The Study of Mathematics

Our brief summary [Why Major in Mathematics?](#) can be found on the home page of our website along with a link to career resources.

Student Learning Outcomes

Students graduating with any of the majors offered by the Mathematics department should be able to attain the following outcomes:

- To acquire a basic body of mathematical knowledge that will provide them with a strong foundation for further study and/or for a career in mathematics or in other technical or scientific fields.
- To appreciate both the computational and the theoretical aspects of mathematics and to recognize its role in science, society, and history.
- To acquire precision and clarity in the oral and written communication of mathematical ideas and the ability to read and learn independently from mathematical textbooks/articles.
- To strengthen their problem solving ability via logical reasoning, rigorous proofs, and analytical thinking, and to be able to formulate precise mathematical statements from real-world problems.
- To value teamwork and collaboration with peers and the sharing of mathematical ideas.

Programs of Study

Math majors include Mathematics, Applied Mathematics, Mathematical Sciences, Mathematics-Statistics, Mathematics-Computer Science, and Economics-Mathematics.

Math minors include Mathematics and Mathematical Sciences.

For more detailed information, please read the [Requirements](#) (p. 2) tab.

Student Advising

Advising Resources

- Students who have special placement problems, are unclear about their level, or would like to know more about course offerings should make an appointment with a faculty member or the Chair. Information about [Student Advising](#) with links to advisor contact information can be found on our website.
- Open House events are scheduled each semester for prospective and current math majors to meet faculty, ask questions, and get to know each other.
- A [Students' Guide to Studying Math at Barnard](#), available on our website, is a useful guide written by and for students. It answers many frequently asked questions and provides comments and opinions from math majors.

Courses for First-Year Students

The systematic study of Mathematics begins with one of the following alternative sequences:

Calculus I, II, III, IV

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN1202	CALCULUS IV
Honors Math A-B	
MATH UN1207	HONORS MATHEMATICS A
MATH UN1208	HONORS MATHEMATICS B

Credit is allowed for only one of the calculus sequences. The calculus sequence is a standard course in differential and integral calculus. *Honors Mathematics A-B* is for exceptionally well-qualified students who have strong advanced placement scores. It covers second-year Calculus (MATH UN1201 CALCULUS III–MATH UN1202 CALCULUS IV) and MATH UN2010 LINEAR ALGEBRA, with an emphasis on theory.

Calculus II is NOT a prerequisite for *Calculus III*, so students who plan to take only one year of calculus may choose between I and II or I and III. The latter requires a B or better in Calculus I and is a recommended option for some majors.

MATH UN2000 INTRO TO HIGHER MATHEMATICS is a course that can be taken in their first or second year by students with an aptitude for mathematics who would like to practice writing and understanding mathematical proofs.

An additional list of [Courses Recommended for First-Year Students](#) can be found on our website.

Placement in the Calculus Sequence

College Algebra and Analytical Geometry is a refresher course for students who intend to take Calculus but do not have adequate background for it.

Advanced Placement: Students who have passed the advanced placement test for Calculus AB with a grade of 4 or 5 or BC with a grade of 4 receive 3 points of credit. Those who passed Calculus BC with a grade of 5 will receive 4 points of credit or 6 points on placing into Calculus III or Honors Math A and completing with a grade of C or better.

Calculus I, II, III: Students who have not previously studied calculus should begin with Calculus I. Students with 4 or higher on the Calculus AB or BC advanced placement test may start with Calculus II. Students with 5 on the Calculus BC test should start with Calculus III.

Honors Mathematics A: Students who have passed the Calculus BC advanced placement test with a grade of 5, and who have strong mathematical talent and motivation, should start with Honors Mathematics A. This is the most attractive course available to well-prepared, mathematically talented first-year students, whether or not they intend to be mathematics majors. Students who contemplate taking this course should consult with the instructor. If this is not possible ahead of time, they should register and attend the first class.

Math Tutoring

Two help rooms, one in 404 Mathematics (on Columbia's campus) and one in 502 Milstein Center (on Barnard's campus), are available. Hours will be posted in the rooms and on <https://math.barnard.edu/math-tutoring-schedules> for students seeking individual help and counseling from Barnard tutors and Columbia teaching assistants. No appointments are necessary. Both Barnard and Columbia students are welcome. NOTE: Changes to tutoring schedules and remote tutoring can occur.

Preparation for Graduate Study, Business or Teaching

Please read the first paragraph of the [Requirements](#) (p. 2) tab.

Coursework taken outside of Barnard

Advanced Placement Credit

Please see [AP Scores by Subject](#) on Barnard's website. Please note that Barnard does not grant major credit on the basis of exam scores; the college only permits course exemptions. Majors in the department must substitute another course for any exemption they receive on the basis of an exam score. Please speak to your major advisor or Chair about your situation.

Columbia College Courses

Please speak to your major advisor or Chair about which Columbia College courses are accepted toward your math major prior to registering for a course.

Transfer Credit

When students wish to transfer credit to Barnard from other institutions, their coursework is first evaluated for college elective credit by the Registrar's Office. If they are approved, departments can consider these courses for credit toward the major or minor. Please speak with your major advisor or Chair.

Study Abroad Credit

- Classes taken abroad through Columbia-led programs (i.e., those administered by Columbia's Center for Global Engagement) are treated as Columbia courses, equivalent to those taken on the Morningside Heights campus.
- Classes taken abroad through other institutions or programs are treated as transfer credit and are subject to the same policies as other transfer courses. Accordingly, there will be a limit on the number of study abroad courses taken at other institutions that can be counted toward the major or minor.
- To receive credit toward the major or minor for a study abroad course (whether taken through a Columbia program or another institution/program), students must submit a Study Abroad Approval form through Slate and obtain the approval of the Chair or departmental representative.

Summer Credit

- Summer courses at Barnard are equivalent to those taken during the academic year. Courses that have been approved for the fulfillment of departmental requirements will automatically count toward the major. For credits toward the minor, please speak to your advisor or Chair.
- Courses taken at other institutions (including Columbia) are considered transfer credit and are subject to the same policies governing other transfer courses. To receive major or minor credit for a summer course taken at another institution, students must submit a Summer Course form through Slate and have it approved by both the Registrar's Office and the Chair or department representative.

Senior Capstone Project

The Capstone Experience can be fulfilled by a senior thesis written under the supervision of a faculty member in your major area, or by completing the course Undergraduate Seminars in Mathematics. To learn more about

courses needed for the major, please read the [Requirements](#) (p. 2) tab.

Departmental Honors and Prizes

[Prizes and Awards](#) provided by individual donors for students are listed on the math website.

Requirements for the Major

The major programs in both Mathematics and Applied Mathematics are appropriate for students who plan to continue their training in graduate school. The major in Mathematical Sciences combines the elements of Mathematics, Computer Science and Statistics. It is designed to prepare students for employment in business, administration, and finance, and also give excellent background for someone planning graduate study in a social science field. Students who plan to obtain a teaching qualification in mathematics should plan their course of study carefully with an advisor, since courses that are too far from mathematics do not count towards certification.

For a major in Mathematics: 14 courses (a minimum of 35 credits) as follows:

- Four courses in calculus or Honors Mathematics A-B, including Advanced Placement Credit. A student who places out of Calc I/II with AP credits, will need to take a replacement course.
- Six courses in mathematics numbered at or above 2000.

- Four courses in any combination of mathematics and cognate courses.

The courses in mathematics must include:

MATH UN2010	LINEAR ALGEBRA (also satisfied by Honors Math A-B)

MATH GU4062	INTRO MODERN ANALYSIS II (II)
MATH UN3951	UNDERGRADUATE SEMINARS I (at least one term)
or MATH UN3952	UNDERGRADUATE SEMINARS II

* Note: It is strongly recommended that the sequences MATH GU4041 INTRO MODERN ALGEBRA I - MATH GU4062 INTRO MODERN ANALYSIS II and MATH GU4061 INTRO MODERN ANALYSIS I - MATH GU4062 INTRO MODERN ANALYSIS II be taken in separate years.

However, students who are not contemplating graduate study in mathematics may replace one or both of the two terms of MATH GU4061 INTRO MODERN ANALYSIS I - MATH GU4062 INTRO MODERN ANALYSIS II with one or two of the following courses:

- MATH UN2500 ANALYSIS AND OPTIMIZATION,
- MATH UN3007 COMPLEX VARIABLES,
- or MATH GU4032 FOURIER ANALYSIS

and may replace MATH GU4042 INTRO MODERN ALGEBRA II with

- MATH UN3020 NUMBER THEORY AND CRYPTOGRAPHY

In exceptional cases, the chair will approve the substitution of certain more advanced courses for those mentioned above.

For a major in Applied Mathematics: 14 courses (a minimum of 35 credits)
