NINE WAYS OF KNOWING

The Nine Ways of Knowing curriculum applies to students who entered Barnard before Fall 2016.

First-Year Foundations

Two courses are required of all first-year students to ensure that their skills in reading, writing, and speaking continue to develop in ways that will support their learning throughout their years at Barnard. First-Year Foundation courses are deliberately kept small; they focus on individual participation and on methods of research, analysis, and revision.

First-Year English

Barnard’s liberal arts philosophy takes as its starting point the idea that every student, whatever her level of academic achievement, can continue to improve her skills in writing, analysis, and argumentation. Therefore, all first-year students are required to take a one-semester writing course titled First-Year English (ENGL BC1201 First-Year English: Reinventing Literary History or ENGL BC1204 First-Year English: Reinventing Literary History (Workshop)), designed to cultivate and develop expository writing and related tools of scholarship. Students choose to study one of three rubrics: I. Legacy of the Mediterranean features a curriculum of classic texts representing key intellectual moments that have shaped Western culture; II. Women and Culture features a more global curriculum exploring the role of women in literature and culture; or III. The Americas features a curriculum of texts that exemplifies the dynamic relationship between North, South, and Central American literatures. All three literary traditions are historicized in interdisciplinary contexts to foster better writing across the curriculum.

Transfer students who did not pass a satisfactory course at their previous institution are not required to take ENGL BC1201, but must take ENGL BC3103 The Art of the Essay or ENGL BC3104 The Art of the Essay or a 3-point literature course from the Barnard English department offerings.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Analyze the thematic structure of literary works through close reading
- Translate critical reading into elegant and persuasive expository writing
- Conduct interdisciplinary research to ground literary works in historical context
- Document sources and incorporate scholarship into original analytical arguments
- Avoid plagiarism and other academic violations of Barnard’s Honor Code
- Develop a sense of literary history
- Gain confidence in speaking as well as writing skills in a small seminar setting
- Appreciate the value of incisive writing in courses across the curriculum

First-Year Seminar

First-year students take this one-semester course designed to develop the intellectual skills and styles central to subsequent academic work. This course emphasizes the enhancement of writing and communication skills and the group-discussion mode of intellectual inquiry and discourse.

Seminars center on major themes or issues, and participants read and discuss selected important philosophical, historical, literary, or scientific texts. Students and faculty engage in an extended consideration of a theme of general human concern, one that goes beyond departmental boundaries.

Transfer students are not required to take the First-Year Seminar.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Develop their skills in critical reading and analysis, writing, and effective speaking
- Assess and use textual evidence in support of oral and written arguments
- Explore important issues through significant texts ranging across genres, disciplines, and historical periods

Physical Education and Health

Degree Requirement: One Physical Education course is required for graduation. This course must be completed by the end of the first year. One point will be earned for this one course. One additional point of Physical Education may be counted towards the 122 points required for graduation. Transfer students must consult their transfer credit evaluation to see if a Physical Education class is needed.

Aim: To enable students to become aware of, and knowledgeable about, their physical being through participation in fitness and sports activities. Students are encouraged to enroll in additional activity and self-paced exercise courses toward the attainment of lifelong well-being.

General Education Requirements

The aim of the General Education Requirements is to ensure that each Barnard graduate confronts and engages in central ways of knowing the world. These ways of knowing—divided into nine key areas—include, but also bridge, the traditional disciplines of the liberal arts and sciences. Inquiry into these areas establishes the basis for a Barnard education. Each student studies, from analytical, quantitative, and artistic perspectives, the major means by which human knowledge has been constructed.

To allow for flexibility within this framework, a student chooses among the designated courses that fulfill each of the nine requirement areas. She will find some courses that offer a broad view of a field, exploring issues that help create an educated citizenry; other courses satisfy the purposes of general education by close scrutiny of critical methods and their specific application. Thus, each student will shape her own academic program, deliberately and distinctively, by electing a combination of wide-ranging introductory courses and more specialized upper level courses to fulfill the General Education Requirements. The areas included in the General Education Requirements are:

1. 1 Course in Ethics and Values (EAV)
2. 1 Course in Social Analysis (SOC)
3. 1 Course in Historical Studies (HIS)
4. 1 Course in Cultures in Comparison (CUL)
Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Explain how individuals or cultures arrive at judgments, expressions, or embodiments of their deeply held commitments
- Engage in debate and discussion of moral reasoning and ethical practice in different cultures and historical periods
- Discuss how differences in deeply held convictions emerge across cultures and historical periods
- Investigate how social, religious, and ethnic customs and ideas shape the moral attitudes and actions of individuals and groups
- Demonstrate a critical understanding of the complexity of moral questions and values

**2b. Social Analysis (for students entering before Fall 2011)**

**Requirement:** One course that acquaints students with the central concepts and methods of the social sciences, while also critically
exercising social structures and processes, and the roles of groups and individuals within them.

Aim: To introduce various ways of analyzing social structures and processes, and to explore how these institutions and processes both shape and are shaped by group and individual behavior. Courses will focus on a variety of institutions and processes, from the family, to the nation-state, to the international economy. All courses will address fundamental questions such as: How are individual and collective human behavior linked to the cultural, economic, and political context in which they occur? How is power distributed across different groups and among individuals? How do social systems develop and change? How can we come to better understand societal dynamics through a variety of quantitative and qualitative methods?

3. Historical Studies

Requirement: One course enabling students to study times and traditions of the past, to learn theories and methods of historical analysis, and to discover how different concepts of history shape our understanding of both past and present.

Aim: To emphasize the importance of historical knowledge for understanding various aspects of human experience and activity, and to develop the skills necessary to conduct or evaluate historical research. Coursework will demonstrate how history is not a simple record of past events, but an interpretation of the past shaped by the theories, methods, and data used to construct it. Among the questions to be raised are: Whose past is remembered? How is it remembered? To serve what purposes?

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Identify the historically specific social, political, and economic structures and agencies, as well as dominant ideas, relevant to the period or theme of the course
- Identify the main historiographical traditions pertaining to the period or theme of the course
- Evaluate the methodology and evidence used by historians to study the period or theme of the course

4. Cultures in Comparison

Requirement: One course that compares two or more cultures from the perspectives of the humanities and/or social sciences.

Aim: To study the diversity and the commonality of human experience, and to examine and question personal cultural assumptions and values in relation to others. Through comparative methods, courses will explore the beliefs, ideologies, and practices of different peoples in different parts of the world, across time, and through migrations. Courses may include comparison of cultures from two or more geographical areas or from two or more cultures within one area, and may approach the subject matter using anthropological, historical, social, and/or humanistic perspectives.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Identify the differences and commonalities between two or more cultures
- Apply the methods of research and inquiry of a discipline to the comparative study of cultures
- Demonstrate a critical understanding of their personal assumptions and values in relation to at least one other culture

5. Laboratory Science

Requirement: Two courses with laboratory in one science chosen from among: astronomy, biology, chemistry, environmental science, physics, or psychology. Acceptable courses must meet for at least three hours of lecture and three hours of laboratory each week. Note: students may combine a course in Physics with an appropriate course in Astronomy.

Aim: To develop intellectual curiosity about the natural world and the processes of scientific experimentation; to convey an understanding of what is known or can be known about the natural world; to introduce basic methods of analyzing and synthesizing the sources of scientific information; and to create scientifically literate citizens who can engage productively in problem solving. Students are expected to master the tools of science and current understanding in one area, and are encouraged to explore the limitations of existing theories and to learn how to ask strategic questions. Laboratory exercises introduce students to techniques of scientific investigation as they make observations, carry out experimental procedures, and learn how results and analyses are communicated in specific visual, quantitative, and written forms.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Ask questions about the natural world that can be tested by experiments or observations
- Analyze and synthesize sources of scientific information to assess what is known, or what can be known, about the natural world
- Practice discipline-appropriate methods of scientific observation, experimentation, data collection, interpretation, and analysis
- Communicate scientific results and analyses in appropriate visual, quantitative, or written forms

Note: Students may fulfill part of this requirement with scores of 4 or 5 on Advanced Placement Examinations in biology, environmental science, and physics (or their International Baccalaureate equivalents).

The following courses meet these requirements.

Astronomy

Select one of the following sequences:

Sequence A: 6

<table>

Nine Ways of Knowing

ASTR C1420 - ASTR C1904
- Galaxies and Cosmology and Astronomy Lab 2
ASTR C1836 - ASTR C1904

Biology
Select one of the following sequences:
Sequence A: 9
BIOL BC1001 - BIOL BC1002
- Revolutionary Concepts in Biology and Global Health and Ecology

Sequence B: 10
BIOL BC1500
- INTRO ORGANISMAL/EVOL BIOL
BIOL BC1501
- Introductory Lab in Organismal and Evolutionary Biology
BIOL BC1502
- INTRO CELL AND MOLECULAR BIOL
BIOL BC1503
- Introductory Lab in Cell and Molecular Biology

Chemistry
Select one of the following sequences:
Sequence A: (For students that entered prior to Fall 2014)
CHEM BC2001 - CHEM BC2002
- GENERAL CHEMISTRY I and General Chemistry II

Sequence B: 11
CHEM BC2001 - CHEM BC3230
- GENERAL CHEMISTRY I and ORGANIC CHEMISTRY I-LEC
CHEM BC3328
- Introductory Organic Chemistry Laboratory

Sequence C: 11
CHEM UN1403 - CHEM UN1404
- GENERAL CHEMISTRY I-LECTU and GENERAL CHEMISTRY II-LECTURES
CHEM UN1500
- GENERAL CHEMISTRY LABORATORY
and one additional laboratory course such as the following:
CHEM BC3328
- Introductory Organic Chemistry Laboratory
CHEM BC3338
- QUANTITATIVE-INSTRMNTL TECH-LAB
CHEM W3543

Environmental Science
Select two of the following:
EESC BC1001
- Environmental Science I
EESC BC1002
- Environmental Science II
EESC W1001
EESC UN1011
- Earth: Origin, Evolution, Processes, Future
EESC V2100
- Earth’s Environmental Systems: Climate
EESC V2200
- Earth’s Environmental Systems: Solid Earth
EESC V2300/EEEB W2002

Students may also complete the lab science requirement by combining the Columbia SEE-U summer program with:
EESC BC1002
- Environmental Science II
EESC UN1011
- Earth: Origin, Evolution, Processes, Future
EESC V2100
- Earth’s Environmental Systems: Climate
EESC V2200
- Earth’s Environmental Systems: Solid Earth

Physics
Select one of the following sequences:
Sequence A:
Select any two of the following:
PHYS BC2001
- MECHANICS - LECTURE LAB
PHYS BC2002
- ELECTRICITY#MAGNETISM-LEC LAB
PHYS BC3001
- CLASSICAL WAVES - LECTURE LAB

Sequence B:
Select one of the following lecture sequences:
PHYS UN1201 - PHYS V1202
- General Physics I and General Physics II
PHYS V1201
- General Physics I
PHYS UN1201 - PHYS F1202
- and the following lab sequence:
PHYS UN1291 - PHYS W1292
- General Physics Laboratory and

Psychology
Select one lecture and lab sequence from two groups, or select the BC1001/BC1010 sequence plus one additional lecture and lab sequence from any group:
PSYC BC1001
- INTRODUCTION TO PSYCHOLOGY
PSYC BC1010
- INTRO LAB EXPERIMENTAL PSYCH
PHYS UN1201 - PHYS F1202
- General Physics I and
and the following lab sequence:
PHYS W1292
- General Physics Laboratory and

Group A:
PSYC BC1106
- Psychology of Learning Laboratory
PSYC BC1107
- Psychology of Learning
PSYC BC1114
- Cognitive Laboratory
PSYC BC1115
- Cognitive Psychology

Group B:
PSYC BC1109
- Perception Laboratory
PSYC BC1110
- Perception
PSYC BC1118
- Systems and Behavioral Neuroscience Laboratory
PSYC BC1119
- Systems and Behavioral Neuroscience

Group C:
PSYC BC1124
- Psychology of Personality Laboratory
PSYC BC1125
- Psychology of Personality
PSYC BC1128
- Developmental Laboratory
PSYC BC1129
- Developmental Psychology
PSYC BC1137
- Social Psychology Laboratory
PSYC BC1138
- Social Psychology

6. Quantitative and Deductive Reasoning

Requirement: One course in which students learn methods and approaches used in mathematics and related fields involving quantitative expression and logical reasoning.

Aim: To provide a productive acquaintance with at least one means of quantitative and deductive reasoning and to develop an ability to apply this knowledge to the analysis of new problems. Coursework will emphasize how quantitative analysis and deductive reasoning function as creative, elegant, and powerful ways of thinking and as effective sets of conceptual tools and procedures with widespread applications.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:
• Demonstrate a familiarity with at least one method of quantitative or
deductive reasoning
• Apply relevant conceptual tools and procedures to the analysis of
problems

**Note:** Students may fulfill this requirement by securing Advanced
Placement Credit in mathematics, chemistry, computer science,
physics, or statistics (or their International Baccalaureate equivalents or
equivalent transfer credit).

### Astronomy
- ASTR BC1753 **LIFE IN THE UNIVERSE** 3
- ASTR BC1754 Stars, Galaxies, and Cosmology 3
- ASTR C1420 Galaxies and Cosmology 3
- ASTR C1403 Earth, Moon, and Planets (lecture) (some sections only) 3
- ASTR C1404 Stars, Galaxies, and Cosmology (some sections only) 3

### Statistics
- Any course of 3 points or more 3

### Urban Studies
- URBS UN2200 INTRODUCTION TO GIS METHODS 3

### URBS UN3200 Spatial Analysis: GIS Methods and Urban Case Studies 4

### 7. Language

**Requirement:** Competence in one ancient or modern language other than
English, demonstrated by completion of, minimally, the fourth sequential
semester of college-level study, and preferably, a more advanced course
with greater emphasis on literary and cultural traditions.

**Aim:** To provide basic linguistic competence in at least one language
other than English, in order to familiarize students with the language,
literature, and culture of at least one non-English speaking people.

Students are encouraged to develop their language skills to a level
that permits them to live and function in another country; to enable
them to conduct research, whatever their field; and to prepare them
to work effectively in an increasingly global and multicultural society.
In becoming familiar with the form and structure of another language,
students consider how languages function as tools for communication.
Students are encouraged to apply their language skills in courses that
fulfill other general education requirement areas.

Students who complete a course satisfying this requirement should be
able to attain at least one of the following outcomes:

- Read, write, and translate a chosen language of study
- Communicate with speakers of the chosen language, if it is a spoken
  language
- Demonstrate familiarity with the culture(s) and customs associated
  with the language of study

**Exemptions**

1. CEEB SAT II score of 781 or higher (780 or higher in Chinese); CEEB
SAT II score of 700 or higher in Hebrew only. No exemptions granted
for CEEB SAT II scores in Japanese or Korean.
2. AP score of 4 or 5 in French, German, Italian, Latin or Spanish; AP
score of 5 in Chinese.
3. Departmental examination.
4. Students with native English who study in a high school where the
language of instruction is not English (e.g., French, for alumnae of the
Lycée Français).
5. For international students for whom English was not the
primary language of instruction in high school, satisfactory
completion of ENGL BC1201 First-Year English: Reinventing Literary
History or ENGL BC1204 First-Year English: Reinventing Literary
History (Workshop) or one satisfactory semester at Barnard.

### Placement

1. Re-centered CEEB SAT II score of 680–780, fourth semester; 570–769,
third semester; 400–569, second semester; below 400, first semester,
for German.
2. Re-centered CEEB SAT II score of 690–780, fourth semester; 570–689,
third semester; 420–569, second semester; below 420, first semester,
for French and Spanish.
3. For languages other than French, Spanish, and German, placement
will be determined by departmentally administered examinations.
4. For transfer students: the course following the level of the last
satisfactorily completed semester course; however, formal
withdrawal and reenrollment in a more suitable course may be
required for students who are judged by the department to be
inappropriately placed and in need of additional preparation or review.
In such a case, transfer credit for the previous course is rescinded to
allow the student to receive credit for the Barnard/Columbia course of equivalent level. Taking the departmental placement exam is recommended.

5. By departmental examination, if there is no CEEB score or previous college transfer work.

Credit
1. Credit is given for courses satisfactorily completed in residence at Barnard or, in the case of a transfer, at her previous college.
2. No prior assurance of degree credit is given for summer or transfer work in foreign language courses. For work completed at other colleges, credit is granted with departmental approval, or by examination, or on completion of the next level at Barnard.
3. No credit is granted for work equivalent to a level already completed and credited.
4. Although credit for the first semester of an elementary language is not normally granted unless a more advanced course is completed, a student is granted one exception maximum to this rule on written request to the Registrar.

8. Literature
Requirement: One course in literature in any language, in the original or in translation; or in comparative literature.

Aim: To develop the skills needed for an informed and aesthetically rewarding reading of literary texts from various times, places, and traditions. Coursework will address the methods and theories by which readers produce meanings and interpretations, and will investigate the pertinence of material such as the authors’ biographies or their cultural contexts to literary analysis. Students will study rhetorical strategies employed in literature, becoming more adept at grasping the underlying assumptions and appeal of various forms of discourse.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Recognize a range of rhetorical strategies employed in literary texts and analyze their function
- Describe the contexts and distinctive features of at least one literary author, genre, or tradition

9. The Visual and Performing Arts
Requirement: One course in architecture, art history, studio art, graphic design, dance, music, film, or theatre.

Aim: To build an understanding and appreciation of creative processes and forms of artistic expression. Courses will provide insight into the ways art is used to explore and enrich the world and the human condition. The requirement will enable students to cultivate their skills, to develop an understanding of the ways various arts communicate and are discussed, and to consider works of art in their complex social and historical contexts.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Produce a work of art or a critical analysis of a work of art that demonstrates an understanding of formal characteristics including technique, style, medium or materials, and composition of design as applicable
- Situate the work in its social or historical context
