by the Center for the Study of Ethnicity and Race.)

**Religion (Barnard)**

**RELI V2615 Religions of Harlem. 3 points. Not offered during 2019-20 academic year.**

Through a range of field exercises and classroom guests, this course will introduce students to the rich religious history of Harlem, while also challenging them to document and analyze the diversity of Harlem’s contemporary religious scene.

**RELI W4620 Religious Worlds of New York. 4 points.**

This seminar teaches ethnographic approaches to studying religious life with a special focus on urban religion and religions of New York. Students develop in-depth analyses of religious communities using these methods. Course readings address both ethnographic methods and related ethical and epistemological issues, as well as substantive topical issues of central importance to the study of urban religion, including transnationalism and immigration, religious group life and its relation to local community life, and issues of ethnicity, race and cosmopolitanism in pluralistic communities.

**RELW 4825 Religion, Gender, and Violence. 4 points.**

Not offered during 2019-20 academic year.

Investigates relations among religion, gender, and violence in the world today. Focuses on specific traditions with emphasis on historical change, variation, and differences in geopolitical location within each tradition, as well as among them at given historical moments.

**Sociology (Barnard)**

**SOCI V3247 The Immigrant Experience, Old and New. 3 points.**

Not offered during 2019-20 academic year.

The immigrant experience in the United States. Topics include ideologies of the melting pot; social, cultural, and economic life of earlier immigrants; the distinctiveness of the African-American experience; recent surge of "new" immigrants (Asians, Latinos, West Indians); and changing American views of immigration.

**SOCI V3324 Poverty, Inequality, and Policy: A Sociological Perspective. 4 points. Not offered during 2019-20 academic year.**

Prerequisites: Introductory course in Sociology is suggested. Examination of poverty, the "underclass," and inequality in the United States. Part 1: The moral premises, social theories, and political interests shaping current debates about the poor. Part 2: A more concrete analysis of the lives of the poor and the causes of family breakdown, the drug economy, welfare, employment, and homelessness.

**SOCI BC3907 Communities and Social Change. 4 points.**

Not offered during 2019-20 academic year.

Examines how changes in the economy, racial composition, and class relations affect community life-how it is created, changed and sometimes lost-with a specific focus on the local urban context. Student research projects will address how contemporary forces such as neoliberalization, gentrification and tourism impact a community's social fabric.

**SOCI BC3909 Ethnic Conflict and Unrest. 4 points. Not offered during 2019-20 academic year.**

Prerequisites: Sophomore Standing. SOCI BC1003 or permission of the instructor. Enrollment limited to 20 students. Post-1965 immigration in the U.S. has prompted conflicts between new immigrant groups and established racial and ethnic groups. This seminar explores ethnic conflict and unrest that takes place in the streets, workplace, and everyday social life. Focus is on sociological theories that explain the tensions associated with the arrival of new immigrants.

**SOCI BC3913 Inequalities: Race, Class, Gender and Sexuality in U.S. Law and Society. 4 points.**

This class will examine the historical roots and ongoing persistence of social, economic, and political inequality and the continuing role...
that it plays in U.S. society by examining how such issues have been addressed both in social science and in law.

**Spanish and Latin American Cultures (Barnard)**

**SPAN BC3470 Latin(o) American Art in New York City: Critical Interventions, Institutions, and Creative Lives. 3 points.**

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

Considers the trajectory and intervention of Latin(o) American art in New York City’s artistic landscape. We will map the relation between Latin(o) American art and key art institutions, study critical receptions, and look at some of the lives and works of Latin(o) American artists in NYC.

**SPAN BC3990 Senior Seminar: Crime and Culture in Modern Spain. 3 points.**

Prerequisites: SPAN UN3300 SPAN UN3349 SPAN UN3350

Throughout the nineteenth and the early twentieth centuries, after the loss of most of its empire, Spain is engaged in reconceptualizing itself as a constitutional monarchy with updated political, economic, and social institutions. A cornerstone of this transformation is the development of a legal/juridical system dependent on newfangled notions like “normalcy,” “delinquency,” or “insanity,” and in dialogue with other cultural systems like medicine, journalism, literature, and politics. Intellectuals in various fields worked to produce the new ideal citizen defined primarily by law, as well as its polar opposite, the deviant/delinquent. Our course will examine this chronological process in the peninsula, as well as its different functioning in the remaining colonial world (Cuba, Puerto Rico, and the Philippines).

**Women’s Studies (Barnard)**

**WMST BC2140 Critical Approaches in Social and Cultural Theory. 3 points.**

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Introduction to key concepts from social theory as they are appropriated in critical studies of gender, race, sexuality, class and nation. We will explore how these concepts are taken up from different perspectives to address particular social problems, and the effects of these appropriations in the world.

**WMST BC3132 Gendered Controversies: Women’s Bodies and Global Conflicts. 4 points.**

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Investigates the significance of contemporary and historical issues of social, political, and cultural conflicts centered on women’s bodies. How do such conflicts constitute women, and what do they tell us about societies, cultures, and politics? - D. Ko

**WMST BC3134 Unheard Voices: African Women’s Literature. 4 points.**

This course is the same as AFRS BC3134 African Women’s Literature.

Introduction to African women’s literature in its historical and cultural contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora. This course is the same as AFRS BC3134 Unheard Voices: African Women’s Literature.

**WMST BC3510 Interpreting Bodies: Engendering the Black Body. 4 points.**

Not offered during 2019-20 academic year.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students. This course examines how the black female body has been marked in particular ways and a process of embodiment by focusing on the black female body in particular. Looking at feminist theorizing of the black body, it explores how the black female body has been marked in particular ways and with profound effects.

**WMST BC3518 Studies in U.S. Imperialism. 4 points.**

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Prerequisites: Enrollment limited to 20 students. Historical, comparative study of the cultural effects and social experiences of U.S. Imperialism, with attention to race, gender and sexuality in practices of political, economic, and cultural domination and struggle. Material includes studies of US Imperialism in the
Philippines, Puerto Rico, Hawaii, Guam, and Cuba and US foreign involvements in the developing world since World War II.

WMST UN3915 Gender and Power in Transnational Perspective. 4 points. Enrollment limited to 15.

Prerequisites: Instructor approval required. Considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist movements that have emerged to address contemporary gendered inequalities. Topics include political economy, global care chains, sexuality, sex work and trafficking, feminist politics, and human rights.

If it is a small world after all, how do forces of globalization shape and redefine both men's and women's positions as as workers and political subjects? And, if power swirls everywhere, how are transnational power dynamics reinscribed in gendered bodies? How is the body represented in discussions of the political economy of globalization? These questions will frame this course by highlighting how gender and power coalesce to impact the lives of individuals in various spaces including workplaces, the home, religious institutions, refugee camps, the government, and civil society, and human rights organizations. We will use specific sociological and anthropological case studies, to look at how various regimes of power operate to constrain individuals as well as give them new spaces for agency. This course will enable us to think transnationally, historically, and dynamically, using gender as a lens through which to critique relations of power and the ways that power informs our everyday lives and identities.

WMST W4308 Sexuality and Science. 4 points. Not offered during 2019-20 academic year.

Examines scientific research on human sexuality, from early sexology through contemporary studies of biology and sexual orientation, surveys of sexual behavior, and the development and testing of Viagra. How does such research incorporate, reflect, and reshape cultural ideas about sexuality? How is it useful, and for whom?

WMST W43020 Queer Theories and Histories. 4 points. Enrollment limited to 20. Not offered during 2019-20 academic year.

The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldua, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

Religion

219 Milbank Hall
212-854-2597
Department Assistant: Tynisha Rue

At the beginning of the twenty-first century, religion plays a central role in virtually every aspect of human society around the globe. The Religion department's curriculum offers students the opportunity to explore the histories, texts, and practices of many of the world's religious communities and to consider both the profound ways in which religion has worked historically and how it continues to inform and affect the cultural, political, and ethical debates of the current moment. In addition, our curriculum invites students to reflect on the challenging theoretical questions that are generated by the category "religion" itself, an abstract category that has its own complicated history. The academic study of religion is self-consciously interdisciplinary, drawing upon the methods and insights of literary studies, historiography, social analysis, and cultural comparison. Moreover, the study of religion reminds us that religious identities demand sustained critical analysis, intersecting complexly as they do with race, class, gender, and ethnicity, among other categories of affiliation and identification. In its teaching, research projects, and public programming, the Religion department promotes engaged intellectual inquiry into the rich diversity of religious institutions, rituals, ideas, and communities both past and present.

The Departments of Religion at Barnard and Columbia marshal an array of academic approaches to the study of religion, representing the depth and diversity of the world's religious traditions, past and present. The category of religion—along with key related terms like belief, spirituality, mystical experience, and ritual—is historically and culturally contingent;
many of our courses interrogate these terms and the conditions of their construction. Yet we are committed to engaging "religion," which persists so strongly in common usage and public debate, and is so hard to capture in any related domain or theoretical system.

Morningside Heights provides unique resources for the study of religion. The University’s specialized programs and centers, especially its regional institutes, create a context for exploring in depth the linguistic, literary, political, and cultural milieus that bear on particular religious traditions. The new Center for the Study of Science and Religion enriches curricular offerings in that field. Barnard’s Center for Research on Women often focuses on issues of ethics and policy where questions of religion and gender are paramount, and Barnard Religion faculty are particularly active in the area. Barnard and Columbia offer intensive language training in the languages of the major religious traditions of the world: Arabic, Chinese, Greek, Hebrew, Japanese, Latin, Persian, Sanskrit and other Indic languages, and Tibetan, among others. The Jewish Theological Seminary of America and Union Theological Seminary, with their world-renowned libraries, are our neighbors. And the city as a whole provides one of the world’s best laboratories for the study of religion.

Our program tries to help students discover these resources and use them well. Many courses fulfill the College’s general education requirements.

Mission
Goals for the Academic Study of Religion at Barnard
The faculty in Religion at Barnard have organized the curriculum around several interlocking goals:

- To help students learn to engage critically with different religious traditions in their historical and cultural settings;
- To attune students to the different theoretical, methodological, and disciplinary approaches required for critically interrogating different religious archives, performances, communal formations, artifacts, and ideas;
- To provide students with the critical tools for understanding the influence of religion on individuals and society;
- To open up the category of —religion# to critical investigation, both to consider its history and to understand how it comes to be applied to a variety of human and social phenomena.

Student Learning Outcomes
What Students Learn when Pursuing the Academic Study of Religion at Barnard
Students who are successful in our curriculum will learn to:

- Read/view/engage primary sources and scholarly materials critically and with subtlety;
- Situate religious texts, performances, artifacts, and ideas in historical, social, political, and cultural contexts;
- Understand the importance of perspective when analyzing religious ideas, claims, and sources;
- Express themselves fluently in writing and speaking about the materials under investigation.

In addition, they will:

- Develop an acquaintanceship with the history of theoretical debates about "religion"—how the intellectual history of the field has shaped the object of knowledge for the field—and
- Become familiar with a range of methodological approaches appropriate to the object of study (e.g., literary interpretation and analysis; historical contextualization; ethnographic participant observation; philosophical inquiry; analysis of visual, artistic, archaeological, architectural evidence).

Requirements for the Major
The department’s strengths in comparative study, textual and social analysis, philosophy, theory, and cultural history allow students to balance close study in one area with a broad investigation of the field we name "religion." Working closely with an advisor in the department, majors construct a cluster of five courses that relate to one another in a coherent fashion (#1, below) and support the senior thesis. To complement this depth, they select three courses that lend breadth to their studies in religion (#2). Students considering Religion as a major should contact the chair or a member of the department in their sophomore year to begin planning their programs.

The Religion major requires twelve courses, as follows:

1) Major cluster: five courses, including one seminar. As many as two of these courses may come from other departments, and individually supervised research (UN 3901-2: Guided Readings) may also be included. This cluster of courses may be organized around a particular tradition or geographic area: Hinduism, Islam, Religion in America, etc. Alternatively, students may design clusters that focus on a set of related subjects and concerns, such as: Religion in New York; Religion in theory and practice; Religion and culture; Religious texts and histories; Religion and migration; Religion, women, gender; and Religion, race, nation, ethnicity.

Yet these are only exemplary. Students are urged to design their own clusters, supplementing departmental listings with religion-related courses posted on the Barnard Religion Department’s website as Religion Related Courses (http://religion.barnard.edu/sites/default/files/inline/religionrelatedcourses.pdf). Courses taken outside of the religion department must be approved by the student’s adviser or department chair. Several sample majors (http://religion.barnard.edu/majors-minors/#sample) are posted on the Barnard Religion Department’s website.

2) Breadth: three Religion courses - either lecture or seminar - that lend geographical, historical, and/or disciplinary range to a student’s program.

3) One semester of the course entitled “Religion Lab” (Religion GU4905), which focuses on methods, strategies, and materials utilized in the field of religious studies. Through guided exercises and selected
exemplary readings, students learn research skills for locating and identifying primary and secondary sources. They are also exposed to important scholarly frameworks necessary for properly analyzing these sources. Majors are encouraged to take this course by their junior year as it serves to prepare them for their senior thesis.

4) One semester of the course entitled “Theory” (UN3799), engaging major theoretical issues in the field.

5) The two-semester Senior Research Seminar (BC 3997-8), which must be taken in sequence, beginning in autumn and continuing through the spring, and which structures the experience of preparing a senior thesis. Students work together in this seminar to develop, critique, and accomplish their research projects, submitting a formal proposal and partial draft in the fall, and completing the research and writing in the spring.

Language Courses: Students may fulfill up to two of their required twelve courses through language study pending department approval. If a language is considered vital or important to a student’s major concentration, she may petition for credit with 1 year (two semesters) of courses counting as one course towards the religion major.

To summarize:

5 courses – Concentration
3 courses – Breadth
1 course – Religion Lab
1 course – Theory
2 courses – Senior Seminar

The department encourages study abroad, particularly in summers or in one semester of the junior year, and is eager to help facilitate internships and funded research. These possibilities often contribute very meaningfully to the senior essay project.

Minors and Combined Majors

A Religion minor comprises five Religion courses at any level, one of which must be RELI GU4105 Religion Lab. In addition, students are encouraged to include among the remaining four courses at least one seminar. Students intending to minor in Religion should contact the department chair.

Combined majors are offered with the programs in Human Rights and in Jewish Studies.

RELI BC3997 Senior Research Seminar. 4 points.
Working research seminar devoted to helping students produce a substantive piece of writing that will represent the culmination of their work at the College and in the major.

RELI BC3998 Senior Research Seminar. 8 points.
One year course - 4 points per term.

Working research seminar devoted to helping students produce a substantive piece of writing that will represent the culmination of their work at the College and in the major.

RELJ UN1610 Religion and Popular Culture. 3 points.
When we hear “pop culture,” we often think of it in comparison to a “high culture.” In reality, popular culture is something that everyone has easy access to, and represents a common language of the people. Religion permeates American popular culture in surprising ways, and is part of national vocabulary. In addition, religious communities turn to popular culture as a way to preserve their own identities and uniqueness in the face of homogenization and assimilation.

RELJ UN1615 Vampires. 3 points.
Do you believe in vampires? Like ghosts and zombies, vampires circulate in a secularized world and few are those who would speak of a “vampire religion.” This course will attempt to do that. It will ask about the ubiquitous figure of the vampire, as if it evokes the ancient and the archaic, the modern and the postmodern. With Bram Stoker’s Dracula as our guide, and with the help of film, we will explore the religious significance of vampires and what they mean for the salvation — or perdition — of the soul. We will wonder about vampires and sexuality, vampires and media, vampires and (geo-)politics, and even vampires and the economy.

RELJ UN1620 Religion and the Movies. 3 points.
This class is an introduction to both film and religious studies and aims to explore their interaction. Ranging from auteurs to blockbusters, the course will analyze movies that make use of the sacred and of religious themes, figures or references. The course will probe the definitions and boundaries of religion -as theology, myth, ideology- and will show students how religion remains a critical presence in the arts, even in a secular guise. We will look at the ways in which popular culture can serve religious functions in contemporary society and examine how faith is represented in popular culture.

RELJ UN2205 Buddhism: Indo-Tibetan. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

RELJ UN2304 Christianity. 3 points.
Survey of Christianity from its beginnings through the Reformation. Based on lectures and discussions of readings in primary source translations, this course will cover prominent developments in the history of Christianity. The structure will allow students to rethink commonly held notions about the evolution of modern Christianity with the texture of historical influence.
RELI UN2305 Islam. 4 points.  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

An introduction to the Islamic religion in its premodern and modern manifestations. The first half of the course concentrates on "classical" Islam, beginning with the life of the Prophet, and extending to ritual, jurisprudence, theology, and mysticism. The second half examines how Muslims have articulated Islam in light of colonization and the rise of a secular modernity. The course ends with a discussion of American and European Muslim attempts at carving out distinct spheres of identity in the larger global Muslim community.

RELI UN2306 Intro to Judaism. 3 points.  
A historical overview of Jewish belief and practice as these have crystallized and changed over the centuries. Special attention to ritual and worship, the forms of religious literature, central concepts, religious leadership and institutions, Israel among the nations.

| RELI UN2307 Chinese Religious Traditions. 3 points.  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Historical survey highlighting major developments in Chinese religion: includes selections from the "Warring States" classics, developments in popular Daoism, and an overview of the golden age of Chinese Buddhism. Touches on "Neo-Confucianism," popular literature of the late imperial period, and the impact of Western ideas.

| RELI UN2308 Buddhism: East Asian. 4 points.  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Lecture and discussion. An introductory survey that studies East Asian Buddhism as an integral, living religious tradition. Emphasis on the reading of original treatises and historiographies in translation, while historical events are discussed in terms of their relevance to contemporary problems confronted by Buddhism. There is a mandatory weekly discussion session.

| RELI UN2309 Hinduism. 3 points.  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Considers efforts since 1900 to synthesize a coherent understanding of what "Hinduism" entails, sometimes under the heading of sanatana dharma. Using a rubric provided by the Bhagavad Gita, explores philosophical/theological (jnana), ritual (karma), and devotional (bhakti) aspects of Hindu life and thought.

RELI UN3202 Religion in America I. 3 points.  
This course offers a survey of American religions from the 1500s through the mid-1800s. We examine the politics of conversion in different kinds of colonialisms; the different strands of Christianity in early America and their cultural contexts; the emergence of evangelical Protestantism; the effects of religious disestablishment in the early republic; and the relationship between religion and social movements.

| RELI UN3203 Religion in America II. 3 points.  
Survey of American religion from the Civil War to the present, with an emphasis on the ways religion has shaped American history, culture, and identity.

| RELI UN3206 Sociology of Religion. 3 points.  
Prerequisites: prior coursework in religion or sociology is highly encouraged.

This course introduces classical and contemporary theoretical and empirical approaches to the sociological study of religion, including secularization and secularity, religious identity formation, and sociological approaches to religious practice and meaning. Special focus will be on contemporary American topics, including religion and transnationalism, the role of religious actors and discourses in American politics, law and economics, and everyday religious practice.

| RELI UN3303 Judaism and Translation in the Medieval and Early Modern Mediterranean. 3 points.  
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The course explores both the practice of translation (the rendering of texts from one language to another) and the idea of translation (as a medium of cultural transmission) in the medieval and early modern Mediterranean.
RELI UN3340 Early Christianity. 3 points.
Examines the competing currents within early Christianity, with emphasis placed on the literary and social expressions of Christian belief and identity. Topics to be covered include persecution and martyrdom, debates over authority and religious experience, orthodoxy and heresy, and asceticism and monasticism, among others.

RELI UN3357 I and We in the Christian East: The Making of Identity. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
This course will provide a survey of Christian history in the eastern Mediterranean and Near East from roughly the fourth to the eleventh centuries with particular attention to religion and identity. How would the various Christians in this era answer the questions: “Who am I?” “Who are we?” How did their understanding of the divine influence their understanding of themselves and how was this identity enacted through writing and ritual? Though our focus will be on this period, we will also consider the framing of the history of “Eastern” Christianity into the modern period. No prerequisites.

RELI UN3407 Muslims in Diaspora. 4 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Consideration of controversies surrounding mosque-building, headscarves, honor killing, and other publicized issues that expose tensions surrounding citizenship and belonging for Muslims in North America and Europe. Exploration of film and other media representations of Muslims in the West. There will be additional meeting times for film screenings

RELI UN3425 Judaism and Courtly Literature in Medieval and Early Modern Iberia and Italy. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
The course explores secular Jewish literature composed in the medieval and Early Modern Mediterranean in the context of its Arabic and Romance-language counterparts. After examining the literary, linguistic and philosophical backdrops of Jews in the Islamic Empire, we will focus on poetry and prose of al-Andalus, Christian Spain and Italy. We will look at examples of how Jews depicted themselves and how Christian and converso thinkers portrayed Jews. In addition, we will consider two crossover writers, one Jew in Spain and one in Italy, whose compositions in Castilian and Italian were accepted and integrated into Christian society. Historical materials will accompany textual examples, which span the eleventh through sixteenth centuries.

RELI UN3430 Indigenous Religious Histories. 4 points.
Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of lacking religion; as pagan, barbarian, non-modern, and without history or civilization.

Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, the history of anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative.

RELI UN3511 Tantra in South Asia, East Asia & the West. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
An introduction to the history, literature, and ideology of Tantra and Tantric texts, deities, rituals, and traditions, proceeding chronologically from the early centuries C.E. to current forms of Tantric practice, and primarily covering India, China, and Japan. Attention will also be given to contemporary iterations of Tantra in the West. Questions of definition, transmission, patronage, gender, and appropriation link the various sections of the course. Readings include primary texts, secondary sources, local case studies, and art historical material.

RELI UN3575 Evangelicalism: Sex, Media, and Religion in America. 3 points.
Crossing denominations and encompassing a range of theological commitments, evangelical Christianity can be described as a theological disposition, a mode of hermeneutical practice, a theological-aesthetic sensibility, a mass spiritual movement, a practice of cultivating sacred affect, an errand to the world, and a genre of revivalism. This multidisciplinary seminar will emphasize the role of popular media in constituting an evangelical public, the gendered nature of evangelical subjectivity, the role of sex and sexuality in evangelical self-definition, and the ways that evangelical theological categories have shaped what we think of as “the secular” in the United States.

RELI UN3901 Guided Reading and Research. 1-4 points.

In their research, scholars of religion employ a variety of methods to analyze "texts" ranging from historical documents to objects of visual culture. This course acquaints students with both the methods and the materials utilized in the field of religious studies. Through guided exercises, they acquire research skills for utilizing sources and become familiarized with dominant modes of scholarly discourse. The class is organized around a series of research "scavenger hunts" that are due at the start of each week's class and assigned during the discussion section (to be scheduled on the first day of class). Additional class meeting on Thursdays.

REL 4212 Modern Buddhism. 4 points.
What most Americans and Europeans call ‘Buddhism’ today is in fact a hybrid tradition dating back to the 19th century. It owes as much to European philosophy and esoteric thought as to Asian traditions themselves and appeared in the context of decolonization. This course will survey the history of this recent tradition, identifying cultural and political trends that contributed to its creation in various geographical areas. Readings include several primary texts by important proponents of Modern Buddhism. The texts should also be read in comparison with the appropriate scholarly works on the Asian traditions they supposedly draw on. One course on Buddhism or East Asian Religions is recommended, but not required, as background.

REL 4305 Secular and Spiritual America. 4 points.
Prerequisites: Majors and concentrators receive first priority. Are Americans becoming more secular or more spiritual (not religious), or both? What are the connections between secularism and what is typically called non-organized religion or the spiritual in the United States? We will address these questions by looking at some of the historical trajectories that shape contemporary debates and designations (differences) between spiritual, secular and religious.

REL 4307 Interactions of Buddhism and Daoism in China. 4 points.
Prerequisites: one course on Buddhism or Chinese religious traditions is recommended, but not required, as background. In this course we will read English scholarship that probes the complex relationships between Buddhism and Daoism in the past two millennia. Students are required not only to be aware of the complementarity and tensions between them, but to be alert to the nature of claims to religious distinction or mixing and the ways those claims were put forward under specific religio-historical circumstances. The course is designed for advanced undergraduate and graduate students in East Asian religion, literature, history, art history and anthropology.

REL 4308 Jewish Philosophy and Kabbalah. 4 points.
The purpose of this seminar is to study the interactions between two major intellectual trends in Jewish History, the philosophical and the mystical ones. From the medieval period to the twenty-first century, we will discuss their interactions, polemics and influences. We will compare Philosophy and Kabbalah in light of their understanding of divine representation and in light of their respective Theology and conception of God.

REL 4315 Sufis and the Qur’an. 4 points.
This course is a seminar for advanced undergraduates and graduate students who wish to gain an understanding of the complexity and richness of the Sufi exegetical tradition. the Qur’an has been the main source of its inspiration and contemplation for Sufis for centuries....

REL 4318 Interpreting Buddhist Yoga: Hermeneutics East West Quantum. 4 points.
A seminar exploring the meanings of Buddhist Tantra and being, time, space, gender, technology, and mysticism through traditional religious, modern, post-modern, digital, quantum, and Buddhist "hermeneutics;" the science and art of interpretation. We will read ancient and modern classics on hermeneutics, by Schleiermacher, Gadamer, Heidegger, Barthes, and Ricour; Indian and Tibetan works on their systems of interpretation, at least as sophisticated as anything from Europe; and contemporary works on how digital technology brings us into a world of new meaning for everything, including Buddhist yoga.

REL 4325 Sufism. 4 points.
Prerequisites: Permission of instructor.
This is a seminar for advanced undergraduate and graduate students who wish to gain an understanding of the richness of Sufism (Islamic mysticism). We will examine the historical origins, development and institutionalization of Sufism, including long-standing debates over its place within the wider Islamic tradition. By way of a close reading of a wide range of primary and secondary sources, we will examine Sufi attitudes toward the body. Sufi understandings of lineage, power and religious authority, as well as the continued importance of Sufism in the modern world.

RELI GU4326 Sufism in South Asia. 4 points.
Sufism has been described as the mystical side of Islam. This seminar for advanced undergraduates and graduate students will examine Sufism in South Asia as a spiritual, ethical and self-forming activity that has been profoundly affected by the historical, sociocultural, political, and everyday environments in which it is experienced and practiced.

RELI GU4355 The African American Prophetic Political Tradition from David Walker to Barack Obama. 4 points.
Through a wide range of readings and classroom discussions, this course will introduce students to the crucial role that the unique African-American appropriation of the Judeo-Christian prophetic biblical tradition has played -- and continues to play -- in the lives of black people in America.

RELI GU4365 Revolutionary Women and Political Islam. 4 points.
Muslim female reformers and revolutionaries were at the forefront of many of the 20th and early 21st centuries’ historic socio-political and religious movements across the Global South. Members of diverse classes, families, and ethnic communities, many worked within the tenets of Islam in multiple ways to construct religious identity and work towards achieving and demanding civil and political rights. Yet the myriad theoretical and popular discourses underpinning emergent and longstanding women’s movements within revolutionary contexts are frequently overlooked. Moreover, representations of Muslim women too often rely on essentialist, ahistorical, static, victim-centered, and Orientalist descriptions and analyses. As a result, shades of difference in interpretation, ideology, practice, and culture are minimized. This course situates Muslim women as complex, multidimensional actors engaged in knowledge production and political and feminist struggles. We will read key texts and analyses from scholars and activists writing on religion, gender, sexuality, family planning, and women’s status in the contemporary Global South. The following questions will emerge in our discussions: “When is a hejab just a hejab?” “Do Muslim Women Really Need Saving?,” and “What is an ‘Islamic Feminist’ and Should We Care?” Readings include memoirs, editorials, ethnographies, and political treatises, as well as historical scholarship from North Africa, the Gulf, the Levant, and Southeast Asia.

RELI GU4509 Crime and Punishment in Jewish Culture. 4 points.
Explores ethical, cultural, and political dimensions of Jewish criminal punishment from the Bible through modernity, with focus on death penalty and running reference to Foucault’s Discipline and Punish. Topics include: interaction between law and narrative; Jewish power to punish; Sanhedrin trial of Jesus; ritualization of execution; prison; torture; martyrdom.

RELI GU4513 Buddhism and Neuroscience. 4 points.
With the Dalai Lama’s marked interest in recent advances in neuroscience, the question of the compatibility between Buddhist psychology and neuroscience has been raised in a number of conferences and studies. This course will examine the state of the question, look at claims made on both sides, and discuss whether or not there is a convergence between Buddhist discourse about the mind and scientific discourse about the brain.

RELI GU4514 Defining Marriage. 4 points.
This seminar examines the changing purpose and meaning of marriage in the history of the United States from European colonization through contemporary debates over gay marriage. Topics include religious views of marriage, interracial marriage, and the political uses of the institution.

RELI GU4535 Buddhist Contemplative Sciences. 4 points.
This course will explore key Buddhist contemplative sciences, including: stabilizing meditation; analytic insight meditation; the four immeasurables; form and formless trances; mind training; and the subtle body-mind states activated and transformed through advanced Tantric yoga techniques. These will be explored both within their traditional interdisciplinary frameworks, as well as in dialog with related contemporary arts and sciences.

RELI GU4615 Media and Religion. 4 points.
Typewriters, trains, electricity, telephones, telegraph, stock tickers, plate glass, shop windows, radio, television, computers, Internet, World Wide Web, cell phones, tablets, search engines, big data, social networks, GPS, virtual reality, Google glass. The technologies turn back on their creators to transform them into their own image. This course will consider the relationship between mechanical, electronic, and digital technologies and different forms of twentieth-century capitalism. The regimes of industrial, consumer, and financial shape the conditions of cultural production and reproduction in different ways.

RELI GU4616 Technology, Religion, Future. 4 points.
This seminar will examine the history of the impact of technology and media on religion and vice versa before bringing into focus the main event: religion today and in the future. We’ll read the classics as well as review current writing, video and other media, bringing thinkers such as Eliade, McLuhan, Mumford and Webster into dialogue with the current writing of Kurzweil, Langer and Taylor, and look at, among other things: ethics in a Virtual World; the relationship between Burning Man,
a potential new religion, and technology; the relevance of God and The Rapture in Kurzweil’s Singularity; and what will become of karma when carbon-based persons merge with silicon-based entities and other advanced technologies.

### Science and Public Policy

212-854-3628

Department Assistant: Joanna Chisolm

#### Mission

As part of the College’s mission to prepare scientists, policy-makers, and an educated citizenry for the moral challenges presented by future scientific advances, Barnard offers a unique collection of courses focusing on issues at the frequently volatile intersection point where science, public policy, and societal concerns collide.

These courses are interdisciplinary in nature, team-taught by Barnard faculty from a variety of departments, and held in seminar format with limited enrollments, typically juniors and seniors. Recent topics concern ecological vs. financial imperatives in developing Third-World biodiversity; manipulation of the human genome, privacy issues and ethical dilemmas arising from genetic testing, misguided eugenics programs and race science, the Manhattan Project, as well as the Cold War build-up of nuclear arsenals in the United States and former Soviet Union.

**Professors:** Tim Halpin-Healy (Physics), Brian Morton (Biological Sciences), Rajiv Sethi (Economics)

### Requirements for the Science, Policy & Ethics Minor

The minor in Science, Policy & Ethics, which requires 5 courses total, can be created by complementing a selection of core SCPP seminars with relevant foundational work in the philosophy and religion departments, as follows:

#### Core SCPP Coursework

Select two of the following:

- SCPP BC3334 Science, State Power & Ethics
- SCPP BC3336 Genetics and Society

#### Philosophy Department Coursework

Introductory Level:

- SCPP BC3347 Science and Religion

RELI GU4637 Talmudic Narrative. **4 points.**

This course examines the rich world of Talmudic narrative and the way it mediates between conflicting perspectives on a range of topics: life and death; love and sexuality; beauty and superficiality; politics and legal theory; religion and society; community and non-conformity; decision-making and the nature of certainty. While we examine each text closely, we will consider different scholars’ answers — and our own answers — to the questions, how are we to view Talmudic narrative generally, both as literature and as cultural artifact?

### SCPP BC3344 Science, State Power & Ethics. **4 points.**

**BC:** Fulfillment of General Education Requirement: Reason and Value (REA), **BC:** Fulfillment of General Education Requirement: Social Analysis (SOC I), **BC:** Fulfillment of General Education Requirement: Ethics and Values.

**Seminar**

**Prerequisites:** Enrollment limited to 10 students.

A comparative study of science in the service of the State in the U.S., the former Soviet Union, Fascist Italy, and Nazi Germany during pivotal periods through the first half of the 20th century. Topics to be covered include the political and moral consequences of policies based upon advances in the natural sciences making possible the development of TNT, nerve gas, uranium fission and hydrogen fusion atomic bombs. Considers the tensions involved in balancing scientific imperatives, patriotic commitment to the nation-state, and universal moral principles and tensions faced by Robert Oppenheimer, Andrei Sakharov, Neils Bohr and Werner Heisenberg. Selected readings include: Michael Frayn’s play Copenhagen, Hitler’s Uranium Club by Jeremy Bernstein, Brecht’s Galileo, John McPhee’s The Curve of Binding Energy, Richard Rhodes’ The Making of the Atomic Bomb.

### SCPP BC3336 Genetics and Society. **4 points.**

An exploration of the growing knowledge and technological advances in genetics, with a focus on human genetics, using scientific, popular and artistic sources. The course will cover areas such as genetic testing, personalized medicine, ancestry analysis, genome editing with CRISPR-Cas9, stem cells and cloning. It will involve an examination of scientific sources, portrayals in popular culture and discussions of some of the ethical implications and social/political impacts.

### SCPP BC3340 Exhibitions: Engaging Public Understanding. **1 point.**

Not offered during 2019-20 academic year.

**Corequisites:** Enrollment limited to 18 students.

Museum exhibitions educate the public, inform discourse, and shape opinion. Students work with curators and exhibition designers on conceptualization and research, design and preparation, writing interpretative material, and developing media and ancillary programming. Students engage in the communication of learning goals through both the exhibition’s content and its physical manifestation.
Cross-listed Courses

PHIL BC1001 Introduction to Philosophy. 3 points.
Survey of some of the central problems, key figures, and great works in both traditional and contemporary philosophy. Topics and texts will vary with instructor and semester.

PHIL UN1010 Methods and Problems of Philosophical Thought. 3 points.
Critical introduction to philosophical problems, ideas and methods.

PHIL V2593 Science and Religion. 3 points.
Open to all undergraduates. Not offered during 2019-20 academic year.

The course investigates what many people have viewed as a "quarrel" between science and religion. It explores what science is, and what religion is, and asks what authority can offer for the various claims they make. As the natural sciences provide increased knowledge of the cosmos, is there still a place for religion? The course has no prerequisites.

PHIL UN2702 Contemporary Moral Problems. 3 points.
Questions about how people should act have historically been central to philosophy. This course introduces students to philosophy through an examination of some important moral problems that arise in the twenty-first century. The aim is not only to offer ideas for thinking through the issues covered, but also to provide tools for general moral reflection. Topics covered will include: the legitimacy of asking migrants to abandon their traditional practices, responsibilities to distant people and to future generations, abortion and genetic testing of the unborn, the proper treatment of animals, and the permissibility of war and terrorism.

PHIL V3720 Ethics and Medicine. 3 points.

Prerequisites: Limited enrollment by permission of the instructor. First-day attendance required. Philosophical examination of moral issues in medical theory and practice. Analysis of the ethics of the doctor-patient relationship, e.g., informed consent, truth-telling, paternalism; topics in bioethics, e.g., abortion, euthanasia, experimentation on humans; justice and access to health care; human genetics.

RELI V3000 Buddhist Ethics. 3 points.
Prerequisites: the instructor's permission.
An investigation of the main textual sources of the Buddhist ethical tradition, with attention to their historical operation within Buddhist societies, as well as consideration of their continuing influence on contemporary developments, Western as well as Asian.

WMST BC3131 Women and Science. 4 points.
Prerequisites: Enrollment limited to 18 students. History and politics of women's involvement with science. Women's contributions to scientific discovery in various fields, accounts by women scientists, engineers, and physicians, issues of science education. Feminist critiques of biological research and of the institution of science.

Mission

The primary mission of the Slavic Department at Barnard is to prepare students linguistically, culturally, and academically to participate in the global community, specifically by engaging with the Slavic-speaking world. To this end, the Department, in cooperation with its Columbia counterpart, offers instruction in five Slavic languages and literatures, with particular emphasis on Russian. The department insists upon a strong foundation in language study, because this best prepares students for future involvement with the countries of Eastern Europe and Eurasia, as well as for graduate study in the literature, anthropology, sociology, history, economics, or politics of the region, and for careers in government, business, journalism, or international law.

The department offers major tracks in Russian Language and Literature, Slavic and East European Literature and Culture, Russian Regional Studies, and Slavic and East European Regional Studies. A minor program in Russian Language and Culture is also available. These programs are supported by an extensive array of courses designed to help the student obtain reasonable fluency in the spoken and written language and a reading ability adequate for interpreting texts of some difficulty in a variety of disciplines. While offering a range of courses designed to give the student a strong general background in Russian and Slavic literature, film, culture, and intellectual history, the department encourages students to supplement their knowledge by taking courses devoted to Russia, the former Soviet Union, and Eastern Europe offered in other disciplines as well. The department co-sponsors and facilitates student participation in region-related extra-curricular activities held at the Harriman Institute and the Columbia Slavic Department and also fosters student engagement with the rich cultural resources available in New York City.

Student Learning Outcomes

In recognition of the National Standards for Foreign Language Learning published by the American Council on the Teaching of Foreign Languages, the Slavic Department expects the following outcomes for students in each of its major tracks:

- Communication. Students should be able to communicate orally and in writing in the language of study, and understand and interpret written and spoken language on a variety of topics.
• **Cultures.** Students should demonstrate an understanding of the perspectives, products, and practices of the culture studied.

• **Connections.** Students should be able to acquire information and recognize the distinctive viewpoints available to them through the foreign language and its cultures.

• **Comparisons.** Students should develop comparative insights into the nature of language and culture as a result of studying a language and culture other than their own.

• **Communities.** Students should be prepared to participate in multilingual communities at home and around the world.

In addition, the Department expects the following outcomes of all majors:

• Students should demonstrate broad knowledge of at least one major aspect (e.g., literature, politics, or history) of the culture studied.

• Students should acquire and convey, in an appropriate academic form, deep knowledge of a particular topic or question relating to the culture studied.

Entering students should see Professor Frank Miller (708 Hamilton, 854-3941) for a placement examination: a sufficiently high grade will automatically fulfill the language requirement; other students will be placed accordingly. Native speakers of Russian or any Slavic language should consult with the department chair. The Department is a member of "Dobro Slovo" (The National Slavic Honor Society) and is pleased to induct its qualifying students into the society.

**Acting Chair:** Helene Foley (Professor of Classics)
**Term Assistant Professor:** Holly Myers
**Adjunct Lecturer:** Vasily Lvov

Other officers of the University offering courses in Slavic:

**Professors:** Valentina Izmirlieva (on leave 2019-20), Liza Knapp (DGS), Cathy Popkin (DUS), Irina Reyfman (Chair), Mark Lipovetsky (Leiderman)

**Assistant Professors:** Adam E. Leeds, Jessica E. Merrill (on leave 2019-20)

**Lecturers:** Alla Smyslova (Russian Language Program Director), Aleksandar Boskovic (on leave 2019-20), Christopher Caes, Christopher Harwood, Nataliya Kun, Meredith Landman, Mona M. Momescu, Yuri Shevchuk,

*Liza Knapp (Director, Graduate Studies)
*Cathy Popkin (Director, Undergraduate Studies)*

**Requirements for the Major**

There are four majors available to students in the department. Prospective students are encouraged to consult with a member of the faculty as early as possible in order to determine the major track and selection of courses that will best serve her background and interests.

Requirements for the Minor

Minor in Russian
The Minor in Russian allows students to study the language and
culture of Russia at a smaller scale than a Major. A total of five courses
(minimum 15 credits) beyond the second year of Russian are required.
These courses should relate to the language and culture of Russia.
Courses should be selected in consultation with a Slavic Department
faculty member.

Minor in Czech, Polish, Serbo-Croatian or Ukrainian
A Minor in a Slavic language other than Russian allow students to
pursue in-depth studies of this language and the region on a smaller
scale than the one required for a Major. The Barnard Minor in Czech,
Polish, Serbo-Croatian or Ukrainian consists of five courses (minimum
15 credits) beyond the second year of language study. It requires that
three (3) of these courses be related to the country of the language
(Poland, Czech Republic, etc) while the other two (2) should be related to
the region and its cultural history more broadly.

Prerequisites: (RUSS UN2102) (department placement test)
This content-based course has three focal points: 1) communicative skills 1) idiomatic language, 3) cross-cultural awareness.

The course is designed to help students further develop all of their language skills with particular focus on communicative and information processing skills, as well as natural student collaboration in the target language. The materials and assignments that will be used in class allow to explore a broad range of social, cultural, and behavioral contexts and familiarize students with idiomatic language, popular phrases and internet memes, developments of the colloquial language, and the use of slang in everyday life.

On each class students will be offered a variety of content-based activities and assignments, including, information gap filling, role-play and creative skits, internet search, making presentations, and problem-solving discussions. Listening comprehension assignments will help students expand their active and passive vocabulary and develop confidence using natural syntactic models and idiomatic structures.

Students will be exposed to cultural texts of different registers, which will help them enhance their stylistic competence. Students will learn appropriate ways to handle linguo-social situations, routines, and challenges similar to those they come across when traveling to Russia. They will explore various speech acts of daily communication, such as agreement/disagreement, getting and giving help, asking for a favor, expressing emotions, and so forth. Part of class time will be devoted to nonverbal communication, the language of gestures, emotional expressions, and so forth. Part of class time will be devoted to nonverbal communication, the language of gestures, emotional

RUSS UN3220 Literature and Empire: The Reign of the Novel in Russia (19th Century) [in English]. 3 points.
Explores the aesthetic and formal developments in Russian prose, especially the rise of the monumental 19th-century novel, as one manifestation of a complex array of national and cultural aspirations, humanistic and imperialist ones alike. Works by Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov. Knowledge of Russian not required.

RUSS UN3221 Literature & Revolution [in English]. 3 points.
The revolutionary period (1905-1938) in Russia was not only one of extreme social upheaval but also of exceptional creativity. Established ideas about individuality and collectivity, about how to depict reality, about language, gender, authority, and violence, were all thrown open to radical questioning. Out of this chaos came ideas about literature and film (just for example) which have shaped Western thought on these subjects to this day. In this course we will study a variety of media and genres (poetry, manifestos, film, painting, photomontage, the novel, theoretical essays) in an effort to gain a deep understanding of this complex and fascinating period in Russian cultural history.

RUSS UN3595 Senior Seminar. 3 points.
A research and writing workshop designed to help students plan and execute a major research project, and communicate their ideas in a common scholarly language that crosses disciplinary boundaries. Content is determined by students’ thesis topics, and includes general sessions on how to formulate a proposal and how to generate a bibliography. Students present the fruits of their research in class discussions, culminating in a full-length seminar presentation and the submission of the written thesis.

RUSS UN3333 Vvedenie v russkuiu literaturu: Poor Liza, Poor Olga, Poor Me. 3 points.

For non-native speakers of Russian.

Prerequisites: two years of college Russian or the instructor’s permission.

The course is devoted to the reading, analysis, and discussion of a number of Russian prose fiction works from the eighteenth to twentieth century. Its purpose is to give students an opportunity to apply their language skills to literature. It will teach students to read Russian literary texts as well as to talk and write about them. Its goal is, thus, twofold: to improve the students’ linguistic skills and to introduce them to Russian literature and literary history. In 2007-2008: A close study of a number of works written within the context of the late eighteenth century. Conducted in Russian.

SLCL GU4890 Gulag Literature. 4 points.

The Gulag constituted one of the most notorious examples of the twentieth-century’s totalitarian evil. At the same time, it was subject to one of the most radical campaigns of misrepresentation and manipulation conceived by the Soviet propaganda and supported to a large extent by many cultural and intellectual elites of the West. From the Bolshevik Revolution to the fall of the Soviet Union, the only evidence of the Gulag available to the outside world, apart from Soviet propaganda, were the testimonies of witnesses and survivors. Their stories functioned as the only available history; Gulag literature, therefore, complicates the traditional distinctions between literature and history. By examining Gulag literature in its many different forms, including propaganda, short stories, novellas, memoirs, poetry, and drama, we will learn the history of the Soviet Gulag system; we will also address questions of authenticity, authority, and morality in the literary representation of trauma and past events.

RUSS GU4910 Literary Translation. 4 points.

Prerequisites: four years of college Russian or the equivalent.

Workshop in literary translation from Russian into English focusing on the practical problems of the craft. Each student submits a translation of a literary text for group study and criticism. The aim is to produce translations of publishable quality.

SLCL UN3301 Slavic Cultures. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement 

SLCL UN3333 The Vampire in Myth, Literature, and Film. 3 points.

The vampire is one of the most popular and enduring images in the world, giving rise to hundreds of monster movies around the globe every year, not to mention novels, short stories, plays, TV shows, and commercial merchandise. Yet the Western vampire image that we know from the film, television, and literature of today is very different from its Slavic and Eastern European progenitors. Nina Auerbach has said that “every age creates the vampire that it needs.” In this course we will explore the Slavic and Eastern European origins of the vampire and how the vampire—in its look, nature, vulnerabilities, and threat—has changed over the centuries.

This approach will provide us with the means to learn about the geography, village and urban cultures, traditional social structure, and religions of Russia and Eastern Europe; the nature and manifestations of Evil and the concept of Limited Good; and major historical and intellectual periods (the settlement of Europe, the Age of Reason, Romanticism, Neo-classicism, the Enlightenment, the Victorian era, up to today). We will examine how the vampire manifested itself in European literature and then in the entertainment (and commercial) media of today, through numerous and various readings of fictional, ethnographic, and scholarly works, the analysis of folklore materials, as well as the viewing of movies, television shows, and Internet sites, not only from the U.S. and Europe but from around the world.

In analyzing the metaphor of the vampire, from Slavic and East European myth to contemporary Western media, we will investigate how the vampire evolved from association with disease to countercultural and civil rights movements. By the end of the course, students will be able to discuss the origins, classifications, functions, natures, and evolution of the vampire and what that can tell us about historical periods and our own contemporary cultures.

No prerequisites.

RMAN GU4002 Romanian Culture, Identity and Complexes. 3 points.

This course addresses the main problems that contribute to the making of Romanian identity, as fragmented or as controversial as it may seem to those who study it. The aim is to become familiar with the deepest patterns of Romanian identity, as we encounter it today, either in history, political studies, fieldwork in sociology or, simply, when we interact with Romanians. By using readings and presentations produced by Romanian specialists, we aim to be able to see the culture with an “insider’s eye”, as much as we can. This perspective will enable us to develop mechanisms of understanding the Romanian culture and mentality independently, at a more profound level and to reason upon them.

Cross-Listed Courses
AFRS GU4000 Harlem and Moscow. 3 points.
Prerequisites: NA
The Russian Revolution of 1917 is widely acknowledged as a watershed moment in the global struggle for worker's rights, but it also played a considerable role in the fights against racism and colonialism (Lenin considered both tools of capitalist exploitation). In Soviet Russia's project to make racial equality a central feature of communism, two urban locales featured prominently: its capital city of Moscow and the burgeoning Black cultural center that was Harlem, New York. This course will explore cross-cultural encounters between Moscow and Harlem as a way to ask larger questions about race, class, and solidarity across difference. Students can expect to read novels, memoirs, and cultural reportage from Harlem Renaissance figures (Langston Hughes, Claude McKay, Dorothy West) who traveled to Moscow. Students will also learn about the role of race in early Soviet culture, particularly visual culture (films, children's media, propaganda posters, etc.). This course includes a field trip to the Schomburg Center for Research in Black Culture in Harlem.

Sociology
332 Milbank Hall
212-854-3577
Department Assistant: Marsha Peruo

Mission
Sociology explores the intricacies of social life in all its variety, from the prosaic routines of everyday life to dramatic transformations of state and economy, from the symbolic realm of identity and culture to the structures of class, race and gender that generate
inequality. Despite all this diversity, the discipline of sociology has a powerful coherence that comes from a collective dedication to developing theoretical principles about social life and testing them with empirical evidence. This commitment to systematic empirical research represents the strength of the discipline and the chance for a distinctive undergraduate experience for Sociology majors at Barnard. It exposes them to a range of approaches that include quantitative data collection and analysis, participant observation, intensive interviewing, historical-archival research, and discourse analysis.

All students taking courses in Sociology at Barnard can expect to learn about the relevance of empirical rigor and theoretical analysis for public policy, political and social debate, and civic engagement more broadly defined.

Sociology majors will develop critical analytic and research skills that they can take with them into a wide range of careers, whether they continue on to graduate study in sociology or choose to enter such fields as business, education, law, nonprofit enterprise or public policy.

The Department provides students with expertise in three areas:

1. a common foundation in the discipline’s core theories and methodologies through the following three required courses:
   - SOCI UN1000 The Social World
   - SOCI UN3000 Social Theory
   - SOCI UN3010 Methods for Social Research
2. exposure to a range of substantive questions that motivate sociological research through a 3-tiered elective structure:
   - 2000-level courses introduce non-majors and majors to substantive concerns through sociological texts and perspectives;
   - 3000-level courses are normally lecture courses that introduce upper level students (majors and non-majors) to dominant theoretical models and debates in more specialized subfields;
   - 3900-level courses are seminars that provide more intensive engagement with primary research in specialized subfields of the discipline and involve some significant primary or secondary research paper
3. direct research experience both within the classroom and under faculty supervision in the Senior Thesis Seminar or designated senior research seminars.

Student Learning Outcomes

Students who graduate with a major in sociology will be able to:

• Discuss the core theories of the discipline and apply them to contemporary issues.
• Identify the central questions that motivate sociological research in at least one specialized subfield.
• Describe and evaluate the strengths and limits of social science research.
• Apply the methods of social science research to a question of substantive or theoretical importance.
• Design, execute, and present original research projects.

Students who graduate with a minor in sociology will be able to:

• Discuss the core theories of the discipline and apply them to contemporary issues.
• Identify the central questions that motivate sociological research in at least one specialized subfield.
• Describe and evaluate the strengths and limits of social science research.

Chair: Mignon Moore (Associate Professor)

Professors: Elizabeth Bernstein, Debra Minkoff (Miriam Scharfman Zadek Family Professor), Mignon Moore, Jonathan Rieder

Assistant Professor: Debbie Becher, Angela Simms, Amy Zhou

Requirements for the Major

There are no special admissions requirements or procedures for students interested in majoring in sociology. Students are assigned a major adviser on declaring the major; prior to that, students are encouraged to consult with any member of the department regarding their choice and sequence of courses.

A minimum of 10 courses is required for the major, including:

The Sociology major is comprised of 10 courses. These include:

Foundations (3 courses):

- SOCI UN1000 The Social World (recommended no later than the sophomore year)
- SOCI UN3000 Social Theory
- SOCI UN3010 Methods for Social Research (no later than the junior year)

Electives (5 courses):

Of the five electives required for the major, no more than one can be at the 2000 level and at least one must be a seminar at the 3900 (or 4000) level.

With the exception of the senior thesis or designated research seminar (see below) the Foundations and Elective courses may be taken at either Barnard or Columbia

Senior Requirement (2 courses):

There are two ways to satisfy the senior requirement.

Research Paper Option: two upper level seminars, including enrollment in (1) a designated research seminar (http://sociology.barnard.edu/requirements/#Designated%20Research%20Seminars) (3900 level) in the Barnard Sociology Department that requires a 25- to 30-page paper, including some primary research; and (2) any additional upper level seminar (3900 or 4000 level).

Thesis Option: two-semester senior thesis, involving original sociological research and analysis on a topic of the student’s choice, in consultation with an advisor; requires enrollment in SOCI BC3087-3088.
Additional Information about the senior requirement

Research Paper Option: This option is intended for majors who are interested graduating with a broader exposure to the discipline of sociology, with more limited experience in conducting original research. Each semester the department offers 2-3 designated research seminars, which are listed on the department’s website prior to the Spring program planning period. These seminars vary in content and format and are open to all students, with priority given to senior sociology majors taking the course to meet their senior requirement.

Prerequisites for students taking the designated research seminar to meet the senior requirement include successful completion of: (1) SOCI UN1000 The Social World; (2) SOCI UN3000 Social Theory or SOCI UN3010 Methods for Social Research; and (3) at least one elective course related to the focus of the seminar. Instructors may waive some aspect of the prerequisites.

Students may also enroll in these seminars prior to their senior year for elective credit.

Thesis Option: The two-semester senior thesis involves original sociological research and analysis on a topic of the student’s choice, in consultation with an advisor. This option is intended for majors who want the opportunity to explore a sociological subfield in depth and conduct independent primary research as their senior capstone experience. Students interested in writing a senior thesis must submit a 2-3 paragraph proposal, along with a brief letter of endorsement from a faculty member in the department who has agreed to serve as their thesis advisor to the Department Chair, no later than the advanced program planning deadline for the student’s first semester of their senior year. Decisions will be made in consultation with the student’s program and thesis advisors prior to the final program planning deadline for that semester. In exceptional cases, students may apply for and receive permission to enroll in the two-semester option before the deadline for final program approval in the first semester of their senior year.

Prerequisites: (1) SOCI UN1000 The Social World; (2) SOCI UN3010 Methods for Social Research; and (3) at least one elective course related to the proposed thesis topic must be completed before the first semester of the senior year to be eligible for the two-semester thesis.

Students approved for the senior thesis will enroll in SOCI BC3087 Individual Projects for Seniors and SOCI BC3088 Individual Projects for Seniors with their selected adviser.

Special note: If a student taking a designated one-semester senior seminar in the first semester of their senior year would like to extend that work into a senior thesis in their final semester, they may petition for special permission to enroll in SOCI BC3088 Individual Projects for Seniors to do so, with approval of their program advisor and a faculty member willing to advise them. Petitions must be received one week prior to the advance program filing deadline of their final semester and will only be granted in rare circumstances.

All seniors must submit a final, bound copy of the research paper or senior thesis to the Department no later than the last day of classes of the second semester of their senior year in order to receive credit (Pass or Pass with Distinction) for the senior requirement.

Use this link (http://sociology.barnard.edu/sites/default/files/requirements_worksheet__class_of_2015_later_1.pdf) to identify the major requirements that you have completed.

Requirements for the Minor

5 courses are required for the minor in Sociology, including SOCI UN1000 The Social World, SOCI UN3000 Social Theory and three elective courses (no more than one at the 2000-level), to be selected in consultation with the Sociology Department Chair.

SOCI UN1000 The Social World. 3 points.
Identification of the distinctive elements of sociological perspectives on society. Readings confront classical and contemporary approaches with key social issues that include power and authority, culture and communication, poverty and discrimination, social change, and popular uses of sociological concepts.

SOCI UN1203 The Social Animal in the Digital Age. 3 points.
This course re-examines central theories and perspectives in the social sciences from the standpoint of digital technologies. Who are we in the digital age? Is the guiding question for the course. We consider the impact of modern technology on society including, forms of interaction and communication, possibilities for problem solving, and re-configurations of social relationships and forms of authority. The course integrates traditional social science readings with contemporary perspectives emerging from scholars who looking at modern social life.

The course is an introductory Sociology offering.

SOCI UN2208 Culture in America. 3 points.
Not offered during 2019-20 academic year.

Corequisites: General Education Requirement: Social Analysis (SOC).
The values and meanings that form American pluralism. The three sections explore taste, consumption, and art; moral conflict, religion and secularism; identity, community and ideology. Examples range widely: Individualism, liberalism and conservatism; Obama’s “transracial” endeavor; the food revolution; struggles over family and sexuality, multiculturalism; assimilation and immigration.

SOCI UN2240 Economy and Society. 3 points.
An introduction to economic sociology. Economic sociology is built around the claim that something fundamental is lost when markets
are analyzed separately from other social processes. We will look especially at how an analysis of the interplay of economy and society can help us to understand questions of efficiency, questions of fairness, and questions of democracy.

SOCI UN3000 Social Theory. 3 points.

Prerequisites: Sophomore standing. Required for all sociology majors. Prerequisite: at least one sociology course of the instructor’s permission. Theoretical accounts of the rise and transformations of modern society in the 19th and 20th centuries. Theories studied include those of Adam Smith, Tocqueville, Marx, Durkheim, Max Weber, Roberto Michels. Selected topics: individual, society, and polity; economy, class, and status: organization and ideology; religion and society; moral and instrumental action.

SOCI BC3214 Sociology of African American Life. 3 points.
Emphasizes foundations and development of black communities post-1940, and mechanisms in society that create and maintain racial inequality. Explores notions of identity and culture through lenses of gender, class and sexual orientation, and ideologies that form the foundation of black politics. Primarily lecture with some discussion.

SOCI UN3217 Law and Society. 3 points.
Examines how people use law, how law affects people, and how law develops, using social scientific research. Covers law in everyday life; legal and social change; legal subjects such as citizens and corporations, and the legitimacy of law. Recommended for pre-law and social-science majors. No required prerequisites or previous knowledge.

SOCI BC3219 Race, Ethnicity, and Society. 3 points.
This course examines the social construction of “race” and ethnicity and how their effects have aligned with intersecting social logics to produce injustice. Emphasis is on understanding U.S. logics of race and ethnicity in comparative perspective and in placing contemporary racial and ethnic politics in historical perspective.

SOCI UN3225 Sociology of Education. 3 points.
All of us have spent many years in school and understand that schools impact our lives in important ways. But how exactly does formal schooling shape young people? And how do students make sense of their lives in the context of schools and educational systems more broadly? In this class we will examine education as a central institution in modern society, and we will grapple with an important question: What role does education play in reinforcing or challenging broader patterns of social inequality and mobility? Particular emphasis will be placed on higher education as a critical site in which these processes take shape.
SOCi 3302 Sociology of Gender. 3 points.
Prerequisites: One introductory course in Sociology suggested.
Examination of factors in gender identity that are both universal (across time, culture, setting) and specific to a social context. Social construction of gender roles in different settings, including family, work, and institutions; social movements around health; and how some sociologists have studied the field of medicine and related economics, cultures, and politics shape energy production.

SOCi 3701 Sociology of Energy. 4 points.
This course explores many of the social forces that determine how energy is produced and what the consequences are. The course will focus in particular on how geographic communities, social identities, and related economics, cultures, and politics shape energy production.

SOCi 3750 How Race Gets Under Our Skin: The Sociology of Race, Health, and Biomedicine. 4 points.
One of the glaring forms of inequalities that persists today is the race-based gap in access to health care, quality of care, and health outcomes. This course examines how institutionalized racism and the structure of health care contributes to the neglect and sometimes abuse of racial and ethnic minorities. Quite literally, how does race affect one’s life chances? This course covers a wide range of topics related to race and health, including: racial inequalities in health outcomes, biases in medical institutions, immigration status and health, racial profiling in medicine, and race in the genomic era.

SOCi 3900 Societal Adaptations to Terrorism. 4 points.
Prerequisites: Junior or Senior standing
Examines how countries have adjusted to the threat of terrorism. How the adaptation reflects the pattern of terrorist attacks, as well as structural and cultural features of the society. Adaptations by individuals, families, and organizational actors.

SOCi 3901 The Sociology of Culture. 4 points.
Prerequisites: SOCI BC1003 or equivalent social science course and permission of the instructor. Enrollment limited to 15 students. Drawing examples from popular music, religion, politics, race, and gender, explores the interpretation, production, and reception of cultural texts and meanings. Topics include aesthetic distinction and taste communities, ideology, power, and resistance; the structure and functions of subcultures; popular culture and high culture; and ethnography and interpretation.

SOCi 3235 Social Movements. 3 points.
Prerequisites: One introductory course in Sociology suggested.
Social movements and the theories social scientists use to explain them, with emphasis on the American civil rights and women’s movements. Topics include theories of participation, the personal and social consequences of social movements, the rationality of protest, the influence of ideology, organization, and the state on movement success, social movements, and the mass media.

SOCi 3246 Medical Sociology. 3 points.
Prerequisites: None
Examines the ways sociologists have studied the field of medicine and experiences of health and illness. We cannot understand topics of health and illness by only looking at biological phenomena; we must consider a variety of social, political, economic, and cultural forces. Uses sociological perspectives and methods to understand topics such as: unequal patterns in health and illness; how people make sense of and manage illness; the ways doctors and patients interact with each other; changes in the medical profession, health policies and institutions; social movements around health; and how some behaviors but not others become understood as medical problems. Course is geared towards pre-med students as well as those with general interests in medicine, health and society.

SOCi 3285 Israeli Society and the Israeli-Palestinian Conflict. 3 points.
The purpose of the course is to acquaint students with Israeli society through the lens of the Israeli-Palestinian conflict. The underlying assumption in this course is that much of the social, economic, political, and cultural processes in contemporary Israel have been shaped by the 100-year Israeli-Arab/Palestinian conflict.
SOCi 3324 Global Urbanism. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
SOCi 3325 Social Movements. 3 points.
Prerequisites: One introductory course in Sociology suggested.
Examination of factors in gender identity that are both universal (across time, culture, setting) and specific to a social context. Social construction of gender roles in different settings, including family, work, and politics. Attention to the role of social policies in reinforcing norms or facilitating change.
SOCI BC3907 Communities and Social Change. 4 points.
Examines how changes in the economy, racial composition, and class relations affect community life—how it is created, changed, and sometimes lost—with a specific focus on the local urban context. Student research projects will address how contemporary forces such as neoliberalization, gentrification and tourism impact a community's social fabric.

SOCI BC3916 From Rhythm and Blues to Soul and Rock: The Sociology of Crossover Culture. 4 points.
The rise of crossover culture: racially segregated markets and genres; organizational environments and the rise of independent labels; the creative process and black-white conflict and connection; the emergence of rock as a "white" genre; civil rights, Black Power, and the politics of soul; cultural borrowing and the postracial ethos.

SOCI BC3919 Transitions to Adulthood. 3 points.
Prerequisites: SOCI W 1000 and SOCI W 3010 or permission of instructor. Meets senior requirement. Adolescence and early adulthood is a critical period in our lives. This research-intensive seminar explores how adolescent transitions are studied, how they compare across different national contexts, and how individual, family, and community factors affect the type and timing of different transitions.

SOCI BC3920 Advanced Topics in Gender and Sexuality. 4 points.
This research and writing-intensive seminar is designed for senior majors with a background and interest in the sociology of gender and sexuality. The goal of the seminar is to facilitate completion of the senior requirement (a 25-30 page paper) based on "hands on" research with original qualitative data. Since the seminar will be restricted to students with prior academic training in the subfield, students will be able to receive intensive research training and guidance through every step of the research process, from choosing a research question to conducting original ethnographic and interview-based research, to analyzing and interpreting one's findings. The final goal of the course will be the production of an original paper of standard journal-article length. Students who choose to pursue their projects over the course of a second semester will have the option of revisiting their articles further for submission and publications.

SOCI BC3925 Advanced Topics in Law & Society. 4 points.
Law creates order. And yet, outlaws or lawbreakers are everywhere. Students will learn to ask and answer questions about living law, understanding that it involves law-followers and law-breakers. Students will read and discuss sociological investigations of the law and perform their own research into a significant question about law-in-action.

SOCI BC3927 Advanced Topics in Immigration and Inequality. 4 points.
Examines processes of immigrant incorporation in the U.S. and other advanced democracies, with a focus on how immigration intersects with categorical inequalities (such as citizenship, social class, race, ethnicity, gender, and religion) in major institutional realms. Under instructor's supervision, students conduct a substantial research project related to course themes.

SOCI BC3928 Advanced Topics: Politics & Society. 4 points.
Research and writing intensive seminar on civic and political engagement in contemporary American society, along with critical evaluation of methods used to collect and analyze data on political and social life. Requirements include a final research paper based on independent data collection and analysis. Seminar limited to sociology majors with senior standing (except in exceptional circumstances). Fulfills the Research Paper Option for the senior requirement in sociology at Barnard.

SOCI BC3930 Advanced Topics: Race and Ethnicity. 4 points.
Discusses theories of race and ethnicity, distinctions between prejudice, discrimination, and racism, and the intersectionality paradigm. Under instructor's guidance students design a research proposal, conduct their own fieldwork and write a research paper on a sociological question relating to race and/or ethnicity.

SOCI BC3931 Seminar for Internships in Social Justice and Human Rights. 3 points.
Corequisites: Students must have an internship related to social justice or human rights during This class is intended to complement and enhance the internship experience for students working in internships that relate to social justice and human rights during the Spring 2016 semester. This course will meet bi-weekly to provide an academic framing of the issues that students are working on and to provide an opportunity for students to analyze their internship experience.

SOCI BC3932 Climate Change, Global Migration, and Human Rights in the Anthropocene. 3 points.
While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third, the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific. Human Rights elective.

SOCI BC3933 Sociology of the Body. 4 points.
This seminar examines the ways in which the body is discursively constituted, and itself serves as the substratum for social life. Key questions include: How are distinctions made between "normal" and
“pathological” bodies, and between the “psychic” and “somatic” realms? How do historical forces shape bodily experience? How do bodies that are racialized, gendered, and classed offer resistance to social categorization?

**SOCI BC3934 Global Activism. 4 points.**
This seminar explores social movements and political protest on the global stage. We will bring together the literatures on social movements and the sociology of globalization and transnationalism to explore the emergence, development, dynamics and consequences of global activism.

**SOCI BC3935 Gender and Organizations. 4 points.**
This course examines the sociological features of organizations through a gender lens. We will analyze how gender, race, class, and sexuality matter for individuals and groups within a variety of organizational contexts. The course is grounded in the sociological literatures on gender and organizations.

**SOCI UN3944 Work, Life, Time and Space: From the Factory to the Gig Economy. 4 points.**
This 4-credit class will explore experiences and perspectives of work, life, and the often blurred boundary between them. We will focus on how work is situated in, and shaped through, space and time. We will begin with a set of theoretical and historical texts, and then turn to case studies of work and life. The goal is to understand and make sense of how work, and its relationship to home, has evolved historically and how it is experienced today. The theories of space, time, and work which we begin with provide frameworks for making sense of the varied cases we will explore. The course as a whole will offer a lens for analyzing the world of work, along with the relationship between work and the rest of our lives. It may serve a springboard for you to tackle such questions as: What is the relationship between meaning and money, work time and leisure time? (Or, will I work to live or live to work?) How do historical and relatively fixed work temporalities and geographies compare to new structures of work? (Or, what is my Uber driver’s life like, and why is it so different from my grandfather’s experience as a mail carrier?) What do changing structures of work mean for our future, in and beyond work? (Or, will robots take all of our jobs? And if so, what should we do about it?)

**SOCI UN3974 Sociology of Schools, Teaching and Learning. 4 points.**
In this class we will examine the school as a central institution in modern society, and we will grapple with an important question in the sociology of education: what role to schools play in reinforcing or challenging broader patterns of social inequality? We will pay special attention to the ways in which students’ class, race/ethnicity and gender shape their educational experiences. We will also look at how schools are organized, how schools construct differences among students, and how schools sort kids into different (and unequal) groups. Finally we will explore the types of interventions - at both the individual and organizational levels - that can mitigate inequality in educational achievement and help low-income students to succeed.

One such intervention that has shown promise is tutoring in academic and social and behavioral skills, and interventions that strengthen self-affirmation. A major component of this class is your experience as a tutor. You will be trained as tutors to work with students from local high schools both through in-person tutoring and through tutoring using social networking technologies. Throughout the semester we will combine our academic learning with critical reflection on our experience sin the field. Because you will be working with NYC high school students, we will pay special attention to how NYC high schools are organized and how current issues in education play out in the context of NYC schools.

**SOCI GU4028 GENDER AND INEQUALITY IN FAMI. 4 points.**
In-depth, critical exploration of changing expectations and patterns of socialization for women and men in contemporary U.S. families. Draws from family studies, gender studies, and LGBT studies to understand how gendered forces work to structure relations between and among family members. Readings highlight socioeconomic, racial and ethnic variations in patterns of behavior, at times critiquing assumptions and paradigms drawn from the experiences of traditional, middle-class nuclear families. Topics include division of household labor in same-sex and different-sex couples, adolescent experiences growing up disadvantaged, what happens to undocumented immigrant children when they reach adulthood, gender inequality in wealthy white families, and ethnic differences in men’s expected roles in families.

**SOCI GU4043 WORKSHOP ON WEALTH & INEQUALITY. 1 point.**
This Workshop is linked to the Workshop on Wealth & Inequality Meetings. This is meant for graduate students, however, if you are an advanced undergraduate student you can email the professor for permission to enroll.

**SOCI GU4411 Politics and Society in Central Eastern Europe. 3 points.**
The goal of the course is to discuss different approaches to the study of developmental pathways in Central and Eastern Europe (CEE) in a broad historical perspective drawing on various approaches from political science, sociology and economic history. Students participating in the seminars will get an overview on the various approaches to explaining divergence in political, social and economic developments between the Eastern and Western parts of Europe, and within the region. The course aims to establish a dialogue between three types of scholarships: one dealing with the pre-regime change developmental pathways in the region, another dealing with factors that could account for persistent post-communist and post-enlargement developmental divergence and a third one that deals with
issues of backwardness and core-periphery relations in transnational and global perspective.

The course starts with a discussion of broad historical perspectives on East-West divergence in Europe. The second bloc deals with the various great transformations in the region: the remaking of states, polities and economies. The third bloc is devoted to the discussion of the transnationalization of states and economies in the region. Finally, the forth bloc deals with hybrid regimes and problems of democratic backsliding in the region.

**URBS UN3315 Metropolitics of Race and Place.**
Prerequisites: Students must attend first class.

Readings and discussion focus on the history of metropolitan area expansion and economic development, as well as contemporary social processes shaping racial and ethnic groups’ access to high-quality public goods and private amenities. We address racial and ethnic groups’ evolving political agendas in today’s increasingly market-driven socio-political context, noting the roles of residents; federal, state, and local governments; market institutions and actors; urban planners, activist organizations, foundations, and social scientists, among others. Here is a sample of specific topics: race/ethnicity and who “belongs” in what “place,” inequitable government and market investment across racial and ethnic communities over time and “sedimentation effects” (for example, the “redlining” of Black communities leading to their inability to access loan and credit markets and the resulting wealth gap between Blacks and Whites); gentrification processes; creating sufficient, sustainable tax bases; and suburban sprawl. Assignments will include two short response papers, mid-term and final exams, and another project to be determined.

**URBS UN3308 Introduction to Urban Ethnographies.**
Prerequisites: Students must attend first class.

Examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey research, quantitative studies, and participant observation will provide perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment.

**URBS UN3546 Junior Colloquium: Contemporary Urban Issues.**
Prerequisites: Non-majors admitted by permission of instructor. Students must attend first class. Enrollment limited to 16 students per section.

Evaluation of current political, economic, social, cultural and physical forces that are shaping urban areas.

**URBS UN3315 Metropolitics of Race and Place.**
Prerequisites: Students must attend first class.

This class explores how racism and racialized capitalism and politics shape the distribution of material resources among cities and suburbs in metropolitan areas and the racial and ethnic groups residing in them.

**Cross-Listed Courses**

**Urban Studies**

**URBS UN3308 Introduction to Urban Ethnographies.**
Not offered during 2019-20 academic year.

Prerequisites: Students must attend first class.

This course explores how scholars from different social science disciplines have used ethnography to understand how immigrants and rural migrants experience as well as affect cities. Community, work, and health, in cities within and outside the US, are used as lenses. Students will also perform their own ethnographic research.

**URBS UN3315 Metropolitics of Race and Place.**

Spanish & Latin American Cultures

The Department of Spanish and Latin American Cultures

The Department of Spanish and Latin American Cultures at Barnard College boasts a long tradition of excellence in undergraduate education for women. Throughout its history, it has afforded students a solid preparation in both Spanish language and the literatures and cultures of Spain, Spanish America, and the Spanish-speaking United States.

Mission

The keystone of our integrated curriculum is linguistic and intellectual continuity from the elementary language level to the most advanced literature and culture courses. Our language courses are skill- and proficiency-oriented and provide the foundation students need for advanced study, either at Barnard or in college-level study abroad. Our upper-level courses stress the necessary historical and theoretical tools needed to understand the cultural and aesthetic production of the Hispanic world. Through our strong collaboration with interdisciplinary programs and departments at Barnard, including Comparative Literature, Africana Studies, Women’s, Gender and Sexuality Studies, and the Forum on Migration, as well as our teamwork with the Columbia Department of Latin American and Iberian Cultures, we are ideally poised to train students for a wide range of post-graduation experiences in MA/PhD programs or in the professional sphere.

Student Learning Outcomes

Through the Major in Spanish and Latin American Cultures, students who rigorously apply themselves to their studies will be able to:

- Use the Spanish language at the B2-C2 proficiency levels (Independent User/Proficient User), as defined by the Common European Framework of Reference (depending on initial background and ability).*
- Identify and describe the cultures of Spain and Spanish America throughout their history, from Islamic Spain and the colonial period through the present.
- Demonstrate specialized knowledge of selected literary and cultural works, authors and cultural producers of the Hispanic world, understood in their aesthetic, historical, and social contexts.
- Use basic principles of literary and cultural theory to analyze and interpret a variety of texts and other cultural products.
- Express their ideas, analyses, and interpretation through clear oral exposition and effective critical writing.
- Conduct research in the fields of Spanish and Spanish American literature and culture, and demonstrate the results of their research and thinking in original academic essays.

Major and Minor in Spanish and Latin American Cultures

Majors and minors in this department will provide students with a solid literacy in the cultures of the Hispanic world. Literacy at the level of language instruction entails the students’ ability to express themselves fluently in Spanish, both orally and in writing. Literacy at the cultural level entails an intellectual grasp of Spanish and Spanish American cultural and artistic products and the knowledge of the historical and methodological contexts in which to situate them. Students must consult with the major adviser to carefully plan their program upon major declaration. With adviser approval, courses taken abroad or at another institution can apply toward the major/minor. The Department of Spanish and Latin American Cultures addresses the Barnard senior research requirement through the writing of a substantial paper in a topic-based senior seminar; there is the possibility of further research development for some students. The Spanish and Latin American Cultures majors have been designed in conjunction with the Columbia Department of Spanish and Portuguese. Hence, Barnard students may, always in consultation with the major adviser, move freely between the departments of both institutions in search of the courses that best fit their interests and schedules.

* The Common European Framework of Reference (http://www.coe.int/T/DGA/Portfolio/?M=/main_pages/levels.html) defines these levels as follows:

Proficient User

C2 Can understand with ease virtually everything heard or read. Can summarise information from different spoken and written sources, reconstructing arguments and accounts in a coherent presentation. Can express him/herself spontaneously, very fluently and precisely, differentiating finer shades of meaning even in more complex situations.

C1 Can understand a wide range of demanding, longer texts, and recognise implicit meaning. Can express him/herself fluently and spontaneously without much obvious searching for expressions. Can use language flexibly and effectively for social, academic and professional purposes. Can produce clear, well-structured, detailed text on complex subjects, showing controlled use of organisational patterns, connectors and cohesive devices.

Independent User

B2 Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialisation. Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

Major in Spanish and Latin American Cultures

The Barnard major in Spanish and Latin American Cultures consists of eleven courses (minimum 33 credits). The required introductory courses are SPAN UN3300 (Advanced Language through Content), UN3349 (Hispanic Cultures I), and 3350 (Hispanic Cultures II). Beyond the introductory courses, the major requires seven upper-level elective courses—3000- or 4000-level offerings—and a Senior Seminar intended to be taken in the Fall of the senior year (in cases of unavoidable conflict, and by approval of the Major Adviser, students may enroll in the Spring section offered at Columbia).

NOTE: With adviser approval, courses in both the Department of Spanish and Latin American Cultures and the Columbia Department of Latin American and Iberian Cultures numbered 3000 and above will count toward the majors or minors.

Eleven courses (minimum 33 points):

UN3300 must be taken after completion of the language requirement and before UN3349 and UN3350, which can be taken simultaneously or in inverse order. Except by approval of the Major Adviser, all three introductory courses are prerequisites for upper-level courses. In choosing their sections, Barnard students should keep in mind that some Columbia classes at these levels are taught by PhD candidates. Other sections at both Barnard and Columbia are taught by full-time Lecturers/Associates and tenured or tenure-track faculty.

Electives

A minimum of four electives must be chosen from the Departments’ 3000- or 4000-level* offerings. Up to three electives may be taken outside the Departments, provided they address Hispanic topics. Courses at or beyond the intermediate level in Portuguese and Catalan may count as outside electives. Coursework completed in other departments requires the approval of the major advisor; students should therefore not wait until their senior year to find out whether courses they have taken will apply to the major. All students should seek chronological and geographic breadth in their coursework, enrolling in diverse classes on both Latin American and Iberian topics, something that is essential for those planning future graduate work in Hispanic Studies. Such students should consult especially closely with their adviser to plan their program.

* 4000-level courses, offered only at Columbia, are joint graduate-undergraduate courses.

Senior Research Project

The senior seminar may be taken either at Barnard (BC or UN3990) or at Columbia (UN3991, 3992, or 3993). It is an advanced, research-oriented course on a broad topic, in the context of which Barnard students are required to write a paper in Spanish of at least 20 pages. Since this paper counts as the Barnard Senior Research Project, students who take the seminar at Columbia must be sure they fulfill the 20-page requirement, regardless of what their particular professor requires of other students. These students must hand in the final version of their paper to the Barnard Major Advisor in addition to their Columbia professor.

Study Abroad

Up to four courses from Study Abroad may apply toward the major, some of which may count toward the introductory courses, provided they are at the same level and substantially address the same topics/skills. However, no more than five courses in total may be taken outside the Barnard/Columbia Spanish departments. Approval of specific courses is at the discretion of the Major Adviser (in consultation with the Study Abroad Adviser/Language Program Director for those at the 3300 level), taking into consideration the balance in the student’s full program of study. Students should consult periodically with the Major Adviser to make sure they are making adequate progress toward the completion of all requirements.

Minor in Spanish and Latin American Cultures

The Barnard minor in Spanish and Latin American Cultures consists of six courses (minimum 18 credits). The required introductory courses are SPAN UN3300 (Advanced Language through Content); and UN3349 (Hispanic Cultures I) and 3350 (Hispanic Cultures II). Beyond the introductory courses, the minor requires three upper-level electives (UN3349 and UN3350 do not count as such). These must be chosen from the Barnard Department of Spanish and Latin American Cultures’ or Columbia Department of Latin American and Iberian Cultures’ 3000- or 4000-level offerings.

Select three other courses at the 3000-level or above to be chosen in consultation with the major advisor

UN3300 must be taken after completion of the language requirement and before UN3349 or UN3350. Except by approval of the Minor Adviser, all three introductory courses are prerequisites for upper-level courses. In choosing their sections, Barnard students should keep in mind that some Columbia classes at these levels are taught by PhD candidates. Other sections at both Barnard and Columbia are taught by full-time Lecturers/Associates and tenured or tenure-track faculty.

A maximum of three courses taken outside the Departments (from study abroad, other departments at Barnard/Columbia, or other institutions) may apply toward the minor. Such courses will be approved by the Minor Adviser and the Study Abroad Adviser/Language Program Director (the latter of whom officially signs the approval), on
the basis of their level, quality, and perceived relevance to the minor program of study. Courses in English do not count toward the minor.

Although Barnard allows students to sign up for minors through the end of their senior year, the Department encourages students to sign up as early in their career as possible, and to consult regularly with the Minor Adviser to ensure they are making adequate progress toward the completion of all requirements.

**Major in Spanish and Latin American Cultures with Specialization**

For students wishing to pursue a more rigorously interdisciplinary program in the Social Sciences or the Humanities, the Department offers a major that integrates courses in Spanish and Latin American Cultures/Spanish and Portuguese with courses in another department or program chosen carefully by the student.

Fourteen courses (minimum 42 points):

Coursework will include a minimum of three 3000- or 4000-level courses within the Departments but beyond the four required foundation courses, and six courses in another field of specialization, three of which should be closely related to Hispanic Studies. Students who wish to complete this rigorous interdisciplinary major will choose a specialization. Possible fields and programs include Anthropology, Africana Studies, Art History, Economics, Film, Gender Studies, History, Latino Studies, Latin American Studies, Music, Political Science, Sociology, and Urban Studies. Students should work closely with their major advisor to plan their program of study; it will be their responsibility to seek advising regarding coursework in their external specialization from appropriate sources (for example, from other departments’ Chairs). Electives outside the two departments (Spanish and Latin American Cultures/Latin American and Iberian Cultures) should include basic methodological or foundation courses in the chosen field or program. In special cases and with advisor approval, students may complete some coursework in another, closely related field. In exceptional cases and again with advisor approval, students may take a Senior Seminar in their field of specialization as a seventh course outside of the Departments if they have completed enough basic courses in that field to manage the demands of an advanced seminar. In such cases, the major advisor must receive written communication from the seminar instructor indicating approval of a student’s membership in the course; the seminar project must be on a Hispanic topic; and a copy of the project must be turned in to the major advisor for the student’s file upon completion of the course. Students who complete the seminar in another department may also count it as the third elective course on a Hispanic topic outside of the two departments, in which case they may take a fourth 3000- or 4000-level course in Spanish and Latin American Cultures/Latin American and Iberian Cultures.

**Senior Research Project**

In the fall of their senior year, students must enroll in a senior seminar in which they will undertake the research and writing of a substantial paper in the field. Some students may wish, with departmental approval, to further develop their research in the spring through an independent study project with a willing faculty member. For that project, they may expand their work in the senior seminar or undertake a new assignment in consultation with the faculty member. SPAN BC3999 Independent Study may be counted as one of the courses that fulfills the major.

The senior seminar may be taken either at Barnard (BC or UN3990) or at Columbia (UN3991, 3992, or 3993). It is an advanced, research-oriented course on a broad topic, in the context of which Barnard students are required to write a paper in Spanish of at least 20 pages. Since this paper counts as the Barnard Senior Research Project, students who take the seminar at Columbia must be sure they fulfill the 20-page requirement, regardless of what their particular professor requires of other students. These students must hand in the final version of their paper to the Barnard Major Advisor in addition to their Columbia professor.

**SPAN UN101 Elementary Spanish I. 4 points.**

Prerequisites: a score of 0-279 in the department's Placement Examination.

An introduction to Spanish communicative competence, with stress on basic oral interaction, reading, writing, and cultural knowledge. Principal objectives are to understand and produce commonly used sentences to satisfy immediate needs; ask and answer questions about personal details such as where we live, people we know and things we have; interact in a simple manner with people who speak clearly, slowly and are ready to cooperate; and understand simple and short written and audiovisual texts in Spanish. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN 1120 Comprehensive Beginning Spanish. 4 points.
Prerequisites: This course is an intensive and fast-paced coverage of both SPAN UN1101 and SPAN UN1102. Students MUST meet the following REQUIREMENTS: 1. A minimum of 3 years of high school Spanish (or the equivalent) AND a score of 330 or above in the Department's Placement Examination, OR 2. fluency in a language
other than English (preferably another Romance language). If you fulfill the above requirements, you do not need instructor’s permission to register. HOWEVER, the instructor will additionally assess student proficiency during the Change of Program Period. Students who do not have the necessary proficiency level may not remain in this course. Replaces the sequence SPAN UN1101-SPAN UN1102. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade.

SPAN UN3350 Hispanic Cultures II: Enlightenment to the Present. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
This course surveys cultural production of Spain and Spanish America from the eighteenth to the twenty-first centuries. Students will acquire the knowledge needed for the study of the cultural manifestations of the Hispanic world in the context of modernity. Among the issues and events studied will be the Enlightenment as ideology and practice, the Napoleonic invasion of Spain, the wars of Spanish American independence, the fin-de-siècle and the cultural avant-gardes, the wars and revolutions of the twentieth century (Spanish Civil War, the Mexican and Cuban revolutions), neoliberalism, globalization, and the Hispanic presence in the United States. The goal of the course is to study some key moments of this trajectory through the analysis of representative texts, documents, and works of art. Class discussions will seek to situate the works studied within the political and cultural currents and debates of the time. All primary materials, class discussion, and assignments are in Spanish. This course is required for the major and the concentration in Hispanic Studies.

SPAN UN3558 LATIN AMERICAN FILM. 3 points.
This course aims to give students an introductory overview of some of the most salient issues surrounding contemporary Latin American film since the late 1960s. Starting with a selection of films from the experimental "new cinema" or "third cinema" of the 1960s, we will also study the contemporary production of international blockbuster movies in the 2000s, in Argentina, Brazil, Cuba and Mexico. Topics to be covered include the relationship between cinema and underdevelopment; cinema and revolution; cinema and emancipation; documentary film and fiction; gender and sexuality; neoliberalism and the market; spectatorship and subjectivity.

SPAN BC3099 Independent Study. 3 points.
Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).
Enables students to pursue subjects not covered by courses currently taught. To arrange this course, a student must present a member of the faculty with a program of study and obtain an Independent Study form. This form (and the program of study) must be approved both by the sponsoring faculty member and the chair of the department. The form must then be submitted to the Committee on Programs and Academic Standing for final approval. No faculty member of any rank may direct more than one BC3099 in any given semester.

SPAN BC3435 Language and Revolution. 3 points.

BC: Fulfillment of General Education Requirement: Literature (LIT).

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

Kant’s Enlightenment motto, sapere aude, took on political significance for Spanish American revolutionaries who made their case in prose, pushing against the constraints of the essay. This course traces the genre’s evolution from the transatlantic debate over political independence to the exuberant declarations of intellectual independence that would follow.

SPAN BC3440 Marriage and Adultery in 19th-Century Spanish Fiction. 3 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

Consideration of the conflicting interests of 19th-century society as represented through the themes of marriage and adultery: the desire for social stability vs. the potentially subversive drive for freedom and self-affirmation. The roles of women, class, culture, and religion emphasized in works by Galdós, Clarín, Caballero, and others.

SPAN BC3441 Angels and Seagulls: the Cultural Construction of Womanhood in Nineteenth Century Spain. 3 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

Reading of 19th-Century Spanish journalistic, medical, and legal texts, conduct manuals, and novels by both men and women, to assess how they come together in configuring new ideas of female identity and its social domains, as aristocratic rule is gradually being replaced by a new bourgeois order.

SPAN BC3442 The Bourgeois Imagination in Nineteenth-Century Spain. 3 points.

BC: Fulfillment of General Education Requirement: Literature (LIT).

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

Through both literary and popular print culture, examination of the new class in 19th century Spain produced by economic industrialization and political liberalism and how it ensured its hegemony. SPAN BC3443 Catalan Culture, from Regionalism to Nationalism (1886-1936). 3 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

In the nineteenth century, the failure of the Spanish State to find political alternatives to centralism, coupled with Catalonia’s industrial and economic takeoff, led to the development of a strong regionalist sentiment, and eventually a nationalist movement. From this period and through the beginning of the Spanish Civil War, intellectuals became engaged in the creation of a cultural repertoire to ground and strengthen the claim to a Catalan nationality. In this course, we will examine both the burgeoning literature in dialogue with Spanish and European currents, and the establishment of other national traditions in the fields of art, language, music, urban planning/architecture, and sport.

SPAN BC3446 Venezuela: Robbery and Nature. 3 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

This course will read Venezuela backwards in films, poems, novels and essays, from the present-tense struggle over the legacy of chavismo to the early days of independence. The constant thread will be the conflict between development and nature with special attention to natural resources and eco-critical approaches.

SPAN BC3990 Senior Seminar: Crime and Culture in Modern Spain. 3 points.
Prerequisites: SPAN UN3300 SPAN UN3349 SPAN UN3350

Prerequisites: Course intended to be taken by all Spanish majors during the fall of their senior year. Third-year bridge course (UN3300), and introductory surveys (UN3349, UN3350).

Throughout the nineteenth and the early twentieth centuries, after the loss of most of its empire, Spain is engaged in reconceptualizing itself as a constitutional monarchy with updated political, economic, and social institutions. A cornerstone of this transformation is the development of a legal/juridical system dependent on newfangled theoretical frameworks through which they have been understood. Our course will examine this chronological process in the peninsula, as well as its different functioning in the remaining colonial world (Cuba, Puerto Rico, and the Philippines).

SPAN UN3991 Senior Seminar. 4 points.
Prerequisites: Seniors (major or concentrator status).
The course is a requirement for all the LAIC majors. In this seminar, students develop an individual research project and write an essay under the guidance of the course's instructor and in dialogue with the other participants' projects. After an introductory theoretical and methodological section, and a research session at the library, the syllabus is entirely constructed on the students' projects. Every participant is in charge of a weekly session. Essay outlines and drafts are discussed with the group throughout the semester. The final session is a public symposium with external respondents.

Department Administrator:
Dood Kalicharan, 1003 School of Social Work;
212-851-2130; dk@stat.columbia.edu
The Department offers several introductory courses. Students interested in statistical concepts, who plan on consuming, but not creating statistics, should take STAT UN1001 Introduction to Statistical Reasoning. The course is designed for students who have taken a pre-calculus course, and the focus is on general principles. It is suitable for students seeking to satisfy the Barnard quantitative reasoning requirements. Students seeking an introduction to applied statistics should take STAT UN1101 Introduction to Statistics. The course is designed for students who have some mathematical maturity, but who may not have taken a course in calculus, and the focus is on the elements of data analysis. It is recommended for pre-med students, and students contemplating the concentration in statistics. Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN1201 Calculus-Based Introduction to Statistics. The course is designed for students who have taken a semester of college calculus or the equivalent, and the focus is on preparation for a mathematical study of probability and statistics. It is recommended for students seeking to complete the prerequisite for econometrics, and for students contemplating the major in statistics. Students seeking a one-semester calculus-based survey of probability theory and statistical theory and methods should take STAT GU4001 Introduction to Probability and Statistics. This course is designed for students who have taken calculus, and is meant as a terminal course. It provides a somewhat abridged version of the more demanding sequence STAT GU4203 PROBABILITY THEORY and STAT GU4204 Statistical Inference. While some mathematically mature students take the more demanding sequence as an introduction to the field, it is generally recommended that students prepare for the sequence by taking STAT UN1201 Calculus-Based Introduction to Statistics.

The Department offers the Major in Statistics, the Concentration in Statistics, and interdisciplinary majors with Computer Science, Economics, Mathematics, and Political Science. The concentration is suitable for students preparing for work or study where substantial skills in data analysis are valued and may be taken without mathematical prerequisites. The concentration consists of a sequence of six courses in applied statistics, but students may substitute statistics electives numbered 4203 or above with permission of the concentration advisors. The major consists of mathematical and computational prerequisites, an introductory course, and five core courses in probability theory and theoretical and applied statistics together with three electives. The training in the undergraduate major is comparable to a masters degree in statistics.

Students may wish to consult the following guidelines when undertaking course planning. It is advisable to take STAT UN1101 Introduction to Statistics and STAT UN2102 Applied Statistical Computing before taking any of the more advanced concentration courses, STAT UN2103 Applied Linear Regression Analysis, STAT UN2104 Applied Categorical Data Analysis, STAT UN3105 Applied Statistical Methods, and STAT UN3106 Applied Data Mining. It is advisable to take STAT UN1201 Calculus-Based Introduction to Statistics, STAT GU4203 PROBABILITY THEORY, STAT GU4204 Statistical Inference, and STAT GU4205 Linear Regression Models in sequence. Courses in stochastic analysis should be preceded by STAT GU4203 PROBABILITY THEORY, and for many students, it is advisable to take STAT GU4207 Elementary Stochastic Processes before embarking on STAT GU4262 Stochastic Processes for Finance, STAT GU4264 STOCHASTIC PROCESSES-APPLIC, or STAT GU4265 Stochastic Methods in Finance. Most of the statistics courses numbered from 4221 to 4234 are best preceded by STAT GU4205 Linear Regression Models. The data science courses STAT GU4206 Statistical Computing and Introduction to Data Science, STAT GU4241 Statistical Machine Learning, and STAT GU4242 Advanced Machine Learning should be taken in sequence.

Advanced Placement
The Department offers three points of advanced credit for a score of 5 on the AP statistics exam. Students who are required to take an introductory statistics course for their major should check with their major advisor to determine whether this credit provides exemption from their requirement.

Departmental Honors
Students are considered for department honors on the basis of GPA and the comprehensiveness and difficulty of their course work in the Department. The Department is generally permitted to nominate one tenth of graduating students for departmental honors.

Undergraduate Research in Statistics and the Summer Internship
Matriculated students who will be undergraduates at Columbia College, Barnard College, the School of General Studies, or the School of Engineering and Applied Sciences may apply to the Department's summer internship program. The internship provides summer housing and a stipend. Students work with Statistics Department faculty mentors. Applicants should send a brief statement of interest and a copy of their transcript to Ms. Dood Kalicharan in the Statistics Department office by the end of March to be considered. If summer project descriptions are posted on the Department's website, please indicate in the statement of interest which project is of interest. Students seeking research opportunities with Statistics Department faculty during the academic year are advised to be entrepreneurial and proactive: identify congenial faculty whose research is appealing, request an opportunity to meet, and provide some indication of previous course work when asking for a project.

The requirements for this program were modified in March 2016. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

The major should be planned with the director of undergraduate studies. Courses in which the grade of D has been received do not count toward the major. The requirements for the major are as follows:

- Mathematics and Computer Science Prerequisites
  - MATH UN1101 Calculus I
  - MATH UN1102 Calculus II
  - MATH UN1201 Calculus III
  - MATH UN2010 Linear Algebra

- One of the following five courses
  - COMS W1007 Honors Introduction to Computer Science

- Core courses in probability and statistics
  - STAT UN1201 Calculus-Based Introduction to Statistics
  - STAT GU4203 PROBABILITY THEORY
  - STAT GU4204 Statistical Inference
  - STAT GU4205 Linear Regression Models
  - STAT GU4206 Statistical Computing and Introduction to Data Science
  - STAT GU4207 Elementary Stochastic Processes

- Three approved electives in statistics or, with permission, a cognate field.
  - Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 Linear Regression Models with STAT GU4282 Linear Regression and Time Series Methods, and should take as one of their electives STAT GU4281 Theory of Interest.
  - Students preparing for graduate study in statistics are encouraged to replace two electives with MATH GU4061 Introduction To Modern Analysis I and MATH GU4062 Introduction To Modern Analysis II.

Minor in Statistics

Courses in which the grade of D has been received do not count towards the minor. The requirements for the minor are as follows.

- STAT UN1101 Introduction to Statistics
- STAT UN2102 Applied Statistical Computing
- STAT UN2103 Applied Linear Regression Analysis
- STAT UN2104 Applied Categorical Data Analysis
- STAT UN3105 Applied Statistical Methods
- STAT UN3106 Applied Data Mining

- Students may replace courses required for the minor by approved Statistics Department courses.

Major in Mathematics-Statistics

The program is designed to prepare the student for: (1) a career in industries such as finance and insurance that require a high level of mathematical sophistication and a substantial knowledge of probability and statistics; and (2) graduate study in quantitative disciplines. Students choose electives in finance, actuarial science, operations research, or other quantitative fields to complement requirements in mathematics, statistics, and computer science.

- Mathematics
  - Select one of the following sequences:
    - MATH UN1101 Calculus I
    - MATH UN1102 Calculus II
    - MATH UN1201 Calculus III
    - MATH UN2010 Linear Algebra
Introduction to Statistical Reasoning. Students seeking an introduction to applied statistics or preparing for the concentration should take STAT UN1101 Introduction to Statistics (without calculus). Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN2101 Calculus-based Introduction to Statistics. Students seeking a one-semester calculus-based survey should take STAT GU4001 Introduction to Probability and Statistics. The undergraduate seminar STAT UN1202 features faculty lectures prepared with undergraduates in mind; students may attend without registering.

**STAT UN1001 Introduction to Statistical Reasoning. 3 points.**

A friendly introduction to statistical concepts and reasoning with emphasis on developing statistical intuition rather than on mathematical rigor. Topics include design of experiments, descriptive statistics, correlation and regression, probability, chance variability, sampling, chance models, and tests of significance.

- COMS W1005 Introduction to Computer Science and Programming in MATLAB
- ENGI E1006 Introduction to Computing for Engineers and Applied Scientists
- COMS W1007 Honors Introduction to Computer Science

or an advanced Computer Science offering in programming

**Electives**

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

- Students interested in modeling applications are recommended to take MATH UN3027 Ordinary Differential Equations and MATH UN3028 Partial Differential Equations
- Students interested in finance are recommended to include among their electives MATH GR5010 Introduction to the Mathematics of Finance, STAT GU4261 Statistical Methods in Finance, and STAT GU4221 Time Series Analysis.
- Students interested in graduate study in mathematics or in statistics are recommended to take MATH GU4061 Introduction To Modern Analysis I and MATH GU4062 Introduction To Modern Analysis II.
- Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 Linear Regression Models with STAT GU4282 Linear Regression and Time Series Methods, and to take among their electives STAT GU4281 Theory of Interest.

**Introductory Courses**

Students interested in statistical concepts, but who do not anticipate undertaking statistical analyses, should take STAT UN1001.
Prerequisites: Calculus through multiple integration and infinite sums.

Deductive Reasoning (QUA).

STAT GU4001 Introduction to Probability and Statistics. 3 points.

Prerequisites: one semester of calculus. Designed for students who desire a strong grounding in statistical concepts with a greater degree of mathematical rigor than in STAT W1111. Random variables, probability distributions, pdf, cdf, mean, variance, correlation, conditional distribution, conditional mean and conditional variance, law of iterated expectations, normal, chi-square, F and t distributions, law of large numbers, central limit theorem, parameter estimation, unbiasedness, consistency, efficiency, hypothesis testing, p-value, confidence intervals, maximum likelihood estimation. Serves as the pre-requisite for ECON W3412.

A calculus-based tour of the fundamentals of probability theory and statistical inference. Probability models, random variables, useful distributions, conditioning, expectations, law of large numbers, central limit theorem, point and confidence interval estimation, hypothesis tests, linear regression. This course replaces SIEO 4150.

STAT UN1201 Undergraduate Seminar. 1 point.
Prerequisites: Previous or concurrent enrollment in a course in statistics would make the talks more accessible. Prepared with undergraduates majoring in quantitative disciplines in mind, the presentations in this colloquium focus on the interface between data analysis, computation, and theory in interdisciplinary research. Meetings are open to all undergraduates, whether registered or not. Presenters are drawn from the faculty of department in Arts and Sciences, Engineering, Public Health and Medicine.

Applied Statistics Concentration Courses

The applied statistics sequence, together with an introductory course, forms the concentration in applied statistics. STAT UN2102 Applied statistical computing may be used to satisfy the computing requirement for the major, and the other concentration courses may be used to satisfy the elective requirements for the major. (Students who sat STAT GU4205 Linear Regression for the major would find that they have covered essentially all of the material in STAT UN2103 Applied Linear Regression Analysis.

STAT UN2102 Applied Statistical Computing. 3 points.
Corequisites: An introductory course in statistic (STAT UN1101 is recommended).
This course is an introduction to R programming. After learning basic programming component, such as defining variables and vectors, and learning different data structures in R, students will, via project-based assignments, study more advanced topics, such as recursion, conditionals, modular programming, and data visualization. Students will also learn the fundamental concepts in computational complexity, and will practice writing reports based on their statistical analyses.

STAT UN2103 Applied Linear Regression Analysis. 3 points.
CC/GS: Partial Fulfillment of Science Requirement
Prerequisites: An introductory course in statistics (STAT UN1101 is recommended). Students without programming experience in R might find STAT UN2102 very helpful. Develops critical thinking and data analysis skills for regression analysis in science and policy settings. Simple and multiple linear regression, non-linear and logistic models, random-effects models. Implementation in a statistical package. Emphasis on real-world examples and on planning, proposing, implementing, and reporting.

STAT UN2104 Applied Categorical Data Analysis. 3 points.
Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.
This course covers statistical models and methods for analyzing and drawing inferences for problems involving categorical data. The goals are familiarity and understanding of a substantial and integrated body of statistical methods that are used for such problems, experience in analyzing data using these methods, and proficiency in communicating the results of such methods, and the ability to critically evaluate the uses of such methods. Topics include binomial proportions, two-way and three-way contingency tables, logistic regression, log-linear models for large multi-way contingency tables, graphical methods. The statistical package R will be used.

STAT UN3105 Applied Statistical Methods. 3 points.
Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.
This course is intended to give students practical experience with statistical methods beyond linear regression and categorical data analysis. The focus will be on understanding the uses and limitations of models, not the mathematical foundations for the methods. Topics that may be covered include random and mixed-effects models, classical non-parametric techniques, the statistical theory causality, sample survey design, multi-level models, generalized linear regression, generalized estimating equations and over-dispersion, survival analysis including the Kaplan-Meier estimator, log-rank statistics, and the Cox proportional hazards regression model. Power calculations and proposal and report writing will be discussed.

STAT UN3106 Applied Data Mining. 3 points.
Prerequisites: STAT UN2103. Students without programming experience in R might find STAT UN2102 very helpful.
This course will be taught as a machine learning class. We will cover topics including data-based prediction, classification, specific classification methods (such as logistic regression and random forests), and basics of neural networks. Programming in homeworks will require R; students without programming experience in R might find STAT UN2102 helpful.

Foundation Courses
The calculus-based foundation courses for the core of the statistics major. These courses are GU4203 Probability Theory, GU4204 Statistical Inference, GU4205 Linear Regression, GU4206 Statistical Computing and Introduction to Data Science, and GU4207 Elementary Stochastic processes. Ideally, students would take Probability theory or the equivalent before taking either Statistical Inference or Elementary Stochastic Processes, and would have taken Statistical Inference before, or at least concurrently with taking Linear Regression Analysis, and would have taken Linear Regression analysis before, or at least concurrently, with taking the computing and data science course. A semester of calculus should be taken before Probability, additional semesters of calculus are recommended before Statistical Inference, and a course in linear algebra before Linear Regression is strongly recommended. For the more advanced electives in stochastic processes, Probability Theory is an essential prerequisite, and many students would benefit from taking Elementary Stochastic Processes too. Linear Regression and the computing and data science course should be taken before the advanced electives in machine learning and data science. Linear Regression is a strongly recommended prerequisite, or at least co-requisite, for the remaining advanced statistical electives.

Advanced Statistics Courses
Advanced statistics courses combine theory with methods and practical experience in data analysis. Undergraduates enrolling in advanced statistics courses would be well-advised to have completed STAT GU4203 (Probability Theory), GU4204 (Statistical Inference), and GU4205 (Linear Regression).

STAT GU4221 Time Series Analysis. 3 points.
Prerequisites: STAT GU4205 or the equivalent.
Least squares smoothing and prediction, linear systems, Fourier analysis, and spectral estimation. Impulse response and transfer function. Fourier series, the fast Fourier transform, autocorrelation function, and spectral density. Univariate Box-Jenkins modeling and forecasting. Emphasis on applications. Examples from the physical sciences, social sciences, and business. Computing is an integral part of the course.

**STAT GU4241 Statistical Machine Learning. 0 points.**
Prerequisites: STAT GU4206.

The course will provide an introduction to Machine Learning and its core models and algorithms. The aim of the course is to provide students of statistics with detailed knowledge of how Machine Learning methods work and how statistical models can be brought to bear in computer systems - not only to analyze large data sets, but to let computers perform tasks that traditional methods of computer science are unable to address. Examples range from speech recognition and text analysis through bioinformatics and medical diagnosis. This course provides a first introduction to the statistical methods and mathematical concepts which make such technologies possible.

**STAT GU4261 Statistical Methods in Finance. 3 points.**

Prerequisites: STAT GU4205 or the equivalent.

A fast-paced introduction to statistical methods used in quantitative finance. Financial applications and statistical methodologies are intertwined in all lectures. Topics include regression analysis and applications to the Capital Asset Pricing Model and multifactor pricing.
models, principal components and multivariate analysis, smoothing techniques and estimation of yield curves statistical methods for financial time series, value at risk, term structure models and fixed income research, and estimation and modeling of volatilities. Hands-on experience with financial data.

### Actuarial Sciences Courses

Only students preparing for a career in actuarial sciences should consider the courses in this section. Such students may also be interested in courses offered through the School of Professional Studies M.S. Program in Actuarial Science, but must check with the academic advisors in their schools to know whether they are allowed to register for those courses. Students majoring in statistics and preparing for a career in actuarial science may take STAT GU4282 (Regression and Time Series Analysis) in place of the major requirement STAT GU4205 (Linear Regression Analysis).

### Advanced Data Science Courses

In response to the ever growing importance of "big data" in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications at the interface between computer science and statistics. The Department offers a sequence that begins with the core course STAT GU4206 (Statistical Computing and Introduction to Data Science) and continues with the advanced electives GU4241 (Statistical Machine Learning) and GU4242 (Advanced Machine Learning), and also the advanced elective STAT GU4243 (Applied Data Science). Undergraduate students without experience in programming would likely benefit from taking the statistical computing and data science course before attempting GU4241, GU4242, or GU4243.

- Brian Morton (Biological Sciences)
- Joshua New (Psychology)
- Rajiv Sethi (Economics)
- Lisa Son (Psychology)

**STEM BC2222 Coding in the Sciences. 4 points.**

Students will learn how to write computer programs with the aim of answering specific questions of the kind that frequently arise during research. In one module students will develop an app that performs
 basic analyses of DNA Sequence data. For students with little or no programming background.

**STEM BC2223 Computer Programming for the Behavioral Sciences. 4 points.**

Students will learn how to write computer programs that can test theories and predictions that arise in the behavioral sciences. For students with little or no programming background.

The Barnard and Columbia undergraduate theatre program engages the disciplines of drama, theatre, and performance studies as a distinctive mode of intellectual and artistic inquiry. Majors take foundational coursework in the literary, cultural, and embodied traditions of western and nonwestern performance as well as in the practices of acting, directing, design, and playwriting. All majors then specialize in a specific area and undertake advanced thesis work, leading either to a formal essay of original research, or to an artistic project (in acting, design, directing, dramaturgy, playwriting, or solo performance) that combines the practices of research and artistic creation.

While Barnard and Columbia students fulfill the overall graduation requirements of their respective institutions, major requirements for the Barnard Major in Theatre/Columbia Major in Drama and Theatre Arts are identical, and the majority of required coursework is offered through the Barnard College Department of Theatre. Barnard and Columbia students receive their degrees from their respective colleges of Columbia University.

The Department’s season of productions in the Minor Latham Playhouse and the Glicker-Milstein Black Box Theatre is a crucible of investigation: the place where professional directors and designers collaborate with undergraduates, using a wide range of classic and contemporary plays and performance practices to shape insights unique to theatrical inquiry today. Whether it’s Shakespeare or Soyinka or Caryl Churchill, or the directing, solo performance, and playwriting theses in the Senior Thesis Festival, Department of Theatre productions are both a learning process and a scene of encounter, where perceptions are shaped for the attention and creative response of a larger public.

Students interested in majoring in Theatre should consider taking three or four of the required classes in their first two years of study: Theatre History I, Theatre History II and/or a course fulfilling the “world theatre” requirement, and at least one class in acting, design, directing, or playwriting (preferably in the area you might choose as areas of specialization). Students thinking about a research focus might consider an additional dramatic literature class early in their studies; students thinking about an acting or design focus, for example, might consider additional classes in those areas in the second or third year of study.

Students who successfully complete a concentration in acting should be able to attain the following objectives:

1. Analyze dramatic texts and apply the analysis to developing a performable role/character;
2. Synthesize external elements with external elements (social mores, environment, historical context, status relationship to others) and internal elements (center of gravity, personal rhythm, speed, tempo) toward the expression of a character’s physicality and emotionality;
3. Recognize and apply the fundamental concepts of character development: objectives, obstacles, actions, given circumstances;
4. Develop vocal, physical and emotional awareness and imagination, and to explore techniques available to aid the actor in applying these elements in a conscious way during rehearsal and performance.
Design Student Learning Objectives
Students successfully completing a concentration in design should be able to attain the following objectives:

1. Analyze dramatic texts and translate that analysis into documents used in the production process (breakdowns, plots, etc.);
2. Collect images and texts that provide insight into the developing design idea, and accurately communicate historical and stylistic choices;
3. Demonstrate fluency with the craft of a design field – e.g. sketching, model making, drafting, sound and lighting plots, and associated software;
4. Perform collaboratively, adapting and informing their designs with ideas generated through conversation with colleagues, classmates, and advisors.

Directing Student Learning Objectives
Students successfully completing a concentration in directing should be able to attain the following objectives:

1. Recognize the different demands of different configurations of stage space;
2. Apply compositional tools;
3. Define production style and its influence on performance choices;
4. Communicate effectively with actors;
5. Analyze the historical, social, and aesthetic elements of a dramatic text as the basis for a directorial conception.

Dramaturgy Student Learning Objectives
Students successfully completing a concentration in dramaturgy should be able to attain the following objectives:

1. Apply important critical and theoretical concepts to the analysis of dramatic writing and theatrical performance;
2. Synthesize and evaluate contemporary research scholarship and apply it to a specific production, including biographical, historical, and interpretive information;
3. Write clearly and effectively about the goals of a production, its critical contexts and purposes;
4. Communicate the critical stakes of a performance to a director and cast; to be able to work with a director in fashioning those stakes;
5. Edit dramatic scripts for production.

Playwriting Student Learning Objectives
Students successfully completing a concentration in playwriting should be able to attain the following objectives:

1. Create an individual theatrical voice in writing;
2. Construct dramatic and theatrical events onstage;
3. Communicate supportive critique to fellow writers;
4. Interpret plot and story, and to employ language and spectacle creatively;
5. Recognize dramatic structures, and be able to shape and hold an audience's attention.

Performance (acting, design, directing, dramaturgy, playwriting, solo performance) are required to complete a run crew assignment and a crew head assignment prior to their final semester; to be in the strongest position for the thesis, ideally these assignments are completed during the junior year. Please see the section on Production Crew (http://theatre.barnard.edu/department-and-production-information/#productioncrew) for more information.

**Studio Courses**

Please note that for Barnard students there is a limit on studio courses. Theatre majors may take 24 studio points in Theatre and an additional six in another discipline for a total of 30 studio points. Theatre Department studio courses are:

**THTR UN2003** Voice and Speech 2 points
**THTR UN2004** Movement for Actors 2 points
**THTR UN2005** Acting Workshop 3 points
**THTR UN2420** Technical Production 3 points
**THTR UN3004** Acting Lab 3 points
**THTR UN3005** Acting Lab 3 points
**THTR UN3006** Advanced Acting Lab 3 points
**THTR UN3007** Scene Lab 3 points

**Graduate Courses**

Only under special circumstances, and with the permission of the instructor, can undergraduates take graduate classes.

**THTR UN2002 New York Theatre. 3 points.**
Prerequisites: Enrollment limited. Permission given by instructor only at first meeting.

Students attend a variety of performances as well as a weekly lab meeting. Emphasis on expanding students’ critical vocabulary and understanding of current New York theatre and its history. Section on contemporary New York theatre management and production practices.

**THTR UN2003 Voice and Speech. 2 points.**
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult Auditions on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Techniques of vocal production tailored to the individual problems and potential of the student. Exercises for use in warm-up, relaxation, breathing, and rehearsal; daily work with poetry and dramatic texts.

**THTR UN2004 Movement for Actors. 2 points.**
Not offered during 2019-20 academic year.

Prerequisites: Recommended for students intending to focus on acting or directing in the senior thesis. Enrollment limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. </tr>
</tbody>
</table>

* Prior to completing the Senior Thesis: Performance, majors must take an additional two courses in the field of the thesis (acting, design, dramaturgy, directing, playwriting, solo performance). Courses in acting, design, and directing are offered through the Department of Theatre. Courses in playwriting are offered through the Department of Theatre and the Department of English; a student who takes one of the playwriting classes above as part of the Theatre Practice requirement may take a playwriting course in English as one of the two additional playwriting courses required for the thesis. For theses in directing, students must take a dramaturgy course prior to the thesis year. For theses in dramaturgy, students take two additional courses in dramatic literature, theatre studies, or performance studies research; these courses may be drawn from courses in dramatic literature, theatre studies, and global performance traditions offered in the Theatre department, or from dramatic literature courses offered in other departments with the adviser's approval. A dramaturgy thesis students may substitute one course in playwriting for one of the two additional courses. Students pursuing a solo performance thesis are required to have taken the Solo Performance course prior to the thesis semester (spring), among the three required courses in acting.

** Prior to completing the Senior Thesis: Research, majors must take an additional two courses in drama, theatre, or performance research. These courses may be drawn from course in dramatic literature, theatre studies, and global performance traditions offered in the Theatre department, or from dramatic literature or performance studies courses offered in other departments with adviser's approval. These courses should be discussed with the student's major advisor, as well as with the sponsor of the thesis.

**Production Crew**

Theatre majors planning on completing a Senior Thesis in Performance (acting, design, directing, dramaturgy, playwriting, solo performance) are required to complete a run crew assignment and a crew head assignment prior to their final semester; to be in the strongest position for the thesis, ideally these assignments are completed during the junior year. Please see the section on Production Crew (http://theatre.barnard.edu/department-and-production-information/#productioncrew) for more information.

Exploration of the actor's physical performance. Classical and contemporary approaches to theatre movement.

**THTR UN2005 Acting Workshop. 3 points.**
When offered in Fall semester, open only to first-year students.

Prerequisites: Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester's stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions.

Course develops the processes and tools an actor needs to approach the text of a play. Students develop their physical, vocal, and imaginative range and skills through voice and speech exercises, work on non-verbal behavior, improvisation, and character development.

**IN THE FALL SEMESTER OPEN ONLY TO FIRST-YEAR STUDENTS. Course encouraged for prospective BC Theatre and CU Drama and Theatre Arts majors.**

**THTR UN2100 New York Theatre. 3 points.**
Prerequisites: Enrollment limited. Permission given by instructor only at first meeting.

Students attend a variety of performances as well as a weekly lab meeting. Emphasis on expanding students' critical vocabulary and understanding of current New York theatre and its history. Section on contemporary New York theatre management and production practices.

**THTR UN2120 TECHNICAL PRODUCTION. 3 points.**
Not offered during 2019-20 academic year.

**THTR UN2140 History and Practice of Producing for the Theatre. 4 points.**
Prerequisites: Preference given to students who have taken New York Theatre and/or are Theatre/Drama and Theatre Arts majors. Permission of instructor given at first class meeting, required. Course limited to 12.

Explores the role and responsibilities of the producer in commercial and not-for-profit theatre; the relationship of the producer to the cast and creative team; the creative development of plays and musicals; the evolution of the role of the producer over the twentieth century; and the pioneering work of great producers of the past century. Students develop criteria to assess artistic and financial merits of theatrical work. Attendance at productions on and off Broadway, meetings with producers and other theatre artists.

**THTR UN2201 Acting Ensemble for Directing II. 1 point.**
This course will examine the original vision a director can bring to a written text. We will explore and define different directorial styles in terms of acting, design, language, politics, relationship to the audience, and world-of-play. We will study five dramatists; students will make work in conversation with each figure and their particular political and artistic projects. Students will make a total of four fully-realized scenes; the two final pieces will each be presented twice, with time for rehearsal in between. Students will work with actors who come from both inside and outside the class pool. Students will have the opportunity to stage work for proscenium, in-the-round, and environmentally. There will be at least two outings to see productions in New York City. Students will write three short papers that engage with and analyze live performance. This course places equal weight on the dramatic language of a play text and a theatre practice guided by images.

**THTR UN2210 Theatre Workshop. 1 point.**
Prerequisites: To be taken only for P/D/F. Auditions for this class are sometimes required; please check with Theatre Department in advance. If audition is required, auditions held 6pm on the first Tuesday and Wednesday class days of each semester. Class begins meeting after auditions. For required details, consult "Auditions" on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

Various topics presented by visiting theatre scholars, artists, and practitioners in a lecture/seminar/workshop series that will meet for at least four sessions during each semester. Topics, times, and visiting instructors will be announced by the department. Students must attend all classes to receive credit for the course.

**THTR UN2420 Technical Production. 3 points.**
Prerequisites: Crew assignment optional. Enrollment limited to 10 students.

Introduction to the equipment, terms, and procedures employed in the creation of scenery, lighting, and sound for the stage. Classroom exercises and field visits emphasize approaches to collaborative process and production management.
THTR UN2421 Stage Management. 3 points.
Prerequisites: Permission of the instructor, given at first class meeting. This course explores the role of the stage manager and production manager in theatrical production. Students undertake hands-on exercises to develop the practical and collaborative skills essential to working both as a stage manager and production manager—script analysis; production timeline and rehearsal management; technical rehearsal; budgeting; working with directors and designers; working with unions; health and safety codes; house management; box office.

THTR UN3000 Theatre Traditions in a Global Context. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Prerequisites: Enrollment limited to 50 students.
Provides a broad introduction to several traditions of nonwestern drama and theatrical practice, often placing recent and contemporary writing in relation to established conventions. Taking up plays and performance traditions from Asia, South Asia, and various African traditions, it may also consider the relation between elite and popular culture (adaptations of Shakespeare, for example), and between drama, theatre, and film. Fulfills one course in World Theatre for Theatre/Drama and Theatre Arts majors.

THTR UN3004 Acting Lab. 3 points.
Prerequisites: Enrollment in each section limited to 14 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester’s stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult “Auditions” on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions

This is an umbrella course whose offerings will change each year. Some are narrow, some broad; all are designed with several objectives in common, including: a. To focus on a particular genre, playwright, approach to live performance. b. To develop an interrelated set of conceptual, analytical, and embodiment skills and approaches. Courses typically involve scene preparation, reading, research, and both individual and group projects, as well as active participation in classroom exercises. c. To develop a sense of the purposes and goals of a specific approach to acting. The acting lab courses are intentionally non-sequential; students with little previous background in acting are strongly encouraged to consider the Acting Workshop and Scene Lab courses. No more than six courses can be taken from the Acting Lab/Advanced Acting Lab offerings during a student’s career. Auditions are required for all Acting Labs and will take place the first two evenings of each semester. Each course fulfills one course in Acting requirement for Theatre/Drama and Theatre Arts majors. Please check with the Theatre Department website for specific offerings and audition information.

Special problems of performance. In-class scene work, extensive outside research, rehearsals, and reading. Fulfills additional coursework in Acting for Theatre/Drama and Theatre Arts majors.

THTR UN3007 Scene Lab. 3 points.
Prerequisites: Enrollment limited to 16 students. Acting classes are open to all Barnard and Columbia undergraduates. Permission of Theatre Department through audition required: auditions for acting classes and for the semester’s stage productions held 6pm on the first Tuesday and Wednesday class days of each semester. Acting classes begin meeting after auditions. For required details, consult “Auditions” on the Barnard Theatre Department website in advance: theatre.barnard.edu/auditions.
Provides an overview of the creative process of acting: text analysis, circumstance, establishment of place, pursuit of intention in coordination with exercises and improvisation designed to enhance concentration, imagination, resonance, movement, and projection. Rehearsal 2 hours per week outside class, participation in discussion of plays, playwrights, and performances required. Fulfills one course in Acting for Theatre/Drama Theatre Arts majors.

THTR UN3140 Performing Women. 4 points.
Prerequisites: Enrollment limited to 16 students. This course examines the category of “woman” as it is mobilized in performance, considering both a variety of contemporary performances chosen from a wide range of genres and a diversity of critical/theoretical perspectives.

THTR UN3141 Socialism/Communism in Performance. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Sophomore standing. Enrollment limited to 16 students. Analyzes dramatic texts and performances under the Communist regimes behind the Iron Curtain before 1989. Principal focus is on Czech, Polish, and East German playwrights and their productions; we will consider their work in both legal and illegal contexts. In order to gain a wider understanding of the diversity of underground performative cultures, works from Hungary, Romania, and Slovenia will be considered as well. The seminar also attends to dissident performative activities in the framework of the 1980s revolutions, and reflects on works by western authors and emigrant/diasporic writers produced on stages behind the Iron Curtain. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

THTR UN3142 Bertolt Brecht: The Making of Theatre. 4 points.
Prerequisites: Enrollment limited to 16; permission of instructor given at first class meeting. Course is conducted in English and readings are in English; German majors and German-speaking students may do readings and papers in German. This class provides a comprehensive overview of the drama, theatre, and theory of Bertolt Brecht, the most influential European playwright and theorist of the twentieth century, in the context of their original historical contexts and subsequent legacies. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

THTR UN3146 American Drama in the 1990s. 4 points.
Prerequisites: Enrollment limited to 16. Examines American drama in the period between the fall of the Berlin Wall in 1989 and the attack on the World Trade Center in New York in 2001, considering a range of aesthetic (epic theatre, performance art), social (AIDS), and political (Reaganomics) issues of the period. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

THTR UN3150 Western Theatre Traditions: Classic to Romantic. 3 points.
Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. We will undertake careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the classical theatre through the early modern period to early romanticism; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to classical Athens, medieval cycle drama, the professional theatre of early modern England, the rival theatres of seventeenth century France and Spain, and eighteenth-century theatre in England and Germany; topics include the sociology of theatre, the impact of print on conceptions of performance, representing gender and race, and the dynamics of court performance. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors.

THTR UN3151 Western Theatre Traditions: Modern. 3 points.
Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. We will undertake careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the late eighteenth century to today; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to the ideology of realism and naturalism, the development of epic theatre, the theatre of cruelty,
postcolonial performance, and the continuing invention of dramatic forms (theatre of the absurd, speechplays, postdramatic theatre), as well as to the political and theoretical impact of race, gender, sexuality in modern performance culture. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors.

THTR UN3152 Nazism in Performance. 4 points.
Prerequisites: Course enrollment limited to 16; permission of instructor given at first class meeting.
Explores the cultivation of national and transnational performances as a significant force of National Socialism, at the same time as challenging the notion of “Nazi Theatre” as monolithic formation. The core of the course inquires into the dialectical analysis of artistic creations in diverse art genres, while working towards an understanding of the social dramaturgy of such events as staging the Führer and the racialized body of the privileged people. Nazism did not harbor ideologies without benefits for the allied nations. Thus, the dynamic performance of transnationalism among the “brothers in arms” will be included as well, in order to elucidate how works of art crossing into the Third Reich were reimagined, sometimes in ways challenging to the presumed values of the state stage. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

THTR UN3156 Modern Asian Performance. 4 points.
Prerequisites: Permission of instructor given at first class meeting; enrollment limited to 16.
Corequisites: Fulfills one course in World Theatre requirement for Theatre/Drama and Theatre Arts majors.
Course studies contemporary Asian performance with focus on modernity, covering most nations on the Asian continent; readings cover theoretical and aesthetic questions from performances of healing to revolutionary theatre to diasporic performance.

THTR UN3160 Queer Performance. 4 points.
This course surveys key theoretical and historical writings in the field of Queer Performance, both within and without Theatre and Performance Studies, as well as significant dramatic and performance works in the field. Beginning with an introduction to queer theory and questions surrounding gender and sexuality in performance, the course then moves into contemporary theories to examine works that use embodiment to question constructions of gender and sexuality onstage. Performances are regarded as provocations: what constitutes queer performance? Is sexuality all we mean by queer? What are the historical, aesthetic, and political aspects of queer performance? We will also pursue questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funding? Is queer performance inherently or even necessarily radical? The course explores crosscultural performances, as well as performances spanning from theatrical stages to ritual to everyday performance. Course fulfills one course in the “dramatic literature/theatre studies/ performance studies” requirement for the Theatre/Drama and Theatre Arts major.

Spring 2020: THTR UN3997
Campus experience. Courses draw on the vast resources of the city and include an off-campus experience culminating in a substantial written thesis on any aspect of drama, performance, or theatre research.

The Barnard–Columbia Urban Studies program enables students to explore and understand the urban experience in all of its richness and complexity. It recognizes the city as an amalgam of diverse peoples and their social, political, economic, and cultural interactions within a distinctive built environment. Students study the evolution and variety of urban forms and governance structures, which create opportunities for, as well as constrain, the exercise of human agency, individual and collective. They explore the place of the city in different historical and comparative contexts, as well as in the human imagination.

Majors build an intellectual foundation that combines interdisciplinary coursework and a concentration of study within a single field. Through the two-semester junior colloquium, students study urban history and contemporary issues, and at the same time hone their interdisciplinary, analytical, and research skills. This shared experience prepares them for their independent research project in their senior year. We encourage our majors to use New York City as a laboratory, and many courses draw on the vast resources of the city and include an off-campus experience.

Student Learning Outcomes
Having successfully completed the major in Urban Studies, the student will be able to:

- Apply concepts or methods from more than one social science or adjacent discipline to analyze an urban issue or problem.
- Describe the distinctive social, cultural, and spatial features of cities and illustrate their impacts on the urban experience.
- Apply basic skills of empirical reasoning to an urban problem.
- Explain how the idea of the city varies in different historical and comparative contexts.
- Demonstrate familiarity with a particular disciplinary approach to the city as an object of study.
- Demonstrate understanding of the history and variety of urban forms and governance structures.
- Articulate a well-defined research question, conduct independent research using primary sources and a variety of theoretical and methodological approaches, and write a substantive research paper.
- Communicate ideas effectively in written or oral form.
- Organize and present group research projects.

Assistant Professors: Gergely Baics (History), Deborah Becher (Sociology), Catherine Fennell (Anthropology), Maria Rivera Maulucci (Education), Van Tran (Sociology)

Major in Urban Studies
The major in urban studies is comprised of six curricular requirements:

Requirement A: Urban-Related Social Sciences (3 courses)

One course dealing primarily with urban subject matter from each of the following disciplines: Anthropology, Economics, History, Political Science, Sociology. For students declaring a major in Urban Studies after Spring 2018, one of the three courses must be History.

Many courses offered through Urban Studies may count towards Requirement A. For example, URBS UN3420 Introduction to Urban...
Sociology counts as a Sociology course, URBS UN3550 Community Building and Economic Development counts as a Political Science course, etc. Students must complete at least two of the Requirement A courses before taking the Junior Seminar (see Requirement E, below). It is recommended that majors fulfill this requirement before their junior year.

**Requirement B: Urban-Related Non-Social Science (1 course)**

One course dealing primarily with urban subject matter from a discipline not listed above (such as Architecture, Art History, English, Environmental Science, etc.)

**Requirement C: Methods of Analysis (1 course)**

One course in methods of analysis, such as URBS UN3200 Spatial Analysis: GIS Methods and Urban Case Studies.

**Requirement D: Specialization (5 courses)**

Five or more courses in a specialization from one of the participating departments. Barnard College students can double-count one A, B, or C course toward this requirement (only one of five), with the approval of the Director; Columbia College and General Studies students cannot double-count courses. Barnard majors also have specific requirements for each specialization, which are outlined in detail on the program's website, urban.barnard.edu (http://urban.barnard.edu/).

**Requirement E: Junior Seminar (2 courses)**

URBS UN3545 Junior Seminar: The Shaping of the Modern City 4

URBS UN3546 Junior Colloquium: Contemporary Urban Issues 4

**Requirement F: Senior Seminar (2 courses)**

A senior thesis written in conjunction with a two-semester research seminar, chosen from the following four options:

URBS UN3992 - URBS UN3993 Senior Seminar: The Built Environment and Senior Seminar: The Built Environment 8

URBS UN3994 - URBS UN3995 Senior Seminar: New York Field Research and Senior Seminar: New York Field Research 8

URBS UN3996 - URBS UN3997 Senior Seminar: International Topics in Urban Studies and Senior Seminar: International Topics in Urban Studies 8

A research seminar in the department of specialization. This option must be approved by the Program Director.

A complete list and courses that fulfill requirements A–E can be found on the program’s website, urban.barnard.edu (http://urban.barnard.edu/).

Appropriate substitutions may be made for courses listed above with the approval of the Program Director.

There is no minor in urban studies.

**URBS UN2200 Introduction to GIS. 3 points.**

Prerequisites: Must attend first class for instructor permission. Due to the high demand for our limited-enrollment spatial analysis course (URBS V3200) the Urban Studies program is offering an introductory course to the fundamentals of GIS (Geographic Informational Systems), specifically for non-majors. Students create maps using ArcGIS software, analyze the physical and social processes presented in the digital model, and use the data to solve specific spatial analysis problems. Note: this course does fulfill the C requirement in Urban Studies.

**URBS UN3420 Introduction to Urban Sociology. 3 points.**

Prerequisites: Students must attend first class. Examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey research, quantitative studies, and participant observation will provide perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment.

**URBS UN3450 Neighborhood and Community Development. 3 points.**

New York City is made up of more than 400 neighborhoods. The concept of neighborhoods in cities has had many meanings and understandings over time. Equally complex is the concept of community used to describe the people attached to or defined by neighborhood. While neighborhood can be interpreted as a spatial, social, political, racial, ethnic, or even, economic unit; community often refers to the group of stakeholders (i.e. residents, workers, investors) whose interests directly align with the conditions of their environment. Community development is “a process where these community members come together to take collective action and generate solutions to common problems” that result from the changing contexts in their neighborhoods. Using a variety of theories and approaches, residents organize themselves or work with community development practitioners on the ground to obtain safe, affordable housing, improve the public realm, build wealth, get heard politically, develop human capital, and connect to metropolitan labor and housing markets. To address the ever-changing contexts of neighborhoods, community development organizations are taking on new roles and adapting (in various cases) to larger forces within the city, region and nation such as disinvestment, reinvestment, increased cultural diversity, an uncertain macroeconomic environment, and changes in federal policy.

For more than a century, city-dwellers—and especially New Yorkers—have been tackling these challenges. This course will examine both historic and contemporary community building and development efforts, paying special attention to approaches which were shaped by New York City. This urban center, often described as a “city of
neighborhoods," has long been a seedbed for community-based problem-solving inventions. The course will focus on the theories (why?), tools (how?), and actors (who?) within the field of community development practice and is organized around important sectors (housing, economic development, food systems, arts), case studies, and contested concepts (public participation, social capital, public space).

**URBS UN3315 Metropolitics of Race and Place. 3 points.**
Prerequisites: Students must attend first class.
This class explores how racism and racialized capitalism and politics shape the distribution of material resources among cities and suburbs in metropolitan areas and the racial and ethnic groups residing in them. Readings and discussion focus on the history of metropolitan area expansion and economic development, as well as contemporary social processes shaping racial and ethnic groups' access to high-quality public goods and private amenities. We address racial and ethnic groups' evolving political agendas in today's increasingly market-driven socio-political context, noting the roles of residents; federal, state, and local governments; market institutions and actors; urban planners, activist organizations, foundations, and social scientists, among others. Here is a sample of specific topics: race/ethnicity and who "belongs" in what "place;" inequitable government and market investment across racial and ethnic communities over time and "sedimentation effects" (e.g., the "redlining" of Black communities leading to their inability to access loan and credit markets and the resulting wealth gap between Blacks and Whites); gentrification processes; creating sufficient, sustainable tax bases; and suburban sprawl. Assignments will include two short response papers, mid-term and final exams, and another project to be determined.

**URBS UN3310 Race, Space, and Urban Schools. 3 points.**
Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory.

**URBS UN3350 Environment, Climate Change and Vulnerability of Cities: Our New "Normal." 3 points.**
Urban experts face one of the greatest challenges in the history of urbanization: the multidimensional environmental crisis unfolding on our planet. Policymakers have responded by formulating the "sustainable development model" as an option to be implemented in our growing cities. Popularized by the 1987 United Nations' report "Our Common Future," commonly known as the "Brundtland Report," the term "sustainable development" has acquired different meanings and contents depending on its socio-economic context and its historical moment. This course will explore what urban sustainability means today in light of the climate change crisis from a gender and intersectional perspective. What can urban experts do to respond to urgent consequences of environmental deterioration in both industrialized and less industrialized world regions? What are the proper interventions to mitigate the burden on vulnerable social groups of phenomena such as: weather extremes, displacement, interethnic and social conflicts, food insecurity, and spread of diseases, among others? By examining case studies and applied methodologies we will analyze how climate change impacts different social groups in our cities, identifying adaptation and mitigation strategies being currently implemented. Tools to apply climate change scientific data will be provided. Students will have the opportunity to study and engage in climate change action platforms, such as the Conference of the Parties to the United Nations Framework Convention on Climate Change.

**URBS UN3546 Junior Colloquium: Contemporary Urban Issues. 4 points.**
Prerequisites: Non-majors admitted by permission of instructor. Students must attend first class. Enrollment limited to 16 students per section.
Evaluation of current political, economic, social, cultural and physical forces that are shaping urban areas.

**HIST UN3277 History of Urban Crime and Policing in Latin America in Global Perspective. 4 points.**
This seminar will examine the social construction of criminality and the institutions that developed to impose and enforce the criminal law as reflections of Latin American society throughout the region's history, with a particular emphasis on the rise of police forces as the principal means of day-to-day urban governance. Topics include policing and urban slavery; policing the urban "underworld"; the changing cultural importance of police in urban popular culture; the growth of scientific policing methods, along with modern criminology and eugenics; policing and the enforcement of gender norms in urban public spaces; the role of urban policing in the rise of military governments in the twentieth century; organized crime; transitional
justice and the contemporary question of the rule of law; and the transnational movement of ideas about and innovations in policing practice. In our readings and class discussions over the course of the semester, we will trace how professionalized, modern police forces took shape in cities across the region over time. This course actually begins, however, in the colonial period before there was anything that we would recognize as a modern, uniformed, state-run police force. We will thus have a broad perspective from which to analyze critically the role of police in the development of Latin American urban societies—in other words, to see the police in the contemporary era as contingent on complex historical processes, which we will seek to understand.

**URBS UN3995 Senior Seminar: The Built Environment. 4 points.**
(year-long course, 4 points per term)

Prerequisites: Senior standing. Year-long course; participation is for two consecutive terms. No new students admitted for spring.

Emphasizes the study of the built environment of cities and suburbs, and the related debates. Readings, class presentations, and written work culminate in major individual projects, under the supervision of faculty trained in architecture, urban design, or urban planning.

**URBS UN3997 Senior Seminar: International Topics in Urban Studies. 4 points.**
(year-long course, 4 points per term)

Prerequisites: Senior standing. Year-long course; participation is for two consecutive terms. No new students admitted for spring.

A year-long research seminar for students who wish to conduct a senior thesis project that focuses on cities outside of the United States. Topics relating to the rapid urbanization of Latin America, Africa, and Asia are particularly welcome. Seminar meetings will include discussion of relevant readings, as well as occasional class presentations and peer-editing assignments.

(year-long course, 4 points per term)

Prerequisites: Senior standing. (available at http://urban.barnard.edu/forms-and-resources). Year-long course; participation is for two consecutive terms. No new students admitted for spring.

Using New York City as a research laboratory, under the guidance of the faculty coordinator, students clarify basic theoretical issues related to their chosen research problem; find ways of making a series of empirical questions operational; collect evidence to test hypotheses; analyze the data using a variety of social science techniques; and produce reports of basic findings.

**Women's, Gender and Sexuality Studies**

201 Barnard Hall
212-854-2108
212-854-8432 (fax)
wmsstud@barnard.edu
Department Chair: Janet Jakobsen
Department Administrative Assistant: Mark Nomadiou

**Mission**

Women's, Gender and Sexuality Studies is an interdisciplinary department for students who wish to explore gender and its relation to other axes of power: race, class, ethnicity, and sexuality. We use these concepts to analyze human experience in its bodily, political, economic and cultural dimensions. Women's, Gender and Sexuality Studies covers a complex variety of theoretical and empirical scholarship both within traditional disciplines and in interdisciplinary frames in the humanities, in the social sciences and in the natural sciences as well as combinations of the three. The Department is committed to critical perspectives and bodies of knowledge that contribute to possibilities for transformation and change.

Early in their sophomore year, students interested in the major should consult the Department to plan their major. Students also have the option of electing a combined major and a minor. Areas of faculty research specialization include feminist and queer politics and ethics in U.S. public life; contemporary and historical social movements; gender and global political economy; sexuality and the state; sociology of the body, sex and gender; critical science studies of gender and sexuality; transnational feminisms; Asia-Pacific cultural studies; comparative literature and critical theory. Complementing the Women's, Gender and Sexuality Studies Department, the Barnard Center for Research on Women maintains an extensive and expanding resource collection on women's issues. Many of these resources, including BCRW's own online journal, The Scholar & Feminist Online, are available on BCRW's multi-media website. BCRW also sponsors a variety of events that are invaluable to students interested in Women's, Gender and Sexuality Studies.

Women's, Gender and Sexuality Studies participates in a Consortium with Africana Studies and American Studies that supports the development of intellectual and curricular projects across the three fields and offers a concentration and minor in studies of race and ethnicity, with an attention to global and diasporic frameworks. We are particularly interested in relations between and among, gender, sexuality, race, ethnicity and nation. The Consortium is working to create models for research and teaching that contribute to new ways of understanding processes of social differentiation and that help to create new possibilities for social relations.
**Student Learning Outcomes**

Upon successful completion of the Major, students will be able to attain the following outcomes:

- Identify and denaturalize core assumptions that are attached to present-day systems of gender, race and sexuality;
- Understand the variability and complexity of social identities in multiple historical, social and cultural contexts;
- Demonstrate through oral and written presentations their understanding of gender, sexuality and race as mutually constituted and relatively autonomous categories of social difference;
- Develop an awareness of a broad range of historical and transnational contexts for studying gender in relation to other social relations of power;
- Develop a familiarity with major theoretical perspectives and concepts of feminist thought and practice;
- Distinguish between different kinds of feminist claims and critically assess their effects in the world;
- Understand and apply key social theory concepts and perspectives as these have been used in critical scholarly and activist engagements with contemporary issues and problems;
- Integrate gender, race and sexuality theoretical frameworks along with a critical awareness of the politics of knowledge production in the conception and writing of an original research paper.

*NOTE: Students combining WGSS with Human Rights must complete the FULL WGSS major (11 courses); use the ‘WGSS Major Checklist’ instead.

Students combining WGSS with Africana Studies must either complete the FULL WGSS major OR the FULL Africana Studies major. If the student chooses to complete the full Africana Studies major, you may use this checklist. Students choosing the ‘combined major’ option for Africana Studies (7 Af Studies courses) must use the ‘WGSS Major Checklist’ instead, and complete 11 WGSS courses.

Requirements for the Minor

Minor Requirements Five courses, distributed as follows:

1. One introductory course (from the same list as applies to majors):
   - WMST UN1001 Introduction to Women's and Gender Studies 3 points
   - or SOCI UN3302 Sociology of Gender
   - or CSER UN1040

2. Two of our four ‘foundations’ courses:
   - WMST BC2140 Critical Approaches in Social and Cultural Theory 3 points
   - WMST UN3311 Colloquium in Feminist Theory 4 points
   - WMST BC3514 Historical Approaches to Feminist Questions 4 points
   - WMST UN3915 Gender and Power in Transnational Perspective (OR one other approved course in transnational gender/feminist studies (e.g. HIST BC4999 Transnational Feminism)) 4 points

3. Four WGSS electives (from the same list that applies to WGSS majors)

WMST UN1001 Introduction to Women's and Gender Studies. 3 points.

An interdisciplinary introduction to key concepts and analytical categories in women’s and gender studies. This course grapples with gender in its complex intersection with other systems of power and inequality, including: sexuality, race, ethnicity, class and nation. Topics include: feminisms, feminist and queer theory, commodity culture, violence, science and technology, visual cultures, work, and family.

WMST BC1050 Women and Health. 3 points.

Interdisciplinary introduction emphasizing interaction of biological and sociocultural influences on women's health, and exploring health disparities among women as well as between women and men. Current biomedical knowledge presented with empirical critiques of research and medical practice in specific areas such as occupational health, cardiology, sexuality, infectious diseases, reproduction, etc.

WMST UN3125 Introduction to Sexuality Studies. 3 points.

This course is designed to introduce major theories sexuality, desire and identity. We will be considering the relations between the history of sexuality and the politics of gender. We will read some primary texts in gender theory, and in the study of sexuality, desire, and embodiment. This course also provides an introduction to the interdisciplinary examination of human sexual and erotic desires, orientations, and identities. We will study how desires are constructed, how they vary and remain the same in different places and times, and how they interact with other social and cultural phenomena such as government, family, popular culture, scientific inquiry, and, especially, race and class.

WMST BC2410 Critical Approaches in Social and Cultural Theory. 3 points.

An introduction to key concepts from social theory as they are appropriated in critical studies of gender, race, sexuality, desire and identity. We will explore how these concepts are taken up from different perspectives to address particular social problems, and the effects of these appropriations in the world.

WMST BC2530 Global South Women Film Directors. 4 points.

Prerequisites: Students registering for this course are required to attend the screening and commentary on Tuesdays 6:10-8:55 pm, and lecture and discussion section on Thursdays 9:10-10:50 am. Enrollment limited to 20 students.

Globalization has both shrunk the world and broadened the impact of cultural meanings. Drawing on women directors from Africa, Asia, Latin America and the Middle East, this course analyzes emerging aesthetics, trends and debates shaping cinemas of the Global South.

The course explores the work of key women filmmakers (from the Global South) as they forge a visual semantics in a celluloid landscape dominated by male directors.

WMST BC3117 Film and Feminism: Transnational Perspectives. 3 points.

Prerequisites: Students registering for this course are required to attend the screening and commentary on Tuesdays 6:10-8:55 pm, and lecture and discussion section on Thursdays 9:10-10:50 am. Enrollment limited to 20 students.

**Classifications:** Humanities (HUM), Social Sciences (SOC), Comparative Literature (CUL), Performing Arts (ART).
Prerequisites: Students registering for this course are required to attend the screening on Tuesdays 6:10-9:00 pm, and lecture and discussion section on Thursdays 9:00-10:50 am. Enrollment limited to 25 students.

WMST BC3117 Film and Feminism is part of the "CCIS Critical Inquiry Lab: Theorizing Diasporic Visuality" with AFRS BC3110 Theorizing Diasporas (Instructors: Tina Campt and May Joseph). "Theorizing Diasporic Visuality" is the first CCIS Critical Inquiry Lab - an innovative series of linked courses sponsored by the Consortium for Critical Interdisciplinary Studies (CCIS). This year's lab links Prof. Tina Campt's (Barnard Africana/Women's, Gender & Sexuality Studies [WGSS]) Africana Studies colloquium, AFRS BC3110 Theorizing Diasporas, with May Joseph's (Pratt Social Science and Cultural Studies) WGSS course, WMST BC3117 Film and Feminism. Because cinematic visuality is an increasingly powerful tool for influencing public opinion across international borders, this course will train students in essential skills in visual literacy and reading, and provide fluency in the theoretical vocabularies of Diaspora Studies and feminist film theory and analysis. The Lab will use films by and about women in the quotidian conditions of the African Diaspora to teach students how gender and racial formation are lived in diaspora, and to engage the diasporic visual practices women mobilize to represent themselves. The course is structured around a Tuesday evening film series featuring African women filmmakers and presentations by filmmakers, curators, and visual artists and seminar discussion on Thursday mornings. Students may enroll by registering for either AFRS BC3110 or WMST BC3117.

WMST BC3121 Black Women in America. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students. Examines roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as AFRS BC3121 Black Women in America.

WMST BC3122 Contemporary American-Jewish Women Writers: 1990 to the Present. 4 points.
BC: Fulfillment of General Education Requirement: Reason and Value (REA).
Not offered during 2019-20 academic year.

Explores the international character of the Jewish people through the experiences of Jewish women in various historical periods and contexts. Identifies issues and concerns, past and present, articulated by contemporary Jewish feminists: perspectives of secularists, observant traditional women, heterosexuals, lesbians, feminists, and activists committed to diverse political ideologies.

WMST BC3125 Pleasures and Power: An Introduction to Sexuality Studies. 3 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

This introduction to sexuality studies is an examination of the historical origins, social functions, and conceptual limitations of the notion of "sexuality" as a domain of human experience and a field of power relations. Sexuality is often taken to be a natural and unchanging element of individual life. In this course, we seek to examine the ways in which sex is both social and political. We will consider how sexuality has been socially constructed, paying careful attention to the ways these ideas relate to other social forces such as gender, race, and class.

WMST BC3131 Women and Science. 4 points.
Prerequisites: Enrollment limited to 18 students. History and politics of women's involvement with science. Women's contributions to scientific discovery in various fields, accounts by women scientists, engineers, and physicians, issues of science education. Feminist critiques of biological research and of the institution of science.

WMST BC3132 Gendered Controversies: Women's Bodies and Global Conflicts. 4 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Investigates the significance of contemporary and historical issues of social, political, and cultural conflicts centered on women's bodies. How do such conflicts constitute women, and what do they tell us about societies, cultures, and politics? - D. Ko

WMST BC3134 Unheard Voices: African Women's Literature. 4 points.
Not offered during 2019-20 academic year.

Prerequisites: Enrollment limited to 14 students. How does one talk of women in Africa without thinking of Africa as a 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora. This course is the same as AFRS BC3134 Unheard Voices: African Women's Literature.

WMST BC3138 Affect and Activism. 4 points.
Course Description

From love to anger to disappointment to hope, political activism mobilizes emotions towards certain ends but also generates new affective states and feelings along the way. This advanced seminar will familiarize students with feminist, anti-racist and queer scholarship on affect, feelings and emotion as intrinsic to politics and as crucial for understanding how political thought and action unfold in contingent and often unexpected ways. Mixing theoretical and cultural texts with case studies, we will look at how affect permeates structures
of power and domination, embodiment and identity, and collective activist projects concerned with gender and sexual liberation. Students will have an opportunity to read theories of affect as well as to "read" activist movements for affect by working with archival documents (such as zines, manifestos, and movement ephemera) and other primary sources (such as memoir, photography and documentary film).

WMST BC3138 Colloquium in Feminist Theory. 4 points.
Prerequisites: LIMITED TO 20 BY INSTRUC PERM; ATTEND FIRST CLASS
An exploration of the relationship between new feminist theory and feminist practice, both within the academy and in the realm of political organizing.

WMST BC3509 Gender, Knowledge and Science in Modern European History. 4 points.
Not offered during 2019-20 academic year.
Develops historical strategies for uncovering the significance of gender for the cultures and contents of Western science. We will consider how knowledge is produced by particular bodies in particular spaces and times.

WMST BC3510 Interpreting Bodies: Engendering the Black Body. 4 points.
Not offered during 2019-20 academic year.
Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students.
This course examines how the body functions as an analytic model and a process of embodiment by focusing on the black female body in particular. Looking at feminist theorizing of the black body, it explores how the black female body has been marked in particular ways and with profound effects.

WMST BC3512 Art/Work: Sex, Aesthetics, and Capitalism. 4 points.
Prerequisites: none
How can performances, theatrical texts, and other art/media objects illuminate the operations of gender, sexuality, and race in global capitalism? Drawing from a range of artistic media and critical traditions, we explore how aesthetic thought can help us analyze the sexual, racial, and national character of contemporary labor and life.

WMST BC3513 Critical Animal Studies. 4 points.
"This course collaborates between students and professor, humans and animals, subjects and objects, to investigate the Animal Problem. What are non-human animals? How do we relate to them? How do we account for our animal nature while reconciling our cultural aspirations? What are our primary desires with respect to non-human animals?"

WMST BC3514 Historical Approaches to Feminist Questions. 4 points.
This course will provide students with a comparative perspective on gender, race, and sexuality by illuminating historically specific and culturally distinct conditions in which these systems of power have operated across time and space. In particular, the course seeks to show how gender has not always been a binary or primary category system. Such approach is also useful in understanding the workings of race and sexuality as mechanisms of differentiation. In making these inquiries, the course will pay attention to the intersectional nature of race, gender, and sexuality and to strategic performances of identity by marginalized groups.

WMST BC3518 Studies in U.S. Imperialism. 4 points.
BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).
Prerequisites: Enrollment limited to 20 students.
Historical, comparative study of the cultural effects and social experiences of U.S. Imperialism, with attention to race, gender and sexuality in practices of political, economic, and cultural domination.
Feminist Listening: Critical and Intersectional Approaches to Popular Music develops modes of feminist listening to a variety of examples in popular music including hip-hop, pop, rock, R&B, country music, and crossover/experimental music. By examining the sonic, textual, and visual components of popular music in relation to gender, sexuality, the body, race, ethnicity, economics, and nation, students will develop a critical vocabulary for discussing and analyzing the effects and meanings of popular music as filtered by twenty-first century listeners. Through close listening, discussion of assigned readings and pieces, and analytical writing on recorded and live performances, the course will encourage students to examine a wide repertory of popular music by using a variety of intersectional analytical “sieves,” refining and enriching their experience of popular music as critically astute listeners and writers. This course is designed for students who are interested in sharpening their listening practices but does not assume previous formal study of music. The course 1) introduces the fundamental of music through exercises in listening and writing, 2) focuses on a selection of current literature on listening, theoretical approaches to music analysis, and feminist/queer criticism; 3) attunes students to the various indices of musical structure (melody, form, harmony, rhythm & meter, words, flow & groove, performance); 4) brings together these parts of music into feminist/queer, alternative hearings of specific works. COURSE

WMST UN3813 Colloquium on Feminist Inquiry. 4 points.
Prerequisites: WMST V1001 and the instructor’s permission.
A survey of research methods from the social sciences and interpretive models from the humanities, inviting students to examine the tension between the production and interpretation of data. Students receive firsthand experience practicing various research methods and interpretive strategies, while considering larger questions about how we know what we know.

WMST UN3915 Gender and Power in Transnational Perspective. 4 points.
Enrollment limited to 15.
Prerequisites: Instructor approval required
Considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist movements that have emerged to address contemporary gendered inequalities. Topics include political economy, global care chains, sexuality, sex work and trafficking, feminist politics, and human rights.

If it is a small world after all, how do forces of globalization shape and redefine both men’s and women’s positions as as workers and political subjects? And, if power swirls everywhere, how are transnational power dynamics reinscribed in gendered bodies? How is the body represented in discussions of the political economy of globalization? These questions will frame this course by highlighting how gender and power coalesce to impact the lives of individuals in various spaces including workplaces, the home, religious institutions, refugee camps, the government, and civil society, and human rights organizations. We will use specific sociological and anthropological case studies, to look at how various regimes of power operate to constrain individuals as well as give them new spaces for agency. This course will enable us to think transnationally, historically, and dynamically, using gender as
a lens through which to critique relations of power and the ways that power informs our everyday lives and identities.

**WMST W3916 Historical Approaches to Feminist Questions. 4 points. Not offered during 2019-20 academic year.**

Historical Approaches to Feminist Questions examines issues of gender and sexuality across time and space. We explore how feminist analyses may reorient how we think about the past. We also ask how historical perspectives can bring the contingent and contextual nature of ideas about gender and sexuality into relief. We will consult both primary and secondary historical sources as well as key theoretical texts on the politics of women's history and the history of sexuality in intersection with other forms of identity and inequality.

**WMST W4301 Early Jewish Women Immigrant Writers: 1900-1939. 4 points.**

BC: Fulfillment of General Education Requirement: Literature (LIT). Enrollment limited to 15.

Prerequisites: students must attend first day of class and admission will be decided then.

Covers significant pre-Holocaust texts (including Yiddish fiction in translation) by U.S. Ashkenazi women and analyzes the tensions between upholding Jewish identity and the necessity and/or inevitability of integration and assimilation. It also examines women's quests to realize their full potential in Jewish and non-Jewish communities on both sides of the Atlantic.

**WMST GU4302 The Second Wave and Jewish Women's Artistic Responses: 1939-1990. 4 points.**

Prerequisites: Permission of instructor. Enrollment limited to 13 students.

A study of Jewish women's fiction, memoirs, art and film in response to the feminist/gender issues raised by the Second Wave. The seminar includes analysis of the writings and artwork of Jo Sinclair, TIlle Olsen, Judy Chicago, Helene Aylon, Elana Dykewomon, Rebecca Goldstein, E.M. Broner and others.

**WMST BC4303 Gender, Globalization, and Empire. 4 points.**

Prerequisites: Enrollment limited to 20 students.

Study of the role of gender in economic structures and social processes comprising globalization and in political practices of contemporary U.S. empire. This seminar focuses on the ways in which transformations in global political and economic structures over the last few decades including recent political developments in the U.S. have been shaped by gender, race, sexuality, religion and social movements.

**WMST W4304 Gender and HIV/AIDS. 4 points. Not offered during 2019-20 academic year.**

Prerequisites: Permission of instructor. Enrollment limited to 15 students.

An interdisciplinary exploration of feminist approaches to HIV/AIDS with emphasis on the nexus of science and social justice.

**WMST W4305 Feminist Postcolonial Theory. 4 points.**

Prerequisites: Critical Approaches and/or permission of instructor. Enrollment limited to 20 students.

Examines important concerns, concepts and methodological approaches of postcolonial theory, with a focus on feminist perspectives on and strategies for the decolonization of Eurocentric knowledge-formations and practices of Western colonialism. Topics for discussion and study include orientalism, colonialism, nationalism and gender, the politics of cultural representations, subjectivity and subalternity, history, religion, and contemporary global relations of domination.

**WMST W4307 Sexuality and the Law. 4 points. Not offered during 2019-20 academic year.**

Prerequisites: Because this seminar emphasizes weekly discussion and examination of the readings, enrollment is strictly limited to 20 students. Please read and follow the updated instructions: 1) Interested students must write a 50-100 word essay answering the following question: “What background, experience or expertise do you bring to the discussion of Sexuality and the Law that will help inform and challenge the other 19 students in the class?”; 2) Include the following: your name, institution you are graduating from, year of graduation, declared major, and whether you are working towards a Women’s Studies major or minor; 3) Send your information and essay through email with the subject line “Barnard Sexuality & the Law”; 4) Send your email to Riya Ortiz, WS Department Assistant, at sortiz@barnard.edu no later than Wednesday, September 1, 2010. The final list of students who are registered for the course will be announced on Friday, September 3, 12 pm. Classes start on Monday, September 13. (Note: Students who have registered for the course must also submit the essay to guarantee their registration).

Explores how sexuality is defined and contested in various domains of law (Constitutional, Federal, State), how scientific theories intersect with legal discourse, and takes up considerations of these issues in family law, the military, questions of speech, citizenship rights, and at the workplace.

**WMST W4308 Sexuality and Science. 4 points. Not offered during 2019-20 academic year.**

Examines scientific research on human sexuality, from early sexology through contemporary studies of biology and sexual orientation, surveys of sexual behavior, and the development and testing of Viagra. How does such research incorporate, reflect, and reshape cultural ideas about sexuality? How is it useful, and for whom?

**WMST W4309 Sex, Gender and Transgender Queries. 4 points. Not offered during 2019-20 academic year.**

Prerequisites: Enrollment limited to 20 students.

Sex, sexual identity, and the body are produced in and through time. “Trans” – as an identity, a set of practices, a question, a site, or as a verb of change and connection – is a relatively new term which this
course will situate in theory, time, discipline, and through the study of representation.

**WMST W4320 Queer Theories and Histories. 4 points.**
Enrollment limited to 20. Not offered during 2019-20 academic year.

The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldua, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

**WMST GU4325 Embodiment and Bodily Difference. 4 points.**
At once material and symbolic, our bodies exist at the intersection of multiple competing discourses, including the juridical, the technoscientific, and the biopolitical. In this course, we will draw upon a variety of critical interdisciplinary literatures—including feminist and queer studies, science and technology studies, and disability studies—to consider some of the ways in which the body is constituted by such discourses, and itself serves as the substratum for social relations. Among the key questions we will consider are the following: What is natural about the body? How are distinctions made between presumptively normal and pathological bodies, and between psychic and somatic experiences? How do historical and political-economic forces shape the perception and meaning of bodily difference? And most crucially: how do bodies that are multiply constituted by competing logics of gender, race, nation, and ability offer up resistance to these and other categorizations?

**Cross-Listed Courses**

**Africana Studies (Barnard)**

**AFRS BC3134 Unheard Voices: African Women's Literature. 4 points.**
How does one talk of women in Africa without thinking of Africa as a ‘mythic unity’? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora.

**AFRS BC3562 Caribbean Sexualities. 4 points.**
The seminar offers an interdisciplinary study of sexualities in the Caribbean from the conquest to the contemporary moment. The principal focus will be on how sexualities intersect with questions of gender, race, nation, and diaspora in the Anglophone, Francophone and Spanish-speaking Caribbean. We will approach the study of Caribbean sexualities from various disciplines and areas of study, including history, anthropology, sociology, ethnomusicology, performance studies, literary studies, gender studies, cultural studies, and postcolonial theory. The first part of the seminar addresses Caribbean sexuality in the context of conquest, colonization and slavery, and then national independence. The remainder of the course addresses areas that have drawn particularly intense scholarly debates, including Caribbean family formation, masculinity, and same-sex desire, as well as sex tourism, and the gender and sexual politics of Caribbean popular music and dance.

SOCI BC3920 Advanced Topics in Gender and Sexuality. 4 points.
This research and writing-intensive seminar is designed for senior majors with a background and interest in the sociology of gender and sexuality. The goal of the seminar is to facilitate completion of the senior requirement (a 25-30 page paper) based on "hands on" research with original qualitative data. Since the seminar will be restricted to students with prior academic training in the subfield, students will be able to receive intensive research training and guidance through every step of the research process, from choosing a research question to conducting original ethnographic and interview-based research, to analyzing and interpreting one’s findings. The final goal of the course will be the production of an original paper of standard journal-article length. Students who choose to pursue their projects over the course of a second semester will have the option of revisiting their articles further for submission and publications.

SOCI BC3935 Gender and Organizations. 4 points.
This course examines the sociological features of organizations through a gender lens. We will analyze how gender, race, class, and sexuality matter for individuals and groups within a variety of organizational contexts. The course is grounded in the sociological literatures on gender and organizations.

Spanish and Latin American Cultures (Barnard)

Theatre (Barnard)

THTR UN3140 Performing Women. 4 points.
Prerequisites: Enrollment limited to 16 students.
This course examines the category of "woman" as it is mobilized in performance, considering both a variety of contemporary performances chosen from a wide range of genres and a diversity of critical/theoretical perspectives.
