MESSAGE FROM THE PRESIDENT

Welcome to Barnard College!

The following pages are more than a list of courses. They are an invitation – from Barnard to you – to shape your own academic journey. You will encounter a diverse range of perspectives throughout your time here. Nowhere is that more evident than in our course catalog.

You'll see opportunities to join lectures with professors who are the world's foremost experts in their fields. You'll read about small seminars that give you the chance to have deep discussions with your peers and instructors. Every course you take will challenge your thinking and expand your world.

Know that there are no wrong answers. There is no "perfect" path to uncover. And always remember: The beauty and flexibility of a Barnard education lie in the hundreds of options and thousands of permutations before you right now.

Take risks. Be uncomfortable. Enroll in a course about something you've always been fascinated by and another about a topic you've never thought about. Consider a course that will give you room to confront ideas that will stretch your mind.

You never know what you may discover.

Finally: Take your time. Revel in this experience and let your mind wander to the possibilities in front of you. Whatever you decide, wherever you land, you are embarking on a world-class education that will leave you prepared to change the world.

President Laura Rosenbury

THE COLLEGE

Barnard College has been a distinguished leader in higher education for women for over 100 years and is today the most sought after private liberal arts college in the nation. Founded in 1889, the College was the first in New York City, and one of the few in the nation at the time, where women could receive the same rigorous liberal arts education available to men. Its partnership with a great research university, Columbia University, combined with its setting in an international city, strength in STEM, and its unwavering dedication to the advancement of women, makes Barnard unique among liberal arts colleges today.

Barnard is both an independently incorporated educational institution and an official college of Columbia University—a position that simultaneously affords it self-determination and a rich, value-enhancing partnership. Barnard students may take classes at Columbia and benefit from the University's myriad academic resources, as Columbia students may do at Barnard. Barnard students may compete in Division I athletics through the Barnard-Columbia Athletic Consortium.

New York City and its vast cultural and social resources provide an extension to the Barnard campus, used by every department to enhance curriculum and learning. The City is an inescapable presence, inviting students with infinite opportunities to explore and experience (from access to the arts to working with social-change organizations to interning on Wall Street).

The College draws accomplished, motivated, bright, and curious young women who seek a stimulating atmosphere and diverse community. Barnard alumnae include pioneers like anthropologist Margaret Mead and Judith Kaye, the first female Chief Judge of the State of New York, along with prominent cultural figures such as choreographer Twyla Tharp, writers Zora Neale Hurston and Mary Gordon, and Pulitzer Prize-winning journalists Anna Quindlen and Natalie Angier.

Mission Statement

Barnard College aims to provide the highest quality liberal arts education to promising and high-achieving young women, offering the unparalleled advantages of an outstanding residential college in partnership with a major research university. With a dedicated faculty of scholars distinguished in their respective fields, Barnard is a community of accessible teachers and engaged students who participate together in intellectual risk-taking and discovery. Barnard students develop the intellectual resources to take advantage of opportunities as new fields, new ideas, and new technologies emerge. They graduate prepared to lead lives that are professionally satisfying and successful, personally fulfilling, and enriched by love of learning.

As a college for women, Barnard embraces its responsibility to address issues of gender in all of their complexity and urgency, and to help students achieve the personal strength that will enable them to meet the challenges they will encounter throughout their lives. Located in the cosmopolitan urban environment of New York City, and committed to diversity in its student body, faculty and staff, Barnard prepares its graduates to flourish in different cultural surroundings in an increasingly inter-connected world.

The Barnard community thrives on high expectations. By setting rigorous academic standards and giving students the support they need to meet those standards, Barnard enables them to discover their own capabilities. Living and learning in this unique environment,

Barnard students become agile, resilient, responsible, and creative, prepared to lead and serve their society.

Barnard History

Barnard College was among the pioneers in the late 19th-century crusade to make higher education available to young women.

The College grew out of the idea, first proposed by Columbia University's tenth president, Frederick A.P. Barnard, that women have an opportunity for higher education at Columbia. Initially ignored, the idea led to the creation of a "Collegiate Course for Women." Although highly-qualified women were authorized to follow a prescribed course of study leading ultimately to Columbia University degrees, no provision was made for where and how they were to pursue their studies. It was six years before Columbia's trustees agreed to the establishment of a college for women. A provisional charter was secured, and Barnard College was named in honor of its most persistent advocate.

In October 1889, the first Barnard class met in a rented brownstone at 343 Madison Avenue. Fourteen students enrolled in the School of Arts and twenty-two "specials," lacking the entrance requirements in Greek, enrolled in science. There was a faculty of six.

Nine years later Barnard moved to its present site in Morningside Heights. In 1900, Barnard was included in the educational system of Columbia University with provisions unique among women's colleges: it was governed by its own Trustees, Faculty, and Dean, and was responsible for its own endowment and facilities, while sharing instruction, the library, and the degree of the University.

Barnard Today

From the original 14 students, enrollment has grown to over 3,000, with over 46,700 awarded degrees since 1893. The integration of teaching and scholarship occurs at an incomparable level at Barnard. Barnard's faculty of 259 women and men are teacher-scholars whose paramount concern is the education of undergraduate students and whose professional achievements bring added vitality to the classroom. This commitment to personal attention and high achievement provide the ultimate learning environment.

Barnard's liberal arts education is broad in scope and demanding. The curriculum includes a series of general education requirements—a program of courses the faculty believes provides a stimulating and thorough education, while remaining flexible and varied enough to suit a student's own interests, strengths, and talents. Classes vary in size. Those in which student participation is important are small. There are opportunities for independent study and students are often invited to work on research projects with faculty members.

In 2007, Barnard College and Columbia University amended and extended the longstanding agreement for cooperation between the institutions, an agreement which remains unique in higher education. Barnard stands as an independent college for women with its own curriculum, faculty, admissions standards, graduation requirements, trustees, endowment, and physical plant. At the same time, Barnard and Columbia share resources, thereby giving students open access to the courses, facilities, and libraries of both schools. Barnard and Columbia students also share in a wide variety of social and extracurricular activities. Barnard boasts 80 undergraduate clubs, and students have access to an additional 500+ student life opportunities at Columbia.

From its inception, Barnard has been committed to advancing the academic, personal, and professional success of women. Students benefit from an atmosphere in which over half of the full-time faculty are women, and women are well represented in the administration. The College is led by Sian Beilock, former Stella M. Rowley Professor of Psychology, Vice Provost for Academic Initiatives, and Executive Vice Provost and Officer of the University of Chicago. At Barnard, women are given the opportunities and the freedom to lead both in and out of the classroom, and to develop the skills that will equip them to lead throughout their lives.

Barnard's unique ties to several of Columbia's graduate schools and to premier New York City institutions, including the Juilliard School, the Manhattan School of Music, the Jewish Theological Seminary of America, and Teachers College, give students an unusual range of educational options, including a number of joint degree programs. At Barnard students can earn a bachelors and masters through one of our 4+1 programs within Columbia's Fu Foundation School of Engineering and Applied Sciences, The School of International and Public Affairs, The Mailman School of Public Health, The Harriman Institute and a quantitative masters at the Graduate School of Arts and Sciences. Academic organizations within and beyond the University also offer vital opportunities for research, study, studio experience, internships, and community service.

Barnard has a high student retention rate, an indication of student satisfaction with the college experience. Barnard students also enjoy leaves for study, travel, and internships. By senior year, about three-quarters of students have undertaken an internship and/or pursued funded summer research across academic institutions, corporations, nonprofit organizations, government agencies, and in the arts. Every year Barnard admits about 100 transfer students who come to take advantage of the educational opportunities available to Barnard women.

Every year, Beyond Barnard collects and summarizes information about post-graduate study and employment. Within the first six months after graduation, 90% of Barnard graduates from Classes 2018-2020 were working or enrolled in graduate or professional schools. Full reports are available at Beyond Barnard's website.

Accreditation

Barnard College is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools, 3624 Market Street, Philadelphia, PA 19104, 215-662-5606. The Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Commission on Recognition of Postsecondary Accreditation.

The Barnard Education Program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP) and approved by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (Grades 1-6) or Adolescent Education (Grades 7-12). For more information, please visit <https://education.barnard.edu/certification>.

The Campus

The Barnard campus occupies four acres of urban property along the west side of Broadway between 116th and 120th Streets. At the southern end of the campus, four residence buildings, Brooks Hall (1907), Hewitt Hall (1925), Helen Reid Hall (1961), and Iphigene Ochs

Sulzberger Hall (1988), form an enclosed quadrangle known as the "Quad."

Barnard Hall (1917) is just north of the "Quad" and contains seminar rooms, classrooms, and faculty offices, and dance studios. The Sulzberger Parlor on the third floor is used for meetings and special events. The Julius S. Held Lecture Hall is also on the third floor.

Just north of Barnard Hall is the newly constructed Cheryl and Philip Milstein Center for Teaching and Learning, opened in September 2018. Designed by the award-winning firm Skidmore, Owings & Merrill, the 128,000-square-foot building—with a base of five floors and a tower of eleven floors adjacent to Altschul Hall—is a distinctive place that convenes students and faculty, facilitates collaboration, and fosters dialogue. It includes a new kind of library, one that brings together current technologies and learning spaces in an interactive setting. Furthermore, it is a dynamic academic hub of the campus, linking departments and disciplines both physically and philosophically.

Further to the north, Helen Goodhart Altschul Hall (1969) and the Diana Center (2010) face each other across an open plaza. The 14 stories of Altschul Hall are devoted to the sciences. Herbert H. Lehman Auditorium is on the first floor. The Diana Center was designed by the renowned architecture firm Weiss/Manfredi and is the student center for the campus.

Milbank Hall (1897) occupies the furthest northern end of the campus and houses administrative and faculty offices, classrooms, the Arthur Ross Greenhouse, and the Minor Latham Playhouse, a well-equipped modern theater.

In 2003, the College's four oldest buildings - Brooks Hall, Hewitt Hall, Barnard Hall, and Milbank Hall, were added to the National Register of Historic Places.

In the immediate neighborhood, Barnard maintains additional residence halls, including Plimpton Hall, acquired in 1968; Eleanor Thomas Elliott Hall, formerly 49 Claremont Avenue, acquired in 1982 and renamed in 1992; Cathedral Gardens, constructed by Barnard in 2006; and 537 West 121st Street, acquired in 2019. In addition, three apartment buildings on West 116th Street, 600 (acquired in 1971), 616 (acquired in 1964), and 620 (acquired in 1968) are Barnard residence halls. The College also rents additional spaces at 601 West 110th Street.

Columbia University is directly across the street on Broadway.

Admissions

Barnard students change the world and how we view it. They are bold, thoughtful, analytical, intrepid and ambitious. They love to learn and make connections from the classroom to the world around them. The admissions team seeks candidates such as these to fill our first-year and transfer classes.

The College admits students and administers its financial aid and loan programs, educational policies and programs, recreational programs, and other College programs and activities without regard to race, color, creed, national origin, sexual orientation, or disability. We are need-blind for first-year U.S. citizens and permanent residents and need-aware for international students and transfer applicants. Barnard meets 100% of demonstrated need and does not offer any merit-only scholarships.

Barnard seeks students from diverse educational and cultural backgrounds and from all geographic regions. However, no preconceived profile of an ideal student population limits the number of applicants accepted from any one group. Admission is highly selective and our process is holistic and contextual; no one criterion or score determines acceptance. In addition to school records (all transcripts from 9th grade on), recommendations, writing, and test scores (optional for those applying for entry in 2024), we carefully consider each applicant in terms of their personal qualities, intellectual potential, the rigor of the curriculum they have pursued, as well as their potential for achievement at Barnard. We review each applicant in the context of her school, community, and individual story.

First-Year Application Procedures

Application Deadlines

First-Year applicants can apply under an Early Decision or Regular Decision admission round.

Early Decision

Deadline: November 1st

Notification: Mid-December

The Early Decision plan is intended for students who passionately believe that Barnard is their first choice college. It is a binding decision plan, meaning that if you are admitted Early Decision, you commit to attend Barnard and must withdraw all other applications. Along with all other required and optional application materials, Early Decision applicants are required to submit an Early Decision Agreement which is signed by the applicant, their parent/guardian, and their counselor. Students applying under the Early Decision plan must apply by November 1st. Decisions will be released by mid-December.

Notification of financial aid assistance for those candidates who have demonstrated financial need will be provided at the same time as the admissions decision. Once admitted, the student must submit a nonrefundable enrollment deposit by the enrollment deadline. This deposit is applied toward tuition and fees for the first year.

If a student is denied in the Early Decision round, this is the final decision for the year. Students are welcome to apply in subsequent years as a transfer student.

The Admissions Committee may decide to defer a final decision on an Early Decision application and move them to the Regular Decision Round. The student will then be reevaluated and receive a final decision in late March. In that event, the student is asked to submit final grades from the first half of the senior year.

Regular Decision

Deadline: January 1st

Notification: Late-March

Regular Decision is an excellent choice for applicants who would like to consider offers from various schools. The deadline for Regular Decision is January 1st. Students will be notified by late-March.

Notification of financial aid assistance for those candidates who have demonstrated financial need will be provided at the same time as the admissions decision. Once admitted, the student must submit a non-

refundable enrollment deposit by the May 1st enrollment deadline. This deposit is applied toward tuition and fees for the first year.

The Barnard Application

The Barnard Application consists of two parts - the Application and the Writing Supplement. Both can be submitted via the [Common Application](#). Barnard also participates in the [Questbridge](#) program. A non-refundable fee of \$75 must accompany the application. Students may submit payment directly through the Common Application website. Students with significant financial hardship can request a fee-waiver through the applications.

Secondary School Preparation

Each candidate for admission should present a college preparatory program from an accredited secondary school or an equivalent education representing a four-year course of study. Our most competitive applicants have taken four years of each of the five core subject areas: English, math, science, foreign language, and social science, during their high school years. They have also pursued advanced, honors, or AP or IB where available. We do understand that curriculums at schools vary; we are seeking students who have challenged themselves academically and pursued a program that provides them with good breadth. Students should discuss all their options with their guidance counselor to ensure they are making rigorous choices within the context of their curriculum and course offerings. A secondary school diploma or equivalent is a requirement for enrollment at the College.

First-Year Entrance Tests

For the 2024 entering class, Barnard is SAT/ACT test-optional. Barnard recognizes the challenges that students have faced due to the COVID-19 pandemic and, in response, Barnard adopted a 4-year SAT and ACT test-optional admission policy. This decision was made in consultation with the President and the Board of Trustees and is not intended as an admissions policy shift, but rather as a temporary measure driven by the circumstances. Students may apply without submitting standardized test scores from the SAT or ACT exam during the 2024 application year and no other materials will be requested in lieu of test scores.

Applicants may still submit self-reported SAT or ACT scores for consideration if they are able to do so. If a student is admitted and plans to enroll, she must submit official scores. It is the student's responsibility to direct the College Board or ACT Program to send official test scores to the Office of Admissions. The SAT tests code number for Barnard is 2038. The ACT code number for Barnard is 2718.

For students whose primary language is not English or who have not studied at a secondary school for four or more years where the primary language of instruction is English should submit scores from the [Test of English as a Foreign Language \(TOEFL\)](#), the [International English Language Testing System \(IELTS\)](#), the [Duolingo English Test](#) or other [accepted](#) testing agencies.

Recommendation Letters

Another important part of the first-year application is the submission of three recommendations, one from the high school counselor and two from academic teachers. We require two teacher recommendations in core subjects - English, math, science, social sciences, or foreign language courses. While we recommend that these teachers be from

your last two years of high school, we will accept recommendation letters from 10th grade teachers. These recommendations give the Admissions Committee additional information about the candidate's interests, character, skills, and contributions to the classroom.

In addition we require a letter of recommendation from your college counselor. Due to large student caseloads, we understand if your counselor is unable to send a recommendation for you. Please contact us if this is the case. If your counselor is not able to submit a recommendation, we would encourage you to send an additional teacher letter of recommendation.

For transfer students, we require a Dean or advisor recommendation and one college academic recommendation.

Deferring Enrollment (Gap Year)

Admitted students who wish to defer enrollment in Barnard for up to one year must obtain permission by completing a deferral request form once admitted, explaining the reasons for the deferral request. Such a request is normally granted for purposes of work, travel, or pursuit of a special interest. Students are not allowed to matriculate at another institution during that year and should relinquish their space on any wait lists for other institutions. Deferral requests must be received by February 1 for students admitted Early Decision and April 25 for students admitted Regular Decision. Transfer students and students admitted from a waiting list are not permitted to defer admission. Deferral requests do not factor into evaluations or committee decisions. Students can generally only defer for up to one year.

International Students

We broadly define international students to be 1) a citizen of a country other than the United States who has been educated abroad; 2) a U.S. citizen educated abroad; or 3) a Foreign National educated in the U.S.. International applicants follow the same application procedure and presenting the same credentials, or the regional equivalent, as domestic candidates. Please submit materials as described under the [Application Requirements for First-Years](#) or [Transfers](#) (no separate International Student application is required). In some cases, additional credentials may be required, as described below.

In addition to any SAT/ACT requirements (see above), students whose primary language is not English or who have not studied at a secondary school for four or more years where the primary language of instruction is English should submit scores from the [Test of English as a Foreign Language \(TOEFL\)](#), the [International English Language Testing System \(IELTS\)](#), the [Duolingo English Test](#) or other [accepted](#) testing agencies.

VISP: The Visiting International Students Program

VISP: The Visiting International Students Program

The [Visiting International Students Program \(VISP\)](#) brings students from across the globe to Barnard for one spring semester in residence at our campus in New York City. Through a limited number of collaborative relationships with international universities, our partners send cohorts of 3-15 undergraduate students to Barnard to spend the spring semester as full-time visiting students. VISP students are fully integrated into the Barnard College academic and co-

curricular community, gaining a broad understanding of how liberal arts institutions in the United States function, exploring the American model of undergraduate education, and studying and researching with Barnard and Columbia University's world-class faculty, while also contributing to the internationalization of the student body.

Transfer Students

Barnard welcomes transfer students in the fall and spring term of each year. Applications for admission will be reviewed according to the following schedule:

Deadline	Notification	Enroll
March 1	mid-May	Fall
November 1	early December	Spring

Each candidate must submit the [Common Application for Transfer Admission](#) and the following credentials: the Barnard Supplement for Transfer Students; an official secondary school transcript; the results of the SAT or ACT (if applying for Spring 2024 or Fall 2024 students may apply under the temporary test-optional policy), and, if appropriate, the TOEFL/IELTS/Duolingo Language Exams; the official transcripts of all college work and a copy of the college catalogue in which the courses taken are clearly marked. Two recommendations are also required: one each from a college faculty member and a college dean or adviser. Transfer applicants may also submit a recommendation from the high school counselor (optional).

The most successful transfer students have both high school and college transcripts with strong outcomes in a rigorous liberal arts curriculum. Courses completed at other accredited colleges and universities, which are similar in content and depth to Barnard courses, may be submitted for transfer credit. Credit for approved work at another institution is applied to Barnard's 121-point graduation requirement for transfers with a maximum of [60 external credits](#) that can be transferred toward a degree at Barnard College. The number of transfer credits accepted by Barnard is determined by the Office of the Registrar; students are notified of their credit status at the time of admission. Credit cannot be granted for courses with grades lower than C-. Online classes taken in spring 2020 and subsequent semesters will be considered for transfer credit if taken prior to a student's matriculation at Barnard. Specific criteria for online courses to be considered for transfer credit can be found on the Registrar's [webpage](#).

Students may not earn transfer credit for online classes taken at other colleges or universities after matriculating at Barnard. Pre-evaluations of transfer credit are not conducted by the College. However, admitted transfer students will receive a transfer credit evaluation indicating transferable credits and satisfied Foundations requirements. Generally, if courses taken at another institution are in alignment with courses offered at Barnard, credit is likely to be awarded but not guaranteed. Barnard College reserves the right to accept or decline transfer of credits based on its specific academic expectations.

After acceptance, academic and general guidance is provided by the advisers to transfer students in the Dean's Office for Advising and Support. For information on financial aid, students should consult with [The Office of Financial Aid](#).

Visiting Students

Undergraduate students who are degree candidates at other colleges may apply for admission as visiting students for one or two semesters.

Students must submit the same credentials as transfer applicants, with the exception of standardized test scores and course descriptions.

Other Degree Credit

The following policies apply to students entering Barnard in Fall 2019 and later:

Advanced Placement exams: Credit limit is 16 credits. Students who earned an upper-level score on an AP exam may receive college credit. (For the specific scores required, please [click here](#) for information for your entering class year.) AP exams cannot satisfy any General education requirements.. Incoming students should have ETS send their official scores to the Barnard Registrar's Office.

International Baccalaureate diploma: Students who earned an International Baccalaureate diploma may receive credit for the number of points indicated on the diploma, up to 16 credits.. For students who did not complete the full IB diploma, credit may be granted for individual Higher Level scores only. (No credit for Subsidiary Level.) IB exams cannot satisfy any General education requirements. Incoming students should have their official diploma or exam scores sent to the Barnard Registrar's Office by the examiner of record.

Select National Examinations and Diplomas: Students who complete the French Baccalaureate, the German Abitur or the Italian Maturità may receive college credit, up to the maximum AP/IB credit limit for their entering class year. We may grant similar credit for the Israeli Bagrut. Each GCE A-level or A2-level grade is individually evaluated for college credit. No credit is given for O-level or AS-level examinations. Credit for other national exams or diplomas will be evaluated for college credit on a case-by-case basis.

Prior to Barnard Credit: Students who have satisfactorily completed college courses before entering Barnard as first-year students may [apply for a maximum of 15 points of degree credit](#). The courses must be intended primarily for college students and taught at the college by members of its faculty and must be in excess of the courses required for the high school diploma. With the exception of Advanced Placement courses overseen by the College Board and International Baccalaureate work, courses taught in high school (whether by specially trained high school teachers or college instructors) will not be credited towards the Barnard degree.

Resumed Education

Former Barnard students who wish to return to the College after an absence of five years or more in order to complete their degree may obtain information from the Office of the Dean of Studies. They can return to campus on a part-time or full-time basis to complete their remaining credits or requirements and earn their degree.

Financial Information

The costs of education at Barnard are met by tuition, income from endowment, current gifts from alumnae and other friends of the College, and grants from foundations, corporations, and government agencies. The College makes every effort to limit the charges to students, but must reserve the right to set tuition and fees at the level necessary for the maintenance of a high quality of instruction. For more information please see the [Bursar's website](#).

FINANCIAL AID

Insofar as possible, Barnard assists qualified students who demonstrate financial need. Barnard does not discriminate against applicants for financial aid on the basis of race, color, creed, national origin, or disability.

Financial aid from the College consists of grants, loans, and opportunities for part-time employment. In addition to providing financial aid from its own funds, i.e., gifts, endowment, and general income, Barnard participates in the following federal programs: the Federal Pell Grant Program, the Federal Supplemental Educational Opportunity Grant Program, the Federal Direct Student Loan Program, and the Federal College Work Study Program. Barnard also participates in the New York State Higher Education Opportunity Program (HEOP) and the New York State TAP Program. Federal and state funds are administered by the College in accordance with government regulations and the College's general policies relating to financial aid. To supplement the above-mentioned financial aid sources, students are urged to research student loan and scholarship/tuition assistance programs and college tuition financing plans. The Bursar's Office also has additional information and applications for payment plans.

A detailed explanation of current College policies and awarding practices may be found on the [Financial Aid website](#).

ACADEMIC POLICIES & PROCEDURES

Academic policies and procedures are determined by the faculty and implemented by the Office of the Registrar, which also lists the [Academic Calendar](#). Please use the left hand menu to navigate academic policies. For additional information, visit the [Registrar's website](#).

Enrollment

Points of Credit per Term

Barnard students must complete 122 points of academic credit to earn the B.A. degree. (Those who enter Barnard as transfer students must complete 121 points of academic credit.) Students therefore need to earn an average of 15 credits—which typically represents 4 to 5 academic courses (each of 3 or more credits)—per term.

All Barnard students are required to be enrolled full time. Full-time enrollment status is defined as a minimum of 12 credits per semester and a minimum of 24 credits over the course of the academic year.

Except in very specific circumstances as described in the Reduced Courseload section below, Barnard students are not permitted to enroll part time.

In a typical semester, students may take a maximum of 19 credits. In certain cases, a student may register for up to 23 credits, subject to their advisor's approval. Students with exceptional circumstances requiring them to enroll in more than 23 credits in a semester must submit a petition to the Committee on Programs and Academic Standing.

Students who live on campus will be required to maintain a minimum of 12 credits unless approved for a Reduced Course Load per the Reduced Course Load policy.

Students who do not complete a minimum of 12 credits for the fall or spring semester and 24 credits for the full academic year may be subject to Academic Review action for insufficient degree progress.

Enrollment Confirmation

Official enrollment confirmation requires both a student's successful registration for at least 12 credits of coursework (unless otherwise permitted to enroll in fewer credits as per the Reduced Courseload policy below) and remittance of Term Bill payment (net of financial aid) by the semester registration/add deadline (end of the second week of classes). Proper remittance will also include students who are up to date on their Term Bill payment plan. Students who have not completed both of these processes by the semester registration/add deadline will be deregistered for courses and, therefore, considered not enrolled for the semester. Students will then automatically be placed on a personal leave of absence and should be aware of [leave implications and procedures](#).

Reduced Course Load Policy

Graduating seniors who need fewer than twelve credits to complete their degree – and who have already completed at least four full-time semesters in academic residence – may be approved to take a minimum of nine credit hours. Because Barnard students are charged

a flat rate of tuition per semester, reducing one's course load to nine credits will not change the tuition owed in the last semester. International students must consult with International Student Services in advance to determine eligibility. Students who meet these criteria and are approved to be enrolled in nine credits are still eligible to live in Barnard's residence halls.

If any student who is not an eligible senior needs to register for fewer than twelve credits for disability-related reasons, they should reach out to CARDS to discuss the reduced course load process at cards@barnard.edu.

Course Registration

All students are required to register for classes online by the specified deadlines for each semester as posted in the Academic Calendar. In order to receive credit and a final grade for a class, a student must be officially registered for it; class attendance and/or appearance on a course's waitlist are not considered official registration. Students must obtain final approval of their course schedules from their advisor by the close of registration each semester.

Columbia University Courses

Many courses offered in other divisions of the University are open to qualified Barnard students, including most Columbia University undergraduate courses with course numbers of 4000 and below. Students can view any restrictions or special approvals required by looking at the course listing in the Columbia Directory of Classes. Barnard students register for most fall or spring Columbia University courses using Barnard's registration system and they will appear on a student's Barnard transcript.

Courses offered through Columbia University's graduate and professional schools may require additional approvals, and limitations on the number of courses allowed may apply. Students should reference the cross-registration information on the relevant Columbia school's webpage. Barnard students are generally not eligible to enroll in courses offered by Columbia's Medical School (including Nursing), Law School, School of Social Work, or fall/spring courses offered by the School of Professional Studies. Teachers College courses require special permission from the Barnard Dean for Academic Planning & Class Advising, as well as the payment of additional tuition.

Adding Courses

Students may add courses online during the registration period, up to the maximum number of allowed credits. Adding credits beyond the allowable limit requires the approval of the student's advisor. Courses may not be added after the registration deadline for each term. Please refer to the [Academic Calendar](#) for up-to-date registration deadlines. Late registrations require approval by the Committee on Programs and Academic Standing and will be assessed additional fees.

Course Drops & Withdrawals

Courses may be dropped online before the deadline published in the [Academic Calendar](#). The request must be approved by the student's advisor. Courses dropped by the deadline will not be recorded on the permanent transcript.

If withdrawal from a course is approved after the deadline to drop and by the deadline to withdraw, the course will be recorded on the permanent transcript with a grade of W (Withdrawal).

No adjustment of fees (including any laboratory or course fees) is made for any course dropped after the registration deadline.

A student may not drop below 12 points without the approval of the Center for Accessibility Resources and Disability Services or without approval per the Reduced Course Load policy.

Adjustment of Fees and Refunds for Changing Registration

Because Barnard students are charged a flat rate of tuition for full-time study, the adding or dropping of individual courses does not change the tuition owed for most students. There are a relatively small number of courses with course-specific fees that may change if courses are added or dropped. If a student changes their registration and the tuition called for is lower than the amount they have already paid, they will be credited the excess only if the change in their registration is made by the registration deadline (the second Friday of the full 14-week semester). If the student's new registration calls for higher tuition, the student is responsible for paying the additional charges promptly.

Schedule of Classes and Room Assignments

Class times and room numbers are published in the online [Directory of Classes](#), which is updated every night. Additional course materials are accessible through the CourseWorks page for the class. Any students with technical difficulties should contact the IMATS technology team at courseworks@barnard.edu.

Students needing wheelchair-accessible classrooms should register with the [Center for Accessibility Resources & Disability Services \(CARDS\)](#) as soon as possible prior to the beginning of the term to make them aware of this need.

Summer Courses

Barnard students can apply a maximum of 16 credits of summer coursework towards the degree, including both Barnard and non-Barnard courses. Students may register for a maximum of 2 courses totaling 8 credits in a single summer session, with a maximum of 16 credits per summer term (including both Barnard and non-Barnard courses).

Barnard offers a select group of classes in its summer session, both on and off-campus, which are open to Barnard and Columbia students, as well as qualified visiting students from other colleges and pre-baccalaureate students. The summer session is billed separately from students' fall and spring tuition. The courses and grades will appear as institutional credit on Barnard student transcripts and will be included in the Barnard GPA.

Credit for summer courses taken at other accredited institutions (including Columbia summer session) requires approval by a student's adviser and/or department chair and the Registrar's Office. If approved, these courses will be treated as transfer credit; the courses will display on the Barnard transcript but will not be counted towards the Barnard GPA calculation. Barnard's standard policies around transfer credit apply, including the requirement that a student must earn a grade of C- or better in the course in order to transfer credit. Additional regulations also apply due to the uniqueness of summer sessions; for instance, the College's standard policy is that summer courses must meet for at least 35 hours and at least 5 weeks to be eligible for Barnard

credit. In general, Barnard does not grant credit for online courses. A supplemental fee is charged by Barnard to transfer summer credits from other institution(s), including Columbia. Further regulations around summer credit can be found on the Registrar's Office webpage.

Concurrent Enrollment

Students may not be enrolled in courses at Barnard and at another higher education institution concurrently during the fall and spring terms. Exceptions are made for students accepted into Barnard's existing dual enrollment programs, including the Jewish Theological Seminary double degree programs, the 4+1 Pathways programs, as well as students registering under Barnard's existing cross-registration agreements (including the cross-registration agreement with programs within Columbia University). Barnard students may register at other accredited higher education institutions as visiting, non-degree-seeking students during the summer term, but must have the courses approved to ensure that the credits will transfer. Students on a leave of absence from Barnard may enroll at another institution for credit with approval from the Registrar's Office, with a maximum of nine credits per semester. (Students on required leave of absence may be required to transfer more credit and should reference the terms of their required leave.)

Online Courses

Students may not earn transfer credit for online classes taken at other colleges or universities after matriculating at Barnard. This includes credit taken in approved study abroad or exchange programs; credit taken while on leave of absence from the College; and credit taken during summer or winter sessions.

Prior to Barnard credit for students entering as first-year students

First-year students with a record of prior coursework taken as non-matriculants at an accredited college in the United States may request up to 15 points of transfer credit (the courses must be intended primarily for college students and taught at the college by members of its faculty, and must be in excess of the courses required for the high school diploma). Such work will be evaluated after the student has completed 12 points at Barnard.

Attendance

Students are expected to attend classes regularly. Frequent or prolonged absences from classes may cause a student to forfeit the right to complete coursework or to take final examinations. Students who are experiencing academic challenges should be in touch with their class dean as soon as possible.

Policy on Religious Holidays

It is the policy of Barnard College to respect the religious beliefs of community members. In compliance with New York State law, students who are absent from school because of religious beliefs will be given an equivalent opportunity to register for classes or make up any examination, study, or work requirements that they may have missed. No student will be penalized for absence due to religious beliefs, and alternative means will be sought for satisfying the academic requirements involved. If a suitable arrangement cannot be worked out between the student and the instructor involved, the student should

consult the appropriate class dean. If an additional appeal is needed, it may be taken to the Provost.

Those responsible for scheduling of academic activities, events, or essential services are expected to avoid conflict with religious holidays as much as possible.

Academic Residency Requirement

For the purposes of this policy, “in academic residence” refers to a student taking coursework at Barnard or Columbia (as opposed to another institution), including approved study abroad or exchange programs, during the fall or spring terms.

After matriculating at Barnard, students are expected to remain continuously enrolled with the exception of students on an approved leave of absence. Students who enter Barnard as incoming first-year students should plan to be enrolled full-time and in academic residence for eight semesters (in order to complete their degree requirements); however, a minimum of seven full-time fall/spring semesters in academic residence is required for these students. Transfer students are required to complete at least 60 academic credits at Barnard and a minimum of four full-time fall/spring semesters in academic residence. All students must be in academic residence for their final full-time semester.

Students who expect to meet the requirements of the degree before their eighth semester must submit a graduation application by the deadline for their desired degree conferral date. The College does not confer degrees for students who do not apply to graduate by the relevant deadline.

Students who do not meet the continuous enrollment expectation will be administratively withdrawn from the College after four consecutive fall/spring semesters of non-enrollment. This includes students who do not return from approved leave of absence after four consecutive fall/spring semesters away. Students with personal or medical circumstances requiring them to exceed four consecutive semesters of non-enrollment may petition for an exception to the faculty Committee on Programs and Academic Standing (CPAS).

Campus Housing Requirements

Students who enroll at Barnard as first-year students and need more than the expected eight

semesters to complete the degree may not be eligible for campus housing after completion of the eighth semester. Students with approved reduced course loads (including final semester seniors) may be registered for no fewer than nine credits in order to remain in campus housing.

Classification of Students

Students are classified as follows:

Matriculated

- First-Year (fewer than 24 points)
- Sophomore (24-51 points)
- (Note: A student who enters as a first-year remains a first-year for the full academic year, regardless of points earned)
- Junior (52-85 points and a declared major)
- Senior (86 or more points)

- Unclassified (transfer students who have not yet been assigned credit)

Non-matriculated

- Other college degree candidates (visiting students)
- Barnard alumnae auditing courses
- Barnard alumnae taking courses for credit
- Any other student who is not a degree candidate

Academic Standing & Degree Progress

A Barnard student is in good academic standing as long as they are making sufficient degree progress.

The academic standing of all students is reviewed at the end of each semester. A student whose term or cumulative GPA falls below 2.0, or who does not satisfactorily complete 12 or more credits in a term, or who receives 3 or more incompletes or withdrawal grades in a given term may be placed on academic probation. A student who does not successfully complete a minimum of 12 credits in a term may be given an insufficient degree progress warning. (Note: students who have not made satisfactory academic progress, or SAP (see below), at the end of an academic year may be placed on Financial Aid Warning or Financial Aid Probation in accordance with that office’s processes.) Students who have been approved for a reduced course load and earn a 2.0 GPA or higher in a term will remain in good standing.

A student whose term or cumulative GPA falls below 2.0 for two consecutive semesters, or who fails to complete 24 institutional credits at the end of every academic year at minimum, may be required to take a leave of absence.

Consequences of not being in Good Academic Standing

At the end of each semester, after student grades have been reviewed, a student who is found

not to be in good academic standing may face the following consequences:

- a) Academic Probation
- b) Required Leave of Absence
- c) Insufficient Degree Progress Warning

FERPA and Parental/Legal Guardian Notification

Barnard will not notify parent(s) or legal guardian(s) of a change in a student’s academic standing status without written consent from the student, in compliance with the Family Educational Rights and Privacy Act (FERPA). Students may submit written consent in the form of a FERPA waiver to the Dean’s Office in order to inform their parent(s) or legal guardian(s). Information on this consent process is contained in the Academic Standing Letter students receive.

Appeals

Students may only appeal a required leave of absence. Appeal requests are considered by the faculty Committee on Programs and Academic Standing. Students wishing to appeal a required leave of absence may do so only in these cases:

- a) The student would like the faculty Committee on Programs and Academic Standing to consider reducing the length of the required

leave of absence or a particular requirement for that leave (for example, reducing required leave of absence from one year to one semester, or asking not to be required to take coursework elsewhere);

b) The student would like the Faculty Committee on Programs and Academic Standing to reconsider the decision or to modify a required leave of absence decision because the student has new information regarding their academic progress that they believe may be relevant to the decision-making process (e.g., a grade change or unfinished work having been turned in).

Appeals should be made in writing to the Committee on Programs and Academic Standing. Due to the short period between semesters, students who have been notified of their academic standing in January (after the fall semester) will have 48 hours after receiving the emailed letter from the Dean for Academic Planning & Class Advising to submit an appeal; students who have been notified in June (after the spring semester) will have seven (7) days from the date on the emailed notification from the Deans' Office for Advising and Support to submit an appeal. This appeal should include not only the reasons for the appeal, but also the student's proposed academic plan for moving forward, an explanation of why a decision might need reconsideration, and plans for returning to good academic standing. Students may speak with their Class Dean for guidance before submitting the appeal. Appeals are written; no appeals are made in person.

Confirming Graduation Status

Students must officially notify the Registrar that they expect to have completed all requirements for the degree by submitting the online graduation application by the deadline for their intended degree date. Specific instructions and deadlines will be available through the Registrar. The College does not confer degrees for students who do not apply to graduate by the relevant deadline.

Degrees are granted in May, October, and February. Graduation ceremonies are held in May.

Examinations

Language Placement Examinations

The foreign language requirement can be met by completing the required courses at Barnard and/or Columbia (for individual languages see departmental curriculum statements), or, for transfer students, by having completed acceptable qualifying language courses.

Transfer Students

Transfer students who have no AP score or previous college language courses must take a placement test, if they wish to continue with a particular language. Transfer students who are not required to take an examination are notified of language placement along with the evaluation of their transfer credit.

First-Year Students

First-year students are placed on the basis of their CEEB or AP scores. Those with no scores who wish to continue languages studied in high school take placement examinations. The Class Dean advises all new first-year students on their language requirements.

Summer School Language Courses

Students, other than incoming transfer or first-year students, who take summer language courses and wish to use them to satisfy or

determine placement in their continuing language studies may be required to secure departmental approval to receive degree credit and continue at a higher level. Students should also reference the policies specific to receiving credit for summer coursework taken at other schools, including Columbia (see Summer Courses under [Enrollment](#)).

Students who do not wish to continue with a language in which they have been placed may begin the study of a new language.

Please consult the individual language department for information about Language Placement Examinations and results.

Other Departmental Placement Examinations

Students may obtain placement in certain courses by means of departmental placement examinations (for example, in the Mathematics and Physics departments). Information and applications for the examinations are available in departmental offices, and deadlines are particular to each department.

Make-Up Examinations During the Term

Instructors are not required to give make-up examinations to students absent from previously announced tests during the term. An instructor who is willing to give a make-up test may request a report of illness or acceptable evidence of other extenuating circumstances from the appropriate class dean in the Dean of Studies Office.

Final Examinations

No class meetings will be held on required reading days as set forth in the College's Academic Calendar. The dates for final examinations, given at the end of each term, are published in the Academic Calendar. Exact times and room numbers for individual examinations are posted on the website of the Office of the Registrar at least four weeks in advance of final examinations.

Barnard examinations are given under the Honor Code, which states that students engage with integrity in all of their academic pursuits, including the proper use and care for all print, electronic, or other academic resources. Faculty members are expected to report any violation to the Deans' Office of Advising and Support.

Students who wish to leave the room before the end of the examination period must submit all exam materials to the instructor/proctor. If students become ill during the course of the examination, they must notify the instructor/proctor and call Primary Care Health Services immediately to be seen as soon as possible. If less than an hour of a three-hour exam (or fewer than 40 minutes of a two-hour exam) has expired, the student is eligible to request a deferred examination. If a student continues the exam beyond this point, they will be graded on the work they have completed, with the uncompleted work scored as zero.

Deferred Final Examinations

Deferred final examinations, given in September and January (see College Calendar), are permitted only for those students who were absent from the regular examinations for reasons of illness or emergency and who have received authorization from their instructors and the Deans' Office for Advising and Support.

Requests for absence from final exams for reasons of health or other emergencies must be reported to the instructor and to a student's

class dean on the day of the examination and then a [Request for Deferred Exam form](#) should be submitted to the Registrar's Office.

Examinations missed in December are to be taken the following January or, in cases of prolonged illness, in September of the same year. Those missed in May are to be taken in September of the same year.

Beginning in academic year 2021-2022, students who are approved to take a deferred final exam will initially receive a temporary grade of X for the class. Once the exam is taken and graded, the final letter grade will replace the X on the student transcript (e.g. B+).

If the exam is not taken on the designated dates, without a compelling and valid excuse, the student will receive a grade with the missing work averaged in as an F. This grade will be automatically posted by the Registrar's Office four weeks after the official deferred exam date for the semester.

Examinations for Students with Disabilities

Individual accommodations can be made for disabled students unable to take examinations in the usual manner. Disabled students are normally expected to take their exams with the rest of the class, with disability-related modifications as needed. Students with disabilities who require nonstandard exam administration should consult with their instructors and the Center for Accessibility Resources & Disability Services about reasonable accommodations. Eligible students should follow CARDS procedures regarding requesting accommodations and scheduling accommodated exams with CARDS.

Grading & Academic Honors

Grading System

Academic standing and eligibility for graduation are determined by both the number of credits completed and the grades achieved.

Barnard's grading policies differ from those of other schools at the University. The applicable grading system and policies are determined by the college in which the student is matriculated (not those of the University division offering the course).

The system used for Barnard students is described below:

A+, A, A-	Excellent
B+, B, B-	Good
C+, C	Satisfactory
C-, D	Unsatisfactory but passing
F	Failure
P	Passed without a specific grade on student's election of P/D/F option
P*	Passed in a course for which only a grade of P or F is allowed
I	Incomplete
X	Absence from final examination
Y	For the first half of a two-semester course in which the grade for the second semester is the grade for the entire course

W	Approved withdrawal after "drop" deadline
UW	Withdrawal from a course without official notification to Registrar

Pass/Fail grades are mandatory for all students in certain courses, e.g., physical education, First-year Writing and First-year Seminar. Individual students can elect Pass/Fail grading in other courses using the Pass/D/Fail option described below.

At the end of every semester, each student's term GPA and cumulative GPA are calculated. To remain in good academic standing, Barnard students must maintain both a term and cumulative GPA of 2.0. The GPA may be used to determine eligibility for academic and co-curricular programs as well as for awards. A student cannot be recommended for graduation with a cumulative average below 2.0.

For GPA calculations, letter grades are converted to the following numerical values:

A+ = 4.3
A = 4.0
A- = 3.7
B+ = 3.3
B = 3.0
B- = 2.7
C+ = 2.3
C = 2.0
C- = 1.7
D = 1.0
F = 0

Grades of P, P*, W, and UW are excluded from the GPA calculation.

Grades of I and X are non-final grades. Once a final grade is determined, it will factor into the GPA like any other grade.

At the end of each term all student records are examined. Generally, only those students who have completed 12 points with cumulative averages of 2.0 or above are permitted to remain at Barnard. Students whose work falls below the cumulative average of 2.0 may be permitted to continue at the college with probationary conditions at the discretion of the Committee on Programs and Academic Standing.

Courses in which the student receives the grade of D may not be counted toward the major requirement or the minor option. Courses graded D that are retaken for a higher grade will not receive degree credit when repeated, but can be used to satisfy a major or minor requirement. Both enrollments and grades appear on the transcript, but the grade received the second time does not count in the GPA.

Students who retake failed courses will see the course twice on their transcript and both grades will factor into the GPA.

Pass/D/Fail Option

A student may elect the Pass/D/Fail (P/D/F) option by submitting a Request for Pass/D/Fail in [SSOL](#), before the deadline published in the Academic Calendar. A student cannot elect or revoke the P/D/Fail option after the deadline, but a student can request that a P grade be uncovered (see below). The complete rules and instructions are available on the [Registrar's Office website](#).

Under the Pass/D/Fail option, a student is held responsible for fulfilling all course requirements. The instructor is not informed when a student

elects the Pass/D/Fail option. The instructor will assign a letter grade, which will be converted to P/D/F on a student's Barnard transcript as follows:

- A letter grade of A+ through C- will appear on the transcript as a P, and will not count in the grade point average (GPA)
- A letter grade of D will appear on the transcript as a D, and will count in the GPA
- A letter grade of F will appear on the transcript as an F, and will count in the GPA

P/D/F Limitations

Beginning fall 2023, Barnard students can elect P/D/F grading in one course per term. This is in addition to any courses with mandatory pass/fail grading.

The P/D/F option cannot be elected for any course designated to count toward the major or the minor. (As a one-time exception, students were able to elect P/D/F grading for one fall 2021 class to be used towards either a major or a minor requirement.) However, the P/D/F option may be elected for a course that is counting towards a student's general education requirements.

Please note that dean's list eligibility requires a minimum of 12 letter-graded points per semester. A class in which a student elects P/D/F grading will not count towards that minimum.

Students should also make themselves aware of any financial-aid related limitations to electing pass/fail grading by consulting the [Financial Aid Office](#).

Students who may be facing extenuating circumstances in a particular semester can petition to elect P/D/F grading in a second course, by speaking with their class dean and then submitting a petition to the College's Committee on Programs and Academic Standing (CPAS).

CPAS will not generally approve any petition that would result in a student having fewer than six credits of coursework that is either standard letter-graded or mandatory pass/fail, unless a student has been previously approved for a reduced courseload (please refer to the reduced courseload policy for more information about this process). Students who petition to elect P/D/F in an additional class should be aware that this may disqualify them from consideration for dean's list for that semester. Students with ongoing disability-related challenges can also be in touch with CARDS to discuss reasonable academic accommodations.

Previous P/D/F policy (prior to fall 2023)

Prior to fall 2023, students were limited to 23 credits of elected P/D/F coursework over the course of their Barnard career. (For students who entered as incoming transfers, the maximum was 22 credits.) Academic Year 2020-21 classes in which students elected Pass/D/Fail grading were excluded from the overall P/D/F credit maximum. As of fall 2023, Barnard students may not apply this previous P/D/F policy to their academic records for current or future terms.

Uncovering a P grade

After final grades become available for the semester, students may uncover their letter grade in a course in which they initially elected P/D/F grading. The deadline to request the uncovering is the registration deadline of the semester following the one in which the P/D/F course

was taken (e.g. the second Friday of the following semester), as noted on the Academic Calendar. A class in which the P grade is uncovered is still counted towards the one course per term P/D/F limit.

Please note that graduating seniors cannot uncover P/D/F grades in their final semester. However, if a graduating senior elected P/D/F in a course that is required for the major or minor, the Registrar's Office will administratively uncover the grade at the point of graduation. This may affect a student's final cumulative or term GPA, as well as dean's list eligibility.

Incompletes

Students with compelling circumstances who are unable to complete a course due to outstanding coursework (other than the final exam) may request a grade of Incomplete from their instructor. The student should submit to the Registrar's Office an official Request for an Incomplete Grade form, approved by their instructor, by the last day of the Reading Period for the class. (In a course without a final examination, the deadline is the day before the final paper is due if that date precedes the last day of the Reading Period.)

The remaining coursework must be submitted to the instructor by the Incomplete deadline, which is four months after the end of the term (for fall classes, the deadline is April 15; for spring classes, the deadline is the first day of classes in the following fall term) or by the deadline set by the instructor if earlier. If the remaining work is not submitted by the deadline, the student will receive a grade with the missing work averaged in as an F. This grade will be automatically posted by the Registrar's Office four weeks after the final incomplete deadline for the semester.

Beginning in academic year 2021-2022, the student will initially receive a temporary grade of I for the class. Once the work is received and graded, the final letter grade will replace the I on the student transcript (e.g. B+).

If a student has completed all coursework except the final exam, they can seek approval for a [Deferred Exam](#).

Transcripts

Students can view their grades and unofficial transcripts in the Barnard student portal.

All copies of official transcripts are sent only at the request of the student in compliance with FERPA, and are subject to the \$7.40 fee and five business day turnaround time. Transcripts can be sent by FedEx or Express Mail for an additional fee. Transcripts can be sent in paper or secure pdf format. Students and alumnae can request transcripts [here](#). Barnard cannot send copies of transcripts from other schools that the student attended; they must be requested directly from the other institution.

Dean's List

Effective fall 2013: To be eligible for Dean's List, a student must be enrolled at Barnard on the Morningside Heights campus (or on a Columbia program abroad) and complete at least 12 letter-graded points with a minimum grade point average of 3.60 for the term. (P-graded points are excluded.) The grade point average will be based on all letter grades in the A to F range.

Beginning with academic year 2020-2021, incoming first-years are required to complete at least 9 letter-graded points with a minimum

grade point average of 3.60 for the term. (P-graded points are excluded.)

Seniors who are approved to take less than 12 credits (by exception in their final semester), must have 9 credits of letter-graded coursework to be eligible for Dean's List.

Spring 2020: Due to the COVID-19 pandemic and the mandatory pass/fail grading policy, there was no dean's list for spring 2020.

Prior to fall 2013: To be eligible for Dean's List, a student must be enrolled at Barnard for both terms and complete at least 12 letter-graded points each term of an academic year with a minimum grade point average of 3.4 for the academic year. (P-graded points are excluded.) The grade point average will be based on all letter grades in the A to F range.

Note: Dean's list notations are not awarded for summer terms.

College Honors

The Faculty awards honors to students who complete work for the degree with distinction (*cum laude*), with high distinction (*magna cum laude*), and with highest distinction (*summa cum laude*).

Honors are determined by a student's final cumulative Barnard GPA, with the top 5 percent of the graduating class being awarded *summa cum laude*, the next 10 percent being awarded *magna cum laude*, and the remaining 20 percent awarded *cum laude*.

The minimum grade point averages that determine eligibility for each category of Latin Honors may change with each May's graduating class. Those same criteria will be applied to the following February and October graduating classes. (For example, the criteria for each category of honors for the May 2023 class will also be applied to the October 2023 and February 2024 graduating classes.)

Beginning with the February and May 2022 graduating classes, study at other institutions (transfer, summer school, study leave) will not be factored into a student's Latin honors eligibility.

Latin honors appear on both the transcript and the diploma.

Departmental honors are awarded for distinguished work in the major to no more than 20% of graduates, as nominated by their major departments, and conferred by the Committee on Honors. Departmental honors display on student transcripts but not diplomas.

Phi Beta Kappa

The Barnard section of the Columbia University chapter of Phi Beta Kappa was founded in 1901. Election to the national honor society is a recognition of scholarship, and Barnard students of exceptionally high standing are eligible. Junior election will require a minimum of 86 completed points, and senior election, 102. Students do not apply for membership; they are elected by Barnard faculty members who are themselves members of Phi Beta Kappa.

Eligibility for Student Government Offices

To be a candidate for election to a student government office, a student must be in good academic standing and free of disciplinary action for at least one year.

Eligibility for Intercollegiate Athletics

Any student at Barnard College, Columbia College, the Fu Foundation School of Engineering and Applied Science, or the School of General Studies who is pursuing the undergraduate program or a combined program toward a first degree is eligible for intercollegiate athletics, provided that certain conditions are met. To be eligible for athletic activities, a student must:

- be a candidate for a bachelor's degree;
- be registered for at least 12 points of credit per semester;
- be in satisfactory academic standing;
- have passed by the beginning of the academic year 24 points if in the second year, 52 points if in the third year, or 86 points if in the fourth year;
- have attended the University for not more than eight terms;
- not have completed the requirements for a bachelor's degree.

An eligibility form must be filed with the Department of Intercollegiate Athletics, which consults with the Registrar to determine eligibility.

Academic Advising

Barnard's model of shared advising, where faculty and administrators advise pre-major students, is one of the hallmarks of the Barnard experience. Although the responsibility of knowing the degree requirements rests with each student, advisers offer support, guidance, and a sounding board for students, helping them set goals and priorities, select courses, and understand the curriculum. Class Deans in the Dean of the College division also offer support, especially if students encounter issues or have concerns that might extend beyond the classroom.

Class Deans and Advisers

Prior to matriculation, the First-Year Team communicates academic planning and registration information to new students via email, virtual meetings and also the First-Year Blog. First-year students are encouraged to subscribe to the First-Year Blog and may submit any questions they have to first-year@barnard.edu. Students can enroll in their First-Year Experience courses over the summer, and the formal finalization of courses happens in the fall, during the Orientation and the first two weeks of class. Assistance in planning courses of study is given to first-year students and sophomores by their academic advisers with whom students are expected to schedule appointments for individual advising throughout the year.

By the second semester of sophomore year, each student chooses a major field in consultation with the Sophomore Class Dean, an adviser, and the academic department. From then on, the major adviser guides advanced study for the major.

Students are responsible for completing all degree requirements and completing 122 credits in order to graduate. Students who have completed the requisite number of credits and all of their Foundations and major requirements are expected to graduate.

Transfer Students

Incoming transfer students are assisted by the transfer advisers and the Transfer Advising Dean in planning their courses of study and selecting majors. Advising sessions are scheduled prior to the students' arrival on campus and during Orientation, and individual

appointments may be arranged throughout the academic year. Transfer students who enter with junior class standing are guided by both transfer and major advisers during their first Barnard semester.

International Students

The Office of International Student Services (ISS) supports all international students from the moment they have been accepted up through graduation and beyond. In addition to providing advising support, ISS provides programming for international students, as well as all information and support pertaining to visas, I-20s, and other travel matters.

Study Abroad

Students who wish to study abroad for credit toward the Barnard degree are urged to meet with Barnard Global advisers and discuss their plans with their pre/major adviser early on. In order to be eligible, students must submit the Preliminary Barnard application by March 15th of the academic year before they plan to go abroad.

The Preliminary Barnard application requires students to request an approval by their pre-major or major advisor. The student chooses their current advisor from a drop down menu and the link to the approval questionnaire is sent to their advisor via email from studyabroad@barnard.edu. The questionnaire is brief and does not require a letter of recommendation. Students may follow up with their advisor to confirm the approval questionnaire has been completed on their behalf. While the approval questionnaire can be submitted by the advisor after the March 15th deadline, the student's application will not be reviewed by Barnard Global until it is complete.

Students may later request an academic letter of recommendation from a professor for the purpose of applying directly to their study abroad program, if one is required.

If a student requests their pre-major/major advisor to complete a form for their program application which verifies they are in good standing, please check to see if it instructs them to obtain this from their study abroad advisor. If so, please do not complete it and instead have them review the [instructions for requesting an approval form](#) or contact studyabroad@barnard.edu.

Honor Code

The Honor Code, instituted at Barnard in 1912, governs all aspects of academic life and is enforced by an Honor Board that has a membership of students and faculty members, advised by the Dean for Academic Planning and Class Advising.

Each student who registers at Barnard agrees to maintain the Honor Code:

Approved by the student body in 1912 and updated in 2016, the Code states:

We, the students of Barnard College, resolve to uphold the honor of the College by engaging with integrity in all of our academic pursuits. We affirm that academic integrity is the honorable creation and presentation of our own work. We acknowledge that it is our responsibility to seek clarification of proper forms of collaboration and use of academic resources in all assignments or exams. We consider academic integrity to include the proper use and care for all print, electronic, or other academic resources. We will respect the rights of others to engage in pursuit of learning in order to uphold our

commitment to honor. We pledge to do all that is in our power to create a spirit of honesty and honor for its own sake.

Graduate School Advising, Combined Plan Programs, 4+ 1

Students interested in study beyond the undergraduate level—including medical school, law school, business school, master's programs, doctoral programs, and more—as well as those interested in pursuing an Advanced 4+ 1 Pathway with Columbia graduate schools (available at the Fu Foundation School of Engineering and Applied Sciences, Mailman School of Public Health, Harriman Institute, School of International and Public Administration, and Quantitative Methods in Social Sciences Program)—should consult with Beyond Barnard and with appropriate faculty advisers.

Note that students interested in medical school or any other training for the health professions (vet, nursing, pharmacy, etc.), should consult the Health Professions Advisor at Beyond Barnard. Applications to medical school require the completion of courses that train students in core competencies necessary for success on the MCAT and in medical school. To that end, students should work with their academic advisers to plan on taking a full year of Biology, a full year of Chemistry and a full year of Organic Chemistry (following Barnard's entire Chem sequence, OR Columbia's, but not both), a full year of Physics, requisite Calculus courses, one semester of Biochemistry, as well as one Psychology course, two writing-intensive courses in a humanities field (preferably English), and other coursework as well. For additional advising support, students should contact Beyond Barnard.

Honors

The following awards, administered according to the provisions of their respective donors, were established to honor students who have shown exceptional distinction in their studies. Students do not apply for these awards; rather, recipients are selected by appropriate Faculty departments and committees.

Fellowships

Alpha Zeta Club Graduate Scholarship (1936)

Student Experience and Engagement

The mission of the Department of Student Experience and Engagement (SEE) is to create accessible, dynamic, thought-provoking co-curricular opportunities for and in partnership with Barnard students to explore purposeful involvement, self-discovery, and the development of meaningful relationships with their peers and the greater Barnard community. As an integral part of the student experience, SEE aims to connect students not only to resources available within the Department but all resources available at both Barnard and Columbia. Students who engage with SEE will strengthen their leadership skills to transform themselves, Barnard, and their communities both now and in the future.

Vision:

Student Experience and Engagement envisions a Barnard where every student feels welcome, supported, is engaged, and becomes an agent for social change.

Values:

Student Experience and Engagement values the following:

- # Knowledge
- # Equality
- # Community
- # Integrity
- # Responsibility
- # Social Justice

Functional Areas:

- # Campus-Wide Programming
 - # Arts Education
 - # McAC *Student-Programming Board
- # Experiential Learning Initiatives
- # Glicker-Milstein Theatre (GMT)
- # Identity & Inclusion Initiatives
- # Leadership Programs
- # New Student Orientation (NSOP)
- # Recognized Club and Organization Support and Management
- # Student Leadership Group Advising
 - # Student Government Association (SGA)
 - # Governing Board at Barnard (GBB)

Student Experience and Engagement serves the entire Barnard community including students, faculty, staff, administrators, and parents and families. As the hub for student engagement, SEE is a great place to both promote and learn about what is going on in the Barnard community. In partnership with the Division of Campus Life and Student Engagement, SEE will do the following;

- # Encourage deep consideration of ideas, interests, and needs;
- # Advise students on the breadth of College resources to leverage during their experience at Barnard;
- # Connect students to departments and individuals to help them reach their goals;
- # Celebrate student accomplishments; and
- # Share assessments of how the Department has done this work

Campus Organizations

Campus Organizations

The Student Leadership Collective (SLC) comprises the Barnard Student Government Association (SGA), the Governing Board at Barnard, and the McIntosh Activities Council (McAC). The SLC was created to recognize the distinct and important roles and responsibilities of each organization on campus: SGA are elected officers who represent students' concerns; GBB governs student clubs and supports student leaders, and McAC plans campus events for the Barnard community. The Student Leadership Collective Office is located in the Diana Center Anna Quindlen Room (inside Liz's Place, Diana Center 1st Floor).

- The Student Government Association of Barnard College (SGA) aims to facilitate the expression of opinions on matters affecting the Barnard community through active communication between students, administration and faculty. With various forums for collaboration, such as committees and weekly Representative Council meetings, SGA strives to promote open dialogue and action that will enhance student life at Barnard College. All Barnard College students, by virtue of having paid student activities fees, are members of the SGA.
- The Governing Board at Barnard (GBB) upholds the values of Barnard College by promoting the personal and intellectual development of students as leaders. We hold GBB clubs and their members to the high expectations of Barnard College: rigorous standards, self-awareness, holistic learning, and social accountability. Reflective of the Barnard mission statement, GBB believes that participation and leadership in student clubs will empower students "to achieve the personal strength that will enable them to meet the challenges they will encounter throughout their lives." We strive to provide a strong sense of community and dedication to student life on Barnard's campus.
- The McIntosh Activities Council (McAC) is Barnard's programming board and plans some of annual campus traditions including Big Sub, Midnight Breakfast, the Emily Gregory Dinner, and Spirit Week and the Barnard Greek Games.

Sports and Athletics

The Columbia University/Barnard College Athletic Consortium (Division I of the NCAA) sponsors 16 women's varsity teams, including archery, basketball, cross country, fencing, field hockey, golf, lacrosse, soccer, softball, squash, swimming and diving, tennis, indoor and outdoor track

and field, volleyball and rowing. The Athletic Consortium is just one of three in the nation and the only one on a Division I level. Students at Barnard College along with women enrolled at the undergraduate divisions of Columbia University have the opportunity to compete on all university-wide teams. Scheduled competition includes the Ivy League, the metropolitan area, the Eastern region, and national tournaments. Individuals and teams have the opportunity to advance to regional and national competition within the ECAC and NCAA..

Honor Board and Honor Code

The Honor Code, instituted at Barnard in 1912, governs all aspects of academic life and is enforced by an Honor Board that has a membership of students and faculty members, advised by the Dean of Studies Office. The Judicial Council of undergraduates, faculty, and administrators recommends disciplinary action for non-academic offenses and acts on appeals of academic disciplinary sanctions determined by the Honor Board. A more complete explanation of the system may be found online.

Each student who registers at Barnard agrees to maintain the Honor Code:

Approved by the student body in 1912 and updated in 2016, the Code states:

We, the students of Barnard College, resolve to uphold the honor of the College by engaging with integrity in all of our academic pursuits. We affirm that academic integrity is the honorable creation and presentation of our own work. We acknowledge that it is our responsibility to seek clarification of proper forms of collaboration and use of academic resources in all assignments or exams. We consider academic integrity to include the proper use and care for all print, electronic, or other academic resources. We will respect the rights of others to engage in pursuit of learning in order to uphold our commitment to honor. We pledge to do all that is in our power to create a spirit of honesty and honor for its own sake.

Enrollment in the College, award of academic credit, and conferral of the degree are subject to disciplinary powers vested by the Barnard Board of Trustees in appropriate officers of instruction, administration, and in College committees.

Residential Life

Barnard maintains a diversified residential program. Residential options include traditional corridor-style and suite-style rooms in College-owned or rented buildings on or near to campus. On average, the number of first-year students in College housing is 98%, while the average residency rate among upperclass students is 78%. In a cooperative exchange with the Columbia Housing office, a limited number of Barnard and Columbia upperclass students participate in a housing exchange program.

Residence Halls

All Barnard College owned or operated residence halls are completely smoke-free. Under the leadership of the Director for Residential Life and the Director for Housing & Non-Residential Support, the College provides substantial supervision of student life in the residence halls. Buildings are directly managed by Community Directors (CD) or Residential Life Coordinators (RLC) and students receive additional support from Resident Assistants (RA). The Barnard CARES

Community Safety office provides 24-hour Access Attendant coverage at the residence hall front desks and regular security guard patrols.

Brooks, Hewitt, Reid, and Sulzberger Halls make up "The Quad" at the south end of the campus. First Year students are assigned to singles, doubles, triples, and quad rooms in all four buildings. Upperclass students are assigned to singles & doubles in Hewitt and the higher floors of Sulzberger (referred to as "Sulzberger Tower").

A number of residence halls provide housing for upperclass students near to the campus.

- 600, 616, and 620 are suite-style residence halls on W. 116th St.
- Elliott is a corridor-style residence hall on Claremont Ave.
- Plimpton is a suite-style residence hall on Amsterdam Ave, adjacent to Columbia & Teacher's College.
- Cathedrals Gardens is a suite-style residence hall on Manhattan Ave, which also houses faculty members.
- 121st Street is a suite-style residence hall one block north of campus off Broadway.
- The College also rents apartments for students in "College Residence," located at 110th St. and Broadway.

Eligibility

Eligibility criteria have been established in order to assign available space on an equitable basis. These regulations may be changed as needed at the discretion of the College, but insofar as possible, the following criteria will determine eligibility:

- Eligibility for residence is limited to Barnard students and approved visiting students who have both completed the registration and program filing processes and have made all required payments by the payment deadlines.
- Some Columbia students may also be eligible, providing they meet the requirements for the Barnard/Columbia Housing Exchange as defined by Columbia University Undergraduate Housing.
- Students must be enrolled on a full-time basis.

Housing Assignments

Returning upperclass students already living in College housing who started at the College as First-Year students are eligible to take part in the Room Selection process, to secure housing for the following academic year. Most students select through the Housing Lottery, but students may also apply for Pre-Lottery placements as an accommodation through the Center for Accessibility Resources & Disability Services (CARDS).

New First-Year students who apply for campus housing are matched with roommates and assigned to rooms by the College based on the responses to their Housing Application.

New Transfers students, students returning from a leave of absence, and non-residential continuing students may apply for housing. While the College always hopes to be able to provide housing for as many applicants as possible, space in campus housing is limited and assignment is not guaranteed for these populations. Students who

start at the College as Transfers are not eligible to take part in the Room Selection process for continuing students.

Requirements

The rules and regulations regarding payments, refunds, and the use and occupancy of rooms are in the Housing Contract, which students sign when they apply for College housing. The [Housing Contract](#) and the [Residence Hall Handbook](#) may both be reviewed online.

Board

All Barnard students are required to participate in a meal plan. All first-year students residing in Barnard housing are required to enroll in the Platinum meal plan. Upperclass students who live on floors 2-8 of the Quad are required to enroll at minimum in the Flex 150 Meal Plan.

All other students, including those living off-campus, are enrolled by default in the Flex 125 meal plan (but must be enrolled at minimum in the Convenience Points meal plan).

Meal Plan enrollment is [coordinated by the Bursar's office](#). Students may alter their meal plan enrollments (within the allowable parameters), including selecting Kosher options, through the [Meal Plan Change form](#) (on the Housing Portal) through the following deadlines:

- Fall Semester -- August 28, 2023
- Spring Semester -- January 8, 2024

Any meals remaining on any meal plan at the end of the fall semester are forfeited. Any meal plan points remaining at the end of the fall semester may be carried over to the spring semester providing that the student remains enrolled in a Barnard meal plan during the spring semester. Any meals or meal plan points remaining at the end of the spring semester are forfeited.

Married Students & Students with Children

College housing is available only for enrolled Barnard students. College housing is not available for the spouses or significant others of students and/or their children.

Financial Aid for Room and Board

All students who live on campus will have their financial aid based on the resident student budget. A student who receives aid from the College based upon the resident budget must live in College housing billed by Barnard. It is the student's responsibility to notify the Office of Financial Aid when she decides not to reside on campus. Students who decide to live off-campus or commute from home will have their financial aid based on the commuter student budget.

- All first-year students who are receiving financial aid will have a resident budget based on the cost of a multiple room and the Platinum Meal Plan.
- Upper-class resident students with access to a kitchen who are receiving financial aid will have a budget based on a single room and the cost of the Flex 125 meal plan.
- Upper-class resident students without access to a kitchen who are receiving financial aid will have a budget based on a single room and the cost of the Platinum meal plan.

- Non-residential students who receive financial aid will have a meal allowance based on the cost of the Flex 125 meal plan.
- A student who chooses to reside in a studio apartment must cover the difference between the cost of a studio apartment and a single room from her own resources.

Resident Assistants

Residential Life & Housing employs students as Resident Assistants (RAs) throughout campus housing. RAs facilitate the social, academic, and personal adjustment of students to the residence hall and University. RAs serve as a role model, provide referrals to resources across the College, enforce the policies of Residential Life & Housing and the College, and provide social & educational programming.

Information Services

Barnard College Information Technology (BCIT)

Barnard College Information Technology (BCIT) is responsible for managing and supporting the College's IT infrastructure. Systems include email, calendars and other tools for collaboration using gBear, Barnard's implementation of Google Workspace for Education. In addition, BCIT manages and supports campus network & internet access, database applications, and administrative systems. BCIT runs a Service Desk for faculty & staff support (located in 011 Milbank Hall), a project management office (PMO) for IT-related projects, manages campus computers, and offers computing services for Barnard College students. BCIT works in partnership with the other college departments to implement and support applications like course registration and online student services as well as enterprise systems and applications for faculty and administrative departments.

Barnard College Information Technology (BCIT) – Student Computing Services

BCIT provides computing resources and support to all Barnard students through Student Computing Services. Student Computing Services assists students with a wide range of technological issues, including software installation, computer security, and network configuration; supports four computer labs that are accessible to all students; and helps disseminate information about technology through special events and workshops. Student Computing Services is co-located with the BCIT Service Desk in 011 Milbank Hall. Both full-time staff and student technicians (known as Academic Computing Experts or "ACEs") are available to troubleshoot computer and printer problems, help with technology questions, and provide general computing support. For computing assistance, students may contact Student Computing Services by phone, email, or in person. The residential labs are open 24 hours a day, 7 days a week during the academic year, and are located in the residence halls in Sulzberger, Plimpton, and 616 West 116th Street.

Other Student Services

Beyond Barnard

Beyond Barnard provides lifelong support to all students and graduates as they define, pursue, and achieve success in their careers and communities. The office represents an integrated hub of services

and resources in the areas of career development (including job and internship exploration and applications), campus roles (including jobs funded through Federal Work Study, Barnard College Jobs, and other forms of on- and off-campus work), competitive national and international fellowships, and graduate and professional school. Members of the Barnard community can access Beyond Barnard from their first day on campus as students, throughout their matriculation, and for a lifetime as graduates. Resources are available to students and alums, regardless of whether they intend to pursue careers in academia, corporate industry, nonprofit organizations, the arts, or government (and many others in between).

Beyond Barnard's resources are designed to complement the academic mission of the College. The initiative proceeds from the assertion that one's major does not dictate the entire course of one's career, and that there is too often a false dichotomy between the skills and knowledge necessary for success in the classroom, and those necessary for success in careers after graduation. To this end, Beyond Barnard emphasizes the value of transferable skills, personal and professional networks (especially with Barnard alums), and critical thinking about the purpose of a liberal arts education in the context of the twenty-first century.

In its 2022-2027 strategic plan, released publicly in 2022, Beyond Barnard defines its central values as equity, exploration, education, engagement, and empowerment. The office lays out its specific pursuit of these values on its website, and reports on key indicators like the placement rates of graduates, and demographics of advisees here: <https://barnard.edu/beyond-barnard/data-and-outcomes>

In all of these activities, Beyond Barnard emphasizes that students and alums own their career trajectory. The office works to empower them to define and pursue their path and their purpose. Students and alums can tap into Beyond Barnard resources (enumerated in more detail below) at its website, through its online Handshake portal, and on social media. Newsletters about services and resources are deployed weekly to students throughout the academic year. Additional targeted messages are deployed to students and alums year round.

Information about Beyond Barnard is available on its website, and questions can always be addressed to beyondbarnard@barnard.edu.

Advising and Programs

The Advising and Programs Team provides one-on-one advising, events, workshops, mentoring opportunities, and other resources that help students and alums explore and pursue diverse careers, fellowships, and graduate or professional school programs. Leading more than 4,200 individual advising appointments annually, the Advising and Programs Team can support students and alums in career exploration, job and internship document creation (resumes, CV's, cover letters, etc.), applications for graduate and professional school (including Medical School, Business School, master's and PhD Programs, and Law School, among many others), interview and negotiation best practices, networking, and the pursuit of competitive fellowships. Appointments are secured using Beyond Barnard's online portal. Drop-in hours with full-time staff are also available. Information about how to schedule appointments or drop in for advising is available on the Beyond Barnard website.

In addition to full-time staff, the Advising and Programs Team oversees the Peer Career Advisor (PCA) program. PCA's offer drop-in

appointments for students to review job documents, discuss job and internship search strategies, review LinkedIn profiles, and more.

Central to Beyond Barnard's philosophy on career exploration is its integration of multiple stakeholders from the Barnard community—including alums, faculty, parents, staff, and others—into its resources. Programs like Career Insights connect students to alums for conversations about industries, career skills, and diverse fields.

In 2019-20, Beyond Barnard celebrated ten years of career mentoring programs at the College with the launch of Barnard Connect and Beyond Mentoring. Barnard Connect is a virtual mentoring platform that allows students to connect with mentors. Beyond Mentoring, accessed through Barnard Connect, gives students the ability to apply for short-term projects for career and professional skills development that are hosted by alums, parents, and other friends of the College. These initiatives together represent a significant expansion of Beyond Barnard's other mentoring initiatives: the Executive Mentorship Program, Mentors-in-Residence, and Alum Chats.

Questions about the Advising and Programs Team may be directed to beyondbarnard@barnard.edu.

Partnerships & Employer Relations

Beyond Barnard's Partnerships and Employer Relations Team administers Beyond Barnard's funded internship programs, part-time employment programs (including on-campus and off-campus opportunities funded by work study programs), manages a comprehensive online job and internship posting site available to full-time Barnard College students, and oversees partnerships with corporate and philanthropic organizations that support Beyond Barnard with funding.

Through its administration of the Beyond Barnard Internship Program, Laidlaw Scholars Program, GRoWing the Arts, Liman Center For Public Interest Law Fellows, Bridgewater Scholars, and other initiatives, the Partnerships & Employer Relations Team administers funding for unpaid or low-pay internships and research opportunities for more than 250 students per year. The team's administrative oversight of the Summer Research Institute plays a pivotal role in the execution of that program as well. Information about the specifics of each program, funding, eligibility, and application processes, is available on Beyond Barnard's website.

With respect to campus roles and part-time employment, the Partnerships & Employer Relations Team performs multiple functions. First and foremost, plans and executes paid professional development programming for the 1000+ students engaged annually in roles that are supported by the Federal Work Study Program, Barnard College Jobs, and other forms of paid student employment opportunities. The team manages all logistics, including recruitment and hiring, of the Preceptor Program which supports faculty teaching in hybrid formats. Since its inception in 2020 as a response to the COVID-19 crisis and its effects on learning environments at Barnard, the Preceptor Program has become one of the College's largest employers of students, and has facilitated hundreds of connections between students and faculty. Finally, in its function as the manager of Beyond Barnard's Handshake page, the team manages relationships with hiring managers for part-time independent contractor roles.

Throughout the year, the Partnerships and Employer Relations team leverages its relationships with employers across industries to connect Barnard students and graduates to internship and job opportunities.

Handshake again plays an important role, and acts as the College's central clearinghouse for job and internship listings. But the team also provides distinctive opportunities for employers and partners to connect directly with students and alums. The team leads the Focus Series in both the Fall and Spring. It hosts regular information sessions and programs led by visiting employers, including on-campus interviews for internships and full-time jobs, and workshops that prepare students for success in the recruiting process.

Finally, the Partnerships & Employer Relations Team supports Beyond Barnard's Opportunities Conferences, which foster direct connections between students, employers and hiring alums.

Communications & Operations

The Communications & Operations Team assesses and communicates about the effectiveness of Beyond Barnard's work. It also manages all processes associated with Beyond Barnard's many programmatic initiatives, from payroll paperwork for student workers to access to online platforms run by the office. Beyond Barnard tracks the graduate and professional outcomes of each graduating class and reports them each year. In line with peer institutions, outcomes are reported six months after graduation. To track satisfaction and improve its resources, Beyond Barnard also collects data in the form of surveys from students and alums. Data that Beyond Barnard collects and reports on can be found on the Beyond Barnard website in its Data and Outcomes section.

Questions about the Communications & Operations Team may be directed to beyondbarnard@barnard.edu.

Health Services

Alcohol and Substance Awareness Program

The Alcohol and Substance Awareness Program (ASAP) works with the Barnard community to provide drug and alcohol education, prevention, and intervention on campus. Its purpose is to promote the healthy development of students and to encourage students to explore their options and ultimately make choices that are positive for them as individuals.

ASAP offers individual and group counseling ASAP also offers outreach and educational programs on related topics, including: consequences of alcohol use, Barnard norms, women and alcohol, alcohol and relationships, alcohol and stress, abstinence, drug use, safe spring break and media literacy. All ASAP services are confidential and free of charge.

Center for Accessibility Resources & Disability Services

In 1978, Barnard established a program to provide services for students with disabilities, which enhances their educational, pre-professional, and personal development. The Center for Accessibility Resources & Disability Services (CARDS) serves students who have different types of disabilities such as mobility, visual, hearing loss, as well as students with invisible disabilities, such as learning disabilities and ADD/ADHD, chronic medical conditions, psychological disabilities, and substance abuse recovery. CARDS works with other administrators and members of the faculty to assist students with disabilities in participating equally in college. Students who wish to seek accommodations at Barnard should fill out an [online application](#), submit [supporting documentation](#), and schedule an intake meeting with their designated [CARDS coordinator](#). Accommodations are not granted retroactively, so

it is best to register with CARDS early on. Accommodation decisions are made on a case-by-case basis, according to the type of disability a student has, information shared by the student during their meeting, and the recommendations of the student's documentation. The buildings on the Barnard campus are wheelchair accessible. CARDS staff can assist students with determining the best access routes on campus. CARDS maintains a comprehensive [webpage](#), which includes important information about accessing accommodations, how to register, and policies related to accommodations.

Primary Care Health Service (PCHS)

The PCHS, nationally accredited by the Accreditation Association for Ambulatory Health Care, provides primary care and specialist referrals for all registered Barnard students. It offers a wide range of general services, with a particular emphasis on the developmental needs of college-aged students. Entering students must submit a proof of immunization as required by New York State Health Laws. All students are entitled to all services at the PCHS, regardless of the type of insurance they carry.

Staff

The clinical staff consists of full-time physicians, nurse practitioners, a nurse, a nutritionist and a health educator (shared with the Wellness Spot). The PCHS collaborates with major New York medical teaching centers to provide advanced clinical training in college health to Adolescent Medicine Fellows.

After-Hour Care

At all times when the college is in session and during winter and spring break there is a Clinician-on-Call phone service nights and weekends for after-hours urgent medical advice. There is always a PCHS clinician on backup call for the answering service as well.

Fees

There is no per-visit charge at the PCHS, and the number of visits is unlimited. Medications are available for discounted fees from our on-site dispensary.

Health Insurance

All enrolled students at Barnard must carry health insurance while they are a student at the College. Students have two options: They can either carry the school's insurance plan, implemented by Aetna Student Health, or waive out of the student health insurance plan with their family's insurance plan. The waive-out period occurs during certain times of the year and must be approved. All outside insurance plans must be ACA compliant. Students should carry their insurance cards with them at all times.

For additional information about services provided and the Student Insurance Plan, students are encouraged to visit the Health Services [website](#).

Health Education and Promotion

The health education and promotion department promotes the health and wellness of Barnard students through peer education, educational programming, individual health behavior consultation, campus-wide health campaigns, community outreach, and advocacy. We are a resource for students to learn about their physical, sexual, mental, and spiritual health, and we work to support women's individual self-care and the health of the community. We also educate students about how to find and use health resources at Barnard and in the community. The department comprises two programs: the Wellness Spot and Being

Well-Woman peer educators are student volunteers who are trained to present workshops and campus events on sexual health, nutrition, fitness, body image, sexually transmitted infections, contraception, stress management, sleep, healthy relationships, and communication (and more), in residence halls, to clubs and organizations, and to teens in the surrounding community. Peer educators present education sessions to students having their first-ever GYN exam, and are available to answer student questions during evening office hours.

Being Barnard is the college's sexual violence education, prevention, and outreach program. The mission of Being Barnard is to provide a holistic approach to sexual violence prevention through campus-wide campaigns, educational programming, one-on-one health consultation services, community building, outreach, advocacy, and intervention. Sexual assault and interpersonal violence affect students of all genders, identities, and backgrounds and are widely recognized to not be isolated issues but part of a much larger societal picture. As such, it is our hope that by addressing a multitude of interwoven topics, such as healthy relationships and sexuality, affirmative consent, personal boundaries, self-care, bystander intervention, and social identities and power, that we may help reduce, and one day eliminate, sexual assault and violence from our campus and global communities.

Student Experience and Engagement

The mission of the Department of Student Experience and Engagement (SEE) is to create accessible, dynamic, thought-provoking co-curricular opportunities for Barnard students to explore purposeful involvement, self-discovery, and the development of meaningful relationships with their peers and the greater Barnard community. As an integral part of the student experience, SEE aims to connect students not only to resources available within the Department but all resources available at both Barnard and Columbia. Students who engage with SEE will strengthen their leadership skills to transform themselves, Barnard, and their communities both now and in the future.

Vision:

Student Experience and Engagement envisions a Barnard where every student feels welcome, supported, is engaged, and becomes an agent for social change.

Values:

Student Experience and Engagement values the following:

- # Knowledge
- # Equality
- # Community
- # Integrity
- # Responsibility

- # Social Justice

Functional Areas:

- # Arts Education

- # Campus-Wide Programming

- # McAC *Student-Programming Board
- # Experiential Learning Initiatives

- # Glicker-Milstein Theatre (GMT)
- # Identity & Inclusion Initiatives
- # Leadership Programs

- # New Student Orientation (NSOP)

- # Recognized Club and Organization Support and Management

- # Student Leadership Group Advising
- # Student Government Association (SGA)

Governing Board at Barnard (GBB)

Student Experience and Engagement serves the entire Barnard community including students, faculty, staff, administrators, and parents and families. As the hub for student engagement, SEE is a great place to both promote and learn about what is going on in the Barnard community. In partnership with the Division of Campus Life and Student Engagement, SEE will do the following:

- # Encourage deep consideration of ideas, interests, and needs
- # Advise students on the breadth of College resources to leverage during your experience at Barnard;
- # Connect students to departments and individuals to help them reach their goals;
- # Celebrate student accomplishments; and
- # Share assessments of how the Department has done this work

Arts Education

The Program Coordinator for Arts Education advises Barnard recognized student groups that self-identify under the larger umbrella arts education. This includes performance arts groups, visual arts groups, and groups that have an arts education focus. Additionally, the Program Coordinator coordinates arts education programming including the annual Arts Education Week in the spring semester.

Campus-Wide Programming

SEE supports campus-wide programming via the McIntosh Activities Council (McAC), a student-driven programming board responsible for upholding and celebrating Barnard traditions like; Big Sub, Midnight Breakfast, Emily Gregory Ceremony, Spirit Week and the Barnard Greek games. The work of each functional area within the Department is designed for the entire campus community and programs, events, and activities can be found on the Department supported online platform MillieLINK.

Experiential Learning Initiatives

The Program Coordinator for Experiential Learning advises Barnard recognized student groups that self-identify under the larger umbrella of experiential learning. This includes service learning or volunteer-based groups, philanthropic or humanitarian groups, and/or groups focused on practical applications of vocational interest.

Glicker Milstein Theatre (GMT)

The Glicker-Milstein Theatre functions as an artistic performance space and creative outlet that provides priority to the Barnard College Theatre Department, SGA recognized organizations as well as other academic departments. The GMT will facilitate the mission of Barnard College and Student Experience and Engagement by presenting enrichment opportunities through performances open to the student body and the College community. The Theatre Director is responsible for all facets of scheduling and programming in the GMT year-round.

Identity & Inclusion Initiatives

The Program Coordinator for Identity & Inclusion advises Barnard recognized student groups that self-identify as cultural or identity-based groups. The Program Coordinator also, in collaboration with students and our partners at Columbia University, supports heritage and cultural awareness programming including Hispanic Heritage month, LGBTQ+ History Month, Women's History Month, etc. Additionally, the Department has a part-time Program Coordinator for LGBTQ+ initiatives specifically designed to meet the needs of Barnard's LGBTQ+ community.

Leadership Programs

The College believes that leadership development doesn't live in one specific area or department. In SEE, we recognize that leadership occurs in many settings. With this in mind, the Department is dedicated to identifying, reinforcing, and cultivating the skills that Barnard students need in order to be effective leaders on campus, in New York City, and throughout the world. We seek to accomplish this through signature initiatives which include the leadership program and workshops, lunches, and the Barnard Leadership Training (BLT) as well as many programs in collaboration with other departments on campus. The office's holistic approach embraces the potential of co-curricular leadership development which creates well-rounded students who are ready to be engaged members of society.

New Student Orientation Program (NSOP)

SEE coordinates both fall and spring New Student Orientation Programs that welcome and introduce first-year, transfer, visiting and international students to the College. Building community is another essential part of this area which is primarily done through programming. On and off-campus programs are offered as ways of building relationships and gaining a sense of belonging at Barnard.

Student Records and Information

The [Family Educational Rights and Privacy Act](#) of 1974 (the Buckley Amendment/FERPA) stipulates that students may have access to their official files and that no transcripts may be issued without their written request. Barnard's full FERPA policy can be found [here](#).

Barnard College designates the following items as Directory Information: student name; class; home or college address and telephone number; email address; major field; date and place of birth; dates of attendance at Barnard; degrees, honors and awards received; previous school most recently attended; participation in officially recognized activities and sports; and photograph. Columbia and Barnard have public directories—online and by phone—that list the student name, department, email, phone and campus box number.

The College may disclose any of those items without prior written consent, unless a student files a [request to withhold directory information](#) with the Registrar each year by September 15.

Community Accountability, Response & Emergency Services (CARES)

CARES promotes safety for the Barnard community across all elements: physical; fire and safety; structural; interpersonal; and psychosocial. CARES supports and contributes to a safe, healthy, and inclusive learning environment for students, faculty, staff and

visitors. The Department plays a central role in preventative and protective measures to minimize the risk or impact of emergency situations on campus. To this end, CARES works closely with campus and community partners, including Columbia Public Safety, Columbia Title IX, and the New York City Police Department when appropriate and necessary. While all members of the CARES department receive training specific to their role, they are also committed to the philosophy that everyone on campus can contribute to a community that fosters the safety of all.

The CARES Department is comprised of four units:

- The Community Safety Team—which includes community safety officers, access attendants, dispatchers, and supervisory staff—addresses security and emergency needs. Community Safety Staff are not sworn law enforcement officers; rather, they are New York state certified security guards trained in security practices, risk reduction, fire safety, basic first aid, and CPR/AED. Community Safety is located just opposite the Main Gate at 117th Street and Broadway, in Barnard Hall Room 104. It is open 24 hours a day, seven days a week, including holidays. Their emergency response line can be reached at 212-854-6666.
- The Response Team is made up of responders who are focused on supporting holistic approaches to safety and crisis response. They staff the (non-emergency) Response line at 212-854-3362 to provide initial intervention, response, and/or referral to campus resources.
- The Office of Nondiscrimination and Title IX works collaboratively across the campus to further the goal that faculty, staff, and students be able to work and study in a campus community free from discrimination and harassment. The Office provides outreach, education, supportive consultation, and response services to all members of the Barnard community. The Office is located on the First Floor of Elliot Hall and is open Monday through Friday (excluding holidays) from 9am to 5pm. They can be reached by email at nondiscrimination@barnard.edu as well as through the CARES Response Line at 212-854-3362 (please indicate that you're calling to speak with the Title IX Coordinator).
- The Preparedness team (fire safety and compliance personnel) embodies the college's commitment to shared responsibility for the safety and welfare of the campus community. Preparedness efforts related to fire and life safety, crime prevention, and emergency preparation inform students and employees of the resources available to them and remind them of their personal responsibility to take prudent precautions.

For more information please visit the Barnard CARES website at barnard.edu/CARES.

Crime Statistics

In compliance with New York State Education Law Article 129-A, and the Clery Act, crime statistics for the Barnard College campus for the last three calendar years are filed annually with the [United States Department of Education](http://www.education.gov) and are available for review on their [website](http://www.education.gov) and on the Barnard College website. In addition, the Advisory Committee on Campus Security will provide, upon request, the Annual Security Report or campus crime statistics as reported to the United States Department of Education. Requests can be made by contacting

the Executive Director(s) of the Department at 212-854-3362 or via email to CARESTeam@barnard.edu.

CURRICULUM

A Barnard education seeks to provide women with the tools and techniques needed to think critically and act effectively in the world today. It fosters a respect for learning, an aptitude for analysis, and a competence in the demanding disciplines of the liberal arts and sciences. By virtue of its special mission and location, Barnard strives to give its students insight into interconnected worlds of knowledge and experience.

Research & Scholar Services

Milstein Center for Teaching and Learning

The Milstein Center for Teaching and Learning, at the heart of the campus, houses the Barnard Library and Academic Information Services along with Academic Centers that together provide research platforms and sustain robust services for students to facilitate their scholarly work. It serves as an open, accessible, and creative space to connect with and create information in a way that is engaging, fosters collaboration, and sparks new thinking. The Milstein Center is a home for scholarly exploration, innovation, and production, empowering the Barnard community collectively to challenge and expand methods and scholarship, mix and remix content, and create new conversations. It acts as a gateway to a creative frontier of information that can lead to brand new modes of teaching, learning, and discovery.

Barnard Library & Academic Information Services

Barnard Library and Academic Information Services (BLAIS) supports excellence and innovation in teaching and learning by providing exceptional research and instructional services, and connecting the Barnard community to extensive information resources. Located on floors 2, 3, and 4 of the Milstein Center for Teaching & Learning, BLAIS includes the Library, Instructional Media and Technology Services (IMATS), AV/Classroom Technologies, the Barnard Zine Library, and the Barnard Archives & Special Collections.

Barnard's library is an affiliate of the Columbia University Libraries; Barnard community members have access to the Barnard and Columbia Libraries collections in all formats. The staff of the Barnard Library Circulation and Help Desk on the 2nd floor of the Milstein Center welcome you to ask questions and learn from us how to search these expansive collections through the shared CLIO online catalog.

The Barnard circulating collections in print and digital formats support the Barnard curriculum across the disciplines, with particular depth in Women's, Gender, and Sexuality Studies and Dance Studies. We also collect to support the interdisciplinary work of students and faculty researching in the Barnard Archives and Special Collections and the many academic centers in the Milstein Center.

We have many specialized materials available for check-out. The internationally-renowned Barnard Zine Library is a collection of zines written by women with an emphasis on zines by women of color, trans women of all races and ethnicities, and zines on feminism and femme identity by people of all genders. Zines offer both contemporary and future researchers primary resource insights into today's feminist culture. The circulating zines collection is on the second floor of the

Milstein Center, while an archival collection is held in the Barnard Archives. We hold a focused collection of books in Art and Architecture (which circulate) to complement Columbia's Avery Library holdings (largely for library use only.) Our other special circulating collections include the Barnard Alum Collection; the Barnard BIPOC Alum Collection, which affirms the lives, histories, and imaginations of past and current Barnard students who are Black, Indigenous, and/or People of Color; the Barnard FLI Partnership Library, a textbook library for first-generation and/or low-income students, a partnership between the Barnard Library, the Columbia First-Generation Low-Income Partnership, and Barnard SGA; Course Reserves; and the Media Collection.

The size of our collection makes our library browseable, and we welcome you to visit the shelves. We hold more than 130,000 circulating books, zines, journals, and media in the Milstein Center on floors 2, 3, and 4. Another 23,000 volumes reside in a retrievable storage facility; these are available for request in the CLIO Catalog and will be delivered to Barnard Library for pickup.

As an affiliate of the Columbia University Libraries, the Barnard Library contributes and provides access to a world-class research collection. The Columbia University Libraries collections include over 13 million volumes, over 160,000 journals and serials, as well as extensive electronic resources, manuscripts, rare books, microforms, maps, and graphic and audio-visual materials.

The Personal Librarian program connects each student and faculty member with a member of our research and instruction team, librarians specializing in academic disciplines across the curriculum. Incoming students are assigned to a personal librarian who will help them navigate library resources, build on their research interests, and explore new methods for research and scholarship. Personal librarians seek to understand student, faculty, and staff research needs, and provide individualized consultation. As students select a major, the librarian affiliated with their field becomes a guide for the research process in advanced courses, and ultimately the senior project, thesis, or capstone. Librarians also provide instructional workshops in First Year Writing as well as foundational courses across the curriculum. They support both students and faculty in making connections from the course syllabus to the vast collections available at the Barnard Library, within the Columbia University Library system, across the New York metropolitan area, and beyond. The Personal Librarians are partners for researchers seeking to build projects that utilize the Milstein Centers, serving as a point of connection to other Milstein specialists.

The Barnard Archives and Special Collections collects and makes accessible materials that document campus and academic life at Barnard, as well as histories of feminism and dance. The mission of the Barnard Archives is pedagogical at its foundation. We provide source material to students, staff, alums, faculty, administrators, and other members of the Barnard College and Columbia University communities, as well as to local, national, and international researchers, activists, and artists. Our work is informed by reparative and redistributive frameworks, to actively confront histories of exclusion of people with marginalized identities within our collections.

Instructional Media and Technology Services (IMATS) consists of [Audiovisual Technology Services](#), which supports Barnard's audiovisual needs and classroom technologies; and [Instructional Media Services](#), which provides resources and training in media equipment, editing, and digital technology for Barnard College. Our media equipment room is located on the second floor of the Milstein Building, where a variety

of equipment is available for checkout including cameras, projectors, microphones, and more. IMATS supports academic technologies at Barnard as well, including Canvas, course evaluations, the digital archives collections, website development, and consultation on implementation of new software or computing needs. IMATS uses media and technology to support teaching, learning, and creativity at Barnard.

Academic Centers

The Milstein Center for Teaching and Learning houses a number of [Academic Centers](#), flexible learning and collaboration spaces, each with a specific emphasis, including computational science, empirical reasoning, digital humanities, design, media, pedagogy, and movement. Also in Milstein are the Barnard Center for Research on Women and the Athena Center for Leadership. The Library and the Centers collaborate on a range of programming and workshops throughout the year. We invite all students to explore how the Centers' offerings can extend and deepen your learning and exploration at Barnard

DESIGN CENTER

The Design Center is an incubator for creative making and embodied learning located on the entry level of the Milstein Center for Teaching and Learning. We're an open and inclusive studio space for hands-on experimentation with materials, tools, and equipment. We support the design and fabrication of objects as well as the pedagogy and learning associated with making.

Our team is committed to addressing design justice, sustainability, and inclusivity in the fabric of our programming and our operational framework. The Center provides equitable access to design technologies and empowers members of the Barnard community to discover, experiment with, and pilot new technologies and design practices.

Incorporating a broad tool set that includes computer-aided design tools, power tools, and hand tools, the Design Center expands opportunities for design-centered thinking across the Barnard College curriculum and to our local community partners. Our programs and workshops address foundational making techniques, sustainable design practices, and the powerful ways in which designed and constructed objects impact our lives. The Design Center enables students, faculty, and staff of all skill levels to learn and apply practical making skills in their design projects through experiential, community-based learning.

DIGITAL HUMANITIES CENTER

The Digital Humanities Center (DHC) is a research, teaching, and learning facility designed to foster technological approaches to the humanities to help researchers create dynamic connections between the analog and the digital. The DHC will provide students and faculty with support for a range of methods, from textual and timeline analysis to sonification and mapping. Additionally, the DHC hosts workshops, events, and conversations about the intersections of critical theory, technology, the humanities, and feminism, sustainability, and racial justice, and is equipped with video conferencing technology to connect people around the globe.

EMPIRICAL REASONING CENTER

The Empirical Reasoning Center (ERC) helps faculty, students, and alumnae to engage critically with data, both qualitative and quantitative. At our offices and lab on the first floor of the Milstein Center, ERC staff provides empirical research support and technology training at all levels -- from introductory to advanced -- in statistical,

textual and spatial analysis, and data visualization methods. Our services include dedicated course workshops, stand-alone short courses, and a drop-in help desk, as well as programming (e.g., forums, panel discussions) on current, vital issues.

ELSIE K. SLOATE MEDIA CENTER

The Sloate Media Center is a place for original media production, media content creation, media experimentation, and media research. This is an inclusive and accessible space open to all members of the Barnard and Columbia communities, and everyone is welcome to learn how to be media makers regardless of their background, experience, or skill level. With both a bookable production studio and a drop-in post-production lab, the Media Center allows digital media producers to access a wide range of resources such as an audio booth, an LED light-grid operated from a switchboard, backdrops and greenscreens, as well as a range of editing & animation software. The Sloate Media Center also collaborates with faculty around the integration of media into various curricula across disciplines at Barnard College, such as podcasting, video production and editing, photography, stop-motion animation, screenwriting, and other media production skills. We host events and programming, including open workshops; the Emerging Filmmaker Mentorship Program, where Barnard students receive funding and mentorship to create a short film; film screenings and panel discussions; and other initiatives that engage the community with media and media-making.

VAGELOS COMPUTATIONAL SCIENCE CENTER

The Diana T. Vagelos and P. Roy Vagelos Computational Science Center (CSC) facilitates the understanding, exploration, and use of computational science and technology across disciplines. We take an intentionally broad approach to computing and its use and we are dedicated to lowering the barrier of entry into computing across disciplines. We engage students, faculty, and staff in learning about computing in meaningful ways, including thinking critically about the development and application of technology in society.

Our event programming reflects these values and we build on our mission through our bi-monthly open workshops, student fellowship programs, talks and roundtable discussions, publications, and ongoing collaborations with Barnard centers, departments, and outside institutions. A primary theme of our collaborations is to explore computational topics through an interdisciplinary lens with a focus on social justice. Through our Computing Fellows peer-leadership and mentorship program, undergraduate fellows are "attached" to Barnard courses to support or introduce computational activities and to mentor, tutor, and assist students in coding and computing pedagogy.

MOVEMENT LAB

The Movement Lab is a flexible, modular space for movement research, production, collaboration, and interdisciplinary interaction. The Lab's trans-media function serves to enhance critical thinking and learning through body-and-brain connection as it seeks to explore emerging trajectories in art, science, and technology. The lab presents creative research through installations and open forums, both virtually and at the Movement Lab. This research is generated through lab programs such as Students Artists in Residence (SAR), Artists in Residence (AIR), Media Movement Salon (MeMoSa), and collaborations with various programs and departments at Barnard College and Columbia University.

THE CENTER FOR ENGAGED PEDAGOGY

The Center for Engaged Pedagogy (CEP) strengthens Barnard's deep academic engagement and support for student and community

wellbeing. To support this mission, we offer programming on teaching and learning topics; develop and share pedagogical scholarship; build and sustain relationships within and beyond Barnard; and provide tools and resources to the campus community. Our goal is to prepare Barnard specifically—and higher education more broadly—to critically engage with and contribute to our ever-changing world.

The CEP serves as a hub for student learning and support at all levels of the Barnard curriculum by providing student tutorials on learning strategies, student learning communities exploring the use of new technologies and relevant pedagogical topics, and holistic programming aimed at supporting the whole student. For faculty, the CEP facilitates institutes, workshops, and public lectures on topics ranging from course design, assessment, and active learning strategies to anti-oppressive teaching practices and the use of digital tools in face-to-face as well as online classroom instruction. The CEP also offers 1-on-1 consultations, teaching observations, and assessment services for classroom instruction.

BARNARD CENTER FOR RESEARCH ON WOMEN

In 1971, Barnard students, faculty, and staff founded the Barnard Women's Center, the first of its kind in the country. BCRW's founding took place in the midst of feminist, Black freedom, anti-war, and Third World Liberation movements, international student mobilizations, and the parallel creation of Black studies, ethnic studies, and women's studies programs at universities across the country. For more than fifty years, BCRW has built a bridge between students, scholars, activists, artists, neighbors, and our communities beyond New York through public events, publications, multimedia projects, and working groups.

BCRW is committed to vibrant and engaged research, pedagogy, art, and activism, supporting the work of scholars and activists to create new knowledge and to challenge and refine how we understand the world around us. From our signature annual Scholar and Feminist Conference to our peer-reviewed journal *The Scholar and Feminist Online*, our unique collection of feminist social movement ephemera housed in the Barnard College Archives and a constantly expanding video archive, and a rich history of collaborations with activists and artists, BCRW brings scholars and activists together to foment intersectional social justice feminist analyses and promote social transformation.

Every semester, students, faculty, and community members can engage with BCRW through public programming and our open-access publications focusing on issues such as abolition and transformative justice; anticolonialism and Black transnational feminism; reproductive justice; labor and economic justice; and more. Students can get involved in the Center through a weekly social hour on Thursdays from 12-1 p.m., the Center's collaborations with student groups, and paid research assistantships.

ATHENA CENTER FOR LEADERSHIP

The Athena Center for Leadership is a hub for changemakers at Barnard College, itself a center for leadership for over 130 years. Our mission is to prepare Barnard students to lead change today and throughout their lives. To this end, we work with a wide range of on-and off-campus partners to offer academic year and summer co-curricular opportunities (in the form of 15+ communities of practice) for Barnard students interested in applying what they learn in the classroom to real world challenges; summer programs for future Barnard students to experience the Athena approach to leadership development, and two marquee programs for the public: SPARK, a series about change and

how it happens, and the Athena Film Festival, which presents stories of women's leadership from uncommon angles.

THE TODDLER CENTER

The Center was created in 1973. In January 2023 we moved to our newly renovated, state of the art classroom and research center on the ground floor of Milbank Hall. Since the beginning, the Center has functioned as an integral part of the Psychology Department at Barnard College, providing an initial group social experience for toddlers, a unique learning experience for Barnard and Columbia College students, and a research site for developmental researchers. Barnard Psychology courses use the center for students to observe toddler behavior and learn about research methods. An upper level seminar provides a year long opportunity for students to be part of the program while studying theory and research in early development. Each year the Center enrolls toddlers in one of four classes for the academic year (mid-September through June). All classes are structured by age and gender, and include children from diverse backgrounds. Morning and afternoon classes are available and meet once or twice a week. Parents and/or caregivers can participate in an educational group focused on the developmental issues of the toddler years and on related parenting and caregiving issues.

The approach of the Center is based upon the philosophy that children learn by doing: through experiences, exploration, and active participation with their environment. Children's discoveries promote mastery and feelings of competence. Emotional development is the core to building security and trust at these ages. The Center provides a warm environment to support each child's needs, promote self discovery, and facilitate separation.

Requirements for the Liberal Arts Degree

Barnard's motto, *Following the Way of Reason* (Hepomene toi logismoi), signals the College's continuing commitment to the intellectual breadth and analytical depth of the liberal arts tradition. Since the College's founding in 1889, a Barnard education has been characterized by its distinctive combination of elements: a rigorous, broadly based framework of general education requirements; a focused inquiry into major subjects; and a range of electives. Together these elements allow for substantial personal choice. The exact structure of College requirements has varied over the past century in response to changes in society, education, and student needs. Today, candidates for the Barnard degree must complete:

- general education courses:
 - 2 First-Year Foundations courses (First-Year Writing and First-Year Seminar)
 - a physical education course
 - Distributional Requirements
 - Modes of Thinking
- a major with all of its requirements
- open electives
- an overall GPA of 2.0 or higher.

Students entering as first-years must complete 122 points (120 points for students entering before Autumn 2003). Reflecting the College's view that physical well-being is an essential part of a healthy and productive life, they must also fulfill a physical education requirement. (Of the 122 required points, one must be for PE. Transfer students who enter with at least 24 points of credit must earn 121 points, of which one is for PE.)

The Barnard Education

A Barnard education seeks to provide women with the tools and techniques needed to think critically and act effectively in the world today. It fosters a respect for learning, an aptitude for analysis, and a competence in the demanding disciplines of the liberal arts and sciences. By virtue of its special mission and location, Barnard strives to give its students insight into interconnected worlds of knowledge and experience.

The Barnard curriculum enables students to develop their strengths in language and literature, in social and historical analysis, in mathematics and the natural sciences, in the arts and the humanities, and in digital and technological thinking—distinct areas of study that incorporate but also transcend traditional academic disciplines. Built around major methods for apprehending the world and organizing knowledge, the College's basic requirements are designed to equip students to respond both critically and creatively to a rapidly changing world. Barnard students learn to employ a variety of analytical methods in order to engage new complexities of social evolution and scientific knowledge. The College dedicates itself to imparting to every student self-renewing intellectual resourcefulness, the mark of a liberal arts education.

The College faculty encourages each student to select courses in a manner that ensures exposure to distinct forms and traditions of knowledge and to the human experience as lived in various parts of the world. Each student is encouraged to make selections that develop connections among the elements of the curriculum, that promote understanding of global issues, and that acknowledge both the diversity and the commonality of human endeavors in civilizations around the world and through time.

As a college for women, Barnard embraces its responsibility to address issues of gender in all their complexity and urgency, and is committed to an integrated curriculum that recognizes the importance of gender in all forms of human endeavor. The College encourages students to profit from the exceptional and varied opportunities to explore women's histories, challenges, and achievements. Gender-related matters are incorporated into a wide range of courses across the academic disciplines.

Barnard also encourages students to take full advantage of the global city of New York—its international character and economic power; its prominence in science, medicine, and the arts; its cultural abundance; its diverse neighborhoods and peoples; and its architectural richness. In their studies, their work, and their personal lives, Barnard students can avail themselves of the city's unparalleled resources. As an extended campus, New York serves not only as a multidisciplinary research laboratory for coursework and guided field experiences, but also as the site for a vast array of internships and wide-ranging, city-based student activities.

Barnard seeks to ensure that students become aware of, and knowledgeable about, their physical being. Students complete courses that focus on physical activity, fitness, and well-being. The College also

provides additional opportunities for students to exercise and to learn more about fundamental elements of good health and women's health issues.

Majors and Electives

Departments and programs establish majors to provide a structured, focused investigation of an academic discipline or interdisciplinary field of study. Many of Barnard's majors also require students to take courses in cognate disciplines. Generally, there are three levels of study within each major: introductory survey courses; mid-level courses that cover more specialized subject matter and where attention is paid to the methodologies, including the writing styles and formats, of the discipline; and advanced-level seminars with an emphasis on independent research. The College has a long-standing commitment to preparing students sufficiently in a subject so that they may undertake a semester- or year-long project, usually during the senior year, on a topic related to their major.

All students complete the requirements of an approved major. Majors vary in the number of credits required. For students transferring credit from another college or university, a minimum of six semester courses towards the major must be completed while the student is in residence at Barnard. Only courses graded C– or higher will be credited toward the major.

A student must officially declare their chosen major(s) with the Office of the Registrar and with the major department or program, normally in the second term of their sophomore year. The major(s) may be chosen from any listed in the [Barnard Catalogue](#).

A student may major in two fields ("double major") by satisfying all the major requirements prescribed by each department, with no overlapping courses. A student may also opt to double major with one integrating senior project after consultation with the two departments.

Other than the senior project, the student must complete the standard requirements for each major, with no overlapping courses.

A "special" or "special combined" major is developed by a student when they feel that their goals or interests cannot be satisfied within an established departmental major. "Special" majors comprise courses from throughout the College and University curricula and should include at least 12 courses. A faculty member will advise the student for the special major. "Special combined" majors integrate in-depth coursework in two established academic departments and should include at least 7 courses from each department. A faculty member from each department will advise the student throughout their study. The selected courses for the "special" or "special combined" major must demonstrate breadth (adequate coverage within a field), depth (sufficiently advanced coverage), and coherence (evidence of the intellectual integrity of the major). A special or special combined major requires the approval of the Committee on Programs and Academic Standing.

Apart from fulfilling general education requirements and major requirements, a student completes the remainder of the 122-point requirement with elective courses, either within or outside the major department, subject to the approval of the appropriate adviser. A minimum of 102 points of traditional liberal arts coursework is required for most Barnard majors. For the student who majors in a studio or performance-based field, 90 points of traditional liberal arts coursework is required.

No more than 18 points of studio, performing arts, or professional school courses may be credited toward the B.A. degree. Within this category, the following limits exist by discipline:

- A maximum of four arts studio courses
- A maximum of six courses in instrumental instruction (except for Music majors and minors, who may receive credit for eight, including piano instruction)
- A maximum of six studio courses in Theatre (except for Theatre majors who may receive credit for 24 points of studio)
- A maximum of twelve courses (12 credits) in dance technique (except for Dance majors who may receive credit for 24 points of dance). If a student is applying 1 or 2 credits of dance technique classes towards the P.E. requirement, they can take a maximum of 12 credits in dance technique in addition to the credits used for P.E.
- A maximum of two professional school courses (e.g., business school, journalism school, etc.)

Exceptions to this rule are allowed only for courses in the major field or for courses taken in fulfillment of requirements for dual- and joint-degree programs with professional schools of the University. A maximum of 24 points may be credited for studio or performance courses in the major field.

Minors

The selection of a minor field of study is optional. A minor requires at least five courses (three of which must be qualifying Barnard or Columbia courses), each worth 3 or more points, and may be requested by any student who has declared a major after completing a minimum of three courses in the minor field. Requirements depend on the minor chosen (see individual department curriculum statements); courses are selected in consultation with the department chair. Courses for the major and minor may not overlap (except by petition from the minor department's chair, in cases where the minor requires more than 18 points, the major requires more than 40 points, the overlapping courses are required for both major and minor, and the request is for no more than two overlapping courses). Minor courses may also be used in satisfaction of general education requirements. To qualify for the minor, a course must be taken for a letter grade and the student must receive at least a C-.

Foundations

Barnard's curriculum, *Foundations*, applies to students entering in or after Fall 2016.

With Foundations, students explore disciplines across the arts and sciences and master different Modes of Thinking. Students must satisfy the course requirements as listed below.

Some courses are approved to satisfy multiple general education requirements. Students may use such courses to satisfy up to two requirements in separate categories (the categories being Distributional Requirements, Modes of Thinking, and Major or Minor requirements).

All courses satisfying the General Education Requirements must be **at least 3-point courses**. Independent studies are not eligible. AP exams, IB diplomas, and National Exam Credit are not eligible.

I. First-Year Experience

- First-Year Writing
- First-Year Seminar

II. Physical Education (1 Course)

III. Distributional Requirements

- 2 Courses in the Languages (must be in the same language)
- 2 Courses in the Arts/Humanities
- 2 Courses in the Social Sciences
- 2 Courses in the Sciences (1 with a Laboratory)

IV. Modes of Thinking

- 1 Course in *Thinking Locally—New York City*
- 1 Course in *Thinking through Global Inquiry*
- 1 Course in *Thinking about Social Difference*
- 1 Course in *Thinking with Historical Perspective*
- 1 Course in *Thinking Quantitatively and Empirically*
- 1 Course in *Thinking Technologically and Digitally*

Modes of Thinking: Learning Outcome Guidelines

Courses fulfilling these requirements will demonstrate one of the following:

1. A dominant and unifying theme in the course that corresponds to the description of the Mode(s) of Thinking
2. Close matching between the learning objectives for the GER requirement and learning objectives for the course
3. A significant portion of written assignments, projects, or exams focused on the Mode(s) of Thinking
4. A majority of the readings focused on the Mode(s) of Thinking

Thinking Locally—New York City

Requirement: One course that asks students to examine the community and environment in which they find themselves as residents of New York City.

Aim: This requirement encourages students to situate themselves in a local context. In this respect, New York is not just the backdrop of their undergraduate experience, but is equally a rich and diverse object of study in its own right. New York is both a wholly distinctive metropolis and a microcosm of contemporary world experience. The requirement can be met through the study of many topics, from the literature of the Harlem Renaissance to the ecosystems of the Hudson River, from the history of urban planning to the architecture of the Gilded Age.

Students who complete a course satisfying the *Thinking Locally* requirement should be able to attain at least one of the following outcomes:

- Identify specific cultural, social, political, or economic institutions that have shaped the city over time
- Identify distinctive geological or environmental factors that characterize the region
- Describe the contexts and distinctive features of at least one author, genre, or tradition characteristic of New York City

- Situate art, architecture, literature, urban planning, or performance within the social or historical context of the city
- Explore theories of urban structure or form focusing on New York City as an exemplar

Thinking through Global Inquiry

Requirement: One course that asks students to consider communities, places, and experiences beyond their immediate location.

Aim: This requirement asks students to engage with topics across the disciplines that consider the dynamic global relationships among people, ideas, artifacts, or physical phenomena. The subjects or objects of inquiry will span multiple regions, nations, cultures, ethnicities, races, religions, histories, or art forms. This requirement will encourage students to expand their perspectives on the world and their place in it, while complementing the *Thinking Locally—New York City* mode to highlight the ways in which global engagement involves a consideration of the local, as well as the global.

Students who complete a course satisfying the *Thinking through Global Inquiry* requirement should be able to attain at least one of the following outcomes:

- Identify and analyze the ways in which a cultural, social, political, or economic event may have distinct effects in different locations
- Articulate the distinctions among “local” and “international” and “global” in the context of one or more systems—e.g., economic, judicial, literary, philosophical, scientific
- Identify and compare the value systems displayed in materials from multiple cultures
- Identify and critique personal and/or national cultural assumptions and behaviors in relation to those of others
- Identify and analyze the evidence of transnational, multicultural, or multilingual exchanges in materials from multiple cultures
- Utilize multilingualism to investigate the construction of, and interactions among, multiple cultures

Thinking about Social Difference

Requirement: One course through which students examine how difference is constituted, defined, lived, and challenged in cultural, social, historical, or regional contexts.

Aim: This requirement encourages students to engage with disparities of power and resources in all of their manifestations, including but not limited to access to economic or natural resources, political rights, social status, and cultural expression. Areas of study may include race, ethnicity, class, gender, sexuality, ability, nationality, or religion and their intersections within contemporary and historical experience.

Students who complete a course satisfying the *Thinking about Social Difference* requirement should be able to attain at least one of the following outcomes:

- Identify and critique ways that groups understand themselves to be different and how they mobilize difference in the pursuit of a range of ends
- Identify and analyze the intersectional nature of differences in cultural, social, national, or international contexts
- Identify and critique the modes in which such differences are expressed

- Identify and articulate the relations between categories of difference and the general principles of hierarchy and inequality

Thinking with Historical Perspective

Requirement: One course that enables students to study times and traditions of the past, to learn theories and methods of historical analysis, and to discover how different concepts of history shape our understanding of both past and present.

Aim: This requirement asks students to examine the ways in which historical context shapes and conditions the world in which we live; it also challenges them to see the past on its own terms – as an unfamiliar locus of difference. By fulfilling this requirement, students will have a better understanding of the ways in which human experience is shaped by both temporal change and spatial variation.

Students who complete a course satisfying the *Thinking with Historical Perspective* requirement will be able to attain at least one of the following outcomes:

- Identify and analyze historically specific cultural, social, political, or economic structures, and the dominant actors and ideas relevant to the period, region, or theme of the course
- Articulate significant commonalities and differences between structures and ideas specific to the period, region, or theme under study and those in the present
- Evaluate the methodology and evidence used by scholars to study the period, region, or theme of the course
- Examine literature, art or cultural forms in a historical context

Thinking Quantitatively and Empirically

Requirement: One course that exposes students to analysis with numbers, figures, data, and graphs, and to empirical and mathematical methods for better understanding of quantitative and empirical approaches to thinking and problem solving.

Aim: This requirement asks students to develop basic competence in the use of one or more mathematical, statistical, or deductive methods. These may involve applications to particular problems, as in the case of models or data analysis, but may also simply involve abstract reasoning as in pure mathematics or logic.

Students who complete a course satisfying the *Thinking Quantitatively and Empirically* requirement should be able to attain at least one of the following outcomes:

- Demonstrate an ability to apply at least one method of quantitative or deductive reasoning
- Apply quantitative or empirical conceptual tools and procedures to the analysis of problems
- Complete a project involving organizing, analyzing, and visualizing data

Thinking Technologically and Digitally

Requirement: One course that engages students with contemporary and emerging fields such as computational sciences and coding, digital arts and humanities, geographic information systems, or digital design.

Aim: This requirement emphasizes courses in which students actively engage with digital technologies manipulated with computers and accessed locally or at a distance. The requirement fosters students’ abilities to use advanced technologies for creative productions,

scholarly projects, scientific analysis or experimentation. The requirement will instill in students the confidence to make decisions about the adoption and use of current and future technologies in a critical and creative manner.

Students who complete a course satisfying the *Thinking Technologically and Digitally* requirement should be able to attain at least one of the following outcomes:

- Demonstrate proficiency in writing computer code or in using technology to construct knowledge or produce creative or scholarly works
- Analyze the development, efficiency, or use of digital resources
- Use digital tools to critically, creatively, innovatively, or effectively gather, access, evaluate, and synthesize relevant materials
- Complete a project that demonstrates an understanding of technology concepts, systems, or operations

Nine Ways of Knowing

The Nine Ways of Knowing curriculum applies to students who entered Barnard before Fall 2016.

First-Year Foundations

Two courses are required of all first-year students to ensure that their skills in reading, writing, and speaking continue to develop in ways that will support their learning throughout their years at Barnard. First-Year Foundation courses are deliberately kept small; they focus on individual participation and on methods of research, analysis, and revision.

First-Year English

Barnard's liberal arts philosophy takes as its starting point the idea that every student, whatever her level of academic achievement, can continue to improve her skills in writing, analysis, and argumentation. Therefore, all first-year students are required to take a one-semester writing course titled First-Year English (ENGL BC1201 First-Year English: Reinventing Literary History or ENGL BC1204 First-Year English: Reinventing Literary History (Workshop)), designed to cultivate and develop expository writing and related tools of scholarship. Students choose to study one of three rubrics: I. Legacy of the Mediterranean features a curriculum of classic texts representing key intellectual moments that have shaped Western culture; II. Women and Culture features a more global curriculum exploring the role of women in literature and culture; or III. The Americas features a curriculum of texts that exemplifies the dynamic relationship between North, South, and Central American literatures. All three literary traditions are historicized in interdisciplinary contexts to foster better writing across the curriculum.

Transfer students who did not pass a satisfactory course at their previous institution are not required to take ENGL BC1201, but must take ENGL BC3103 The Art of the Essay or ENGL BC3104 The Art of the Essay or a 3-point literature course from the [Barnard English department offerings](#).

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Analyze the thematic structure of literary works through close reading

- Translate critical reading into elegant and persuasive expository writing
- Conduct interdisciplinary research to ground literary works in historical context
- Document sources and incorporate scholarship into original analytical arguments
- Avoid plagiarism and other academic violations of Barnard's Honor Code
- Develop a sense of literary history
- Gain confidence in speaking as well as writing skills in a small seminar setting
- Appreciate the value of incisive writing in courses across the curriculum

First-Year Seminar

First-year students take this one-semester course designed to develop the intellectual skills and styles central to subsequent academic work. This course emphasizes the enhancement of writing and communication skills and the group-discussion mode of intellectual inquiry and discourse.

Seminars center on major themes or issues, and participants read and discuss selected important philosophical, historical, literary, or scientific texts. Students and faculty engage in an extended consideration of a theme of general human concern, one that goes beyond departmental boundaries.

Transfer students are not required to take the First-Year Seminar.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Develop their skills in critical reading and analysis, writing, and effective speaking
- Assess and use textual evidence in support of oral and written arguments
- Explore important issues through significant texts ranging across genres, disciplines, and historical periods

Physical Education and Health

Degree Requirement: One Physical Education course is required for graduation. This course must be completed by the end of the first year. One point will be earned for this one course. One additional point of Physical Education may be counted towards the 122 points required for graduation. Transfer students must consult their transfer credit evaluation to see if a Physical Education class is needed.

Aim: To enable students to become aware of, and knowledgeable about, their physical being through participation in fitness and sports activities. Students are encouraged to enroll in additional activity and self-paced exercise courses toward the attainment of lifelong well-being.

General Education Requirements

The aim of the General Education Requirements is to ensure that each Barnard graduate confronts and engages in central ways of knowing the world. These ways of knowing—divided into nine key areas—include, but also bridge, the traditional disciplines of the liberal arts and sciences. Inquiry into these areas establishes the basis for a Barnard education. Each student studies, from analytical, quantitative, and

artistic perspectives, the major means by which human knowledge has been constructed.

To allow for flexibility within this framework, a student chooses among the designated courses that fulfill each of the nine requirement areas. She will find some courses that offer a broad view of a field, exploring issues that help create an educated citizenry; other courses satisfy the purposes of general education by close scrutiny of critical methods and their specific application. Thus, each student will shape her own academic program, deliberately and distinctively, by electing a combination of wide-ranging introductory courses and more specialized upper level courses to fulfill the General Education Requirements. The areas included in the General Education Requirements are:

1. 1 Course in Ethics and Values (EAV)
2. 1 Course in Social Analysis (SOC)
3. 1 Course in Historical Studies (HIS)
4. 1 Course in Cultures in Comparison (CUL)
5. 2 Courses in one Laboratory Science (LAB)
6. 1 Course in Quantitative and Deductive Reasoning (QUA)
7. 4 Semesters (or equivalent) in one Language (LAN)
8. 1 Course in Literature (LIT)
9. 1 Course in The Visual and Performing Arts (ART)

Courses used to fulfill these area requirements must be at least 3 points and may also be used to satisfy requirements for majors or minors. Students may not use Advanced Placement Credit to fulfill the area requirements unless specifically noted otherwise.

Designated courses may be listed in more than one area; students are free to choose which area requirement is satisfied, but may not use a single course to fulfill two or more areas.

A student's choice of specific courses should be influenced by an intent to forge links among topics and ways of knowing, to find common themes across time and form, and to develop an internal coherence within her own set of courses used to fulfill the College's General Education Requirements. A student should also be mindful that her choices of courses can, and should, expand and enrich her understanding of the world at large, of cultural diversity, and of issues of gender.

1a. Ethics and Values (for current students)

Requirement: One course on the nature and demands of ethical reasoning and the ways in which individuals and communities articulate and embody their values both in reasoning and in practice. These courses recognize that contemporary and historical moral problems are often complex and unresolved.

Aim: In courses that satisfy this requirement, students consider attitudes, judgments, and choices of individuals and cultures concerning what is good and bad, right and wrong, just and unjust. How do larger social, religious, and ethnic contexts shape evaluative attitudes, decisions, and actions? How do we study ethical reason and practice within a complex and diverse global context? Are moral attitudes rooted in reason or emotion, or both? How may values be

formed through narrative, ritual, and a range of other activities? What is the extent of moral agreement and disagreement across and within cultures and historical periods? Are deep conflicts of value susceptible to rational reflection and critical discussion? Courses on the history and politics of human rights, moral philosophy, religion, or the ethics of bioengineering fall under this rubric, but so might courses exploring post-liberal politics, environmentalism and animal rights, race, gender, and global equity.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Explain how individuals or cultures arrive at judgments, expressions, or embodiments of their deeply held commitments
- Engage in debate and discussion of moral reasoning and ethical practice in different cultures and historical periods
- Discuss how differences in deeply held convictions emerge across cultures and historical periods
- Investigate how social, religious, and ethnic customs and ideas shape the moral attitudes and actions of individuals and groups
- Demonstrate a critical understanding of the complexity of moral questions and values

1b. Reason and Value (for students entering before Fall 2011)

Requirement: One course that allows students to explore ways in which values shape thought, thought shapes values, and both guide human actions.

Aim: To introduce ways of thinking, both past and present, about the formation of human values, their role in guiding action, and their susceptibility to rational reflection and critical discussion. This requirement allows students to discover how established disciplines in the humanities, social sciences, and natural sciences—as well as newer interdisciplinary fields—approach a wide range of value-related issues. Courses may address such questions as: What does it mean to follow “the way of reason”? What are the sources of human values? How do we arrive at our conceptions of virtue and obligation, and how do such conceptions shape our notions of a good life and a just society? How have questions about values emerged in different traditions at different times? Other possible subjects include the intersecting ethical dilemmas of private and public life, the relation between moral thought and moral action, and issues of human rights, cultural diversity, and global equity.

2a. Social Analysis (for current students)

Requirement: One course that prepares students to analyze societies and social categories using systematic theoretical and empirical inquiry. These courses must critically and constructively evaluate social structures and practices.

Aim: Social analysis investigates and explains the form and function of social institutions, including the categories on which they are based, their informal and formal operations, and their effects. It is especially concerned with how institutions vary across time and place, how they are shaped by individual and group behaviors, and how power is distributed across different groups. Students will study individuals, groups, or institutions, or the relations among them. They will engage empirical evidence from a variety of sources, such as interviews, oral histories, cultural artifacts, surveys, field observation, experiments, texts and official records. They will learn strategies to make sense of these data such as causal reasoning, hypotheses testing, and critical

analyses of the meanings and measures of empirical categories. Fundamentally, social analysis questions “what is” and contemplates what could or should be.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Apply the methods of research and inquiry of a discipline to the study of human behavior in a social setting/context
- Evaluate the usefulness of evidence for assessing any specific phenomenon and to question the nature of the evidence
- Demonstrate a critical understanding about the social forces that shape opportunity and power in society
- Demonstrate a critical understanding of the interplay between individual action and collective social life
- Identify how scholarships in the discipline have approached social problems and influenced organized efforts to ameliorate social problems

2b. Social Analysis (for students entering before Fall 2011)

Requirement: One course that acquaints students with the central concepts and methods of the social sciences, while also critically examining social structures and processes, and the roles of groups and individuals within them.

Aim: To introduce various ways of analyzing social structures and processes, and to explore how these institutions and processes both shape and are shaped by group and individual behavior. Courses will focus on a variety of institutions and processes, from the family, to the nation-state, to the international economy. All courses will address fundamental questions such as: How are individual and collective human behavior linked to the cultural, economic, and political context in which they occur? How is power distributed across different groups and among individuals? How do social systems develop and change? How can we come to better understand societal dynamics through a variety of quantitative and qualitative methods?

3. Historical Studies

Requirement: One course enabling students to study times and traditions of the past, to learn theories and methods of historical analysis, and to discover how different concepts of history shape our understanding of both past and present.

Aim: To emphasize the importance of historical knowledge for understanding various aspects of human experience and activity, and to develop the skills necessary to conduct or evaluate historical research. Coursework will demonstrate how history is not a simple record of past events, but an interpretation of the past shaped by the theories, methods, and data used to construct it. Among the questions to be raised are: Whose past is remembered? How is it remembered? To serve what purposes?

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Identify the historically specific social, political, and economic structures and agencies, as well as dominant ideas, relevant to the period or theme of the course
- Identify the main historiographical traditions pertaining to the period or theme of the course

- Evaluate the methodology and evidence used by historians to study the period or theme of the course

4. Cultures in Comparison

Requirement: One course that compares two or more cultures from the perspectives of the humanities and/or social sciences.

Aim: To study the diversity and the commonality of human experience, and to examine and question personal cultural assumptions and values in relation to others'. Through comparative methods, courses will explore the beliefs, ideologies, and practices of different peoples in different parts of the world, across time, and through migrations. Courses may include comparison of cultures from two or more geographical areas or from two or more cultures within one area, and may approach the subject matter using anthropological, historical, social, and/or humanistic perspectives.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Identify the differences and commonalities between two or more cultures
- Apply the methods of research and inquiry of a discipline to the comparative study of cultures
- Demonstrate a critical understanding of their personal assumptions and values in relation to at least one other culture

5. Laboratory Science

Requirement: Two courses with laboratory in one science chosen from among: astronomy, biology, chemistry, environmental science, physics, or psychology. Acceptable courses must meet for at least three hours of lecture and three hours of laboratory each week. *Note: students may combine a course in Physics with an appropriate course in Astronomy.*

Aim: To develop intellectual curiosity about the natural world and the processes of scientific experimentation; to convey an understanding of what is known or can be known about the natural world; to introduce basic methods of analyzing and synthesizing the sources of scientific information; and to create scientifically literate citizens who can engage productively in problem solving. Students are expected to master the tools of science and current understanding in one area, and are encouraged to explore the limitations of existing theories and to learn how to ask strategic questions. Laboratory exercises introduce students to techniques of scientific investigation as they make observations, carry out experimental procedures, and learn how results and analyses are communicated in specific visual, quantitative, and written forms.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Ask questions about the natural world that can be tested by experiments or observations
- Analyze and synthesize sources of scientific information to assess what is known, or what can be known, about the natural world
- Practice discipline-appropriate methods of scientific observation, experimentation, data collection, interpretation, and analysis
- Communicate scientific results and analyses in appropriate visual, quantitative, or written forms

Note: Students may fulfill part of this requirement with scores of 4 or 5 on Advanced Placement Examinations in biology, environmental science, and physics (or their International Baccalaureate equivalents).

The following courses meet these requirements.

6. Quantitative and Deductive Reasoning

Requirement: One course in which students learn methods and approaches used in mathematics and related fields involving quantitative expression and logical reasoning.

Aim: To provide a productive acquaintance with at least one means of quantitative and deductive reasoning and to develop an ability to apply this knowledge to the analysis of new problems. Coursework will emphasize how quantitative analysis and deductive reasoning function as creative, elegant, and powerful ways of thinking and as effective sets of conceptual tools and procedures with widespread applications.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Demonstrate a familiarity with at least one method of quantitative or deductive reasoning
- Apply relevant conceptual tools and procedures to the analysis of problems

Note: Students may fulfill this requirement by securing Advanced Placement Credit in mathematics, chemistry, computer science, physics, or statistics (or their International Baccalaureate equivalents or equivalent transfer credit).

7. Language

Requirement: Competence in one ancient or modern language other than English, demonstrated by completion of, minimally, the fourth sequential semester of college-level study, and preferably, a more advanced course with greater emphasis on literary and cultural traditions.

Aim: To provide basic linguistic competence in at least one language other than English, in order to familiarize students with the language, literature, and culture of at least one non-English speaking people. Students are encouraged to develop their language skills to a level that permits them to live and function in another country; to enable them to conduct research, whatever their field; and to prepare them to work effectively in an increasingly global and multicultural society. In becoming familiar with the form and structure of another language, students consider how languages function as tools for communication. Students are encouraged to apply their language skills in courses that fulfill other general education requirement areas.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Read, write, and translate a chosen language of study
- Communicate with speakers of the chosen language, if it is a spoken language
- Demonstrate familiarity with the culture(s) and customs associated with the language of study

Exemptions

1. CEEB SAT II score of 781 or higher (780 or higher in Chinese); CEEB SAT II score of 700 or higher in Hebrew only. No exemptions granted for CEEB SAT II scores in Japanese or Korean.

2. AP score of 4 or 5 in French, German, Italian, Latin or Spanish; AP score of 5 in Chinese.
3. Departmental examination.
4. Students with native English who study in a high school where the language of instruction is not English (e.g., French, for alumnae of the Lycée Français).
5. For international students for whom English was not the primary language of instruction in high school, satisfactory completion of ENGL BC1201 First-Year English: Reinventing Literary History or ENGL BC1204 First-Year English: Reinventing Literary History (Workshop) or one satisfactory semester at Barnard.

Placement

1. Re-centered CEEB SAT II score of 680–780, fourth semester; 570–679, third semester; 400–569, second semester; below 400, first semester, for German.
2. Re-centered CEEB SAT II score of 690–780, fourth semester; 570–689, third semester; 420–569, second semester; below 420, first semester, for French and Spanish.
3. For languages other than French, Spanish, and German, placement will be determined by departmentally administered examinations.
4. For transfer students: the course following the level of the last satisfactorily completed semester course; however, formal withdrawal and reenrollment in a more suitable course may be required for students who are judged by the department to be inappropriately placed and in need of additional preparation or review. In such a case, transfer credit for the previous course is rescinded to allow the student to receive credit for the Barnard/Columbia course of equivalent level. Taking the departmental placement exam is recommended.
5. By departmental examination, if there is no CEEB score or previous college transfer work.

Credit

1. Credit is given for courses satisfactorily completed in residence at Barnard or, in the case of a transfer, at her previous college.
2. No prior assurance of degree credit is given for summer or transfer work in foreign language courses. For work completed at other colleges, credit is granted with departmental approval, or by examination, or on completion of the next level at Barnard.
3. No credit is granted for work equivalent to a level already completed and credited.
4. Although credit for the first semester of an elementary language is not normally granted unless a more advanced course is completed, a student is granted **one** exception maximum to this rule on written request to the Registrar.

8. Literature

Requirement: One course in literature in any language, in the original or in translation; or in comparative literature.

Aim: To develop the skills needed for an informed and aesthetically rewarding reading of literary texts from various times, places, and traditions. Coursework will address the methods and theories by which readers produce meanings and interpretations, and will investigate the pertinence of material such as the authors' biographies or their cultural contexts to literary analysis. Students will study rhetorical strategies employed in literature, becoming more adept at grasping the underlying assumptions and appeal of various forms of discourse.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Recognize a range of rhetorical strategies employed in literary texts and analyze their function
- Describe the contexts and distinctive features of at least one literary author, genre, or tradition

9. The Visual and Performing Arts

Requirement: One course in architecture, art history, studio art, graphic design, dance, music, film, or theatre.

Aim: To build an understanding and appreciation of creative processes and forms of artistic expression. Courses will provide insight into the ways art is used to explore and enrich the world and the human condition. The requirement will enable students to cultivate their skills, to develop an understanding of the ways various arts communicate and are discussed, and to consider works of art in their complex social and historical contexts.

Students who complete a course satisfying this requirement should be able to attain at least one of the following outcomes:

- Produce a work of art or a critical analysis of a work of art that demonstrates an understanding of formal characteristics including technique, style, medium or materials, and composition of design as applicable
- Situate the work in its social or historical context

Requirements for Transfer Students

A student admitted to Barnard with fewer than 24 points of credit is considered a first-year student and is subject to all requirements for first-year students, including First-Year Writing and First-Year Seminar. A student admitted with 24 credits or more is considered a transfer student.

To receive the A.B. degree at Barnard, a transfer student must be enrolled at Barnard (Morningside Heights, or at Reid Hall in Paris, Columbia in London, Columbia in Kenya, Berlin Consortium for German Studies, or Kyoto Consortium for Japanese Studies) for at least four full-time regular academic terms during which they must complete at least 60 points, including at least six courses in the major field (and three in the minor field, if a minor is elected). Additional major (and minor) courses, as well as general education requirements, may be satisfied by transfer courses. Transfer students are eligible for Latin honors when the Barnard grade point average meets the required academic standards.

Transfer students entering with 24 or more points must complete 121 points for the Barnard degree, one point of which is for PE.

Transfer Credit

Courses completed at other accredited colleges and universities which are similar in content and depth to Barnard courses may be submitted for transfer credit. Transfer courses are evaluated after a complete official transcript is received in the [Office of the Registrar](#). Students are asked to submit course descriptions with their requests for transfer credit to the Admissions Office. Credit is not granted for courses with grades lower than C minus.

Credit for approved work at another institution is applied to Barnard's graduation requirement with a maximum of 61 total credits (60

academic credits plus 1 credit for Physical Education) and a maximum of 16 points per term. The 61-credit maximum applies to a student's entire academic record at Barnard, including any credit from AP, IB or other select national examinations and diplomas; any credits transferred in from prior to Barnard; and any credits from study abroad, study leave, or non-Barnard summer courses taken while at Barnard..

Grades for coursework transferred from other institutions are not included in a student's Barnard's GPA and do not appear on the Barnard transcript.

Acceptable transfer work does not usually include applied or professional courses. Specific course and credit maximums may apply to studio coursework (whether transfer or institutional) as outlined [here](#).

Students may not earn transfer credit for online classes taken at other colleges or universities after matriculating at Barnard. This includes credit taken in approved study abroad or exchange programs; credit taken while on leave of absence from the College; and credit taken during summer or winter sessions

For online classes taken prior to a student's matriculation at Barnard, the following policies apply:

Online classes taken in spring 2020 and subsequent semesters will be considered for transfer credit, subject to the applicable policies/ approvals.

In addition to the general requirements that apply to all transfer credit, online courses must also meet the following criteria to be considered for transfer credit:

- Online courses must be offered by a regionally accredited college or university, and must be applicable to an undergraduate degree at that school. For that reason, MOOCs and other non-credit or credit-optional courses (e.g., edX, Coursera, Udacity, etc.) are not eligible for transfer credit.
- Online courses must be offered during a defined term/session, with a definite beginning and end date, and may not be self-paced or entirely asynchronous.
- Online courses must have structured progression through course material.
- Online courses must include significant student-faculty and student-student interaction, in addition to assignments and feedback.

Only 1 point from PE will be used toward the 121 points required for the degree. Students will not receive credit for any additional PE classes.

Once a student has received 1 point for PE, they may receive credit for additional dance technique courses, but they may not receive credit for any further PE courses. (Transfer students who entered before Fall 2013 must complete 120 points and do not receive credit for Physical Education.)

Transfer students may apply for credit for previous summer courses under the regulations governing summer study. There is a 16-credit maximum for summer coursework, including summer courses taken both prior to and during a student's matriculation at Barnard.

Other Academic Opportunities

The Writing Center

In addition to their work in specific courses across the curriculum, Writing Fellows staff the [Erica Mann Jong '63 Writing Center](#) (second floor Barnard Hall). Any Barnard student is welcome to confer on a particular writing project or to discuss some broader aspect of their writing (e.g., articulating, organizing, and structuring ideas; analyzing evidence and connecting it to a claim; or reviewing concepts of grammar). Students confer on chapters of their senior theses, drafts of papers for First-Year English, outlines or ideas for papers in upper-level courses, lab reports, personal statements for admission to law school, etc.

Writing Fellows Program

The [Writing Fellows Program](#) offers students with strong writing, reading, listening and communication skills an opportunity to become writing fellows, peer tutors in writing. During their first semester in the program, students take a training course about the teaching of writing ([ENGL BC3101 THE WRITER'S PROCESS](#)), usually in the autumn term of their sophomore or junior year. Writing Fellows work in different settings (e.g., the Writing Center, writing-intensive courses across the curriculum) with Barnard undergraduates at all levels and in all disciplines. Writing Fellows work an hourly wage and are asked to make a commitment of three semesters to the Program.

Science Writing Fellows

Science Fellows are Writing Fellows focused on supporting students in communicating science at Barnard and beyond. Like Writing Fellows, Science Fellows enroll in the Writer's Process then apply Writing Fellow pedagogy to the more discipline-specific conventions of undergraduate science writing. In addition to supporting courses and working in the Writing Center, Science Fellows collaborate with campus groups including Beyond Barnard and College Science and Technology Entry Program (CSTEP). The Science Fellows initiative was created with the intent of providing a resource for science students that helps them build critical thinking and communication skills.

Creative Writing Fellows

Creative Writing Fellows are a subset of the Writing Fellows Program focused on supporting students taking creative writing classes, applying to take creative writing classes, or writing creative works outside of classes. Creative Writing Fellows apply writing pedagogy to creative writing practices, exploring how readers interact with creative forms (poetry, fiction, creative nonfiction, playwriting, and hybrid forms) differently than academic work. Through conversation and questioning, Creative Writing Fellows help students identify and articulate the decisions they make in their writing and how those decisions affect fellows as readers.

Writing-Intensive Courses Across the Disciplines

Students in these courses undertake at least three writing projects, each of which goes through at least two drafts. Writing Fellows read and confer with students on the first drafts of their papers, which students revise, handing in both first and second drafts to their instructors, who comment on and grade the revised drafts.

The departments of Anthropology, Architecture, Art History, Asian and Middle Eastern Cultures, Biology, Dance, Economics, Education, English, Environmental Science, French, History, Philosophy, Political Science, Psychology, Religion, Slavic, Sociology, Spanish, Theatre,

and Women's Studies have offered writing-intensive courses. Both instructors and students report positive results. Students appreciate the help they get in revising drafts and experience significant gains in their writing skills. Instructors find that the revised papers they receive permit them to focus their comments on course content, rather than on the mechanics of writing.

The Speaking Center

Barnard Speaking Fellows are trained peer-to-peer educators who collaborate with students on building skills for speech communication. In addition to working with courses across the discipline, Speaking Fellows staff [Barnard's Speaking Center](#) (second floor Barnard Hall). Any Barnard student is welcome to confer about a class presentation, job interview, or some broader aspect of speaking in public (e.g., how to articulate, organize, and structure thoughts for a presentation; how to participate in class discussions; and how to practice active listening). Students meet with Speaking Fellows to practice presenting their senior thesis, build confidence in leading or participating in seminar discussions, meeting with professors during office hours, articulating scientific research etc.

Speaking Fellows Program

Students with exceptional public speaking skills and an interest in helping their peers articulate their thoughts may apply for the Speaking Fellows Program. Before becoming a Speaking Fellow, students take a seminar and practicum in the theory and teaching of public speaking ([ENGL BC3123 Rhetorical Choices: the Theory and Practice of Public Speaking](#)), usually in the autumn term of their sophomore or junior year. As part of working with courses across the discipline, Speaking Fellows work with students on the fundamentals of public speaking, presentation-giving, negotiating, and other skills required for course assignments. They meet with Barnard students for the individualized and group workshops, and offer workshops on the art of listening, storytelling, helping with speech anxiety and more. The program approaches public speaking as a critical leadership ability and focuses on helping students know how to use rhetorical skills to have an impact on the world around them. Speaking Fellows receive a stipend and are asked to make a commitment of three semesters to the Program.

Opportunity Programs

The Opportunity Programs are the New York State-funded programs for New York State residents who demonstrate financial need and meet certain academic standards. These include the Higher Education Opportunity Program (HEOP) and the College Science and Technology Entry Program (CSTEP). HEOP and CSTEP scholars receive additional support and advice to help them transition into College, addressing, through programming, counseling, financial support, and other measures, the emotional, social, and academic challenges of being a low-income student or underrepresented/marginalized student at an elite institution.

Arthur O. Eve Higher Education Opportunity Program

The Arthur O. Eve Higher Education Opportunity Program (HEOP) is an academic support and financial assistance program for undergraduate New York State residents who meet New York State economic and education guidelines. HEOP provides academic tutoring, individual counseling, workshops, study groups, and mentorship. All incoming HEOP students participate in an intensive residential summer

academic program which includes instruction in English, mathematics, science, research, and public speaking skills.

Collegiate Science and Technology Entry Program

The Collegiate Science and Technology Entry Program (CSTEP) is a New York State Department of Education initiative designed to provide services to students from under-represented populations or economically disadvantaged backgrounds who are seeking careers in the sciences, mathematics, and technological fields, as well as in the licensed professions.

During the academic year, Barnard CSTEP provides academic counseling, academic and career development workshops, tutorial support, financial assistance for both standardized test preparation as well as graduate/professional school admissions, and support for research experiences in STEM-content areas. CSTEP's summer component introduces a selected cohort of incoming first-year Barnard students to academic enrichment in math and science gateway courses, writing, and graduate school/professional school/career advising tours.

First-Generation Student Initiatives

The Director for First-Generation Student Initiatives in the Dean of the College area works to support all students who identify as first-generation or low-income (FLI), whether they are part of the Opportunity Programs or not. This position exists to help students advocate for their individual needs, as well as to create systemic changes at the College. The Director for First-Generation Student Initiatives provides specialized advising and support to all students who identify with the FLI college experience. Barnard College seeks to empower and enrich the experience of FLI students both inside and outside of the classroom as they navigate Barnard.

Spelman College Exchange Program

Barnard offers students the opportunity to participate in a semester-long domestic exchange program with Spelman College, the historically Black women's college in Atlanta, Georgia. Barnard students studying at Spelman pay Spelman's rates for tuition, fees, room, and board to Barnard. Students interested in a visiting experience at Spelman should speak to the Junior Class Dean.

Study Abroad

All students are encouraged to study abroad as an essential part of their Barnard education. Barnard offers exchanges and programs in over 40 countries around the world. Visit the [Study Abroad program portal](#) for a list of all approved programs. Students who wish to participate in a semester study abroad program that is not on the approved list must submit a [petition application](#) in order to receive approval. Courses taken at institutions abroad other than Columbia-led programs are treated as transfer credit.

Semester and academic year study abroad requires advanced planning. Students are encouraged to meet with Barnard Global staff early in their college career. All Barnard students who plan to study abroad for a semester or the academic year must submit the Preliminary Barnard application by March 15th of the previous academic year. Approval is required by the student's Class Dean, major or pre-major advisor, Financial aid officer (if applicable), and the Barnard Global office. Students are required to submit each course taken abroad for review and approval via the Study Abroad Course Approval form in Slate. Students can request courses be reviewed to count towards

major/minor requirements, general education requirements, or as general elective credit. Please note that courses taken abroad are not guaranteed to transfer and must be reviewed and approved by the Registrar and, in the case of major or minor credit, by the relevant academic department. While abroad, students must be enrolled in the equivalent of at least 12 Barnard credits per semester. An official transcript from the program or university must be sent to the Barnard registrar in order for the course titles and credit to appear on the Barnard transcript. Grades do not appear on the Barnard transcript and are not factored into the overall GPA, although departments may count courses taken towards the major when calculating the major GPA. Coursework abroad must be taken for a grade and may not be taken Pass/Fail. The equivalent of a grade of C- or better must be received in order for a course to be eligible to transfer. More information on study abroad credit transfer policies is available in the [Academics](#) section of the Barnard Global website.

Students pay Barnard tuition, a study abroad assistance fee, and an off-campus comprehensive fee for the period of study abroad. All other costs (housing, meals, other fees, etc.) are payable directly to the host institution at their own rate.

In order to study abroad for the semester or academic year, Barnard students should meet the following criteria as set by the faculty:

- Have no outstanding incompletes or deferred exams.
- Be in good academic and disciplinary standing.
- Have worked out, in consultation with the major advisor and Class Dean, a plan for the completion of all major and general education requirements for graduation.
- Have at least two semesters of college work completed.
- Not be applying to study in the final semester at Barnard.
- Transfer students and students returning from a Leave of Absence must spend a semester at Barnard before going abroad.

Barnard recommends that all students planning to study in a non-anglophone country take courses in the host country language before going abroad. The College also recognizes that there is a wide variety of academic motivations to study abroad beyond language study. Students should consult the eligibility requirements for individual programs as listed under [approved programs](#).

Several short-term faculty led study abroad opportunities are also offered during the academic year as well as the summer. Students must complete an application and be accepted in order to be enrolled in the corresponding course. Courses and credit for faculty-led programs will appear as regular Barnard credit and courses.

Students who participate in other summer study abroad programs (including Columbia University) must complete the [Preliminary Barnard application](#) and the [summer course approval process](#) through the Barnard registrar in order to receive credit. Courses taken during a summer study abroad program are treated as transfer credit.

Students must adhere to their program's code of conduct as well as Barnard's Student Code of Conduct while abroad.

Study at Jewish Theological Seminary

The [Jewish Theological Seminary of America](#) (JTS), located two blocks from the Barnard campus, offers opportunities to Barnard students for specialized study under a cooperative arrangement. Students may enroll in courses at the Seminary under either of two options:

1. individual courses;
2. a double-degree program.

A student wishing to study at the Seminary should consult her adviser and obtain the written permission of the chair of her major department. Courses taken at the Jewish Theological Seminary are evaluated as transfer credit. Students who wish to obtain simultaneously the degree of Bachelor of Arts from Barnard and Bachelor of Hebrew Literature from the Seminary must consult the appropriate dean in the Dean of Studies Office at Barnard and at the Seminary's List College and must be admitted separately to each institution.

Barnard students who are enrolled in the Double Degree Program may request housing at the Seminary. Double-degree students who enroll in the Seminary College will be subject to both Barnard and Seminary tuition charges and pay their student accounts separately to each institution. Students taking JTS courses pay the Seminary directly for those courses at the JTS rate.

Study at the Juilliard School

The [Juilliard School](#) at Lincoln Center offers opportunities to Barnard students for individual courses in music. For a five-year program leading to the Barnard A.B. and the Juilliard M.M., rigorous auditions are required for which early application must be made. Students interested in these options may obtain further information and audition dates by consulting Dr. Gail Archer, Coordinator of the Barnard Music Program (319 Milbank), at the time of admission to Barnard or as early as possible. Students enrolled at Barnard taking music lessons at Juilliard pay tuition only to Barnard. Students admitted to the Juilliard M.F.A. program pay tuition to Barnard for courses taken at Barnard and to Juilliard for courses taken at Juilliard.

Study at the Manhattan School of Music

The [Manhattan School of Music](#) is located one block to the north of the Barnard campus. Under a cooperative program of cross-registration, musically qualified Barnard students who pass required auditions have the opportunity to enroll in six semesters of private instrumental lessons at the Manhattan School, subject to the regulations specified in the application form available at the Office of the Registrar. Majors and minors in Music may take eight semesters of lessons. Students must complete a Barnard approval form each semester before receiving permission to enroll at the Manhattan School. Students pay Barnard tuition.

Study at Teachers College

Permission is needed to take a course at [Teachers College](#). Students should obtain an application from the Office of the Registrar, obtain course approval from the Dean of Studies, and return the completed form to the Office of the Registrar. Teachers College courses require the payment of additional tuition at the Teachers College rate over and above Barnard tuition.

Joint Degree Intrauniversity Programs

Barnard offers double and joint degrees in coordination with other schools in the University system, including the [School of International and Public Affairs](#) (SIPA). Details on specific programs are given below.

School of International and Public Affairs: International Affairs and Public Administration

Barnard College and the Columbia University School of [International and Public Affairs](#) offer two joint programs leading to the A.B. degree at the end of four years and the Master of International Affairs (M.I.A.) or Master of Public Administration (M.P.A.) after one additional year.

Interested students should consult Dean Youngblood-Giles in Beyond Barnard in as early as the sophomore year.

Qualified students complete the application in the spring of the junior year. The final decision on admission to a program rests with the SIPA Review Committee.

Admission to a joint program does not constitute automatic admission to the M.I.A. or M.P.A. graduate program. Final admission is conditional upon the applicant's receiving the A.B. degree from Barnard. A Barnard student's eligibility for the joint programs is governed by the following conditions:

1. A record of strong academic performance.
2. At least four semesters of matriculation at Barnard before enrolling in a joint program.
3. Fulfillment of all general education requirements and almost all major requirements before the senior year.
4. No more than four courses in the major to be completed during the senior year.
5. Completion of introductory courses in microeconomics and macroeconomics and a strong background in quantitative courses.
6. Pertinent professional experience.

A Barnard student in the Program must satisfy all Barnard degree requirements. Courses in the School of International and Public Affairs may be used to fulfill major requirements only with the written permission of the chair of the major department. During the senior years she must complete at least 24 points of course work at the 4000 level or above, including the first-year required core courses. An internship, usually during the summer between the fourth and fifth years, is also required.

COURSES OF INSTRUCTION

The Discipline of Africana Studies

As a field of study, Africana Studies analyzes the history, cultures, modes of political thought and social movements engendered by the freedom struggles of black people. It engages as well the unfinished work of achieving fully enfranchised forms of citizenship and the many forms of expressive culture African diasporic communities have created and inspired as articulations of their histories, experiences, and struggles. In so doing, Africana Studies trains students in the analytical tools necessary for rigorous and culturally sensitive analyses of racial formation both historically and in contemporary societies.

Africana Studies Department

The Africana Studies major offers an interdisciplinary, comparative approach to the study of the history, politics, cultures, literatures, and experiences of peoples in Africa and the African Diaspora. Through this course of study, students come to see the centrality of Africa and the black Diaspora in the modern world and develop a critical understanding of the political, social and ideological forces that shape their place in the world. Our introductory courses encourage students to understand the world from multidisciplinary and transnational perspectives, to critically engage with primary and secondary materials, to develop key geographical knowledge and to engage in comparative analysis. In consultation with their Africana advisor, majors determine a course of study that draws from a range of disciplinary and/or theoretical perspectives. This coursework includes a required colloquium which grounds students in key theories and methodologies of the black Diaspora, a Harlem course that asks students to think about our historic location in relation to the larger Diaspora and a senior seminar that requires students to conduct groundbreaking research.

This multidisciplinary training not only involves a questioning of disciplinary boundaries, but also provides students with the intellectual tools necessary to think critically about the production and dissemination of knowledge. Our home in a premier college for women means that Africana Studies majors at Barnard develop a particular understanding of how gender and sexuality, as well as race, class, religion and region interact with and transform each other in individual and group experiences.

Mission

As a department for the multidisciplinary study of the history, politics, cultures, and literatures of Africa and African Diaspora communities in the Americas, the Caribbean and Europe, Africana Studies at Barnard is defined by a unique approach to studying the African Diaspora that centers on a gendered analysis of racial and diasporic formations. Its central mission is to train students to think critically about the gendered nature of racial difference from a relational perspective: at once locally, globally, and trans/nationally. The curriculum provides students with a deep knowledge of:

- the history of African and African-descended cultures forged prior to and as a result of the Middle Passage;
- the transnational communities of affiliation created in response to diasporic dispersal; and
- the diverse forms of cultural production engendered by Blacks in the multiple contact zones that constitute the African diaspora.

Student Learning Outcomes

Students who complete the major in Africana Studies should be able to attain the following outcomes:

1. integrate research tools and methods from a range of disciplines in order to study the history, politics, cultures, literatures, and experiences of peoples in Africa and the African Diaspora;
2. compare histories and cultures of black peoples across the globe;
3. evaluate and interpret primary and secondary source materials;
4. express themselves effectively in writing and oral presentations;
5. demonstrate their understanding of Harlem’s symbolic and historical importance to peoples of the African Diaspora;
6. identify and communicate the importance of Africa and the African Diaspora to an increasingly global, diverse and interconnected world;
7. demonstrate in their coursework knowledge of the key intellectual traditions of the African Diaspora;
8. analyze and critique representations of peoples or cultures of Africa and the African Diaspora;
9. design, execute and present an original research project.

This department is supervised by the Africana Studies Committee:

Chair: Celia E. Naylor (Africana Studies/History)

Core Faculty: Yvette Christiansë (Africana Studies/English); Kim F. Hall, (Africana Studies/English); Monica M. Miller (Africana Studies/English); Celia E. Naylor (Africana Studies/History); Colin W. Leach (Psychology/Africana Studies); Tamara Walker (Africana Studies)

Secondary Faculty: Abosede George (History); Maja Horn (Spanish and Latin American Cultures);

Affiliated Faculty: Severine Autesserre (Political Science); Brian Larkin (Anthropology); Mignon Moore (Sociology)

Requirements for the Major

I. The Africana major consists of ten courses (a minimum of 38 credits) to be distributed as follows:

I: Introductory Courses

Each student will take 2 (of the 3) introductory Africana Studies courses. We strongly suggest students take Introduction to African Studies (AFRS 2004) AND either Caribbean Cultures and Societies (AFRS 2005) OR Introduction to the African Diaspora (AFRS 2006)

AFRS BC2004	INTRODUCTN TO AFRICAN STUDIES	3
AFRS BC2005	CARIBBEAN CULTURE # SOCIETIES	3
AFRS BC2006	INTRODUCTION AFRICAN DIASPORA	3

II. Language

Each student must demonstrate proficiency in any of the languages of Africa or the diaspora (including Arabic, Dutch, English, French, Hausa, Italian, Portuguese, Spanish, and Swahili) by completing at least the fourth semester of that language, or its equivalent. This requirement is not in addition to the general foreign language requirement.

III. Harlem

Each student will take a course on Harlem, chosen in consultation with her advisor, from among the offerings at Barnard or Columbia.

IV. Electives

Each student will, with the approval of her advisor, select five electives. Of these five, one must be on Africa and one must concern issues of gender.

V. One Semester Colloquium in Africana Studies

AFRS BC3110	THE AFRICANA COLLOQUIUM	4
-------------	-------------------------	---

VI. Senior Seminar

Students will complete a one-semester program of interdisciplinary research in preparation of a senior essay.

Requirements for the Minor

Although the college requires students to declare the minor formally after they have completed course work for the minor, the Africana Studies program strongly encourages students to meet with the Africana Studies Director (or the minor advisor) to plan a course of study and fill out an "intent to minor" form.

The Africana minor consists of five courses to be distributed as follows: Two of the introduction courses below.

AFRS BC2004	INTRODUCTN TO AFRICAN STUDIES
AFRS BC2005	CARIBBEAN CULTURE # SOCIETIES
AFRS BC2006	INTRODUCTION AFRICAN DIASPORA

One course on Harlem, chosen in consultation with her advisor, from among the offerings at Barnard or Columbia. Two electives chosen by students in consultation with the minor advisor.

AFRS BC2004 INTRODUCTN TO AFRICAN STUDIES. 3.00 points.

Interdisciplinary and thematic approach to the study of Africa, moving from pre-colonial through colonial and post-colonial periods to contemporary Africa. Focus will be on its history, societal relations, politics and the arts. The objective is to provide a critical survey of the history as well as the continuing debates in African Studies

AFRS BC2005 CARIBBEAN CULTURE # SOCIETIES. 3.00 points.

This course offers a chronological study of the Anglophone, Hispanophone, and Francophone insular Caribbean through the eyes of some of the region’s most important writers and thinkers. We will focus on issues that key Caribbean intellectuals—including two Nobel prize-winning authors—consider particularly enduring and relevant in Caribbean cultures and societies. Among these are, for example, colonization, slavery, national and postcolonial identity, race, class, popular culture, gender, sexuality, tourism and migration. This course will also serve as an introduction to some of the exciting work on the Caribbean by professors at Barnard College and Columbia University (faculty spotlights)

AFRS BC2010 Colonialism in Africa. 3 points.

Not offered during 2023-2024 academic year.

This course will prepare students to examine diplomatic interactions involving African and European polities during the eighteenth and nineteenth century and the role that military force played in helping European nations secure access to territory and control of resources on the African continent. Students will also examine the vast array of forensic evidence (the broad range of ritual compacts and treaties, the forms of proof and the legal debates) that European merchants and political representatives used to secure entitlements to land and resources.

AFRS BC2115 BLACK FEMINIST PORTAL: TRANSFORMATIVE TEXTS. 4.00 points.

In the Spring of 2021, Black Feminist Portal will invite students engage a multi-generational literary and activist archive of survival and change. Using the emerging technology of the digital oracle, the course empowers students to engage the complexity of their own lives in this moment of historic change supported by the writing of Black women writers whose work is central to the formation of Black feminist theory, practice and possibility. Topics considered include: how the personal and the political shape each other, community accountability and responses to violence, and race and educational institutional change. There is also ample space in the course for students to focus on the transformations currently occurring in their own lives. This course will take place through a combination of asynchronous resources and live meetings via video conference and is made possible by a partnership with Black Feminist Film School which allows for the creation of in-depth materials that students can engage on their own time

AFRS BC2510 Food, Ethnicity & Globalization. 3 points.

BC: Fulfillment of General Education Requirement: Ethics and Values.

Not offered during 2023-2024 academic year.

Prerequisites: None

Corequisites: None

When people produce, consume or refuse food, choices that often seem "natural," unthinking and highly personal are in fact daily acts of identity and belonging that place individuals in the global circulation of goods, people and resources. This course examines representations of food and foodways as a way of understanding the politics of representation and the complex interplay of race, ethnicity and gender. The course's units on Ethnicity, Migration and Identity; Food & Globalization; Food and Power; and the Politics of Pork, will allow students to understand foodways as key expressions or embodiments of cultural affiliations and food choices as linked to questions of morality and values.

AFRS BC3001 Politics of Gender in Contemporary South Africa. 1.5 point.

This course will only take place from September 23rd through October 9th.

This module is designed to offer mid-senior level students with an interest in African Studies an intensive engagement with the politics of gender and sexualities in specific African contexts of the c21. Although the module will include discussion of aspects of the sexual and gendered operations of colonial praxis, the concentration will be on the ways in which post-flag democracy cultures have taken up the question of gender and sexualities. We will explore debates on the representation and realities of lesbian and transgendered experiences, the meaning of race-based identity-politics within "new" democracies, the narratives of "the body" as they emerge through medical and religious discourses on "women," and discourses of "e-masculinization" and militarism. Note that this course will only run from September 16th through September 30th.

AFRS BC3002 HARLEM MOVEMENT LEGACIES. 4.00 points.

Harlem Movement Legacies is intended for you to explore the geography and culture of Harlem, New York City through movement. This course embodies the Akan principle of sankofa, looking back to move forward: We will explore the cultural roots of movement styles we engage with, come to understand their influence within the community, and their importance to the lives of their participants and viewers, all while looking toward the futures of these movement traditions. Students will engage with a mixture of concert, popular, and vernacular dance forms, exploring venues for dance practice and performance from The Apollo to the street. The topics covered during the semester are not intended to be exhaustive or reflect a chronological ordering, but rather a survey of the breadth of movement practices in Harlem. Students will have the opportunity to witness, embody, critically discuss and write about dance forms that have emerged and thrive Uptown. Most importantly, the work students produce by the semester's end will contribute to critical archival documentation of Harlem's movement culture bearers. Experiential learning will take place through lectures, films, site visits, and attending classes, performances, or rehearsals. During the semester, you will be asked to apply critical thinking, reading, and writing skills to Dance-related texts and choreography. By the end of the semester, you should be able to understand and interpret the language and form of movement work in the context of time and place. The big questions we will tackle during this course include: How do we see, write about and talk about dance? What is legacy? What are the dance and movement traditions in Harlem? What are the artistic impulses, pertinent issues, communities and contexts that bring this work to life? How are Harlem movement legacies honored and sustained? What is the future of these traditions? Dance itself is the primary source material for this course, and we will learn to read it closely as we ask these questions. The major assignments for this course will ask students to capture and interpret Harlem's movement legacies through movement, oral storytelling, and writing

AFRS BC3020 Harlem Crossroads. 3 points.

Not offered during 2023-2024 academic year.

Studies Harlem in the context of African-American and African diaspora culture and society as well as American urbanization. Primarily focusing on Harlem of the nineteenth and twentieth centuries, the course offers students opportunities to discuss political economy, immigration, migration and the role of the city in social life.

AFRS BC3021 Queer Caribbean Critique. 4.00 points.

This seminar analyzes the different critical approaches to studying same-sex desire in the Caribbean region. The region's long history of indigenous genocide, colonialism, imperialism, and neo-liberalism, have made questions about "indigenous" and properly "local" forms of sexuality more complicated than in many other regions. In response, critics have worked to recover and account for local forms of same-sex sexuality and articulated their differences in critical and theoretical terms outside the language of "coming out" and LGBT identity politics. On the other hand, critics have emphasized how outside forces of colonialism, imperialism, and the globalization of LGBT politics have impacted and reshaped Caribbean same-sex desires and subjectivities. This course studies these various critical tendencies in the different contexts of the Anglophone, Francophone, Hispanophone, and Dutch Caribbean

AFRS BC3055 Slave Resistance in the United States from the Colonial Era to the Civil War. 3 points.

Not offered during 2023-2024 academic year.

Analyzes the multifaceted nature of slave resistance, its portrayal and theorization by scholars. Critically examines the various pathways of resistance of enslaved Africans and African-Americans, both individually and collectively (e.g., running away, non-cooperation, theft, arson, as well as verbal and physical confrontation, revolts and insurrections). Considers how gender shaped acts of resistance.

AFRS BC3065 Writing Diasporic Cities. 4 points.

BC: Fulfillment of General Education Requirement: Ethics and Values.

This course considers representation of four cities in which diasporic communities have settled and negotiated the psychic and material terrain that stretches from a past homeland to a settled homeland. We look at New York, London, Kinshasha, and Cape Town where communities of different African diasporas- historical and contemporary- as well as South Asian diasporas have settled.

Locally, we enter a space like the contemporary Malcolm Shabazz market to attend to the transnational, mercantilist as well as cultural public spheres that it creates. We also look at earlier trans migrations by African Diasporic groups moving from Jamaica to Harlem to Marseilles. We consider London in the 1980s and the early 2000s.

Thematically, we consider different kinds of displacement and their impact upon women. We foreground race, ethnicity, nationalist discourses, global economies, and the publishing, distribution and marketing networks of the Arts produced in these cities. We read across genres and consider graffiti in neighborhoods that have diasporic communities.

AFRS BC3100 Medicine and Power in African History. 4 points.

Not offered during 2023-2024 academic year.

Examines medical discourse and practice in Africa, emphasizing relationships between power and medical knowledge. Topics include: medicine and empire, tropical medicine, colonial public health and social control, labor, reproductive health, and HIV/AIDS.

AFRS BC3110 THE AFRICANA COLLOQUIUM. 4.00 points.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 18 students. Priority will be given to Africana majors and CCIS students (Africana Studies, American Studies and Women's Studies majors; minors in Race and Ethnic Studies).

This course is concerned with two interrelated topics: 1) the long, complicated history of voyages to Latin America; and 2) the myriad and evolving ways voyagers to the region have portrayed its landscapes, people, food, festivals, and more. The course will move chronologically from the 15th century to the present, with each week devoted to grappling with a type of voyage characteristic of a given era, including: conquest voyages undertaken by figures such as Christopher Columbus and Hernán Cortés settler-colonial voyages undertaken by Iberians seeking new lives in the New World captive voyages undertaken by Africans destined for enslavement in households, cities, and rural environs freedom voyages undertaken by African Americans escaping from slavery sex-tourism voyages undertaken by North Americans and Europeans We will view these topics through a combination of different forms of media (such as letters, travel accounts, features, and films) and traditional scholarly sources that will help contextualize them

AFRS BC3120 History of African-American Music. 3 points.

Not offered during 2023-2024 academic year.

Survey interrogates the cultural and aesthetic development of a variety of interconnected musical genres - such as blues, jazz, gospel, soul, funk, R&B, hip-hop, classical and their ever changing same/names - viewed as complex human activities daringly danced at dangerous discourses inside and outside the American cultural mainstreams.

AFRS BC3121 Black Women in America. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Students must attend first day of class and admission will be decided then. Priority will be given to CCIS students (Africana Studies, American Studies and Women's Studies majors; minors in Race and Ethnic Studies). Enrollment limited to 20 students. Examines the roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as WMST BC3121.

AFRS BC3125 Diasporic Women at Work. 4 points.

This course is an exploration of different ways of conceptualizing the relationships between gender and labor over time, including critiques linking gendered labor to race and class. Grounded primarily in ethnography and political economy, we will look at some of the changes and continuities in the relationship between gender and forms of labor ranging from women in factories to affective labor/caring work in the African Diaspora, particularly the Caribbean and Latin America.

AFRS BC3134 Unheard Voices: African Women's Literature. 4 points.

How does one talk of women in Africa without thinking of Africa as a 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora.

AFRS BC3144 Black Theater. 4 points.

Theatre is always reflecting, constructing, and resisting notions of community. In this course we will explore the way in which Black Theatre, in particular African-American theatre, has served as an intervening agent in racial, cultural, and national identity by examining the relationship between Black theatre development and the historical circumstances surrounding that development. In 1998, at a Theatre Communications Conference in Princeton New Jersey, August Wilson—one of the premier playwrights of the century as well as one of the most prolific African-American playwrights in American history—demanded a theatre for and by black Americans, "art that feeds the spirit and celebrates the life of black America." His statement raised considerable questions and inspired heated debates that crossed both racial and cultural boundaries. In this course one of the questions we will explore is taken from August Wilson: Can we define American Black culture through plays written by Black playwrights (in particular African-American playwrights)? Within the category of Black/African-American theatre, how does gender, culture, geography and class fit it?

AFRS BC3146 African American and African Writing and the Screen. 4 points.

Not offered during 2023-2024 academic year.

Focuses on the context and history of representations of African Americans and Africans in early American and other cinematographies; the simultaneous development of early film and the New Negro, Negritude and Pan African movements; and pioneer African American and African cinema.

AFRS BC3148 Literature of the Great Migration. 3 points.

Not offered during 2023-2024 academic year.

(Also ENGL BC 3148) Examination of fiction, poetry, essays and films about the Great Migration (1910-1950) of African-Americans from the rural South to the urban North, focusing on literary production in New York and Chicago. (This course satisfies the Harlem Requirement for the Africana Studies major).

AFRS BC3150 RACE #PERFORMNCE IN CARIBBEAN. 4.00 points.

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Sophomore Standing. Enrollment limited to 18 students.

Analysis of the shifting place and perception of Afro-Caribbean performance in Caribbean societies. This course takes a cross-cultural approach that examines performance through the lens of ethnography, anthropology, music and literary criticism.

AFRS BC3516 Environmental Humanities in the Global South. 4.00 points.

"This interdisciplinary course studies how individuals and communities in the Global South attempt to make sense of the 'sense of an ending' that underlines all warnings about environmental crisis and climate change. Our interdisciplinary course has a doubled foundation out of which our readings and discussions will grow: communal understanding and knowledge about local environments, on one hand, and the relation between such knowledge and the data and information gathered by scientists." "We therefore begin with a simple question: what is the relation between the Humanities and the work of scientists? Scientists undertake painstaking, necessary research to provide communities and their governments with vital, necessary information. Individuals and communities interpret and translate this information, often affectively. An organization of scientists studying carbon levels across Africa can list the progressive increase in temperatures across Africa over a period of years and calculate anticipated increases. An image based on this data may visualize the projected rise." "A glance reveals something dire based on the way we associate red with danger. Our course is oriented towards who lives beneath the surfaces of data and images that 'draw a picture' for us. We read for how communities and individuals explain and communicate their relation to the historical and changing environments. In other words, we attend to narration, in different forms—fiction, poetry, song, travelogue—to grasp how experiences are rendered comprehensible. There is a broad 'where' as well, and a fluid 'when.' 'Where' takes us into the portmanteau category of 'The Global South.' We bracket the scope of this category to focus upon specific places in the Indian Ocean, sub-Saharan Africa and diasporic African communities. 'When' permits us to think of time, the time of the world, the times of change and the times of aftermaths. Go into an archive, open a history book, a sacred text and you will encounter 'endings.' We enter British colonial archives to see how signs of 'When' also allows us to face an underlying dread that might be called a 'sense of an ending' and to see just how many such 'endings' have come to pass. This is how we enter the diasporic histories of environmental change related to colonialism and the enslavement and transportation of whose descendants live in the broader 'Global South' Africans

Not offered during 2023-2024 academic year.

Prerequisites: None

Corequisites: None

Examines the music making practices of African-American women in blues, gospel, jazz, and rock at different periods in the 20th century. Considers the content and context of these musical productions as well as artist biographies in order to understand the significance of music for these producers and their audiences.

AFRS BC3519 Race Before Race: Premodern Constructions of Social Difference. 4 points.

This course expands the reach of traditional analyses of race and ethnicity by demonstrating the key role of premodernity (Classical, Medieval and Early Modern eras) in developing modes of race thinking that shape the modern world. We will use intersectional approaches and critical race theory to examine both theorizing about race and primary materials that (re)produce race across time and in the present moment. What does it mean to look at premodernity through the eyes of the African Diaspora? Our examination of the different types of premodern race thinking will culminate in a collaborative class project in which students will be asked to apply critical race theory inflected approaches to editing an early modern text.

AFRS BC3528 Harlem on My Mind: The Political Economy of Harlem. 4 points.

Drawing on social histories, primary sources, fiction, and popular culture this course will explore the postwar history of Harlem. We will place Harlem in the broader context of New York City and explore how domestic and transnational migration patterns have shaped its history. Specific topics include: urbanization, migration and settlement patterns; racial liberalism and political incorporation; critical engagement with East Harlem as research cite for "culture of poverty" theorists; state criminalization of youth; underground, illegal and illicit economy from the 1960s to the 1990s; struggles over property and gentrification; and perhaps most importantly, exploring Harlem as cultural and political center of the Black World throughout the twentieth century.

AFRS BC3532 ROMARE BEARDEN:HOME IS HARLEM. 4.00 points.

Prerequisites: This course is limited to 20 students

Prerequisites: This course is limited to 20 students Romare Bearden: Home is Harlem, is an exploration into one of the greatest American artists finding home in Harlem. The noted painter, collagist, intellectual and advocate for the arts, spent his childhood and young adult life in Harlem. Known for chronicling the African-American experience, he found rich sources for artistic expression in the Manhattan neighborhoods above 110th Street

AFRS BC3550 GAY HARLEM. 4.00 points.

This course explores representations of queer Harlem in African American literature, sonic culture, and performance. We will consider the history and making of Harlem, key figures of the Harlem Renaissance, and the aesthetic innovations of writers and artists who defied the racial, sexual, and gendered conventions of their time. We will be guided by an intersectional approach to the study of race, gender, and sexuality and the methods of Black queer studies, African American and African diaspora literary studies, as well as sound and performance scholarship. We will ask when, where, and what was/is gay Harlem; how we might excavate its histories; map its borders; and speculate on its material and imagined futures

AFRS BC3554 Blackness and Comedic Performance in the U.S.. 4 points.

This course explores the history of race and comedic performance and, in particular, how comedy has historically shaped as well as challenged racial, gender and sexual identities from the mid-1800s to the present. From the performance of blackness by white blackface minstrels in the 1830s and 40s to vaudeville at the turn of the 20th century, early film comedies, and the work of more recent stand-up comedians, the course will seek to answer some of the social questions posed by these performers. For example, does comedy more often reflect gender, ethnic, and racial stereotypes or challenge them? How do we account for the persistent emphasis upon racial and gender differences? Can comedy be “politically correct” and still be funny? How important is “in-group” laughter to comedy’s success and what should we make of the uncomfortable laughter of those not in the in-group? We will explore the work of comics from Bert Williams, Stepin Fetchit, and Hattie McDaniel to Moms Mabley, Chris Rock and Wanda Sykes. We will investigate the work of these comics through the ideas of modern thinkers who have written on the cultural history of American humor and the social and personal aspects of jokes and comedy. We will read and view the works of these comedians as well as important theoretical texts on humor that provide us with analytical tools to investigate how comedic performance has historically constituted blackness and African-American intellectual history.

AFRS BC3556 Ethnography of Black America. 4 points.
Not offered during 2023-2024 academic year.

This course critically examines ethnographic texts about Blacks in the United States, focusing as much on what they proffer about Black American culture as on the various socio-political contexts in which this body of scholarship has been produced. The goal is to advance an understanding of the larger social forces undergirding the production not only of formations of Black culture, but also of knowledge about Black America. A further goal is to foster a critical understanding of the anthropological enterprise itself.

AFRS BC3560 Human Rights and Social Change in Sub-Saharan Africa. 4 points.

BC: Fulfillment of General Education Requirement: Reason and Value (REA), BC: Fulfillment of General Education Requirement: Ethics and Values.

Prerequisites: Permission of the instructor.

Examines the evolution of the ideas, institutions and practices associated with social justice in Africa and their relationship to contemporary international human rights movement and focuses on the role of human rights in social change. A number of themes will re-occur throughout the course, notably tensions between norms and reality, cultural diversity, economic and political asymmetries, the role of external actors, and women as rights providers. Countries of special interest include Liberia, Senegal, South African and Tanzania.

AFRS BC3562 Caribbean Sexualities. 4 points.

The seminar offers an interdisciplinary study of sexualities in the Caribbean from the conquest to the contemporary moment. The principal focus will be on how sexualities intersect with questions of gender, race, nation, and diaspora in the Anglophone, Francophone and Spanish-speaking Caribbean. We will approach the study of Caribbean sexualities from various disciplines and areas of study, including history, anthropology, sociology, ethnomusicology, performance studies, literary studies, gender studies, cultural studies, and postcolonial theory. The first part of the seminar addresses Caribbean sexuality in the context of conquest, colonization and slavery, and then national independence. The remainder of the course addresses areas that have drawn particularly intense scholarly debates, including Caribbean family formation, masculinity, and same-sex desire, as well as sex tourism, and the gender and sexual politics of Caribbean popular music and dance.

AFRS BC3563 Translating Hispaniola. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Students will look at the extent to which the nation-language border separating Haiti and the Dominican Republic represents the legacy of a colonial history whose influence in many ways undermines regional community in the Caribbean to the present day. Beginning with Christopher Columbus’ fraught “discovery” of Hispaniola and ending with the 2010 earthquake and its aftermath, the course explores social, political, and cultural phenomena common to both nations – among which, slavery and freedom, Euro-North American imperialist intervention, and diaspora and migration – as these issues manifest in primary and secondary works of creative fiction, history, anthropology, and political theory. From oral histories to newspaper articles to short fiction by Junot Diaz and Edwidge Danticat, this course traces the history of a divided Caribbean family. Students will engage with recently created digital humanities resources concerning Haiti and the Dominican Republic and also develop interactive, web-based tools that allow for a more nuanced and expansive understanding of Hispaniola’s transnational past, present, and futures. *Please note that there is no language requirement for this course.*

AFRS BC3570 Africana Issues: Diasporas of the Indian Ocean. 4 points.
Not offered during 2023-2024 academic year.

The Indian Ocean has been called the cradle of globalization, a claim bolstered by seasonal monsoon winds and the trade that these enabled. We will consider the aesthetic histories of such trade by engaging literary and other cultural exchanges (including film, visual arts, music, and dance). What did the Zulu prophet Isaiah Shembe learn from Gujarati poets? Other than a major slaving center and source of spices, what role did Zanzibar play in the development of music and literary forms that look to Oman as well as the East Coast of Africa? We focus on four sites: Durban (South Africa), Bombay (India), Zanzibar (Tanzania) and Port Louis (Mauritius). This course will be taught simultaneously between Barnard in New York and the University of Witwatersrand in Johannesburg, South Africa. Students from both campuses will be encouraged to interact electronically and to establish a blog and website. The course will also have live-streamed guest speakers from chosen sites around the Indian Ocean.

AFRS BC3585 POOR IN AMERICA: THE EXPERIENCE AND IMPACT OF FINANCIAL DEPRIVATION. 4.00 points.

This course focuses on the life experiences and impact of poverty in the contemporary United States. We will be exploring the consequences of financial and material deprivation on work, housing, health, parenting, children, as well as the limits and opportunities for inter-generational mobility and how each of these intersect with gender, racial and ethnic identities. We will be learning about the experiences of individual persons as well as how these particular experiences reflect the overarching patterns of social, political and economic trends in the United States. The course will incorporate a diverse set of disciplinary perspectives to shed light on the challenges faced by persons living in poverty. In addition, there will be an emphasis on learning about and critically assessing methodological approaches applied in the literature. No prior knowledge of methods is required and any technical references will be explained in class

**AFRS BC3590 The Middle Passage. 4 points.
Not offered during 2023-2024 academic year.**

Prerequisites: Admission to this seminar is by application only. Applications will be made available on the Africana Studies website: www.barnard.edu/africana

In addition to learning about the history of the Middle Passage, students will examine literary and political responses to this forced immigration out of Africa. Identifying responses to slave holding pasts, the seminar culminates in a visit to an historic site of importance in the Middle Passage.

AFRS BC3998 SENIOR SEMINAR. 4.00 points.

A program of interdisciplinary research leading to the writing of the senior essay. All Africana majors must complete the one-semester Africana Studies Senior Seminar in the fall and submit a senior essay as one of the requirements for this course. A student who has successfully completed the Africana Studies Senior Seminar, has demonstrated the ability to complete a senior thesis, and has obtained approval from the faculty member teaching the Senior Seminar may take an Independent Study with a Barnard or Columbia faculty member or a second thesis seminar in another department in order to complete a senior thesis in Africana Studies in the spring semester

AFRS GU4000 HARLEM AND MOSCOW. 3.00 points.

Prerequisites: NA The Russian Revolution of 1917 is widely acknowledged as a watershed moment in the global struggle for worker's rights, but it also played a considerable role in the fights against racism and colonialism (Lenin considered both tools of capitalist exploitation). In Soviet Russia's project to make racial equality a central feature of communism, two urban locales featured prominently: its capital city of Moscow and the burgeoning Black cultural center that was Harlem, New York. This course will explore cross-cultural encounters between Moscow and Harlem as a way to ask larger questions about race, class, and solidarity across difference. Students can expect to read novels, memoirs, and cultural reportage from Harlem Renaissance figures (Langston Hughes, Claude McKay, Dorothy West) who traveled to Moscow. Students will also learn about the role of race in early Soviet culture, particularly visual culture (films, children's media, propaganda posters, etc.). This course includes a field trip to the Schomburg Center for Research in Black Culture in Harlem

AFRS GU4001 Afro-Latin America in the Artistic Imagination. 4.00 points.

How have painters, filmmakers, novelists, and other artists portrayed the history of Africans and their descendants in Latin America? How do those portrayals – of the Middle Passage, slavery, revolution, abolition, and contemporary social movements, to name a few examples – compare to scholarly approaches to those same subjects? To answer these and other questions, this class brings together a wide array of materials covering more than five hundred years of Afro-Latin American history. The course will move chronologically from the 15th century to the present, with each week devoted to grappling with a topic relevant to the history of Afro-Latin America in a given era, as viewed through both artistic and scholarly sources. Students will come to class prepared to consider what each has to offer to our understanding of the past. We will also debate the possibilities of using art to disseminate historical knowledge, and whether there any dangers to privileging artistic over scholarly approaches to history (or vice versa). In addition, because NYC is home to so many museums, archives, and cultural institutions relevant to our subject, it will serve as an experiential laboratory where we will spend several of our class meetings. Learning outcomes. By the end of the semester, students will be skilled at the following: # analyzing artistic and scholarly sources on their own terms # discussing them in relation to one another # evaluating the utility of these diverse materials to the process of understanding the past

AFRS GU4321 Pandemics of Harlem. 4.00 points.

This course will be co-taught by three people who worked in Harlem in the 1990s, in the middle of “mad” plagues: AIDS, HIV, crack cocaine addiction, violence, trauma and mental illness related to violence, multi-drug resistant tuberculosis, asthma, obesity and sedentary lifestyles. The course will build on the experiences and published papers of the group, but also bring in contemporary conversations related to underlying issues of serial forced displacement, which created the context for the plagues. Conceived as a collaborative colloquium linking instructors and students across three institutions, the course will be on-line with a combination of synchronous and asynchronous work. Assignments are structured to promote collaborative learning across institutional boundaries. Conditions permitting, students from the three schools – Barnard, The New School, BMCC – will have the opportunity to participate in the CLIMB project, a collective recovery project in Northern Manhattan that addresses the connection between the health of people and the quality of the built environment. Jordan-Young (Barnard) will take responsibility for organizing course logistics, and all students will be given access to the Columbia Courseworks site for access to readings and other materials, discussion boards, and assignments. The instructors will rotate the role of “host”/facilitator for the modules. Synchronous sessions will use a combination of live and pre-recorded brief lectures, in-class exercises, and small group discussions. Non-Barnard instructors may opt in or out of specific assignments, and will grade the participation and assignments for their respective students. (The Barnard College students will be responsible for all assignments listed in this syllabus.) Instructors will closely collaborate throughout the semester to monitor and adjust the course, especially the processes for collaboration, as needed

AFEN BC3009 TONI MORRISON: AN ETHICAL POETICS. 4.00 points. Not offered during 2023-2024 academic year.

Toni Morrison set herself a challenge: to engage language in complex literary ways in order to reveal the ‘fact’ of race in the lived experiences of Americans—those made to bear the burden of being ‘raced,’ those exercising the prerogative of ‘racing,’ and those who imagine that none of this applies to them. We travel with her artistic path from *The Bluest Eye* to her later novels to learn how her choice to create figurative, logical narratives seek their own understanding of the ethics of what she called the “manageable, doable, modern human activity” of living in ‘the house of race.’

AFEN BC3134 UNHEARD VOICES: AFRICAN WOMEN. 4.00 points. Not offered during 2023-2024 academic year.

AFEN BC3815 SHANGE # DIGITAL STORYTELLING. 4.00 points.

Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at <http://bit.ly/Ntozake2019>. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Women's Studies. Students who successfully complete into this course will be eligible to take the second half of the course in Spring 2019. NOTE: There will be three extra sessions scheduled in the Digital Humanities Center.

Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at: <http://bit.ly/ShangeWorlds>. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Womens Studies. Please note that this is a yearlong course; students who are accepted into this course will need to take its second half, AFEN BC3816, in the spring semester. A poet, performance artist, playwright and novelist, Ntozake Shanges stylistic innovations in drama, poetry and fiction and attention to the untold lives of black women have made her an influential figure throughout American arts and in Feminist history. In a unique collaboration between Barnard, the Schomburg Center for Black Culture and the International Center for Photography, and with support by the Mellon funded Barnard Teaches grant, this year long seminar provides an in-depth exploration of Shanges work and milieu as well as an introduction to digital tools, public research and archival practice. You can find more information and apply for the course at <http://bit.ly/ShangeWorlds>. On Twitter @ShangeWorlds

AFEN BC3816 The Worlds of Ntozake Shange and Digital Storytelling. 4 points.

Prerequisites: AFEN BC3815 or equivalent.

This course has a prerequisite and an application: <http://bit.ly/AFEN3816>. This hands-on, project based course introduces students to the use of digital tools and sources to organize and manage their archival research, creatively interpret their findings, and communicate their results to the public. This semester, the course is somewhat different from the usual research course in that, rather than simply going more deeply into the course focus, you will be asked to apply your knowledge to make new things. Working with the Barnard Digital Humanities Center, you will develop projects that teach some aspect of Shange's work and or feminist movements. But while making these new things, we will have ongoing discussions about the nature of digital life and evolving protocols for digital work. You will make plans to visit the archive appropriate to your project (in most cases this will be the Barnard Archives, but they might include sites such as The Billy Rose Theatre Division at the NYPL, or the Amiri Baraka collection at Columbia University) as well as doing background reading for your project. By the end of the semester, you'll have sharpened your research skills while also acquiring digital, teamwork, and project management skills that will be useful in other classes and beyond.

AFEN BC3817 Black Shakespeare. 4.00 points.

This course examines Shakespeare's role in shaping Western ideas about Blackness, in processes of racial formation, and in Black freedom struggle. As one of the most enduring representations of a Black man in Western art Shakespeare's Othello will be a focal point. However, this course will examine other "race" plays as well as works perceived as "race-neutral" in tandem with Black "respeakings" of Shakespeare's works. This class is antiracist in intent and is shaped by several interlocking questions: What is Black Shakespeare? Can creators and scholars separate Shakespeare from the apparatus of white supremacy that has been built around his works? What are the challenges for BIPOC actors performing Shakespeare on the dominant stage? What are the challenges and obstacles for BIPOC scholars working on Shakespeare in academia? Can performing Shakespeare be an activist endeavor

ANTH V3943 Youth and Identity Politics in Africa. 4 points.

Enrollment limited to 15. **Not offered during 2023-2024 academic year.**

Prerequisites: Permission of the instructor is required.

Examines ways in which African youth inevitably occupy two extremes in academic writings and the mass media: as victims of violence, or as instigators of social chaos. Considers youth as generating new cultural forms, as historically relevant actors, and informed social and/or political critics. At the core of such critiques lie possibilities for the agentive power of youth in Africa.

ANTH V3983 Ideas and Society in the Caribbean. 4 points.

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

Not offered during 2023-2024 academic year.

Prerequisites: A 1000 level course in anthropology is strongly recommended but not required as a prerequisite

As an introduction to the field of medical anthropology, this seminar addresses themes of health, affliction, and healing across sociocultural domains. Concerns include critiques of biomedical, epidemiological and other models of disease and suffering; the entwinement of religion and healing; technocratic interventions in healthcare; and the sociomoral underpinnings of human life, death, and survival. A 1000 level course in Anthropology is recommended as a prerequisite, although not required. Enrollment limited to 30. 4 units

Art History (Barnard)

AHIS UN3948 Jacob Lawrence's Harlem. 4 points.

The course has the heavy workload associated with seminars.

2017 is the centennial of the birth of the artist Jacob Lawrence, who grew up in Harlem, studied art as a child with some of its leading artists and frequented the cultural institutions established for the community at this time. Along with his famous series of paintings dedicated to Black history, such as *Migration*, and *Toussaint L'Ouverture*, Lawrence made a large number of works recording the places and people of his home, seeking creative means to both document Black experience in this time and place and give it meaning.

In this seminar we will look at Harlem at Lawrence's eyes through three archives of Harlem at this time: James Vanderzee's street photographs, Aaron Siskind's *Harlem Document*, and Lawrence's paintings of his community. We will study Harlem in the interwar years as a means of understanding what it is these artists chose to record.

We will look at the aesthetic debates of the Harlem Renaissance and each artist's biography to investigate how they chose to depict Harlem. The class will combine classroom discussions with excursions to the locations and institutions frequented by these artists as a means of tracing continuities and transformations from that period to the present.

The final project for our seminar will be a digital exhibition of select works from these archives. Students will work together to develop the themes and each will create entries on specific works of art. Please note that, while we will be having a digital exhibition workshop in class, students will also need to meet with IMATS staff outside of class time at least once as they conduct the work for this exhibition.

This course is part of Harlem Semester 2017.

Comparative Literature (Barnard)

CLRS W4190 Race, Ethnicity, and Narrative, in the Russian/Soviet Empire. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2023-2024 academic year.

This course examines the literary construction of ethnic and cultural identity in texts drawn from the literatures of ethnic minorities and non-Slavic nationalities that coexist within the Russian and Soviet imperial space, with attention to the historical and political context in which literary discourses surrounding racial, ethnic, and cultural particularity develop. Organized around three major regions – the Caucasus, Central Asia, and the Russian Far East – readings include canonical "classics" by Aitmatov, Iskander, and Rytkheu as well as less-known texts, both "official" and censored.

CSER W1012 History of Racialization in the United States. 3 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

The History of Racialization in the United States examines the development of race and racism through the study of significant historical circumstances that define the institutional structure of American Empire and of the resulting interactions among its peoples. Race is not static. Consequently, it is not an ahistorical object, nor a predetermined identity, nor a uniform category of analysis. Traditionally, the history of American race relations is the contact between racially defined groups over time and space of the effort required to maintain social and economic differences among them. Racialization, then, refers to the process by which one population group or many are "placed" in distinct racial categories.

Dance (Barnard)

DNCE BC2580 Tap as an American Art Form. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

DNCE BC3570 Latin American and Caribbean Dance: Identities in Motion. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).
Not offered during 2023-2024 academic year.

Examines the history and choreographic features of Latin American and Caribbean dance forms. Dances are analyzed in order to uncover the ways in which dancing shapes national, racial, and gender identities. Focuses on the globalization of these dances in New York City.

DNCE BC3578 Traditions of African-American Dance. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Traces the development of African-American dance, emphasizing the contribution of black artists and the influence of black traditions on American theatrical dance. Major themes include the emergence of African-American concert dance, the transfer of vernacular forms to the concert stage, and issues of appropriation, cultural self-identification, and artistic hybridity.

DNCE BC3980 Performing the Political: Embodying Change in American Performance. 4 points.

Not offered during 2023-2024 academic year.

ENGL BC3194 LITERARY THEORY. 4.00 points.

In this course, we will trace the complex category of imitation from its ancient roots to some of its modern theoretical and literary manifestations. Interpreted differently by different thinkers, imitation can refer to the problem of art's imitation of things in the world (e.g., your portrait looks like you), art's imitation of other artistic works (e.g., your portrait looks like a Rembrandt), people's imitation or even mimicry of one another (who does she think she is?). The latter form of imitation raises the most overtly socio-political questions, whether by replicating social power structures in order to "pass" in a potentially hostile environment or by subverting these same structures through mimicking, outwitting, critiquing, or mocking them. At its core, the category of imitation focuses our attention on what is so central to artmaking that it almost eludes our notice: the question of resemblance. Put in its simplest form: What are we doing (philosophically, artistically, socially) when we make one thing resemble another?

ENGL BC3196 HARLEM RENAISSANCE LITERATURE. 4.00 points.

Not offered during 2023-2024 academic year.

In the summer of 2021, Home to Harlem will focus on the writing and collaboration of Zora Neale Hurston and Langston Hughes in the 1920s. We will explore the cultural history and aesthetic debates that animated Harlem in the 1920s by reading them through the work (poetry, fiction, essays, plays) of Barnard and Columbia's own, who, for a time juggled student life in Morningside Heights and the joys and challenges of being major players in the Harlem or New Negro Renaissance. Hurston and Hughes navigated the demands of being an artist and representative of "the race" in both similar and different ways. They worked together to shape the Renaissance according to their radical visions and were friends and collaborators until they famously fell out. The goal of this class is to plot the individual and collective artistic growth and experimentation of Hurston and Hughes, as well as create a digital timeline and rendering of their individual and collaborative development. To that end, this class will use either or both of the digital tools Scalar and Timeline.js in creative and collaborative ways. The class will partner with the Digital Humanities Center at Barnard for workshops on these digital tools that will be linked to all of the course assignments and final projects. No prior experience with these tools is necessary.

HIST W3772 West African History. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course offers a survey of main themes in West African history over the last millenium, with particular emphasis on the period from the mid-15th through the 20th century. Themes include the age of West African empires (Ghana, Mali, Songhay); re-alignments of economic and political energies towards the Atlantic coast; the rise and decline of the trans-Atlantic trade in slaves; the advent and demise of colonial rule; and internal displacement, migrations, and revolutions. In the latter part of the course, we will appraise the continuities and ruptures of the colonial and post-colonial eras. *Group(s): C Field(s): AFR*

HIST W4429 Telling About the South. 4 points.

A remarkable array of Southern historians, novelists, and essayists have done what Shreve McCannon urges Quentin Compson to do in William Faulkner's *Absalom, Absalom!*—tell about the South—producing recognized masterpieces of American literature. Taking as examples certain writers of the 19th and 20th centuries, this course explores the issues they confronted, the relationship between time during which and about they wrote, and the art of the written word as exemplified in their work. *Group(s): D Field(s): US* Limited enrollment. Priority given to senior history majors. After obtaining permission from the professor, please add yourself to the course wait list so the department can register you in the course.

HIST W4518 Research Seminar: Columbia and Slavery. 4 points.

In this course, students will write original, independent papers of around 25 pages, based on research in both primary and secondary sources, on an aspect of the relationship between Columbia College and its colonial predecessor King's College, with the institution of slavery

HIST W4768 Writing Contemporary African History. 4 points.

Prerequisites: the instructor's permission. SEE UNDERGRADUATE SEMINAR SECTION OF THE HISTORY DEPARTMENT'S WEBSITE.

An exploration of the historiography of contemporary (post-1960) Africa, this course asks what African history is, what is unique about it, and what is at stake in its production. *Field(s): AFR*

HIST W4928 Comparative Slavery and Abolition in the Atlantic World. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: seminar application required. SEE UNDERGRADUATE SEMINAR SECTION OF THE HISTORY DEPARTMENT'S WEBSITE.

This seminar investigates the experiences of slavery and freedom among African-descended people living and laboring in the various parts of the Atlantic World. The course will trace critical aspects of these two major, interconnected historical phenomena with an eye to how specific cases either manifested or troubled broader trends across various slaveholding societies. The first half of the course addresses the history of slavery and the second half pertains to experiences in emancipation. However, since the abolition of slavery occurs at different moments in various areas of the Atlantic World, the course will adhere to a thematic rather than a chronological structure, in its examination of the multiple avenues to freedom available in various regions. Weekly units will approach major themes relevant to both slavery and emancipation, such as racial epistemologies among slaveowners/employers, labor regimes in slave and free societies, cultural innovations among slave and freed communities, gendered discourses and sexual relations within slave and free communities, and slaves' and freepeople's resistance to domination. The goal of this course is to broaden students' comprehension of the history of slavery and freedom, and to promote an understanding of the transition from slavery to freedom in the Americas as creating both continuities and ruptures in the structure and practices of the various societies concerned. *Group(s): ABCD Field(s): US/LA*

HIST W4769 Health and Healing in African History. 4 points.

This course charts the history of health and healing from, as far as is possible, a perspective interior to Africa. It explores changing practices and understandings of disease, etiology, healing and well-being from pre-colonial times through into the post-colonial. A major theme running throughout the course is the relationship between medicine, the body, power and social groups. This is balanced by an examination of the creative ways in which Africans have struggled to compose healthy communities, albeit with varied success, whether in the fifteenth century or the twenty-first. *Field(s): AFR*

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Critical examination of recent trends in modern U.S. women's history, with particular attention to the intersection of gender, sexuality, class, and race. Topics will include: state regulation of marriage and sexuality, roots of modern feminism, altered meanings of motherhood and work, and changing views of the body.

HIST BC3546 The Fourteenth Amendment and Its Uses. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The role of the 14th Amendment in shaping the modern American Constitution; theories of judicial review; the rise and fall of economic due process; the creation of civil liberties; the civil rights revolution; and the end of states' rights.

HIST BC3587 Remembering Slavery: Critiquing Modern Representations of the Peculiar Institution. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The enslavement of people of African descent signifies a crucial historical and cultural marker not only for African-Americans but also for Americans in general. We will interrogate how and why images of slavery continue to be invoked within the American sociocultural landscape (e.g., in films, documentaries, historical novels, and science fiction).

HIST BC3763 Children and Childhood in African History. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

This course focuses on the history of childhood and youth in African societies and how young people as historical agents have impacted the social histories of their communities. How did young Africans live in past times? What forces shaped understanding of their status as children or youth? How have major historical processes such as colonialism, industrialization, apartheid, and liberation, neocolonialism, and neoliberalism impacted and been impacted by children and youth in Africa? What roles have young people themselves played in the making of African histories? These questions will be explored in course readings, discussions, and students' original research projects.

HIST BC3771 Critical Perspectives on the Mobilization of Race and Ethnicity on the Continent and in the Study of Africa. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Sophomore Standing.

Critically examines the relationship between social difference and narratives and practices of power in historical and contemporary African publics. Race and Ethnicity are the key axes of social difference that will be examined. Other axes of difference such as gender, sexuality, class, caste, generation and nationality will also be examined through points of intersection with race and ethnicity.

HIST BC3905 Capitalism, Colonialism, and Culture: A Global History. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of Instructor. Enrollment limited to 15. Preregistration required.

From Indian Ocean worlds of the seventeenth century, to Atlantic world slavery, to the establishment of colonies in Asia and Africa during the nineteenth century, colonization was critical to the development of metropolitan ideas regarding politics and personhood. This seminar will examine these histories, along with emerging constructions of race and gender, as precursors to debates about human rights and humanitarianism in the twentieth century.

Music**MUSI W4435 Music and Performance in the African Postcolony. 3 points.**

Not offered during 2023-2024 academic year.

This course examines music and performance in various African contexts, focusing on the postcolonial period. It will explore the complex interactions between music, politics, nation, race, and mediation through case studies from Ghana, Nigeria, DRC, Kenya, Tanzania, Zimbabwe, Namibia, and South Africa. In addition, discussions will involve what is meant to speak about "African music," and class will theorize about the conditions of musical production in the context of postcolonialism.

MUSI UN2020 SALSA, SOCA # REGGAE. 3.00 points.

Topics include genre and canon formation, gender, race, and cultural nationalisms, economics and infrastructure, debates around art and the vernacular, globalization, and media reception. Reading knowledge of music is not required.

Political Science (Barnard)**POLS BC3101 * Colloquium on Black Political Thought. 4 points.**

Not offered during 2023-2024 academic year.

Prerequisites: POLS W1013 or the equivalent. Admission by application through the Barnard department only. Enrollment limited to 16 students. Barnard syllabus.

Advanced political theory colloquium treats black political thought as concerned with the universal problem of domination. Examines how black thinkers relate democracy, slavery and race; redefine race consciousness as linked fate; articulate new social theories to suggest new "meanings" for race; redefine the political to address social and aesthetic concerns.

POLS V3604 Civil Wars and International Intervention in Africa. 3 points.

Enrollment limited to 110. **Not offered during 2023-2024 academic year.**

Prerequisites: at least sophomore standing, except in consultation with the instructor.

This course analyzes the causes of violence in civil wars. It examines the debates around emergency aid, peacekeeping and peacebuilding. In addition, it focuses on recent conflict situations in Africa – especially Congo, Sudan, and Rwanda – as a background against which to understand the distinct dynamics of violence, peace, and international interventions in civil conflicts. (Cross-listed by the Center for the Study of Ethnicity and Race.)

POLS BC3810 *Colloquium on Aid, Politics & Violence in Africa. 4 points.

Prerequisites: POLS UN1601 or the equivalent. Admission by application through the Barnard department only.

Explores the concepts, theoretical traditions and debates around development and humanitarian aid, focusing on the relationships between aid, politics, and violence. It looks at the political and military impacts of aid, the linkage between humanitarian aid and conflict resolution, and aid's contribution to perpetuating subtle forms of domination. (Cross-listed by the Africana Studies and the Human Rights Programs.)

Not offered during 2023-2024 academic year.

Prerequisites: POLS V1501 or the equivalent. Enrollment limited to 70 students. L-course sign-up through eBear. Barnard syllabus.

This course has two objectives: studying the political economy and history of the Arab states, Israel, Turkey, and Iran, and reviewing major themes in the Middle East political science literature. Topics include: historical legacies of colonialism, the political economy of state-society relations, the politics of religion, the politics of democratization, and burgeoning forms of new media.

Religion**RELI V2615 Religions of Harlem. 3 points.**

Not offered during 2023-2024 academic year.

Through a range of field exercises and classroom guests, this course will introduce students to the rich religious history of Harlem, while also challenging them to document and analyze the diversity of Harlem's contemporary religious scene.

RELI V3630 Religion and Black Popular Cultures. 3 points.

As an exploration of the relationship between religion, race, and popular culture, the course will begin with theoretical readings that expose students to a variety of definitions of and approaches to each of these categories. After tackling these theoretical concerns, the remainder of the course will entail a cross genre and thematic engagement with the terrain of black popular culture(s) in which students will be challenged to apply new theoretical resources in order to interpret a wide range of "religious" phenomena.

RELI V3650 Religion and the Civil Rights Movement. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Examination of the role of religion in the drive for civil rights during the 1950s and 1960s. The course will look at the role of activists, churches, clergy, sermons, and music in forging the consensus in favor of civil rights.

RELI W4826 Religion, Race and Slavery. 0 points.

Not offered during 2023-2024 academic year.

This course explores the religious aspects of race and slavery from the Bible through the abolition of slavery in and around the Enlightenment, ending in the post-colonial era. The focus is mostly on the Atlantic World.

Sociology (Barnard)**SOCI UN3235 SOCIAL MOVEMENTS. 3.00 points.**

The immigrant experience in the United States. Topics include ideologies of the melting pot; social, cultural, and economic life of earlier immigrants; the distinctiveness of the African-American experience; recent surge of "new" immigrants (Asians, Latinos, West Indians); and changing American views of immigration.

SOCI BC3913 Inequalities: Race, Class, Gender and Sexuality in U.S. Law and Society. 4 points.

This class will examine the historical roots and ongoing persistence of social, economic, and political inequality and the continuing role that it plays in U.S. society by examining how such issues have been addressed both in social science and in law.

Drama and Theatre Arts (Barnard)**ENTH BC3144 Black Theatre. 4 points.**

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 16 students.

Exploration of Black Theater, specifically African-American performance traditions, as an intervening agent in racial, cultural, and national identity. African-American theatre artists to be examined include Amiri Baraka, Kia Corthron, W.E.B. Du Bois, Angelina Grimke, Langston Hughes, Georgia Douglas Johnson, Adrienne Kennedy, Suzan-Lori Parks, Adrian Piper, and August Wilson. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

Women's Studies (Barnard)**WMST BC3134 Unheard Voices: African Women's Literature. 4 points.**

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL), BC: Fulfillment of General Education Requirement: Literature (LIT).

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 14 students.

How does one talk of women in Africa without thinking of Africa as a 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora. This course is the same as *AFRS BC3134 Unheard Voices: African Women's Literature*.

WMST GU4305 Decolonization and Feminist Critique. 4.00 points.

This advanced seminar examines historical, social, cultural, and theoretical propositions for decolonizing praxis and their complex relations to feminist critique. How do we understand Western European colonialism and coloniality as modes, conditions, and institutions of power, dispossession, subjugation, and subjection continuing into the present? What are the methods, practices, and vision enacted and proposed by the colonized for undoing and radically transforming the determinate logics, instruments, and structures of colonialism as these persist in the present moment? We will consider how gender and sexuality as well as race – as technologies of social organization, codes of valuation, and modes of survival – shape colonialism and the struggles against it. We will inquire into their significance to projects of decolonization. How might decolonization envision and make possible other ways of life?

American Studies

americanstudies.barnard.edu

Departmental Administrator: Michelle Rowland

American Studies Department

American Studies is a field defined not only by the critical questions it asks but by the interdisciplinary methods it uses to answer those questions. In considering the United States as a cultural, ideological, geographical and historical formation, students of American Studies examine how cultural configurations of and within the nation-state operate as social forces, contested archives of change, loci of power and resistance, and sites of historical meaning and memory. How are ideologies and arrangements in the U.S. amplified, altered, challenged or contested? American Studies seeks to address these questions by

critically examining how ideas and assumptions about the U.S. have been constituted through a range of competing, corroborating and resistant discourses.

Barnard students majoring in American Studies engage in the critical and interdisciplinary study of race, gender, class, sexuality, Indigeneity, political economy, imperialism and social movements in contemporary, historical, hemispheric and transnational contexts. All majors are introduced to the field through AMST 1001 ("What Is American Studies?") and hone their understanding of the theories and methods of American Studies in an intensive junior colloquium. Their individually-chosen electives include three historically-situated Foundations courses as well as a five-course concentration that culminates in a two-course senior capstone project. The American Studies major aims to teach students to recognize, question and analyze, within an international context, the formation, implementation and contestation of power in both the nation-state and in other institutions of collective life.

We work closely with our colleagues in [Africana Studies](#) and [Women's, Gender, and Sexuality Studies](#) who, along with the faculty in American Studies, constitute Barnard's [Consortium for Critical Interdisciplinary Studies](#).

Mission

The American Studies major is designed to teach students how to engage in the critical and inter-disciplinary study of race, gender, class, sexuality, Indigeneity, political economy, imperialism and social movements in contemporary, historical, hemispheric and transnational contexts.

Student Learning Objectives

Barnard students graduating with a degree in American Studies aspire to do the following:

1. critically analyze power at different scales, from the local to the global.
2. identify the plurality of forces that shape and contest American social formations.
3. demonstrate an understanding of the various theories and methods (e.g., oral history, ethnography, cultural analysis, archival research, political economy, and close textual, visual, or aural analysis) that shape core conversations in the field.
4. produce an original piece of scholarship with a sustained argument that draws on primary sources and is accountable to communities of scholars in American Studies.
5. apply cultural and historical analytical frameworks to their lived experience and practice.

Students build their major by combining coursework in the American Studies department with a wide range of potential electives drawn from Africana Studies, Anthropology, Art History, English, History, Political Science, Women's Gender and Sexuality Studies, and other related disciplines. In the process, students work with their American Studies adviser to devise a distinctive concentration organized around a topic (for example, *race and ethnicity*) that will encourage the development of both interdisciplinary breadth and historical depth while also serving as the intellectual foundation for their senior capstone projects. American Studies majors may also choose to pursue one of the four CCIS interdisciplinary concentrations on [Race and Ethnicity](#) (ICORE), the [Environmental Humanities](#) (EHMC), [Native American and](#)

[Indigenous Studies](#) (NAIS), and [Feminist/Intersectional Science and Technology Studies](#) (F/ISTS).

Students interested in majoring in American Studies are encouraged to contact Prof. Manu Karuka (mkaruka@barnard.edu), the department chair, to arrange a meeting.

This department is supervised by the Committee on American Studies:

AMST BC1040 Incarcerating the Crisis. 3 points.

This course focuses on the structures and processes that led the U.S. to build the largest carceral regime on the planet in the post-1970s United States. Through readings, lectures, and original research, students will develop analyses of how this growth coincided with a shift in the racial composition of prisons from majority white to almost seventy percent people of color. Students will develop a number of concept such as race, class, gender, neoliberalism, abolition, policing, and surveillance that are foundational for analyzing the formation of the carceral state.

AMST BC1041 Critical Approaches to the Study of Ethnicity and Race. 4 points.

This seminar will introduce students to critical theories of race and ethnicity. It will familiarize students with interdisciplinary scholarship on power and difference, with a special focus on the historically specific relationships between race, capitalism, empire, dispossession, migration, political economy, and the U.S. state's regulation of gender and sexuality. Throughout the course, students will consider the political and economic critiques of race and power that have been articulated by antiracist freedom, anticolonial, feminist, queer of color, and immigrant labor struggles.

AMST BC1042 America and Early Modernity. 3 points.

This class explores the impact of the colonization of the Americas, and the introduction of the slave trade into the Americas, on the development of the Renaissance, the Scientific Revolution, and the early Enlightenment.

AMST BC1510 The Profits of Race. 3 points.

Does race appear in American life in the ways we make, distribute, and consume goods? If so, how? Through film, literary criticism, history, ethnography and philosophy, this course will examine how race manifests as an economic relationship. We will focus on the legacies of chattel slavery, the interconnections of race and property, and ongoing struggles for racial justice. The course is grounded in what Cedric Robinson has referred to as the "Black radical tradition": a centuries-long intellectual and political tradition oriented towards contesting the definition of a specific group of people (Black people) as property. We will examine ways that this central economic claim, which underpinned the chattel slavery system, continues to appear in our own society, in prisons, international migration system, residential segregation, underemployment, and other ways.

AMST BC3310 Planet America. 3 points.

This course is a semester-long engagement with the idea of internationalism from the perspective of U.S. culture, history, and politics. We will consider two forms of internationalism: internationalism from above, "imperialism," and internationalism from below, "radical democracy." We will engage long-standing models in the analysis of empire, and focus on cultural, economic, and political dimensions to examine the centrality of imperialism to the United States, and the history of the United States within a context of global histories. On the other hand, radical democratic movements and ideas have long been articulated in relation to the American project. Central to these movements is the necessity of articulating demands for justice not as matters of civil rights, but as human rights. The lectures and readings in this course will engage the body of scholarship known as "transnational American Studies" to think about America, as an idea, a set of institutions, and a way of being, within a larger world.

AMST GU4110 THE WEALTH OF NATIVES. 4.00 points.

Indigenous people are often imagined in the distant past, or as living anachronisms in relation to contemporary life. Working against these assumptions, this course examines how Native peoples have survived colonialism, focusing on economic aspects of colonialism in North America, while looking to Australia and Hawai'i. We will look at the long history of Native land struggles, and links between colonial economies and ecological destruction. Themes guiding our inquiry include: the development of wage labor, property law and economic production on Native lands, histories of political and economic dependency, "development" as defined and practiced over Native communities, and Native people's own economic choices. Our inquiry will be oriented towards deepening our ability to critically analyze the colonial situation we live in, and to see Indigenous survivals despite ongoing assaults against life and territory

AMST BC3707 Global Radicalism. 4 points.

At the turn of the twentieth century, struggles against racism, capitalism, colonialism, and imperialism encircled the globe. From Irish republicanism in Dublin, Bolshevism in Moscow, revolution in Mexico City, to anti-lynching crusades in Birmingham, as well as all their unanticipated international alliances, these movements represented the largest waves of rebellion hitherto sustained by the global economy. This seminar offers an intensive overview of these various struggles and spaces. Through examination of primary and secondary sources, students will consider radical social movements from distinct yet overlapping cultural and political traditions. We will discuss how participants in these struggles confronted issues of gender, accumulation, and uneven development in their evolving revolutionary theories. Taking a uniquely spatial approach, we will observe how geographies of accumulation emerged alongside sites of global resistance. Throughout the course we will consider the contemporary relevance of these debates, observing how global radicalism might be charted in our present world.

Africana Studies (Barnard)

CCIS BC1111 REAL TALK / REAL TIME. 1.00 point.

This course takes as its foundation the words of bell hooks: "When our lived experience of theorizing is fundamentally linked to processes of self-recovery, of collective liberation, no gap exists between theory and practice." Over the course of this term, students will learn to embrace their responsibility as intellectuals in the largest sense. By recognizing current issues as sites of intersectional analysis, they will learn to merge their scholarly activities with public discussion and organizational activism. Working collaboratively, they will research topics of current import and, on that basis, organize two speaker events, thereby learning how public intellectual organizing engages both theory and practice

AFRS BC2006 INTRODUCTION AFRICAN DIASPORA. 3.00 points.

Interdisciplinary and thematic approach to the African diaspora in the Americas: its motivations, dimensions, consequences, and the importance and stakes of its study. Beginning with the contacts between Africans and the Portuguese in the 15th century, this class will open up diverse paths of inquiry as students attempt to answer questions, clear up misconceptions, and challenge assumptions about the presence of Africans in the New World

AFRS BC3120 History of African-American Music. 3 points.**Not offered during 2023-2024 academic year.**

Survey interrogates the cultural and aesthetic development of a variety of interconnected musical genres - such as blues, jazz, gospel, soul, funk, R&B, hip-hop, classical and their ever changing same/names - viewed as complex human activities daringly danced at dangerous discourses inside and outside the American cultural mainstreams.

AFRS BC3121 Black Women in America. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Students must attend first day of class and admission will be decided then. Priority will be given to CCIS students (Africana Studies, American Studies and Women's Studies majors; minors in Race and Ethnic Studies). Enrollment limited to 20 students. Examines the roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as WMST BC3121.

Anthropology (Barnard)

ANTH UN2005 THE ETHNOGRAPHIC IMAGINATION. 3.00 points.

Introduction to the theory and practice of “ethnography”—the intensive study of peoples’ lives as shaped by social relations, cultural images, and historical forces. Considers through critical reading of various kinds of texts (classic ethnographies, histories, journalism, novels, films) the ways in which understanding, interpreting, and representing the lived words of people—at home or abroad, in one place or transnationally, in the past or the present—can be accomplished.

Discussion section required

ANTH UN3041 ANTHROPOLOGICAL THEORY II. 4.00 points.

Prerequisites: Required of all Barnard Anthropology majors; open to other students with instructor’s permission only. To be taken in conjunction with *ANTH 3040*, preferably in sequence.

The second of a two semester sequence intended to introduce departmental majors to key readings in social theory that have been constitutive of the rise and contemporary practice of modern anthropology. The goal is to understand historical and current intellectual debates within the discipline. This course replaces *ANTH V 3041 - Theories of Culture: Past and Present*.

ANTH UN3300 Pre-Columbian Histories of Native America. 3 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 40.

This course explores 10,000 years of the North American archaeological record, bringing to light the unwritten histories of Native Americans prior to European contact. Detailed consideration of major pre-Columbian sites is interwoven with the insight of contemporary native peoples to provide both a scientific and humanist reconstruction of the past.

ANTH BC3868 ETHNOGRAPHIC FIELD RESEARCH IN NYC. 4.00 points.

This course provides the aspiring anthropologist with an array of primarily qualitative methodological tools essential to successful urban fieldwork. As such, it is a practicum of sorts, where regular field assignments help build one’s ability to record and analyze social behavior by drawing on several key data collection techniques. Because we have the luxury of inhabiting a large, densely populated, international city, this class requires that you take a head-first plunge into urban anthropology. The NYC area will define the laboratory for individually- designed research projects. Be forewarned, however! Ethnographic engagement involves efforts to detect social patterns, but it is often a self-reflexive exercise, too. Readings provide methodological, analytical, and personal insights into the skills, joys, and trials that define successful field research

Spring 2024: ANTH BC3868

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ANTH 3868	001/00867	Th 2:10pm - 4:00pm 323 Milbank Hall	Kaya Williams	4.00	19/18

ANTH V3907 Posthumanism. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Explores what a *post*-human anthropology might look like. Readings draw from anthropology, actor-network theory, science studies, media studies, and science fiction.

ANTH V3950 Anthropology of Consumption. 4 points.

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

Prerequisites: the instructor’s permission.

Examines theories and ethnographies of consumption, as well as the political economy of production and consumption. Compares historic and current consumptive practices, compares exchange-based economies with post-Fordist economies. Engages the work of Mauss, Marx, Godelier, Baudrillard, Appadurai, and Douglas, among others.

ANTH V3954 Bodies and Machines: Anthropologies of Technology. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: the instructor’s permission.

Examines how bodies become mechanized and machines embodied. Studies shifts in the status of the human under conditions of capitalist commodification and mass mediation. Readings consist of works on the fetish, repetition and automaticity, reification, and late modern technoprosthesis.

ANTH V3960 The Culture of Public Art and Display In New York City. 4 points.

Enrollment limited to 16. **Not offered during 2023-2024 academic year.**

Prerequisites: Students must sign-up in the Anthropology Department prior to registering for this course.

A field course and seminar considering the aesthetic, political, and sociocultural aspects of selected city museums, public spaces, and window displays.

ANTH UN3966 Culture and Mental Health. 4 points.

Enrollment limited to 20.

Prerequisites: the instructor's permission. Limited to juniors & seniors. This course considers mental disturbance and its relief by examining historical, anthropological, psychoanalytic and psychiatric notions of self, suffering, and cure. After exploring the ways in which conceptions of mental suffering and abnormality are produced, we look at specific kinds of psychic disturbances and at various methods for their alleviation.

ANTH V3969 Specters of Culture. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: the instructor's permission. Pursues the spectral effects of culture in the modern. Traces the ghostly remainders of cultural machineries, circuitries of voice, and representational forms crucial to modern discourse networks through a consideration of anthropologically significant, primarily nonwestern sites and various domains of social creation - performance, ritual practice, narrative production, and technological invention.

ANTH V3974 Lost Worlds, Secret Spaces: Modernity and the Child. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: the instructor's permission. Examines the figure of the child in modernity. Study of children and the delineation of a special time called childhood have been crucial to the modern imagination; for example, the child tended to be assimilated to the anthropological notion to the "primitive" (and vice versa), with repercussions ranging from psychoanalysis to painting, from philosophy to politics. Engages the centrality of the child through interdisciplinary readings in anthropology, history, children's literature, art criticism, educational theory, and psychology.

ANTH V3976 Anthropology and Science. 4 points.

Not offered during 2023-2024 academic year.

ANTH V3980 Nationalism. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: the instructor's permission. Intended for seniors, but not necessarily anthropology majors. This course will cover the basic readings in the contemporary debate over nationalism. It will cover different disciplinary approaches and especially look at recent studies of nationalism in the formerly colonial world as well as in the industrial West. The readings will offer a mix of both theoretical and empirical studies. The readings include the following: 1) Eric Hobsbawm's *Nationalism since 1780*; 2) Ernest Gillner's *Nations and Nationalism*; 3) Benedict Anderson's *Imagined Communities*; 4) Anthony Smith's *The Ethnic Origins of Nations*; 5) Linda Coley's *Britons*; 6) Peter Sahlins's *Boundaries*; and 7) Partha Chatterjee's *The Nation and Its Fragments*.

Architecture (Barnard)**ARCH V3114 Making the Metropolis: Urban Design and Theories of the City since 1850. 3 points.**

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Introduces the project of understanding modern cities, focusing on theories, practices and examples in Europe and North America since 1850. The global reach of Euro-American ideas will also be examined. There are two primary goals: to investigate diverse strategies of urban development and to evaluate the social implications of built form. Course material includes built projects as well as unbuilt and theoretical work, all of which shaped how architects and planners interpreted the city.

Comparative Literature (Barnard)**CLIA GU3660 MAFIA MOVIES. 3.00 points.**

Examines representations of the mafia in American and Italian film and literature. Special attention to questions of ethnic identity and immigration. Comparison of the different histories and myths of the mafia in the U.S. and Italy. Readings includes novels, historical studies, and film criticism. Limit 35

Prerequisites: Enrollment limited to 16 students.

Exploration of Black Theater, specifically African-American performance traditions, as an intervening agent in racial, cultural, and national identity. African-American theatre artists to be examined include Amiri Baraka, Kia Corthron, W.E.B. Du Bois, Angelina Grimke, Langston Hughes, Georgia Douglas Johnson, Adrienne Kennedy, Suzan-Lori Parks, Adrian Piper, and August Wilson. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

ENGL BC3179 AMERICAN LITERATURE TO 1800. 3.00 points.

This course surveys American literature written before 1800.

While we will devote some attention to the literary traditions that preceded British colonization, most of our readings will be of texts written in English between 1620 and 1800. These texts—histories, autobiographies, poems, plays, and novels—illuminate the complexity of this period of American culture. They tell stories of pilgrimage, colonization, and genocide; private piety and public life; manuscript and print publication; the growth of national identity (political, cultural, and literary); Puritanism, Quakerism, and Deism; race and gender; slavery and the beginnings of a movement towards its abolition. We will consider, as we read, the ways that these stories overlap and interconnect, and the ways that they shape texts of different periods and genres

ENGL BC3196 HARLEM RENAISSANCE LITERATURE. 4.00 points.**Not offered during 2023-2024 academic year.**

In the summer of 2021, Home to Harlem will focus on the writing and collaboration of Zora Neale Hurston and Langston Hughes in the 1920s. We will explore the cultural history and aesthetic debates that animated Harlem in the 1920s by reading them through the work (poetry, fiction, essays, plays) of Barnard and Columbia's own, who, for a time juggled student life in Morningside Heights and the joys and challenges of being major players in the Harlem or New Negro Renaissance. Hurston and Hughes navigated the demands of being an artist and representative of "the race" in both similar and different ways. They worked together to shape the Renaissance according to their radical visions and were friends and collaborators until they famously fell out. The goal of this class is to plot the individual and collective artistic growth and experimentation of Hurston and Hughes, as well as create a digital timeline and rendering of their individual and collaborative development. To that end, this class will use either or both of the digital tools Scalar and Timeline.js in creative and collaborative ways. The class will partner with the Digital Humanities Center at Barnard for workshops on these digital tools that will be linked to all of the course assignments and final projects. No prior experience with these tools is necessary.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Not offered during 2023-2024 academic year.

Undergraduate lecture course introducing students to the study of African American religion. While there are no required prerequisites for the course, prior coursework in religious studies or African American history is helpful. This course progresses as a historical survey and is intended to introduce students to important themes in African American (thus American) religious history (i.e. migration, urbanization, nationalism) through a rich engagement with the religious practices and traditions of black communities. Primary attention is given to Afro-Protestantism in North America; however, throughout the course attention is directed to religious diversity and varying religious traditions/practices in different diasporic locales. While this is a lecture course, students are expected to arrive each week having completed assigned readings and prepared to make informed contributions to class discussions (as class size allows). By the end of the semester students will be expected to possess a working knowledge of major themes/figures/traditions in African American religious life, as well as key questions that have shaped the study thereof.

Theatre (Barnard)

THTR V2002 New York Theatre. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Prerequisites: Enrollment limited. Permission given by instructor only at first meeting.

Students attend a variety of performances as well as a weekly lab meeting. Emphasis on expanding students' critical vocabulary and understanding of current New York theatre and its history. Section on contemporary New York theatre management and production practices.

ENTH BC3139 MODERN AMERICAN DRAMA # PERFORMANCE. 4.00 points.

Modern American Drama and Performance in an era of cultural contestation. What is united about the United States? How are the important claims of cultural difference related to the intercultural claims of shared community? Is there a place for historical continuity in the modernist pursuit of change? How have these issues been addressed in the emergence and development of modern drama and performance in America? Questions such as these will be addressed in the context of theatrical exploration, performance history, and social change. Canonical and experimental playwrights include Rachel Crothers, Susan Glaspell, Georgia Douglas Johnson, Eugene O'Neill, Clifford Odets, Thornton Wilder, Tennessee Williams, Arthur Miller, Lorraine Hansberry, Edward Albee, Suzan-Lori Parks, Sarah Ruhl, and Dominique Morisseau

THTR UN3151 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 2. 3.00 points.

Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the late eighteenth century to today; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to the ideology of realism and naturalism, the development of epic theatre, the theatre of cruelty, postcolonial performance, and the continuing invention of dramatic forms (theatre of the absurd, speechplays, postdramatic theatre), as well as to the political and theoretical impact of race, gender, sexuality in modern performance culture. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students.

Examines roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as **AFRS BC3121 Black Women in America**.

WMST UN3311 FEMINIST THEORY. 4.00 points.

Prerequisites: LIMITED TO 20 BY INSTRUC PERM; ATTEND FIRST CLASS

This course explores the formation of desire, sexuality, and subjectivity through the frameworks of feminist epistemologies (the question of what we can know) and feminist ethics (the question of how to be responsible within our relationships and local and global communities). We will reflect on the tension between the limits of what we can know about ourselves and others and the imperative to care for each other and remain accountable for our individual and collective actions and inaction. We will investigate how our deepest emotions, intimate encounters, and secret fantasies are formed by larger social and political contexts. In turn, we will also question how these intimate relationships with ourselves and our companions may be seen as feminist acts of resistance, disruption, and creation. Objective I: to closely engage diverse feminist perspectives in late-twentieth- and twenty-first-century phenomenology, existentialism, Marxism, queer theory, critical race theory, and psychoanalysis. Objective II: to begin to locate your own feminist perspective within the intersection of your unique experiences and the larger historical and social contexts that form you and which you may seek to transform

Prerequisites: Critical Approaches or Feminist Theory or permission of instructor.

Helps students develop and apply useful theoretical models to feminist organizing on local and international levels. It involves reading, presentations, and seminar reports. Students use first-hand knowledge of the practices of specific women's activist organizations for theoretical work.

WMST W4301 Early Jewish Women Immigrant Writers: 1900-1939. 4 points.

BC: Fulfillment of General Education Requirement: Literature (LIT). Enrollment limited to 15.

Prerequisites: students must attend first day of class and admission will be decided then.

Covers significant pre-Holocaust texts (including Yiddish fiction in translation) by U.S. Ashkenazi women and analyzes the tensions between upholding Jewish identity and the necessity and/or inevitability of integration and assimilation. It also examines women's quests to realize their full potential in Jewish and non-Jewish communities on both sides of the Atlantic.

WMST GU4302 The Second Wave and Jewish Women's Artistic Responses: 1939-1990. 4 points.

Prerequisites: Permission of instructor. Enrollment limited to 13 students.

A study of Jewish women's fiction, memoirs, art and film in response to the feminist/gender issues raised by the Second Wave. The seminar includes analysis of the writings and artwork of Jo Sinclair, Tillie Olsen, Judy Chicago, Helene Aylon, Elana Dykewomon, Rebecca Goldstein, E.M. Broner and others.

WMST W4304 Gender and HIV/AIDS. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: Permission of instructor. Enrollment limited to 15 students.

An interdisciplinary exploration of feminist approaches to HIV/AIDS with emphasis on the nexus of science and social justice.

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldua, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

Anthropology

Faculty Department Assistant: Fabiola Lafontant

The Discipline of Anthropology

Anthropology examines the social worlds people create and inhabit.

It is a comparative discipline that takes seriously the differences between societies across the globe and through time. Historically, anthropologists studied non-European societies, describing their social and linguistic systems, their patterns of thought and culture and by doing so they aimed to throw into relief the contingency of normative Western assumptions.

Contemporary anthropology examines a very different landscape.

It seeks to examine not just the diversity of cultural practices but to understand how societies clash, mutually interact and are interconnected through movements of goods, people, ideas, culture and politics. Anthropology today is thus more genuinely cross-cultural than it once was. Anthropologists conduct research with urban New Yorkers as often as with Mayan peasants, with genetic scientists as much as with spirit adepts and seek to understand the increasingly complex interconnections of people around the world.

The Department of Anthropology

Our faculty specialize in science and medicine, technology and media, religion, language and cognition, visual and material culture, colonialism and postcolonialism, and conservation and the environment. We conduct research in Africa, the U.S., Oceania, the Middle East and Latin America and in doing so we use a variety of foci, tacking between the immediacy of local modes of lived experience and broader social and political transformations.

Mission

Anthropology seeks to prepare students to succeed in a globalized world. It provides them with the skills to identify problems in intercultural settings, to recognize alternative lived realities, to discuss solutions with colleagues of diverse backgrounds, and to communicate those solutions to broader publics.

Student Learning Outcomes

Upon successfully completing the major, students should be able to attain the following outcomes:

- Articulate key methodological and theoretical debates in the history of the discipline;
- Compare and use distinct analytical frameworks for interpreting meaningful social behavior, detecting patterns and thinking comparatively across social domains, cultures and contexts;
- Develop an anthropological sensibility that enables one to distill social meaning from everyday encounters with individuals, material objects, texts and other social phenomena;
- Undertake ethnographic, linguistic or archaeological fieldwork using the appropriate methods;
- Conceptualize, undertake, and present an original research project by the end of the senior year.

The department also cooperates with related programs such as Africana Studies, American Studies, Human Rights, Urban Studies, and Women's Studies. Arrangements for combined, double, joint, and special majors are made in consultation with the chair.

For a list of other officers of the University offering courses in Anthropology, please see the Columbia Anthropology Department website: <https://anthropology.columbia.edu/content/faculty-directory>

Requirements for the Major

Every major is urged to acquire a general knowledge of three of the four fields of anthropology (social and linguistic anthropology, archaeology, and physical anthropology) and of their interrelationship. To this end, the student's program should be designed in consultation with her adviser as soon as possible after the declaration of the major. Continuing and frequent meetings with the adviser are encouraged.

There are three tracks. To find out more information, please follow: <https://anthropology.barnard.edu/majoring-anthropology>

Eleven courses are required for the major, including:

ANTH UN1002	THE INTERPRETATION OF CULTURE	3
Select one of the following introductory courses:		
ANTH UN1007	THE ORIGINS OF HUMAN SOCIETY	3
ANTH UN1008	THE RISE OF CIVILIZATION	3
ANTH UN1009	INTRO TO LANGUAGE # CULTURE	3
EEEE UN1010	HUMAN ORIGINS # EVOLUTION	3
ANTH UN3040	ANTHROPOLOGICAL THEORY	4
ANTH BC3871	SENIOR THESIS SEMINAR I (Offered Fall Semester)	4
ANTH BC3872	SENIOR THESIS SEMINAR II (Offered Spring Semester)	4

Select six electives, one of which can be a third introductory level class and three of which must be 3000 level or higher. Moreover, the three 3000 level or higher seminars must be taken at Barnard or Columbia (not while on an exchange program during junior year).

In consultation with advisers, programs will be designed to reflect the students' interests and plans—whether they intend to go on to graduate studies in anthropology or expect to enter other fields.

It is recommended that students who plan to major and in socio-cultural anthropology take ANTH BC3868 ETHNOGRAPHIC FIELD RESEARCH IN NYC (y) before their senior year. Many seniors choose to incorporate a fieldwork component in their thesis research and having some experience of field methods is extremely important. Those interested in other sub-disciplines may wish to take this or another "methods" course and should consult their advisers. Students are also encouraged to check listings for courses offered by EEEB at Columbia for possible Anthropology credit, in consultation with the Barnard department chair.

Senior Essay

All students majoring in Anthropology are required to submit an essay of substantial length and scholarly depth. Such a paper will usually be written during the course of ANTH BC3871 SENIOR THESIS SEMINAR I—ANTH BC3872 SENIOR THESIS SEMINAR II).

Double and Joint Majors

Students doing a double or joint major in Anthropology and another subject are required to register for at least one semester of ANTH BC3871 SENIOR THESIS SEMINAR I— ANTH BC3872 SENIOR THESIS SEMINAR II.

Requirements for the Minor

The minor consists of five courses:

ANTH UN1002 THE INTERPRETATION OF CULTURE

Select one of the following introductory courses:

ANTH UN1007 THE ORIGINS OF HUMAN SOCIETY

ANTH UN1008 THE RISE OF CIVILIZATION

ANTH UN1009 INTRO TO LANGUAGE # CULTURE

EEEE UN1010 HUMAN ORIGINS # EVOLUTION

Select three other Anthropology courses, two of which must be 3000-level.

Course Offerings:

ANTH UN1002 THE INTERPRETATION OF CULTURE. 3.00 points.

The anthropological approach to the study of culture and human society. Case studies from ethnography are used in exploring the universality of cultural categories (social organization, economy, law, belief system, art, etc.) and the range of variation among human societies

ANTH UN3041 ANTHROPOLOGICAL THEORY II. 4.00 points.
 Prerequisites: Required of all Barnard Anthropology majors; open to other students with instructor's permission only. To be taken in conjunction with ANTH 3040, preferably in sequence.
 The second of a two semester sequence intended to introduce departmental majors to key readings in social theory that have been constitutive of the rise and contemporary practice of modern anthropology. The goal is to understand historical and current intellectual debates within the discipline. This course replaces ANTH V 3041 - Theories of Culture: Past and Present.

ANTH UN3831 Cultures and Economies: Explorations in Economic Anthropology. 4 points.
 Enrollment limited to 15. Priority given to juniors and seniors

This class explores the intersection of economy, culture, and society from a comparative, anthropological perspective. What have anthropologists learned about the different economic systems of the societies they study? How do economic practices and processes interact with the broader sociocultural worlds in which they are pursued and elaborated? What kind of concepts and methods do anthropologists draw on in their ethnographic (and archeological) researches into the diversity of human economic life? By reading classic and contemporary works in the field of economic anthropology, this class introduce students to longstanding discussions and debates about: economic rationality as a social form; the application of economic principles and methods to non-marketized societies; the nature of exchange and value; the sociocultural dimensions of monetarization and marketization; the role of gender and class in economic production; and the paradoxes of private property in everyday lives. Anthropology and economics have maintained a long and productive, if often combative, relationship with one another, and one of the aims of the course is to explore that relationship from a number of critical perspectives.

ANTH BC3871 SENIOR THESIS SEMINAR I. 4.00 points.
 Prerequisites: Limited to Barnard Anthropology Seniors. Offered every Fall. Discussion of research methods and planning and writing of a Senior Essay in Anthropology will accompany research on problems of interest to students, culminating in the writing of individual Senior Essays. Critiques the many ways the great Red Island has been described and imagined by explorers, colonists, social scientists, and historians —as an Asian-African amalgamation, an ecological paradise, and a microcosm of the Indian Ocean. Religious diasporas, mercantilism, colonization, enslavement, and race and nation define key categories of comparative analysis.

ANTH V3873 Language and Politics. 4 points.

Not offered during 2023-2024 academic year.

Language is central to political process. While all agree that language is used to symbolize or express political action, the main focus of this course is on how language and other communicative practices contribute to the creation of political stances, events, and forms of order. Topics addressed include political rhetoric and ritual; political communication and publics; discrimination and hierarchy; language and the legitimization of authority; as well as the role of language in nationalism, state formation, and in other sociopolitical movements, like feminism and diasporic communities. Since this course has the good fortune of coinciding with the 2012 U.S. Presidential election, we will make significant use of campaign rhetorics as a means of illustrating and exploring various themes.

ANTH UN3861 Anthropology of the Anthropocene. 4 points.

Enrollment limited to 20. Priority given to majors in Anthropology.

This course focuses on the political ecology of the Anthropocene. As multiple publics become increasingly aware of the extensive and accelerated rate of current global environmental change, and the presence of anthropogenesis in ever expanding circumstances, we need to critically analyze the categories of thought and action being developed in order to carefully approach this change. Our concern is thus not so much the Anthropocene as an immutable fact, inevitable event, or definitive period of time (significant though these are), but rather for the political, social, and intellectual consequences of this important idea. Thus we seek to understand the creativity of "The Anthropocene" as a political, rhetorical, and social category. We also aim to examine the networks of capital and power that have given rise to the current state of planetary change, the strategies for ameliorating those changes, and how these are simultaneously implicated in the rhetorical creation of "The Anthropocene".

ANTH BC3868 ETHNOGRAPHIC FIELD RESEARCH IN NYC. 4.00 points.

This course provides the aspiring anthropologist with an array of primarily qualitative methodological tools essential to successful urban fieldwork. As such, it is a practicum of sorts, where regular field assignments help build one's ability to record and analyze social behavior by drawing on several key data collection techniques. Because we have the luxury of inhabiting a large, densely populated, international city, this class requires that you take a head-first plunge into urban anthropology. The NYC area will define the laboratory for individually- designed research projects. Be forewarned, however! Ethnographic engagement involves efforts to detect social patterns, but it is often a self-reflexive exercise, too. Readings provide methodological, analytical, and personal insights into the skills, joys, and trials that define successful field research

Enrollment limited to 20.

Through a careful exploration of the argument and style of five vivid anticolonial texts, Mahatma Gandhi's *Hind Swaraj*, C.L.R. James' *The Black Jacobins*, Aimé Césaire's *Discourse on Colonialism*, Albert Memmi's *Colonizer and Colonized*, and Frantz Fanon's *The Wretched of the Earth*, this course aims to inquire into the construction of the image of colonialism and its projected aftermaths established in anti-colonial discourse.

ANTH V3922 The Emergence of State. 4 points.

Not offered during 2023-2024 academic year.

The creation of the earliest states out of simpler societies was a momentous change in human history. This course examines major theories proposed to account for that process, including population pressure, warfare, urbanism, class conflict, technological innovation, resource management, political conflict and cooperation, economic specialization and exchange, religion/ideology, and information processing.

ANTH UN3939 ANIME EFFECT: JAPANESE MEDIA. 4.00 points.

Culture, technology, and media in contemporary Japan. Theoretical and ethnographic engagements with forms of mass mediation, including anime, manga, video, and cell-phone novels. Considers larger global economic and political contexts, including post-Fukushima transformations. Prerequisites: the instructor's permission

ANTH UN3946 African Cultural Production. 4 points.

Enrollment limited to 15.

This course examines new African popular music, fashion, film, and visual arts through course readings, film, and current exhibits and events in NYC.

ANTH V3949 Sorcery and Magic. 4 points.

Enrollment limited to 40.

Prerequisites: the instructor's permission.

An introduction to the occult sides of making history, colonialism, and transforming reality through the study of south American shamanism, magic in Shakespeare's *Tempest*, sexual magic in politics and dictatorships, the uncanniness in Freud's hysterics, and William Burroughs' *Cities of the Red Night*.

ANTH UN3970 BIOL BASIS OF HUMAN VARIATION. 4.00 points.

Enrollment limited to 15.

Prerequisites: ANEB UN1010 and the instructor's permission.

Prerequisites: ANEB UN1010 and the instructor's permission.

Biological evidence for the modern human diversity at the molecular, phenotypical, and behavioral levels, as distributed geographically

ANTH V3977 Trauma. 4 points.

Enrollment limited to 20. Not offered during 2023-2024 academic year.

Prerequisites: Instructor's permission.

Investing trauma from interdisciplinary perspectives, the course explores connections between the interpersonal, social, and political events that precipitate traumatic reactions and their individual and collective ramifications. After examining the consequences of political repression and violence, the spread of trauma within and across communities, the making of memories and flashbacks, and the role of public testimony and psychotherapy in alleviating traumatic reactions.

ANTH V3979 Fluent Bodies. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

The recent proliferation of writings on the social significations of the human body have brought to the fore the epistemological, disciplinary, and ideological structures that have participated in creating a dimension of the human body that goes beyond its physical consideration. The course, within the context of anthropology, has two considerations, a historical one and a contemporary one. If anthropology can be construed as the study of human society and culture, then, following Marcel Mauss, this study must be considered the actual, physical bodies that constitute the social and the cultural.

ANTH V3980 Nationalism. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: the instructor's permission. Intended for seniors, but not necessarily anthropology majors.

This course will cover the basic readings in the contemporary debate over nationalism. It will cover different disciplinary approaches and especially look at recent studies of nationalism in the formerly colonial world as well as in the industrial West. The readings will offer a mix of both theoretical and empirical studies. The readings include the following: 1) Eric Hobsbawm's *Nationalism since 1780*; 2) Ernest Gillner's *Nations and Nationalism*; 3) Benedict Anderson's *Imagined Communities*; 4) Anthony Smith's *The Ethnic Origins of Nations*; 5) Linda Coley's *Britons*; 6) Peter Sahlins's *Boundaries*; and 7) Partha Chatterjee's *The Nation and Its Fragments*.

ANTH W4065 Archaeology of Idols. 3 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Prerequisites: Sophomore standing.

Explores 40,000 years of the human creation of, entanglement with, enchantment by, and violence towards idols. Case studies roam from the Paleolithic to Petra and from the Hopi to the Taliban, and the theoretical questions posed include the problem of representation, iconoclasm, fetishism and the sacred.

Cross-Listed Courses: Africana Studies (Barnard)

AFRS BC3556 Ethnography of Black America. 4 points.
Not offered during 2023-2024 academic year.

This course critically examines ethnographic texts about Blacks in the United States, focusing as much on what they proffer about Black American culture as on the various socio-political contexts in which this body of scholarship has been produced. The goal is to advance an understanding of the larger social forces undergirding the production not only of formations of Black culture, but also of knowledge about Black America. A further goal is to foster a critical understanding of the anthropological enterprise itself.

Ecology, Evolution, and Environmental Biology

EEEB GU4700 RACE:TANGLED HIST-BIOL CONCEPT. 4.00 points.
Enrollment limited to 15. Priority given to EBHS majors/concentrators.

From Aristotle to the 2020 US census, this course examines the history of race as a biological concept. It explores the complex relationship between the scientific study of biological differences—real, imagined, or invented and the historical and cultural factors involved in the development and expression of "racial ideas." Scientific background not required. [Additional hour for film screenings weekly in second half of the semester—attendance at films is mandatory.] Please note that this course DOES NOT fulfill the SC requirement at the College or GS.

Other Offerings Not Taught This Year:

ANTH V3853 Moving Truths: The Anthropology of Transnational Advocacy Networks. 4 points.
Not offered during 2023-2024 academic year.

Transnational advocacy is an increasingly important dimension of contemporary globalizations, reconfiguring relations of knowledge, power, and possibility across cultures and societies. As sites for enacting expertise, activism, and legality, transnational advocacy networks are crucial for not only making claims and causes mobile across locales, but for making them moving within locales – affective and effective. While transnational advocacy networks are often studied by political scientists, this course focuses on a growing body of anthropological and ethnographic research.

ANTH V3015 Chinese Society. 3 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

Social organization and social change in China from late imperial times to the present. Major topics include family, kinship, community, stratification, and the relationships between the state and local society.

ANTH V3044 Symbolic Anthropology. 3 points.
Not offered during 2023-2024 academic year.

Exploration of the manner in which various anthropologists have constructed "culture" as being constituted of a set of conventional signs called "symbols" and the consequences of such a construal. Among the authors read are the anthropologists Valentine Daniel, Mary Douglas, Clifford Geertz, Claude Levi-Strauss, Sherry Ortner, David Schneider, Margaret Trawick, and Victor Turner; the social theorists Emile Durkheim, Karl Marx, and Max Weber; the semioticians Ferdinand de Saussure and Charles Peirce; and the psychoanalysts Sigmund Freud and Jacques Lacan.

ANTH V3055 Strategy of Archaeology. 3 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

ANTH W3201 Introductory Survey of Biological Anthropology. 4 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

ANTH UN3300 Pre-Columbian Histories of Native America. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 40.

This course explores 10,000 years of the North American archaeological record, bringing to light the unwritten histories of Native Americans prior to European contact. Detailed consideration of major pre-Columbian sites is interwoven with the insight of contemporary native peoples to provide both a scientific and humanist reconstruction of the past.

ANTH V3525 Introduction to South Asian History and Culture. 3 points.
CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2023-2024 academic year.

Examines four major aspects of contemporary South Asian societies: nationalism, religious reform, gender, and caste. Provides a critical survey of the history of and continuing debates over these critical themes of society, politics, and culture in South Asia. Readings consist of primary texts that were part of the original debates and secondary sources that represent the current scholarly assessment on these subjects.

ANTH V3700 Colloquium: Anthropological Research Problems in Complex Societies. 4 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

ANTH V3820 Theory and Method in Archaeology. 4 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

ANTH V3824 Fantasy, Film, and Fiction in Archaeology. 4 points.
BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).
Not offered during 2023-2024 academic year.

ANTH V3903 Cities: Ethnoarchaeology, Archaeology and Theory. 4 points.

Enrollment limited to 20, plus instructor's permission required. **Not offered during 2023-2024 academic year.**

This course will examine cities in comparative perspective, over time and space, from several viewpoints. We will examine how and when they develop, how they function, and what urban life is like. Is the urban experience the same for all residents? At all times? In all places? We will begin with theory and some urban history and then focus on New York as a laboratory, from its origins to the present. The course involves a kind of archaeology called "ethnoarchaeology" in which we look at living societies and communities in order to gain a better understanding of past and present. Our examination of contemporary urban life pays special attention to spatial organization and order, the geography of power in the urban landscape, and to material things, as these are the kinds of data that archaeologists typically focus on.

ANTH V3913 Ancient Egyptian Culture. 4 points.

Not offered during 2023-2024 academic year.

Ancient Egypt was one of the most advanced cultures in antiquity. This course will go beyond the pyramids and pharaohs to investigate the culture and daily life of the ancient Egyptians from the Old Kingdom to the Hellenistic period. Students will learn about ancient Egyptian magic, emotion, cosmogony, education, recreation, travel, and diplomacy by reading ancient Egyptian folklore, dream spells, love poetry, wisdom texts, religious hymns, and royal propaganda in translation. In addition to exploring the laws, occupations, and medical knowledge of the ancient Egyptians, we will also analyze how gender, race, sexuality, class, and disability were constructed and represented.

ANTH V3920 Economy and Society in Prehistory. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Enrollment limited to 15. **Not offered during 2023-2024 academic year.**

Prerequisites: Introduction to Archaeology or permission of the instructor required.

ANTH V3940 Ethnographies of the Mid East. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Previous enrollment in an Anthropology course.

Sophomore standing. Enrollment limited to 20 students.

Explores the themes that have shaped ethnographic literature of the Middle East. These include topics such as colonialism, gender, Islam, nationalism and the nation-state.

ANTH UN3661 South Asia: Anthropological Approaches. 4 points.

This course draws on ethnography, history, fiction, and other genres to think about diverse peoples and places in the region known as South Asia. Rather than attempt to fix or define "South Asia" as a singular category, we will explore how particular social and scholarly categories through which dimensions of South Asian life have come to be known (such as caste, class, religion, gender, sexuality, disability, and kinship) are experienced, negotiated, and reworked by actual persons in specific situations. By examining both categories and practices, we will ask: What kinds of relationships exist between the messiness of everyday life and the classifications used by both scholars and "local" people to describe and make sense of it? How do scholarly and bureaucratic ideas not merely reflect but also shape lived realities? How do lived realities affect the ways in which categories are named and understood? In addressing such questions, categories sometimes thought of as stable or timeless emerge as, in fact, contingent and embodied.

ANTH V3943 Youth and Identity Politics in Africa. 4 points.

Enrollment limited to 15. **Not offered during 2023-2024 academic year.**

Prerequisites: Permission of the instructor is required.

Examines ways in which African youth inevitably occupy two extremes in academic writings and the mass media: as victims of violence, or as instigators of social chaos. Considers youth as generating new cultural forms, as historically relevant actors, and informed social and/or political critics. At the core of such critiques lie possibilities for the agentive power of youth in Africa.

ANTH V3951 Pirates, Boys, and Capitalism. 4 points.

Not offered during 2023-2024 academic year.

ANTH V3952 Taboo and Transgression. 4 points.

Instructor's permission is required. **Not offered during 2023-2024 academic year.**

The transgression of taboos is the basis of crime, sex, and religion in any society. As "the labor of the negative", transgression is also a critical element in thought itself. Working through anthropology of sacrifice and obscenity, as well as relevant work by Bataille, Foucault, and Freud, this course aims at understanding why taboos exist and why they must be broken.

ANTH V3961 Subsequent Performances. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Enrollment limited to 15. **Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission. Priority given to upper class Anthropology and Music majors; students must attend operas outside of class.

Explores the dynamic interaction between operatic compositions (especially Mozart's Don Giovanni and The Marriage of Figaro) and their subsequent performances, with particular emphasis on the cultural, political, and economic contexts that shape both the original composition and the following reproductions. Critical apparatus includes Abbate and Butler.

ANTH V3962 History and Memory. 3 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

ANTH V3975 Anthropology of Media. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Enrollment limited to 16. **Not offered during 2023-2024 academic year.**

Provides a critical overview of the theoretical engagement between anthropology and media theory. It explores the relationship between technologies and transformations in ideas of time, space, and sociability; and examines what it means to live in a mediated society.

ANTH V3983 Ideas and Society in the Caribbean. 4 points.

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

Focusing on the Anglo-Creole Caribbean, this course examines some aspects of popular culture, literary expression, political change, and intellectual movements over the past thirty years.

ANTH V3988 Race/Sexuality Science and Social Practice. 4 points.

Enrollment limited to 26. **Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission.

Scientific inquiry has configured race and sex in distinctive ways. This class will engage critical theories of race and feminist considerations of sex, gender, and sexuality through the lens of the shifting ways in which each has been conceptualized, substantiated, classified, and managed in (social) science and medicine.

ANTH UN3993 World Archaeologies/Global Perspectives. 4 points.

Enrollment limited to 15.

Prerequisites: the instructor's permission and at least one of the following: *ANTH V1007*, *ANTH V1008*, or *ACLG V2028*.

This capstone seminar explores global archaeology from a postcolonial perspective. We will address the history of archaeological interpretation and explore the politics and practice of archaeology by considering specific case studies from around the world. The seminar fulfills the major seminar requirement for the archaeology major

ANTH V3994 Anthropology of Extremity: War. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

ANTH W4002 Controversial Topics in Human Evolution. 3 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor and introductory biological/physical anthropology course.

ANTH W4011 Critical Social Theory. 3 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Enrollment limited to 30. **Not offered during 2023-2024 academic year.**

Prerequisites: junior standing.

ANTH W4022 Political Ecology. 3 points.

Enrollment limit is 15. **Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission.

Analyzes global, national, and local environment issues from the critical perspectives of political ecology. Explores themes like the production of nature, environmental violence, environmental justice, political decentralization, territoriality, the state, and the conservation interventions.

ANTH W4625 Anthropology and Film. 3 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL)., BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

ANTH V3899 Food, Ecology, Globalization. 4 points.

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission.

EEEE UN3204 Dynamics of Human Evolution. 4 points.

CC/GS: Partial Fulfillment of Science Requirement
Enrollment limited to 13. Priority is given to EBHS majors/concentrators.

Prerequisites: EEEB UN1010 Human Species/HO&E, ANTH UN1007 Origins of Human Society, or the equivalent.

Seminar focusing on recent advances in the study of human evolution. Topics include changing views of human evolution with respect to early hominin behavior, morphology, culture and evolution. [Either Dynamics of Human Evolution or Neandertals is taught every other year.]

ANTH UN3947 TEXT, MAGIC, PERFORMANCE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: the instructor's permission.

Prerequisites: the instructors permission. This course pursues interconnections linking text and performance in light of magic, ritual, possession, narration, and related articulations of power. Readings are drawn from classic theoretical writings, colonial fiction, and ethnographic accounts. Domains of inquiry include: spirit possession, trance states, séance, ritual performance, and related realms of cinematic projection, musical form, shadow theater, performative objects, and (other) things that move on their own, compellingly. Key theoretical concerns are subjectivity - particularly, the conjuring up and displacement of self in the form of the first-person singular I - and the haunting power of repetition. Retraced throughout the course are the uncanny shadows of a fully possessed subject –within ritual contexts and within everyday life

The Department of Architecture

Mission

The Architecture major establishes an intellectual context for students to interpret the relation of form, space, program, materials and media to human life and thought. Through the Architecture curriculum, students participate in the ongoing shaping of knowledge about the built environment and learn to see architecture as one among many forms of cultural production. At the same time, the major stresses the necessity of learning disciplinary-specific tools, methods, terms and critiques. Thus, work in the studio, lecture or seminar asks that students treat architecture as a form of research and speculation which complement the liberal arts mission of expansive thinking.

Undergraduate Study in Architecture

Studying Architecture at Barnard College, Columbia College, and General Studies leads to a liberal arts degree – a Bachelor of Arts with a major in Architecture, and Barnard College is the administrative location for all undergraduate architecture studies at Columbia University and its partner institutions. A liberal arts education in architecture holds a unique position in academia and in relation to the discipline. If the goal of a professional education in architecture is to enable students to participate directly in the world as an architect – a liberal arts education asks that students consider the broader and myriad conditions in which architecture is conceived and practiced

and, in turn, to understand how architecture inevitably alters those conditions. Students are asked to confront and interpret the complex social, cultural, political, and environmental processes that weave through architectural design and urbanism. The purpose of an undergraduate liberal arts degree in architecture is to educate students to think about the world through architecture.

The Architecture curriculum introduces design at a variety of scales, acknowledging that integrated design thinking is effective for problem solving at any scale and in any discipline. Students will experiment with full-scale installations and devices and make small-scale models of urban conditions from which they extract, interpret and invent new possibilities of inhabitation and use. The curriculum intentionally balances the traditions of handcrafted representation with evolving digital technologies of architectural design and communication.

The Architecture major complements, and makes great use of its University setting. With access to superb libraries, research centers, graduate programs, and abundant intellectual resources, our students have the opportunity to follow their creative instincts to great depth and breadth – and they do. The major depends on New York City as more than a convenient site for many design and research projects and frames the City as one of the key social and architectural, and thus didactic, markers of Modernity. Architecture students study with peers from countries around the world in one of the most diverse cities in the world. A large majority of the Architecture students expand their education by interning in Architecture or a related field during their undergraduate studies. Alumni of the Department are leaders in architecture and design fields around the world. The faculty teaching in the undergraduate program are dedicated teachers who are also at the forefront of practice and research and are similarly drawn to New York City as a nexus of global design thinking.

Students interested in obtaining a professional degree in Architecture continue on to graduate programs after their undergraduate degree, and students from the Barnard Columbia program have enjoyed enormous success in their admissions to the most competitive graduate programs in the country. Students who study Architecture as undergraduates have also pursued graduate degrees in a variety of disciplines including Urban Planning, Law, and Media and Communications.

Student Learning Outcomes

Students in the Architecture Majors who fully engage with the curriculum should be able to complete the following outcomes:

- Apply integrated design thinking to specific problems in and beyond the discipline;
- Visually communicate architectural concepts and research using discipline-specific techniques in multiple media;
- Verbally present independent, group or assigned research, in multiple media formats;
- Organize and concisely write in a variety of formats including reports, case studies, synthetic overviews, etc.;
- Understand and critically interpret major buildings and themes of Architectural history and theory;
- Be intellectually prepared for graduate studies in architecture and related disciplines.

Advising Appointments

Current students as well as prospective students with questions about our courses and programs of study are encouraged to meet with our full-time faculty members. [Faculty advising appointments](#) are open to anyone who is interested in learning more about our department. During the summer break, all current and prospective students are instead invited to submit their questions by email to architecture@barnard.edu.

THE MAJOR IN ARCHITECTURE (p. 86)

THE MAJOR IN THE HISTORY AND THEORY OF ARCHITECTURE

THE MINOR IN ARCHITECTURE

The Major in Architecture

The major in architecture is open to Barnard College students, Columbia College students, and General Studies students. The required classes are broken down into four categories: studio, lectures seminars and workshops, senior courses, and the specialization:

Studio Courses

Four studio courses, to be taken one per semester (studio courses have limited enrollment and priority is given to Architecture majors):

ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS

ARCH UN2103 ARCHITECTURAL DESIGN: ENVIRONMENTS AND MEDIATIONS

ARCH UN3201 ADVANCED ARCHITECTURAL DESIGN I

ARCH UN3202 ADVANCED ARCHITECTURAL DESIGN II

Lecture, Seminar, and Workshop Courses *

Five courses following the distribution requirement below:

ARCH UN3117 MOD ARCHITECTURE IN THE WORLD

Architectural Elective: History

Architectural Elective: Society, Environment, and the Global

Architectural Elective: Design, Media, and Technology

Architectural Elective

Senior Courses *

ARCH UN3901 SENIOR SEMINAR

Elective Architecture seminar (another Senior Seminar in the Department, Advanced Architectural Research and Design, or Independent Research)

Specialization Courses

All majors are asked to complement their work with a thematic unit (three courses) called the "specialization." Each student develops a specific specialization that broadens their architectural studies in one of the following areas or combination of areas: History, Society, Environment, Global, Design, Media, and Technology. Courses may be taken from across various departments. All majors, in consultation with their advisers, will develop a short (100 word) description of their specialization and advisers will approve their course selections. Students can request and develop other areas of specialization with adviser approval.

Graduation Requirements

The major also requires that students submit a portfolio and a writing sample before graduation. The design portfolio includes representative work from all design studios and the writing sample is a paper or essay from a senior level architecture or architecture-related course. Final submissions are archived in the department, the portfolios are displayed at the end of the year show, and both are used to award graduation honors.

* These are courses offered by the architecture department or other applicable departments offered within the University. Students should consult the program office for a list of applicable courses each semester.

The Major in the History and Theory of Architecture

The History and Theory of Architecture major stresses research and writing in Architectural History. This program of study is only open to Barnard College students; Columbia College and General Studies students that are interested in majoring in architectural history should contact the [Department of Art History and Archaeology at Columbia University](#). The History and Theory of Architecture major requires a total of 14 courses, distributed as follows:

Studio Courses

1-2 studio courses, to be taken one per semester:

ARCH UN1020 INTRO-ARCH DESIGN/VIS CULTURE

ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS

ARCH UN2103 ARCHITECTURAL DESIGN:
ENVIRONMENTS AND MEDIATIONS

Lecture, Seminar, and Workshop Courses

7-8 lecture, seminar, and workshop courses:

ARCH UN3117 MOD ARCHITECTURE IN THE WORLD

Architectural Elective: History

Architectural Elective: Society, Environment, and the Global

Architectural Elective: Design, Media, and Technology

3 to 4 Architectural Electives - any lecture, seminar, or workshop offered by the Architecture Department or an approved course from a related department

*Note: Studios, Lectures, Seminars, and Workshops must total to 9 courses

Specialization

3 courses for the specialization:

Each student develops a specialization that broadens the reach of their architectural studies and supports their thesis. All majors, in consultation with their advisers, will develop a short (100 word) description of their specialization and advisers will approve their course selections.

Senior Courses

2 courses for the senior course requirement:

ARCH UN3901 SENIOR SEMINAR

ARCH UN3998 INDEPENDENT STUDY

All senior History and Theory of Architecture majors are required to enroll in one semester of Senior Seminar and to write a thesis which can be done through enrolling in Independent Study (ARCH UN3997 or ARCH UN3998). Please consult with your major adviser for planning your thesis.

The Minor in Architecture

The minor in architecture is only open to Barnard College students and SEAS students at Columbia University. The minor in architecture requires a total of five courses, distributed as follows:

Studio Courses

1-3 of the following courses:

ARCH UN1020 INTRO-ARCH DESIGN/VIS CULTURE

Three history/theory courses

ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS

ARCH UN2103 ARCHITECTURAL DESIGN:
ENVIRONMENTS AND MEDIATIONS

Lecture, Seminar, and Workshop Courses

ARCH UN3117 is required along with 1-3 Architectural Electives - any lecture, seminar, or workshop offered by the Architecture Department or an approved course from a related department.

ARCH UN3117 MOD ARCHITECTURE IN THE WORLD

Fall 2022 Courses

ARCH UN1010 DESIGN FUTURES: NEW YORK CITY. 3.00 points.

How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design in contemporary culture -- from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences

ARCH UN2101 ARCHITECTURAL DESIGN: SYSTEMS AND MATERIALS. 4.50 points.

This architectural design studio explores material assemblies, techniques of fabrication, and systems of organization. These explorations will be understood as catalysts for architectural analysis and design experimentation. Both designed objects and the very act of making are always embedded within a culture, as they reflect changing material preferences, diverse approaches to durability and obsolescence, varied understandings of comfort, different concerns with economy and ecology. They depend on multiple resources and mobilize varied technological innovations. Consequently, we will consider that making always involves making a society, for it constitutes a response to its values and a position regarding its technical and material resources. Within this understanding, this studio will consider different cultures of making through a number of exercises rehearse design operations at different scales—from objects to infrastructures

This architectural design studio course explores modes of visualization, technologies of mediation and environmental transformations. These explorations will be used as catalysts for architectural analysis and design experimentation. Introducing design methodologies that allow us to see and to shape environmental interactions in new ways, the studio will focus on how architecture may operate as a mediator – an intermediary that negotiates, alters or redirects multiple forces in our world: physical, cultural, social, technological, political etc. The semester will progress through three projects that examine unique atmospheric, spatial and urban conditions with the aid of multimedia visual techniques; and that employ design to develop creative interventions at the scales of an interface, space and city

ARCH UN3120 CITY, LANDSCAPE, # ECOLOGY. 3.00 points.

City, Landscape, Ecology is a thematically driven course that centers on issues and polemics related to landscape, land settlement and ecology over the past two centuries. The course interrogates our changing attitudes to nature from the 18th century to the present, focusing on the artistic and architectural responses to these perceptions. It aims to demonstrate the important role that artists and architects have played, and are to play, in making visible the sources of environmental degradation and in the development of new means of mitigating anthropogenic ecological change. City, Landscape, Ecology is divided into three parts. Part I explores important episodes in the history of landscape: picturesque garden theory, notions of “wilderness” as epitomized in national and state parks in the United States, Modern and Postmodern garden practices, and the prevalence of landscape in the work of artists from the 1960s to the present. The purpose here is to better understand the role that territorial organization plays in the construction of social practices, human subjectivities, and technologies of power. We then turn to ecology and related issues of climate, urbanization and sustainability in Part II. Here we will look at the rise of ecological thinking in the 1960s; approaches to the environment that were based on the systems-thinking approach of the era. In the session “Capitalism, Race and Population Growth” we examine the history of the “crisis” of scarcity from Thomas Robert Malthus, to Paul R. Ehrlich (The Population Bomb, 1968) to today and look at questions of environmental racism, violence and equity. The course concludes with Part III (Hybrid Natures). At this important juncture in the course, we will ask what is to be done today. We'll examine the work of contemporary theorists, architects, landscape architects, policy makers and environmentalists who have channeled some of the lessons of the past in proposing lasting solutions to our land management and ecological crises of the present and future

Prerequisites: ARCH V3101 and ARCH V3103. Open to architecture majors or with permission of instructor.

Prerequisites: ARCH UN2101 and ARCH UN2103. Advanced Architectural Design I explores the role of architecture and design in relationship to climate, community, and the environment through a series of design projects requiring drawings and models. Field trips, lectures, and discussions are organized in relation to studio exercises. A portfolio of design work from the prerequisite courses ARCH UN2101 and ARCH UN2103 will be reviewed the first week of classes

ARCH GU4300 The Just City: Global Debates in Urban Planning and Policy. 4.00 points.

Urbanization is inherently unequal, inscribing social, economic, environmental, and political unevenness into the spatial fabric of the city. But the distribution of such inequality is not inevitable. Urbanization is a product of the collective decisions we make (or choose not to make) in response to the shared challenges we face in our cities. And, thus, the patterns of urbanization can be changed. This is the task of urban planning and the starting point for this advanced seminar, which asks how we can reshape our cities to be more just—to alleviate inequality rather than compound it. In embarking on this effort, we face numerous “wicked” problems without clear-cut solutions. The approaches one takes in addressing urban inequality are therefore fundamentally normative—they are shaped by one's place in the world and one's view of it. The central challenge in addressing inequality is thus establishing a basis for collective action amongst diverse actors with differing—and sometimes conflicting—values and views. In other words, planning the just city a matter of both empathy and debate. In this course, we will endeavor to develop informed positions that can help us engage with others as a basis for taking collective action. The course is organized into four 3-week modules, each of which addresses a dimension of the just city: equity, democracy, diversity, and sustainability. In the first week of each module, we will discuss how the issue has been understood in history and theory (with an emphasis on tradeoffs between different priorities and values); in the second week, we will apply this discussion to a global case study prepared and presented by a team of students; and in the third week, we will hold an in-class debate to determine what should be done. Specific case studies vary each year

ARCH UN1010 DESIGN FUTURES: NEW YORK CITY. 3.00 points.

How does design operate in our lives? What is our design culture? In this course, we explore the many scales of design in contemporary culture -- from graphic design to architecture to urban design to global, interactive, and digital design. The format of this course moves between lectures, discussions, collaborative design work and field trips in order to engage in the topic through texts and experiences

ARCH UN3117 MOD ARCHITECTURE IN THE WORLD. 3.00 points.

Prerequisites: Designed for but not limited to sophomores; enrollment beyond 60 at the discretion of the instructor.

Prerequisites: Designed for but not limited to sophomores; enrollment beyond 60 at the discretion of the instructor. How has architecture been “modern”? This course will introduce students to things, practices, figures, and ideas behind this contentious and contradictory concept, emerging in multiple locations around the world. Students in this course will learn about architecture as it was practiced, taught, thought, and experienced across landscapes of social and cultural difference during the past two centuries. Learning about the past through historical consciousness around architecture and investigating the history of architecture as a discursive field are fundamental to liberal arts thinking generally, and important for students in architecture, the history and theory of architecture, art history, and urban studies. Students in this course will be introduced to: Architecture as enmeshed with other forms of cultural production Culturally-specific intellectual and public debates around the architectural and urban Makers, thinkers, and organizers of the designed or built environment Geographies, territories, and mobilities associated with architecture as an end or means for material extraction, refinement, trade, labor, and construction Sites, institutions, media, events, and practices which have come to hold meaning Modernity, modernism, and modernization in relation to each other, as social, cultural, and technological drivers holding stakes for past events as well their histories. In this course, we will ask questions about ideas and practices within disparate socially-and culturally-constructed worlds, and across other asymmetries. For example, can we draw a coherent historical thread through Lisbon in 1755, Bombay in 1854, Moscow in 1917, the moon in 1969, and al-Za’atari refugee camp in 2016? Are such narratives of coherence themselves the trace of the modernist impulse in architectural history? In this course, we will study modern architecture’s references to an art of building as well the metaphors it gives rise to. Embedded in this examination are social and cultural questions of who made and thought modern architecture, and aesthetic and historical questions around the figure of the architect

The Department of Art History

Mission

Art History, which is devoted to the study of all the visual arts, is one of the broadest fields in the humanities. It is concerned not only with the nature of works of art – their form, style, and content, but also with the social, political, and cultural circumstances that shape them.

The department, fortunate in being located in New York City, one of the world’s great art centers, takes full advantage of the rich resources of the city’s museums and galleries.

Introductory level courses encourage a basic and lifelong understanding and appreciation of works of art. The rest of the curriculum offers a more advanced and specialized knowledge of art, which can lead to many kinds of careers, including teaching, museum

administration and curating, business positions in galleries or auction houses, publishing, criticism, collection advising, and conservation, as well as creative careers in any medium. Students in many fields may also find that art history is relevant to their studies.

Student Learning Outcomes

Students who graduate with a major or minor in art history will be able to attain the following outcomes:

- Demonstrate a critical understanding of the social, political, and cultural circumstances surrounding the making and viewing works of art in a range of cultural traditions and time periods in a comparative way;
- Discuss the form, style, and content of a range of works of art;
- Recognize the methods and theories used to ask significant questions about works of art;
- Frame and execute their own research projects through the writing of papers, the production of art works or a combination of the two;
- Express themselves effectively orally, in writing, visually or materially;
- Study works of art in person.

Art History Major Requirements: Concentration in Art History

Requires a minimum of 12 Art History courses (a minimum of 36 credits) including:

AHIS BC1001	INTRODUCTION TO ART HISTORY I	4
AHIS BC1002	INTRODUCTION TO ART HISTORY II	4
AHIS BC3970	METHODS # THEORIES OF ART HIST (To be taken during the junior or senior year.)	4
AHIS BC3959 - AHIS BC3960	SENIOR RESEARCH SEMINAR and SENIOR RESEARCH SEMINAR *Please see notes below on one and two semester written senior thesis options.	3-6
or AHIS BC3960	SENIOR RESEARCH SEMINAR	

Two Seminar Courses in Art History (may also be counted toward the historical and regional distribution requirement.)

Seven elective courses *See below for elective requirements

1. BC1001 (Fall) and BC1002 (Spring) Introduction to Art History. This two-course sequence is required.
2. BC3970 Methods and Theories of Art History. To be taken during the fall of senior year or by permission of instructor and major advisor.
3. BC3959x and/or BC3960y Senior Research Seminar. Students write their senior thesis in conjunction with the Senior Research Seminar. Students will develop, research, and write their thesis project in consultation with an individual faculty member in Art History. They will also attend and participate in group seminars convened during the academic year in which all students will present their work. Students who plan to study abroad during their senior year and those who expect to graduate early must begin the senior research seminar sequence in the second semester of the junior year.
4. Two Seminar Courses in Art History (may also be counted toward the historical and regional distribution requirement.)
5. Seven elective courses, with the following requirements: Lecture or seminars courses can be used to fulfill the seven elective requirements. BC1001 and 1002 or any other broad survey can not be used to fulfill this requirement. Courses in film are accepted toward the major requirements; studio courses are not.

Students must take at least one course in three of four historical periods:

Ancient (up to 400 CE/AD), 400-1400, 1400-1700, 1700-present

*These chronological divisions are approximate. In case of ambiguities about the eligibility of a course to fill the requirement, please consult the department chair or your advisor.

An additional two courses must also be drawn from at least TWO DIFFERENT world regions, as listed: Africa, Asia and the Indigenous Pacific, Latin America/Caribbean/Indigenous Americas, Middle East

- Courses in film are accepted toward the major requirements; studio courses are not.

- Broad survey courses can not be counted towards the temporal requirements but can count towards regional requirements.
- Recommended: One or two studio courses should be taken.

Students who plan to undertake graduate work should acquire a reading knowledge of at least two foreign languages in which major contributions to the history of art have been made. Most graduate schools require a reading knowledge of French, German, or Italian. The department strongly recommends a student's taking one of these languages while at Barnard.

AP CREDIT AND THE ART HISTORY MAJOR AND MINOR

For students entering Barnard in Fall 2016 or after, an AP Art History score will not exempt students from either INTRO TO ART HISTORY I or II (AHIS BC1001 or AHIS BC1002).

Visit the Barnard Registrar's AP Credit Information webpage for further details: <https://barnard.edu/transfer-credits>

ART HISTORY WRITTEN SENIOR THESIS

All Art History Majors with a concentration in Art History write a substantial research paper in their senior year. There are two options for fulfilling this requirement: Seniors have the option of doing a year-long thesis, or reworking and developing a seminar paper into a thesis through a one-semester participation in the Senior Thesis Seminar. The Senior Thesis Seminar would function for those interested in working on a thesis over the course of a year, but those deciding for the option of expanding a seminar paper would only join the course in the second semester. The intent is to offer an alternative to those with less interest in a major writing project.

WRITTEN SENIOR THESIS OPTIONS

1. Students interested in participating in the year-long Senior Thesis Seminar should write a brief (one-page) description of their thesis topic and submit it to the appropriate adviser within the first two weeks of the fall semester. The potential adviser will determine the feasibility of the study in question and accept or decline to become the student's adviser. Such a thesis should ultimately be approximately 30-50 pages long.
2. Students interested in expanding and enhancing a seminar paper will find a faculty adviser, preferably the professor with whom they wrote the original paper, willing to help them in its transformation into a thesis. They will then join the Senior Thesis in the spring semester of their senior year. In this context they will have an opportunity to present their ideas to the rest of the graduating class as well as members of the faculty so as to receive comments and suggestions as to how to develop their arguments. These created by these means should aim to be approximately 30 pages long.

GRADES

Two grades will be awarded in connection with your work on the finished thesis. One will evaluate the way in which you have fulfilled the requirements of the Senior Research Seminar. That is, your participation and attendance in the Thesis Colloquium, the energy you have put into the research, the effort you have made in producing an original and challenging argument as well as a solidly constructed and polished piece of prose. Since the course is yearlong, students will

receive a grade of Y (indicating year long course) for the fall semester and will receive their grade at the end of the spring term for the year. This grade will be assigned in the usual A through F spectrum. The other grade will be awarded on the basis of the evaluation of the thesis itself. This evaluation will consider whether or not the aims of the project were met: was the research sufficient to warrant the conclusions, is the argument of the thesis original as well as coherent and convincing, was the writing adequate to the ideas that had to be expressed? Very often the instructor will ask another member of the faculty to comment on the paper as well. This grade will either be a Pass with Distinction, a Pass or a Fail.

NOTE ON SENIOR THESIS FOR DOUBLE AND COMBINED MAJORS

Please note the distinctions between the Double Major, the Double Major with a Single Essay, and the Combined Major. In the Double Major students will do all of the required course work for both majors and write two different Senior Essays that fulfill the requirements of each department. In the Double Major with Single Essay students do all of the required course work for the two majors and write only one essay read by an adviser in each major field. In the Combined Major students follow the requirements for coursework for a combined major and write a single senior essay also read by an adviser in each major field. To do a combine Art History and another major you will need to obtain a special form from the Dean of Studies office. The form needs to be signed by both department chairs. On the form you will need to list the sponsors from both departments along with the 6 courses from each major you plan to count towards the combine major. Any questions, please contact the Art History office.

Art History Major Requirements: Concentration in Visual Arts

Requires a minimum of 12 Art History courses (a minimum of 39 credits) including:

Seven Art History courses:

AHIS BC1001	INTRODUCTION TO ART HISTORY I	4
AHIS BC1002	INTRODUCTION TO ART HISTORY II	4
AHIS BC3031	IMAGERY AND FORM IN THE ARTS	4

One course in 19th, 20th or 21st Century Art.

One seminar in Art History.

One additional Art History course.

Five Studio courses:

AHIS BC3530	ADVANCED SENIOR STUDIO I (I (Fall semester))	4
AHIS BC3531	ADVANCED SENIOR STUDIO II (II (spring semester))	4

Three additional Studio courses.

1. BC1001 (Fall) and BC1002 (Spring) Introduction to Art History. This two-course sequence is required.
2. BC3031 Imagery and Form in the Arts (spring) Required course to be taken in the spring semester of the Junior or Senior year
3. Senior Visual Arts Thesis Project

Senior Art History Majors with a Concentration in Visual Arts will research and create a thesis project in consultation with faculty members and peers in the Visual Arts. They will also attend two semester-long courses, participate in group critiques, and guest artist lectures scheduled during the academic year. They will present visual

art projects in two public group exhibitions planned at the end of the Fall and Spring semesters of the senior year.

The following Studio courses are required for the Senior Visual Art Thesis Project

BC3530 Advanced Senior Studio I (Fall)

BC3531 Advanced Senior Studio II (Spring) (Please see description of the senior thesis here).

4. One Seminar Course in Art History

5. One 19th, 20th or 21st-century elective course in Art History.

6. Two elective courses in Art History

7. Three elective courses in Visual Arts-Studio

*Courses in film can apply toward the major requirements.

*Studio courses cannot exceed 30 points of credits.

SENIOR THESIS PROJECT FOR ART HISTORY MAJORS WITH A CONCENTRATION IN VISUAL ARTS

The Senior Visual Arts Thesis Project for Art History Majors with a Concentration in Visual Arts is scheduled in the last year of the major.

By that time, you will have taken Imagery and Form BC3031 and a variety of Art History and Studio courses, which may help form your approach to your thesis project.

Advanced Senior Studio I BC3530 (Fall) and Advanced Senior Studio II BC3531 (Spring) provides a two-semester framework in which to complete a senior project. Your senior project should be a cohesive body of work based on original concepts and executed with some technical proficiency. A paper approximately seven-to-ten pages in length will accompany your senior project outlining your artistic goals. This paper will serve as an artist’s statement and should describe what your work would mean to viewers as well situate your work vis-a-vis artistic precedents.

You also will take part in a senior thesis exhibition, which will be accompanied by a catalog. Here, you will be responsible for both installing your work and for taking it down at the end of the show.

GRADES

Two grades will be awarded in connection with your work on the Senior Project. One will evaluate the way in which you have fulfilled the course requirements, that is, the regularity of your meetings and the effort you have made in completing your thesis. This grade will be a letter grade. The second grade will be awarded on the basis of the evaluation of the Senior Project itself. This evaluation will consider whether or not the aims of the project were met: a pass with distinction, a pass or a fail.

OPTION FOR ART HISTORY AND VISUAL ARTS - WRITTEN SENIOR THESIS

Art History Majors with a Concentration in Visual Arts may choose to do a written Art History Senior Thesis instead of the Visual Arts Senior Project. To do this they must: Notify their adviser of their intention to do so by the end of their junior year with permission from both the Visual Arts Director and Art History chair. They must then take both Methods and Theories of Art History (BC3970) & the written Art History senior research seminar (BC3959 and BC3960). These three courses required for the written thesis option replace the Visual Arts sequence,

BC3031 Imagery and Form in the Arts and Advanced Senior Studio I BC3530 (Fall) and Advanced Studio II BC3531 (Spring).

- Notify their adviser of their intention to do so by the end of their junior year
- Take both AHIS BC3970 METHODS # THEORIES OF ART HIST and AHIS BC3959 SENIOR RESEARCH SEMINAR + AHIS BC3960 SENIOR RESEARCH SEMINAR.

AHIS BC1001 INTRODUCTION TO ART HISTORY I. 4.00 points.

The first half of the Introduction to Art History explores premodern art and architecture around the world, from cave paintings to Song dynasty landscapes and Renaissance sculpture. Lectures and discussion sections are organized around themes, including nature and naturalism, death and the afterlife, ornament and abstraction, gender and sexuality, colonialism and conversion, and ritual and divinity. Visits to museums across New York are also an integral component to the course

AHIS BC2001 DRAWING STUDIO. 3.00 points.

Note course is limited to 15 students with instructor's permission on the first day of class.

This course will explore drawing as an open-ended way of working and thinking that serves as a foundation for all other forms of visual art. The class is primarily a workshop, augmented by slides lectures and videos, homework assignments and field trips. Throughout the semester, students will discuss their work individually with the instructor and as a group. Starting with figure drawing and moving on to process work and mapping and diagrams, we will investigate drawing as a practice involving diverse forms of visual culture

AHIS BC2005 PAINTING I. 3.00 points.

This course will focus on individual and collaborative projects designed to explore the fundamental principles of image making. Students acquire a working knowledge of concepts in contemporary art through class critiques, discussion, and individual meetings with the professor. Reading materials will provide historical and philosophical background to the class assignments. Class projects will range from traditional to experimental and multi-media. Image collections will be discussed in class with an awareness of contemporary image production

AHIS BC2006 Painting II and IV. 3 points.

Enrollment limited to 15 students. Instructor's permission required. Attend the first day of class.

A continuation of painting I & III, open to all skill levels. Students will further develop techniques to communicate individual and collective ideas in painting. This course will focus on individual and collaborative projects designed to explore the fundamental principles of image making. Students acquire a working knowledge of traditional studio skills and related concepts in contemporary art through class critiques, discussion, and individual meetings with the professor. Reading materials will provide historical and philosophical background to the class assignments. Class projects will range from traditional to experimental and multi-media. Image collections will be discussed in class with an awareness of contemporary image production.

AHIS BC2007 PAINTING III. 3.00 points.

This course will focus on individual and collaborative projects designed to explore the fundamental principles of image making. Students acquire a working knowledge of concepts in contemporary art through class critiques, discussion, and individual meetings with the professor. Reading materials will provide historical and philosophical background to the class assignments. Class projects will range from traditional to experimental and multi-media. AHIS BC2019 Pedagogy of Play. 3.00 points.

Pedagogy of Play is a course that explores the art of teaching and learning through play. This course draws inspiration from surrealist games, Dadaist wordplay, Fluxus movement prompts, radical and progressive education experiments, exhibitions like the 1970 Jewish Museum show, SOFTWARE Information Technology: its new meaning for art, the teaching practice of Sister Corita Kent, Audre Lorde and bell hooks' discussion of the erotic, Elvia Wilk's exploration of live-action role-playing, and C. Thi Nguyen's Games: Agency As Art (2020). In this course, students will have the opportunity to design and facilitate playful invitations, prompts, scores, and/or happenings for their classmates. Additionally, students will design and present a playful art object as a workbook publication or portable FLUXUS-like kit. We will focus on questions of trust, care, and intuition in the teaching and learning process. More than anything, we will explore teaching and learning as a relational art, or what Octavia Estelle Butler calls "primitive hypertext." We will consider how the playful invitations we design and facilitate can actively build relationships between people, places, ideas, materials, time, etc Play is an invitation for collaboration, risk, and learning. This class is organized around creating art objects that can be touched, manipulated, transformed, and destroyed in the process of learning and play. This course is interested in creating art objects for public engagement, not exhibition

AHIS BC2350 Medieval Art and Architecture . 3 points.

Medieval painting, sculpture, and precious arts from Late Antiquity to c. 1400, including early Byzantine, early Islamic, Merovingian, Visigothic, Insular, Carolingian, Ottonian, Mozarabic, Anglo-Saxon, and especially Romanesque and Gothic art. Questions include those of style, function, material, historical context, the earthly, the divine, ornament, the figural, and the geographic Other.

AHIS BC2355 APOCALYPSE. 4.00 points.

This lecture course explores how art and architecture responded to changing attitudes toward death, the afterlife, and the end of the world over the course of the European Middle Ages, from early Christian Rome to the dawn of the Protestant Reformation in Germany. Medieval illustrations of the Book of Revelation in New York collections will play a central role in discussions of plague, rapture, and "eschatology"—or concerns over the fate of the soul at the end of time. We will analyze the visual culture associated with ordinary people preparing for their own death and the deaths of loved ones, saints and Biblical figures whose triumph in death served as exemplars for the living, and institutional and individual anxieties over humankind's destiny on Judgment Day. Artworks under consideration will encompass various media and contexts, including monumental architecture and architectural relief sculpture, tomb sculpture, wall painting, manuscript painting, reliquaries, and altarpieces. The course satisfies the major requirement's historical period of 400-1400. Note course requires 1 hour weekly TA discussion sections to be arranged

AHIS BC2360 Northern Renaissance Art. 3 points.

Not offered during 2023-2024 academic year.

The Northern Renaissance (roughly c. 1400-1600) spans an historical period of epochal transitions: Europe began this era with a globe and mindset that rarely ventured beyond its geographic boundaries, and it concluded these centuries as one continent within a world that was emphatically, unavoidably, and thrillingly global. The paradigm shifts entailed were no less pronounced in the visual cultures and fine art traditions of Europe north of the Alps; this includes the growth of middle-class patronage, the Protestant Reformation, the rise of the printing press and print media, the practice of portraiture, the spread of humanism, the foundations of what might be referred to as an art market, and a fundamental revision of purpose and definition of art and the artist. Threaded throughout many of these developments run questions of mimesis, realism, skill, medium, and the growing cult of the artist, as well as the relationship with the Italian Renaissance, the Mediterranean, and the expanding globe. The Northern Renaissance witnessed the exciting birth of new media genres, especially oil painting on panel and the print, that would help determine the course of Western art history for centuries to come; at the same time, while the cultural and intellectual ruptures of the Northern Renaissance should be acknowledged, continuities with the earlier medieval world must also be remembered.

This course explores these and other histories as they played out within panel painting, book painting, the sumptuous arts (e.g., tapestries and metalwork), printing, sculpture, and architecture, focusing mainly on France, the Low Countries, Germany, and England.

We will begin within the late medieval world of Burgundy, Prague, and Germany before progressing through such key artistic personalities as Sluter, Broederlam, the Limbourgs, Campin, the van Eycks, van der Weyden, Memling, Fouquet, Riemenschneider, Dürer, Grünewald, Altdorfer, Cranach, Bosch, Holbein, and Bruegel—such a narrative, however, will be equally enriched with less familiar and less canonical works.

AHIS BC2698 American Monument Cultures. 4.00 points.

Cities, institutions, and impassioned individuals are pulling down statues of people implicated in the histories of slavery, colonization and violence. This class explores why monuments are important, how they have been used historically to assert political and social power and different points of view on where to go from here. The nation is caught up in a vital debate about how historical figures and events should be recorded in the public square. Spurred by protests in Charlottesville, VA in the summer of 2017 and moved forward during the uprisings against police brutality in the summer of 2020, cities, institutions and impassioned individuals are pulling down and removing statues of Confederate leaders and other individuals implicated in the histories of slavery, colonization and violence even as objections are raised to these actions from both the left and the right. This activism led to the formation of a commission to study New York City's built environment in fall 2017 and its resolution advocating both taking down and putting up monuments here. Why are Monuments so important? How have they been used historically to assert political and social power? This course introduces the history of monument culture in the United States, focusing on monuments related to three controversial subjects: the Vietnam War, the Confederacy, and the "discovery" of America. We will study when, by whom, and in what form these monuments were erected and how artists and audiences of the past and present have responded to them. In addition to gaining historical background, students will create a podcast exploring the history and impact of a public monument in New York City. Class meetings will combine lecture and discussion and will include several guest speakers

AHIS BC2990 Sculpting in Time. 4.00 points.

This is an introductory course in time-based arts: video, sound, and performance, understood through the language of both short and long cinematic forms. We'll start with an in-depth study of the life and work of Soviet filmmaker Andrei Tarkovsky (1932-1986), whose art has a unique sense of time, driven by the unknown, the immaterial, and the spiritual. This class is for artists who want to construct their own sense of time, punctuation, and duration, as well as those looking to discover the visual and audio aesthetics of their generation. How does a feeling become an image, and what sound does it make? What are our media aesthetics and skins? Is there a way to address the optical beyond the eye and engage what we currently consider secondary senses, take our bodies back? Our collective task is to construct a camera (both a room and an apparatus) that captures both aural and visual images, creating a sonorous space where we can encounter ourselves in our own time. No prior knowledge of any medium is required. Not for the faint of heart

AHIS BC3428 The Making of Global Contemporary Art: Exhibitions, Agents, Networks. 4.00 points.

This lecture class introduces the notion of global contemporary art through the history of exhibitions, chiefly biennials and other large-scale endeavors, and principal agents behind them. On the one hand, the course considers exhibitions as a crucial tool of cultural diplomacy, which seek to position and/or reposition cities, regions, and even entire nations or "peoples" on the international scene. Thus, we will explore how the artistic interests vested in exhibition-making intersect with other—political, economic, ideological, and cultural—interests. We will consider those intersections paying special attention to the shifts in political relations and tensions during and after the Cold War, including the moment of decolonization in Africa; the moment commonly understood as "globalization" and associated with the expansion of the neoliberal capitalism after 1989; and, finally, the current moment of the planetary crisis. This expansive view of the "global contemporary art" will allow us to distinguish different impetuses behind internationalism and globalism that not only seek to establish hegemony, artistic or otherwise, but also look for the means to forge transnational dialogues and solidarities. On the other hand, this class seeks to illuminate how certain artistic idioms and approaches developed after World War II achieved primacy that influences artistic production to this day. To this end, we will examine the rise of a "visionary curator" as a theorist and tastemaker. We will also explore how more recent exhibitions have sought to expand the geography of the "canonized" post-WWII art movements and valorize artistic production conceived outside of the so-called "West." In addition to weekly brief writing assignments (150–300 words each), both in and outside of class, the students in the course will reconceive the installation of one of MoMA's permanent collection galleries (1940s-70s or 1970s-present) and produce a podcast that provides the rationale for the reinstallation in form of dialogue

Advanced Senior Studio II is a critique class that serves as a forum for senior Visual Arts majors to develop and complete one-semester studio theses. The priorities are producing a coherent body of studio work and understanding this work in terms of critical discourse. The class will comprise group critiques and small group meetings with the instructor. Field trips and visiting artist lectures will augment our critiques. AHIS BC3626 IN AND AROUND ABSTRACT EXPRESSIONISM. 4.00 points.

This course focuses on the history of modern art in the mid-twentieth century. To place mid-twentieth century modernism within its proper historical context, we will explore artistic practices elaborated between the 1920s and the 1960s in a wide range of different locations. We will also survey the major critical and historical accounts of modernism in the arts during these years. The course will first introduce the development of modernism, anti-modernism and avant-gardism in the period between the two World Wars, exploring the changing relationship between these cultural formations in Europe, the U.S.S.R., Mexico, and North America. The second part of the course will study the vicissitudes of modernism and avant-gardism in Europe, Latin America, and the U.S. during the 1930s and 1940s that led to the formation of Concrete art in Europe and Abstract Expressionism and the New York School in the United States. The third part of the course will examine the challenges to modernism and the reformulation of avant-gardism posed by the neo-avant-garde in North America, South America, Europe and Japan in the 1950s and early 1960s. The course will address a wide range of historical and methodological questions and problems. These include: the challenges to the idea of artistic autonomy, the evolving concept of avant-gardism, the ongoing problematic of abstraction, the formal principles of serialism and the grid, the logic of non-composition, the persistence of figuration, the changing role of cultural institutions, the impact of new technologies on cultural production, and the emergence of new audiences and patrons for art

AHIS BC3642 North American Art and Culture. 3 points. Not offered during 2023-2024 academic year.

An examination of North American painting, sculpture, photography, graphic art and decorative arts from the Colonial Period until World War I. Artists discussed will include Benjamin West, John Singleton Copley, Thomas Cole, Lilly Martin Spencer, Harriet Powers, Rafael Aragon, Robert Duncanson, Frederick Church, Winslow Homer, Thomas Eakins, James MacNeill Whistler, Mary Cassatt, Thomas Moran, Henry Ossawa Tanner and Eadweard Muybridge.

AHIS BC3666 DEATH DRIVE 3000. 4.00 points.

"The aim of all life is death," Sigmund Freud's historic words do not appear strange today. Under siege of the perpetual breaking news cycle, the apocalypse is easy to imagine. Will it be an asteroid, a zombie virus or an all out nuclear war? Death Drive 3000 returns to the inanimate. Through a variety of reading, writing and making projects, this seminar studies the implications of our unbound and limitless death drive. Can any viable futures be located under the regimes of such imagination, futures that do not involve disposing of ourselves? From de Sade to Malabou to Clausewitz, topics include: primary nature, partial objects, necrosodomy, dismemberment, omophagia, suicide pacts, plagues, holocausts, total war and other symptoms of our collective end. Not for the faint of heart

AHIS BC3667 CLOTHING. 4.00 points.

Human beings create second, social, skins for themselves. Across history and around the world, everyone designs interfaces between their bodies and the world around them. From pre-historic ornaments to global industry, clothing has been a crucial feature of people's survival, desires, and identity. This course studies theories of clothing from the perspectives of art history, anthropology, psychology, economics, sociology, design, and sustainability. Issues to be studied include gender roles, craft traditions, global textile trade, royal sumptuary law, the history of European fashion, dissident or disruptive styles, blockbuster museum costume exhibitions, and the environmental consequences of what we wear today. Required 1 hour a week TA led section to be arranged

AHIS BC3673 Intro History of Photography. 4 points.

This course will survey selected social, cultural and aesthetic or technical developments in the history of photography, from the emergence of the medium in the 1820s and 30s through to the present day. Rather than attempt comprehensively to review every aspect of photography and its legacies in the nineteenth, twentieth and twenty-first centuries, the course will instead trace significant developments through a series of case studies. Some of the latter will focus on individuals, genres or movements, and others on various discourses of the photographic image. Particular attention will be placed on methodological and theoretical concerns pertaining to the medium.

AHIS BC3674 Art since 1945. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Introduction to the history of art in post-war Europe and the United States from 1945 to the present, emphasizing questions of methodology of modernist studies and the diversity of theoretical approaches.

AHIS BC3681 Directions in Contemporary Art. 3 points.

Not offered during 2023-2024 academic year.

Introduces the history of contemporary artistic practices from the 1960s to the present, and the major critical and historical accounts of modernism and postmodernism in the arts. Focusing on the interrelationships between modernist culture and the emerging concepts of postmodern and contemporary art, the course addresses a wide range of historical and methodological questions.

AHIS BC3687 Modern Japanese Art. 3 points.

Not offered during 2023-2024 academic year.

This class will explore Japanese painting, prints, photography and performance art from the mid-19th century to the present. We will consider artists' responses to rapid modernization, debates over cultural identity, and the ever-changing role of "tradition" in modern art practice. We will also discuss the impact of natural disaster and war on the arts, and the role of art in mediating social conflict. There are no prerequisites, but the survey of Japanese art history and classes in modern Japanese studies would provide useful background.

AHIS BC3698 American Monument Culture. 4 points.

Class will meet twice a week plus digital workshops to be arranged.

The nation is currently caught up in a vital debate about how historical figures and events should be recorded in the public square. Cities, institutions and impassioned individuals are pulling down and removing statues of Confederate leaders and other individuals implicated in the history of slavery even as objections are raised to these actions from both the left and the right. This activism led to the formation of a commission to study New York City's built environment and to commit to both taking down and putting up monuments here.

Why are Monuments so important? How have they been used historically to assert political and social power? This course introduces the history of monument culture in the United States, focusing on monuments related to three controversial subjects: the Vietnam War, the Confederacy, and the "discovery" of America. We will study when, why, and in what form these monuments were erected and how artists and audiences of the past and present have responded to them. The assignments will mirror this structure: through an essay and two multimedia projects, students will both present an analysis of existing monuments and make a proposal for new ones.

Class meetings will combine lecture and discussion. In addition, students must attend two two-hour digital workshop. We will take two field trips and assignments will involve visits to offsite locations in New York City.

AHIS BC3831 Museums of New York City. 4.00 points.

New York City is home to one of the world's best museum ecologies. This seminar studies that ecology by museum type, against the backdrop of the city's cultural, economic, and social history. How can theories of collecting explain different museum types? How do museums anchor municipal identity? Class sessions will alternate between discussion sessions at Barnard, and field trips to museums

AHIS BC3841 REFRAMING OLD MASTERS. 4.00 points.

This course historicizes the medium of painting and the institutional frame of the art museum in order to posit new solutions for presenting Old Master painting. At an art historical juncture in which medium-specificity and national traditions are increasingly rare and at a political juncture attuned to unequal histories of race, class and gender, how to engage with these works? What is the potential for subverting longstanding assumptions about the role of art by reframing the Old Masters through innovative juxtaposition, installation and interpretation by contemporary artists, curators and the public? This course, led by a curator in European Paintings at The Metropolitan Museum of Art, takes place primarily at the museum. Assignments take the form of acquisition and exhibition proposals

AHIS BC3842 DESIGN DESIGNING I. 4.00 points.

Everything we contact has been designed. Design makes and unmakes desires on a global scale. It organizes our lives—from the way we move to the interface that tracks our movements. We've trained for the end for a while now, apocalypse is announced on every image channel. In a world, soon impossible to physically inhabit, the things we consume now consume us. The stakes have never been higher. To make a new world, we must use design. Our planet need not be disposed. It is an infrastructure for another one. To make contact with it we need to understand design as a value system for propelling possibility, not possession. The designed world requires new relation to things and fullness of use. As we read, write, experience and make our own projects, Designing Design helps us: acquire intimate knowledge of how we got here, recognize our historical allies and foes, and foster imagination and intelligence to live and make responsibly. This course requires no prior design experience

AHIS BC3844 Revolution and Art. 4.00 points.

In 1789, a French revolution shook the government foundation of Europe, and with it, all the arts. The principles of monarchy were rejected, women gained unprecedented freedoms, and French slavery was abolished. How did the arts express those upheavals? By 1805, a reaction against the Revolution. An emperor crowned himself, women's rights were revoked slavery was reinstated. How did the arts deal with this backlash?

AHIS BC3846 Designing Design II. 4.00 points.

The way an environment is made remains deeply embedded within it. Our environments shape us like our families, they nourish and educate us, they prejudice us. What if they were not a given? If our relationship to them was something we choose and shape, less of a blood relation, more of a lifelong friendship? A friend is an equal with their own agency and act as, a partner in play and life. Friendship is a place where we interact, welcome each-other and make the world together. The common task of this class is to devise a studio for making living environments to study how we could make, exhibit and live with art. Through a variety of individual and group readings and assignments, in-class case-studies and interviews we will test our preconceptions of space and time so that we may experience and inspire the state of being present. We will study and practice presence to form intimate bonds with interior, exterior, bodily and narrative environments already in existence and of our own making

AHIS BC3851 What is Art For?. 4.00 points.

Does art matter? How does it think of people and things, materials and minerals, the dead and the living? Can anything be art? Is art a part of life? Can it love? Can it bring change? Should it? Who can make art? Who is art for? Should art be public? Should art be free? How should art be traded? What desires should it power? How is art related to politics? Are they immediate family or distant cousins? Where and how does art live? How do artists live? What do artists want? What do we want from artists? What is art for? This seminar returns to the basics. During the COVID pandemic, the time of retreat, we embrace the opportunity to rethink our values. Our course is a stadium for posing vital questions about art from the diverse perspectives of five practicing artists. They are our weekly guests whose life and wisdom finds form in the act of making. In this class we read, write, debate and work toward understanding and putting to use the boundless resourcefulness of art

AHIS BC3853 Exhibiting Modern Inuit Sculpture. 4.00 points.

In this seminar, students will create a digital exhibition of ten stone sculptures produced by Inuit artists working within an important artistic tradition interconnected with Indigenous-Settler interaction during the second half of the twentieth century. Initially cultivated to bring Inuit people into the cash economy as part of a broader colonial process of disrupting seasonal migrations and subsistence lifeways, modern Inuit sculpture has developed in ways that increasingly center community leadership and assertions of artistic and cultural sovereignty in the face of environmental, economic, political and aesthetic change. The assignments for this class foreground writings, films, and artworks by Inuit scholars, artists, and community leaders. In preparation of the exhibition, we will and also work closely with the Brooklyn Museum staff to gain an understanding of their collection of Inuit sculpture and the staff roles in caring for it

AHIS BC3865 Paris: Capital of the 19th Century. 4 points.

APPLICATION DUE TO 826 SCHERMERHORN. **Not offered during 2023-2024 academic year.**

The Impressionist painting movement was committed to the representation of modern life. What did modern life mean to the Impressionists, and how did they represent it? How did Impressionist paintings interpret mid-nineteenth-century ideas about empirical observation, the re-design of Paris, urban spectacles, fashion, and the new reproducible media of their moment? Each student will choose one painting in the Met collection on which to give two presentations and write a final paper. Through close visual analysis, students will put their painting in its historical context, using comparisons with other works of art, as well as both primary and secondary sources included in the assigned reading.

AHIS BC3867 Photo as Material: A Studio Lab in Interdisciplinary Practices. 3.00 points.

Contemporary practitioners of photography often treat photos as not just images to look at but materials to manipulate. They create objects that echo the basic elements of the medium—light and lens—and use altered or expired photo paper. They assemble physical albums, fictional archives, and sculptural installations. They play with the circulation of images online, or share virtual experiences of spaces via printed images. In this course, we will look projects from recent decades that examine and expand the parameters of photography, including works by Liz Deschenes, David Horvitz, Zoe Leonard, Allison Rossiter, Stephanie Syjuco, and Wolfgang Tillmans. Via writing exercises, material experiments, and generative prompts, students will create their own research-informed projects that push photography beyond the screen or frame and into the material world

AHIS BC3868 Tokyo. 4.00 points.

This seminar will take an interdisciplinary approach to the history of the complex and dynamic city of Tokyo from the mid-19th century to the present. The class will discuss the impact that industrialization and sustained migration have had on the city's housing and infrastructure and will examine the often equivocal and incomplete urban planning projects that have attempted to address these changes from the Ginza Brick Town of the 1870s, to the reconstruction efforts after the Great Kanto Earthquake. We will examine the impact of and response to natural disasters and war. We will discuss the emergence of so-called "new town" suburban developments since the 1960s and the ways in which these new urban forms reshaped daily life. We will discuss the bucolic prints of the 1910s through the 1930s that obscured the crowding, pollution and political violence and compare them with the more politically engaged prints and journalistic photographs of the era. We will also consider the apocalyptic imagery that is so pervasive in the treatment of Tokyo in post-war film and anime. There are no prerequisites, but coursework in modern art history, urban studies, and modern Japanese history are highly recommended

AHIS BC3877 British Portraits: Identity, Empire, and the Museum. 4.00 points.

This course explores the making, cultural significance, and display of British portraiture from the end of the seventeenth to the early nineteenth century. It explores how portraits engaged with questions of class, race, gender, and empire during an era of rapid historical and cultural transformation, as well as the subsequent collecting and exhibition of British portraits within the post-colonial context of American museums. Taught through a combination of seminar discussions and excursions to New York museums, this course is also designed to give students an introduction to various aspects of curatorial practice and to professional writing within a museum setting

AHIS BC3910 CONTEMPORARY PHOTOGRAPHY AND RELATED MEDIA: THE POLITICAL EXHIBITION. 4 points.

An introductory survey of contemporary photography and related media through the framework of current exhibitions in New York City. Exhibitions of photography and video play a particular role in mirroring the present moment, which finds political themes front and center. Prevalent are exhibitions that redress (art) historical erasure, present counter histories, or take direct aim at specific governmental policies. Through group outings to NYC galleries and museums (approximately 8 trips) we will take stock of which artists are showing, in what contexts, and unpack both artistic and curatorial strategies. In addition to class discussion of what we've seen, during our time in the classroom we will look back at the select landmark photography exhibitions, to chart evolutions in the medium and their interrelation with politics.

AHIS BC3928 Dutch Seventeenth Century Art. 4.00 points.

This course is devoted to a close examination of Dutch art of the seventeenth century, one of the most celebrated chapters in the history of art. Students will be exposed to seminal art historical texts on the period, at the same time as they receive exposure to connoisseurship, conservation, and technical art history

AHIS BC3929 Fashion Revolution, Instagram Art History. 4 points. Not offered during 2023-2024 academic year.

This seminar launches on Instagram the most radical and influential fashion plates in European history, from the *Journal des Dames et des Modes*. A rare complete set of the *Journal's* revolutionary 1797-1804 plates has recently been rediscovered at the Morgan Library, and digitized. The Morgan has generously allowed us to be the ones to release the plates online.

The French Revolution of 1789 promised that women and men could completely reinvent themselves, with the help of a total style transformation.

Between 1797 and 1804, after the political crisis of the first revolutionary years and before Napoleon became Emperor, the *Journal des dames et des modes* showed all Europeans how to look, read, and entertain themselves as modern individuals. It rejected the dress rules and materials that had signaled static social rank in favor of mobile self-expression through consumer choice. The change was so radical for women that it was partially reversed after 1804, but for men it endured.

AHIS BC3931 The Body in Medieval Art. 4 points. Not offered during 2023-2024 academic year.

This seminar explores how the body, broadly defined, was represented, stage, and theorized in the art of medieval Europe. The bodies discussed include human, divine, demonic, fleshly, corruptible, saintly, sexed, and raced bodies. The seminar will thematically approach these different body genres via painting, sculpture, architecture, and the precious arts.

AHIS BC3933 BUOYANCY. 4.00 points.

"Be like a duck. Calm on the surface, but always paddling like the dickens underneath." Michael Caine, We do not live our own desires. Pressing ourselves into heavy molds not made for our bodies compresses us, tears our skin, and bruises our features. It is hard to breathe. We sink. Weight harbors the downward pull. It attaches itself in many ways but there are countless ways to set it down, to be free. This takes practice and skill. The common task of this visual arts seminar is to distinguish ourselves from the weight we carry. Through a variety of reading, writing, and making activities we shall seek out and contact levity: that gravity that changes our bodies, make us light of touch, aerates and propels us toward the state of buoyancy. Not for the faint of heart

Course Limited to 15 Students with Instructor's Permission. Application due 11/13/15. Go to the BC AH website for more information and to download an application. www.barnard.edu/artist

Of all the prewar avant-garde formations, it is perhaps Dada and Surrealism that loom the largest in the Western imaginary. Perhaps most impactful of all, these were the movements that surrounded one Marcel Duchamp, an artist whose work was central to both. In this seminar, we will trace the entwined histories of these vanguard groups—Dada in its various centers (Zurich, New York, Paris, Berlin, Cologne, and Hanover), and Surrealism, whose zeal for Paris could not prevent its forced, if temporary, dislocation to the United States. We will look to these formations in their aesthetic, theoretical, and political complexity, with special attention to the indispensable role played by women, especially Hannah Höch, Emmy Ball Hennings, and Claude Cahun.

AHIS BC3939 Contemporary Photography. 4 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Undergraduate seminar course. Course limited to 15 Students with instructor's permission. Application process required. Applications are due in the Barnard Art History office April 7th. **Not offered during 2023-2024 academic year.**

This undergraduate seminar will explore key texts that have informed the current condition and possibilities of the medium of photography. The course readings will consist of writings by critics and historians which reflect the unstable status of the photographic object between: technology and culture, mass culture and avant-garde art, discourse and documentation, analogue and digital.

AHIS BC3949 The Art of Witness: Memorials and Historical Trauma. 4 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Undergraduate seminar course. Course limited to 15 Students with instructor's permission. Application process required. Applications are due in the Barnard Art History office April 9, 2015.

Examines aesthetic responses to collective historical traumas, such as slavery, the Holocaust, the bombing of Hiroshima, AIDS, homelessness, immigration, and the recent attack on the World Trade Center. Studies theories about trauma, memory, and representation. Explores debates about the function and form of memorials.

AHIS BC3951 Contemporary Art and the Public Sphere. 4 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Prerequisites: AHIS BC1001 - AHIS BC1002 or equivalent. Enrollment Limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors.

Critically examines contemporary debates about the meaning of public art and public space, placing them within broader controversies over definitions of urban life and democracy. Explores ideas about what it means to bring the term "public" into proximity with the term "art." Considers the differing ideas about social unity that inform theories of public space as well as feminist criticism of the masculine presumptions underlying certain critical theories of public space/art.

AHIS BC3952 Art and Mass/Popular/Everyday Culture: 1850 to the Present. 4 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Prerequisites: AHIS BC1001 - AHIS BC1002 or equivalent. Enrollment limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors.

Examines interactions between art in Europe and the United States during the 19th and 20th centuries, on the one hand, and non-art forms of culture that are called variously "mass," "popular," and "everyday" culture, on the other. Places art/mass culture interactions within the rise of bourgeois society, the invention of democracy, and relations of class, gender, sexuality, and race. Studies major critical theories and debates about the relationship between art and mass culture.

AHIS BC3957 1980s Feminism and Postmodernism in the Visual Arts. 4 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Prerequisites: AHIS BC1001 - AHIS BC1002 or equivalent. Enrollment limited to 15 students. Permission of the instructor. Preference to seniors and Art History majors.

Examination of art and criticism that is informed by feminist and postmodern ideas about subjectivity in visual representation which first achieved prominence in the late 1970s and 1980s, exerting a profound influence on contemporary aesthetic practice. Explored in relation to earlier concepts of feminism, modernism, social art history, and "art as institution." Artworks discussed include those of Barbara Kruger, Cindy Sherman, Louise Lawler, Krzysztof Wodiczko, Hans Haacke, Mary Kelly, and Catherine Opie, among others.

AHIS BC3968 ART CRITICISM. 4.00 points.

This course is a seminar on contemporary art criticism written by artists in the post war period. Such criticism differs from academic criticism because it construes art production less as a discrete object of study than as a point of engagement. It also differs from journalistic criticism because it is less obliged to report art market activity and more concerned with polemics. Art /Criticism I will trace the course of these developments by examining the art and writing of one artist each week. These will include Brian O'Doherty/Patrick Ireland, Allan Kaprow, Robert Morris, Yvonne Rainer, Robert Smithson, Art - Language, Dan Graham, Adrian Piper, Mary Kelly, Martha Rosler, Judith Barry and Andrea Fraser. We will consider theoretical and practical implications of each artists oeuvre

AHIS BC3971 Rococco and It's Revivals. 4 points.

Not offered during 2023-2024 academic year.

The useful arts of eighteenth-century France – furniture, interior decoration, clothing etc.. – have always been considered among the masterpieces of decorative arts history. A revolution in scholarship has made it possible to understand how these objects inaugurated some of modernity's key values: individualism, private home life, consumer culture, women's involvement in the arts, global capitalism, and an orientalist fascination with the Near and Far East. Several class sessions will take place in the great decorative arts galleries of the Metropolitan Museum and the Frick Collection, where students will give presentations on individual objects.

AHIS BC3976 JAPANESE PHOTOGRAPHY. 4.00 points.**AHIS BC3977 THE BIENNIAL MATRIX OF CONTEMPORARY ART. 4 points.**

This seminar introduces the relationship between contemporary artistic practices and the landmark survey shows of international contemporary art that are commonly known as "biennials," but which encompasses not just exhibitions that recur every two years but also triennials, irregular mega-exhibitions known as manifestas, and the quinquennial survey exhibition, documenta. These regularly recurring exhibitions have come, since the late 1980s, to define contemporary art. They are one of the most ubiquitous and celebrated exhibition formats across the globe, appearing in cities as different as São Paulo, Istanbul, Havana, Dakar, Seoul, and Kochi. A large art public encounters contemporary art solely within the frames of these exhibitions, while the constellation of artists and art from diverse cultures and places that these exhibitions feature has generated vital intercultural dialogues.

AHIS BC3984 CURATORIAL POSTNS 1969-PRES. 4.00 points.

Contemporary exhibitions studied through a selection of great shows from roughly 1969 to the present that defined a generation. This course will not offer practical training in curating; rather it will concentrate on the historical context of exhibitions, the theoretical basis for their argument, the criteria for the choice in artists and their work, and exhibitions internal/external reception

Asian and Middle Eastern Cultures

321 Milbank Hall
212-854-5417
amec.barnard.edu

Department Assistant: Mary Missirian

Mission

The Department's primary aim is to introduce major Asian and Middle Eastern civilizations and their works and values as a means of expanding knowledge of the varieties and unities of human experience.

Students who major in the Department take a specific number of courses from the Barnard and Columbia curriculum, obtain three years of language proficiency in the language relevant to the world area under study, and hence become regional experts with specific disciplinary skills. The Department offers three tracks: the East Asian Track covers China, Japan, and Korea; the South Asian track covers India, Pakistan, and Bangladesh; and the Middle Eastern Track covers the Middle East, including Israel, the Gulf States, Armenia, Iran, Iraq, and Turkey, and North Africa. The Department's general courses are designed for all students, whatever their major interests, who wish to include knowledge of Asian and Middle Eastern life in their education. Study abroad is encouraged.

Student Learning Outcomes

Faculty in the Department of Asian and Middle Eastern Cultures hold the following learning outcomes for majors who take advantage of the opportunities offered through the program. Students will be able to:

- Speak, write, and read at an intermediate to advanced level in a language of the Middle East, South Asia, or East Asia;
- Demonstrate a basic understanding of the history and culture of their chosen area of the world;
- Exhibit in-depth knowledge of a particular aspect of it, such as the artistic, literary, religious, philosophical, sociological, anthropological, political, or economic elements;
- Demonstrate familiarity with leading theory on the study of non-Western cultures; and
- Produce a clearly and critically written senior thesis that draws upon the various aspects of their training – for instance, linguistic, historical, cultural, and political – in investigating a topic in detail and making a contribution to knowledge.

Students who wish to enter Chinese, Japanese, or Korean language courses above the introductory level must pass a language placement test before registering. Placement exams are given during the week before classes begin; contact the Department of East Asian Languages and Cultures (407 Kent) for exact dates. For placement above the introductory level in Arabic, Armenian, Bengali, Hindi-Urdu, Panjabi, Persian, Sanskrit, Tamil, Tibetan, or Turkish, contact the Department of Middle Eastern, South Asian, and African Studies (401 Knox). All students wishing to enter the Hebrew language program or wishing exemption from the Hebrew language requirement must take a placement test. Contact the Department of Middle Eastern, South Asian, and African Studies (401 Knox) for details.

Requirements for the Major

You need a total of 45 points, minimum, across all three tracks of our major. Note that most students, especially if you are not already at an advanced level of language study, will need to take far more courses, and hence points.

6 points for two language classes

4 points for Asian Humanities

8 points for two Civilization classes

4 points for a required theory course

5 x 3 point courses = 15 points for five courses in the major

8 points total for the thesis

A student who plans to major in Asian and Middle Eastern Cultures is advised to consult a member of the Department in the spring term of her first year in order to be sure to plan for an appropriate sequence of language study.

To major in Asian and Middle Eastern Cultures, a student will choose to follow one of three tracks, East Asian, Middle Eastern, or South Asian.

The East Asian Track

Major Requirements

The major requires a minimum of 11 courses, including the two senior thesis seminars (if student has already satisfied the language requirement in advance) or more (if she starts the language requirement from the beginning).

The requirements include:

LANGUAGE

3 years of Chinese, Japanese, or Korean, or the proficiency equivalent (to be demonstrated by a placement examination).

Third-year Chinese, Japanese, Korean, or Tibetan (completion of the CHNS UN3005 THIRD YEAR CHINESE W - CHNS UN3006 THIRD YEAR CHINESE W II in Chinese, JPNS UN3005 THIRD YEAR JAPANESE I - JPNS UN3006 THIRD YEAR JAPANESE II in Japanese, or KORN UN3005 THIRD YEAR KOREAN I - KORN UN3006 THIRD YEAR KOREAN II in Korean; or TIBT UN3611 THIRD YEAR MOD COLLOQ TIBET I - TIBT UN3612 THIRD YEAR MODERN TIBETAN II in Tibetan), or the proficiency equivalent (to be demonstrated by placement examination). Students of Chinese may also complete CHNS UN3003 THIRD YEAR CHINESE I - CHNS UN3004 THIRD YEAR CHINESE II to meet the third year requirement.

Students who test out of three years or more of a language must take an additional year of that language or another East Asian language in order to satisfy the Barnard language requirement.

**Note that in all East Asian language courses, the minimum grade required to advance from one level to the next is a B-.*

CORE COURSES

AHUM UN1400 COLLOQUIUM ON MAJOR TEXTS

Two of the following survey courses:

ASCE UN1359 INTRO TO EAST ASIAN CIV: CHINA

ASCE UN1361 INTRO EAST ASIAN CIV: JPN

ASCE UN1363 INTRO TO EAST ASIAN CIV: KOREA

ASCE UN1365 INTRO EAST ASIAN CIV: TIBET

ASCE UN1367 INTRO EA CIV: VIETNAM

All majors are required to take EAAS UN3990 APPROACHES TO E ASIAN STUDIES, which is offered every spring.

DISCIPLINARY COURSES

Three courses in either history, literature, philosophy, religion, art history, anthropology, political science, economics, or some other thematic cluster approved by the adviser. For further information, consult the online catalog or a departmental adviser.

ELECTIVE COURSES

Two courses related to East Asia, to be chosen in consultation with the adviser.

SENIOR THESIS

Each student is expected to prepare, for her senior thesis, a research paper or an annotated English translation of an East Asian text. There

will be two tracks for the senior thesis process. (1) Those who wish to write their senior theses under the aegis of EALAC at Columbia must apply to the Senior Thesis Program at the end of their junior year. The deadline will be **May 1st at 5:00 p.m.** [see EALAC's website for application form], and the application must be delivered in hard copy to the EALAC Academic Coordinator in 407 Kent. Students must have at least a 3.6 GPA in courses taken in the major at the time of the application. Decisions will be made by June 1, when grades for the second semester have been received. All students accepted into the Program are required to enroll in the Senior Thesis Research Workshop (EAAS UN3999) for the fall of their senior year. Students who perform satisfactorily in this workshop, successfully complete a thesis proposal, and find a faculty advisor, will then write the Senior Thesis itself in the spring semester under the direction of the adviser and a graduate student tutor (EAAS UN3901). Successful completion of the thesis by the April 1 deadline in the spring semester will be necessary but not sufficient for a student to receive Departmental Honors. (Because honors can be awarded to a maximum of 20% of the majors, not all thesis writers will receive honors.) (2) Students who do not have a 3.6 average in the major OR who wish to write their senior theses at Barnard will do so under the direction of an East Asia faculty member at Barnard. Such students should enroll in two semesters of independent study (Asian Studies BC 3999) with their faculty adviser.

MINOR REQUIREMENTS

PREREQUISITES:

Students must meet the following prerequisite prior to declaring an AMEC minor in the East Asia Track: Two years of Chinese, Japanese, Korean, or Tibetan. These must be either taken at Columbia or proficiency proven through a placement examination.

LANGUAGES:

Two semesters of third-year work in the chosen language, or the proficiency equivalent (to be demonstrated by a placement examination).

Students who test out of the third-year level must take either an additional year of the same language or one year of an additional language in the same East Asia Track.

INTRODUCTORY COURSES (two courses):

- AHUM UN1400, Colloquium on Major Texts of East Asia
- One civilizations class relating to the language and region of study (China Civ, Japan Civ, Korean Civ, Tibetan Civ, or Vietnamese Civ.)

ELECTIVES (two courses):

Two electives in the world region under study, to be taken in any department in the university at the 3000- or 4000-level, subject to approval by the advisor.

The Middle East or South Asian Track

A minimum of 13 courses is required, including:

- Asian Humanities: AHUM UN3399 Colloquium on Major Texts: Middle East and South Asia
- Middle East & South Asia: MDES UN3000 THEORY AND CULTURE

Two of the following courses:

- Asian Civilizations-Middle East: ASCM UN2003 INTRO TO ISLAMIC CIVILIZATION
- Asian Civilizations-Middle East: ASCM UN2008 CONTEMP ISLAMIC CIVILIZATION
- Asian Civilizations-Middle East: ASCM UN2357 INTRO TO INDIAN CIVILIZATION
- Asian Civilizations-East Asian: ASCE V2365 Introduction to East Asian Civilizations: Tibet

The equivalent of six courses (the completion of the 3rd year of advanced language study) of Arabic, Armenian, Bengali, Hebrew, Hindi, Persian, Punjabi, Sanskrit, Tamil, Turkish, or Urdu selected in consultation with the advisor.

A minimum of five courses chosen as a concentration. The concentration may be in the languages and cultures of ancient Semitic, Arabic, Armenian, Hebrew, Indic, Iranian, Persian, or Turkish.

A senior thesis, to be written under the supervision of a faculty member chosen in consultation with the adviser. Students whose sole major is Asian and Middle Eastern Cultures should take two semesters of ASST BC3999 INDEPENDENT STUDY with their adviser for the purposes of producing the thesis. Students who are double-majoring in a second department that requires a group seminar should enroll in that seminar and work with the AMEC advisor on the side.

The courses listed under Middle East and South Asia below represent a selection among those required in one or another of the concentrations. Students should consult the office of Department of Middle Eastern, South Asian, and African Studies in 401 Knox Hall for a complete list of course offerings. Graduate courses at the 4000-level may be taken with permission of the instructor. See [GSAS catalog](#) for course listings.

Minor Requirements

Prerequisite:

For Middle East Track:

Students must meet the following prerequisite prior to declaring an AMEC minor: Two years of Arabic, Armenian, Hebrew, Persian, or Turkish. These must be either taken at Columbia or proficiency proven through a placement examination.

For South Asian Track:

Students must meet the following prerequisite prior to declaring an AMEC minor: Two years of Sanskrit, Hindi-Urdu, Bengali, Panjabi, or Tamil. These must be either taken at Columbia or proficiency proven through a placement examination.

Language Requirement (two courses):

Two semesters of third-year work in the chosen language, or the proficiency equivalent (to be demonstrated by a placement examination).

Students who test out of the third-year level must take either an additional year of the same language or one year of an additional language in the same Track.

Introductory Courses (two courses):

- AHUM UN1399, Colloquium on Major Texts of South Asia and the Middle East
- One civilizations class relating to the language and region of study (Indian Civ, Islamic Civ, or Tibetan Civ)

Electives (two courses):

Two electives in the world region under study, to be taken in any department in the university at the 3000- or 4000-level, subject to approval by the advisor.

Theory, Method, and Writing

MDES UN1001 CRITICAL THEORY: A GLOBAL PERSPECTIVE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The purpose of this foundational course is to introduce Columbia undergraduate students, in the context of their Global Core curriculum, to the seminal field of critical theory. The historical domain of this course is within the last century and its geographical spectrum is global. European critical thinkers are included in this course but not privileged. Thinkers from Asia, Africa, Europe, North, South, and Latin America, are examined here in chronological order and in equal democratic footing with each other. This course as a result is decidedly cross-cultural, one step forward towards de-alienating critical thinkers from around the globe and the issues they address without pigeonholing them as something “other” or “different.” The course is designed and offered in the true spirit of the “Global Core.” The purpose of the course is to reach for the common denominator of serious critical thinking about the fate of our humanity and the health of our social relations in an increasingly fragile world—where the false binaries of “the West” and “the Rest” no longer hold. The roster of critical thinkers we will examine is by no means exhaustive but representative. Any number of other critical thinkers can be added to this roster but none of those we will examine can be excluded from them. The course is divided into thirteen successive weeks and for each week a number of seminal, original, and groundbreaking texts are identified. Each week we will examine selected passages from these texts. The course is designed as a lecture course, and my lectures are based on the totality of these texts but students will be assigned specific shorter passages to read

MDES UN1002 CRITICAL THEORY:G.P.-DISC. 0.00 points.

Corequisites: MDES UN1001. Discussion sections (TWO) to accompany the course MDES UN1001, Critical Theory: A Global Perspective

MDES UN3000 THEORY AND CULTURE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Required of all majors. Introduces theories of culture particularly related to the Middle East, South Asia, and Africa. Theoretical debates on the nature and function of culture as a symbolic reading of human collectivities. Examines critical cultural studies of the Middle East, South Asia, and Africa. Enables students to articulate their emerging knowledge of Middle East, South Asian, and African cultures in a theoretically informed language

CSER UN3905 ASIAN AMERICAN # PSYCH OF RACE. 4.00 points.

This seminar provides an introduction to mental health issues for Asian Americans. In particular, it focuses on the psychology of Asian Americans as racial/ethnic minorities in the United States by exploring a number of key concepts: immigration, racialization, prejudice, family, identity, pathology, and loss. We will examine the development of identity in relation to self, family, college, and society. Quantitative investigation, qualitative research, psychology theories of multiculturalism, and Asian American literature will also be integrated into the course

CSER UN3922 RACE#REPRESENTATION IN ASIAN AMER CINEMA.**4.00 points.**

Enrollment limited to 22.

This seminar focuses on the critical analysis of Asian representation and participation in Hollywood by taking a look at how mainstream American cinema continues to essentialize the Asian and how Asian American filmmakers have responded to Hollywood Orientalist stereotypes. We will analyze various issues confronting the Asian American, including yellowface, white patriarchy, male and female stereotypes, the "model minority" myth, depictions of "Chinatowns," panethnicity, the changing political interpretations of the term Asian American throughout American history, gender and sexuality, and cultural hegemonies and privileging within the Asian community

CSER UN3923 LATINX & ASIAN AMER MEMOIR. 4 points.

In this class, we will explore Latino and Asian American memoir, focusing on themes of immigration and duality. How do we construct identity and homeland when we are multiple? How do we define ourselves and how do others define us? By reading some of the most challenging and exciting memoirs by Latino and Asian Americans, we will attempt to answer these questions and/or at least try to understand these transnational and multicultural experiences. This class combines the critical with the creative—students have to read and critic memoirs as well as write a final 10-page nonfiction creative writing piece. Students will also have the opportunity to speak to some Latino and Asian authors in class or via SKYPE. Students will be asked to prepare questions in advance for the author, whose work(s) we will have read and discussed. This usually arises interesting and thought-provoking conversations and debates. This Dialogue Series within the class exposes students to a wide-range of voices and offers them a deeper understanding of the complexity of duality.

CPLS GU4111 World Philology. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Philology, broadly defined as the practice of making sense of texts, is a fundamental human activity that has been repeatedly institutionalized in widely separated places and times. In the wake of the formation of the modern academic disciplines in the nineteenth century and their global spread, it became difficult to understand the power and glory of older western philology, and its striking parallels with other pre- and early modern forms of scholarship around the globe. This class seeks to create a new comparative framework for understanding how earlier generations made sense of the texts that they valued, and how their practices provide still-vital models for us at a time of upheaval in the format and media of texts and in our scholarly approaches to them. Students will encounter key fields of philology—textual criticism, lexicography, grammar, and, above all, commentary—not in the abstract but as instantiated in relation to four foundational works—the Confucian Analects, the Rāmāyaṇa of Vālmīki, the Aeneid, and the Tale of Genji—and the scholarly traditions that grew up around them. We are never alone when we grapple with the basic question of how to read texts whose meaning is unclear to us. Over the course of the semester, this class will foster a global understanding of the deep roots and strange parallels linking contemporary reading and interpretation to the practices of the past.

AHUM UN1400 COLLOQUIUM ON MAJOR TEXTS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores the core classical literature in Chinese, Japanese and Korean Humanities. The main objective of the course is to discover the meanings that these literature offer, not just for the original audience or for the respective cultures, but for us. As such, it is not a survey or a lecture-based course. Rather than being taught what meanings are to be derived from the texts, we explore meanings together, informed by in-depth reading and thorough ongoing discussion

RELI UN2308 BUDDHISM: EAST ASIAN. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Lecture and discussion. An introductory survey that studies East Asian Buddhism as an integral, living religious tradition. Emphasis on the reading of original treatises and historiographies in translation, while historical events are discussed in terms of their relevance to contemporary problems confronted by Buddhism. There is a mandatory weekly discussion session

RELI UN2309 HINDUISM. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Considers efforts since 1900 to synthesize a coherent understanding of what Hinduism entails, sometimes under the heading of sanatana dharma. Using a rubric provided by the Bhagavad Gita, explores philosophical/theological (jnana), ritual (karma), and devotional (bhakti) aspects of Hindu life and thought

EAAS UN2342 Mythology of East Asia. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through close readings of major myths of China, Japan, and Korea, this course provides a survey of significant themes of East Asian culture. Inclusion of selected comparative readings also leads students to reconsider the nature of 'world mythology', a field often constituted by juxtaposing Greek and Latin classics with oral texts collected during anthropological fieldwork. The core materials for this class are from ancient written traditions, but they speak with force and clarity to modern readers, as is underlined by our attention to latter-day reception and reconceptualization of these narratives. This is an introductory, discussion-based class intended for undergraduates. No prior knowledge of East Asian history or culture is required, and all course readings are in English. Satisfies the Global Core requirement.

HIST UN2580 US - EAST ASIA RELATIONS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This lecture course examines the history of the relationship between the United States and the countries of East Asia in the 19th and 20th centuries. The first half of the course will examine the factors drove the United States to acquire territorial possessions in Asia, to vie for a seat at the imperial table at China's expense, and to eventual confrontation with Japan over mastery in the Pacific from the turn of the century leading to the Second World War. The second half of the course will explore the impact of U.S. policy toward East Asia during the Cold War when Washington's policy of containment, which included nation-building, development schemes, and waging war, came up against East Asia's struggles for decolonization, revolution, and modernization. Not only will this course focus on state-to-state relations, it will also address a multitude of Chinese, Japanese, Korean, and Vietnamese perspectives on the United States and American culture through translated text, oral history, fiction, and memoir. Participation in weekly discussion sections, which will begin no later than the third week of classes, is mandatory

EAAS UN3322 EAST ASIAN CINEMA. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces students to major works, genres and waves of East Asian cinema from the Silent era to the present, including films from Japan, Korea, Mainland China, Taiwan and Hong Kong. How has cinema participated in East Asian societies' distinct and shared experiences of industrial modernity, imperialism and (post)colonialism? How has cinema engaged with questions of class, gender, ethnic and language politics? In what ways has cinema facilitated transnational circulations and mobilizations of peoples and ideas, and how has it interacted with other art forms, such as theatre, painting, photography and music? In this class, we answer these questions by studying cinemas across the region side-by-side, understanding cinema as deeply embedded in the region's intertwining political, social and cultural histories and circulations of people and ideas. We cover a variety of genres such as melodrama, comedy, historical epic, sci-fi, martial arts and action, and prominent film auteurs such as Yasujir? Ozu, Akira Kurosawa, Yu Hy?nmok, Chen Kaige, Hou Hsiao-hsien, and Ann Hui. As cinema is, among other things, a creative practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects. As a global core course, this class does not assume prior knowledge of East Asian culture or of film studies

HSEA UN3355 Antiquarianism and the Politics of the Past in East Asian History. 4.00 points.

This course introduces students to the history of antiquarianism in East Asia and explores how people in the past negotiated their own pasts through the medium of material culture. We will examine how historical societies engaged with antiquities—through collecting and displaying, copying and faking, preserving and erasing—and how antiquarian traditions shaped social memory and collective identity in China, Japan, and Korea from the first millennium BCE to the early twentieth century. We will pay particular attention to the life and afterlife of ancient Chinese ritual bronzes through the centuries as a case study to consider how the politics of the past translated across both time and geographic space in East Asia

EAAS UN3844 CULTURE, MENTAL HEALTH, AND HEALING IN EAST ASIA. 4.00 points.

Why do certain mental illnesses only appear in specific regions of the world? What processes of translation, adaption, and "indigenization" take place when Western psychiatric diagnostic categories, pharmaceutical regimens, and psychodynamic treatments travel to China, South Korea and Japan? How do East Asian therapeutic modalities such as Traditional Chinese Medicine and the practice of qigong destabilize biomedical assumptions about the etiology and treatment of mental illness? This course engages these and other questions through anthropological analysis of the experiences of people struggling with mental illness, the mental health practitioners who treat them, and the broader economic, social and political contexts that shape these interactions

HIST UN3866 WARS OF INDOCHINA. 4.00 points.

Saigon and Hanoi served as competing capitals of the Republic of Vietnam (RVN) in the south and the Democratic Republic of Vietnam (DRV) in the north (1954-1975). They were symbols of warring states, one home to a fledgling republic, the other the seat of communist power. Since the late 19th century, they have also been sites of Vietnam's most dramatic transformations. As such, they occupy an important place in the historiography of modern Vietnam, not least in ongoing debates over the Indochina wars, Vietnamese nationalism, and regional difference. This course examines Saigon and Hanoi as social, political, and cultural spaces, and as representations of their respective states during the war. We first consider the significance of regionalism in fashioning "new ways of being Vietnamese" and examine how colonial rule reinforced those distinctions. We devote the rest of the semester to reading an array of works on the history of these cities. For the colonial period, we examine colonial urbanism, the lives of the poor, intellectuals and their ideas, as well as currents of political agitation and cultural iconoclasm. For the post-World War II period, we will focus on the distinct political cultures that took shape in the RVN and DRV. Finally, we end by looking at Saigon (now Ho Chi Minh City) and Hanoi in the post-war era, particularly after the Socialist Republic of Vietnam instituted sweeping economic reforms in the 1980s. Each week, we will discuss works social, cultural, and political history of Saigon and Hanoi, all the while keeping in mind their divergent trajectories in the three decades following World War II

EARL GU4023 Women in Buddhism. 4.00 points.

This course examines a broad array of topics related to the nature of women in Buddhism, both as presented in historical and religious texts as well as in the lives of female Buddhist practitioners. Our aim will be to consider these rules and traditions within the context of their creation as well as their subsequent use. We will also look to the words and examples of women Buddhist practitioners directly, including in modern Western Buddhism

HSEA GU4110 HISTORY SCIENCE AND TECH IN EAST ASIA. 4.00 points.

This course explores the life of scientific and technological artifacts in East Asia. We will examine everyday objects alongside core literature from Science and Technology and Society (STS) studies to raise new historical questions and methodological approaches. From clocks to paper, from pregnancy to immortality, we will take on a close reading of objects and ideas by directly engaging with the circumstances under which they were made.

EARL GU4120 CHAN/ZEN BUDDHISM. 4.00 points.

Prerequisites: Some background in East Asian Buddhism, or instructor permission required.

Prerequisites: Some background in East Asian Buddhism, or instructor permission required. Zen has become a household term, but the reality behind this term is not well known. Originating in China around the 6th century C.E. the Chan/Zen tradition became one of the major Buddhist schools and rapidly spread to Korea, Japan, Vietnam (and, to a certain extent, Tibet). This course examines some aspects of this tradition, emphasizing its historical development, its mythological elements, and its multifaceted practice, which has for too long been reduced in the Western mind to meditation

HSEA GU4220 ISLAM IN CHINA AND INNER ASIA. 4.00 points.

This seminar surveys the history of Islam, both in the Chinese interior and neighboring Inner Asia (primarily Xinjiang), from its arrival to the present day. Beginning with the first legendary accounts of migration from the Middle East to China, we trace the growth of an identifiable Muslim community in the age of the Mongol empire, then look at Ming China's interactions with the Islamic world, the Qing expansion into Inner Asia, and conclude by discussing modernist and nationalist trends of the twentieth-century

RELI GU4307 BUDDHISM # DAOISM IN CHINA. 4.00 points.

Prerequisites: one course on Buddhism or Chinese religious traditions is recommended, but not required, as background.

In recent decades, the study of the so-called "Buddho-Daoism" has become a burgeoning field that breaks down the traditional boundary lines drawn between the two Chinese religious traditions. In this course we will read secondary scholarship in English that probes the complex relationships between Buddhism and Daoism in the past two millennia. Students are required not only to be aware of the tensions and complementarity between them, but to be alert to the nature of claims to either religious purity or mixing and the ways those claims were put forward under specific religio-historical circumstances. The course is organized thematically rather than chronologically. We will address topics on terminology, doctrine, cosmology, eschatology, soteriology, exorcism, scriptural productions, ritual performance, miracle tales and visual representations that arose in the interactions of the two religions, with particular attention paid to critiquing terms such as "influence," "encounter," "dialogue," "hybridity," "syncretism," and "repertoire." The course is designed for both advanced undergraduate and graduate students in the fields of East Asian religion, literature, history, art history, sociology and anthropology. One course on Buddhism or Chinese religious traditions is recommended, but not required, as background

EAAS GU4445 Proletarian Asia - working-class culture from 1930s to present. 4.00 points.

From Bong Joon-ho's runaway success *Parasite*, to manga adaptations of Kobayashi Takiji's novel *The Crab Cannery Ship*, to the proliferation of Chinese migrant worker poetry, recent developments in the cultural landscape of East Asia have seen a renewed concern with the plight of workers and other sections of the oppressed under conditions of late capitalism. This course offers students the opportunity to situate these developments within an extended historical trajectory as the basis on which to think about the relation of radical histories to our present and possible future. It does so by integrating contemporary cultural texts with earlier cultural experiments that arose amidst the political turbulence of the 1930s across a range of locations in East Asia

POLS GU4473 Political Transitions in Southeast Asia. 4 points.

What political direction is Southeast Asia taking? Over the past two decades, Indonesia has been transformed from a military-dominated semi-authoritarian state to the region's most vigorous and open political order. Meanwhile Thailand has experienced two military coups since 2006, and early patterns of political liberalization seem to be unraveling. And Burma has gone from international pariah to prospective new democracy.

Is it possible to see any overall regional trends? Are teleological assumptions of the inexorable rise of democracy being vindicated – or does much of the evident point in just the opposite direction? The module will examine the nature of transitions (and attempted transitions) to more open political systems in Southeast Asia, with a primary focus on Burma, Indonesia, and Thailand. After a brief review of the three cases, the course will adopt a thematic approach, first reviewing the character of the state, including national mythologies, the military and the relations between capital city and provinces. It will then explore aspects of transition, including the changing political economy, the rise of electoral politics, the role of religion and media, and the phenomenon of rally politics. Challenges to national elites from the regions will also be closely scrutinised. These themes and issues have a broader relevance to wider debates in comparative politics, which students will be encouraged to explore in their papers.

RELI GU4513 BUDDHISM AND NEUROSCIENCE. 4.00 points.

With the Dalai Lamas marked interest in recent advances in neuroscience, the question of the compatibility between Buddhist psychology and neuroscience has been raised in a number of conferences and studies. This course will examine the state of the question, look at claims made on both sides, and discuss whether or not there is a convergence between Buddhist discourse about the mind and scientific discourse about the brain

RELI GU4516 The Politics of Freud in the Postcolony. 4 points.

This seminar examines the legacies of psychoanalysis through a critical exploration of how its concepts, practices and institutes have operated in colonial and postcolonial contexts. Weekly discussions will look at how practicing therapists, activists, anthropologists and others have extended, subverted and displaced psychoanalytic thought within non-European histories and imaginaries. Topics include challenges to the universality of the Oedipus emerging from early 20th century anthropologist's studies of kinship in Papua New Guinea, legacies of a self-made South Asian psychoanalyst's challenges to Freudian orthodoxies, and the study of a psychoanalysis of racism forged out of a Martinican psychiatrist's encounters with colonial neuroses in Algeria. We will also explore how psychoanalytic concepts have been deployed in debates about repression and sexuality in daily life during the Cultural Revolution and the psychic legacies of Maoism in contemporary China. In addition to reading the work of Freud and his critics, we will encounter primary materials—religious texts, movies, novels—that have been subjected to psychoanalytically-inflected interpretations. While attending to the cultural, racial and political assumptions suffusing psychoanalysis, our seminar will also show how variously situated authors have given this tradition new applications and meanings.

RELI GU4535 BUDDHIST CONTEMPLATIVE SCIENCES. 4.00 points.

Buddhist arts and sciences traditionally are divided into the interconnected disciplines of ethics (*śīla*), wisdom/philosophy (*prajñā*), and “meditation” or experiential cultivation (*samādhi/bhāvanā*). This seminar course introduces the latter discipline, thus complementing and completing Prof. Yarnall's Columbia seminars on Buddhist Ethics (RELI UN3500) and Indo-Tibetan Buddhist Philosophy (RELI GU4630), either of which—in addition to his introductory lecture course on Indo-Tibetan Buddhism (RELI UN2205)—are encouraged as prerequisites. This course will provide a detailed presentation of key Buddhist contemplative sciences, including: stabilizing meditation (*śamatha*); analytic insight meditation (*vipāśyanā*); cultivation of the four immeasurables, and form and formless trances; mind cultivation (*lo jong*); mindfulness meditation; Zen meditation; great perfection (*dzogchen*); and the subtle body-mind states activated and transformed through advanced tantric yoga techniques. These arts and sciences will be explored both within their traditional interdisciplinary frameworks, as well as in dialog with related contemporary disciplines, including: cognitive sciences, neuroscience, psychology, psychiatry, philosophy, epistemology, and so forth. To be conducted in a mixed lecture/seminar format (active, prepared participation required)

RELI GU4611 The Lotus Sutra in East Asian Buddhism. 4 points.

Prerequisites: open to students who have taken one previous course in either Buddhism, Chinese religions, or a history course on China or East Asian.

The course examines some central Mahayana Buddhist beliefs and practices through an in-depth study of the Lotus sutra. Schools (Tiantai/Tendai, Nichiren) and cultic practices such as sutra-chanting, meditation, confessional rites, and Guanyin worship based on the scripture. East Asian art and literature inspired by it.

MDES GU4627 Significant Others. 4.00 points.

What is the relationship between homoeroticism and homosociality? How does this relationship form conceptions of gender and sexuality in ways that might be historically unfamiliar and culturally or regionally specific? We pursue these questions through the lens of friendship and its relationship to ideas and expressions of desire, love, and loyalty in pre-modern times. We begin by considering the intellectual basis of the modern idea of friendship as a private, personal relationship, and trace it back to earlier times when it was often a public relationship of social and political significance. Some of these relationships were between social equals, while many were unequal forms (like patronage) that could bridge social, political or parochial differences. Thinking through the relationships and possible distinctions between erotic love, romantic love and amity (love between friends), we will draw on scholarly works from a variety of disciplinary perspectives, particularly philosophy, sociology, political theory, literature, history, and art history. We will attend to friendship's work in constituting, maintaining and challenging various social and political orders in a variety of Asian contexts (West, Central, South and East Asian), with comparative reference to scholarship on European and East Asian contexts. Primary source materials will include philosophy, religious manuals, autobiographies, popular love stories, heroic epics, mystical poetry, mirror for princes, paintings, material objects of exchange, and architectural monuments, largely from Islamic and Asian contexts

ASRL GU4831 Post/socialist Cosmologies in Asia. 4.00 points.

Why have spiritual worlds returned or persisted in post/socialist Asia where people once thought they would disappear? What does religiosity look like in socialist and postsocialist contexts today? According to secularization theorists, religion was destined to fade with the passage of modern progressive time. In Asia and elsewhere, socialist states were known for embracing atheism and curtailing or banishing institutions and practices they deemed religious or superstitious. Yet, engagements with spirited worlds—including those with ghosts and ancestors, spirit mediumship and possession, Buddhism, Daoism, and Abrahamic religions—did not vanish. In this class, we will read social and political theories of communism/socialism, postsocialism, religion, and secularism, alongside contemporary ethnographies of China, Vietnam, Mongolia, and elsewhere, to consider how global communities live out spirited worlds amid post-Cold War geographies

EAAS UN3121 Minority Literature in Modern China. 4 points.

While the rise of China on the world stage has resulted in enormous interest in modern Chinese society, this interest has been directed largely at the culture and concerns of China's majority ethnicity: the Han. Ethnicity is central to any discussion of society and culture in the West, and this course will seek to place it at the forefront of our understanding of modern China as well. China is officially a country comprised of 56 distinct peoples or "nationalities" (including the Han Chinese majority). In the literature presented here, translated both from Chinese and minority languages, students will have the opportunity to hear the rich and varied voices of China's minority writers first hand, and through them gain an understanding of the key issues surrounding ethnicity in modern China. We will cover fiction, poetry, essays, and film by a broad range of different peoples: Tibetans, Mongols, Manchus, the Islamic Uyghur nationality of Xinjiang province, the Yi of southwestern Yunnan and Sichuan provinces, the indigenous writers of Taiwan, and others. We will pay close attention to how minority writers explore and assert their identities in a Han-dominated society, how their work can broaden our understanding of the cultural diversity at play in modern China, and how it can challenge our conventional definitions of what constitutes modern Chinese literature and culture. The course begins by considering the role of ethnicity and nation in the birth and development of Chinese literature in the 20th century, before moving on to examine works by specific ethnicities. Finally, we will address certain issues faced by minorities in China that cut across ethnic lines. Throughout, we will address some of the most pressing concerns of minority ethnicities, concerns that are deeply significant not only to our understanding of modern China, but to the modern world at large. Familiarity with Chinese or related cultural context beneficial, but not required.

EAAS UN3230 Labor, Love, and Leisure in Contemporary China. 3 points.

This course offers an introduction to life in Reform era China. We will employ anthropological analysis to examine how Maoist legacies and recent state liberalization efforts shape everyday experiences of labor, romance, and consumption. Scholarly texts will be supplemented with primary materials including political speeches, testimonies, and documentaries.

EAAS UN3313 INTRODUCTION TO CHINESE CINEMAS. 3.00 points.

What is "cinema" in the Chinese-speaking world, and how have the aesthetics, politics and practice of cinema evolved over time? In what ways has cinema interacted with its sister arts, such as painting, photography, theatre, architecture, and music? And in what capacities has cinema represented and intervened into the social and political worlds of its production and reception? This course is an introductory course on Chinese cinemas from Mainland China, Taiwan and Hong Kong, featuring landmark films from the 1930s to the present, with emphasis on contemporary films produced in the past three decades. We cover major genres such as melodrama, historical epic, comedy, musical, martial arts and documentary films, and study works by film auteurs such as Hou Hsiao-hsien, Chen Kaige, Ann Hui and Jia Zhangke. Besides the questions mentioned above, topics also include cinema's approaches to history and memory, and its engagement with questions of gender, ethnicity, class and language politics

EAAS UN3322 EAST ASIAN CINEMA. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces students to major works, genres and waves of East Asian cinema from the Silent era to the present, including films from Japan, Korea, Mainland China, Taiwan and Hong Kong. How has cinema participated in East Asian societies' distinct and shared experiences of industrial modernity, imperialism and (post)colonialism? How has cinema engaged with questions of class, gender, ethnic and language politics? In what ways has cinema facilitated transnational circulations and mobilizations of peoples and ideas, and how has it interacted with other art forms, such as theatre, painting, photography and music? In this class, we answer these questions by studying cinemas across the region side-by-side, understanding cinema as deeply embedded in the region's intertwining political, social and cultural histories and circulations of people and ideas. We cover a variety of genres such as melodrama, comedy, historical epic, sci-fi, martial arts and action, and prominent film auteurs such as Yasujiro Ozu, Akira Kurosawa, Yu Hanyong, Chen Kaige, Hou Hsiao-hsien, and Ann Hui. As cinema is, among other things, a creative practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects. As a global core course, this class does not assume prior knowledge of East Asian culture or of film studies

EAAS UN3435 Chinese Revolution, Asian Revolution, World Revolution: Revolution and Radicalism in the Long Twentieth Century. 4.00 points.

This course examines the Chinese Revolution as a global event, one that provided new possibilities for understanding the future not only of China, but Asia and the world. In doing so, it refuses any notion of the Chinese Revolution as a merely "Chinese" event and instead marks the ways in which diverse sets of activists and revolutionaries from across Asia not only contributed towards the formation of Chinese revolutionary politics but also responded on their own terms. The Chinese Revolution thereby emerges as a truly global event and one that transformed political imagination. The course focuses largely on the responses and trajectories of Asian revolutionaries, especially from Vietnam and Japan, whose intellectual and political paths intersected with those of Chinese activists. Students can expect to work through the diverse intellectual interventions of pan-Asian diasporic communities in Japan at the beginning of the twentieth century, read interwar proletarian fiction from Chinese and Japanese authors, compare Chinese and Vietnamese conceptualizations of "people's war" as an anti-colonial military strategy. They will emerge with a new understanding of the porousness and complexity of basic categories such as China, Asia and revolution

EAAS UN3575 Approaching Cities and Life in Chinese Cultural History. 4.00 points.

Italo Calvino's imagined Marco Polo cautions against commemorating the lived experience of a city, "Memory's images, once they are fixed in words, are erased." How shall we modern students of the past retrieve the ways in which foreign men and women dwelled in everyday practice? This seminar will take you on a tour of some key topoi — as both physical and literary constructs — throughout Chinese history, availing of a selection of textual, visual, and cinematic materials that shape and are shaped by the palimpsests of changing Chinese urban life

HSEA UN3642 Peripheries of the Sinitic World through History. 3.00 points.

This course surveys the southern and western peripheries of the political entities we today call China from the turn of the 1st millennium CE to the early 20th century. It does so primarily through translations of primary sources - travelogues and geographies- up to the 16th century, at which point it turns its attention to recently published monographs of varying breadth that can cover more ground, given the sheer number of available primary sources from that time on. No prerequisites but Introduction to East Asian Civilizations: Tibet, China, or Vietnam is recommended

HSEA UN3851 GODS, GHOSTS, AND ANCESTORS: RELIGION IN CHINESE CULTURE AND SOCIETY. 3.00 points.

Examines the social and cultural place of Chinese religions through time, focusing on Chinese ideas of the relation between humans and spirits, and the expression of those ideas in practice. Problems will include the long-term displacement of ancestors by gods in Chinese history; the varying and changing social functions of rituals, and the different views of the same ritual taken by different participants; the growth of religious commerce from early modern times on. Topics will be organized roughly chronologically but the emphasis is on broad change rather than historical coverage

HIST BC3864 Feast/Famine: Food Environment China. 4.00 points.

Food has always been a central concern in Chinese politics, religion, medicine, and culture. This course takes an ecological approach to the provision, preparation, and consumption of food in Chinese history, from the Neolithic times to the post-socialist era today. In examining Chinese approaches to soil fertility, healthy diet, and culinary pleasures, we explore alternative food systems for a more sustainable future

EAAS UN3927 CHINA IN THE MODERN WORLD. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The rise of China has impacted world politics and economy in significant ways. How did it happen? This course introduces some unique angles of self-understanding as suggested by Chinese writers, intellectuals, and artists who have participated in the making of modern China and provided illuminating and critical analyses of their own culture, history, and the world. Readings cover a wide selection of modern Chinese fiction and poetry, autobiographical writing, photography, documentary film, artworks, and music with emphasis on the interplays of art/literature, history, and politics. Close attention is paid to the role of storytelling, the mediating powers of technology, new forms of visuality and sense experience, and the emergence of critical consciousness in response to global modernity. In the course of the semester, a number of contemporary Chinese artists, filmmakers, and writers are invited to answer students' questions.

This course draws on cross-disciplinary methods from art history, film studies, anthropology, and history in approaching texts and other works. The goal is to develop critical reading skills and gain in-depth understanding of modern China and its engagement with the modern world beyond the cold war rhetoric. Our topics of discussion include historical rupture, loss and melancholy, exile, freedom, migration, social bonding and identity, capitalism, nationalism, and the world revolution. All works are read in English translation.

EAAS GU4027 Disability in East Asia and Beyond. 4 points.

"The world isn't built with a ramp," writes disabled adventurer Walt Balenovich in his book *Travels in a Blue Chair*. Neither is the world built with any universal understanding of disability. This course examines what it means to be disabled in both theory and practice, especially in East Asian contexts. We begin by closely examining the concept of "disability" and its various connotations, then look at permutations of disability in Japan, China, and the Koreas before ending with recent, more radical ways of thinking about disability. This interdisciplinary course is framed by feminist approaches to definitions and applications of disability theory, drawing further on literary and technological approaches to representation of minority subjects. Multimedia engagement with issues ranging from guide dogs to nanotechnology will aid in understanding overlaps between, and barriers of, disability on an international scale, while also building a critical toolkit for understanding "able-bodied" assumptions in ourselves.

HSEA GU4027 ISSUES IN EARLY CHINESE CIV. 4.00 points.

The purpose of this course is to introduce students to the basic issues and problems in the study of early Chinese civilization, some theoretical and others methodological. Through the review of a long series of debates the course offers a quick entrance both to this early period of history and to these studies. Organized around problems, the course encourages critical thinking and contesting arguments and helps the students weigh different positions addressing the problems. By doing so, the course guides the students to search for frontline questions and to probe possible ways to solve the problems. The course deals with both the written records (inscriptional and textual) and the material evidence, and the student can well expect this course to serve as also updates of the most fascinating archaeological discoveries in China made in the past decades. The course is designed as an upper-level undergraduate and MA course; therefore, it is recommended that undergraduate students should take "ASCE V2359: Introduction to East Asian Civilizations: China" before participating in this course.

EAAS GU4111 Modern Chinese Poetry in a Global Context. 4.00 points.

In this course, we will take modern Chinese poetry as a crucible in which we can observe the interacting forces of literary history and social change. From diplomats who saw poetry as a medium for cultural translation between China and the world, to revolutionaries who enlisted poetry in the project of social transformation, we will examine the lives and works of some of China's most prominent poets and ask, what can we learn about modern China from reading their poetry? In addition to poems, the course will include fiction, essays, photographs, and films by both Chinese and non-Chinese artists that place our poets in a broader context; topics of discussion include national identity, revolution, translation, gender, the body, ethnicity, and technology

EAAS GU4202 The Dead in Ancient China. 4 points.

What did the dead become? Ancestors, spirits, or ghosts? Are these postmortem categories and roles ontologically distinct and mutually exclusive? How did the dead become ancestors, spirits, or ghosts? Where did the dead go and what kind of "lives after" did they have? With these questions in mind, this course explores the realm of the dead in ancient China (ca. 5000 B.C.E.-600 C.E.) instantiated by the living in rituals, objects, and writings. Focusing on contemporaneous materials obtained through archaeology, facilitated with transmitted history and literature when available, students will read about and learn to analyze a variety of conceptions of the dead and corresponding afterlife options recorded in diverse kinds of sources including material culture, architecture, artifacts, pictorial representations, and texts from ancient China.

EAAS GU4217 CHINA ON STAGE. 4.00 points.

This course explores how Chinese identity and society have been staged in theatre productions over the past century. Course content includes play scripts in English translation, videos, photographs, archival materials, and English-language books and articles about Chinese theater

HSEA GU4220 ISLAM IN CHINA AND INNER ASIA. 4.00 points.

This seminar surveys the history of Islam, both in the Chinese interior and neighboring Inner Asia (primarily Xinjiang), from its arrival to the present day. Beginning with the first legendary accounts of migration from the Middle East to China, we trace the growth of an identifiable Muslim community in the age of the Mongol empire, then look at Ming China's interactions with the Islamic world, the Qing expansion into Inner Asia, and conclude by discussing modernist and nationalist trends of the twentieth-century

HSEA GU4221 Many Belts, Many Roads: China and the Islamic World, c.600AD-Present. 4 points.

This seminar explores historical interactions between China and the Islamic world across the greater Indian Ocean region, sometimes called the "maritime Silk Road." It gives special attention to the millions of Muslims in China itself, who have played an important role bridging these diverse spaces and cultures. Complicating conventional definitions of China, Islam, and the nation-state, this course illuminates many under-studied aspects of Asian and global history, Chinese state and society, and international relations.

HSEA GU4222 China's Global Histories: People, Space, and Power. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This seminar asks what Chinese history tells us about global history and vice versa. Taking a long-term and multiregional approach, it invites you to develop your own answers to this question from perspectives such as trade and economy, migration and immigration, empire and imperialism, war, religion, science, gender, ideology, and modern state- and nation-building, and contemporary international relations. We will not only challenge Eurocentric and Sinocentric methodologies, but push toward new conceptual vocabularies that aspire to the genuinely global

EAAS GU4226 GENDER, CLASS, REAL ESTATE-CHINA. 4.00 points.

This is a seminar for advanced undergraduates and master's degree students, which explores the socioeconomic consequences of China's development of a boom, urban residential real-estate market since the privatization of housing at the end of the 1990s. We will use the intersecting lenses of gender/sexuality, class and race/ethnicity to analyze the dramatic new inequalities created in arguably the largest and fastest accumulation of residential-real estate wealth in history. We will examine topics such as how skyrocketing home prices and state-led urbanization have created winners and losers based on gender, sexuality, class, race/ethnicity and location (hukou), as China strives to transform from a predominantly rural population to one that is 60 percent urban by 2020. We explore the vastly divergent effects of urban real-estate development on Chinese citizens, from the most marginalized communities in remote regions of Tibet and Xinjiang to hyper-wealthy investors in Manhattan. Although this course has no formal prerequisites, it assumes some basic knowledge of Chinese history. If you have never taken a course on China before, please ask me for guidance on whether or not this class is suitable for you. The syllabus is preliminary and subject to change based on breaking news events and the needs of the class

EAAS GU4232 Trauma and Testimonial Narrative in Post-Mao Chinese Literature. 3 points.

Is the Cultural Revolution the Holocaust of China? Such analogy is often evoked to imply more than a mere rhetoric of accusation. This seminar explores the rise of testimonial literature—known as "Scar Literature"—that began to appear in print immediately after the Cultural Revolution in Mainland China. We will examine how this literature repudiates the repressions, violence and chaos of the Maoist era and speaks to the collective experience of Chinese intellectuals. We will analyze how this body of testimonial literature and related film productions bear witness to the suffering of intellectuals and render it commensurate or not commensurate with the genre of Holocaust literature. Our goal is to achieve a deeper understanding of the tragedy of the Cultural Revolution and its historical roots beyond analogical thinking. Topics of discussion include individual and collective memories, trauma, storytelling, social protest and moral accountability. All readings are in English.

EAAS GU4244 Chinese Internet Culture. 4 points.

This course introduces Chinese internet culture by examining interactive literary communities, multimedia platforms, cyber-nationalism, web-based activism, and the possibility of the internet commons in mainland China. We will pay close attention to the figure of netizen, online piracy, cyberbullying, censorship, and growing addiction to virtual reality among the Chinese youth. Topics of discussion include, for example, the tension between connectivity and control, between imitation and innovation, and between the real and the virtual. We will explore these new developments in media technology primarily from social, political, and international perspectives. The goal is to understand how the rapid proliferation of digital technologies has helped create a new landscape of popular culture across mass media and transformed contemporary Chinese society.

EAAS GU4352 The Fantastic World of Knights-Errent in Chinese Literature. 4.00 points.

This course approaches the Chinese knight-errant, often seen in the Kungfu films (most recently *Mulan 2020*), both as a historical fact and a literary imagination. It provides students with a broad overview of Chinese literature until the twentieth century, to familiarize students with the most prominent literary genres of each time period, from official history to classical poetry, from classical tale to vernacular fiction, from drama to film. Through reading/viewing the knight-errant literature, we will discuss issues including translation and comparative studies, "history" writing and forming, literary genre and media, gender boundary and transgression, national and trans-national

POLS GU4406 Politics in Contemporary China. 4 points.

This course will be taught in Chinese.

This course focuses on the evolution of Chinese politics since the Chinese Communist Party (CCP) took power in 1949. It introduces and discusses the relationship between the two “three decades” (the three decades under Mao and the three decades of “reform and opening up”). More specifically, the course aims to (1) clarify some important historical facts, (2) analyze the ideological consideration of the “official” history sanctioned by the CCP and its epistemological impact, (3) make a comparison between official view and that of independent scholars about the history; (4) try to respond to some urgent problems faced by contemporary China, and (5) provide suggestions and principles for the reconstruction of the historiography of contemporary China. Students will learn how to understand the recent development Chinese politics, how to analyze the complex contemporary history and reality of China, and how to approach issues about China from a systematic perspective.

RELI GU4526 Food and Sex in Premodern Chinese Buddhism. 4 points.

This course is an upper-level seminar on appetite and its management, designed for advanced undergraduates and graduate students. Our focus will be on the appetites of food hunger and sexual desire, and how Chinese Buddhist teachings propose to manage these. Food and sex are separate domains of experience, but as the primary objects of bodily appetites, they are analogous. Eating and sex both involve a direct and substantive interaction with the material world that is driven by powerful desires. In Buddhist teachings, these desires are said to bind us to the cycle of rebirth (*saṃsāra*) and to shape the actions (karma), both mental and corporeal, that constitute our moral engagement with the phenomenal world. Hence it is important to know how a Buddhist on the path out of suffering is to manage these activities. What do monastic codes stipulate? What disciplines did lay Buddhists undertake? How are transgressions identified and handled? How do ancient Chinese and Daoist ideas inform the development of Chinese Buddhist attitudes toward sex and diet? How did Chinese Buddhist monastics come to adopt a meatless diet? How do religions use food and sex as tools for determining one's ritual purity (i.e., moral worth)? We will explore these and related topics. Despite the common perception of Buddhism as a world-denying religion focused on transcending bodily needs, Chinese Buddhists (and their Indian or Central Asian counterparts) engaged in numerous body practices with worldly benefit, while at the same time mitigating the dangers of desire through various doctrinal and practical means. This course is an exploration of those means.

EAAS GU4572 CHINESE DOCUMENTARY CINEMA. 4.00 points.

What defines a “documentary” film? How do documentaries inform, provoke and move us? What formal devices and aesthetic strategies do documentaries use to construct visions of reality and proclaim them as authentic, credible and authoritative? What can documentary cinema teach us about the changing Chinese society, and about cinema as a medium for social engagement? This seminar introduces students to the aesthetics, epistemology and politics of documentary cinema in China from the 1940s to the present, with an emphasis on contemporary films produced in the past two decades. We examine how documentaries contended history, registered subaltern experiences, engaged with issues of gender, ethnicity and class, and built new communities of testimony and activism to foster social change. Besides documentaries made by Chinese filmmakers, we also include a small number of films made on China by western filmmakers, including those by Joris Ivens, Michelangelo Antonioni, Frank Capra and Carma Hinton. Topics include documentary poetics and aesthetics, evidence, performance and authenticity, the porous boundaries between documentary and fiction, and documentary ethics. As cinema is, among other things, a creative practice, in this course, students will be given opportunities to respond to films analytically and creatively, through writing as well as creative visual projects

RELI GU4617 Image Theories in Chinese Religions. 4 points.

What does “image” mean in Chinese intellectual traditions? How did proponents of different religious persuasions construe the relationship between images and their referents differently and how did such construal change over time? Why did the practice of fashioning images often give rise to controversies in Chinese history? What makes images the object of adoration as well as destruction? Throughout the course, we will tackle these questions from diverse perspectives. The first half of the course examines a variety of accounts from Chinese indigenous classics and treatises. The second half looks at how discourses of the image further diversified after the arrival of Buddhism in China.

EAAS GU4625 Socialist China in the Western Gaze (1949-1978). 4.00 points.

This seminar attempts to historicize China's contemporary cultural diplomacy initiatives by examining the nation's place in the world from the 1950s to the 1970s. Topics include China's role in the socialist world of the 1950s and 1960s, global Maoist political movements, socialist China in the imagination of Western intellectuals, Western fascination with Maoist “people's” science, and controversies over the depiction of China in 1970s European documentary cinema

EAAS GU4730 Science and Technology in Chinese Media Cultures. 4.00 points.

Covering a period from the late 19th century to the present, this class explores how ideas and practices in science and technology have historically entered popular imagination, social organization and political contestation, as they become mediated by various media forms and technologies such as photography, cinema, novels, television, video, internet platforms and data algorithms. In particular, we focus on how science and technology have shaped our understandings of the human body, and impacted on the various bodily experiences, from perception, cognition, to emotion and connection with others in the environment. This class helps students read media artefacts in a historically grounded and conceptually generative way, understanding media artefacts as historically conditioned, yet offering us resources for envisioning the future

EAAS GU4840 CHINA AND POLITICS OF DESIRE. 4.00 points.

A recent American newspaper headline announced that China has become “the most materialistic country the world.” Globally circulating narratives often interpret Chinese consumers’ demand for commodities as an attempt to fill a void left by the absence of the Maoist state, traditional religious life, and Western-style democracy. But things aren’t as simple as they appear. This course explores the intertwined questions of “Chinese” desire and the desire for China. Avoiding reductionist understandings of desire as either a universal natural human attribute or a particular Chinese cultural trait, we will track the production and management of desire within a complex global field. Drawing on ethnographies, films, short stories, and psychoanalytic and postcolonial theory, this course will explore the shifting figure of desire across the Maoist and post-Maoist eras by examining how academics, government officials, intellectuals, and artists have represented Chinese needs, wants and fantasies. From state leaders’ attempts to improve the “quality” of the country’s population to citizens’ dreams of home ownership, from sexualized desire to hunger for food, drugs and other commodities, we will attend to the continuities and disjunctures of recent Chinese history by tracking how desire in China has been conceptualized and refracted through local and global encounters

EAAS UN3338 CULTRL HIST-JAPANESE MONSTERS. 3.00 points.

Priority is given to EALAC and History majors, as well as to those who have done previous coursework on Japan.

From Godzilla to Pokemon (literally, pocket monster) toys, Japanese monsters have become a staple commodity of late-capitalist global pop culture. This course seeks to place this phenomenon within a longer historical, as well as a broader cross-cultural, context. Through an examination of texts and images spanning over thirteen centuries of Japanese history, along with comparable productions from other cultures, students will gain an understanding not only of different conceptions and representations of monsters, ghosts, and other supernatural creatures in Japan, but also of the role of the monstrous in the cultural imagination more generally. The course draws on various media and genres of representation, ranging from written works, both literary and scholarly, to the visual arts, material culture, drama, and cinema. Readings average 100-150 pages per week. Several film and video screenings are scheduled in addition to the regular class meetings. Seating is limited, with final admission based on a written essay and other information to be submitted to the instructor before the beginning of the semester

EAAS UN3343 JAPANESE CONTEMPORARY CINEMA # MEDIA CULTURE. 4.00 points.

The course will closely examine 1) the various traits of postmodern Japanese cinemas in the 1980s and the 1990s after the phase of global cinematic modernism, 2) contemporary media phenomena such as media convergence and the media ecologies of anime, 3) media activism after the 2011 Tohoku earthquake, and beyond. We will proceed through careful analysis of films, anime, and digital media, while also addressing larger questions of historiography in general

Italo Calvino's imagined Marco Polo cautions against commemorating the lived experience of a city, "Memory's images, once they are fixed in words, are erased." How shall we modern students of the past retrieve the ways in which foreign men and women dwelled in everyday practice? This seminar will take you on a tour of some key topoi – as both physical and literary constructs – throughout Chinese history, availing of a selection of textual, visual, and cinematic materials that shape and are shaped by the palimpsests of changing Chinese urban life

HSEA UN3871 MODERN JAPAN: IMAGES # WORDS. 3.00 points.

This course relies primarily on visual materials to familiarize students with the history of Japan from the beginning of the nineteenth century through the present. It follows a chronological order, introducing students to various realms of Japanese visual culture—from woodblock prints to film, anime, and manga—along with the historical contexts that they were shaped by, and in turn helped shape. Special attention will be paid to the visual technologies of nation-building, war, and empire; to historical interactions between Japanese and Euro-American visual culture; to the operations of still versus moving images; and to the mass production of visual commodities for the global marketplace. Students who take the course will emerge not only with a better understanding of Japan's modern historical experience, but also with a more discerning eye for the ways that images convey meaning and offer access to the past

EARL GU4011 LOTUS SUTRA/E ASIAN BUDDHISM. 4.00 points.**EARL GU4017 HELL IN EAST ASIAN CULTURE. 4.00 points.**

Whereas many in the modern West may commonly associate heavens and hells with the traditions of Christianity and Islam, Buddhist Asia shares an equally extensive concern with the paradises and punishments of the afterlife. Indian Buddhist scriptures, and their translations and elaborations across Asia, celebrate an infernal cosmology that makes Dante's opus seem like a Hallmark card by comparison. This seminar focuses particularly on hells in the East Asian imaginary with the occasional detour to Southeast Asia, India, or Tibet for purposes of comparison. Our analysis of the practices, discourses, and representations of hells in East Asia is designed to coincide with a major exhibition on Asian Hells at Asia Society NY (Sept-Dec 2020). In this seminar we will view the exhibition together and each student will discuss an object on view, which they will have selected and prepared for in advance. Each student will work on a seminar project (usually, but not necessarily, an academic research paper) throughout the second half of the seminar. Proposal, bibliography, preliminary draft(s), and presentation will be due in stages during the process and students will receive feedback at each stage before the final draft is due at the beginning of final exam period. EAAS GU4027 Disability in East Asia and Beyond. 4 points.

"The world isn't built with a ramp," writes disabled adventurer Walt Balenovich in his book *Travels in a Blue Chair*. Neither is the world built with any universal understanding of disability. This course examines what it means to be disabled in both theory and practice, especially in East Asian contexts. We begin by closely examining the concept of "disability" and its various connotations, then look at permutations of disability in Japan, China, and the Koreas before ending with recent, more radical ways of thinking about disability. This interdisciplinary course is framed by feminist approaches to definitions and applications of disability theory, drawing further on literary and technological approaches to representation of minority subjects. Multimedia engagement with issues ranging from guide dogs to nanotechnology will aid in understanding overlaps between, and barriers of, disability on an international scale, while also building a critical toolkit for understanding "able-bodied" assumptions in ourselves.

EAAS GU4226 GENDER, CLASS, REAL ESTATE-CHINA. 4.00 points.

This is a seminar for advanced undergraduates and master's degree students, which explores the socioeconomic consequences of China's development of a boom, urban residential real-estate market since the privatization of housing at the end of the 1990s. We will use the intersecting lenses of gender/sexuality, class and race/ethnicity to analyze the dramatic new inequalities created in arguably the largest and fastest accumulation of residential-real estate wealth in history. We will examine topics such as how skyrocketing home prices and state-led urbanization have created winners and losers based on gender, sexuality, class, race/ethnicity and location (hukou), as China strives to transform from a predominantly rural population to one that is 60 percent urban by 2020. We explore the vastly divergent effects of urban real-estate development on Chinese citizens, from the most marginalized communities in remote regions of Tibet and Xinjiang to hyper-wealthy investors in Manhattan. Although this course has no formal prerequisites, it assumes some basic knowledge of Chinese history. If you have never taken a course on China before, please ask me for guidance on whether or not this class is suitable for you. The syllabus is preliminary and subject to change based on breaking news events and the needs of the class

EAAS GU4334 Supernatural in Japanese Culture: Ghosts, Gods, and Animals. 4.00 points.

Covering a period from the 7th century to the present, this class draws on Japanese literature, folklore, painting, performance, and anime, to explore the world of the supernatural, particularly the role of ghosts, gods, demons, animals, and nature. Students are introduced to various strands of popular religion, including Buddhist cosmologies and native beliefs about nature and human life, with special attention to the relationship between the living and the dead, and explore the role of human intermediaries. The course looks at these texts and media in relationship to the local community, gender, social and occupational status, environment (both natural and urban), and historical period, exploring issues of social identity and power

The aim of this course is to examine the interrelated concepts of body, borders, gender construction, and sexuality as expressed in Japanese literature, religion, and culture from the premodern period to the present. We will use a variety of media including oral literature, narrative fiction, noh play, early modern comic literature, novel, film, and anime

EAAS GU4777 A Thousand-Year Old Romance: Reading The Tale of Genji Across the Ages, Media, and Genres. 4.00 points.

This course presents a synchronous and diachronous exploration of The Tale of Genji, a masterpiece of Japanese literature. During the first half of the course, students will read the entire English translation of the tale, as well as a number of other primary texts from roughly the same time period in order to gain an understanding of the sociohistorical and literary context in which the tale came about, while the second half of the course is devoted to the reception and adaptations of the tale across various media, genres, and time periods, ranging from commentaries, noh plays, traditional paintings and even "fan fiction" to modern novels and manga. The aim of the course is to provide the students with an understanding of The Tale of Genji's place within the Japanese literary tradition, and the impact it has had and continues to exert on all facets of Japanese culture

EAAS GU4810 WOMEN AND LITERARY CULTURE IN JAPAN. 4.00 points.

Japan has a long tradition of highly sophisticated vernacular literature (poetry, prose fiction, essays and poetic memoirs) by aristocratic court women, particularly from the tenth- and eleventh-century, including The Tale of Genji, often considered the world's first psychological novel. Writings by women in the early period had a deep impact on subsequent cultural production, and these vernacular writings (as well as the figure of these early women writers) acquired a new, contested significance from the end of the nineteenth century as part of the process of modern nation-building. Gender became a major organizing category in constructing discourse on literature, literary language, and literary modernity, particularly with regard to the novel. This seminar engages in close readings and discussion of selected works from the eleventh-century to twentieth-century Japan with particular attention to the genealogy of women's writings and changing representations of women, gender, and social relations. Issues include: genre, media, intertextuality, and literary communities; body and sexuality; and in the modern period, the "woman question" and global feminisms as well as authorship and authority. All readings are in English. Original texts will be provided for those who can read in the original

EAAS UN3207 Lights, Camera, Action: The Visual Culture of K-pop. 4 points.

In this course, we will explore the total political economy of culture that is K-pop, simultaneously a State-sponsored industry, an agency-generated cultural product, and a fandom-distributed community. In the recent years, scholars in various sectors have been actively demystifying the many social performances entailing K-pop through the frames of globalization and transnationalism. To see K-pop as transnationalism in performance is to construe it not as unidirectional or monolithic, but as a constant interpellation between national export and transnational transaction, each utterance refracted a mile a minute by its "glocal (global and local)" performers through social and web-based media. Paying particular attention to how such identities are negotiated within the portmanteau "K-pop," we will engage with the critical frames of Korean studies, performance studies, and media & visual culture to explore its major topics and defining moments in rigorously discussion-based seminars.

EAAS UN3215 KOREAN LITERATURE # FILM. 3.00 points.

Prerequisites: weekly film screening required.

This course traces the history of Korean cinema and literature from the 1930s to the early 2000s. Particular attention is given to colonialism, national division, war, gender relations, authoritarianism, urbanization, consumer culture, and diaspora. What kinds of familial, social, economic, and political relations do these films and literary works envision? We will link films and literary texts to their historical context, noting how representations of people, places, and ideas have changed over time—from colonialism, through poverty and malaise in the aftermath of the Korean War, to North Korea's continuing search for autonomy in the world system and South Korea's current position as global economic power and maker of the "Korean Wave"

EAAS UN3217 KOREAN POPULAR CINEMA. 4.00 points.

This course surveys modern Korean culture and society through Korean popular cinema. Drawing from weekly screenings and readings on critical film and Korean studies, we will explore major topics and defining historical moments in modern Korean history post-1945.

EAAS UN3412 Conflict and Culture in Korean History. 4 points.

This course considers how accounts of conflict in Korean history reflect the development of core values, ethical priorities and emotions, and perceptions among Koreans from the late sixteenth century to the late twentieth century. By carefully examining the narrative and rhetorical styles of major accounts of problems such as wars, political strife, family tensions, and intellectual and personal tribulations at a given cultural and historical time, students will not only understand how Koreans have dealt with conflict throughout history but will also develop reading strategies for primary sources contested by and narrated in a multiplicity of ideologies, genres, and voices.

EAAS GU4160 CULTURES IN COLONIAL KOREA. 3.00 points.

This course examines the processes of colonization that played a central role in locating Korea in an integrated world in the first half of the twentieth century. We will analyze the ways in which the intersections among an array of contemporary global issues and concerns (to name a few- social Darwinism, migration, urban space, gender, sexuality, militarism, race, liberalism, socialism, capitalism) shaped the modern experience in Korea under Japanese rule (1910-1945). Our approach will be multidisciplinary. We will look, for example, at art, architecture, literature, film, philosophy, religion, and historiography. Throughout, we will pay special attention to the place of Korea and Koreans in the expanding Japanese empire and, more broadly, in the global colonial context. Class will be held as a discussion seminar based on close reading of primary-source documents and recent scholarship.

EARL GU4320 BUDDHISM AND KOREAN CULTURE. 4.00 points.

Since Buddhism was introduced to Korea 1,600 years ago, the religion has had great impact on almost all aspects of the Korean society, making significant contributions to the distinct development of Korean culture. In this course, we will explore how Buddhism has influenced and interacted with various fields of Korean culture such as art, architecture, literature, philosophy, politics, religions, and popular culture. Buddhist scriptures, written in classical Chinese, with their colorful imaginations, have stimulated the development of Korean literature. Buddhist art, sculpture, and architecture have also catalyzed the Korean counterparts to bloom. The sophisticated philosophy and worldview of Buddhism, along with its diverse religious practices and rituals have added richness to the spiritual life of Korean people. Buddhism also attracted a significant number of followers, often playing important roles in politics. Throughout the course, we will not only investigate the influence of Buddhism on diverse aspects of Korean culture on their forms and at their depths, but also examine the interactions between Buddhism and other religions, as well as politics. Students will learn how Korean people have formed and reformed Korean culture through the medium of Buddhism

EARL GU4324 Religion and Politics in Korea. 4 points.

This course explores diverse aspects of the interactions between religion and politics in modern, pre-modern, and contemporary Korea. It focuses on how Korean religions such as Buddhism, Confucianism, Christianity, and new religions have influenced and been influenced by politics, thereby leading to the mutual transformation of the two major social phenomena.

This course surveys the southern and western peripheries of the political entities we today call China from the turn of the 1st millennium CE to the early 20th century. It does so primarily through translations of primary sources - travelogues and geographies- up to the 16th century, at which point it turns its attention to recently published monographs of varying breadth that can cover more ground, given the sheer number of available primary sources from that time on. No prerequisites but Introduction to East Asian Civilizations: Tibet, China, or Vietnam is recommended

EAAS GU4017 Ethnography and Representation in Tibet. 4.00 points.

EARL GU4310 LIFE WRIT/TIBET BUDDHIST LIT. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course engages the genre of life writing in Tibetan Buddhist culture, addressing the permeable and fluid nature of this important sphere of Tibetan literature. Through Tibetan biographies, hagiographies, and autobiographies, the class will consider questions about how life-writing overlaps with religious doctrine, philosophy, and history. For comparative purposes, we will read life writing from Western (and Japanese or Chinese) authors, for instance accounts of the lives of Christian saints, raising questions about the cultural relativity of what makes up a life's story

EARL GU4312 TIBETAN SACRED SPACE(IN COMPARATIVE CONT. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Through interdisciplinary theoretical approaches (mostly in the fields of religion, anthropology, literature, and history), this course engages the genre of writing about sacred space in Tibetan Buddhist culture, addressing the micro (built environment) and macro (natural environment) levels of this important sphere of Tibetan literature. Through Tibetan pilgrimage accounts, place (monasteries, temples, etc) based guidebooks, geographically focused biographies, and pictorial representations of place, the class will consider questions about how place-writing overlaps with religious practice, politics, and history. For comparative purposes, we will read place based writing from Western and other Asian authors, for instance accounts of the guidebooks to and inscriptions at Christian churches, raising questions about the cultural relativity of what makes up sacred space.

EAAS GU4558 Tibetan Science - Medicine, Knowledge, and the State on the Roof of the World. 4.00 points.

This course aims to pose the question of what 'science' can be in Tibetan and Himalayan cultures, and to examine these 'sciences' in their social, religious, political, transnational, and inter-cultural dimensions. Especially through the field of medicine, it explores the main developments of Tibetan knowledge mostly during the modern era from the 17th century onward, building on both ethnography and primary and secondary written sources. This course pays particular attention to the relation of this knowledge to various states, centralizing institutions, and policies and practices of legitimization, and further to the modernization and globalization of the production, application, and consumption of Tibetan medical knowledge, including during the current Covid-19 pandemic

EAAS GU4565 TIBET IN THE WORLD: CULTURAL PRODUCTION AND SOCIAL CHANGE. 4.00 points.

This course explores the intersection of cultural production with national policies and global economies in the context of Tibet. We will focus not on colonial sources (Mythos Tibet) but on a wide range of representational and expressive practices by contemporary Tibetans in film, literature, music, social media, art, performance, local museums, etc. -- all since the 1990s. Tibetan cultural production today is at once localized and transnational, whether it is the vision and work of artists in the People's Republic of China or the creation of Tibetans living in the diaspora. We will explore the impact of colonialism and socioeconomic marginalization on the de-centering and re-centering of ethnicity and identity in education, publishing, and the arts. How do Tibetan artists, musicians, filmmakers, writers, comedians, and other cultural producers negotiate the complexities of modernity, secularization, globalization and political agendas, vis-à-vis incentives to preserve traditions, while engaging creatively? Each week will focus on 2 to 3 primary sources and 1 or 2 related secondary readings. Our discussions of the primary source materials (film screenings, readings, artwork, performances, etc.) will be enriched with readings in Cultural Studies, sociology, and anthropology, and by conversations with area artists

Rise of Modern Tibet

HSEA GU4712 Local History in Tibet. 4 points.

Tibetan culture covers an area roughly the size of Western Europe, yet most regions have not been the subject of sustained historical study. This course is designed for students interested in studying approaches to local history that attempt to ask large questions of relatively small places. Historiographic works from Tibetan studies (where they exist) will be examined in comparison with approaches drawn mainly from European and Chinese studies, as well as theories drawn from North/South American and Southeast Asian contexts. Given the centrality of Buddhist monasteries to Tibetan history (as "urban" centers, banks, governments, educational institutions, etc.) much of the course will deal with these.

HSEA GU4720 20TH CENTURY TIBETAN HISTORY. 4.00 points.

This course is designed for students interested in gaining a broad view of Tibetan history in the 20th century. We will cover the institutional history of major Tibetan state institutions and their rivals in the Tibetan borderlands, as well as the relations with China, Britain, and America. Discussion sessions throughout the semester will focus on important historical issues. *Group(s): C*

Corequisites: ASCE UN1377

Corequisites: ASCE UN1377 This course provides a survey of Vietnamese civilization from prehistoric origins to the French colonization in the 19th century, with special emphasis on the rise and development of independent kingship over the 2nd millennium CE. We begin by exploring ethnolinguistic diversity of the Red River plain over the first millennium BCE, culminating in the material bronze culture known as the Dong Son. We then turn towards the introduction of high sinic culture, and the region's long membership within successive Chinese empires. We pay special attention to the rise of an independent state out of the crumbling Tang Dynasty, and the specific nation-building effects of war with the Mongols and the Ming Dynasty, in the 14th and 15th centuries respectively. Our class ends with the French colonization of the region, and the dramatic cultural and intellectual transformations that were triggered as a result. Our course will interrogate Vietnamese culture as a protean object, one that is defined and redefined at virtually every level, throughout a history marked by foreign interest, influence, and invasion

In this course we will study the late colonial and early post-colonial periods of South Asian history together. Some of the events we will cover include: the climax of anti-colonial movements in South Asia, WWII as it developed in South and Southeast Asia, the partition of British India, the two Indo-Pakistan wars, and the 1971 Bangladesh War. While we will read selected secondary literature, we will focus on a range of primary sources, including original radio broadcasts and oral history interviews. We will also study artistic interpretations of historical developments, including short stories and films. In this course, we will strive to remain attentive to the important changes engendered by colonialism, while simultaneously recognizing the agency of South Asians in formulating their own modernities during this critical period. We will also seek to develop a narrative of modern South Asian history, which is attentive to parallel and/or connected events in other regions

This course offers an expansive journey through the forms, pleasures, and meanings of Indian cinema. It explores the plural beginnings of popular film; the many competing cinemas produced across India; the diverse protagonists (from vamps to vigilantes) that populate the imagined entity named 'national cinema'; and the varied audiences addressed by these cinemas. Over the course of the semester, we will watch 15 of the most iconic narrative films produced in India, including Diamond Queen (1940), Awara (1951), Deewar (1975), Roja (1992), Mahanagar (1963), and Bandit Queen (1994). As we voyage with the dynamic, shifting codes and priorities of India's fiction filmmaking, we also shadow the emergence of the Indian nation and contestations of its coherence

MDES UN2650 GANDHI # HIS INTERLOCUTORS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Gandhi is in two senses an extraordinary figure: he was the most important leader of anti-imperialist movements in the twentieth century; yet, his ideas about modernity, the state, the industrial economy, technology, humanity's place in nature, the presence of God - were all highly idiosyncratic, sometimes at odds with the main trends of modern civilization. How did a man with such views come to have such an immense effect on history? In some ways, Gandhi is an excellent entry into the complex history of modern India - its contradictions, achievements, failures, possibilities. This course will be primarily a course on social theory, focusing on texts and discursive exchanges between various perceptions of modernity in India. It will have two parts: the first part will be based on reading Gandhi's own writings; the second, on the writings of his main interlocutors. It is hoped that through these exchanges students will get a vivid picture of the intellectual ferment in modern India, and the main lines of social and political thought that define its intellectual culture. The study in this course can be followed up by taking related courses in Indian political thought, or Indian politics or modern history. This course may not be taken as Pass/D/Fail

HSME UN2811 South Asia: Empire and Its Aftermath. 4 points.

Prerequisites: None.

(No prerequisite.) We begin with the rise and fall of the Mughal Empire, and examine why and how the East India Company came to rule India in the eighteenth century. As the term progresses, we will investigate the objectives of British colonial rule in India and we will explore the nature of colonial modernity. The course then turns to a discussion of anti-colonial sentiment, both in the form of outright revolt, and critiques by early nationalists. This is followed by a discussion of Gandhi, his thought and his leadership of the nationalist movement. Finally, the course explores the partition of British India in 1947, examining the long-term consequences of the process of partition for the states of India, Pakistan and Bangladesh. We will focus in particular on the flowing themes: non-Western state formation; debates about whether British rule impoverished India; the structure and ideology of anti-colonial thought; identity formation and its connection to political, economic and cultural structures. The class relies extensively on primary texts, and aims to expose students to multiple historiographical perspectives for understanding South Asia's past.

MDES UN3046 The Intersectional Politics of Religion. 3 points.

The Islamic veil controversy in France, the Rohingya crisis in Myanmar, the Kashmir lockdown, the lynching of Dalits in India – all seem to be connected through the ideas of 'religion', and certain religious identities as the basis for violence. What is the understanding of the religious that seems to be the operative factor in these events? Is it a singular concept of religion or are there different connotations of this category? For instance, how do we understand religion when it bifurcates the women's movement between Western 'secular' women and non-Western 'Muslim' women? Is it the same concept when we identify 'religion' as the basis for the harmonious coexistence of Hindus and Muslims among certain non-elite communities in India? In this course, we ask if it even possible to understand, 'religious' events in the modern political world, *without* asking what other categories implicitly inform our notion of the religious – such as, gender, caste, culture, race and historiography. We move beyond the strict dichotomy, of religion and secularism, as something given and unproblematic. Drawing from examples and events in modern South Asia as well as other postcolonial contexts, we attempt to respond to the concepts, contradictions, and dilemmas that accompany the question of when and how the religious becomes the political in the modern world.

Our weekly sessions will be devoted to reading texts from various disciplines and analyzing how the main argument is formulated and how that relates to a critique of the concept of religion in modern South Asia. Some weeks the scholarly texts will be supplemented by primary texts/case studies that will serve as direct demonstration of the problems that will be explored in the course. The engagement with sources from various disciplines will expose us to interdisciplinary content as well as diverse methods of critical analysis and argumentation. It will also help acquire the practice of identifying the central argument of the text, understand how the broad argument is actually formulated through smaller steps, and achieve the analytic skill to critically locate that single argument within a larger body of scholarship.

POLS UN3112 GANDHI, KING # POLS OF NONVIOLENCE. 4.00 points.

Since Gandhi's experiments in mass satyagraha over a century ago, nonviolence has become a staple of protest politics across the globe. From the Occupy movements to the Arab Spring to Movement for Black Lives, it might even be entering a new phase of revitalization. At the same time, what exactly nonviolence is and what it can accomplish in politics is very much under debate. This course aims to understand the politics of nonviolence by examining the political ideas and political careers of its most well-known twentieth-century advocates, M.K. Gandhi and Martin Luther King, Jr. Though still venerated as founding figures of nonviolent protest, Gandhi and King have come to be remembered in ways that can misconstrue how they understood and practiced nonviolent politics. To many, Gandhi is a saintly idealist, who wanted to imbue politics with the spirit of ahimsa, truth, and conscience. Likewise, King is taken to be a spokesman for interracial brotherhood and Christian love. While partly true, these images also downplay the political side of their nonviolence – the techniques of organizing and strategies of protest that made their movements successful. We will examine the evolution of Gandhi's and King's political thinking in relation to the movements they led – the Indian independence movement and the civil rights movement in the US. We will consider how the theory and practice of nonviolence evolved and changed as it moved from one context to another. We will be especially focused on understanding the dynamics of nonviolent protest

ASRL BC3115 WHY DO BAD THINGS HAPPEN TO GOOD PEOPLE?. 4.00 points.

This course is an introduction to the field of inquiry called The Problem of Evil, or Theodicy – that is, the investigation of God in the face of evil and suffering in the world. How do we justify God? How do we reconcile disaster, pain, and suffering with an all-good, all-knowing, all-compassionate God? This question arises in all religious traditions, but here we will study only four: the Jewish, Christian, Muslim, and Hindu traditions, each of which proposes its own array of answers. Our emphasis will be on primary texts from each tradition, with introductory and interpretive secondary sources brought in as supplementary. These primary sources will be discussed in class, but especially in required section meetings. A sub-theme of the course is the “pastoral” dimension of answers to the Problem of Evil: to what extent are the answers we study comforting? This course has been created with the many crises presently afflicting our world – COVID-19, climate change, and the injustice of racism, to name a few – in mind

MDES UN3445 SOCIETIES/CULTRS: INDIAN OCEAN. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course introduces the Indian Ocean as a region linking the Middle East, East Africa, South and Southeast Asia. With a focus on both continuities and rupture from the medieval to the modern period, we study select cultures and societies brought into contact through interregional migration and travel from the 10th to 20th centuries. Different types of people - nobles, merchants, soldiers, statesmen, sailors, scholars, slaves - experienced mobility in different ways. How did different groups of people represent such mobilities? What kinds of political, economic, and social cooperation, accommodation or conflict did different Indian Ocean encounters engender? We read some of the newest humanities and social science scholarship, as well as primary sources ranging from manuscript illustrations, sailor’s stories, merchant letters, travelogues, pilgrimage accounts, colonial documents, memoirs, and diplomatic accounts

POLS UN3556 The Rise of India & China. 3 points.

This course examines the rise of India and China since the mid-twentieth century in terms of interaction of states, markets and globalization as our conceptual framework. It examines the emergence of two distinct developmental pathways in the two countries, focusing on their political economies, in comparative historical perspective. It also evaluates the implications of the rise of China and India on the global economy.

MDES UN3632 Introduction to Twentieth-Century South Asian Literature. 3.00 points.

This class offers a survey of major works of twentieth-century South Asian literature. We will read Raja Rao, Rokeya Hossain, Ismat Chughtai, Viswanatha Satyanarayana, Amrita Pritam, and Romesh Gunesequera. Emphasis will be placed on studying the thematic, formal, and stylistic elements of works and developing critical skills necessary for literary analysis. Works will engage with questions of nation # nationalism, gender # sexuality, caste, environment, and literary history

MDES UN3644 Visual Cultures of Modern South Asia. 3 points.

This lecture course introduces students to the power and meaning of popular visual cultures of South Asia. Visual culture is a crucial arena for the enactment of social transformations and the creation of collective imaginaries. We will track such varied modern media types as calendar art, photography, film, architecture, clothing, and religious festivals, loosely following key chronological signposts in the shared histories of the subcontinent. Together, we will practice a new way of understanding history and society – a visual way that will make us aware of the diversity of hopes, fears, and dreams that comprise South Asia. Designed for students with a basic understanding of South Asian history, the course aims to familiarize you with key methodological approaches in visual culture studies and current debates in South Asian art history and media theory.

ANTH UN3661 South Asia: Anthropological Approaches. 4 points.

This course draws on ethnography, history, fiction, and other genres to think about diverse peoples and places in the region known as South Asia. Rather than attempt to fix or define "South Asia" as a singular category, we will explore how particular social and scholarly categories through which dimensions of South Asian life have come to be known (such as caste, class, religion, gender, sexuality, disability, and kinship) are experienced, negotiated, and reworked by actual persons in specific situations. By examining both categories and practices, we will ask: What kinds of relationships exist between the messiness of everyday life and the classifications used by both scholars and "local" people to describe and make sense of it? How do scholarly and bureaucratic ideas not merely reflect but also shape lived realities? How do lived realities affect the ways in which categories are named and understood? In addressing such questions, categories sometimes thought of as stable or timeless emerge as, in fact, contingent and embodied.

HIST UN3803 THE MUGHAL MEMOIRS. 4.00 points.

The early sixteenth century rise of the Mughal authority in North India coincided with the arrival of the Portuguese in South India, the emergence of Safavid empire, and the dominance of the Ottoman empire. Within the first hundred years, even more claimants to imperial power in India – the British, the French, the Rajput, the Maratha – were engaged in political negotiations, resistance and accommodation with the Mughal. We will follow the course of the development of Mughal political thought, economic and environmental impact and courtly culture through to their official demise in 1857. The first four emperors of Mughal India left various accounts for us. Babur (r. 1525–1530), the founder of the dynasty, wrote an autobiography. Memoirs of the second, Humayun (r. 1530–1556), were written by his sister, and others in his army. The third, Akbar (r. 1556–1605) was the subject of the most amazing regnal history– written by his minister and aide Abu'l Fazl. His son Jahangir (r. 1605–1627), recorded his daily activities and thoughts in his own journal that was published by him. To best engage with this complex universe, we will use the semantic vocabulary of 'seeing'. This course will delve into how Mughal emperors saw their world and how they narrated it. This course is almost exclusively focused on primary readings. We will read large portions of the texts written by the Mughal elite. We will read them to examine their treatment of sacral landscape, nature and environment, gender, social networks, power and violence, agency and interiority, performativity, usage of history and memory. This focus on memoir and autobiographical writing would allow us to delve far deeply into the socio-cultural worlds of the Mughal then is possible via a perfunctory reading of secondary sources

HIST BC3825 RACE, CASTE, AND THE UNIVERSITY: B. R. AMBEDKAR AT COLUMBIA. 4.00 points.

B. R. Ambedkar is arguably one of Columbia University's most illustrious alumni, and a democratic thinker and constitutional lawyer who had enormous impact in shaping India, the world's largest democracy. As is well known, Ambedkar came to Columbia University in July 1913 to start a doctoral program in Political Science. He graduated in 1915 with a Masters degree, and got his doctorate from Columbia in 1927 after having studied with some of the great figures of interwar American thought including Edwin Seligman, James Shotwell, Harvey Robinson, and John Dewey. This course follows the model of the Columbia University and Slavery course and draws extensively on the relevant holdings and resources of Columbia's RBML, [Rare Books and Manuscript Library] Burke Library (Union Theological Seminar), and the Schomburg Center for Research in Black Culture among others to explore a set of relatively understudied links between Ambedkar, Columbia University, and the intellectual history of the interwar period. Themes include: the development of the disciplines at Columbia University and their relationship to new paradigms of social scientific study; the role of historical comparison between caste and race in producing new models of scholarship and political solidarity; links between figures such as Ambedkar, Lala Lajpat Rai, W. E. B. Du Bois and others who were shaped by the distinctive public and political culture of New York City, and more. This is a hybrid course which aims to create a finding aid for B. R. Ambedkar that traverses RBML private papers. Students will engage in a number of activities towards that purpose. They will attend multiple instructional sessions at the RBML to train students in using archives; they will make public presentations on their topics, which will be archived in video form; and students will produce digital essays on a variety of themes and topics related to the course. Students will work collaboratively in small groups and undertake focused archival research. This seminar inaugurates an on-going, multiyear effort to grapple with globalizing the reach and relevance of B. R. Ambedkar and to share our findings with the Columbia community and beyond. Working independently, students will define and pursue individual research projects. Working together, the class will create digital visualizations of these projects

CPLS GU4111 World Philology. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Philology, broadly defined as the practice of making sense of texts, is a fundamental human activity that has been repeatedly institutionalized in widely separated places and times. In the wake of the formation of the modern academic disciplines in the nineteenth century and their global spread, it became difficult to understand the power and glory of older western philology, and its striking parallels with other pre- and early modern forms of scholarship around the globe. This class seeks to create a new comparative framework for understanding how earlier generations made sense of the texts that they valued, and how their practices provide still-vital models for us at a time of upheaval in the format and media of texts and in our scholarly approaches to them. Students will encounter key fields of philology—textual criticism, lexicography, grammar, and, above all, commentary—not in the abstract but as instantiated in relation to four foundational works—the Confucian Analects, the Rāmāyaṇa of Vālmīki, the Aeneid, and the Tale of Genji—and the scholarly traditions that grew up around them. We are never alone when we grapple with the basic question of how to read texts whose meaning is unclear to us. Over the course of the semester, this class will foster a global understanding of the deep roots and strange parallels linking contemporary reading and interpretation to the practices of the past.

RELI GU4228 South Asia and the Secular. 4 points.

This seminar explores different contestations and inflections of the secular in South Asia. We will begin by tracing a genealogy of the secular, which gave rise to a particular discursive grammar. Grounding ourselves in this formative space of the secular, we will study the constitutive nature of imperialism within the secular by examining the disciplining and conscripting role of Orientalism and the colonial state. Though noting these changes produced by colonial rule, this course also explores the arguments scholars of South Asia have made distinguishing between “secularisms” and the production of a tolerant and cosmopolitan South Asian orientation. In conjunction and against these possibilities, rather than consider the religious retrograde or communal, we will consider the continual striving toward political autonomy through disputation in the parameters of a given tradition—which resist incorporation into a broader pluralist or syncretic Indic model.

RELI GU4317 Islam in Southeast Asia. 4.00 points.

Despite the fact that a fifth of the world’s Muslim population lives in Southeast Asia, the region is often considered peripheral to or insignificant for the study of Islam more broadly. In this course, we will not only learn about Islamic thought and practice in the history and present of this important part of the Islamic world; we will also reflect on issues that, while grounded in the Southeast Asian context, illustrate a variety of key Islamic Studies issues. The first half of the course will provide a historical overview over the development of Islam in Southeast Asia while the second half will focus on contemporary issues. The Malay-Indonesian world, home to 90% of Southeast Asia’s Muslims, will be our primary focus. Our approach will be interdisciplinary, incorporating anthropological, historical, and media studies approaches. Students in this class are expected to have some prior knowledge of Islam

RELI GU4318 INTERPRETING BUDDHIST YOGA. 4.00 points.

Students and scholars approaching a vast amount of primary and secondary literature, as well as accounts and anthropological and sociological studies of Buddhism as a lived religion, are faced with an array of stories, data, theories and practices, many of which appear to be inconsistent with others. We try to make sense of these by interpreting them. The art or science of interpretation – “hermeneutics” after Hermes – has a long history in Asia and in the West. Buddhism itself has a tradition of hermeneutics, as does each of the Western religious traditions and Western philosophy and law, starting with Plato and Aristotle, becoming “romantic” with Schleiermacher, and “modern” with Heidegger, Gadamer, and Ricoeur. Today’s Western hermeneutics has become largely de-regionalized from specific subject areas, and has been extended to the interpretation of all human experience. After a grounding in traditional Buddhist and Western hermeneutic principles, we will focus on a number of aspects of Buddhism, including the central question of whether there is a “self” or not, and on esoteric Buddhist yoga, Tantra, central to several of the better-known forms of Buddhism today, including Tibetan Buddhism. Here we will witness the confluence and, sometimes, collision of traditional Buddhist and Tantric hermeneutics focusing in large part on “spiritual” concerns, and the Western tradition, with its emphasis on economics, power, and gender. In thinking about which interpretations are “right” – indeed, whether any interpretation can be “right,” and, if so, “how much?” – we will consider the cultures in which these scriptures and practices originated, as well as ourselves and our own contemporary perspectives, insights, presuppositions and prejudices. A primary concern of hermeneutics is the interpretation of so-called “objective” physical and subjective mental realities. In thinking about the hermeneutics of outer and inner time and space, towards the end of the semester we will consider whether the “objective” and the “subjective” intersect, how much, and look at some descriptions of quantum mechanics and the role of observation of physical reality there, and analogize and contrast those to and with some Buddhist systems of philosophy and practice

Since the ascent of Narendra Modi as Prime Minister of India in 2014, Hindu nationalism has dominated headlines concerning India across the globe. However, the influence that Hindu nationalism has had in shaping beliefs about citizenship, belonging, religion, and the nation has a history that predates the Modi regime by around a hundred and fifty years. This class will examine the history of Hindu nationalism from the nineteenth to the twenty-first century by examining primary texts and academic analysis. This class will not only read the writings of key Hindu nationalist thinkers but will also examine how different media and technologies have affected how Hindu nationalists communicate with different publics. In particular, this class will examine topics such as space/ geography, caste and community, gender, technology and media, and diasporic Hindutva

MDES GU4634 Sound and Listening Cultures of the Indian Subcontinent. 4.00 points.

This course will explore major themes in the growing field of Sound Studies with a focus on the rich history of sound and varied cultures of sound and listening in the Indian subcontinent. The main questions that we will address include: how have political, commercial, and cultural movements shaped what the diverse populations of South Asia listen to and how they listen? How have different forms of media shaped/ informed listening experiences in South Asia? How do listening practices and cultures from the subcontinent differ from those in other regions? In this class we will listen to the human voice, rumor/gossip, gramophone, loud speakers, radio, film, and mp3. We will discuss the role political speeches, film songs, and devotional songs in shaping South Asian politics and culture in the twentieth-century as the subcontinent transitioned from colonial rule to nation-states. Drawing on the interdisciplinary nature of Sound Studies, we will read works from across the disciplines—anthropology, ethnomusicology, Religious Studies, Media Studies, and history. Organized thematically, this course will focus on the twentieth century, but the readings will address earlier time periods. This is an upper-level undergraduate and graduate (MA) seminar. Students are expected to have some background in South Asian studies/history or media/sounds studies. The class will meet once a week for discussion of readings. In addition to readings there will be a several required film screenings or listening activities

MDES GU4652 MUGHAL INDIA. 4.00 points.

The Mughal period was one of the most dynamic eras in world history, when India was the meeting place of many cultures. Of Timurid ancestry, the earliest Mughal rulers drew upon the heritage of Central Asia in their ruling styles and cultural practices, but they would soon adapt to the complexities of their Indian milieu, which had longstanding traditions that were a blend of Sanskrit and Persian, Hindu and Muslim idioms. European culture, whether filtered through Jesuit sermons, itinerant merchants, or Flemish engravings, was also making inroads into India during this period. This course is a broad cultural history of Mughal India as seen from a range of perspectives and sources. We consider the Mughals' major achievements in visual culture as manifested in painting and architecture, as well as exploring diverse topics in religion, literature, politics, and historiography. Yet another approach is to listen to the voices of the Mughal rulers as recorded in their memoirs, as well as investigating the signal contributions of the dynasty's women.

MDES GU4654 Gender, Power and Culture in Early Modern India. 4 points.

Explores gender, culture, power in India, c. 1500-1800 by reading theoretical works on gender and sexuality, historical scholarship relevant to early modern India, and a variety of primary sources. Topics include morality, mysticism, devotion, desire, kingship, heroism, homosocial relations, and homoerotic practices. The focus is largely on Persianate contexts, in conversation with broader South Asian and Islamic studies. This discussion seminar is designed for graduate and advanced undergraduate students, with some previous background in South Asian, Islamic, or gender studies.

MDES GU4840 Gender and Religion in Post-Colonial South Asia (1947-2020). 4.00 points.

This course will examine various roles that a religion can play in shaping its believers' socio-cultural and political identities on the basis of their natural/social differences i.e. sex and gender. An attempt will be made to search for historical explanations of gendered identities and social anxieties in the context of various religious beliefs of communities living in the South Asian region. Following a series of historical events combined with theoretical approaches which had emerged after the departure of the colonial rulers, this course will explore the following themes; (a) role of religion in construction of post colonial state and question of gender; (b) formation of state policies and challenges of existing realities; (c) representation or absence of women in post colonial political institutions. The central argument of the course is that, for historical understanding of a set of beliefs and practices regarding gender relations and women's status in any religious group, one needs to examine the historical context and socio-economic basis of that particular religion. By using the notion of gender, class and historical feminist discourses as tools of analysis, this course intends to understand and explain existing perceptions, misperceptions, myths and realities regarding gender relations and South Asian women's situations in the colonial past which has shaped their post colonial present. It is crucial to understand Intersectionality of institutions of authority such as, patriarchal state and controlling religious beliefs that have shaped and continue to reshape "womanhood" in South Asia. In this context, it is necessary to examine how women have challenged, questioned and resisted their subservient status through confrontation, reinterpretation and negotiation in the world of academia and media. This course revolves around a few major questions; How have the texts and re-interpretations constructed Hindu, Muslim and Buddhist femininity and masculinity? How have post colonial states and communities applied religious texts to control women's body and sexuality? How have the institutions of authority kept alive customs and traditions of veiling, segregation, family honor, sexual "purity" etc.? How have the colonial and post colonial politics affected women's mobility and space in public and private? How can historical re-reading of the religious texts challenge the role of patriarchy and misogyny in the South Asian politics, culture and education? It is expected that this course will enable students to (a) understand the main assumptions of gender and feminist theories and their importance in the study of history of religion; (b) acquire knowledge of the historical contexts, textual teachings and actual practices related to gender and women's lives in South Asia; (c) analyze existing situations and current practices regarding gender issues in these regions; and (d) compare various scholarly inquiries, feminist discourses and conforming/confronting voices of South Asian women emerging in the regional and global contexts

RELI GR9330 THEOR-TRANSMISSN/COMMUN FORMN. 4.00 points.

Intended as the foundation course for graduate students in Religion who are focusing on the Transmission zone of inquiry. Graduate students in the other departments are also welcome.

Prerequisites: the instructor's permission.

This is a course designed for first- and second-year graduate students who are interested in the issue of community formation, lineage, genealogy, transmission, and translation, whether textual or cultural. Course texts will be a combination of theoretical interventions and case studies drawn from major religious traditions. The learning goals of the course are the following: (1) to introduce seminal interpretive and/or methodological issues in the contemporary study of transmission; (2) to read several theoretical "classics" in the field, to provide a foundation for further reading; (3) to sample, where possible, new writing in the field; and (4) to encourage students to think of ways in which the several issues and authors surveyed might provide models for their own ongoing research work

MDES UN2000 ETHNICITY, RACE, IDENTITY IN THE PRE-MODERN MIDDLE EAST. 4.00 points.

This seminar investigates the concepts of ethnicity, race, and identity, in both theory and practice, through a comparative survey of several case studies from the Pre-Modern history of the Middle East. The course focuses on symbols of identity and difference, interpreting them through a variety of analytical tools, and evaluating the utility of each as part of an ongoing exploration of the subject. The survey considers theories of ethnicity and race, as well as their critics, and includes cases from the Ancient World (c. 1000 BCE) through the Old Regime (c. 1800 CE). Students in this course will gain a familiarity with major theories of social difference and alterity, and utilize them to interpret and analyze controversial debates about social politics and identity from the history of the Middle East, including ancient ethnicity, historical racism, Arab identity, pluralism in the Islamic Empire, and slavery, among others. In addition, students will spend much of the semester developing a specialized case study of their own on a historical community of interest. All of the case studies will be presented in a showcase at the end of the semester. All assigned readings for the course will be in English. Primary sources will be provided in translation. The course meets once a week and sessions are two hours long

MDES UN2006 What is Islam?. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

One in four people in the world is a Muslim. Yet, here in the Western hemisphere, we mostly know next to nothing about Islam and its followers. Whatever is spread around as knowledge of this culture and religion is the work of a media that is highly politicized and biased, often perpetuating negative and even racist images of Muslims and their ways of life. This picture becomes even more complicated and complex in academia, in the West in particular but in Islamic countries as well. The story of "What is Islam?" begins in the 19th century, when the bulk of the Muslim world fell under European control, be it direct colonialism or (remote-control) coloniality. Almost everywhere, so-called reform was undertaken, with the view of modernizing institutions and subjectivities along Western lines. With secularization and unprecedented forms of politics and political organization, Islamic cultures all over the world began to undergo epistemic transformations, leading to a wholesale reevaluation of the Islamic traditions themselves, and their meaning in late modernity. Various groups would attempt to redefine Islam in fundamentalist terms – in unconscious emulation of American Fundamentalist movements – while others took it in different directions, not excluding Marxism, socialism, and nationalism. But the hegemonic and almost "natural" force driving the Islamic world over the last half century has been liberalism, a powerful way of seeing and evaluating the world that deeply affected even the Islamist movements. Islam for modern Muslims has become many disparate things, often if not always incompatible with each other

MDES UN2399 ANCIENT NEAR EASTERN LITERATURE. 4.00 points.

This colloquium is a course on many influential texts of literature from Ancient Near Eastern cultures, including Sumerian, Egyptian, Babylonian, Assyrian, Hittite, Canaanite, and others. The emphasis is on investigating the literary traditions of each culture – the subject matter, form, methods, and symbolism – that distinguish them from one another and from later traditions of the Middle East. The course is not a "civilization" course, nor is it a history class, although elements of culture and history will be mentioned as necessary. The course is intended to provide a facility with, and an awareness of, the content and context of ancient works of literature in translation from the Ancient Middle East. Students in this course will gain a familiarity with the major cultures of the Ancient Middle East, the best known and most remarked upon stories, and the legacy of those works on some later traditions. The course is organized thematically in order to facilitate comparison to the materials in similar courses at Barnard and Columbia. The approach will be immediately familiar to students who have previously taken Asian Humanities (AMEC) or Literature-Humanities (Core), but the course does not require any previous experience with literature or the Ancient Near East and is open to everyone. All assigned readings for the course will be in English. The course meets once a week and sessions are two hours long

MDES UN2650 GANDHI # HIS INTERLOCUTORS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Gandhi is in two senses an extraordinary figure: he was the most important leader of anti-imperialist movements in the twentieth century; yet, his ideas about modernity, the state, the industrial economy, technology, humanity's place in nature, the presence of God - were all highly idiosyncratic, sometimes at odds with the main trends of modern civilization. How did a man with such views come to have such an immense effect on history? In some ways, Gandhi is an excellent entry into the complex history of modern India - its contradictions, achievements, failures, possibilities. This course will be primarily a course on social theory, focusing on texts and discursive exchanges between various perceptions of modernity in India. It will have two parts: the first part will be based on reading Gandhi's own writings; the second, on the writings of his main interlocutors. It is hoped that through these exchanges students will get a vivid picture of the intellectual ferment in modern India, and the main lines of social and political thought that define its intellectual culture. The study in this course can be followed up by taking related courses in Indian political thought, or Indian politics or modern history. This course may not be taken as Pass/D/Fail

MDES UN3046 The Intersectional Politics of Religion. 3 points.

The Islamic veil controversy in France, the Rohingya crisis in Myanmar, the Kashmir lockdown, the lynching of Dalits in India – all seem to be connected through the ideas of ‘religion’, and certain religious identities as the basis for violence. What is the understanding of the religious that seems to be the operative factor in these events? Is it a singular concept of religion or are there different connotations of this category? For instance, how do we understand religion when it bifurcates the women’s movement between Western ‘secular’ women and non-Western ‘Muslim’ women? Is it the same concept when we identify ‘religion’ as the basis for the harmonious coexistence of Hindus and Muslims among certain non-elite communities in India? In this course, we ask if it even possible to understand, ‘religious’ events in the modern political world, *without* asking what other categories implicitly inform our notion of the religious – such as, gender, caste, culture, race and historiography. We move beyond the strict dichotomy, of religion and secularism, as something given and unproblematic. Drawing from examples and events in modern South Asia as well as other postcolonial contexts, we attempt to respond to the concepts, contradictions, and dilemmas that accompany the question of when and how the religious becomes the political in the modern world.

Our weekly sessions will be devoted to reading texts from various disciplines and analyzing how the main argument is formulated and how that relates to a critique of the concept of religion in modern South Asia. Some weeks the scholarly texts will be supplemented by primary texts/case studies that will serve as direct demonstration of the problems that will be explored in the course. The engagement with sources from various disciplines will expose us to interdisciplinary content as well as diverse methods of critical analysis and argumentation. It will also help acquire the practice of identifying the central argument of the text, understand how the broad argument is actually formulated through smaller steps, and achieve the analytic skill to critically locate that single argument within a larger body of scholarship.

CLME UN3221 ARABIC LITERATURE AS WORLD LITERATURE. 4.00 points.

This seminar focuses on Arabic literature in the world, as World Literature. The focus will be on pre-modern and modern Arabic literary works that traveled and circulated and were adapted to and acquired individual meanings in different cultures. We will look at literary works that achieved ‘worldliness’ through either writing back to the center or through international literary prizes. We will consider how literary works travel and circulate through their fusion with regional concepts, or even take on new meanings at different times and places. Admittedly, also, we will look into the strengths, weaknesses, and criticism surrounding World Literature

MDES UN3251 The Ancient Sciences in Medieval Islamic World. 3 points.

“#Ulūm al-awā’il”, or the “Science of the Ancients” was one of the many names given to the body of knowledge that the Islamic civilization inherited from the Ancient Greek nature-knowledge system. By the end of the 10th century CE the Islamic civilization had appropriated many branches of the Greek knowledge, including cosmological philosophy, mathematics, astronomy, alchemy, music, and medicine among other disciplines. While some of these disciplines, such as cosmological philosophy, were heavily opposed by proponents of traditional sciences (Qur’anic exegesis, Hadith scholarship, Arabic grammar, etc.), many of them became legitimate fields of knowledge for Muslim intellectuals and scholars for many centuries until the dawn of modern science. With the advent of modern science, some of these disciplines, such as mathematics and astronomy, were absorbed in the new scientific paradigm as “exact sciences”; many others were relegated to the domain of “occult sciences”. This course aims at surveying the “Ancient sciences” in medieval Islam by studying several of these disciplines, both “exact” and “occult”.

MDES UN3260 RETHINKING MIDDLE EAST POLITCS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines a set of questions that have shaped the study of the politics of the modern Middle East. It looks at the main ways those questions have been answered, exploring debates both in Western academic scholarship and among scholars and intellectuals in the region itself. For each question, the course offers new ways of thinking about the issue or ways of framing it in different terms. The topics covered in the course include: the kinds of modern state that emerged in the Middle East and the ways its forms of power and authority were shaped; the birth of economic development as a way of describing the function and measuring the success of the state, and the changing metrics of this success; the influence of oil on the politics of the region; the nature and role of Islamic political movements; the transformation of the countryside and the city and the role of rural populations and of urban protest in modern politics; and the politics of armed force and political violence in the region, and the ways in which this has been understood. The focus of the course will be on the politics of the twentieth century, but many topics will be traced back into developments that occurred in earlier periods, and several will be explored up to the present. The course is divided into four parts, each ending with a paper or exam in which participants are asked to analyze the material covered. Each part of the course has a geographical focus on a country or group of countries and a thematic focus on a particular set of questions of historical and political analysis

CLME UN3266 Decolonizing the Arabian Nights. 4.00 points.

In a unique revival of interest, the Arabian Nights has made its way to the academy as the handiest and most approachable cultural commodity. Courses are given on its history, translation, media reproduction, Walt Disney's appropriation, and, occasionally, narratology. By the end of the 19th century, it was available in translation or abridgement in every written language. This course resituates its advent and vogue in specific cultural contexts that closely relate to the rise of the bourgeoisie and the colonial enterprise. It also explores popular and intellectual or critical responses in terms of the rise of literary theory and modes of literary production. Its massive presence gives way in time to pantomime, parody, and pastiche, before engaging again the attention of prominent writers and theorists of 'prose poetics' and the fantastic. Its referential popular presence undergoes fluctuations to fit media stereotypes and hegemonic regimes of thought. This course attempts to dislodge originals from adaptations, highlight the nature of entry in terms of a commoditizing enterprise that reproduces the Arabian Nights as a 'western text', a point that in turn incites a counter search for manuscripts, and 'authentication' processes. Originals and translations will be compared and cinematic or theater productions will be studied, along with paintings, covers, and tourist guides that present the Nights as a commodity in a post-industrial society

MDES UN3331 URBAN SPACE # CONFLICT IN MIDDLE EAST. 3.00 points.

This course explores how civil war, revolution, militarization, mass violence, refugee crises, and terrorism impact urban spaces, and how city dwellers engage in urban resilience, negotiate and attempt to reclaim their right to the city. Through case studies of Beirut (1975-present), Baghdad (2003-present), Cairo (2011-present), Diyarbakir (1914-present), Aleppo (1914-present), and Jerusalem (1914-present), this course traces how urban life adjusted to destruction (and post-conflict reconstruction), violence, and anarchy; how neighborhoods were reshaped; and how local ethnic, religious, and political dynamics played out in these cities and metropolises. Relying on multi-disciplinary and post-disciplinary scholarship, and employing a wealth of audiovisual material, literary works, and interviews conducted by the instructor, the course scrutinizes how conflicts have impacted urban life in the Middle East, and how civilians react to, confront, and resist militarization in urban spaces

MDES UN3422 Infrastructures of Power: Development, Environment, Political Struggle. 3.00 points.

Is infrastructure political? Can infrastructure colonise, dispossess, and cause environmental ruin? We tend to think of infrastructure as useful objects, but can we think of them as built ideologies? Historically, infrastructural projects have been regarded as necessary preconditions of modern and efficient states. So much so that malfunctioning sewers and perennial power cuts have come to invoke images of starved and underdeveloped countries. However, the question of whether infrastructure itself fuels human and environmental underdevelopment is rarely asked. This course proposes a new way of thinking about infrastructure. By studying the histories of various infrastructural projects in the Middle East, we will critically assess their role as sites of political contestation rather than as "neutral technologies". Infrastructure has been used by colonial states to exploit the natural resources of colonised territories and to control the populations they ruled. At the same time, infrastructure is crucial in the formation of radical political identities and rich cultures and traditions of political struggle. Yet, not all infrastructure is the same. By paying attention to the material qualities and specific cultural and ideological history of each form of infrastructure we study, we will be able to understand how different forms of infrastructure create and foreclose different political possibilities

CPLT BC3552 The Arabic Novel. 4.00 points.

The novel in Arabic literature has often been the place where every attempt to look within ends up involving the need to contend with or measure the self against the European, the dominant culture. This took various forms. From early moments of easy-going and confident cosmopolitan travellers, such as Ahmad Faris al-Shidyaq, to later author, such as Tayeb Salih, mapping the existential fault lines between west and east. For this reason, and as well as being a modern phenomenon, the Arabic novel has also been a tool for translation, for bridging gaps and exposing what al-Shidyaq—the man credited with being the father of the modern Arabic novel, and himself a great translator—called ‘disjunction’. We will begin with his satirical, deeply inventive and erudite novel, published in 1855, *Leg Over Leg*. It is a book with an insatiable appetite for definitions and comparisons, with Words that had been lost or fell out of use (the author had an abiding interest in dictionaries that anticipates Jorge Louis Borges) and with locating and often subverting moments of connection and disconnection. We will then follow along a trajectory to the present, where we will read, in English translation, novels written in Arabic, from Egypt, Syria, Sudan, Morocco and Palestine. We will read them chronologically, starting with *Leg Over Leg* (1855) and finishing with *Minor Detail*, a novel that was only published last year. Obviously, this does not claim to be a comprehensive survey; for that we would need several years and even then, we would fall short. Instead, the hope is that it will be a thrilling journey through some of the most fascinating fiction ever written. Obviously, this does not claim to be a comprehensive survey; for that we would need several years and even then, we would fall short. MDES UN3920 CONTEMP CULTURE IN ARAB WORLD. 3.00 points.

Prerequisites: the instructor's permission.

This seminar, designed for seniors, aims to acquaint students with the notion and theoretical understanding of culture and to introduce them to a critical method by which they can study and appreciate contemporary culture in the Arab World. The seminar will survey examples of written and cinematic culture (fiction and autobiography), as well as music, dance, and literary criticism in the contemporary Arab world. Students will be reading novels, autobiographies and literary criticism, as well as watch films and listen to music as part of the syllabus. All material will be in translation. Films will be subtitled. Songs will be in Arabic

MDES UN3930 Iraq: War, Love, and Exile. 3.00 points.

This course studies and explores a number of Iraqi narratives that have appeared since 2003 and that have a distinctive stylistic and thematic richness with great bearing on social, economic, cultural, and political life in Iraq. Seen against a history of the country and the region, and in conversation with some Afro-Asian and Latin American narratives of war and displacement, these writings assume global significance in our reading of such thematic issues like war, love, exile, and loss. While always using the past as a background, a source and repository of recollections, the challenge of the 2003 Anglo-America invasion and its institutionalization of segregation and rupture to keep Iraq in perpetual chaos, is present in the texts. Every narrative sheds light on a number of issues, especially war, horror, loss, trauma, passion and dislocation. This richness in detail is brought up through a number of stylistic innovations that put this writing at the forefront of world cultures and human concerns. An introductory lecture builds up a genealogy for trauma since the Epic of Gilgamesh (2700 BC.) and the lamentations of Astarte

ANTH UN3933 ARABIA IMAGINED. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

As the site of the 7th century revelation of the Quran and the present day location of the sacred precincts of Islam, Arabia is the direction of prayer for Muslims worldwide and the main destination for pilgrimage. Arabia also provides a frame for diverse modes of thought and practice and for cultural expression ranging from the venerable literature of the 1001 Nights to the academic disciplines of Islam and contemporary social media, such as Twitter. We thus will approach Arabia as a global phenomenon, as a matter of both geographic relations and the imagination. While offering an introduction to contemporary anthropological research, the course will engage in a critical review of related western conceptions, starting with an opening discussion of racism and Islamophobia. In the format of a Global Core course, the weekly assignments are organized around English translations of Arabic texts, read in conjunction with recent studies by anthropologists

MDES UN3960 HONORS THESIS SEMINAR PART 1. 1.00 point.

Prerequisites: minimum GPA of 3.5 in MESAAS courses. The MESAAS honors seminar offers students the opportunity to undertake a sustained research project under close faculty supervision. The DUS advises on general issues of project design, format, approach, general research methodologies, and timetable. In addition, students work with an individual advisor who has expertise in the area of the thesis and can advise on the specifics of method and content. The thesis will be jointly evaluated by the adviser, the DUS, and the honors thesis TA. The DUS will lead students through a variety of exercises that are directly geared to facilitating the thesis. Students build their research, interpretive, and writing skills; discuss methodological approaches; write an annotated bibliography; learn to give constructive feedback to peers and respond to feedback effectively. The final product is a polished research paper in the range of 40-60 pages. Please note:

This is a one-year course that begins in the fall semester (1 point) and continues through the spring semester (3 points). Only students who have completed both semesters will receive the full 4 points of credit

MDES GU4049 Climate and Empire. 4.00 points.

Climate change destabilizes the ontic certainty of this world, time, and history. This course in MESAAS will introduce students to the literature on climate change and its relationship to ontology, religion, violence, politics, and gender. We will explore the resilience and limitations of various theoretical approaches as they relate to empirical cases. Students will become familiarized with important arguments that have been advanced to explain climate change in its more recent incarnations in the Middle East and Asia. How have different trajectories of understanding climate change led to different kinds of political cultures and governing institutions? Have some qualities of the "environment" or "climate" remained the same throughout history and across the globe? What is the role of colonialism in modern understandings of climate change? The core of this course will seek to develop a mode of conceptualizing the present by rendering relevant geological time in addition to historical time, earth's history in addition to world's history. The course begins with the question of how the "climate" has been historically and ethnographically conceptualized in various intellectual trajectories of human sciences. We consider how religion is connected to environmental change, how the "human" and "non human" are conceptualized in various ontologies, and how religious norms and ethics enact environmental practices. We interrogate the everyday sociality of climate adaptation and how climate conflict informs social, political, and environmental citizenship. The course concludes by contemplating the creative ways of being in this new world. We study the innovative forms of cosmopolitan neo-humanism (post-humanism) that emerge from the specter of environmental change

MDES GU4151 DEBATES ON CAPITALISM. 4.00 points.

Within the literature on the history of capitalism there is a lively debate that seeks to explain the world-historical transition from feudal and tributary modes of production to the capitalist mode of production. Substantial issues raised in this debate include the question of whether capitalism can be characterized as a mode of production dominated by the exploitation of free labour; the role of international trade in the origin and development of capitalism; and the role of agriculture in promoting a transition to capitalism. Through the publication of two key texts in the late 1970s Robert Brenner's proposition that capitalism had its origins in English agriculture came to dominate the transition debate. More recently, however, there have been a number of publications that seek to challenge the Anglo-centric and Eurocentric tendencies of the entire transition debate. This course begins with the Brenner debates and then takes up revisions, critiques and challenges to that debate. Ultimately, the aim of the course is to more clearly understand the place of non-European polities and peoples in the history and development of capitalism

MDES GU4226 Arabic Literature # the Long 19th Century. 4.00 points.

What came before the Arabic novel? How did authors writing in Arabic in the 19th century conceive of and debate the terms of modernity and literature? The purpose of this graduate seminar is first to engage with recent trends in scholarship on the Nahda ("Renaissance") and second to read the entirety of three significant works of Arabic literature in translation: al-Shidyaaq's *Leg Over Leg* (1855), Khalil al-Khouri's *Oh No! I am Not European!* (1859-61), and Jurji Zaydan's *Tree of Pearls, Queen of Egypt* (1914). Knowledge of Arabic is not required, but an optional Arabic reading group will run concurrently with the class

CLME GU4231 COLD WAR ARAB CULTURE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies the effects and strategies of the cold war on Arab writing, education, arts and translation, and the counter movement in Arab culture to have its own identities. As the cold war functioned and still functions on a global scale, thematic and methodological comparisons are drawn with Latin America, India and Africa

CLME GU4241 SUFISM: PRIMARY TEXTS/CONTEXTS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course studies Sufism as it has emerged, developed, and assumed its presence in Sufi autobiographies and religious and literary writings. The Sufi Path is traced in these writings that include poems like ibn al-Farid's *Poem of the Way*. Sufi States and Stations are analyzed to understand this Path that reaches its culmination in an ecstatic sense of Oneness. Sufism is also a social and political phenomenon that unsettles formal theologies and involves Sufis in controversies that often end with their imprisonment and death

MDES GU4263 Colonial Encounters: Thinking through Time and Space. 4 points.

This course focuses on issues related to colonial encounters over time, space and geographies. The course is organized around issues that emerge from thinking about the past and present of colonialism and how those encounters affect and frame epistemological as well as ontological questions. We will explore the themes and lines of thought that are helpful in thinking about our contemporary conditions in terms of colonial history. As such, this course examines different types of colonialisms in their various forms and iterations over time and space and their attendant narrations and stories regarding the relationship to the past and present. This course is also about the various ways, means and methods that colonized people(s) confront(ed) colonial violence, domination, and other forms of power. Throughout the semester we ask questions related to histories of colonialisms, comparative colonial settings, settler colonial trajectories, and indigenous responses to settler power. The course will travel in theory and space, in terms of geography and temporality, while prioritizing a focus on the Middle East.

MDES GU4328 The Resilience of Memory: Armenian Genocide in Words and Images. 4.00 points.

Genocide has indelibly marked the last century. Survivors of these crimes have sought justice and reparations, while also struggling to keep alive the memory of all that was lost. Words and images are employed in this struggle. The literary, performing, and visual arts play key roles in resisting the destruction of memory. Genocide is a crime whose aim is not just the annihilation of biological individuals but of social groups and their cultural heritage. Words (in the form of poetry, memoir, drama, fiction) and images (in the form of photography, film, painting) are used to combat the forgetting, the denial, and the distorting of genocidal crimes. This course will explore the ways these forms of memory resilience work in the case of the Armenian Genocide. While often under-appreciated, Armenians began a process of reflection upon and resistance against their cultural loss in the decades after 1915. Yet it took another generation for artists and writers to foreground this resistance in their creative output. In parallel to the Jewish response to the Holocaust, the 1960's and 70's saw the awakening of a greater Armenian public response to the genocide. Along with memorialization and demands for justice, a heightened critical reflection on the meaning of loss took place. Historical studies of the genocide multiplied adding to our understanding of the nature and causes of the violence. Alongside such scholarship the broader discipline of memory studies has immeasurably added to our understanding of 1915. The literature and critical study of the Holocaust and other genocides will help us understand the Armenian resilience of memory. The art and literature we explore will be supplemented by dialogue (in-person or virtually) with writers and artists whose works of resistance continue to be created today

MDES GU4357 WAR,GENOCIDE,# AFTERMATH COMP PERSPECTIV. 4.00 points.

This 4000-level course examines how societies grapple with the legacy of mass violence, through an exploration of historical texts, memoirs, textbooks, litigation, and media reports and debates on confronting the past. Focusing on case studies of the Herero Genocide, the Armenian genocide during WWI, and the Holocaust and the Comfort Women during WWII, students investigate the crime and its sequelae, looking at how societies deal with skeletons in their closets (engaging in silence, trivialization, rationalization, and denial to acknowledgment, apology, and repair); surveying responses of survivors and their descendants (with particular attention to intergeneration transmission of trauma, forgiveness, resentment, and the pursuit of redress); and dissecting public debates on modern day issues that harken back to past atrocities

JWST GU4537 Modernism, Nationalism, Revival: Readings in Modern Hebrew Literature. 4 points.

Exploring a rich variety of literary prose fiction, this course focuses on the emergence of modernism in Hebrew literature at the turn of the 20th century. Ever since the 19th century Jewish Enlightenment (Haskalah), Hebrew literature has played a major role in the processes of permutation and transition within Jewish society, articulating new modes of thinking on matters such as body, identity, sexuality and language. In both its themes and aesthetics, Hebrew literature not only reflected these processes, but in fact created and shaped the public sphere within which these new ideas emerged. Identifying literature as an institution of the modern, intertwined with the rise of nationalism, this course examines the coincidence, as well as the discrepancy, between modernist poetics and the nationalist imagination. It asks how literature constructs national consciousness and whether, and in what ways, it ever exceeds it.

Our weekly sessions will be dedicated to reading diverse texts (short stories, essays, novels and literary theory) and tackling some of the recurring issues they raise, including gender and sexuality, ideology, psychological narratives, secularization and immigration. We will acquire methodologies of literary analysis, pay attention to rhetoric and style and practice close reading. The course will use digital media and interactive online platforms including films, photos, recordings and other audiovisuals, as well as an interactive discussion board. No prior knowledge of Hebrew is required. All texts are available in English translation.

RELI GU4619 Islam in Popular Culture. 4.00 points.

This course interrogates seminal issues in the academic study of Islam through its popular representation in various forms of media from movies and television to novels and comic books. The class is structured around key theoretical readings from a range of academic disciplines ranging from art history and anthropology to comparative literature and religion. The course begins by placing the controversies surrounding the visual depiction of Muhammad in historical perspective (Gruber). This is followed by an examination of modern portrayals of Muslims in film that highlights both the vilification of the “other” (Shaheen) and the persistence of colonial discourses centered on the “native informant” (Mamdani). Particular emphasis is given to recent pop cultural works that challenge these simplistic discourses of Islam. The second half of the course revisits Muhammad, employing an anthropological framework (Asad) to understand the controversies surrounding Salman Rushdie’s Satanic Verses. The obsession with a gendered depiction of Islam is then examined through an anthropological framework that sheds light on the problems of salvation narratives (Abu Lughod). The course ends with a look at the unique history of Islam in America, particularly the tension between immigrant and African-American communities

MDES GU4627 Significant Others. 4.00 points.

What is the relationship between homoeroticism and homosociality? How does this relationship form conceptions of gender and sexuality in ways that might be historically unfamiliar and culturally or regionally specific? We pursue these questions through the lens of friendship and its relationship to ideas and expressions of desire, love, and loyalty in pre-modern times. We begin by considering the intellectual basis of the modern idea of friendship as a private, personal relationship, and trace it back to earlier times when it was often a public relationship of social and political significance. Some of these relationships were between social equals, while many were unequal forms (like patronage) that could bridge social, political or parochial differences. Thinking through the relationships and possible distinctions between erotic love, romantic love and amity (love between friends), we will draw on scholarly works from a variety of disciplinary perspectives, particularly philosophy, sociology, political theory, literature, history, and art history. We will attend to friendship’s work in constituting, maintaining and challenging various social and political orders in a variety of Asian contexts (West, Central, South and East Asian), with comparative reference to scholarship on European and East Asian contexts. Primary source materials will include philosophy, religious manuals, autobiographies, popular love stories, heroic epics, mystical poetry, mirror for princes, paintings, material objects of exchange, and architectural monuments, largely from Islamic and Asian contexts

HIST GU4711 OCCULT IN THE MUSLIM PAST. 4.00 points.

This seminar is designed to explore the rich but sorely understudied occult scientific lore in the pre-modern Islamic world. For over a millennium, from the seventh through even the twenty-first century, and spanning a broad geographical spectrum from the Nile to Oxus, different forms and praxis of occult scientific knowledge marked intellectual and political endeavors, everyday lives and customs, and faith-based matters of individuals constituting the so-called Islamicate world. However, despite the impressive array of textual, material, and visual sources coming down to us from the Muslim past, the topic has been severely marginalized under the post-Enlightenment definitions of scientific knowledge, which also shaped how the history of sciences in the Islamicate world was written in the last century. One of this seminar’s main objectives is to rehabilitate such biased perspectives through a grand tour of occult knowledge and practice appealed in the pre-modern Muslim world. Over the semester, by relying on a set of secondary studies and translated primary sources, we will revisit the question of the marginalization of Islamicate occult sciences, explore the actors’ definitions and discussions about the epistemic value of these sciences, trace their social and political implications in everyday life and imperial politics, and examine the key textual, technical, and material aspects of the occult tradition. In several of our sessions, we will have hands-on practice to better familiarize ourselves with the instructed techniques and methods in different branches of occult sciences. We will also regularly visit the Columbia University Rare Book # Manuscript Library to view texts and materials available in our collection

SOCI GU4801 Israel and the Palestinians. 4.00 points.

The seminar will examine the main political, economic, and social processes that have been shaping contemporary Israel. The underlying assumption in this seminar is that much of these processes have been shaped by the 100-year Israeli-Arab/Palestinian conflict. The first part of the course will accordingly focus on the historical background informing the conflict and leading to the Palestinian refugee problem and establishment of a Jewish, but not Palestinian, state in 1948. The second part of the seminar focuses on Israel's occupation of the West Bank (and Gaza) and the settlement project, as well as on USA's role and its impact on the conflict, the occupation, and Israel. These topics did not get much academic attention until recently, but as researchers began to realize that the Occupation and the West Bank settlements are among the most permanent institutions in Israel, they have come under the scrutiny of academic research. The third part the seminar will concentrate on the development of the conflict after the establishment of Israel and its effects on sociological processes and institutions in contemporary Israel. Analyzing patterns of continuity and change in the past seven decades, we will discuss immigration and emigration patterns, as well as issue relating to ethnicity, gender, religion and politics, and the Israeli military

POLS GU4845 NAT SECURITY STRAT OF MID EAST. 4.00 points.

At the crossroads of three continents, the Middle East is home to many diverse peoples, with ancient and proud cultures, in varying stages of political and socio-economic development, often in conflict. Following the Arab Spring and subsequent upheaval in Egypt, Syria, Iraq, Yemen, Libya and more, the region is in a state of historic flux. The Sunni-Shia rivalry, especially between Saudi Arabia and Iran, growing Iranian-Israeli conflict, population explosion, poverty and authoritarian control, Russian ascendance and US retrenchment, are the primary regional drivers today. Together, these factors have transformed the Middle Eastern landscape, with great consequence for the national security of the countries of the region and their foreign relations. The primary source of the world's energy resources, the Middle East remains the locus of the terror-WMD-fundamentalist nexus, which continues to pose a significant threat to both regional and international security. The course surveys the national security challenges facing the regions primary players (Egypt, Saudi Arabia, Iran, Iraq, Syria, Lebanon, Jordan, Israel, the Palestinians and Turkey,) and how the convolutions of recent years have affected them. Unlike many Middle East courses, which focus on US policy in the region, the course concentrates on the regional players perceptions of the threats and opportunities they face and the strategies they have adopted to deal with them. It thus provides an essential vantage point for those interested in gaining a deeper understanding of a region, which stands at the center of many of the foreign policy issues of our era. The course is designed for those with a general interest in the Middle East, especially those interested in national security issues, students of comparative politics and future practitioners, with an interest in real world international relations and national security

Corequisites: ASCE UN1377 This course provides a survey of Vietnamese civilization from prehistoric origins to the French colonization in the 19th century, with special emphasis on the rise and development of independent kingship over the 2nd millennium CE. We begin by exploring ethnolinguistic diversity of the Red River plain over the first millenium BCE, culminating in the material bronze culture known as the Dong Son. We then turn towards the introduction of high sinitic culture, and the region's long membership within successive Chinese empires. We pay special attention to the rise of an independent state out of the crumbling Tang Dynasty, and the specific nation-building effects of war with the Mongols and the Ming Dynasty, in the 14th and 15th centuries respectively. Our class ends with the French colonization of the region, and the dramatic cultural and intellectual transformations that were triggered as a result. Our course will interrogate Vietnamese culture as a protean object, one that is defined and redefined at virtually every level, throughout a history marked by foreign interest, influence, and invasion

AHIS UN2612 A HISTORY OF CHINA IN 27 OBJECTS. 3.00 points.

This course introduces twenty-seven significant monuments and objects comprising a selective overview of 4000 years of traditional Chinese culture. Through these twenty-seven objects, we will think about historical currents, consider materials (clay, stone, bronze, lacquer, paper, silk, ink, and wood), how things were made, how these objects were used among the living, and why some of them were buried with the dead. Because analogy and metaphor is fundamental to Chinese language, we will examine visual symbols, auspicious imagery and rhetoric of resistance that had their origins in literature. The goal of the course is to raise awareness of visual clues in Chinese art and to establish basic visual literacy. After successfully completing this course you will be better able to articulate a research question, read more critically, write a visual analysis, and impress friends and family as you name a painting used in restaurant décor

AHUM UN2800 Arts of Islam, 700-1000 CE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This lecture course offers a comprehensive and chronological overview of the major masterpieces of art and architecture of the Muslim world between circa 700-1000 AD. Topics concerning the rise of Arabic as the official language of the new Muslim Empire and the aesthetic transformation it went from script to calligraphy, the shaping of sacred spaces and liturgical objects, rulers' iconographies and urban designs, as well as daily-life objects, will be discussed. Mecca, Madina, Jerusalem, Damascus, Fustat (old Cairo), Qayrawan, Cordoba, Baghdad, Samarra, Balkh, Bukhara and early Fatimid Cairo are the major playgrounds to illustrate particular moments of shifting powers and aesthetic paradigms in the early days of the Muslim empire, suggesting a more differentiated picture of the arts of Islam in the age of imagining a world-wide empire. The past narratives for these regions will be critically presented by both looking at the medieval sources and the modern historiographies for these regions and by highlighting the varied ideologies at play. Taking this critical vein of studying the arts of the early Muslim age, past narratives will be reconsidered, while enhancing our awareness to the complicated, if not sometimes manipulated, processes of giving works of arts meanings and values

AHIS UN3503 Contemporary Arts of Africa. 4.00 points.

This course takes up a question posed by Terry Smith and applies it to Africa: "Who gets to say what counts as contemporary art?" It will investigate the impact of modernity, modernism, and increasing globalism on artistic practices with a special focus on three of the major centers for contemporary art in sub-Saharan Africa: Senegal, South Africa, Nigeria. Some of the topics covered will be: the emergence of new media (such as photography or cinema), the creation of "national" cultures, experiments in Pan-Africanism, diasporic consciousness, and the rise of curators as international culture-brokers. The course will examine the enthusiastic embrace by African artists of the biennial platform as a site for the production of contemporary art. What differential impact has French vs. British colonialism left on the arts? How are contemporary artists responding to calls for restitution on African cultural heritage?

AHIS UN3610 Visualizing Japanese Buddhism. 4 points.

It has long been recognized that Buddhism is a religion whose tenets are constantly being absorbed, reinterpreted, and disseminated through images. While artworks exist as compliments to doctrinal thought, they are also integral components to ritual and belief, and can even underpin and inspire new forms of religious thought. This course provides a multi-disciplinary approach to the study of Buddhist art in Japan. Each week, we will focus on one group of related images, studying and analyzing their basic design or composition and material. Then, we will think about their original use, how they served specific ritual functions, or how they promoted certain Buddhist teachings. Themes to be considered include the development of Japanese Buddhist art in relation to the broader East Asian context and to indigenous Japanese religions (Shinto), the role of art and architecture in promulgating larger belief systems, women as Buddhist practitioners and as commissioners of religious art projects, and the deification of historical figures. By the end of this course, students will acquire an understanding of the multiple ways people in the Japanese archipelago interpreted Buddhist art over time, and will learn to evaluate and analyze religious artworks within specific ideological frameworks.

AHIS UN3611 Korean Art in the Age of Global Encounters. 4 points.

This seminar explores the artistic developments in Korea with a focus on its encounter with the arts of China, Japan, and Europe from the fifteenth century to the present. Each class examines case studies the works of a particular artist—to examine the way in which Korean artists developed their distinctive style and established the aesthetic values in response to specific historical junctures. There will be two field trips to the Metropolitan Museum of Art and the Brooklyn Museum.

AHIS UN3621 Rethinking Chinese Painting. 4.00 points.

This seminar reconceptualizes traditional Chinese paintings (hua) through the perspectives of medium and format. The class sections are arranged in chronological order. We will investigate the distinct formats of portable paintings from the 2nd to 18th centuries (including funerary banners, handscrolls, hanging scrolls, albums, screens, and fans) and the representations of paintings of various formats in tombs and other architectural-pictorial contexts. We will probe into the new notions and thoughts presented by the new pictorial formats, and examine how they have been conventionalized and re-developed by later works. The goal is to foreground frame, scale, surface and ground, as carriers as well as boundaries, of image in the discussions of image, and to see painting as the happenings that were schematized and realized by these external, yet also intrinsic, agents. Students will have the chance to peruse the artworks in museum visits, and are expected to do presentations that address the selected pictures with format insights. Class discussions will be both theoretical and object-oriented, exploring the depths of visual analyses on a par with methodological reflection. Reading proficiency in Chinese is recommended, but not a prerequisite

AHIS GU4042 AFR AMER ARTISTS IN 20/21 CENT. 3.00 points.

This course is a survey of visual production by North Americans of African descent from 1900 to the present. It will look at the various ways in which these artists have sought to develop an African American presence in the visual arts over the last century. We will discuss such issues as: what role does stylistic concern play; how are ideas of romanticism, modernism, and formalism incorporated into the work; in what ways do issues of postmodernism, feminism, and cultural nationalism impact on the methods used to portray the cultural and political body that is African America? There will be four guest lectures for this class; all will be held via zoom

MDES GU4347 Origins of Armenian Art: Creating an Identity. 4 points.

Organized around the Metropolitan Museum of Art's international loan exhibition *Armenia!* that will be held during the fall semester 2018, the course will be an interdisciplinary exploration of the creation of a sense of self-identity for the Armenian people through its material culture. Manuscript illuminations, liturgical objects, architectural sculpture, ceramics, textiles and other media will be studied to determine the means by which the Armenian people at the level of elite and popular culture identified themselves and positioned themselves in terms of neighboring, or dominating, cultures and on the trade routes they established across the globe. Emphasis will be laid on the role of religion in Armenian self-identification. Relevant works from other cultures in the Museum's encyclopedic collections will be used for comparative study. Students will do a paper on an Armenian work selected from the exhibition and present an aspect of their research in class. Hands on experience with the Museum's works of art will allow consideration of means of manufacture as well as style and iconography.

AHUM UN2800 Arts of Islam, 700-1000 CE. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This lecture course offers a comprehensive and chronological overview of the major masterpieces of art and architecture of the Muslim world between circa 700-1000 AD. Topics concerning the rise of Arabic as the official language of the new Muslim Empire and the aesthetic transformation it went from script to calligraphy, the shaping of sacred spaces and liturgical objects, rulers' iconographies and urban designs, as well as daily-life objects, will be discussed. Mecca, Madina, Jerusalem, Damascus, Fustat (old Cairo), Qayrawan, Cordoba, Baghdad, Samarra, Balkh, Bukhara and early Fatimid Cairo are the major playgrounds to illustrate particular moments of shifting powers and aesthetic paradigms in the early days of the Muslim empire, suggesting a more differentiated picture of the arts of Islam in the age of imagining a world-wide empire. The past narratives for these regions will be critically presented by both looking at the medieval sources and the modern historiographies for these regions and by highlighting the varied ideologies at play. Taking this critical vein of studying the arts of the early Muslim age, past narratives will be reconsidered, while enhancing our awareness to the complicated, if not sometimes manipulated, processes of giving works of arts meanings and values

AHUM UN2901 MASTERPIECES-INDIAN ART # ARCH. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Introduction to 2000 years of art on the Indian subcontinent. The course covers the early art of Buddhism, rock-cut architecture of the Buddhists and Hindus, the development of the Hindu temple, Mughal and Rajput painting and architecture, art of the colonial period, and the emergence of the Modern

Prerequisites: *AHUM UN3400* is recommended as background.
Introduction to and exploration of modern East Asian literature through close reading and discussion of selected masterpieces from the 1890s through the 1990s by Chinese, Japanese, and Korean writers such as Mori Ogai, Wu Jianren, Natsume Soseki, Lu Xun, Tanizaki Jun'ichiro, Shen Congwen, Ding Ling, Eileen Chang, Yi Sang, Oe Kenzaburo, O Chong-hui, and others. Emphasis will be on cultural and intellectual issues and on how literary forms manifested, constructed, or responded to rapidly shifting experiences of modernity in East Asia

AHIS BC3976 JAPANESE PHOTOGRAPHY. 4.00 points.**AHIS GU4062 Chinese Art: Center and Periphery. 3.00 points.**

This course introduces you to the rich and diverse tradition of Chinese art by focusing on materials and techniques. We will discuss a wide array of artistic media situated in distinct cultural contexts, examining bronzes, jade, ceramics, paintings, sculptures, and textiles in the imperial, aristocratic, literary, religious, and commercial milieus in which they were produced. In addition to developing your skills in visual-material analysis, this course will also acquaint you with the diverse cultures that developed in China's center and periphery during its five thousand (plus) years of history. Emphasis will be placed on understanding how native artistic traditions in China interacted with those in regions such as the Mongolian steppe, Tibetan plateau, and Central Asia

Prerequisites: Auditions are required. Sign up for an audition on MPP website: www.mpp.music.columbia.edu

In collaboration with the Center for Ethnomusicology, MESAAS, Institute for Medieval Japanese Studies and the Louis Armstrong Jazz Performance Program, the Music Performance Program (MPP) offers students the opportunity to participate in various world music ensembles: Arab Music, Bluegrass, Japanese Gagaku/Hogaku, Klezmer and Latin American Music. Each ensemble requires different levels of experience, so please refer to the World Music section of the Music Performance Program website for more info. Please note the Latin American Music Ensemble focuses on two different Latin music traditions: The Afro-Cuban Ensemble meets in the Fall and the Brazilian Ensemble meets in the Spring

MUSI UN2030 JEWISH MUSIC IN NEW YORK. 3.00 points.

Prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard).

Prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard). With the arrival of the first Jewish immigrants in New York in the mid-1600s until today, Jewish music in the City has oscillated between preserving traditions and introducing innovative ideas. This course explores the variety of ways people have used music to describe, inscribe, symbolize, and editorialize their Jewish experience. Along these lines, it draws upon genres of art music, popular music, and non-Western traditions, as well as practices that synthesize various styles and genres, from hazzanut to hip-hop. Diverse musical experiences will serve as a window to address wider questions of identity, memory, and dislocation. We will also experience the Jewish soundscape of New York's dynamic and eclectic music culture by visiting various venues and meeting key players in today's music scene, and thus engage in the ongoing dialogues that define Jewishness in New York. A basic familiarity with Judaism and Jewish culture is helpful for this course, but it is by no means required. You do not need to know Jewish history to take this class, nor do you need to be able to read music. Translations from Hebrew and Yiddish will be provided, and musical analysis will be well explained

The Department of Biological Sciences

Biology explores the structure, function, and evolution of diverse living systems. It addresses some of the most important issues of our time —genetic engineering, stem cell research, obesity, cancer, and the effects of global warming. Majoring in Biology prepares students to pursue a career in research, teaching, or the allied health sciences. It is also relevant to careers as diverse as environmental policy, law, public health, creative writing, and textbook development.

Mission

The mission of the Biology major is to provide students with a broad education in biology. To this end, students are offered a range of lecture courses that span the molecular, physiological, and ecological levels of organization. Students also complete laboratory courses that help them learn how to design and test hypotheses, use modern scientific equipment, and interpret data. Finally, students learn scientific communication skills by critiquing research articles, writing laboratory reports and research papers, and participating in oral presentations and debates. The department encourages students to become involved in a research project under the guidance of a faculty member at Barnard or elsewhere in New York City.

Student Learning Outcomes

Students graduating with a major in Biology should be able to attain the following outcomes:

- Demonstrate an appreciation of the many different life forms on planet Earth.
- Have the ability to discuss a biological phenomenon from many different levels of organization (e.g., discuss HIV from the perspective of structure to host immune response to evolutionary and epidemiological issues).
- Describe the basic features of Mendelian genetics and the central dogma of molecular biology; understand the basic physiological processes of at least one organism; and demonstrate an understanding of population-level processes.
- Make an oral presentation on either an original research project or a published primary research paper.
- Generate a testable hypothesis and develop and execute a controlled experimental design.
- Write an original scientific paper and/or a review article.

Research

Students are strongly encouraged to engage in research at Barnard. One or both year-long courses, BIOL BC3591 / BIOL BC3592 Guided Research & Seminar and BIOL BC3593 / BIOL BC3594 SENIOR THESIS

RESEARCH # SEMINAR, may be used to fulfill major requirements. The variable-credit semester-long course, BIOL BC3597 GUIDED RESEARCH, may be used for degree credit.

In addition to conducting research during the academic year, students are encouraged to pursue summer research internships. Barnard faculty engage many students in paid research projects during the summer through the [Summer Research Institute \(SRI\)](#) at Barnard. The departmental office also has information about summer internships outside of Barnard. In addition, the department awards funds on a competitive basis to support summer research not otherwise funded by internships.

Introductory Course Selection

The Biology Department offers several options at the introductory level. Students should select courses on the basis of their preparation and background in biology.

Students who took advanced biology in high school should enroll in the 1500-level sequence. This sequence can be started either in the fall [Introduction to Organismal & Evolutionary Biology: BIOL BC1500 (Lecture) and BIOL BC1501 (Lab)] or the spring [Introduction to Cellular & Molecular Biology: BIOL BC1502 (Lecture) and BIOL BC1503 (Lab)]. This sequence fulfills the science lecture and laboratory portion of the General Education Requirement (GER), as well as the premedical requirement in biology. Please note that the Foundations distributional requirements for the sciences includes two science lecture courses, one of which must include a laboratory, but both do not necessarily need to be taken from the same scientific discipline.

Students with little or no experience in biology should enroll in the 1000-level sequence, which provides an appropriate introduction to important concepts in the field. BIOL BC1002 Global Health and Ecology includes a laboratory component (BIOL BC1012) and BIOL BC1001 REVOLUTIONARY CONCEPTS IN BIOL consists only of a lecture component. Taken together, these courses fulfill the science General Education Requirement. Students who wish to move on to the 1500-level sequence may do so upon completion of one or both of these courses.

Students must complete the entire 1500-level sequence (BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503) for the biology major or minor and for premedical requirements.

AP Course Credit

Students who passed the Advanced Placement examination in biology with a grade of 4 or 5 receive 3 points of credit toward their degree. However, AP credit neither helps fulfill the science GER nor exempts a student from any introductory course.

Requirements for the Major

To declare a major in biology, submit a [major declaration form](#) via Slate.

There are five ways to complete a biology major. These are called "tracks:"

1. General Biology
2. Cellular and Molecular Biology
3. Physiological and Organismal Biology
4. Ecological and Evolutionary Biology
5. Computational Biology.

All tracks within the major must fulfill common foundational and senior capstone requirements. Tracks 2-4 concentrate on a specific level of biological organization. Please refer to the [biology major checklists](#) to see a list of requirements for each version of the biology major.

Introductory Biology Sequence

Every biology major must complete **ALL** of the following introductory biology and genetics courses.

Introductory Biology Fall Offerings:

BIOL BC1500	INTRO ORGANISMAL/EVOL BIOL	3.5
BIOL BC1510	BIOL BC1500 DISCUSSION SECTION (This is a co-requisite for BIOL BC1500.)	
BIOL BC1501	INTRO LAB/ORGANISMAL#EVOL BIO	2
BIOL BC1511	BIOL BC1501 RECITATION (This is a co-requisite for BIOL BC1501. It is asynchronous.)	

Introductory Biology Spring Offerings:

BIOL BC1502	INTRO CELL AND MOLECULAR BIOL	3.5
BIOL BC1512	BIOL BC1502 DISCUSSION SECTION (This is a co-requisite for BIOL BC1502.)	
BIOL BC1503	INTRO LAB CELLULAR#MOLEC BIO	2
BIOL BC1513	BIOL BC 1503 RECITATION (This is a co-requisite for BIOL BC1503. It is asynchronous.)	

Genetics Requirement (Offered Fall & Spring)

BIOL BC2100	MOLECULAR # MENDELIAN GENETICS	3
-------------	--------------------------------	---

It is recommended, but not required, that Genetics be taken immediately after completing the 1500-level introductory sequence. Though it is a pre-requisite for many upper-level courses, it is not required for all. For example, sophomores interested in pursuing the Organismal & Physiological or Ecology & Evolutionary tracks are encouraged to take BIOL BC2280 Animal Behavior, BIOL BC2840 Plant Evolution and Diversity, or BIOL BC3360 Physiology even if they have not yet taken genetics.

Five Upper-Level Lecture Courses

Students must complete five upper-level lecture courses. Requirements for each track are listed below:

- **General Biology (GB):** Five upper-level lecture courses with at least one course from each of the three categories (C&M, P&O, and E&E).
- **Cell & Molecular Biology (C&M):** Four upper-level lecture courses from the C&M category + one from another category (P&O or E&E)
- **Physiology & Organismal Biology (P&O):** Four upper-level lecture courses from the P&O category + one from another category (C&M or E&E)
- **Ecology & Evolutionary Biology (E&E):** Four courses from the E&E category + one from another category (C&M or P&O)
- **Computational Biology (CB):** Four computing courses from the CB-COMP category + one course from the CB-BIOL category

Please Note:

1. Although some courses are listed in multiple categories, a student can only use a course toward one of the categories.
2. If a student completes courses that make them eligible for more than one of the five major tracks, then they may select which track is reflected on their transcript. (A student can list only one track on their transcript.)

Here is a list of courses related to each track/category:

Cellular & Molecular Biology (C&M)

EESC GU4050	GLOBAL ASSMT-REMOTE SENSING	3
COMS W3134	Data Structures in Java	3
CBMF W4761	COMPUTATIONAL GENOMICS	3

*Different topics for this course are taught each semester. Only Bacteria by Design will fulfill this requirement. This class may count as either an upper-level elective course OR the senior capstone experience.

Computational Biology - Biology (CB-BIOL)

BIOL BC3304	Topics in Molecular Genetics	3
BIOL BC3310	CELL BIOLOGY	3
BIOL BC3320	MICROBIOLOGY	3
BIOL BC3352	DEVELOPMENT	3
BIOL BC3360	PHYSIOLOGY	3
BIOL BC3362	MOLECULAR # CELLULAR NEUROSCIENCE	3
BIOL BC3380	Applied Ecology and Evolution	3

Ask an advisor about new or less frequently taught 3000-level courses at Barnard or Columbia, or about transfer or study-abroad credit.

Three Upper-Level Laboratory Courses

Students pursuing the Computational Biology track are required to take only ONE upper-level lab from the following list.

Upper-Level Lab Courses for the Computational Biology Track

BIOL BC3303	LAB IN MOLECULAR BIOLOGY	3
BIOL BC3305	PROJECT LAB IN MOLECULAR GENETICS	3
BIOL BC3306	PROJECT LAB MOLECULAR GENETCS	3
BIOL BC3311	LABORATORY IN CELL BIOLOGY	3

BIOL BC3321	LABORATORY IN MICROBIOLOGY	3
BIOL BC3361	LABORATORY IN PHYSIOLOGY	3
BIOL BC3363	LAB IN MOLEC # CELL NEUROSCI	3

Students pursuing the GB, C&M, P&O, or E&E track are required to take THREE upper-level lab courses (beyond the 1500 level). These students may take ANY upper-level Barnard Biology lab courses for which they meet the pre- or co-requisites.

Commonly Offered Upper-Level Lab Courses for the General, Cellular & Molecular, Physiology & Organismal, and Ecology & Evolutionary Biology Tracks

BIOL BC2281	
BIOL BC2490	(*)
BIOL BC2500	MATLAB FOR SCIENTISTS (**)
BIOL BC2801	Laboratory in Genetics
BIOL BC2841	LAB-PLANT EVOLUTION # DIVERSITY

BIOL BC3361	LABORATORY IN PHYSIOLOGY
BIOL BC3363	LAB IN MOLEC # CELL NEUROSCI
BIOL BC3591	GUIDED RESEARCH # SEMINAR (Yearlong course with BIOL BC3592)
BIOL BC3592	GUIDED RESEARCH # SEMINAR (Yearlong course with BIOL BC3591)

*Coding in Biology can count either as an upper-level lab for the GB, C&M, P&O, and E&E tracks, or as an upper-level elective in the C&M or CB-COMP categories.

**MATLAB for Scientists can count either as an upper-level lab for the GB, C&M, P&O, and E&E tracks, or as an upper-level elective in the C&M, P&O, E&E, and CB-COMP categories, but cannot fulfill a breadth requirement.

Please Note:

- Often, a lab course requires that a student have taken a prerequisite lecture offered in the opposite semester. Sometimes, the lecture may be offered as a co-requisite in the same semester.
- Students may take laboratory courses at Columbia (or other institutions) to satisfy the lab requirement, with permission from the Associate Chair.
- **Research Option:** The year-long Guided Research & Seminar course (BIOL BC3591 followed by BIOL BC3592) can be used to fulfill up to two upper-level labs in all tracks except for Computational Biology. This course is only available as a fall to spring sequence. In Guided Research and Seminar, students complete an original research project in a lab, and both write a scientific paper and give a poster presentation of their work at the Annual Barnard Biology Research Symposium. **Note:** Seniors may not enroll in Guided Research and Seminar if they are enrolled in Senior Thesis

Research and Seminar. For more information, visit the biology department's [Undergraduate Research](#) page.

Senior Capstone Experience

All Biology majors must complete the Senior Capstone Experience with either of the following two options:

1. One semester of BIOL BC3590 SR SEM IN BIOLOGY

In Senior Seminar, students participate in a seminar focusing on primary literature, and both compose and give a presentation on a senior thesis in the format of a literature review. Topics vary from semester to semester. To fulfill the Computational Biology track senior capstone requirement, students must enroll in Professor Lopatkin's Bacteria by Design topic.

Spring 2023 Topic: Bacteria by Design:

In this course, students will explore in-depth the field of synthetic biology with a focus on engineered bacteria. Topics include fundamental design principles, environmental and clinical applications, as well as ethical implications.

OR

2. The yearlong Senior Thesis Research and Seminar (BIOL BC3593&BIOL BC3594)

In Senior Thesis Research and Seminar, students complete an original research project in a lab, and both write a scientific paper and orally present their work at the Barnard Biology Research Symposium. This course is only available as a fall to spring sequence. For more information, visit our Undergraduate Research page.

Please Note: Seniors enrolled in Guided Research and Seminar to fulfill two upper-level labs for their major cannot take Senior Thesis Research and Seminar at the same time. Instead, they must complete their senior capstone experience with BIOL BC3590 Senior Seminar.

Chemistry Requirement (GB, C&M, P&O, and E&E)

Majors in the GB, C&M, P&O, and E&E tracks must complete at least one semester of General Chemistry (with laboratory) and at least one semester of Organic Chemistry (with laboratory). To see which courses will be offered this semester, we encourage students to visit the [CU Directory of Classes](#) for Chemistry at Barnard and at Columbia. Equivalent courses at Columbia may be taken in lieu of the Barnard Chemistry courses. [This is an important topic to discuss early with your advisor.](#)

- **General Chemistry** lecture (CHEM BC2001) and lab (CHEM BC2012) (offered in the fall only)
- **Organic Chemistry** lecture (CHEM BC3230) and lab (CHEM BC3328)

Introductory Computing/Statistics Requirement (Computational Biology Track)

Instead of completing the chemistry requirement, students on the computational biology track complete:

One of the following introductory computing courses to learn a coding language

COMS W1004	Introduction to Computer Science and Programming in Java
COMS BC1016	Introduction to Computational Thinking and Data Science
ENGI E1006	INTRO TO COMP FOR ENG/APP SCI (taught in Python)

AND

One of the following introductory statistics courses

STAT UN1010	Statistical Thinking For Data Science
STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT UN2102	Applied Statistical Computing
NSBV BC2002	STATISTICS AND EXPERIMENTAL DESIGN
EEEB UN3005	INTRO-STAT-ECOLOGY # EVOL BIOL

BIOL BC1503	INTRO LAB CELLULAR#MOLEC BIO	2
BIOL BC1513	BIOL BC 1503 RECITATION (This is a co-requisite for BIOL BC1503. It is asynchronous.)	

Three biology lecture courses

Any lecture course at the 2100-level or higher counts.

Two biology laboratory courses

Any upper-level lab counts toward fulfilling this requirement. The yearlong course, Guided Research & Seminar (BIOL BC3591 and BIOL BC3592), fulfills the requirement.

Note: Chemistry, environmental science, physics, and psychology majors need to take only one advanced laboratory instead of two. Check with your major advisor in order to determine whether a guided research course is a suitable selection for your major's requirements.

HSPB BC1001 Research Apprenticeship Seminar. 3 points.

This year-long course is 3 pts (1.5/semester) **Not offered during 2023-2024 academic year.**

Prerequisites: This course is open to 16 first-year students who are also enrolled in an introductory lab science sequence; applications will be made available via the first-year class blog through the Dean of Studies Office.

The course will meet in a seminar format, and will discuss how research problems are defined, how scientists immerse themselves in the existing literature on a topic, how researchers craft experimental protocols and collect data, and how data can be used to test hypotheses. Students will also consider science stories in the *New York Times* and lead formal debates about ethical and social issues. Occasionally, the seminar period will be devoted to tours of faculty science labs to learn about the research that Barnard professors conduct and the research opportunities available on campus.

Additionally, students will participate in a month-long laboratory rotation each semester. During the rotation period, each student will spend 3 hours per week shadowing a Barnard junior or senior Research Intern who is conducting a year-long research project. In addition to this exposure to research at Barnard, students will discuss how to obtain summer science internships in laboratories off campus. Seminar assignments will include readings about the research process, as well as short library-based research projects about scientific claims in textbooks. In the fall, students will develop their presentation skills in a session with Barnard's Speaking Fellows. In the spring, each student will deliver an oral presentation about the research career of a scientist of her choosing.

HSPP BC1002 Research Apprenticeship Seminar. 3 points.

This year-long course is 3 pts (1.5/semester)**Not offered during 2023-2024 academic year.**

BIOL BC1008 HEALTHIER LIFE. 3 points.

Not offered during 2023-2024 academic year.

This is an introductory biology survey course which explores fundamentals of physiology in humans and other organisms, both in the context of global health and global ecological issues. It emphasizes reciprocal interactions between individual healthy humans and healthy societies, and the function of ecosystems in supporting humans and other biodiversity.

BIOL BC1002 Global Health and Ecology. 4.5 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1012 lab enrollment is required. This lecture & lab course does not fulfill biology major nor pre-health requirements, but is recommended for prospective biology majors who lack a high-school level background in biology. For students fulfilling a Nine Ways of Knowing lab science requirement, this course may be taken with AP/IB credit OR with BIOL BC1502 & BIOL BC1503 in the spring. Students fulfilling a Foundations requirement may take BIOL BC1002/BIOL BC1012 as a one-semester course in addition to another science lecture, such as BIOL BC1001 Revolutionary Concepts in Biology, to fulfill the lab science requirement.

What disease is the number one killer worldwide? What will be the next pandemic? Fundamentals of human physiology and microbiology are explored in the context of major global health issues. Principles of ecology are outlined, with an emphasis on the bidirectional impact of the interactions of humans with the global environment. Lab exercises introduce biological techniques for studying these topics. Enrollment in BIOL BC1012 (BC1002 lab) is required, and limited to 16 students per section.

BIOL BC1012 BIOL BC1002 Lab. 0 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1002 Global Health & Ecology is a co-requisite. This lab course does not fulfill biology major nor pre-health requirements. Enrollment in each lab section is limited to 16 students per section. Students must attend the first lab to hold their place. Fundamentals of human physiology and microbiology are explored in the context of major global health issues. Principles of ecology are outlined, with an emphasis on the bidirectional impact of the interactions of humans with the global environment. Lab exercises introduce biological techniques for studying these topics.

BIOL BC1001 REVOLUTIONARY CONCEPTS IN BIOL. 3.00 points.

Prerequisites: This lecture course does not fulfill Biology major nor premedical requirements, but does count toward the Science Lecture GER requirement for students fulfilling a Foundations requirement. Exploration of the major discoveries and ideas that have revolutionized the way we view organisms and understand life. This is an introductory survey course that explores basic concepts of molecular and cellular biology, genetics and evolution. Students will focus on biological concepts, biotechnology and bioethics, which inundate contemporary society

Fall 2023: BIOL BC1001

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 1001	001/00301	W 10:10am - 12:50pm 530 Altschul Hall	Gabrielle Corradino	3.00	6/40

BIOL BC1500 INTRO ORGANISMAL/EVOL BIOL. 3.50 points.

Prerequisites: This course is suitable for majors & fulfillment of pre-health requirements. A high school biology background or equivalent preparation is highly recommended. For those without this background seeking to major in biology, BIOL BC1002 & BIOL BC1012 are recommended in the fall of their freshmen year, followed by the year-long 1500-level lecture & lab sequence. BIOL BC1500 & BIOL BC1502 do not have to be taken in a fall to spring sequence. Course suitable for fulfillment of premedical requirements. Detailed introduction to biological phenomena above the cellular level; development, anatomy, and physiology of plants and animals; physiological, population, behavioral, and community ecology; evolutionary theory; analysis of micro-evolutionary events; and systematics

BIOL BC1510 BIOL BC1500 DISCUSSION SECTION. 0.00 points.

The goals of these discussion sections include providing a space to build community during remote learning and promoting opportunities for active engagement with the lecture material. These discussion sections will also serve as a space for students to consider science from multiple perspectives beyond discipline-specific content in the lecture and text (e.g. hearing guest lectures from BIPOC scientists, considering racial disparities in health outcomes, etc.). Participation will include posting on discussion boards between sessions, delivering short presentations during discussion, working well with partners, and making thoughtful comments during the discussion period

BIOL BC1511 BIOL BC1501 RECITATION. 0.00 points.

Prerequisites: BIOL BC1500 lecture is a pre- or co-requisite (preferred). This recitation (BIOL BC1511) is a co-requisite course for enrollment in BIOL BC1501 Introductory Lab in Organismal & Evolutionary Biology. Each individual lab section is limited to 16 students per section, however all students must enroll in one of the two recitation sections offered.

Prerequisites: BIOL BC1001 or equivalent preparation. Enrollment limited to 16 students per section. Course suitable for fulfillment of premedical requirements. BIOL BC1500 as prerequisite or corequisite. A laboratory-based introduction to the major groups of living organisms; anatomy, physiology, evolution, and systematics; and laboratory techniques for studying and comparing functional adaptations

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent.

Systematic survey of the Phylum Chordata: fossil history, biogeography, systematics, natural history, body architecture, energetics, locomotion, feeding, and behavior.

BIOL BC2272 ECOLOGY. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. This course is a pre- or co-requisite for BIOL BC2873 Laboratory in Ecology.

The definition of ecological problems in experimentally tractable ways; the design of experiments and analysis of ecological data; class projects on population ecology. Students conduct individual projects during last month of term

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent.

Study of the process of evolution with an emphasis on the mechanisms underlying evolutionary change. Topics include the origins of life, rates of evolutionary change, phylogenetics, molecular evolution, adaptive significance of traits, sexual selection, and human evolution.

BIOL BC2280 ANIMAL BEHAVIOR. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent. This course is a pre-requisite for BIOL BC2281 Laboratory in Animal Behavior.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or equivalent. This introduction to animal behavior takes an integrative approach to understand the physiological and genetic basis of behavior, the ecological context of behavior, and the evolutionary consequences of behavior. This course focuses on the process of scientific research, including current research approaches in animal behavior and practical applications of these findings

BIOL BC2500 MATLAB FOR SCIENTISTS. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1502, and MATH UN1101

Introduction to MATLAB programming and numerical methods applied to the analysis of biological data. Topics range from foundational programming concepts and algorithms and an introduction to MATLAB, to more advanced concepts such as data visualization, curve fitting and data interpolation, basic statistical methods, modeling biological systems of ordinary differential equations, and image analysis

BIOL BC2801 Laboratory in Genetics. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503; and pre or corequisite, BIOL BC2100 and Enrollment limited to 16 students per section.

Exercises in genetics at both the Mendelian and molecular levels. Basic principles of genetic analysis will be studied using *Drosophila* and bacteria. A project in molecular genetics, involving such techniques as PCR, gel electrophoresis, and cloning, will be undertaken using plant genes.

BIOL BC2841 LAB-PLANT EVOLUTION # DIVERSITY. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or equivalent. Enrollment is limited to 16; must attend first lab to hold place.

Prerequisites: () Enrollment is limited to 16; must attend first lab to hold place. Studies of the structure, ecology, and evolution of plants. Laboratory exercises include field problems, laboratory experiments, plant collections and identification, and examination of the morphology of plant groups

BIOL BC2851 Plants and Profits: The Global Power of Botany. 4 points.

The course is part of the Barnard Teaches program. It will have a lab that will teach science and digital skills and on Thursdays two consecutive times are scheduled to allow lecture and lab to accommodate trips to NYBG. **Not offered during 2023-2024 academic year.**

Prerequisites: Strongly recommend prior enrollment in BIOL BC1001 or 1002, or in BIOL BC 1501 and 1502, or the equivalent. Students need to understand genetics and must be prepared to read professional science literature. Science students must be prepared for lengthy reading assignments.

Sustaining complex human systems requires plants, which in turn depend on soils, geology, and climate. With that reality in the foreground, this course will foster fluency and expertise in classical and cutting edge botanical science: genetics, genomics, biogeography, conservation biology, economic and ethno-botany. At the center of its investigations will be the ongoing digital revolution, recognizing that natural history has been and will continue to be essential to all of the plant sciences. The course will encourage interdisciplinary perspectives, pushing students outside of their intellectual comfort zones and aiming to comprehend plant biodiversity from a multiplicity of human perspectives.

BIOL BC2873 Laboratory in Ecology. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC2272 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

The definition of ecological problems in experimentally tractable ways; the design of experiments and analysis of ecological data; class projects on population ecology. Students conduct individual projects during last month of term.

BIOL BC3303 LAB IN MOLECULAR BIOLOGY. 3.00 points.

Prerequisites: BIOL BC2100 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

Introduction to the use of molecular techniques to answer questions about subcellular biological phenomena. Techniques include isolation of genomic and plasmid DNAs, restriction enzyme analysis, DNA and protein electrophoresis, bacterial transformation, and plasmid subcloning

BIOL BC3304 Topics in Molecular Genetics. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1502, BIOL BC2100 or equivalent

Selected topics in molecular genetics and gene regulation, with a focus on examples from human evolution, physiology, and disease. The course will be organized into four modules with combined lecture and journal club-style discussion. Module topics include molecular regulation of transcription, epigenetic regulation of the genome, gene regulatory networks, and genome architecture and evolution. We will draw from examples in the current literature and explore current experimental approaches in molecular genetics of humans and model organisms.

BIOL BC3305 PROJECT LAB IN MOLECULAR GENETICS. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or permission of instructor. Enrollment limited to 16. Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or permission of instructor. Enrollment limited to 16. Laboratory course in which students conduct original research projects in molecular genetics. Students will participate in experimental design, conduct and data analysis, and work with key techniques for studying gene structure, expression and function such as nucleic acid extraction and synthesis, cloning, bioinformatics analysis, PCR and qPCR. Students will present their results orally and in writing. Enrollment in both semesters (BIOL BC3305 and BIOL BC3306) of this full-year course is required, and fulfills two upper-level lab courses for the Barnard Biology major. Must be taken in sequence, beginning in the fall. -B. Morton - J. Mansfield

BIOL BC3308 INTRODUCTION TO MICROBIAL GENOMICS. 3.00 points.

Prerequisites: (BIOL BC1500)(BIOL BC1501)(BIOL BC1502)(BIOL BC1503) and BIOL BC2100 or the equivalent. This course is an upper-level laboratory.

This course will focus on understanding, implementing, and using basic bioinformatic algorithms and tools to analyze microbial genomes and genomic information. Topics cover a history of genome sequencing methods, local and global alignment methods, sequence annotation tools, de novo genome assembly, multiple sequence alignments, and simple molecular phylogeny. Theoretical lectures will be taught in parallel with labs focused on hands-on analysis of real-world data so that students create tangible and applicable skills. Knowledge of a programming language is required to take this course. Class notes are intended to be self-contained for these topics

BIOL BC3310 CELL BIOLOGY. 3.00 points.

Prerequisites: (BIOL BC1500)(BIOL BC1501)(BIOL BC1502)(BIOL BC1503) and BIOL BC2100 or equivalent.

This course explores the components, systems, and regulatory mechanisms involved in eukaryotic cellular function. Topics include: signal transduction, translational and protein quality control, organellar and cytoskeletal dynamics, and some coordinated responses such as proliferation and programmed cell death. Throughout the course we will see how general cell biology can be specialized to achieve specific cellular functions through regulation of the basic machinery. We will also explore the cellular and molecular bases for a variety of human pathologies, with an emphasis on cancer. In addition to lecture, we will spend some time discussing the material, including selected articles from the primary literature, and learning through group presentations

BIOL BC3311 LABORATORY IN CELL BIOLOGY. 3.00 points.

Prerequisites: BIOL BC2100 Enrollment is limited to 16; must attend first lab to hold place.

Introduction to cell biological techniques used to investigate structural, molecular, and physiological aspects of eukaryotic cells and their organization into tissues. Techniques include light and electron microscopy, cell culture, isolation of cellular organelles, protein electrophoresis, and Western Blot analysis

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent.

Introduction to animal developmental biology and its applications. This course will examine the basic mechanisms through which animal bodies organize themselves, from an integrative perspective at the levels of genes and gene networks, cell properties and behaviors, coordinated interactions of cells in developing tissues, organs and organ systems, and the role of developmental processes in morphological evolution. Topics include: fertilization, cleavage and gastrulation, establishment of body axes, neural development, organ formation, tissue and organ regeneration, stem cells and medical applications, evolution of developmental programs, and teratogenesis

BIOL BC3354 LABORATORY IN EMBRYOLOGY. 3.00 points.

Not offered during 2023-2024 academic year.

This lab course will explore the foundational methods of vertebrate embryology. Using both classical and modern experimental approaches, we will identify and manipulate developmental processes such as gastrulation, neurulation, and organogenesis. Students will investigate molecular regulation of patterning and the importance of tissue-tissue interactions during early development. Utilizing modern genetic tools and imaging techniques, such as digital microscopy, students will have the opportunity to visualize embryogenesis in real-time. Prerequisite: Two terms of introductory biology (BIOL BC1500, BIOL BC1502 or equivalent) AND one term of Genetics (BIOL BC2100 or equivalent) AND at least one upper level lab course at the cell and molecular level. OR permission from the instructor

BIOL BC3360 PHYSIOLOGY. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. This course examines how mammals carry out basic functions like manipulating objects, sensing the external world, oxygenating tissues, and processing food. Emphasis is placed on (a) how the body regulates itself through the integrated action of multiple organ systems and (b) what goes awry in disease

BIOL BC3361 LABORATORY IN PHYSIOLOGY. 3.00 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC3360 (or equivalent, which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

Prerequisites: Pre- (or co-) requisite is a physiology lecture class (e.g. BIOL BC3360). Enrollment limited to 16. Provides a hands-on introduction to the different physiological systems in vertebrates and invertebrates. Emphasizes the operation of a variety of physiological monitoring devices and the collection and analysis of physiological data

BIOL BC3362 MOLECULAR # CELLULAR NEUROSCIENCE. 3.00 points.

Prerequisites: BIOL BC1502 BIOL BC1503, and either BIOL BC1500 BIOL BC1501 or NSBV BC1001 or permission from the instructor. Structure and function of neural membranes; ionic basis of membrane potential and action potential; synaptic transmission and neurochemistry; sensory transduction and processing; reflexes and spinal cord physiology; muscle structure and function; neuronal circuitry; and nervous system development

Prerequisites: BIOL BC3362 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

Prerequisites: BIOL BC3362 (or corequisite). Enrollment limited to 16. Introduction to techniques commonly used in current neurobiological research, including intracellular and extracellular recording of action potentials, neuroanatomical methods, and computer simulation of the action potential

BIOL BC3367 Ecophysiology. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503, or the equivalent. BIOL BC2280 is recommended.

Individuals, communities and ecosystems are composed of complex organism-environment interactions. We will examine these dynamic relationships in animals at the physiological level, covering basic concepts as they specifically relate to animal fitness. Course focus: how changes in stress and reproductive endocrinology and ecoimmunology relate to individual and population dynamics.

BIOL BC3380 Applied Ecology and Evolution. 3 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent.

Ecological and evolutionary models of populations (exponential and density-dependent growth; species interactions; genetic differentiation resulting from mating, random drift, and selection) applied to problems resulting from human-induced environmental change (endangered species; use of pesticides and antibiotics; escaping transgenic organisms; global climate change; emerging pathogens; other invaders; etc.)

BIOL BC3400 MATHEMATICAL MODELING OF BIOLOGICAL SYSTEMS.

4 points.

Not offered during 2023-2024 academic year.

This course will focus on building and analyzing dynamic mathematical models (models that study how processes change in time) to understand the behavior of different biological systems. We will focus on a variety of topics in population biology, physiology and the biomedical sciences such as single and competing species models, pharmacokinetic models of drugs and toxins, enzyme reaction kinetics, epidemiology, infectious diseases and cancer. We will use mathematical tools like difference equations, differential equations, linear algebra and nonlinear analysis to study these biological processes. MATLAB programming will be used to implement these mathematical models in search of answers to biological questions.

BIOL BC3590 SR SEM IN BIOLOGY. 4.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent. Enrollment is limited to 12; must attend first class to hold place.

Required for all majors who do not select the year-long Senior Thesis Research # Seminar (BIOL BC3593 # BC3594) to fulfill their senior capstone requirement. These seminars allow students to explore the primary literature in the Biological Sciences in greater depth than can be achieved in a lecture course. Attention will be focused on both theoretical and empirical work. Seminar periods are devoted to oral reports and discussion of assigned readings and student reports. Students will write one extensive literature review of a topic related to the central theme of the seminar section. Topics vary per semester and include, but are not limited to: Plant Development, Animal Development # Evolution, Molecular Evolution, Microbiology # Global Change, Genomics, Comparative # Reproductive Endocrinology, and Data Intensive Approaches in Biology

BIOL BC3591 GUIDED RESEARCH # SEMINAR. 4.00 points.

Per Semester

The introductory biology sequence is a pre-requisite for this yearlong course (BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503). An independent research project in Biology under the guidance of a faculty member and suiting the needs of the individual student. A Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in this year-long course. A Project Approval Form must be submitted to the department in the fall. Attendance at a weekly seminar is required. By the end of the year, students enrolled in BIOL BC3591-BIOL BC3592 will write a scientific paper and give a poster presentation of their work at the Barnard Biology Research Symposium. Completion of this year-long course fulfills two upper-level laboratory requirements for the major. Must be taken in sequence, beginning in the fall

BIOL BC3597 GUIDED RESEARCH. 1.00-4.00 points.

Prerequisites: Permission of a faculty sponsor.

Similar to BIOL BC3591-BIOL BC3592, this is a one-semester course that provides students with degree credit for unpaid research without a seminar component. You may enroll in BIOL BC3597 for between 1-4 credits per semester. As a rule of thumb, you should be spending approximately 3 hours per week per credit on your research project. A Project Approval Form must be submitted to the department each semester that you enroll in this course. Your Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in BIOL BC3597. You should sign up for your mentor's section. This course does not fulfill any Biology major requirements. It is open to students beginning in their first year

The Department of Chemistry

The department aims to provide Barnard College students with a working knowledge of chemistry—the study of matter and its transformations, particularly at the molecular scale—within a vibrant community of students, faculty, and staff. Students gain familiarity with the core areas of the field; inorganic, physical, organic, analytical,

and biological chemistry; while developing broadly applicable skills in problem solving and critical thinking. Through extensive laboratory work, students apply chemical concepts and theories to the tangible world, and there are ample opportunities for independent research with faculty members.

Mission

The department strives to prepare majors and non-majors alike to meet post-graduation goals, including graduate study in chemistry, employment in chemistry or related technical fields, science teaching, and professional school (particularly in the health-related professions).

The department is an important contributor to Barnard's effort to produce scientifically literate graduates and to be a source of distinguished women scientists.

Student Learning Objectives for Majors in Chemistry and Biochemistry

Students who graduate from Barnard College with a major in chemistry or biochemistry will be able to attain the following objectives:

- Demonstrate a thorough grounding in the core areas of chemistry: inorganic, physical, organic, biological, and analytical;
- Work effectively and safely in the chemistry laboratory, designing and conducting experiments, analyzing experimental results, and drawing conclusions from that data;
- Access, search, and interpret the chemical literature to obtain and critically evaluate scientific information;
- Clearly communicate scientific ideas and results both in writing and orally;
- Conduct themselves professionally and ethically as members of the scientific community;
- Pursue careers that require a high degree of technical expertise, including those in chemistry, science teaching, and the health professions.

Chemistry is the study of the nature of substances and their transformations. In a sequence of core courses, a chemistry or biochemistry major gains familiarity with the basic areas of the field: inorganic, organic, physical, analytical, and biological chemistry. In addition, she acquires sufficient skill in laboratory work that she is prepared for research.

The laboratories of the department are modern and well-equipped for both coursework and independent projects. Students may undertake research projects under the guidance of members of the department during the academic year or the summer. Opportunities are also available for research with Columbia faculty as well as staff members of the many medical schools and research institutions in New York City.

AP Credit

Students with scores of 4 or 5 on the Chemistry AP test or a 5, 6 or 7 on the IB chemistry exam can receive 3 credits of unspecified chemistry credit. Students may not “place out” of CHEM BC2001 unless they have taken the equivalent course(s) in college.

Pre-Medical Program

Non majors who are interested in the pre-health professions should work with the pre-health adviser to determine the best selection of chemistry courses for their goals. information about the topics covered

in each chemistry course is available through the prehealth professions office to facilitate student choice.

Introductory Course Selection

Based on their preparation and background in chemistry, most students begin their study with CHEM BC2001 GENERAL CHEMISTRY I, an integrated lecture and laboratory course. Some students will also take CHEM BC1003 CHEMICAL PROBLEM SOLVING, which is a one point corequisite of General Chemistry. Consult the department regarding this choice.

Regardless of a student's background in chemistry, students may also take CHEM BC1050 THE JAZZ OF CHEMISTRY. This 3.0-point seminar is limited to 24 students per section.

Director of General Chemistry Laboratories: SuQing Liu

Director of Organic Chemistry Laboratories: Meenakshi Rao (Senior Lecturer)

Laboratory and Facilities Administrator: Maisha Rahman

Requirements for the Major

Two majors are offered by the department: Chemistry and Biochemistry. There is also a special track within chemistry for students who are interested in pursuing graduate study in chemical engineering

A student interested in chemistry or biochemistry should consult any member of the department during her first year. In the first year they should take CHEM BC2001 GENERAL CHEMISTRY I, CHEM BC3328 INTRO ORGANIC CHEMISTRY-LAB, and CHEM BC3230 ORGANIC CHEMISTRY I-LEC and start or continue the study of calculus.

In addition to required coursework, research experience is strongly recommended and may begin as early as the sophomore year. Interested students should consult with individual faculty members about research opportunities.

Rising seniors making good progress towards the degree may be invited by the faculty to participate in the senior honors thesis program in which students carry out a year-long research project leading to a thesis. Students who do not perform thesis research will satisfy the senior capstone requirement by taking a single semester of research their senior year.

Chemistry

The courses required for the chemistry major are:

Core

CHEM BC2001	GENERAL CHEMISTRY I	5
CHEM BC3328 - CHEM BC3230	INTRO ORGANIC CHEMISTRY-LAB and ORGANIC CHEMISTRY I-LEC	5.5
CHEM BC3231	ORGANIC CHEMISTRY II-LEC	3
CHEM BC3333	MODERN TECH-ORGANIC CHEM LAB	3
CHEM BC3242	QUANTITATIVE ANALYSIS	3
CHEM BC3338	QUANTITATIVE-INSTRUMENTAL TECH-LAB	3
CHEM BC3253	QUANTUM CHEMISTRY	3
CHEM BC3252	THERMODYNAMICS-KINETICS	3
CHEM BC3348	Advanced Spectroscopy, Measurement, and Analysis Laboratory	3
CHEM BC3271	INORGANIC CHEMISTRY	3
CHEM BC3358	Advanced Chemical Synthesis and Reactivity Laboratory	5
MATH UN1101	CALCULUS I *	3
MATH UN1102 or MATH UN1201	CALCULUS II CALCULUS III	3
PHYS BC2001 - PHYS BC2002	MECHANICS - LECTURE LAB and ELECTRICITY#MAGNETISM-LEC LAB	9

Elective

Select one of the following:

CHEM BC3254	METHODS, APPLCTNS PHYSICAL CHEMISTRY
CHEM BC3282	BIOLOGICAL CHEMISTRY
CHEM BC3280	ADVANCED ORGANIC CHEMISTRY
CHEM GU4103	ORGANOMETALLIC CHEMISTRY

Senior Requirement

Select one of the following:

Senior Honors Thesis:	
CHEM BC3901 - CHEM BC3902	SENIOR HONORS THESIS and SENIOR HONORS THESIS SEM (by invitation of the department)
Guided Research at Barnard or Columbia:	
CHEM BC3597 or CHEM BC3599	PROBLEMS IN CHEMISTRY PROBLEMS IN CHEMISTRY
Elsewhere:	
CHEM BC3598	PROBLEMS IN CHEMISTRY

Recommended

* For Class 2021 and beyond:

1. Two semesters of math taken at college
2. Completion of Calculus through Calculus II.

Further mathematics experience is always encouraged strongly for Chemistry and Biochemistry majors.

† Students having advanced placement credit for one or two semesters of calculus may fulfill the two-semester requirement with additional mathematics, statistics, or computer science courses. Any calculus-based statistics course is acceptable. Also, many computer science courses are acceptable (e.g., COMS W1004 Intro to Programming in Java, COMS W3101 Program Languages (Python), ENV BC3050 Working with Big Data), although COMS W1002 Computing in Context is not.

‡ For the major in Chemistry, at least 61.5 credits are required (46.5 credits in chemistry + 6.0 in math + 9.0 in physics).

A list of major requirements, several possible course sequences, and information about the senior requirement can be obtained from any member of the department.

Biochemistry

The courses required for the biochemistry major are:

Core

CHEM BC2001	GENERAL CHEMISTRY I	5
CHEM BC3328 - CHEM BC3230	INTRO ORGANIC CHEMISTRY-LAB and ORGANIC CHEMISTRY I-LEC	5.5
CHEM BC3231	ORGANIC CHEMISTRY II-LEC	3
CHEM BC3333	MODERN TECH-ORGANIC CHEM LAB	3
CHEM BC3242	QUANTITATIVE ANALYSIS	3
CHEM BC3338	QUANTITATIVE-INSTRMNTL TECH-LAB	3
CHEM BC3253	QUANTUM CHEMISTRY	3
MATH UN1101	CALCULUS I *	3
MATH UN1102 or MATH UN1201	CALCULUS II CALCULUS III	3
PHYS BC2001 - PHYS BC2002	MECHANICS - LECTURE LAB and ELECTRICITY#MAGNETISM-LEC LAB	9
BIOL BC1502 - BIOL BC1503	INTRO CELL AND MOLECULAR BIOL and INTRO LAB CELLULAR#MOLEC BIO	5.5
CHEM BC3282	BIOLOGICAL CHEMISTRY	3
CHEM BC3283	BIOLOGICAL CHEMISTRY II	3
CHEM BC3355	BIOCHEMISTRY LAB TECHNIQUES	5

Elective

An elective course from the following list:

CHEM BC3271	INORGANIC CHEMISTRY
CHEM BC3280	ADVANCED ORGANIC CHEMISTRY
CHEM BC3252	THERMODYNAMICS-KINETICS
CHEM BC3254	METHODS, APPLCTNS PHYSICAL CHEMISTRY
CHEM BC3348	Advanced Spectroscopy, Measurement, and Analysis Laboratory
CHEM BC3358	Advanced Chemical Synthesis and Reactivity Laboratory

Senior Requirement

Select one of the following:

Senior Honors Thesis:	
CHEM BC3901 - CHEM BC3902	SENIOR HONORS THESIS and SENIOR HONORS THESIS SEM (by invitation of the department)
Guided Research at Barnard or Columbia:	
CHEM BC3597 or CHEM BC3599	PROBLEMS IN CHEMISTRY PROBLEMS IN CHEMISTRY
Elsewhere:	
CHEM BC3598	PROBLEMS IN CHEMISTRY
Recommended:	

* For Class of 2020 and before:

1) Two Semesters of math taken at college, including Cal. I or either II or III is required.

For Class of 2021 and beyond:

1) Two Semesters of math taken at college

2) Completion of Calculus through Calculus II.

Further mathematics experience is always encouraged strongly for Chemistry and Biochemistry majors.

† Students having advanced placement credit for one or two semesters of calculus will fulfill this requirement with additional mathematics, statistics, or computer science courses.

‡ For the major in Biochemistry, at least 63.5 credits are required (43.5 credits in chemistry + 5.0 in biology + 6.0 in math + 9.0 in physics).

A list of major requirements, including possible elective courses, and information about the senior requirement may be obtained from any member of the department.

Chemical Engineering 4+1

The courses required for the chemical engineering 4+1 program are:

CHEM BC2001	GENERAL CHEMISTRY I	5.00
CHEM BC3230	ORGANIC CHEMISTRY I-LEC	3.00
CHEM BC3328	INTRO ORGANIC CHEMISTRY-LAB	2.50
CHEM BC3231	ORGANIC CHEMISTRY II-LEC	3.00
CHEM BC3333	MODERN TECH-ORGANIC CHEM LAB	3.00
CHEM BC3242	QUANTITATIVE ANALYSIS	3.00
CHEM BC3338	QUANTITATIVE-INSTRMNTL TECH-LAB	3.00
CHEM BC3253	QUANTUM CHEMISTRY	3.00
CHEM BC3348	Advanced Spectroscopy, Measurement, and Analysis Laboratory	3.00
CHEN E4230	REACTOR KINETICS/REACTOR DESGN	3.00
CHEN E3810	CHEM ENG # APPLIED CHEM LAB	3.00
PHYS BC2001	MECHANICS - LECTURE LAB	4.50
PHYS BC2002	ELECTRICITY#MAGNETISM-LEC LAB	4.50
MATH UN1101	CALCULUS I	3.00
MATH UN1102	CALCULUS II	3.00
MATH UN2030	ORDINARY DIFFERENTIAL EQUATIONS	3.00
APMA E2000	MULTV. CALC. FOR ENGI # APP SCI	4.00

Requirements for the Minor

Courses required for the Chemistry minor are:

CHEM BC2001	GENERAL CHEMISTRY I	5
CHEM BC3328	INTRO ORGANIC CHEMISTRY-LAB	2.5
CHEM BC3230	ORGANIC CHEMISTRY I-LEC	3
CHEM BC3231	ORGANIC CHEMISTRY II-LEC	3
CHEM BC3333	MODERN TECH-ORGANIC CHEM LAB	3
CHEM BC3338	QUANTITATIVE-INSTRMNTL TECH-LAB	3
Select one of the following:		3-3.5
CHEM BC3232	Descriptive Inorganic Chemistry	3
CHEM BC3242	QUANTITATIVE ANALYSIS	3
CHEM BC3252	THERMODYNAMICS-KINETICS	3
CHEM BC3271	INORGANIC CHEMISTRY	3
CHEM BC3282	BIOLOGICAL CHEMISTRY	3

Students whose major requires in excess of 40 points, including CHEM BC2001 GENERAL CHEMISTRY I, CHEM BC3328 INTRO ORGANIC CHEMISTRY-LAB, and/or CHEM BC3230 ORGANIC CHEMISTRY I-LEC, may count up to two of these courses towards the Chemistry minor with a petition from the Chemistry Department Chair. There is no minor in Biochemistry.

Transfer students who took CHEM BC2001 General Chemistry I and II at another institution can complete the minor by taking any one of the following courses on the list EXCEPT CHEM BC3232, which is not an acceptable course for students who have already had a two semester sequence of introductory chemistry elsewhere.

CHEM BC1003 CHEMICAL PROBLEM SOLVING. 1.00 point.

Prerequisites: Barnard students only. Permission of instructor required.

Corequisites: CHEM BC2001

BC1003 Chemical Problem Solving is designed to help students develop strong chemical problem solving skills and succeed in CHEM BC2001, General Chemistry lecture and lab. Students enrolled in General Chemistry are not required to take Chemical Problem Solving but may elect to. Please contact the instructor regarding this choice. Co-requisite: CHEM BC2001

CHEM BC1004 Special Topics in Chemistry. 0.50 points.

CHEM BC1004 Special Topics in Chemistry is designed to give students the opportunity to explore their interests in chemistry while simultaneously taking CHEM BC2001, General Chemistry lecture and lab. Only students currently enrolled in CHEM BC2001 are eligible to take the course and students must select one of the FIVE topics. The topics included are: MONDAY Chemistry and Racism, TUESDAY The Chemistry of Color, WEDNESDAY The Chemistry of Covid-19, THURSDAY An Introduction to Chemical Engineering, FRIDAY The Chemistry of Lead. Students who have previously taken CHEM BC2001 may enroll with special permission of the instructor but priority will be given to current CHEM BC2001 students

CHEM BC1050 THE JAZZ OF CHEMISTRY. 3.00 points.

The contribution of chemistry to everyday life is immense. The applications of chemistry in medicine, petrochemicals, cosmetics, and fertilizers are readily apparent. However, the knowledge and applications of chemistry come in handy in many other fascinating fields, some of which may be less than obvious. Examples of areas in which chemistry plays a key role include forensic science; art restoration and forgery detection; and flavors and fragrances in food, beverages and other consumer products. The goal of this course is to provide insights and spur discussion of several areas and applications of chemistry, while gaining hands-on experience in techniques used in these fields

CHEM BC2900 Research Methods Seminar. 1 point.

Instructor's Permission Required

Prerequisites: Students must be sophomores with a strong interest in pursuing research in the biological or chemical sciences
Skills to facilitate into biology and chemistry research. Students will learn to think and work like scientists and to identify, apply for and gain entry to research lab groups. Focus on writing and oral presentation skills. Additional readings and discussions on laboratory safety, women in science, and scientific ethics.

CHEM BC3000 Integrated Chemistry Laboratory. 2.00-3.00 points.

This course is designed to provide hands-on chemical training to reinforce laboratory techniques learned remotely due to the COVID-19 pandemic. Experiments will integrate topics and techniques from analytical, organic, physical, and biological chemistry. The course is open to students of varying class years, and thus experiments will be tailored to the individuals' completed coursework

CHEM BC3230 ORGANIC CHEMISTRY I-LEC. 3.00 points.

Prerequisites: CHEM BC2001 or equivalent. Credit will not be given for any course below the 3000 level after completing CHEM BC3230 or its equivalent. Lecture: MWF: 10:00 - 10:50 AM

Corequisites: With lab, counts towards Lab Science requirement.

Prerequisites: CHEM BC2001 or equivalent. Credit will not be given for any course below the 3000 level after completing CHEM BC3230 or its equivalent. Corequisites: With lab, counts towards Lab Science requirement. CHEM 3242	001/00269	M W 10:10am - 11:25am 530 Altschul Hall	Rachel Austin	3.00	36/40

CHEM BC3252 THERMODYNAMICS-KINETICS. 3.00 points.

Prerequisites: CHEM BC3231, PHYS BC2001, PHYS BC 2002, MATH UN1102 or MATH UN1201. Introduction to the laws of thermodynamics; application primarily to ideal systems. Free energy and equilibrium. Kinetics: rate laws and mechanisms, experimental techniques

Spring 2024: CHEM BC3252

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3252	001/00272	M W 10:10am - 11:25am 318 Milbank Hall	Marisa Buzzeo	3.00	5/20

CHEM BC3253 QUANTUM CHEMISTRY. 3.00 points.

Prerequisites: 2 semesters of calculus-based introductory physics, Calculus II, BC3242 Quantitative Analysis, or permission of instructor. Exact and approximate solutions to the Schrodinger equation. The structure of atoms and molecules. Chemical bonding and spectroscopy. Computer-based molecular modeling

Fall 2023: CHEM BC3253

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3253	001/00575	M W F 11:00am - 11:50am 805 Altschul Hall	Marisa Buzzeo	3.00	18/30

CHEM BC3254 METHODS, APPLCTNS PHYSICAL CHEMISTRY. 3.00 points.

Prerequisites: (CHEM BC3253) CHEM BC3253 or permission of instructor. Lecture: MWF 11:00-11:50.

Prerequisites: (CHEM BC3253) CHEM BC3253 or permission of instructor. Lecture: MWF 11:00-11:50. Advanced topics in physical chemistry, including statistical mechanics, reaction dynamics, materials science, catalysis, and nanotechnology. Particular emphasis will be placed on topics related to climate and energy

CHEM BC3271 INORGANIC CHEMISTRY. 3.00 points.

Prerequisites: CHEM BC3231 or Permission of Instructor. Structure, bonding and spectroscopy in inorganic compounds: applications of group theory to chemistry; ligand field theory; vibrational and electronic spectroscopy of transition metal complexes; selected topics from coordination chemistry, organometallics, bioinorganic chemistry, solid state and materials chemistry, mineralogy, and biogeochemistry

Spring 2024: CHEM BC3271

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3271	001/00273	T Th 11:40am - 12:55pm 805 Altschul Hall	Michael Campbell	3.00	34/40

CHEM BC3272 ADVANCED INORGANIC CHEMISTRY. 3.00 points.

Prerequisites: CHEM BC3271 Inorganic Chemistry
Prerequisites: CHEM BC3271 Inorganic Chemistry This course combines builds on the foundation developed in Inorganic Chemistry (CHEM BC3271) and applies inorganic chemical concepts and techniques to specific applications. A particular focus will be on understanding the roles of the transition metals in biological systems

CHEM BC3280 ADVANCED ORGANIC CHEMISTRY. 3.00 points.

Prerequisites: One year of organic chemistry.
Prerequisites: One year of organic chemistry. Survey of topics in structural, mechanistic, and synthetic organic chemistry, including molecular orbital treatment of structure, bonding, and chemical reactivity; elucidation of organic reaction mechanisms; pericyclic reactions; stereoelectronic effects; reactive intermediates; asymmetric reactions; and natural product total synthesis

CHEM BC3282 BIOLOGICAL CHEMISTRY. 3.00 points.

Prerequisites: (CHEM BC3230) and (CHEM BC3231) BIOL BC1502. Introduction to biochemical building blocks, macromolecules, and metabolism. Structures of amino acids, lipids, carbohydrates, nucleic acids. Protein structure and folding. Enzyme mechanisms, kinetics, allostery. Membranes and biosignaling. Catabolism and anabolism with emphasis on chemical intermediates, metabolic energy, catalysis by specific enzymes, regulation

Fall 2023: CHEM BC3282

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3282	001/00576	T Th 11:40am - 12:55pm 903 Altschul Hall	Rebecca Donegan	3.00	48/48

Spring 2024: CHEM BC3282

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3282	001/00274	W F 11:40am - 12:55pm 903 Altschul Hall	Romina Mancusso	3.00	43/40

CHEM BC3283 BIOLOGICAL CHEMISTRY II. 3.00 points.

Prerequisites: CHEM BC3282 or equivalent. Advanced topics in the field of biochemistry, including enzyme mechanisms, pharmaceutical drug design, and disease therapies. Emphasis will be placed on discussion of current scientific literature

Spring 2024: CHEM BC3283

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3283	001/00275	M W 10:10am - 11:25am 325 Milbank Hall	Christina Vizcarra	3.00	13/25

CHEM BC3284 CURRENT TOPICS BIOCHEMISTRY. 3.00 points.

Prerequisites: CHEM BC3282 and CHEM BC3355 or instructor approval. This course is designed to expose students to a range of current research topics in the field of biochemistry and develop their ability to understand and evaluate primary scientific literature. The first half of the course will focus on current research on fundamental biochemistry systems and processes; the second half will address biomedical application and advances

Fall 2023: CHEM BC3284

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 3284	001/00580	T Th 10:10am - 11:25am 912 Milstein Center	Christina Vizcarra	3.00	6/15

CHEM BC3328 INTRO ORGANIC CHEMISTRY-LAB. 2.50 points.

Prerequisites: (CHEM BC2001) General Chemistry I with lab.

Corequisites: CHEM BC3230

Prerequisites: (CHEM BC2001) General Chemistry I with lab.

Corequisites: CHEM BC3230 Basic techniques of experimental organic chemistry. Principles and methods of separation, purification, and characterization of organic compounds. Selected organic reactions

Cross-Listed Courses

Chemistry

CHEM GU4071 INORGANIC CHEMISTRY. 4.50 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046), or the equivalent.

Prerequisites: (CHEM UN1403 and CHEM UN1404) or (CHEM UN1604) or (CHEM UN2045 and CHEM UN2046), or the equivalent. Principles governing the structure and reactivity of inorganic compounds surveyed from experimental and theoretical viewpoints. Topics include inorganic solids, aqueous and nonaqueous solutions, the chemistry of selected main group elements, transition metal chemistry, metal clusters, metal carbonyls, and organometallic chemistry, bonding and resonance, symmetry and molecular orbitals, and spectroscopy

Spring 2024: CHEM GU4071

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4071	001/11327	T Th 8:40am - 9:55am 320 Havemeyer Hall	Jonathan Owen	4.50	29/42

CHEM GU4147 ADVANCED ORGANIC CHEMISTRY I. 4.50 points.

Prerequisites: Elementary organic and physical chemistry.

Prerequisites: elementary organic and physical chemistry. The mechanisms of organic reactions, structure of organic molecules, and theories of reactivity. How reactive intermediates are recognized and mechanisms are deduced using kinetics, stereochemistry, isotopes, and physical measurements

Fall 2023: CHEM GU4147

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4147	001/12710	T Th 8:40am - 9:55am 320 Havemeyer Hall	Jack Norton, Tomislav Rovis	4.50	14/42

BIOC G4170 Biophysical Chemistry. 4.5 points.

Not offered during 2023-2024 academic year.

Prerequisites: elementary physical and organic chemistry.

Recommended preparation: elementary biochemistry.

Tactics and techniques for the study of large molecules of biological importance; analysis of the conformation of proteins and nucleic acids, hydrodynamic, scattering, and spectroscopic techniques for examining macromolecular structure.

CHEM G4172 Biorganic Topics. 4.5 points.

Not offered during 2023-2024 academic year.

Prerequisites: elementary organic chemistry.

Recommended preparation: advanced organic chemistry. Various topics in bioactive molecules in the field centered on natural-products chemistry, metabolic transformations, and enzyme mechanisms.

Biosynthesis of natural products and some other bioorganic topics.

CHEM GU4221 QUANTUM CHEMISTRY I. 4.50 points.

Prerequisites: elementary physical chemistry. Basic quantum mechanics: the Schrodinger equation and its interpretation, exact solutions in simple cases, methods or approximations including time-independent and time-dependent perturbation theory, spin and orbital angular momentum, spin-spin interactions, and an introduction to atomic and molecular structure

Fall 2023: CHEM GU4221

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
CHEM 4221	001/13626	M W 11:40am - 12:55pm 320 Havemeyer Hall	Richard Friesner	4.50	8/42

CHEM GU4103 ORGANOMETALLIC CHEMISTRY. 4.50 points.

Prerequisites: (CHEM UN2443 and CHEM UN2444), or the equivalent. Some background in inorganic and physical chemistry is helpful but not required.

Main group and transition metal organometallic chemistry: bonding, structure, reactions, kinetics, and mechanisms.

Greek and Roman Language, Literature, and Culture; Ancient Studies; Modern Greek

Department of Classics and Ancient Studies (see below for Modern Greek)

Mission

The department of Classics and Ancient Studies aims to introduce students to a knowledge of the languages and an understanding of the literature and culture of ancient Greece and Rome in a broader Mediterranean context, as well as to develop an appreciation of how Greco-Roman antiquity has been used and abused by later eras. The study of the languages enables access to a wide range of challenging and influential ancient texts, artifacts, and ideas and also makes the grammar, syntax, and vocabulary of English and other modern languages more comprehensible. The study of these texts, in turn, develops analytical and critical thinking about both the past and the present, the ability to assess many different kinds of fragmentary evidence, as well as skills in writing, close reading and oral presentation, cultural awareness, and literary sensibility. Close cooperation between Barnard and Columbia enables ancient studies students to plan and implement an integrated, cohesive interdisciplinary study of the ancient world, including language, literature, mythology, history, religion, philosophy, law, political theory, comparative literature, medieval studies, gender studies, art history, and material culture. The texts and monuments of the Greco-Roman world served as the basis of Western education until the twentieth-century and retain a core position in modern humanities and social thought that is currently expanding beyond the West. Exploring, analyzing, and assessing this legacy is the central goal of the program.

Majors

The department offers two majors. The majors in Classics (Greek, Latin, or Classics) center on work in the original languages, whereas the major in Ancient Studies has an interdisciplinary focus. All members

of the department are available for major advising and students ideally choose an adviser who can help them develop their required senior essays.

The Major in Classics (Greek), Classics (Latin), or Classics (Latin and Greek)

Classics majors develop a knowledge of Greek and Latin as a gateway to the study of the literature, history, and culture of Greece and Rome. Students can start Greek and Latin at Barnard or build on skills acquired in high school. Second-year courses introduce students to original texts in Greek or Latin by authors such as Homer, Plato, Herodotus, or the Greek orators or Vergil, Ovid, Horace, Cicero, Caesar, Livy, or Sallust. A range of advanced courses in Greek or Latin focus on prose or poetic texts drawn from ancient epic, lyric poetry, philosophy, drama, history, rhetoric, or the novel and introduce critical approaches and literary and historical scholarship. Students are encouraged to take more courses in ancient history and classical literature and civilization than the two required for the major. Students planning to go on to graduate work in Classics and related fields are advised to undertake at least three years in both languages as well as to begin acquiring the ability to read scholarship in French, German, or Italian. Study abroad for one semester in either Greece or Rome is common and encouraged.

Student Learning Objectives in Classics

Students successfully completing a major in Classics should be able to attain the following objectives:

- Translate a range of Greek or Latin texts at a moderately advanced level and demonstrate an understanding of the grammar and syntax of ancient languages.
- Read, analyze, and write about ancient texts persuasively and locate texts in their historical and cultural contexts.
- Achieve familiarity with the methodologies and critical approaches and research tools deployed in classical scholarship that will be demonstrated in the successful completion of a senior research project.
- Demonstrate familiarity with the work of a variety of ancient writers, literary styles, genres, and periods and their later influences.

The Major in Ancient Studies

All students in the department are encouraged to take courses in history and classical civilization that require no knowledge of the languages. Students in the more fully interdisciplinary Ancient Studies major combine study of at least one ancient language with a range of courses in various departments focusing on language, literature, mythology, history, religion, philosophy, political theory, law, film, comparative literature, medieval studies, gender studies, art history and material culture. Each student develops a concentration in one geographical area or period but is encouraged to focus on a set of related issues and questions. Ancient Studies students will encounter many disciplinary approaches and investigate Greek and Roman and related ancient cultures in Egypt and the Near East and their influences on later Western (and to the degree possible, non-Western) culture. From this perspective, the major can complement work in other liberal arts majors. Study abroad for one semester in either Greece, Rome, Egypt, or the Near East is common and encouraged.

Student Learning Objectives in Ancient Studies

Students successfully completing a major in Classics should be able to attain the following objectives:

- Read, analyze, and write about ancient texts persuasively and locate texts in their historical and cultural contexts.
- Achieve familiarity with the methodologies and critical approaches and research tools deployed in classical scholarship and in related disciplines studied by each individual student that is demonstrated in the successful completion of a senior research project.
- Achieve familiarity with the work of a variety of ancient writers on a range of interdisciplinary topics.
- Engage in detail with the methods needed to analyze the range of fragmentary evidence, both written and material, required in an interdisciplinary study of the ancient Mediterranean world.
- Demonstrate familiarity with one geographical area or period in the Greek, Latin, or related ancient Mediterranean worlds.
- Assess differences among and relations between ancient cultures and analyze the use and abuse of evidence about the ancient world by later cultures.

The Greek or Latin Play

The Classics Department is the beneficiary of the Matthew Alan Kramer Fund, whose principal purpose is to support the production of plays in Ancient Greek or Latin. Students of the department have produced *Antigone*, *Medea*, *Alcestis*, *Persians*, *Eumenides*, *Cyclops*, *Electra*, *Clouds*, *Trojan Women*, *Rudens*, *Helen*, *Trachiniae*, *Bacchae*, *Hippolytus*, *Heracles*, *Birds*, and *Persa*, which have provided an exciting and different learning experience for the participants.

Classics in New York

Every effort is made to introduce students to considerable resources for the study and influence of the Classics in New York City, including plays, films, and museum and gallery visits.

Careers Undertaken by Classics and Ancient Studies Majors

Our majors graduate well prepared for graduate careers in Classics and related academic fields such as history, philosophy, archaeology, art history or comparative literature. They also enter successful careers in secondary school teaching, museum work and arts administration, as well as law, medicine and biological sciences, business, politics, public service in both the government and non-profit sectors, journalism and creative writing, publishing, library science, and the arts (especially theater, film, and dance).

Study Abroad

The following three programs are pre-approved, but students may discuss other options with their advisers.

ICCS in Rome

Barnard College participates in the program of the [Intercollegiate Center for Classical Studies in Rome](#). Majors in Classics or Ancient Studies are eligible to apply for admission to the program of the Rome Center for one semester, preferably in the junior year. Courses taken at the Rome Center may be used in the major and, in some cases, may be used to satisfy distribution requirements. The program provides undergraduate students with an opportunity to study ancient history and archaeology in Rome, Greek and Latin literature, and ancient and renaissance art. Students planning to apply to the ICCS should plan to take Roman history before applying and preference is given to those with two or more years of Latin and Greek. Applications for the spring term are due in mid-October and for the fall term in mid-March. Because of Sicily's ancient connections to Greece, the program focuses more on the Hellenic culture of Magna Graeca and Sicily's place as a cultural crossroads in the ancient Mediterranean.

ICCS in Sicily

The focus of [ICCS Sicily](#), as in the original program in Rome, will be on classical languages as well as on local manifestations of history and civilization in the ancient Mediterranean world. Based at the University of Catania, in a city with a rich ancient, medieval and Baroque history, this program offers extensive local academic resources and close proximity to both the mainland and other towns on the island.

CYA: College Year In Athens

The [College Year in Athens](#) (CYA) program offers either one semester or a full year of courses in ancient and modern Greek languages, history, art, and archaeology, as well as advanced Latin and courses in post-classical and modern Greek culture, politics, and history. Almost 200 colleges participate in the CYA. Applications for the spring term must be received by mid-October and by mid-May for the fall term.

Summer Study

Students interested in summer programs in archaeology should consult the website of the [American Institute for Archaeology \(AIA\)](#) under fieldwork.

The CUNY Greek and Latin Workshops in midtown Manhattan offer special intensive summer language programs in Greek and Latin. Other institutions including Columbia offer summer language courses. The American Numismatics Society in Manhattan offers courses in the study of ancient coins.

Barnard College is a Supporting Institution of the American School of Classical Studies at Athens and the American Academy in Rome, and certain privileges of those schools are open without fee to graduates of the College.

Requirements for the Majors in Classics and Ancient Studies

Fulfilling the Foreign Language requirement

Students may fulfill the foreign language requirement in Greek by completing GREK V1202 Intermediate Greek II: Homer, or in Latin by completing LATN UN1202 Intermediate Latin II, or by completing one course in Greek or Latin at the 3000 level or above. In rare instances, the language requirement may be fulfilled by passing an exemption examination with a sufficiently high grade. This examination tests the student's knowledge of grammar and her ability to translate written Greek or Latin.

Major in Classics

Greek

The major in Greek is fulfilled by taking the following courses as well as five other courses above the elementary level in Ancient Greek.

GREK UN3996	THE MAJOR SEMINAR
GREK W4139	Elements of Prose Style
GREK GU4106	HISTORY OF GREEK LITERATURE II
GREK GU4105	HISTORY OF GREEK LITERATURE I

Latin

The major in Latin is fulfilled by taking one term of the following courses, as well as five other courses in Latin.

LATN UN3996	THE MAJOR SEMINAR
LATN GU4105	LAT LITERATURE OF THE REPUBLIC
LATN GU4106	HISTORY OF LATIN LIT II
LATN GU4139	Elements of Prose Style

Students planning to go on to graduate study in classics are strongly urged to take both semesters of GREK GU4105 HISTORY OF GREEK LITERATURE I, GREK GU4106 HISTORY OF GREEK LITERATURE II or LATN GU4105 LAT LITERATURE OF THE REPUBLIC, LATN GU4106 HISTORY OF LATIN LIT II. Majors in Latin, especially those who have begun their study in high school, are strongly advised to take at least two semesters of Greek.

In addition, one semester of ancient history appropriate to the major and two relevant courses in ancient art, classical civilization or literature, ancient philosophy, or religion are required for either the Greek or the Latin major. Students who do not opt to take a term of either GREK GU4105 HISTORY OF GREEK LITERATURE I-GREK GU4106 HISTORY OF GREEK LITERATURE II or LATN GU4105 LAT LITERATURE OF THE REPUBLIC-LATN GU4106 HISTORY OF LATIN LIT II are required to take CLLT GU4300 THE CLASSICAL TRADITION, as one of their three required courses in translation.

A student may elect to major in both Greek and Latin (Classics) by completing the major requirements in one language and five courses above the elementary level in the other.

Major in Ancient Studies

Each student, after consultation with the Barnard Chair, chooses an advisor whose field is closely related to her own and with whom she will plan her senior essay.

A total of 36 points are required in the major, including at least four courses in one geographical area or period; courses in at least three departments to ensure proper interdisciplinary training and expertise; the elementary sequence of a relevant ancient language; the appropriate history course; ANCS UN3995 The Major Seminar, and at least the first semester of Ancient Studies ANCS UN3998 DIRCTD RSRCH-ANCIENT STUDIES I, ANCS V3999 Directed Research in Ancient Studies (senior essay). Ancient language courses may be used toward the major requirement; however, where a second ancient language is offered, one second-year sequence must be offered for a student to gain credit for the first year. As noted above, an annual list of the courses meeting the requirements for Ancient Studies in any particular year appears separately on the website.

Requirements for the Minors in Classics, Modern Greek, and Ancient Studies

Minor in Greek

The minor in Greek requires five courses in Greek at the 1200 level or above.

Minor in Latin

The minor in Latin requires five courses in Latin at the 1200 level or above.

Minor in Modern Greek

The Minor in Modern Greek requires five courses in Modern Greek at the 1200 level or above. Modern Greek courses are taught entirely at Columbia.

Minor in Ancient Studies

The minor in Ancient Studies requires five courses that focus on the ancient Mediterranean world. At least one course in ancient Mediterranean history is required. Interested students should consult the department and the Classics and Ancient Studies website on selecting a complementary and coherent set of courses for this minor.

CLCV UN2441 EGYPT IN CLASSICAL WORLD. 4.00 points.

This class tracks Egypt's entanglement in the Greco-Roman world from the country's initial welcoming of Greek merchants and mercenaries to the point at which Justinian shuttered its last remaining temple. In examining archaeological, textual, and artistic evidence, we'll pay close attention to the flashpoints that divided society along ethnic lines (viz. Egyptian, Nubian, Levantine, Greek, and Roman inhabitants) and according to religious belief (among polytheists of Egyptian and Greek heritage, Jewish Egyptians, and Christians) as well as to syncretism, mixed marriages, and other integrative aspects of society

CLCV BC3000 ETHNICITY, RACE, #POWER IN ANCT MEDITERR. 4.00 points.

Concepts of ethnicity and race – deeply complex and often fraught – are catalyzing forces in modern society. This seminar explores the changing definitions and resonances of these categories in ancient contexts. Course readings will cover a variety of societies but return repeatedly to Egypt and Nubia as a touchstone. Over the course of the semester, we will explore how Nubians and Egyptians viewed one another as well as how both Egyptians and Nubians experienced and were experienced by immigrants, colonizers, and travelers. Throughout the ancient Mediterranean, as we'll see, self-definitions and cultural boundaries shifted radically according to changing power dynamics both within groups and between them. In seminar discussions, we'll pose the following questions: How and when did groups who saw themselves as distinct from one another cooperate and intermarry? Define themselves in opposition to other groups or actively blur boundaries? Mobilize concepts of ethnicity or race to justify oppression? Engage in competition or resistance? Where, we will ask, did societies fracture and/or integrate? And what role did bicultural individuals play in cultural conversations and mediations? We will also seek to understand how our conceptions of ethnicity and race in the past are influenced not only by the biases of the present but by the methodologies we employ. In our discussions and investigations this semester we will learn a great deal about Northeast Africa in antiquity – but, so too, about ethnicity, concepts of race, and power throughout the ancient Mediterranean

CLCV BC3001 Mapping the Ancient Novel: Affordances, Precarities, and Predilections. 4.00 points.

This seminar explores the affordances and precarities of a variety of ancient landscapes and urban centers. So too it delves into the predilections of their inhabitants. At some point in the late first or second centuries CE, when the Eastern Mediterranean was under the authority of the Roman Empire, Greek writers and readers turned to escapist literature in which incredibly beautiful couples (predominantly heterosexual but also homosexual) met, fell and love, suffered setbacks, and ultimately... [no spoilers here]. While suffering the travails that separated them, they were often transported (by bandits, pirates, slave traders, armies, etc.) all across the Eastern Mediterranean. Over the semester, we will map these movements using the open-source geographical information system QGIS and discuss the choices that authors (and their characters) made, the cultural perceptions of settlements and their inhabitants, and the various affordances of different geographic regions (where bandits lurk, for example). We will also read and discuss material that will help us ascertain the degrees of fantasy vs. plausibility, not only in the mechanics of movement but in the religious and social practice of the protagonists

CLCV UN3059 WORLDS OF ALEXANDER THE GREAT. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This seminar looks at the narrative and the historical context for an extraordinary event: the conquest of the Persian empire by Alexander III of Macedonia, conventionally known as "Alexander the Great". We will explore the different worlds Alexander grew out of, confronted, and affected: the old Greek world, the Persian empire, the ancient near-east (Egypt, Levant, Babylonia, Iran), and the worlds beyond, namely pre-Islamic (and pre-Silk Road) Central Asia, the Afghan borderlands, and the Indus valley. The first part of the course will establish context, before laying out a narrative framework; the second part of the course will explore a series of themes, especially the tension between military conquest, political negotiation, and social interactions. Overall, the course will serve as an exercise in historical methodology (with particular attention to ancient sources and to interpretation), an introduction to the geography and the history of the ancient world (classical and near-eastern), and the exploration of a complex testcase located at the contact point between several worlds, and at a watershed of world history

CLLT UN3125 Book Histories and the Classics. 3 points.

Prerequisites: HUMA CC1001 or HUMA GS1001 COCI CC1101 ,HUMA CC1001 or HUMA GS1001 or COCI CC1101

This seminar will introduce students of classical literature to the history of the Western book, and to the relationship between book history and the transmission and reception history of the literature of ancient Greece and Rome. Students will also learn how to make use of rare books materials including manuscripts and early printed books.....

CLLT V3132 Classical Myth. 3 points.

BC: Fulfillment of General Education Requirement: Literature (LIT).

Survey of major myths from the ancient Near East to the advent of Christianity, with emphasis upon the content and treatment of myths in classical authors (Homer, Hesiod, Aeschylus, Euripides, Sophocles, Vergil, Livy, Ovid).

CLCV BC3212 TOPICS IN ANCIENT DRAMA. 0.00-3.00 points.

This course is designed as an accompaniment to the Greek or Latin play that is put on by the Barnard and Columbia Ancient Drama Group each year, though it is open to any student interested in the aesthetics and politics of theater and drama. Course focus and some content will rotate year to year, calibrated to serve the play or plays chosen by the student director. We will read these and other relevant other plays or similarly adjacent texts, as well as scholarly literature on topics centered around the body in performance, including ancient theaters and stage space, costumes and masks, deportment and gestures, proxemics, and so on. We will also explore aspects of ancient drama and theatricality that relate to translation and reception, as well as inflections of gender and status. Other topics may include the mythic background (e.g., in epic and/or lyric), politics of aesthetics in ancient Athens, and gender-genre dynamics. Each component will extend over three or four classes and consider the ancient plays through readings of primary texts (in translation) and conceptual / contextual backgrounds. There will be an additional class hour for those who wish to read the play in the original language (signed up for as a 1-point directed reading)

CLCV BC3333 Archaeology of Crisis: The Collapse of the Late Bronze Age in the Eastern Mediterranean World. 4.00 points.

In this immersive seminar, we'll examine the "globalized" palace network that spanned the Eastern Mediterranean in the Late Bronze Age, paying especially close attention to the Mycenaean culture zone. We'll think about the turmoil that resulted in the destruction or abandonment of all known palaces in the Eastern Mediterranean, follow the trail of some of the armed refugees that both fled from and caused yet more turmoil, and end up in Philistia, the new homeland of a subset of these migrants. In this region, now constituting the Gaza Strip and Southern Israel, we'll witness competition, conflict, and cooperation in an ancient setting, as these newcomers selectively intermarried with locals, negotiated cultural and political boundaries, shifted alliances, created a political confederation, and eventually faded from view. Through readings, discussions, and short informal presentations, we'll explore the methodologies by which archaeologists seek to gain a nuanced understanding of the past. We'll also be closely attuned to how present challenges and crises spark new historical paradigms

CLCV GU4025 ARISTOTLE'S POETICS AND GREEK POETRY. 3.00 points.

This course is designed as an upper-level seminar centered on a central text in the ancient and modern literary canon. The course does not require more than a passing familiarity with the Poetics or with Greek tragedy nor knowledge of Greek. In addition to reading and comparing various translations of the Poetics, we will look at scenes from Sophocles' Oedipus Tyrannos and Euripides' Iphigeneia in Taurus, both of which were Aristotle's favorite exemplary tragedies, though for quite different reasons

CLCV GU4440 Society # Environment in the Ancient Mediterranean World. 4.00 points.

In this seminar we seek, quite literally, to map out the influence of environment on culture and history in the ancient Mediterranean. Students will learn to create custom maps in QGIS (a free and open-source cross-platform geographic information system application) that will engage with themes discussed in seminar. Areas of interest include the various ways in which different types of human societies (e.g., pastoralists, autonomous villages, cities, colonists, kingdoms, empires, and insurrectionists) have sought to exploit specific environmental niches for their own purposes. So, too, we'll be attuned to the ways in which the natural world remained ungovernable and exerted its own agency via storms, earthquakes, volcanic eruptions, diseases, droughts, floods, and fires. Some familiarity with either the premodern Mediterranean world or QGIS is recommended but not required

CLCV GU4110 Gender and Sexuality In Ancient Greece. 3 points.

Prerequisites: sophomore standing or the instructor's permission. Examination of the ways in which gender and sexuality are constructed in ancient Greek society and represented in literature and art, with attention to scientific theory, ritual practice, and philosophical speculation. Topics include conceptions of the body, erotic and homoerotic literature and practice, legal constraints, pornography, rape, and prostitution.

This course condenses the second semester of Intermediate Latin (2102) into a sixweek summer session. Its goal is to further develop reading and interpretation skills in Classical Latin through engagement with Roman authors while continuing to review the essentials of Latin grammar. In the first half of the course, we cover selections from Ovid's epic poem, the Metamorphoses; in the second, we take up the prose writings of Seneca the Younger including selections from his Epistulae Morales and the philosophical dialogue De vita beata. LATN UN3035 Poetry as Neurosis: Lucan's Bellum Civile. 3 points.

This course is an intensive study of Lucan's revolutionary and enigmatic Bellum Civile, the epic masterpiece of the Neronian age, which was admired and imitated all through the history of Western culture by authors such as Dante, Montaigne, Milton, Voltaire, Goethe, Shelley, and Baudelaire among others. The course will examine major controversies concerning the form and meaning of the poem, with special emphasis on the poetic tension created by the narrator's neurotic personality. The narration of the 49 BCE civil war between Caesar and Pompey is for Lucan the pretext for an original and intensely personal reflection on themes such as political oppression, the role of the individual in society, nihilism, self-destructiveness, mental disorder, and artistic creation. The poem will be analyzed from various critical perspectives that include rhetoric, intertextuality, deconstruction, reception theory, and psychoanalysis; no previous knowledge of any of these methodologies is required. Although an acceptable knowledge of Latin (intermediate or above) is assumed, the primary focus of this course is literary and sociological interpretation rather than linguistic competence. In addition to the Latin reading assignments, the poem will also be read entirely in English translation, allowing students to comprehend the whole while they engage with particular sections in the original language. The assignment for each class will include: (1) approximately five hundred lines to be read in English translation; (2) translation of short Latin passages, whose size may be adapted to the level of the class/student; (3) secondary readings.

Cognitive Science

Department website: <https://cogsci.barnard.edu/>

Cognitive Science is the cross-disciplinary study of how the mind works, with a focus on perception, reasoning, memory, attention, language, decision-making, motor control, and problem solving. Cognitive scientists often compare minds to computers. In particular, they describe mental processes as computational operations on internal representations. For instance, perception is seen as a representation of the external world that results from sensory stimulation; learning is analyzed as the addition of new representations through interactions with the environment; reasoning is treated as the addition of new representations through operations on existing representations.

Cognitive Science is an interdisciplinary field: it draws on tools and ideas from psychology, neuroscience, linguistics, economics, computer science, and philosophy, with affiliated faculty in each of these disciplines. Psychologists study the computational operations that we use to solve specific tasks; neuroscientists study the implementation of those operations in the brain; linguists study the representations involved in communication; economists study the representations involved in decisions involving uncertainty and reward; computer scientists consider how the processes involved in human cognition fit into a more general theory of computations and a larger space of tasks; and philosophers ask fundamental questions about the nature of representation and computation.

Learning Objectives

Cognitive Science majors will gain fluency in computational methods; a capacity for rigorous and careful thought; a broad understanding of the affiliated disciplines; and a deep understanding of cognition.

Cognitive science is the cross-disciplinary study of how the mind works, with a focus on perception, reasoning, memory, attention, language, decision-making, motor control, and problem solving. It draws on tools and ideas from psychology, neuroscience, linguistics, economics, computer science, and philosophy. The major requirements are designed to provide breadth in the affiliated disciplines and depth in the student's chosen area of specialization.

A major in Cognitive Science consists of seven required courses and four electives in a chosen area of specialization culminating in the senior capstone. The minimum number of courses is 13 and the minimum number of points is 39.

Required courses (7 classes)

- COGS UN1001 Introduction to Cognitive Science Introduction to Cognitive Science
- One course in each of four areas: psychology, neuroscience, philosophy, and linguistics.
- Two courses in a fifth area: mathematical and computational methods. These two courses must be selected in consultation with the program director to make sure they aren't redundant.
- Please see below for the lists of approved courses in each area.

Area of Specialization and Electives (four classes)

Students must choose an area of specialization when they declare the major and choose four electives to build expertise in that area.

- Possible areas of specialization include: aesthetics, cognitive development, cognitive linguistics, cognitive neuroscience, cognitive psychology, computer vision, consciousness, decision science, human-computer interaction, intelligence, learning, memory, natural language processing, neuroeconomics, perception, and social cognition.
- The choice of specialization is flexible; there is not a predefined list. This is an opportunity for students to be creative; a student who has ideas about a new specialization that they would like to pursue may do so with the approval of the program director.
- Although there is no predefined list, each student's area of specialization and choice of electives must be approved by the program director, and there must be at least one faculty member affiliated with the program who has expertise in the student's chosen area.
- The program director will consult with a faculty member who has expertise in the student's area of specialization to ensure that the student's electives will provide sufficient preparation for the senior project.
- Please see below for a list of courses that students might want to consider as possible electives (depending upon their specialization), but please note that this list is not definitive. Any Barnard or Columbia (or approved transfer) course that builds expertise in the student's area of specialization may be counted as an elective with the approval of the program director.

Senior Capstone

Students may fulfill the Senior Capstone requirement in two ways: with a year-long senior project, or by taking two additional advanced courses.

- The senior project is a year-long project in a student's area of specialization under the supervision of a chosen advisor. The project could be an experiment or a paper.
 - Students who do senior projects must register for both COGS UN3903 Senior Project (3 points) and COGS UN3901 Senior Project Seminar (1 point) in the fall and COGS UN3904 Senior Project (3 points) and COGS UN3902 Senior Project Seminar (1 point) in the spring (8 points total).
 - The Senior Project Seminar is an opportunity for students to present their projects to each other.
- While a year-long project is recommended, students may also satisfy the senior capstone requirement by taking two advanced courses, at least one of which must include a significant paper or project. The courses must be chosen in consultation with the program director and must be related to the student's area of specialization. Both courses should be at the 3000-level or above.

Courses approved to count in each area:

Psychology:

PSYC BC2107 PSYCHOLOGY OF LEARNING - LEC. 3.00 points.

Prerequisites: BC1001 Introduction of Psychology or permission of the instructor. Enrollment limited to 72 students.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering the basic methods, results, and theory in the study of how experience affects behavior. The roles of early exposure, habituation, sensitization, conditioning, imitation, and memory in the acquisition and performance of behavior are studied. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1440 Experimental: Learning and Motivation

PSYC BC2110 PERCEPTION-LECTURE. 3.00 points.

Prerequisites: PSYC BC1001 Introduction to Psychology or COGS UN1001 Introduction to Cognitive Science or permission of the instructor. Lecture course covering an introduction to problems, methods, and research in perception. Discussion of psychological studies of seeing, hearing, touching, tasting, and smelling. Note that this lecture can be taken without its affiliated lab, PSYC BC2109, however, if a student completes this lecture, she cannot enroll in the lab in a later semester. The following Columbia University course is considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: PSYC UN1480 Perception and Attention; and PSYC UN2230 Perception and Sensory Processes

PSYC UN2270 Perception and Cognition in Social Life. 3.00 points.

This course focuses on perception and cognition in social life. We start by addressing the core social motivations we experience in everyday life (e.g., our desire to feel like we belong to a group). Next, we examine how these motivations shape our basic sensory experiences—for example why we can't help but anthropomorphize inanimate objects or enjoy holding hands with our partner. We then examine the mental strategies we use to meet our social needs, such as how we figure out other people's thoughts and feelings, as well as our own. Finally, we wrap up by examining how these motivations, perceptions, and cognitions play out not just within one mind – but also between minds in everyday social interaction. This course will not only teach you the fundamental science behind the social mind. It will also let you see your own social life through a whole new lens

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology

Prerequisites: PSYC UN1001 or equivalent introductory course in Psychology This course provides an in-depth survey of data and models of a wide variety of human cognitive functions. Drawing on behavioral, neuropsychological, and neuroimaging research, the course explores the neural mechanisms underlying complex cognitive processes, such as perception, memory, and decision making. Importantly, the course examines the logic and assumptions that permit us to interpret brain activity in psychological terms

PSYC BC3394 METACOGNITION. 4.00 points.

Prerequisites: BC1001, and one psychology laboratory course; final enrollment determined on the first day of class Metacognition is one of the latest psychological buzzwords, but what exactly is metacognition? Metacognition enables us to be successful learners, problem solvers, and decision makers, and as often been used synonymously with words such as language, awareness, and consciousness. In this seminar, we will examine various components of metacognition, including its role in learning and memory, and its existence in various non-human populations. In addition, we will explore the fragility of metacognition, including illusions of confidence and harmful control strategies that people use. Readings will include classic and important recent papers in the field, looking at metacognition as a higher-level cognitive process, and as knowledge individuals use to guide behavior

Please note that PSYC UN2430 Cognitive Neuroscience may be used to fulfill either the Neuroscience requirement or the Psychology requirement, but not both.

Neuroscience**NSBV BC1001 INTRODUCTION TO NEUROSCIENCE. 3.00 points.**

This course is required for all the other courses offered in Neuroscience and Behavior. The course introduces students to the anatomy and physiology of the nervous system. The topics include the biological structure of the nervous system and its different cell types, the basis of the action potential, principles of neurotransmission, neuronal basis of behavior, sleep/wake cycles, and basic aspects of clinical neuroscience

NSBV BC2008 ADAPTIVE OR ARRESTED DEVELOPMENT OF THE ADOLESCENT BRAIN. 3.00 points.

The teen brain has received a lot of media coverage with advances in brain imaging techniques that provide a voyeuristic opportunity for us to look under the hood of the behaving adolescent brain. This course will cover empirical and theoretical accounts of adolescent-specific changes in brain and behavior that relate to the development of self control. These accounts of adolescent brain and behavior will then be discussed in the context of relevant legal, social and health policy issues. Lectures and discussion will address: Under what circumstances self control appears to be diminished in adolescents. How do dynamic changes in neural circuitry help to explain changes in self control across development? When does the capacity for self control fully mature? Are these changes observed in other species? How might these changes be evolutionarily adaptive and when are they maladaptive? How might understanding adolescent brain and behavioral development inform interventions and treatments for maladaptive behavior or inform policy for changing the environment to protect youth?

PSYC UN2435 Social Neuroscience. 3.00 points.

This course will provide a broad overview of the field of social neuroscience. We will consider how social processes are implemented at the neural level, but also how neural mechanisms help give rise to social phenomena and cultural experiences. Many believe that the large expansion of the human brain evolved due to the complex demands of dealing with social others—competing or cooperating with them, deceiving or empathizing with them, understanding or misjudging them. What kind of “social brain” has this evolutionary past left us with? In this course, we will review core principles, theories, and methods guiding social neuroscience, as well as research examining the brain basis of processes such as theory of mind, emotion, stereotyping, social group identity, empathy, judging faces and bodies, morality, decision-making, the impact of culture and development, among others. Overall, this course will introduce students to the field of social neuroscience and its multi-level approach to understanding the brain in its social context

NSBV BC3381 Visual Neuroscience: From the Eyeball to the Mind's Eye. 4.00 points.

By absorbing electromagnetic radiation through their eyes, people are able to catch frisbees, recognize faces, and judge the beauty of art. For most of us, seeing feels effortless. That feeling is misleading. Seeing requires not only precise optics to focus images on the retina, but also the concerted action of millions of nerve cells in the brain. This intricate circuitry infers the likely causes of incoming patterns of light and transforms that information into feelings, thoughts, and actions. In this course we will study how light evokes electrical activity in a hierarchy of specialized neural networks that accomplish many unique aspects of seeing. Students will have the opportunity to focus their study on particular aspects, such as color, motion, object recognition, learning, attention, awareness, and how sight can be lost and recovered. Throughout the course we will discuss principles of neural information coding (e.g., receptive field tuning, adaptation, normalization, etc.) that are relevant to other areas of neuroscience, as well as medicine, engineering, art and design

PHIL UN3252 Philosophy of Language and Mind. 3 points.

This course will provide an introduction to meaning, reference, understanding, and content in language, thought, and perception. A central concern will be the question of the relation of meaning to truth-conditions, and what is involved in language and thought successfully latching on to reality. If you have not already taken an elementary course in first order logic, you will need to catch up in that area to understand some crucial parts of the course. All the same, the primary concerns of the course will be philosophical, rather than technical.

PHIL UN3655 TOPICS IN COGNITIVE SCIENCE AND PHILOSOPHY. 3.00 points.

This course will focus on one topic at the intersection of cognitive science and philosophy. Potential topics include free will, consciousness, modularity, mental representation, probabilistic inference, the language of thought, and the computational theory of mind

PHIL UN3912 SEMINAR. 3.00 points.

Required of senior majors, but also open to junior majors, and junior and senior concentrators who have taken at least four philosophy courses. This exploration will typically involve writing a substantial research paper. Capped at 20 students with preference to philosophy majors

Linguistics**LING UN3101 INTRODUCTION TO LINGUISTICS. 3.00 points.**

An introduction to the study of language from a scientific perspective. The course is divided into three units: language as a system (sounds, morphology, syntax, and semantics), language in context (in space, time, and community), and language of the individual (psycholinguistics, errors, aphasia, neurology of language, and acquisition). Workload: lecture, weekly homework, and final examination

ECON GU4850 COGNITIVE MECH # ECON BEHAVIOR. 4.00 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201
 Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201
 Standard economic theory seeks to explain human behavior (especially in economic settings, such as markets) in terms of rational choice, which means that the choices that are made can be predicted on the basis of what would best serve some coherent objective, under an objectively correct understanding of the predictable consequences of alternative actions. Observed behavior often seems difficult to reconcile with a strong form of this theory, even if incentives clearly have some influence on behavior; and the course will discuss empirical evidence (both from laboratory experiments and observations in the field) for some well-established anomalies. But beyond simply cataloguing anomalies for the standard theory, the course will consider the extent to which departures from a strong version of rational choice theory can be understood as reflecting cognitive processes that are also evident in other domains such as sensory perception; examples from visual perception will receive particular attention. And in addition to describing what is known about how the underlying mechanisms work (something that is understood in more detail in sensory contexts than in the case of value-based decision making), the course will consider the extent to which such mechanisms — while suboptimal from a normative standpoint that treats perfect knowledge of one's situation as costless and automatic — might actually represent efficient uses of the limited information and bounded information-processing resources available to actual people (or other organisms). Thus the course will consider both ways in which the realism of economic analysis may be improved by taking into account cognitive processes, and ways in which understanding of cognitive processes might be advanced by considering the economic problem of efficient use of limited (cognitive) resources

PHIL UN1401 INTRODUCTION TO LOGIC. 3.00 points.

Explicit criteria for recognizing valid and fallacious arguments, together with various methods for schematizing discourse for the purpose of logical analysis. Illustrative material taken from science and everyday life

ECON BC1007 MATH METHODS FOR ECONOMICS. 4.00 points.

Covers basic mathematical methods required for intermediate theory courses and upper level electives in economics, with a strong emphasis on applications. Topics include simultaneous equations, functions, partial differentiation, optimization of functions of more than one variable, constrained optimization, and financial mathematics. This course satisfies the Calculus requirement for the Barnard Economics major. NOTE: students who have previously taken Intermediate Micro Theory (ECON BC3035 or the equivalent) are *not* allowed to take Math Methods for Economics

COMS BC1016 Introduction to Computational Thinking and Data Science. 3.00 points.

This course and its co-requisite lab course will introduce students to the methods and tools used in data science to obtain insights from data. Students will learn how to analyze data arising from real-world phenomena while mastering critical concepts and skills in computer programming and statistical inference. The course will involve hands-on analysis of real-world datasets, including economic data, document collections, geographical data, and social networks. The course is ideal for students looking to increase their digital literacy and expand their use and understanding of computation and data analysis across disciplines. No prior programming or college-level math background is required

COMS W1007 Honors Introduction to Computer Science. 3 points.

Lect: 3.

Prerequisites: AP Computer Science with a grade of 4 or 5 or similar experience.

An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.

COMS W3134 Data Structures in Java. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W1004) or knowledge of Java.

Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, COMS W3136, COMS W3137.

ENGI E1006 INTRO TO COMP FOR ENG/APP SCI. 3.00 points.

An interdisciplinary course in computing intended for first year SEAS students. Introduces computational thinking, algorithmic problem solving and Python programming with applications in science and engineering. Assumes no prior programming background

STEM BC2223 PROGRAMMING BEHAV SCIENCES. 4.00 points.

Possible Electives

Please note that the list of possible electives below is just to give students ideas. Whether or not a student can count a particular course as an elective depends upon the student's area of specialization. Any course that builds expertise in the student's area of specialization may be counted as an elective with the program director's approval, regardless of whether it is listed below; a course that does not build expertise in the student's area of specialization may not be counted as an elective even if it is listed below.

ANTH UN1009 INTRO TO LANGUAGE # CULTURE. 3.00 points.

This is an introduction to the study of the production, interpretation, and reproduction of social meanings as expressed through language. In exploring language in relation to culture and society, it focuses on how communication informs and transforms the sociocultural environment

COGS GU4050 Natural and Artificial Neural Networks. 3.00 points.

Artificial neural networks can do amazing things. They can play chess, recognize faces, predict human behavior, learn language, and create art. Natural neural networks – that is to say, brains – can do many of the same things, often a little more clumsily. But, unlike artificial networks, they can switch seamlessly between two tasks, learn to perform them without supervision, and do not need to be told to – actually, they can choose to refuse. Brains provided the initial inspiration for the artificial networks, which is why we call them 'artificial neural networks.' But how deep are the similarities between the two? Do they share more than a few abilities, a similar structure, and a common nomenclature?

COGS GU4051 Natural and Artificial Neural Networks Lab. 1.00 point.

Understanding the powers and limitations of artificial neural networks requires exposure to both concepts and practice. This lab section focuses on the latter, supplementing the conceptual framework from the lecture, Natural and Artificial Neural Networks. The lab focuses on giving students without a background in computer science hands-on experience with basic programming in Python, tools for data science, and a variety of machine learning algorithms

COGS GU4800 Resource-Constrained Decision Making. 4.00 points.

There is a fundamental puzzle about human intelligence: How are we incredibly smart and stupid at the same time? Humans deal successfully with the world in a way that no machine can (for now), yet we routinely behave in ways that seem grossly inconsistent with normative canons of rational inference and rational choice. This course will seek to resolve the paradox by exploring the idea that while we make many mistakes, these mistakes are not haphazard; instead, they reflect a brain that is highly efficient at inference and decision making within the information, time, and energy constraints imposed by the finite resources available to it. In other words, our brains may be "resource-rational" even if they fail to conform to ideal canons of rationality. We will explore this idea by considering the structure of errors, biases and illusions in the context of perceptual judgments, more abstract cognitive judgments (perceptions of numerical magnitudes or probabilities), and economic decisions; we will see that there are many analogies between the kinds of characteristic errors that people make in all of these contexts. A potential explanatory framework, which can be applied across contexts, considers what optimal decisions should be like in the case of a decision unit that has only imprecise information about its situation. Hence statistical modeling and statistical inference are key elements in the computational models of human decision making that we wish to discuss

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructor's permission.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or the instructors permission. Computational approaches to natural language generation and understanding. Recommended preparation: some previous or concurrent exposure to AI or Machine Learning. Topics include information extraction, summarization, machine translation, dialogue systems, and emotional speech. Particular attention is given to robust techniques that can handle understanding and generation for the large amounts of text on the Web or in other large corpora.

COMS W4772 Advanced Machine Learning. 3 points.

Lect: 3.

Prerequisites: (COMS W4771) or instructor's permission; knowledge of linear algebra & introductory probability or statistics is required.

An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally? Topics include appearance-based models, principal and independent components analysis, dimensionality reduction, kernel methods, manifold learning, latent models, regression, classification, Bayesian methods, maximum entropy methods, real-time tracking, extended Kalman filters, time series prediction, hidden Markov models, factorial HMMs, input-output HMMs, Markov random fields, variational methods, dynamic Bayesian networks, and Gaussian/Dirichlet processes. Links to cognitive science.

CPLS GU4510 The Mind Between Literature and the Brain. 3.00 points.

What – to paraphrase Catherine Malabou – should literary studies do with neuroscience? How should critics and theorists approach the wealth of research about the neural bases of cognition? Should empirical findings about the brain supplant or complement interpretative and speculative theories of the psyche in the literary critic's toolkit? Is the psyche and its "inner life" still a meaningful level of analysis for literary scholars? The field of "cognitive literary studies," as the heterogeneous body of work drawing from research psychology, cognitive science and neuroscience is known, has steadily grown in stature over the last few decades, in lockstep with the burgeoning prominence of neuroscience in popular culture and within the academy. Some of its exponents argue that the rise of neuroscience must imply the decline of psychoanalysis and other "folk" psychologies. Others point to the constraints of reproducibility and of the empirical method as insurmountable handicaps for the study of complex cultural objects such as literature. In this seminar, we will consider the literary experience as a whole – from the act of reading and comprehension, to the affective impact of reading and even the lifelong permanence in one's memory and imagination of what Eve Sedgwick called "phantasy books" – and ask which parts of the experience can be fruitfully elucidated by reference to empirical knowledge about neural processes. Individual classes will focus on neuro-phenomenology, neuro-psychoanalysis, neuro-aesthetics, the neuroscience of reading, theory of mind, affect studies and critical theory. We complement these theoretical explorations with a small archive of twentieth-century writing (by Virginia Woolf, Samuel Beckett, Alain Robbe-Grillet, W.G. Sebald and Sarah Kane) that questions and subverts our assumptions about the representation of mental life in literary work. The course has no pre-requisites and it is open to undergraduate and graduate students

ECON GU4840 BEHAVIORAL ECONOMICS. 3.00 points.

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213 Within economics, the standard model of behavior is that of a perfectly rational, self interested utility maximizer with unlimited cognitive resources. In many cases, this provides a good approximation to the types of behavior that economists are interested in. However, over the past 30 years, experimental and behavioral economists have documented ways in which the standard model is not just wrong, but is wrong in ways that are important for economic outcomes. Understanding these behaviors, and their implications, is one of the most exciting areas of current economic inquiry. The aim of this course is to provide a grounding in the main areas of study within behavioral economics, including temptation and self control, fairness and reciprocity, reference dependence, bounded rationality and choice under risk and uncertainty. For each area we will study three things: 1. The evidence that indicates that the standard economic model is missing some important behavior 2. The models that have been developed to capture these behaviors 3. Applications of these models to (for example) finance, labor and development economics As well as the standard lectures, homework assignments, exams and so on, you will be asked to participate in economic experiments, the data from which will be used to illustrate some of the principals in the course. There will also be a certain small degree of classroom 'flipping', with a portion of many lectures given over to group problem solving. Finally, an integral part of the course will be a research proposal that you must complete by the end of the course, outlining a novel piece of research that you would be interested in doing

Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412
 Prerequisites: ECON UN3211 and ECON UN3213 and ECON UN3412
 Neoclassical finance theory seeks to explain financial market valuations and fluctuations in terms of investors having rational expectations and being able to trade without costs. Under these assumptions, markets are efficient in that stocks and other assets are always priced just right. The efficient markets hypothesis (EMH) has had an enormous influence over the past 50 years on the financial industry, from pricing to financial innovations, and on policy makers, from how markets are regulated to how monetary policy is set. But there was very little in prevailing EMH models to suggest the instabilities associated with the Financial Crisis of 2008 and indeed with earlier crises in financial market history. This course seeks to develop a set of tools to build a more robust model of financial markets that can account for a wider range of outcomes. It is based on an ongoing research agenda loosely dubbed "Behavioral Finance", which seeks to incorporate more realistic assumptions concerning human rationality and market imperfections into finance models. Broadly, we show in this course that limitations of human rationality can lead to bubbles and busts such as the Internet Bubble of the mid-1990s and the Housing Bubble of the mid-2000s; that imperfections of markets – such as the difficulty of short-selling assets – can cause financial markets to undergo sudden and unpredictable crashes; and that agency problems or the problems of institutions can create instabilities in the financial system as recently occurred during the 2008 Financial Crisis. These instabilities in turn can have feedback effects to the performance of the real economy in the form of corporate investments

LING GU4202 COGNITIVE LINGUISTICS. 3.00 points.

Prerequisites: LING UN3101 previously or concurrently.
 Reading and discussion of scholarly literature on the cognitive approach to language, including: usage-oriented approaches to language, frame semantics, construction grammar, theories of conceptual metaphor and mental spaces; alongside of experimental research on language acquisition, language memory, prototypical and analogous thinking, and the role of visual imagery in language processing

LING GU4206 ADV GRAMMAR AND GRAMMARS. 3.00 points.

Prerequisites: LING UN3101 *LING W3101*.
 An investigation of the possible types of grammatical phenomena (argument structure, tense/aspect/mood, relative clauses, classifiers, and deixis). This typological approach is enriched by the reading of actual grammars of languages from Asia, Africa, Australia, and the Americas in which grammatical descriptions are read with an eye to important notional concepts of grammar: reference and categorization, case and role of arguments with predicates (ergativity), tense/aspect/mood. Discussion of meaning is combined with attention to expression (that is, morphology), which yanks our attention towards language change (grammaticalization)

LING GU4376 PHONETICS # PHONOLOGY. 3.00 points.

Prerequisites: LING UN3101
 Prerequisites: LING UN3101 An investigation of the sounds of human language, from the perspective of phonetics (articulation and acoustics, including computer-aided acoustic analysis) and phonology (the distribution and function of sounds in individual languages)

MUSI UN2320 Introduction to Music Cognition. 3.00 points.

The aim of music cognition is to understand the musical mind. This course is an introduction to a variety of key topics in this field, including human development, evolution, neural processing, embodied knowledge, memory and anticipation, cross-cultural perspectives, and emotions. The course explores recent research on these topics, as well as ways in which this research can be applied to music scholarship. Readings are drawn from fields as diverse as music theory, psychology, biology, anthropology, and neuroscience, and include general works in cognitive science, theoretical work focused on specific musical issues, and reports of empirical research

MUSI GU4325 Topics in Music Cognition. 3.00 points.

This advanced seminar builds on the Introduction to Music Cognition (MUSIC UN2320) with an in-depth inquiry into selected key topics in the field of Music Cognition. Specific topics vary each year, depending on interest and availability of instructors, and include human development; evolution; communication and music's relation to language; embodied knowledge; first-person awareness; metaphor; ineffability; neuroscience; mental representations; memory and anticipation; cross-cultural studies; emotions; musical aesthetics; artificial intelligence; agency; creativity; and music's relation to other art forms. Each semester the course delves into recent research on 3–4 of these topics, focusing in particular on how this research can be applied to questions of musical knowledge. Advanced readings are drawn from fields as diverse as music theory, psychology, biology, anthropology, philosophy, and neuroscience. They include general works in cognitive science, theoretical work focused on specific musical issues, and reports of empirical research

PHIL UN2685 INTRO TO PHIL OF LANGUAGE. 3.00 points.

This course gives students an introduction to various topics in the Philosophy of Language

PHIL UN3685 PHILOSOPHY OF LANGUAGE. 3.00 points.

This course is a survey of analytic philosophy of language. It addresses central issues about the nature of meaning, including: sense and reference, speech acts, pragmatics, and the relationship between meaning and use, meaning and context, and meaning and truth

PHIL UN3840 The Nature and Significance of Animal Minds. 3 points.

Humans have a complicated relationship with other animals. We love them, befriend them and save them. We hunt, farm and eat them. We experiment on and observe them to discover more about them and to discover more about ourselves. For many of us, our pets are amongst the most familiar inhabitants of our world. Yet when we try to imagine what is going on in a dog or cat's mind—let alone that of a crow, octopus or bee—many of us are either stumped about how to go about this, or (the science strongly suggests) getting things radically wrong. Is our thought about and behavior towards animals ethically permissible, or even consistent, Can we reshape our habits of thought about animals to allow for a more rational, richer relationship with the other inhabitants of our planet? In this course, students will reflect on two closely intertwined questions: an ethical question, what sort of relationship ought we to have with animals?; and a metaphysical question, what is the nature of animal minds? Readings will primarily be from philosophy and ethics and the cognitive sciences, with additional readings from literature and biology. There are no prerequisites for this class—it will be helpful but certainly not necessary to have taken previous classes in philosophy (especially ethics and philosophy of mind) or in cognitive science.

PHIL GU4495 PERCEPTION. 3.00 points.

This course addresses the fabulously rich range of issues about the nature of perception, including: perceptual mental representation and its content; computational explanation; justifying beliefs; knowledge and thought about perception; and perception of music. Perception is an interdisciplinary subject par excellence. Readings will be drawn from philosophy and psychology, aesthetics, and artificial intelligence

PSYC BC2163 Human Learning and Memory. 3 points.

Prerequisites: BC1001 and at least one psychology lab course, or permission of the instructor. Enrollment limited to 20 students. Survey of contemporary theories and empirical research on human memory. Topics will include sensory, short term and long term memory, levels of processing, organization, forgetting, and encoding specificity. Special topics include eyewitness testimony, amnesia, implicit memory, and false memory.

PSYC BC3164 PERCEPTION AND LANGUAGE. 4.00 points.

Prerequisites: BC 1001 and one of the following: BC2106/2107, BC2109/2110, BC2118/2119, BC2128/2129, or permission of the instructor. Enrollment limited to 20 students. Psychological investigations of spoken communication from a listener's perspective. Topics include perception and sounds of speech and the apprehension of meaning from words and utterances; the perceptual basis for rhyme and rhythm in speech; and the natural history of vocal communication.

PSYC BC3369 Language Development. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC1001, one Psychology laboratory course, one of the following: PSYC W2240, BC1128/1129, BC1129, or LIN BC V1101, and permission of the instructor. Enrollment limited to 15 students. Examines the acquisition of a first language by children, from babbling and first words to complex sentence structure and wider communicative competence. Signed and spoken languages, cross-linguistic variation and universalities, language genesis and change, and acquisition by atypical populations will be discussed.

PSYC BC3372 Comparative Cognition. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and one additional course in psychology. Or permission of the instructor. Enrollment limited to 20 students. Review and critical evaluation of current empirical research investigating cognitive processes in both human and non-human species. Topics include comparisons in episodic memory, metacognition, theory of mind, self-awareness, and language abilities.

PSYC BC3381 Theory of Mind and Intentionality. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and one other Psychology course, or permission of the instructor. Enrollment limited to 15 students. Survey and critical analysis of the developmental and neurological research on theory of mind -the attribution of mental states like belief, desire, and knowledge to others- in humans and nonhuman animals. Emphasis on the role of intentionality, stages of acquisition, neurological and genetic bases, and deficits in theory of mind.

PSYC BC3384 Social Cognition. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: BC 1001 and one of the following: BC1138/1137 Social Psychology, BC1115/1114 Cognitive Psychology, or permission of the instructor.

Survey of research from the field of social cognition, exploring cognitive processes involved in social functioning. Topics include attention, interpretation, evaluation, judgment, attribution, and memory processes. Both controlled and automatic processes will be considered, and the roles of motives, goals, and affective variables will be discussed.

PSYC BC3390 CANINE COGNITION. 4.00 points.

Prerequisites: BC1001 and one other Psychology course. Enrollment limited to 15 students. Permission of the instructor is required. An examination of the scientific study of the domestic dog. Emphasis will be on the evolutionary history of the species; the dogs social cognitive skills; canid perceptual and sensory capacities; dog-primate comparative studies; and dog-human interaction

PSYC BC3399 HUMAN AND MACHINES. 4.00 points.

Prerequisites: (PSYC BC1001) and Instructor approval
 Prerequisites: (PSYC BC1001) and Instructor approval This course will examine the social psychology of Human-Machine interactions, exploring the idea that well-established social psychological processes play critical roles in interactions with non-social objects. The first half of the seminar will examine the social psychology of perception across distinct sensory modalities (shape, motion, voice, touch), whereas the second half will focus on social psychological processes between humans and non-human entities (objects, computers, robots)

PSYC UN2250 Evolution of Cognition. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: PSYC UN1001 or PSYC UN1010 or the instructor's permission.

A systematic review of different forms of cognition as viewed in the context of the theory of evolution. Specific topics include the application of the theory of evolution to behavior, associative learning, biological constraints on learning, methods for studying the cognitive abilities of animals, levels of representation, ecological influences on cognition, and evidence of consciousness in animals.

PSYC UN2280 Developmental Psychology. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Enrollment may be limited. Attendance at the first two classes is mandatory.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the equivalent.

Prerequisites: PSYC UN1001 or PSYC UN1010 or the equivalent.

Introduction to the scientific study of human development, with an emphasis on psychobiological processes underlying perceptual, cognitive, and emotional development

PSYC UN3270 COMPUT APPROACHES-HUMAN VISION. 3.00 points.

This course will be offered in Fall 2016.

Prerequisites: some background in psychology and/or neurophysiology (e.g., PSYC UN1001, PSYC UN1010, PSYC UN2230, PSYC UN2450; BIOL UN3004 or BIOL UN3005) is desirable. See instructor if you have questions about your background. Some background in mathematics and computer science (e.g., calculus or linear algebra, a programming language) is highly recommended.

PSYC UN3290 Self: A Cognitive Exploration (Seminar). 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: PSYC UN1001 or PSYC UN1010, or the equivalent, plus the instructor's permission.

What does it mean to have a sense of self? Is it uniquely human? Taking a cognitive perspective, we will discuss these questions as well as self-reflective and self-monitoring abilities, brain structures relevant to self-processing, and disorders of self. We will also consider the self from evolutionary, developmental, neuroscience, and psychopathological perspectives.

PSYC UN3445 THE BRAIN AND MEMORY. 4.00 points.

Prerequisites: (PSYC UN1010) or Equivalent introductory course in neuroscience or cognitive psychology and the instructor's permission

Prerequisites: (PSYC UN1010) or Equivalent introductory course in neuroscience or cognitive psychology and the instructors permission

This seminar will give a comprehensive overview of episodic memory research: what neuroimaging studies, patient studies, and animal models have taught us about how the brain creates, stores, and retrieves memories

PSYC GU4222 The Cognitive Neuroscience of Aging (Seminar). 4 points.

Prerequisites: courses in introductory psychology and cognitive psychology; and the instructor's permission.

Comprehensive overview of various conceptual and methodologic approaches to studying the cognitive neuroscience of aging. The course will emphasize the importance of combining information from cognitive experimental designs, epidemiologic studies, neuroimaging, and clinical neuropsychological approaches to understand individual differences in both healthy and pathological aging.

PSYC GU4223 MEMORY # EXEC FUNCT:LIFESPAN. 4.00 points.

Prerequisites: the instructor's permission, plus PSYC UN1001 or PSYC UN1010, or the equivalent. Optimal preparation will include some background in experimental design and statistics.

Prerequisites: the instructors permission, plus PSYC UN1001 or PSYC UN1010, or the equivalent. Optimal preparation will include some background in experimental design and statistics. Memory and executive processing are critical cognitive functions required for successfully navigating everyday life. In lifespan studies, both exhibit relatively long developmental trajectories followed by stasis and then relative decline in old age. Yet, neither memory nor executive function is a unitary construct. Rather, each is comprised of separable components that may show different developmental trajectories and declines or maintenance at older ages. Moreover, memory is malleable and is a reconstruction of past experience, not an exact reproduction. We will discuss a range of topics related to the development, maintenance and potential decline in memory and executive function from infancy through old age

PSYC GU4225 CONSCIOUSNESS # ATTENTION. 4.00 points.

Prerequisites: the instructor's permission; some basic knowledge of cognitive science and neuroanatomy is desirable, but not necessary. Modern theories attempt to characterize the human mind in terms of information processing. But machines that process information do not seem to feel anything; a computer may for instance receive inputs from a video camera, yet it would be hard to imagine that it sees or experiences the vividness of colors like we do. Nobody has yet provided a convincing theory as to how to explain the subjective nature of our mental lives in objective physical terms. This is called the problem of consciousness, and is generally considered to be one of the last unsolved puzzles in science. Philosophers even debate whether there could be a solution to this problem at all. Students in this course may be recruited for participation in a voluntary research study. Students who choose not to participate in the study will complete the same course requirements as those who do, and an individual's choice will not affect their grade or status as a student in the course

Prerequisites: PSYC UN1001 and Preferably, an additional course in psychology, focusing on cognition, development, or research methods. Instructor permission required. This seminar explores the relationship between language and thought by investigating how language is mentally represented and processed; how various aspects of language interact with each other; and how language interacts with other aspects of cognition including perception, concepts, world knowledge, and memory. Students will examine how empirical data at the linguistic, psychological, and neuroscientific levels can bear on some of the biggest questions in the philosophy of mind and language and in psychology

Prerequisites: For undergraduates: courses in introductory psychology, cognitive or developmental psychology, and the instructor's permission.

Prerequisites: For undergraduates: courses in introductory psychology, cognitive or developmental psychology, and the instructor's permission.

Core Knowledge explores the origins and development of knowledge in infants and children, with an additional emphasis on evolutionary cognition. In this course, we will examine evidence from cognitive psychology, developmental psychology, comparative psychology, neuroscience, and linguistics to look at the child's conception of objects, number, space, language, agency, morality and the social world. We will look at which aspects of knowledge are uniquely human, which are shared with other animals, and how this knowledge changes as children develop

Prerequisites: (PSYC UN2235) or equivalent course on judgment and decision-making

Prerequisites: (PSYC UN2235) or equivalent course on judgment and decision-making A seminar course exploring strategic decision making (also known as behavioral game theory). This course examines the psychology underlying situations in which outcomes are determined by choices made by multiple decision makers. The prime objective will be to examine the use of experimental games to test psychological theories

PSYC GU4430 Learning and the Brain (Seminar). 4 points.

Prerequisites: courses in introductory psychology and/or neuroscience, and the instructor's permission.

What are the neural mechanisms that support learning, memory, and choices? We will review current theories in the cognitive neuroscience of human learning, discuss how learning and decision making interact, and consider the strengths and weaknesses of two influential methods in the study of human brain and behavior—functional imaging and patient studies.

SOAR AV4000 SOUND:Music, Math, and Mind. 3.00 points.

This course is a detailed and hands-on (ears-on) exploration of the fundamental physical, physiological, and psychological aspects of sound. Topics covered include sound waves and their physical nature, the propagation and speed of sound in different mediums, geological and other non-living sound sources, animal and insect sound generating strategies, sound perception mechanisms and abilities in different species, the physiology of human hearing and the structure of the human ear, psycho-acoustics and human sound perception, sonic illusions and tricks of the ear. In-class experiments and research make up the majority of the class. Each student will design and lead at least one experiment/demo session. Students also respond to creative weekly prompts about sound topics on courseworks. We also have visits with a number of special guests during the term

Comparative Literature and Translation Studies

Mission

The Program in Comparative Literature and Translation Studies at Barnard enables students to study literature across languages, historical periods, national boundaries, and cultural traditions, as well as in relation to other arts (such as painting, photography, theater, and film) and other disciplines (such as philosophy, history, and anthropology). We promote the intensive study of languages and require majors to work at the advanced level in two literary and cultural traditions in their original languages. Our teaching emphasizes close attention to language: how language changes over time and space; how rhetorical devices enhance and inflect the meaning of what is said; how narratives tell stories and help us make sense of the world.

Resisting a homogenizing globalism, students learn about how

literary genres, ideas, and aesthetic forms travel across borders and change in doing so, and they study also diverse cultural practices and aesthetic forms that defy easy translatability. We regard the study of poetics, the art or technique of writing, as fundamental for and inseparable from the study of theory, or critical and philosophical approaches to language and discourse. We teach students the critical skills and research methods needed to perform conceptually precise, aesthetically sensitive, historically-informed, and culturally-attuned analyses and interpretations of texts.

In this way, our program provides students with a humanistic education like none other. It prepares them for the challenges, responsibilities, and pleasures of understanding and acting in a complex, richly textured, and multi-lingual world. It helps them become world citizens whose cosmopolitan outlook is not only world-wide but also world-deep.

Core faculty members teach the required courses in Comparative Literature and Translation Studies and provide close mentoring. Students have access also to a wealth of faculty expertise in Classics, French, German, English, Spanish, Asian and Middle Eastern Cultures, Italian, Russian, Africana Studies, and Medieval and Renaissance Studies, among other departments and programs at Barnard. Faculty who teach and advise senior theses offer courses on topics that range from sexuality and the body in Greek tragedy to the novella from medieval to modern times, from studies of the novel to comparative lyric poetry and poetics, from the writing of utopia to literature and philosophy, from translation and theories of translation to adaptation and transmediality, from global long-form photography to ecological criticism, performance studies, and animal studies. Students who major in Comparative Literature and Translation Studies are matched with an advisor or co-advisors for specialized guidance in selecting courses and designing a curriculum of breadth and depth. Students who minor in Translation Studies are also matched with an advisor who guides them in choosing courses most suitable for the language(s) they work on and in relation to particular interests (such as theater or the history of science). Students benefit also from the array of resources in language and literature departments at Columbia. We strongly encourage majors to take advantage of study abroad opportunities to immerse themselves in the study of languages and cultures.

Our graduates have embarked upon a variety of career paths, in fields including law, journalism, publishing, theater, television, film, teaching, education consulting, medicine, gastronomy, public policy, international relations and foreign policy, technology design, and international business. They have received prestigious fellowships, such as the Fulbright and the Mellon-Mays, to teach and conduct research in Europe, Africa, South America, and Asia, and they have gone on to graduate study in political science, comparative literature, East Asian Studies, law, history, film-making, creative writing, and translation and interpretation, among other subjects, in leading programs all over the world. Our graduates work as translators, editors, journalists, writers, middle school and high school teachers, college professors, filmmakers, lawyers, consultants, technology designers, and public policy advocates in the U.S., South America, Europe, and Asia.

Students who wish to learn more about the major and meet faculty members should attend our program planning meetings, which take place every fall and spring during the program planning meeting periods at the College. Students can also contact the chair of the program to meet during office hours or to set up an appointment.

Student Learning Outcomes

- The ability to discern and analyze how formal and rhetorical features of language (diction, metaphor, imagery, hyperbole, litotes, rhyme, parallelism, structures of repetition, etc.) enhance, inflect, and complicate seemingly straightforward processes of communication in literary texts but also in non-literary discourse, e.g., psychoanalytic case studies, historical narratives, philosophical writing.
- The ability to analyze literary texts and uses of language in historical periods, cultural contexts, and social systems that are different from one's own and that can thus help one see and re-evaluate one's own customary and contemporary context in productive ways.
- Knowledge about the dynamics of the global circulation of literary genres, aesthetic practices, and ideas through processes of translation and adaptation and by means of various media and technologies.
- Knowledge about histories of writing practices, genres, relations between script and orality, logics of periodization, and ethical systems in traditions and lifeworlds beyond the West.
- The ability to craft well-reasoned and cogent arguments substantiated by careful attention to textual evidence and knowledge of historical contexts.
- The ability to use literary and critical theoretical approaches to analyze and interpret texts with deftness and agility, with attention to what remains inevitably literary within theoretical discourse itself.
- The ability to do the above—and playfully—in relation to more languages than one.

The program is supervised by the Committee on Comparative Literature.

Program Director: Emily Sun (Comparative Literature)

Professors: Peter Connor (French), Nancy Worman (Classics)

Associate Professor: Erk Grimm (German), Emily Sun (Comparative Literature)

Senior Lecturer: Brian O'Keeffe (French)

Requirements for the Major in Comparative Literature

For students who declared in Spring 2017 (and after)

To enter the program, a student must normally have completed the required sequence necessary for entry into the advance literature courses of her major program. This varies from language to language; students should consult the director. Each student, after consultation with the director, chooses an adviser from one of her two fields of concentration in a language. This adviser guides her in developing a sequence of courses appropriate for her goals in the major.

All students are required to take the following **Twelve (12) courses (minimum 37 credits):**

- **CPLT BC3001 INTRO TO COMPARATIVE LITERATUR (3.00 s.h.)**
- **One (1) course in CPLT BC3143 TOPICS COMPARATIVE LIT (3.00 s.h.)**

- **Six (6) Courses = Three (3) courses** in each of **TWO distinct literary traditions** studied in the original language
- **Three (3) elective courses in literature, of which:**
 - One (1) pre-modern
 - One (1) literary theory
 - One (1) open choice
- **CPLT BC3997 SENIOR SEMINAR IN COMP LI (4.00 s.h.)**

Students who wish to major in Comparative Literature, but who for valid reasons wish to pursue a program at variance with the above model, should consult the director.

Important note about studying abroad

If you plan on spending part or all of junior year abroad, plan to take the CPLT BC3001 INTRO TO COMPARATIVE LITERATUR (3.00 s.h.) during the second semester of your sophomore year. This means contacting the director of Comparative Literature program during the first semester of your sophomore year. Indicate that you plan to be abroad one or both semesters during junior year and discuss when to take core courses.

If you plan to be away for the entire junior year, discuss with the program director which other courses can count toward the major when studying abroad. You should also plan to identify advisors before your departure so that you can contact them via e-mail and meet with them at the beginning of your senior year.

If you have further questions regarding the thesis process and its parts, please contact the [Program Director \(esun@barnard.edu\)](mailto:esun@barnard.edu).

Requirements for the Minor in Translation Studies

The Minor in Translation Studies allows students to explore the history and theory of translation practices, to consider the importance of translation in today's world, and to complete a substantial translation or translation-related project.

The Minor in Translation Studies will not qualify students to work professionally as translators or interpreters upon graduation. The courses on a transcript that count toward the Minor will demonstrate that the student has acquired basic familiarity with the history and principle theories of translation and interpreting, together with sufficient linguistic preparedness to conduct basic practical work in translation or interpreting. It will serve as a useful qualification for those wishing to enter one of the growing number of post-graduate programs that provide further training in translation and interpreting, both areas of significant employment growth. It will serve equally those wishing to pursue research in the area of translation and interpreting, a burgeoning area of academic specialization. For students generally, whatever their career goals, the Minor can be profitably combined with their major (Anthropology, French, Political Science, German, History, etc.), enhancing the value of their degree and making them more competitive in today's global job market.

The Minor in Translation Studies is supervised by the Director of the Center for Translation Studies along with the Chair of the Program in Comparative Literature. Students wishing to minor in Translation Studies should meet with Professor Peter Connor to discuss the choice of their elective courses.

Six (6) courses are required for the minor (minimum 18 credits):

1. CPLT BC3110 INTRO TO TRANSLATION STUDIES (3.00 s.h.)

2. Two or three elective courses dealing with the history and/or theory of translation, or with language from an anthropological, philosophical, psychological, social or cultural perspective. Example courses:

- AFRS BC3563 Translating Hispaniola (4 s.h.)
- ANTH UN1009 INTRO TO LANGUAGE # CULTURE (3.00 s.h.)
- CPLT BC3200 THE VISUAL AND VERBAL ARTS (3.00 s.h.)
- FREN BC3079 HISTORY OF THE FRENCH LANGUAGE (4.00 s.h.)
- FREN BC3063 Structuralism and Post-Structuralism (3 s.h.)
- PHIL UN3685 PHILOSOPHY OF LANGUAGE (3.00 s.h.)
- PSYC BC3164 PERCEPTION AND LANGUAGE (4.00 s.h.)
- THTR UN3154 THEATRE TRAD GLOBAL CONTEXT (3.00 s.h.)
- THTR UN3167 DRAMATURGY (4.00 s.h.)

3. One or two language-based courses at the advanced level offering practice in written or oral translation.

- For example, a student working with French:
 - FREN BC3014 Advanced Translation (3.00 s.h.)
 - FREN BC3054 Translation Through Film (3 s.h.)
- For example, a student working with Spanish:
 - SPAN BC3376 RETHINKING SPANISH TRANSLATION (3.00 s.h.)
 - SPAN UN3265 LATIN AMER LIT (IN TRANSLATN) (3.00 s.h.)

4. CPLT BC3510 ADVANCED WORKSHOP TRANSLA (4.00 s.h.)

Note: the particular courses qualifying for the minor will vary according to the language chosen by the candidate.

With permission of the director of the minor, a student may request credit for an Independent Study involving substantial translation or interpreting work.

CPLT BC3110 INTRO TO TRANSLATION STUDIES. 3.00 points.

Introduction to the major theories and methods of translation in the Western tradition, along with practical work in translating. Topics include translation in the context of postcolonialism, globalization and immigration, the role of translators in war and zones of conflict, gender and translation, the importance of translation to contemporary writers. Completion of Intermediate II or equivalent in any foreign language

CPLT BC3000 GLOBAL LONG-FORM PHOTOGRAPHY. 4.00 points.

How have artists been informed and influenced by the natural world? This course will examine how photography and literature have responded to nature, ecology, and the environment. We will explore how close-looking might inform an artist's practice regarding the living environment - its bounty - and its degradation. Students will study works whose makers have seen art as a form of praise of the natural world, as well as those who investigate the relationship between art and environmental activism. Readings will include those by John Muir, Rachel Carson, Robin Wall Kimmerer, Carl Jung, Robert Macfarlane, Mary Oliver, Kerri ni Dochartaigh and others. Particular emphasis will be placed on how photography over the past hundred years has responded to shrinking natural landscapes, environmental destruction, and global warming. We will study in-depth photographic essays by some of the following artists: Robert Adams; Rene Effendi; Kikuji Kawada; Dornith Doherty; Kirk Crippens and Gretchen Le Maistre; Brad Tempkin; Pablo Lopez Luz; Mandy Barker; Robert Zhao Renhui, Masahisa Fukashe, and Meghann Riepenhoff. Students will be required to write response papers weekly, participate in weekly discussions, and produce a term-long photographic essay

CPLT BC3107 Translating the Animal. 4.00 points.

Through readings in language philosophy, translation studies, and critical animal studies, Translating the Animal explores how translation, language, and reason have historically worked together to maintain speciesism, preventing human animals from perceiving their commonalities with, and attunement to, sentient nonhuman beings

CPLT BC3001 INTRO TO COMPARATIVE LITERATUR. 3.00 points.

Introduction to the study of literature from a comparative and cross-disciplinary perspective. Readings will be selected to promote reflection on such topics as the relation of literature to the other arts; nationalism and literature; international literary movements; post-colonial literature; gender and literature; and issues of authorship, influence, originality, and intertextuality

CPLT BC3108 Nazism in Performance. 4.00 points.

Explores the cultivation of national and transnational performances as a significant force of National Socialism, at the same time as challenging the notion of "Nazi Theatre" as monolithic formation. The core of the course inquires into the dialectical analysis of artistic creations in diverse art genres, while working towards an understanding of the social dramaturgy of such events as staging the Führer and the racialized body of the privileged people. Nazism did not harbor ideologies without benefits for the allied nations. Thus, the dynamic performance of transnationalism among the "brothers in arms" will be included as well, in order to elucidate how works of art crossing into the Third Reich were reimagined, sometimes in ways challenging to the presumed values of the state stage. Permission of instructor given at first class meeting

CPLT BC3120 Poetics of the Mouth. 3 points.

Explores the imagery of eating, drinking, spitting, choking, sucking (and other unmentionables) in relation to insults and excessive behaviors. Readings from Greek poetry (e.g., Homer, Aristophanes) to modern theory (e.g., Kristeva, *Powers of Horror*, Bakhtin, *Rabelais and His World*), including modern novels and films.

CPLT BC3123 Getting Personal: Strange Companions in Cosmo Prose. 3.00 points.

With an emphasis on equality and social justice, this course examines and compares significant 19th c./20th c. literary approaches to friendship as intermediary between individualism and communal life. Discussion of culturally formed concepts and attitudes in modern or postcolonial settings. Reading of Dickens, Hesse, Woolf, Ocampo, Puig, Fugard, Emerson, Derrida, Rawls

CPLT BC3124 Utopian Literature. 3 points.

Oscar Wilde wrote that "a map of the world that does not include Utopia is not even worth glancing at." This course reads the concept from Christopher Columbus and Thomas More to the advent of modern socialism. Readings by Campanella, Cavendish, Engels, Bellamy, Gilman, and Portal.

CPLT BC3140 Europe Imagined: Images of the New Europe in 20th-Century Literature. 3 points.

Prerequisites: Permission of the instructor.
Compares the diverse images of Europe in 20th-century literature, with an emphasis on the forces of integration and division that shape cultural identity in the areas of travel writings and transculturation/cosmopolitanism; mnemonic narratives and constructions of the past; borderland stories and the cultural politics of translation. Readings include M. Kundera, S. Rushdie, H. Boell, C. Toibin and others.

CPLT BC3143 TOPICS COMPARATIVE LIT. 3.00 points.

The objective of this class is to examine a given topic and relate it to a number of literary texts. Students will examine a variety of literary genres and to an equally wide variety of cultural, linguistic, and historical contexts

CPLT BC3144 Stories and Storytelling: Introduction to Narrative. 3 points.

An introduction to narrative through texts that themselves foreground acts of storytelling and thus teach us how to read them. Readings range across periods and cultures - from fifth-century BCE Athens to late twentieth-century Brazil - and include short stories, novellas, novels, a ballad, film and a psychoanalytic case history. Texts by Conan Doyle, Sophocles, Melville, Hitchcock, Augustine, Coleridge, Freud, McEwan, the tellers and compilers of the *The Arabian Nights*, Diderot, Flaubert, and Lispector. Emphasis on close reading and hands-on experience in analyzing texts.

CPLT BC3145 DERRIDA & LITERATURE. 3 points.

Jacques Derrida was one of the most important thinkers of the 20th century and his impact on literary studies was enormously significant. The objective of this course is to take stock of Derrida's contribution to literature, and to do so by assessing the intricate relations he establishes between literature, philosophy, economic and political theory, gender studies, translation studies, postcolonial theory, and theology. The course is divided into six parts. Part 1 introduces Derrida's approach to 'deconstruction,' particularly as regards his engagement with the fundamental concepts of Western thought and the importance he confers upon the notion of 'writing' itself. Part 2 examines Derrida's autobiographical texts wherein he positions himself as a subject for deconstruction, interrogating his own gender, his sense of being an organic, creaturely life-form, the relationship he has to his own language, and the matter of his identity as French, but also as Algerian, and Jewish. While the majority of the Derrida texts we will be reading are excerpts from larger works or short essays and interviews, in this section we will read a full-length text – *Monolingualism of the Other* – so that we can trace Derrida's train of thought from beginning to end. In Part 3 we will use an interview conducted by Derek Attridge, "This Strange Institution Called Literature," as a template for thinking about Derrida's relation to literature, and in Part 4 we will read our second full-length text by Derrida, namely *Given Time 1: Counterfeit Money*, an in-depth analysis of a prose poem by the French poet Charles Baudelaire. Part 5 considers an aspect of Derrida's work that reveals the extent of his embrace of provisional, in-between positions for thought in general, and for literary texts in particular, namely translation. For deconstruction is keenly invested in words beginning with 'trans': transposition, transplant, trans-valuation, and indeed transgender. Translation provides Derrida with a scenario whereby crossings and transits can be imagined – for literary texts, and for identities that wish to remain un-determined by fixed poles or normative values. The course finishes with an assessment of Derrida's reflections on death, mourning, and the matter of leaving a legacy. In Part 6, we therefore read more of the essay "Living On," and also Derrida's final interview, "Learning to Live, Finally." Not even Derrida could deconstruct away the finality of death, but he did hope to live on. My corresponding hope is that you will feel sufficiently attuned to Derrida's thought that you consider it important to continue his legacy – to be one of the agents of his living on, survival or *survie*, a translator and transporter of his thought towards contexts that he could not have foreseen, but which he would doubtless have welcomed as a precious chance for his own work to be considered differently. Taking intellectual risks, thinking otherwise, and inventing new ways of knowing are, after all, the hallmarks of Derridean deconstruction.

CPLT BC3158 Languages of Loss: The Poetry of Mourning. 3 points.

Prerequisites: Sophomore standing

A study of the genre of elegy across time and cultures. Emphasis on how poets express grief and relate to literary traditions. Comparisons of European, Chinese, and American elegies (by Theocritus, Milton, Qu Yuan, Holderlin, Wordsworth, Whitman, Bishop, and others) and discussions of the relationship between singular and collective life.

CPLT BC3160 TRAGIC BODIES. 3.00 points.

This course will focus on embodiment in ancient and modern drama as well as in film, television, and performance art, including plays by Sophocles, Shakespeare, and Beckett; films such as "Rosemary's Baby" and "The Limits of Control"; and performances by artists such as Karen Finley and Marina Abramovic. We will explore the provocations, theatricality, and shock aesthetics of such concepts as Artaud's "Theater of Cruelty" and Kristeva's powers of horror, as well as Adorno's ideas about terror and the sublime

CPLT BC3164 Trees of Knowledge: Ecocriticism and World Literature. 3.00 points.

This survey of modern and contemporary world literature deals explicitly with environmental issues as a main theme. The course is supposed to serve as an introduction to the new field of "ecocriticism" in the Humanities and to a wide range of literary responses to current ecological concerns and transformations of natural habitat. All texts are available in English, though students will have the opportunity to read them in the original if they desire to do so

CPLT BC3165 City # Country in the Comparative 19th-century Novel. 3.00 points.

This survey of touchstone novels of the long nineteenth century explores the relationship of the realist novel to urban experience and rural identity. If most novels are, in Raymond Williams's phrase, "knowable communities," how do fictions of the city and imaginings of the country represent individual identity as it is shaped by physical, built environments? In this light, we will consider questions of youth and experience, time and space, work and leisure, men and women, landscape and portraiture, privacy and public life, national culture and cosmopolitanism, local custom and globalism. In class, we will juxtapose close readings of novels with analyses of other cultural forms (translations, paintings, operas, popular entertainment, maps) so that we come away with a broader sense of nineteenth-century pan-media culture and its international afterlives as well as a working knowledge of one of its most meaningful manifestations: the novel. French novelists Honoré de Balzac and Gustave Flaubert, English novelists Charles Dickens and George Eliot, the Russian novelist Leo Tolstoy and the Chinese novelist Lao She (Shu Qingchun, ###) will provide case studies

CPLT BC3190 Aesthetics of the Grotesque. 3 points.

This course examines the aesthetic phenomenon of the grotesque in its development from the late Renaissance to Postmodernism by comparing major texts in a systematic fashion. The emphasis of our discussions is on the awkwardness and strangeness of a certain kind of prose or drama; we will therefore examine the typical modes of transgression and the forms of excess in literary representations of the body in various between the 15th century and the present. The transgression may involve the human body, but writers are also interested in the beauty or ugliness of "the beast." While we will discuss questions of style and linguistic performance, our main concern is the human imagination: how do characters, narrators and writers relate to the strangeness of the body and the world? How is the literary text shaped by distinct aesthetic patterns? What kind of taboo subjects or problematic and ambiguous aspects of power dynamics in modern societies can be addressed by presenting humans and animals as grotesque figures? Our critical discussions of outstanding examples of are based on readings of major scholarly contributions to the field, in particular the studies of internationally recognized intellectuals such as M.Bakhtin, T.Todorov, J.Kristeva, and W.Kayser. You will be introduced to various historical types of the grotesque, ranging from the ornate and bombastic representations in Renaissance literature to the fantastic deformations and hybrid creatures in contemporary literature. The reading material is representative of different cultures, languages and literatures so that we can conceptualize the grotesque from a critical and comparative perspective. Ultimately, the grotesque is seen as a complicated product of social, political, and cultural conditions rather than merely a formal element of a literary discourse. The representation of "grotesque" settings as well as the formation of "grotesque" identities will be examined by considering aspects such as gender, class, race and ethnicity.

CPLT BC3200 THE VISUAL AND VERBAL ARTS. 3.00 points.

Analysis and discussion of the relation of literature to painting, photography, and film. Emphasis on artistic and literary concepts concerning the visual dimension of narrative and poetic texts from Homer to Burroughs. Explores the role of description, illustration, and montage in realist and modern literature

CPLT BC3203 Fictions of Judgment: Austen and Kleist. 3.00 points.

This course investigates how works of fiction reflect on what it means to make moral, aesthetic, and political judgments. It focuses on works by two Romantic-era authors, Jane Austen (1775-1817) and Heinrich von Kleist (1777-1811), who were contemporaries of one another but have rarely been read together as they inhabited and wrote about vastly different milieux. Strikingly, both have been hailed for their precise mastery of language and form, their keen sense of irony, and their singularly philosophical dispositions. They wrote at a crucial time in both Western and global modernity when European philosophers were re-defining the very activity of judgment itself in relation to new understandings of reason, truth, and the conditions of knowledge. We will read three of Austen's six completed novels and a play, short stories, a novella, and prose writings by Kleist, paying attention to philosophical problems of self-knowledge, judgment, freedom, and autonomy in relation to historical instantiations of gender, class, and race. Besides studying how these early nineteenth-century works staged processes and crises of judgment, we will ask ourselves what lessons in judgment these works may continue to offer us today

CPLT BC3204 Literary Worldmaking: Two Case Studies. 4.00 points.

This seminar engages students in the immersive and intensive reading of two masterworks of modern prose fiction: Middlemarch, published by George Eliot (the pseudonym of Mary Ann Evans) in 1871-2 in England, and The Story of the Stone, or the Dream of the Red Chamber, composed by Cao Xueqin (and continued by Gao E) in the late 18th-century moment of Qing-dynasty China. While using devices and conventions from different narrative traditions, these novels operate in the mode of realism and do so at a monumental and panoramic scale, creating literary worlds that reflect the realia of historical lifeworlds. Beyond representing aspects of empirically recognizable worlds, these novels also incorporate philosophical reflection on their own means of representation, on their very status as fiction, on the power and limits of imaginative worldmaking. By studying these novels as cases of literary worldmaking, we will take the opportunity also to reflect critically in this class on the world that emerges—and the process of worldmaking that gets activated—in our very experience of studying these texts together. We will consider how cosmopolitanism, as a guiding ideal of the Enlightenment and post-Enlightenment university, may be renewed by literary study to help us inhabit a world of common humanity that is richer and more complex than is evident in particularist localisms or a satellite-view, techno-economic globalism. Middlemarch we will read in its entirety. For the sake of time, we will read, in David Hawkes' translation, the 80-chapter version of The Story of the Stone, or the Dream of the Red Chamber, attributed to Cao Xueqin, instead of the 120-chapter version, with the last 40 chapters attributed to Gao E. If you can and wish to read the text in Chinese, please speak to Professor Sun about the option of scheduling extra discussion sessions

CPLT BC3350 IN OTHER WORDS: WORLD POETRY & COSMOPOLITANISM. 3 points.

What is “world poetry”? This course will try to give an answer to this vexing question. You are being introduced to a number of influential poets who have entered a dialogue about what it means to write, read, translate and appreciate poetry in a global context. The impact of globalization is most visible in a number of anthologies which made considerable efforts to move beyond the existing range of national representatives and to make an English-speaking audience familiar with the names and works of poets who are bilingual or who write in their native language. Throughout the semester, we will read English translations of these poems (but feel free to read the original if you know the language). Secondly, the global context is of great importance for understanding each poet’s vision of the world since poets are involved in processes of “world-making” as well as reacting to the world’s past and present. As the semester progresses you will see that the poets are part of a larger conversation; some themes, forms and issues we discovered at the beginning will return in the middle or toward the end of the term. The selection of poets is based on considerations of gender, race, age and religious affiliation; many of the poets whose works we are going to discuss are iconic figures; in studying other cases, you will be exposed to new voices (for example, young South African poets) whose significance will emerge in a critical discussion of the anthologists’ rationale and criteria for selecting poets and marginalizing others.

CPLT BC3510 ADVANCED WORKSHOP TRANSLA. 4.00 points.

Prerequisites: CPLT BC 3110 - Introduction to Translation Studies is a recommended prerequisite.

Maurice Blanchot once described translators as the “hidden masters of culture.” Indeed, though our labor and craft often go unrecognized in the age of Google Translate, translators play an essential role as tastemakers, bridge-builders, advocates, and diplomats, not to mention the most intimate readers and re-writers of literature. In this workshop, we will explore translation as a praxis of writing, reading, and revision. Together, we will also interrogate translation’s complex and often fraught role in cultural production. What ethical questions does translation raise? Who gets to translate, and what gets translated? What is the place of the translator in the text? What can translation teach us about language, literature, and ourselves? Readings will include selections from translation theory, method texts, and literary translations across genres, from poetry and prose to essay and memoir. Students will workshop original translations into English and complete brief writing and translation exercises throughout

CPLT BC3551 The Arabian Nights and Its Influences. 4 points.

Prerequisites: Completion of one college-level literature course.

Permission of instructor.

This course examines the enduring power of *The Arabian Nights* and some of the wide range of literary authors, genres and variations that it has influenced. The focus is, therefore, on this marvelous work—one of the earliest examples of the short story and the novel—but also on a selection of classical and contemporary works of fiction from around the world that have been informed by it. In this regard, this is a class interested in literary influence, reciprocity and exchange across time and languages.

CPLT BC3552 The Arabic Novel. 4.00 points.

The novel in Arabic literature has often been the place where every attempt to look within ends up involving the need to contend with or measure the self against the European, the dominant culture. This took various forms. From early moments of easy-going and confident cosmopolitan travellers, such as Ahmad Faris al-Shidyaq, to later author, such as Tayeb Salih, mapping the existential fault lines between west and east. For this reason, and as well as being a modern phenomenon, the Arabic novel has also been a tool for translation, for bridging gaps and exposing what al-Shidyaq—the man credited with being the father of the modern Arabic novel, and himself a great translator—called ‘disjunction’. We will begin with his satirical, deeply inventive and erudite novel, published in 1855, *Leg Over Leg*. It is a book with an insatiable appetite for definitions and comparisons, with Words that had been lost or fell out of use (the author had an abiding interest in dictionaries that anticipates Jorge Louis Borges) and with locating and often subverting moments of connection and disconnection. We will then follow along a trajectory to the present, where we will read, in English translation, novels written in Arabic, from Egypt, Syria, Sudan, Morocco and Palestine. We will read them chronologically, starting with *Leg Over Leg* (1855) and finishing with *Minor Detail*, a novel that was only published last year. Obviously, this does not claim to be a comprehensive survey; for that we would need several years and even then, we would fall short. Instead, the hope is that it will be a thrilling journey through some of the most fascinating fiction ever written. CPLT BC3630 Theatre and Democracy. 4 points.

How does theatre promote democracy, and vice versa: how do concepts and modes of theatre prevent the spectators from assuming civic positions both within and outside a theatrical performance? This class explores both the promotion and the denial of democratic discourse in the practices of dramatic writing and theatrical performance.

CPLT BC4161 Tragic Bodies II: Surfaces, Materialities, Enactments. 4 points.

this is an upper-level seminar with quite a lot of reading and semester-long development of a substantial project

Prerequisites: CPLS BC3160 Tragic Bodies I, or permission of instructor.

This course is conceived as an advanced seminar (i.e., upper-level undergraduate and graduate) that addresses in more depth the themes of my lecture course Tragic Bodies (BC3160). It explores how dramatic enactment represents bodily boundaries and edges and thus skin, coverings, maskings, and dress-up in relation to gender, sexuality, race, and status / class. The course will focus on these edges and surfaces, as well as proximities, touching, and affect in ancient and modern drama (and occasionally film). The course treats the three ancient tragedians (Aeschylus, Sophocles, and Euripides) as unifying threads and centers on politically and aesthetically challenging re-envisionings of their plays.

Cross-Listed Courses**ASCM BC3000 Outlaws # Tricksters of Arabic Literature (in Translation). 4.00 points.**

What is so fascinating about outlaws and tricksters? They can be alluring and terrifying, creative and destructive. They wear disguises, upend the plans of their fellow humans, and bend societies to their will. They are unsettled and unsettling. But this course suggests that there is no single figure of the trickster. Rather, the significance of writing about tricksters and outlaws varies from text to text and from place to place. In this course, we will explore texts, mostly from the pre-modern period, written in Arabic (and sometimes Persian and Sanskrit) that depict outlaws and tricksters. We will ask after what texts are doing in the world when they tell stories that seem to celebrate and delight in the subversive, the strange, and the sinister. To help us think through these questions, we will also read divergent theories about outlaws, tricksters, and other subversives. At the end of the course, we will read the award-winning Iraqi novel *Frankenstein in Baghdad*

How is performance conceived and instrumentalized to fulfill an ideological design? How is ideology transmitted as performance? Centering on National Socialism and Communism, this course explores that and similar questions by examining the political, social, and cultural performances (of Hitler and Stalin, of race and progress, of postwar trials) in the Third Reich and the Soviet Union by engaging a broad range of primary materials (films, documentaries, plays, newsreels, mass spectacles, artifacts of fine art) and by reading widely in the literature of political philosophy and performance studies

ENGL BC3294 EXOPHONIC WOMEN. 3.00 points.

Language is the writer's instrument; what happens when there is more than one language to choose from, or when a dominant or initial language is replaced by another? What inspires, or necessitates, a writer to practice exophony: to migrate into "foreign" linguistic territory? And in the case of bilingual or plurilingual writers, what factors determine the language(s) chosen for creative expression, and what might cause that choice to shift over time? To what degree do exophonic writers create a third, hybrid language? And how might their works underscore the mutability and instability of language itself? This seminar will focus on a series of women who, either for political or personal reasons, have reshaped and revised their linguistic points of reference, radically questioning—and perhaps willfully subverting—notions of nationality, identity, linguistic normativity, and a "mother tongue". Special attention will be paid to the reception of exophonic writers, to feminist narratives of separation and self-fashioning, to mother-daughter dyads, to cases of self-translation, to colonialist and post-colonialist frameworks, and to how the phenomenon of exophony further complicates, but also enriches, the translator's task. Readings will combine literary texts with essays, interviews, and theoretical writings by and about exophonic writers. In addition to analytical papers, students will have the opportunity to experiment writing in another language and translating themselves into English. All readings will be in English; advanced reading knowledge of a foreign language is recommended but not required

MDES GU4226 Arabic Literature # the Long 19th Century. 4.00 points.

What came before the Arabic novel? How did authors writing in Arabic in the 19th century conceive of and debate the terms of modernity and literature? The purpose of this graduate seminar is first to engage with recent trends in scholarship on the Nahda ("Renaissance") and second to read the entirety of three significant works of Arabic literature in translation: al-Shidyaaq's *Leg Over Leg* (1855), Khalil al-Khouri's *Oh No! I am Not European!* (1859-61), and Jurji Zaydan's *Tree of Pearls, Queen of Egypt* (1914). Knowledge of Arabic is not required, but an optional Arabic reading group will run concurrently with the class

Departmental Office: 504 Milstein Center; 212-853-0305

Director: Dr. Rebecca Wright, chair-cs@barnard.edu

Barnard's computer science community is growing. The number of Computer Science majors at Barnard has doubled over the last several years. Barnard's Computer Science program offers meaningful computing education and experiences to all Barnard students and partners with Columbia's Computer Science department to offer a major in Computer Science. The program aims to expand students' use and understanding of computation and data analysis across disciplines; offer students opportunities to think critically about the social implications of technology, including how to harness it for social good; promote curricular and pedagogical advances in computer science and its multidisciplinary applications; and provide new models for engaging students and enhancing diversity in computing.

Program Director: Rebecca Wright

Professor: Rebecca Wright (Druckenmiller Professor of Computer Science)

Assistant Professors: Emily Black, Brian Plancher, Mark Santolucito, Corey Toler-Franklin

Visiting Associate Professor: Smaranda Muresan

Faculty Fellows: Antonio Moretti (Roman Family Teaching and Research Fellow), Lisa Soros (Roman Family Teaching and Research Fellow)

COMS BC1016 Introduction to Computational Thinking and Data Science. 3.00 points.

This course and its co-requisite lab course will introduce students to the methods and tools used in data science to obtain insights from data. Students will learn how to analyze data arising from real-world phenomena while mastering critical concepts and skills in computer programming and statistical inference. The course will involve hands-on analysis of real-world datasets, including economic data, document collections, geographical data, and social networks. The course is ideal for students looking to increase their digital literacy and expand their use and understanding of computation and data analysis across disciplines. No prior programming or college-level math background is required

COMS BC1017 Introduction to Computational Thinking and Data Science - Lab. 1.00 point.

This is the co-requisite lab to COMS BC 1016 (Introduction to Computational Thinking and Data Science) This course will introduce students to the methods and tools used in data science to obtain insights from data. Students will learn how to analyze data arising from real-world phenomena while mastering critical concepts and skills in computer programming and statistical inference. The course will involve hands-on analysis of real-world datasets, including economic data, document collections, geographical data, and social networks. This class is ideal for students looking to increase their digital literacy and expand their use and understanding of computation and data analysis across disciplines. No prior programming or math background is required

COMS BC3159 Parallel Optimization for Robotics. 3.00 points.

Many stages of state-of-the-art robotics pipelines rely on the solutions of underlying optimization algorithms. Unfortunately, many of these approaches rely on simplifications and conservative approximations in order to reduce their computational complexity and support online operation. At the same time, parallelism has been used to significantly increase the throughput of computationally expensive algorithms across the field of computer science. And, with the widespread adoption of parallel computing platforms such as GPUs, it is natural to consider whether these architectures can benefit robotics researchers interested in solving computationally constrained problems online. This course will provide students with an introduction to both parallel programming on CPUs and GPUs as well as optimization algorithms for robotics applications. It will then dive into the intersection of those fields through case studies of recent state-of-the-art research and culminate in a team-based final project

Introduces methods and tools used in Contextual Inquiry (CI) specifically the early stages of software design focused on meeting user needs. Key concepts include user research, contextual design, design thinking, ideation, iterative design, prototyping, and design documentation. Projects utilize software tools used in the industry.

COMS BC3420 PRIVACY IN A NETWORKED WORLD. 4.00 points.

The ubiquity of computers and networks in business, government, recreation, and almost all aspects of daily life has led to a proliferation of online sensitive data: data that, if used improperly, can harm the data subjects. As a result, concern about the use, ownership, control, privacy, and accuracy of these data has become a top priority. This seminar course focuses on both the technical challenges of handling sensitive data, the privacy implications of various technologies, and the policy and legal issues facing data subjects, data owners, and data users

COMS BC3430 Computational Sound. 3.00 points.

In this course, we explore the variety of roles that computation can play in the analysis, creation, and performance of music. We start with the fundamentals of sound in the digital domain, covering issues of representation and audio synthesis. We then move through various synthesis techniques including the additive, subtractive, frequency modulation (FM), and amplitude modulation (AM) synthesis. After covering some core DSP techniques, we put these concepts into performative practice by exploring "live coding". In the space of live coding, we examine various programming language designs to understand how various domain specific languages (DSLs) support live coding. For the third module, we turn our focus to automated composition and analysis, addressing challenges in music information retrieval, generative art, and autonomous improvisation systems. All the while, we continue to develop our fluency in live coding by putting new topics to practice

COMS BC3930 Creative Embedded Systems. 3.00 points.

Ubiquitous computing is creating new canvases and opportunities for creative ideas. This class explores the use of microprocessors, distributed sensor networks, IoT, and intermedia systems for the purposes of creative expression. The course is delivered in a mixed lecture and lab format that introduces the fundamental concepts and theory behind embedded systems as well as issues particular to their creative employment. The key objective of the course is for students to conceive of and implement creative uses of computation

COMS W3210 Scientific Computation. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: two terms of calculus.

Introduction to computation on digital computers. Design and analysis of numerical algorithms. Numerical solution of equations, integration, recurrences, chaos, differential equations. Introduction to Monte Carlo methods. Properties of floating point arithmetic. Applications to weather prediction, computational finance, computational science, and computational engineering.

COMS W3251 COMPUTATIONAL LINEAR ALGEBRA. 4.00 points.**COMS W3261 COMPUTER SCIENCE THEORY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3203)

Corequisites: COMS W3134, COMS W3136, COMS W3137

Prerequisites: (COMS W3203) Corequisites: COMS W3134, COMS W3136, COMS W3137 Regular languages: deterministic and non-deterministic finite automata, regular expressions. Context-free languages: context-free grammars, push-down automata. Turing machines, the Chomsky hierarchy, and the Church-Turing thesis. Introduction to Complexity Theory and NP-Completeness

COMS W3902 UNDERGRADUATE THESIS. 0.00-6.00 points.

Prerequisites: Agreement by a faculty member to serve as thesis adviser.

Prerequisites: Agreement by a faculty member to serve as thesis adviser. An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment

COMS W3995 Special Topics in Computer Science. 3 points.

Lect: 3.

Prerequisites: the instructor's permission.

Consult the department for section assignment. Special topics arranged as the need and availability arise. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit.

COMS W3998 UNDERGRAD PROJECTS IN COMP SCI. 1.00-3.00 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Prerequisites: Approval by a faculty member who agrees to supervise the work. Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment

COMS W3999 FIELDWORK. 1.00 point.

Prerequisites: Obtained internship and approval from faculty advisor. May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off-campus work experience as part of their approved program of study. Final report and letter of evaluation required. May not be used as a technical or non-technical elective. May not be taken for pass/fail credit or audited

COMS W4111 INTRODUCTION TO DATABASES. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: COMS W3134, COMS W3136, or COMS W3137; or the instructor's permission.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137) or The fundamentals of database design and application development using databases: entity-relationship modeling, logical design of relational databases, relational data definition and manipulation languages, SQL, XML, query processing, physical database tuning, transaction processing, security. Programming projects are required

COMS W4112 DATABASE SYSTEM IMPLEMENTATION. 3.00 points.

Lect: 2.5.

Prerequisites: (COMS W4111) and fluency in Java or C++. CSEE W3827 is recommended.

The principles and practice of building large-scale database management systems. Storage methods and indexing, query processing and optimization, materialized views, transaction processing and recovery, object-relational databases, parallel and distributed databases, performance considerations. Programming projects are required

COMS W4113 FUND-LARGE-SCALE DIST SYSTEMS. 3.00 points.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119)

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119) Design and implementation of large-scale distributed and cloud systems. Teaches abstractions, design and implementation techniques that enable the building of fast, scalable, fault-tolerant distributed systems. Topics include distributed communication models (e.g. sockets, remote procedure calls, distributed shared memory), distributed synchronization (clock synchronization, logical clocks, distributed mutex), distributed file systems, replication, consistency models, fault tolerance, distributed transactions, agreement and commitment, Paxos-based consensus, MapReduce infrastructures, scalable distributed databases. Combines concepts and algorithms with descriptions of real-world implementations at Google, Facebook, Yahoo, Microsoft, LinkedIn, etc

COMS W4115 PROGRAMMING LANG # TRANSLATORS. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3261) and (CSEE W3827) or equivalent, or the instructor's permission.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3261) and (CSEE W3827) or equivalent, or the instructor's permission. Modern programming languages and compiler design. Imperative, object-oriented, declarative, functional, and scripting languages. Language syntax, control structures, data types, procedures and parameters, binding, scope, run-time organization, and exception handling. Implementation of language translation tools including compilers and interpreters. Lexical, syntactic and semantic analysis; code generation; introduction to code optimization. Teams implement a language and its compiler

COMS W4119 COMPUTER NETWORKS. 3.00 points.

Introduction to computer networks and the technical foundations of the internet, including applications, protocols, local area networks, algorithms for routing and congestion control, security, elementary performance evaluation. Several written and programming assignments required

COMS W4121 COMPUTER SYSTEMS FOR DATA SCIENCE. 3.00 points.

Prerequisites: background in Computer System Organization and good working knowledge of C/C++

Corequisites: CSOR W4246, STAT GU4203

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers

COMS W4130 Principles and Practice of Parallel Programming. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3137 or COMS W3136 and experience in Java) and basic understanding of analysis of algorithms. Principles of parallel software design. Topics include task and data decomposition, load-balancing, reasoning about correctness, determinacy, safety, and deadlock-freedom. Application of techniques through semester-long design project implementing performant, parallel application in a modern parallel programming language.

COMS W4152 Engineering Software-as-a-Service. 3.00 points.

Modern software engineering concepts and practices including topics such as Software-as-a-Service, Service-oriented Architecture, Agile Development, Behavior-driven Development, Ruby on Rails, and Dev/ops

COMS W4160 COMPUTER GRAPHICS. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137)
COMS W4156 is recommended. Strong programming background and some mathematical familiarity including linear algebra is required.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137)
COMS W4156 is recommended. Strong programming background and some mathematical familiarity including linear algebra is required.

Introduction to computer graphics. Topics include 3D viewing and projections, geometric modeling using spline curves, graphics systems such as OpenGL, lighting and shading, and global illumination.

Significant implementation is required: the final project involves writing an interactive 3D video game in OpenGL

COMS W4162 Advanced Computer Graphics. 3 points.

Lect: 3.

Prerequisites: (COMS W4160) or equivalent, or the instructor's permission.

A second course in computer graphics covering more advanced topics including image and signal processing, geometric modeling with meshes, advanced image synthesis including ray tracing and global illumination, and other topics as time permits. Emphasis will be placed both on implementation of systems and important mathematical and geometric concepts such as Fourier analysis, mesh algorithms and subdivision, and Monte Carlo sampling for rendering. Note: Course will be taught every two years.

COMS W4165 COMPUT TECHNIQUES-PIXEL PROCSS. 3.00 points.

An intensive introduction to image processing - digital filtering theory, image enhancement, image reconstruction, antialiasing, warping, and the state of the art in special effects. Topics from the basis of high-quality rendering in computer graphics and of low-level processing for computer vision, remote sensing, and medical imaging. Emphasizes computational techniques for implementing useful image-processing functions

COMS W4167 COMPUTER ANIMATION. 3.00 points.

Lect: 3.

Prerequisites: Multivariable calculus, linear algebra, C++ programming proficiency. COMS W4156 recommended.

Theory and practice of physics-based animation algorithms, including animated clothing, hair, smoke, water, collisions, impact, and kitchen sinks. Topics covered: Integration of ordinary differential equations, formulation of physical models, treatment of discontinuities including collisions/contact, animation control, constrained Lagrangian Mechanics, friction/dissipation, continuum mechanics, finite elements, rigid bodies, thin shells, discretization of Navier-Stokes equations.

General education requirement: quantitative and deductive reasoning (QUA).

COMS W4205 Combinatorial Theory. 3 points.
 Lect: 3. **Not offered during 2023-2024 academic year.**

Prerequisites: (COMS W3203) and course in calculus.
 Sequences and recursions, calculus of finite differences and sums, elementary number theory, permutation group structures, binomial coefficients, Stirling numbers, harmonic numbers, generating functions.

COMS W4223 Networks, Crowds, and the Web. 3.00 points.

This class introduces fundamental ideas and algorithms on networks of information collected by online services. It covers properties pervasive in large networks, dynamics of individuals that lead to large collective phenomena, mechanisms underlying the web economy, and results and tools informing societal impact of algorithms on privacy, polarization and discrimination

COMS W4231 ANALYSIS OF ALGORITHMS I. 3.00 points.

COMS W4232 Advanced Algorithms. 3.00 points.
 Prerequisite: Analysis of Algorithms (COMS W4231).

Prerequisites: see notes re: points
 Introduces classic and modern algorithmic ideas that are central to many areas of Computer Science. The focus is on most powerful paradigms and techniques of how to design algorithms, and how to measure their efficiency. The intent is to be broad, covering a diversity of algorithmic techniques, rather than be deep. The covered topics have all been implemented and are widely used in industry. Topics include: hashing, sketching/streaming, nearest neighbor search, graph algorithms, spectral graph theory, linear programming, models for large-scale computation, and other related topics

COMS W4236 INTRO-COMPUTATIONAL COMPLEXITY. 3.00 points.
 Lect: 3.

Prerequisites: (COMS W3261)
 Prerequisites: (COMS W3261) Develops a quantitative theory of the computational difficulty of problems in terms of the resources (e.g. time, space) needed to solve them. Classification of problems into complexity classes, reductions, and completeness. Power and limitations of different modes of computation such as nondeterminism, randomization, interaction, and parallelism

COMS W4241 Numerical Algorithms and Complexity. 3 points.

Lect: 3.

Prerequisites: Knowledge of a programming language. Some knowledge of scientific computation is desirable. Modern theory and practice of computation on digital computers. Introduction to concepts of computational complexity. Design and analysis of numerical algorithms. Applications to computational finance, computational science, and computational engineering.

COMS W4242 NUMRCL ALGORITHM-S-COMPLEXITY II. 3.00 points.**COMS W4252 INTRO-COMPUTATIONAL LEARN THRY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CSOR W4231) or (COMS W4236) or *COMS W3203* and the instructor's permission, or *COMS W3261* and the instructor's permission.

Possibilities and limitations of performing learning by computational agents. Topics include computational models of learning, polynomial time learnability, learning from examples and learning from queries to oracles. Computational and statistical limitations of learning. Applications to Boolean functions, geometric functions, automata.

COMS W4419 INTERNET TECHNOLOGY,ECONOMICS,AND POLICY. 3.00 points.**Not offered during 2023-2024 academic year.**

Technology, economic and policy aspects of the Internet. Summarizes how the Internet works technically, including protocols, standards, radio spectrum, global infrastructure and interconnection. Micro-economics with a focus on media and telecommunication economic concerns, including competition and monopolies, platforms, and behavioral economics. US constitution, freedom of speech, administrative procedures act and regulatory process, universal service, role of FCC. Not a substitute for CSEE4119. Suitable for non-majors. May not be used as a track elective for the computer science major.

COMS W4444 PROGRAMMING # PROBLEM SOLVING. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (CSEE W3827)

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (CSEE W3827) Hands-on introduction to solving open-ended computational problems. Emphasis on creativity, cooperation, and collaboration. Projects spanning a variety of areas within computer science, typically requiring the development of computer programs. Generalization of solutions to broader problems, and specialization of complex problems to make them manageable. Team-oriented projects, student presentations, and in-class participation required

COMS W4560 INTRO-COMP APPL-HLTH CRE/BIOMD. 3.00 points.

Lect: 3.

Prerequisites: Experience with computers and a passing familiarity with medicine and biology. Undergraduates in their senior or junior years may take this course only if they have adequate background in mathematics and receive the instructor's permission.

Undergraduates in their senior or junior years may take this course only if they have adequate background in mathematics and receive permission from the instructor. An overview of the field of biomedical informatics, combining perspectives from medicine, computer science, and social science. Use of computers and information in healthcare and the biomedical sciences, covering specific applications and general methods, current issues, capabilities and limitations of biomedical informatics. Biomedical Informatics studies the organization of medical information, the effective management of information using computer technology, and the impact of such technology on medical research, education, and patient care. The field explores techniques for assessing current information practices, determining the information needs of healthcare providers and patients, developing interventions using computer technology, and evaluating the impact of those interventions

COMS W4701 ARTIFICIAL INTELLIGENCE. 3.00 points.

COMS W4725 Knowledge representation and reasoning. 3 points.Lect: 3. **Not offered during 2023-2024 academic year.**

Prerequisites: (COMS W4701)

General aspects of knowledge representation (KR). The two fundamental paradigms (semantic networks and frames) and illustrative systems. Topics include hybrid systems, time, action/plans, defaults, abduction, and case-based reasoning. Throughout the course particular attention is paid to design trade-offs between language expressiveness and reasoning complexity, and issues relating to the use of KR systems in larger applications.

COMS W4731 Computer Vision I: First Principles. 3.00 points.

Lect: 3.

Prerequisites: Fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.

Introductory course in computer vision. Topics include image formation and optics, image sensing, binary images, image processing and filtering, edge extraction and boundary detection, region growing and segmentation, pattern classification methods, brightness and reflectance, shape from shading and photometric stereo, texture, binocular stereo, optical flow and motion, 2D and 3D object representation, object recognition, vision systems and applications

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137)

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137)

Visual input as data and for control of computer systems. Survey and analysis of architecture, algorithms, and underlying assumptions of commercial and research systems that recognize and interpret human gestures, analyze imagery such as fingerprint or iris patterns, generate natural language descriptions of medical or map imagery. Explores foundations in human psychophysics, cognitive science, and artificial intelligence

COMS W4737 Biometrics. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a background at the sophomore level in computer science, engineering, or like discipline.

In this course, we will explore the latest advances in biometrics as well as the machine learning techniques behind them. Students will learn how these technologies work and how they are sometimes defeated. Grading will be based on homework assignments and a final project. There will be no midterm or final exam. This course shares lectures with *COMS E6737*. Students taking *COMS E6737* are required to complete additional homework problems and undertake a more rigorous final project. Students will only be allowed to earn credit for *COMS W4737* or *COMS E6737* and not both.

COMS W4762 Machine Learning for Functional Genomics. 3 points.

Prerequisites: Proficiency in a high-level programming language (Python/R/Julia). An introductory machine learning class (such as COMS 4771 Machine Learning) will be helpful but is not required.

Prerequisites: see notes re: points

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA ("chromatin") are active ("open") or bound by specific proteins.

COMS W4771 MACHINE LEARNING. 3.00 points.

Lect: 3.

Prerequisites: Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence.

Prerequisites: Any introductory course in linear algebra and any introductory course in statistics are both required. Highly recommended: COMS W4701 or knowledge of Artificial Intelligence. Topics from generative and discriminative machine learning including least squares methods, support vector machines, kernel methods, neural networks, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models and hidden Markov models. Algorithms implemented in MATLAB

COMS W4772 Advanced Machine Learning. 3 points.

Lect: 3.

Prerequisites: (COMS W4771) or instructor's permission; knowledge of linear algebra & introductory probability or statistics is required.

An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally? Topics include appearance-based models, principal and independent components analysis, dimensionality reduction, kernel methods, manifold learning, latent models, regression, classification, Bayesian methods, maximum entropy methods, real-time tracking, extended Kalman filters, time series prediction, hidden Markov models, factorial HMMs, input-output HMMs, Markov random fields, variational methods, dynamic Bayesian networks, and Gaussian/Dirichlet processes. Links to cognitive science.

COMS W4773 Machine Learning Theory. 3 points.

Prerequisites: Machine Learning (COMS W4771). Background in probability and statistics, linear algebra, and multivariate calculus. Ability to program in a high-level language, and familiarity with basic algorithm design and coding principles.

Prerequisites: see notes re: points

Core topics from unsupervised learning such as clustering, dimensionality reduction and density estimation will be studied in detail. Topics in clustering: k-means clustering, hierarchical clustering, spectral clustering, clustering with various forms of feedback, good initialization techniques and convergence analysis of various clustering procedures. Topics in dimensionality reduction: linear techniques such as PCA, ICA, Factor Analysis, Random Projections, non-linear techniques such as LLE, IsoMap, Laplacian Eigenmaps, tSNE, and study of embeddings of general metric spaces, what sorts of theoretical guarantees can one provide about such techniques. Miscellaneous topics: design and analysis of data structures for fast Nearest Neighbor search such as Cover Trees and LSH. Algorithms will be implemented in either Matlab or Python.

COMS W4774 Unsupervised Learning. 3.00 points.

Prerequisites: Solid background in multivariate calculus, linear algebra, basic probability, and algorithms.

COMS W4775 Causal Inference. 3.00 points.

Prerequisites: Discrete Math, Calculus, Statistics (basic probability, modeling, experimental design), some programming experience.

Prerequisites: see notes re: points

Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML

Department Assistant: Diane Roe

The Department of Dance

Mission

The Barnard College Department of Dance, located in a world dance capital, offers an interdisciplinary program that integrates the study of dance within a liberal arts setting of intellectual and creative exploration. The major builds upon studio courses, the Department's productions at Miller Theater, New York Live Arts, and other venues, as well as a rich array of dance studies courses, allowing students' creative work to develop in dialogue with critical inquiry into the history, culture, theory and forms of western and non-western performance, typically enhanced by study in other disciplines. Students work with accomplished artists whose work enriches contemporary American dance; they also study with outstanding research scholars.

Making, thinking about, and writing about art are an essential part of the liberal arts education. For this reason, the Department of Dance offers technique courses for students of all levels of expertise, while opening its other courses to majors and non-majors alike, who may also audition for its productions. The Department partners with cultural institutions in New York City to connect students with the professional world.

Student Learning Outcomes for the Major and Minor

Students graduating with a major in Dance should be able to attain the following outcomes:

- Apply critical thinking, reading, and writing skills to dance-related texts and choreography.
- Develop the knowledge and research skills to explore the dance past in writing, orally, and in performance.
- Present interpretations of dance-related texts orally, in writing, and in performance.
- Apply library, archival, and internet research skills to dance scholarship and choreography.
- Demonstrate improved efficiency and expressivity in dance technique.
- Demonstrate growing technical understanding and fluency in dance technique.
- Create original dances, dance/theater works or dance-based, mixed media works.
- Collaborate with an artist in the creation of original dance works.
- Participate in the creative process through the creation and interpretation of choreography.
- Apply interdisciplinary research methods to dance scholarship and choreography.
- Apply historical research methods to dance scholarship and choreography.
- Demonstrate conceptual and methodological approaches for studying world dance forms through research and writing.
- Demonstrate the ability to understand cultural and historical texts in relation to dance forms.
- Apply anatomical knowledge to movement and movement concepts.
- Evaluate the theoretical and artistic work of peers.
- Communicate with an audience in oral presentations and dance performance.
- Understand and interpret the language and form of an artist's choreography.
- Solve technical problems in dance movement.

Major in Dance

Majors must complete eleven academic courses (six required, five elective) and a minimum of eight 1-point technique courses (minimum 42 credits). All majors write a senior thesis as part of their coursework.

The required courses for the major in dance are distributed as follows:

Dance History

The following two courses in Dance History must be completed before the fall of the senior year:

DNCE BC2565	WORLD DANCE HISTORY
DNCE BC3001	HISTORY OF THEATRICAL DANCING

Movement Science

Select one or more of the following:

DNCE BC2562	MOVEMENT ANALYSIS
ANAT BC2573	HUMAN ANATOMY AND MOVEMENT
DNCE BC3144	Coding Choreography

Composition

One course in Composition must be completed before the fall of the senior year.

DNCE BC2563	DANCE COMPOSITION: FORM
DNCE BC2564	DANCE COMPOSITION: CONTENT

DNCE BC3560	SCREENDANCE:COMPOSITION
DNCE BC3565	Composition: Collaboration and the Creative Process
DNCE BC3566	Composition: Site Specific and Experimental Methods

Senior Work

Seniors planning to write a combined thesis must request approval from both departments and notify the Registrar. All majors must complete two semesters of senior work. The following course, which culminates in a 25-30-page written thesis and an oral presentation to the Department at the end of the semester, is required of all seniors:

DNCE BC3591 SENIOR SEMINAR

In addition, all majors must take one of the following two courses, depending on whether the senior requirement is completed with a creative project or a two-semester written thesis: 3-4

DNCE BC3592 Senior Project: Research for Dance

DNCE BC3593 SR PROJECT:REPERTORY FOR DANCE

Students who are double majors may request permission to write a two-semester combined thesis.

Electives

Five additional 3- or 4-point courses, chosen in consultation with the major advisor, are required. Electives may be chosen from among the departmental offerings listed above or below, including additional coursework in Composition, Movement Science, and/or Senior Work beyond the major requirement. 15-20

DNCE BC3567 DANCES OF INDIA. 3.00 points.

A range of dance genres, from the traditional to the innovative, co-exist as representations of Indianness in India, and beyond. Identities onstage and in films, morph as colonial, national, and global contexts change. This course zooms from micro to macro views of twentieth century staged dances as culturally inflected discourse. We review how Indian classical dance aligns with the oldest of performance texts, and with lively discourses (rasa as a performance aesthetic, Orientalism, nationalism, global recirculations) through the ages, not only in India but also in Europe, Britain and America. Throughout the course, we ask:- How is culture embodied? How do historical texts configure dance today? How might they affect our thinking on mind-body, practice-theory, and traditional-contemporary divides? How does bodily patterning influence the ways that we experience our surroundings and vice versa? Can cultural imaginaries instigate action? How is gender is performed? What are dance discourses?

DNCE BC3576 DANCE CRITICISM. 3.00 points.

This course offers intensive practice in writing on dance and explores a range of approaches to dance criticism from the 1940s through today. Starting from the premise that criticism can be an art form in itself, we ask: What are the roles and responsibilities of a critic? How do our own identities and experiences inform how we see and write? With the proliferation of dance in digital spaces, what new possibilities arise for dance criticism? Class meetings include discussion, writing exercises, and peer workshops. Assignments involve viewing performances outside of class

Economic and Social History

1019 Milstein Learning Center

212-854-3454

Department Administrator: Robert O'Connor

Mission

The Economic and Social History major is an interdisciplinary major that combines economic reasoning with different historiographic approaches and quantitative analysis. The major encourages students to develop an understanding of the human experience through the record of the past and acquire intellectual tools to analyze historical changes from an economic and social perspective. Students are exposed to different ways of thinking about the origins of capitalism, the structural features of modern economies, regional differences or global diversity in long-run economic performance and socioeconomic well-being, and the challenges and opportunities facing the global economy today. By looking at both the social and the economic dimensions of the histories of one or more geographical regions, students gain a valuable interdisciplinary perspective that enables them to appreciate and think systematically and critically about the complexities of human interaction.

Student Learning Outcomes

Students who complete the major in Economic and Social History will be able to attain the following:

- Show fluency in basic concepts, models and tools of economic theory and economic history.
- Understand the difference between primary and secondary sources, and use and evaluate these materials through critical reading and interpretation.
- Demonstrate understanding of institutions, organizations and markets in their roles of coordinating economic and social activity.
- Use concepts or methods from multiple disciplines including economics to analyze the past.
- Articulate a well-defined research question and conduct independent research using economic reasoning and historical evidence.
- Communicate economic ideas and historical concepts effectively in written or oral form.
- Demonstrate knowledge and capacity to do in-depth research on a particular geographic area, time period, or central theme in economic and social history.

- Demonstrate knowledge of the history of economic thought, its relation to historical developments, and influence on past and present economic theory and ideas.
- Show an appreciation for different historiographic approaches to the study of economic and social history.
- Show familiarity with varied perspectives on the origins of capitalism and the diversity of economic development across regions.

Students who graduate with a major in Economic and Social History will be prepared to enter graduate programs in history, business, public policy/administration, or to pursue careers such as in public policy or business that call for diverse perspectives and skills.

This program is supervised by the Committee on Economic and Social History:

Program Committee: Alan Dye (Economics), Deborah Valenze (History), David Weiman (Economics), and Carl Wennerlind (History).

HIST BC1801 Colonialism and Nationalism in South Asia. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Introduction to South Asian history (17-20 c.) that explores the colonial economy and state formation; constitution of religious and cultural identities; ideologies of nationalism and communalism, caste and gender politics; visual culture; and the South Asian diaspora.

HIST BC2116 The History of Money. 3 points.

Examining the history of money and the history of ways of thinking about money. We investigate how different monetary forms developed and how they have shaped and been shaped by culture, society, and politics. Tracing money from gift-giving societies to the European Monetary Union, the focus is on early modern Europe.

HIST BC2180 Merchants, Pirates, and Slaves in the Making of Atlantic Capitalism. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Examines how the Atlantic Ocean and its boundaries were tied together through the flow of people, goods, and ideas. Studies the cultures of the communities formed by merchants, pirates, and slaves; investigates how their interactions and frictions combined to shape the unique combination of liberty and oppression that characterizes early modern capitalism.

HIST BC2321 COLONIAL ENCOUNTERS. 3.00 points.

Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism

HIST BC3062 Medieval Economic Life and Thought ca 1000 to 1500. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Traces the development of economic enterprises and techniques in their cultural context: agricultural markets, industry, commercial partnerships, credit, large-scale banking, insurance, and merchant culture. Examines usury and just price theory, the scholastic analysis of price and value, and the recognition of the market as a self-regulating system, centuries before Adam Smith.

HIST BC3119 Capitalism and Enlightenment. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Traces the lively debates amongst the major European Enlightenment figures about the formation of capitalism. Was the new market society ushering in an era of wealth and civilization or was it promoting corruption and exploitation? Particular emphasis on debates about commerce, luxury, greed, poverty, empire, slavery, and liberty.

HIST BC3332 The Politics of Leisure in Modern Europe. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Transformations in the culture of leisure from the onset of industrialization to the present day. Relations between elite and popular culture and the changing relationship between the work world and the world of leisure will be among the topics considered in such settings as the department store, the pub, the cinema, and the tourist resort.

HIST W3411 The Rise of American Capitalism. 3 points.

E-Commerce & Internet Technologies Track, Managing Emerging Technologies Track, Project Management Track, Discussion Section Required, Lab Required

Examines the social conflicts that accompanied the transformation of the United States from an agrarian republic and slave society to one of the most powerful industrial nations in the world. Particular attention will be paid to the building of new social and economic institutions and to cultural and visual representations of the nation and its people. Readings include major secondary works and primary documents. Formerly: American Society in the age of Capital, 1819-1897. *Field(s): US*

HIST W3503 Workers in Industrial and Post-Industrial America. 3 points.

Not offered during 2023-2024 academic year.

The history of work, workers, and unions during the 20th century.

Topics include scientific management, automation, immigrant workers, the rise of industrial unionism, labor politics, occupational discrimination, and working-class community life. *Field(s): US*

HIST BC3886 Fashion. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Prerequisites: At least one course in a Non-U.S. Area in History, Literature, Anthropology, Film Studies or Art History. Permission of the instructor. Enrollment limited to 15. Preregistration required. Investigates the cultural, material and technological conditions that facilitated the development of "fashion systems" in early modern Europe, Japan and contemporary Asian diasporic communities. In the global framework, "fashion" serves as a window into the politics of self-presentation, community formation, structure of desires, and struggles over representation.

HIST BC3905 Capitalism, Colonialism, and Culture: A Global History. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of Instructor. Enrollment limited to 15.

Preregistration required.

From Indian Ocean worlds of the seventeenth century, to Atlantic world slavery, to the establishment of colonies in Asia and Africa during the nineteenth century, colonization was critical to the development of metropolitan ideas regarding politics and personhood. This seminar will examine these histories, along with emerging constructions of race and gender, as precursors to debates about human rights and humanitarianism in the twentieth century.

HSEA W4884 Merchants, Markets, Modernity - China. 4 points.

From Marx's Asiatic Mode of Production to contemporary notions of Confucian capitalism, theories abound to explain China's divergence from Western patterns of political and economic development. This course critiques these theories and looks at the Chinese economy starting with its own internal logic to explore the social, cultural, institutional and political forces that underlay Chinese economic practice, the role of markets, merchants, labor, and the state in the making of modern China. No prerequisite.

HIST W4434 The Atlantic Slave Trade. 4 points.

This seminar provides an intensive introduction to the history of the Atlantic slave trade. The course will consider the impact of the traffic on Western Europe and the Americas, as well as on Africa, and will give special attention to the experiences of both captives and captors. Assignments include three short papers and a longer research paper of 20 to 25 pages. *Field(s): INTL*

HIST W4518 Research Seminar: Columbia and Slavery. 4 points.

In this course, students will write original, independent papers of around 25 pages, based on research in both primary and secondary sources, on an aspect of the relationship between Columbia College and its colonial predecessor King's College, with the institution of slavery.

Economics and Statistics

The Economics-Statistics major provides the student with a grounding in economic theory comparable to that provided by the general economics major; and also exposes the student to rigorous and extensive training in Statistics. Students choose between two tracks of the major. The Computational Track consists of coursework in applied statistical methods. It is recommended for students preparing to apply statistical methods in the social sciences. The Theoretical Track consists of calculus-based probability, and the theory of statistical inference. It also provides some practical training in data analysis.

Available to students of the Class of 2021 and later.

Department Administrator: Robert O'Connor

Chair: Rajiv Sethi (Ann Whitney Olin Professor)

Professors: Elizabeth Ananat, André Burgstaller, Alan Dye, Daniel Hamermesh (Distinguished Scholar), Sharon Harrison, Shaw-Hwa Lo (Statistics), Lalith Munasinghe, David Weiman (Alena Wels Hirschorn '58 Professor)

Associate Professors: Yang Feng (Statistics), Jingchen Liu (Statistics), Randall Reback, Ashley Timmer (Adjunct)

Assistant Professors: Belinda Archibong, Biwei Chen (Term), Martina Jasova, Elizabeth Kopko (Adjunct), Peter Orbanz (Statistics), Sonia Pereira (Term), Anja Tolonen, Homa Zarghamee

Associates: John Park

Lecturers in Statistics: Banu Baydil, Ronald Neath, David Rios, Joyce Robbins, Gabriel Young

Computational Track

The Economics-Statistics, Computational Track requires a minimum of 16 courses (52 minimum credits).

10 courses in Economics, Mathematics

ECON BC1003 INTRO TO ECONOMIC REASONING

MATH UN1102 CALCULUS II

MATH UN1201 CALCULUS III

MATH UN2010 LINEAR ALGEBRA

Corequisites: An introductory course in statistic (STAT UN1101 is recommended). This course is an introduction to R programming. After learning basic programming component, such as defining variables and vectors, and learning different data structures in R, students will, via project-based assignments, study more advanced topics, such as conditionals, modular programming, and data visualization. Students will also learn the fundamental concepts in computational complexity, and will practice writing reports based on their data analyses

Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful. This course covers statistical models and methods for analyzing and drawing inferences for problems involving categorical data. The goals are familiarity and understanding of a substantial and integrated body of statistical methods that are used for such problems, experience in analyzing data using these methods, and proficiency in communicating the results of such methods, and the ability to critically evaluate the use of such methods. Topics include binomial proportions, two-way and three-way contingency tables, logistic regression, log-linear models for large multi-way contingency tables, graphical methods. The statistical package R will be used

CC/GS: Partial Fulfillment of Science Requirement

A general introduction to computer science concepts, algorithmic problem-solving capabilities, and programming skills in MATLAB. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: *W1004* or *W1005*.

COMS W1007 Honors Introduction to Computer Science. 3 points.

Lect: 3.

Prerequisites: AP Computer Science with a grade of 4 or 5 or similar experience.

An honors-level introduction to computer science, intended primarily for students considering a major in computer science. Computer science as a science of abstraction. Creating models for reasoning about and solving problems. The basic elements of computers and computer programs. Implementing abstractions using data structures and algorithms. Taught in Java.

Economics

1019 Milstein Learning Center
212-854-3454

Department Administrator: Regina Roberts

Mission

The primary aim of the Barnard Economics Department is to provide undergraduate liberal arts students with a rigorous, broad, and critical program in theoretical and empirical economics. To achieve this aim our curriculum

- Provides a thorough grounding in neoclassical economic theory, modern statistical method, and their applications in the traditional fields of economic science;
- Embeds that training in a broader conception of economic science and method with special emphasis on philosophical, historical, and institutional approaches that link economics with other social sciences and humanistic disciplines;
- Compares and contrasts alternative methodological approaches and types of evidence as ways of analyzing economic phenomena, evaluating policy debates, and assessing the broader social and political consequences of economic doctrines.

Student Learning Outcomes for the Economics Major, Economics and Political Economy Tracks

Having successfully completed the major in Economics, the student will be able to attain the following outcomes:

1. Show fluency in the basic concepts, models and tools of microeconomic and macroeconomic theory;
2. Think critically about economic phenomena and economic debates by using multiple kinds of texts, evidence and conceptual approaches;
3. Apply economic reasoning to understand the causal determinants of economic events, empirical regularities, and policy proposals;
4. Apply basic skills of empirical reasoning to economic problems;
5. Demonstrate knowledge of the history of economic thought, including important doctrines, their historical context, transformation over time, and influence on contemporary economic theory and ideas;
6. Demonstrate understanding of institutions, organizations and markets in their roles of coordinating economic activity;
7. Demonstrate knowledge of the historical origins of capitalism, modern economic growth and development, patterns of inequality, and globalization;
8. Articulate a well-defined research question and conduct independent research using economic reasoning and evidence;
9. Communicate economic ideas effectively in written or oral form.

Specific to the Economics Track

1. Understand and apply statistical techniques to make inferences about economic hypotheses.

Specific to the Political Economy Track

1. Use concepts or methods from at least one disciplinary approach other than economics to analyze an economic, political or other social problem.

Barnard will allow a total of 3 points AP credit in Economics only if the following conditions are satisfied: an AP score of 4 or 5 in either Macro or Micro (or both), or an International Baccalaureate (IB) score of 5 or higher. However, students who receive AP credit for economics and who go on to pursue any of the economics department majors (or an economics minor) must still take ECON BC1003 INTRO TO ECONOMIC REASONING or its equivalent. For Statistics, Barnard will allow 3 points credit with a score of 5 on the Statistics AP exam. Economics track majors, however, will not be exempt from the statistics requirement

ECON BC2411 STATISTICS FOR ECONOMICS or the equivalent, even if they receive 3 points AP credit for Statistics.

Requirements for the Major

There are two tracks for the major in Economics equal in rigor, but different in scope and focus. The track in Economics emphasizes modern economic theory along with associated analytical and mathematical tools. The track in Political Economy emphasizes the roots of modern economics in the history of economic thought and the interconnections between social forces, political institutions, and economic power. Either track offers excellent preparation for graduate study in a variety of professional schools and professional careers in many areas, including business and public administration.

Prospective majors should discuss their programs with any member of the department no later than the second semester of their sophomore year. At the time of declaring the major, the student meets with the department chair and chooses a major adviser, who will advise her on the choice of program and courses. Students planning to major in Economics or Political Economy should complete both intermediate macro- and microeconomic theory by the beginning of their junior year.

Students who wish to complete a double or joint major that includes Economics should consult the chair of the department or the major adviser as early as possible. Students interested in pursuing a Ph.D. in economics should take more mathematics than required for the economics major or choose the Economics and Mathematics interdisciplinary major. Any interested student should seek guidance from the Economics and/or Mathematics faculty on which mathematics courses to take.

All majors should file the "Major Requirements Declaration" form, available from the department office by the end of their sophomore year, or as soon as possible thereafter.

Economics

The Economics track requires a minimum of 12 courses (36 minimum credits).

ECON BC1003	INTRO TO ECONOMIC REASONING	3
ECON BC1007	MATH METHODS FOR ECONOMICS *	4
or MATH UN1201	CALCULUS III	
ECON BC2411	STATISTICS FOR ECONOMICS	4

ECON BC3033	INTERMEDTE MACROECONOMC THEORY	4
ECON BC3035	INTERMEDTE MICROECONOMC THEORY	4
ECON BC3041	THEORETICL FOUNDTNS-POLIT ECON	3

Three electives in economics, two of which must be upper-level (that is, they must have intermediate micro- or macroeconomic theory as a prerequisite).

One of the following two options:

ECON BC3061	SENIOR THESIS I
- ECON BC3062	and SENIOR THESIS II
ECON BC3063	SENIOR SEMINAR (and an additional upper-level elective in economics)

* Students will not receive credit for ECON BC1007 MATH METHODS FOR ECONOMICS if they have already taken ECON BC3035 INTERMEDTE MICROECONOMC THEORY. Such students must instead complete the mathematics requirement by taking MATH UN1201 CALCULUS III (Calculus III).

Political Economy

The Political Economy track major requires a minimum of 13 courses (42 minimum credits).

ECON BC1003	INTRO TO ECONOMIC REASONING	3
ECON BC1007	MATH METHODS FOR ECONOMICS	4
or MATH UN1101	CALCULUS I	
ECON BC3033	INTERMEDTE MACROECONOMC THEORY	4

or STAT UN1201	CALC-BASED INTRO TO STATISTICS	
or PSYC BC1101	STATISTICS LECTURE AND RECITATION	

Three electives in economics, two of which must be upper-level electives (that is, they must have intermediate micro- or macroeconomic theory as a prerequisite)

Two interdisciplinary electives (see further conditions below)

And one of the following two options:

ECON BC3061	SENIOR THESIS I
- ECON BC3062	and SENIOR THESIS II
ECON BC3063	SENIOR SEMINAR (and an additional upper-level elective in economics)

Interdisciplinary Electives

[NOTE: Statistics is required for Political Economy track majors in the class of 2021 and later. It replaces one of the three interdisciplinary electives formerly required for the class of 2020 and earlier.]

Linking interdisciplinary electives to economics electives: If a course is "linked," this means that it addresses subject matter that is related to the subject matter of the economics elective to which it is paired. There are many possible ways to link a course to an economics elective. A [link](#) to some suggestions from the department website is given below. Whether a course qualifies as a linked course must be approved by the student's major adviser.

Mathematics Training for the Major

The department expects all majors to have a working knowledge of arithmetic, high school algebra, and the fundamentals of analytic geometry.

Majors in the economics track may complete the mathematics requirement by taking ECON BC1007 MATH METHODS FOR ECONOMICS, or MATH UN1101 CALCULUS I and MATH UN1201 CALCULUS III. Students who have received advanced placement credit or have placed out of Calculus I may take either Math Methods or Calculus III to complete the requirement. (Students with 5 on the Calculus BC test may begin with Calculus III.)

Majors in the political economy track may complete the mathematics requirement by taking ECON BC1007 MATH METHODS FOR ECONOMICS or MATH UN1101 CALCULUS I. Students who have received advanced placement college credit for calculus have satisfied the mathematics requirement for the political economy track, however they must take an additional economics elective as a substitute for

the AP credit so that the total number of courses taken for the major remains the same.

Students interested in pursuing a Ph.D. in economics should take more mathematics than required for the economics major or choose the Economics and Mathematics interdisciplinary major. Any interested student should seek guidance from the Economics and/or Mathematics faculty on which mathematics courses to take.

Requirements for the Minor

The minor in economics consists of five courses, including ECON BC1003 INTRO TO ECONOMIC REASONING or equivalent, ECON BC3033 INTERMEDTE MACROECONOMC THEORY or ECON BC3035 INTERMEDTE MICROECONOMC THEORY, and three electives, one of which must have an intermediate micro- or macroeconomic theory course as a prerequisite.

Introductory Courses

The principles of economics; may be taken without previous study of economics.

ECON BC1003 INTRO TO ECONOMIC REASONING. 3.00 points.

Covers basic elements of microeconomic and macroeconomic reasoning at an introductory level. Topics include Individual Constraints and Preferences, Production by Firms, Market Transactions, Competition, The Distribution of Income, Technological Progress and Growth, Unemployment and Inflation, the Role of Government in the Economy. Note: Students cannot get credit for ECON BC1003 if they have taken the Columbia introductory course ECON W1105 Principles of Economics

General Courses

May be taken with minimal previous study of economics.

ECON BC2010 The Economics of Gender. 3 points.

Examination of gender differences in the U.S. and other advanced industrial economies. Topics include the division of labor between home and market, the relationship between labor force participation and family structure, the gender earnings gap, occupational segregation, discrimination, and historical, racial, and ethnic group comparisons.

ECON BC2017 INTRODUCTION TO HEALTH ECONOMICS. 3.00 points.

Prerequisites: (ECON BC1003 or ECON UN1105)

Prerequisites: (ECON BC1003 or ECON UN1105) This course covers the core microeconomic theories and concepts needed to understand health and health care issues in the United States. It describes how the markets for health and health services are different from those for other goods, with an emphasis on providing the tools and skills for understanding health policy and regulations. In addition, it discusses theoretical and empirical aspects of key health economics issues, with a primary focus on applying the tools of economic analysis to understand the basic forces—supply and demand, asymmetric information, incentives, and externalities, for example—that influence health policies

ECON BC2020 Introduction to Development Economics. 3 points.

Students will be introduced to current issues within development economics, and to fundamental economic concepts explaining economic growth. It will discuss the crosscutting themes of gender equality and environmental sustainability, while approaching topics within economic growth, population growth, human capital, health, agriculture, urbanization, natural resources, conflict, and institutions.

ECON UN2029 FED CHALLENGE WORKSHOP. 1.00 point.

Prerequisites: (ECON UN1105)

ECON BC2075 Logic and Limits of Economic Justice. 3 points.

BC: Fulfillment of General Education Requirement: Ethics and Values.

Prerequisites: Introduction to Economic Reasoning (ECON BC 1003) or Principles of Economics (ECON W1105). An introductory course in political theory or political philosophy is strongly recommended, but not required.

Introduce students to problems of economic justice under capitalism.

Course has three goals: (1) expose students to debates between economics and philosophers about the meaning and nature of justice, (2) explore conflict between efficiency and justice, (3) examine implications of justice for gender equality, intergenerational equity and climate change.

STEM BC2223 PROGRAMMING BEHAV SCIENCES. 4.00 points.**ECON BC2224 CODING MARKETS. 4.00 points.**

Prerequisites: (ECON BC1003 or ECON UN1105)

Prerequisites: (ECON BC1003 or ECON UN1105) Students will learn how to write computer programs that can be used to solve assignment problems, including matching buyers with sellers in electronic financial markets, as well as assignment problems that don't involve prices: matching organ donors with recipients, residents with hospitals, and students with high schools for example. The programming language used will be MATLAB. Suitable for students with little or no programming background

ECHS BC2590 MEASURING HISTORY. 4.00 points.

This course examines big themes in economic and social history—population history and human well-being, inequality and poverty, and gender differences. Using these themes, it adopts a hands-on data-driven approach to introduce tools and concepts of empirical reasoning. Datasets related to each theme create opportunities for learning by doing

Upper-Level Elective Courses

The following economics elective courses have as a minimum either ECON BC3033, ECON BC3035, or both as prerequisites.

ECON BC3010 American Wellbeing. 3 points.

Prerequisites: (ECON BC 2411 or STAT W1111 or PSYCH BC1101 or BUSI G6014 or STAT W1211 or SIEO W3600 or SIEO W4150) and (ECON BC1003 or ECON W1105) Students using this course for an economics major must have also previously completed either Intermediate Microeconomic Theory (ECON BC3035) or Intermediate Microeconomics (ECON UN3211). This course takes a novel approach to examining public policy concepts. The class mission is to construct a “U.S. Wellbeing Index,” a measure of people’s wellbeing in the United States. The process of constructing such an index and debating its shortcomings will provide students with a better understanding of the factors that should guide public policy decisions. Students successfully completing this course will: (1) develop skills for conducting and interpreting cost-benefit analyses, (2) search the web for relevant economic data and write efficient, well-documented code to download and format those data, (3) interpret time trends for data concerning the economy, human health, and environmental conditions, (4) develop an understanding of how various types of risks affect both individual and societal wellbeing, and (5) understand multiple perspectives in debates over the importance of equity considerations when considering the wellbeing of a society.

ECON BC3011 INEQUALITY AND POVERTY. 3.00 points.

Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor. Conceptualization and measurement of inequality and poverty, poverty traps and distributional dynamics, economics and politics of public policies, in both poor and rich countries

Fall 2023: ECON BC3011

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ECON 3011	001/00262	T Th 11:40am - 12:55pm LI104 Diana Center	Ashley Timmer	3.00	50/58

ECON BC3012 THE ECONOMICS OF EDUCATION. 3.00 points.

Prerequisites: ECON BC3035 and ECON BC2411 or permission of the instructor. Analyzes education policies and education markets from an economic perspective. Examines challenges that arise when researchers attempt to identify the causal effects of inputs. Other topics: (1) education as an investment, (2) public school finance, (3) teacher labor markets, (4) testing/accountability programs, (5) school choice programs, and (6) urban public school reforms

ECON BC3013 Economic History of the United States. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: ECON BC3035 or ECON BC3033, or permission of the instructor.

Economic transformation of the United States from a small, open agrarian society in the late colonial era to the leading industrial economy of the 20th century. Emphasis is given to the quantitative, institutional, and spatial dimensions of economic growth, and the relationship between the changing structures of the economy and state.

ECON BC3022 Economic History of Europe. 3 points.

Prerequisites: Econ BC3035 or Econ BC3033 (or their equivalents), or permission of the instructor.

An introduction to the transformative economic developments that began in Western Europe and spread globally. This course applies economic and empirical reasoning to analyze the industrial revolution, its underlying causes and consequences, from pre-modern times to the 20th-century emergence of a global economy.

ECON BC3024 MIGRATION # ECONOMIC CHANGE. 3.00 points.

Prerequisites: Econ BC3035 or Econ BC3033
Prerequisites: (Econ BC 3035) or (Econ BC 3033) This course examines a wide variety of topics about migration and its relationship to economic development, globalization, and social and economic mobility. At its core, this course reflects a key reality: that the movement of people—within regions, within countries, and across borders—is both the result of and impetus for economic change

ECON UN3025 FINANCIAL ECONOMICS. 3.00 points.

Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201
Prerequisites: ECON UN3211 and ECON UN3213 and STAT UN1201 Institutional nature and economic function of financial markets. Emphasis on both domestic and international markets (debt, stock, foreign exchange, eurobond, eurocurrency, futures, options, and others). Principles of security pricing and portfolio management; the Capital Asset Pricing Model and the Efficient Markets Hypothesis

ECON BC3026 Economics of the Public Sector. 3 points.

Prerequisites: (ECON BC3035 or ECON UN3211)

The purpose of the course is to think about public policy issues through an economic lens. We will explore the basic economic foundations of individual decision-making and discuss the ways in which economists hypothesize that individuals respond to the incentives embedded within public policies. We will pay particular attention to the nature and detail of existing public policies, and use economic analysis to predict how these policies might influence behavior. We will also explore some of the relevant empirical literature on a set of policy topics, to see how these predictions hold up.

ECON BC3031 Economics of Life. 3 points.

Prerequisites: ECON BC3035 ECON BC3018 Econometrics previously or concurrently taken is highly recommended.

This course covers an immense variety of topics in what might be called demographic economics. Included are dating and marriage, along with the economics of beauty; fertility and its avoidance; how people use their time, and what determines those uses, including some discussion of labor-force behavior; interactions among family members—bargaining in the household and with family members outside the household; divorce; the economics of addiction, to such agents as alcohol, other drugs, tobacco and even work; religion, including its effects on economic outcomes; and death, including how we die, how long we live, and the nature and determinants of bequests. The central unifying feature throughout the course is the concentration on the **economics** of these activities and outcomes—the roles of incentives and institutions in affecting them.

ECON BC3038 INTERNATIONAL MONEY # FINANCE. 3.00 points.

Prerequisites: ECON BC3033. Introduction to balance of payments and exchange rate theory; capital mobility and expectations; internal and external adjustment under fixed and flexible exchange rates; international financial markets; capital mobility and expectations; international policy coordination and optimum currency areas; history of the international monetary system

ECON BC3043 Monetary Theory # Policy. 3.00 points.

Prerequisites: ECON BC3033 and ECON BC3035

This course deals with topics in both monetary theory and monetary policy and is designed for students interested in monetary economics and/or those aiming at working in policy institutions such as central banks. Monetary economics examines the relationship between real economic variables at the aggregate level and nominal variables (such as the inflation rate, nominal interest rates, nominal exchange rates, and the supply of money). Therefore, monetary economics overlaps significantly with macroeconomics. However, students in this class learn the "Money View" framework as their analytical tool as it provides a more in-depth treatment of money and central banking than is customary in standard macroeconomics textbooks

Prerequisites: ECON UN3211 and ECON UN3213 and STAT Un1201
Prerequisites: ECON UN3211 and ECON UN3213 and STAT Un1201
This course takes New York as our laboratory. Economics is about individual choice subject to constraints and the ways that choices sum up to something often much more than the parts. The fundamental feature of any city is the combination of those forces that bring people together and those that push them apart. Thus both physical and social space will be central to our discussions. The underlying theoretical and empirical analysis will touch on spatial aspects of urban economics, regional, and even international economics. We will aim to see these features in New York City taken as a whole, as well as in specific neighborhoods of the city. We will match these theoretical and empirical analyses with readings that reflect close observation of specific subjects. The close observation is meant to inspire you to probe deeply into a topic in order that the tools and approaches of economics may illuminate these issues in a fresh way

ECON GU4301 ECONOMIC GROWTH # DEVELOPMNT I. 3.00 points.

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213. Economic development is a complex and multifaceted process. Once considered a goal in itself, more recently it has become to be viewed as the fundamental means to world poverty alleviation. Today, about half of the world population still lives on less than \$2 /day. Why? What does it mean to be poor? What are the forces that prevent so many people from enjoying a higher standard of living? The course opens on some fundamental macroeconomic models of economic growth and the recent debate on the geographical or institutional nature of the ultimate causes of growth or arrested development. Then we will move into the most recent microeconomic literature that sheds light on the lives of the poor and on the forces - in particular the market distortions and the market failures - that keep billions in poverty. Among others, we will discuss interesting topics like nutrition and health, the cultural origins of corruption, the effect of global warming, and the design of effective anti-poverty programs

ECON GU4750 GLOBALIZATION # ITS RISKS. 3.00 points.

Prerequisites: ECON UN3211 and ECON UN3213

Prerequisites: ECON UN3211 and ECON UN3213 The world is being transformed by dramatic increases in flows of people, goods and services across nations. Globalization has the potential for enormous gains but is also associated to serious risks. The gains are related to international commerce where the industrial countries dominate, while the risks involve the global environment, poverty and the satisfaction of basic needs that affect in great measure the developing nations. Both are linked to a historical division of the world into the North and the South-the industrial and the developing nations. Key to future evolution are (1) the creation of new markets that trade privately produced public goods, such as knowledge and greenhouse gas emissions, as in the Kyoto Protocol; (2) the updating of the Breton Woods Institutions, including the creation of a Knowledge Bank and an International Bank for Environmental Settlements

Economics & Mathematics

1019 Milstein Learning Center

212-854-3454

Department Administrator: Robert O'Connor

Mission

The Economics and Mathematics major provides the student with a grounding in economic theory comparable to that provided by the general economics major and exposes the student to rigorous and extensive training in mathematics. The program will be particularly useful for students planning to do graduate work in economics, which frequently demands greater mathematical training than that acquired through the minimum requirements of the basic economics degree.

Economics Department Representative: Sharon Harrison**Mathematics Department Representative:** David Bayer**Requirements for the Major**

The Economics & Mathematics track requires a minimum of 15 courses (48 minimum credits).

Education

Please note that the Education Studies major is currently being offered to Barnard College students only.

701 Milstein Center
212-854-7072
education@barnard.edu

Program Director/Chair: Professor Maria River Maulucci
Department Administrator: Amy Shire (ashire@barnard.edu)

The Barnard Education Program is committed to strengthening public education and addressing issues of equity and social justice, particularly in urban schools. We offer two tracks in Education: Education Studies (Major and Minor/Special Concentration), and Urban-Teaching Minors/Special Concentration (that leads to teacher certification in Elementary/Childhood Education or Secondary-Adolescent Education). In all tracks, students develop critical lenses to understand education as a fundamental human activity that occurs across many settings; to analyze the issues facing public schools; and to consider ways to promote fair and inclusive policies and practices for children and youth. The classes are open to all undergraduates at Columbia (BC, SEAS, GS, CC). The two tracks we offer are:

Education Studies

Education Studies is an interdisciplinary program for students who wish to understand, critically analyze, and conduct research on the role of education in society. Our students draw on a wide range of theoretical and empirical scholarship to study education as a social, cultural, and historical process. We understand education as much more than schooling, even as schooling is central to many of our concerns. Students who pursue the major or the minor/special concentration in Education Studies learn to evaluate educational policy, practice, and research through a critical, equity-oriented lens. Our graduates will be prepared to act creatively for peace, justice, and sustainability in local and global educational contexts. Education Studies prepares students to pursue graduate studies or positions in public policy, sociology, history, youth studies, philosophy, psychology, and other areas where K-12 education is frequently a

focus of coursework and scholarship, as well as to pursue teacher certification through a graduate program. Education Studies does not lead to teacher certification.

Education Studies Major: The Education Studies major is designed for students whose primary interest is in pursuing Education as their major course of study. Education Studies majors concentrate in one of three areas: Education, Culture, and Society; Educational Policy; or Comparative and International Education. In their senior year, they conduct an original inquiry project. Currently, the major in Education Studies is open to Barnard College students only.

Education Studies Minor/Special Concentration: Education Studies minors (BC) or special concentrations (CC, GS) pursue similar coursework to that undertaken by the majors. This course of study is intended to complement a major's disciplinary specialization and methodological training. In addition to the requirements of the minor/special concentration, students must complete a major. The special concentration minors are open to all students at Barnard College, Columbia College, and College of General Studies.

For further information, and to apply to the major or minor tracks, please visit our [website](#)

Urban Teaching Minors/Special Concentrations

This track is for students who want to graduate from college with teacher certification. Our goal is to prepare students to become skilled and reflective teachers who can effectively respond to the learning needs of diverse learners, and create supportive and intellectually stimulating classroom communities. Students learn to create innovative curriculum; gain experience observing, tutoring, and teaching a diverse range of children and young people; develop confidence in their role as teachers who can promote fair and inclusive school practices; and graduate with certification to teach in New York.

This program is registered by the New York State Department of Education and accredited by the Association for Advancing Quality in Educator Preparation (AAQEP). Students who complete the program will be recommended for Initial Certification in either Childhood Education (Grades 1-6) or Adolescent Education (Grades 7-12). We provide ongoing support to program completers through our Barnard Teacher Network.

To apply to the Urban Teaching tracks, please visit our [website](#). Students are encouraged to apply for admission by March of the sophomore year but no later than April 30th of their sophomore year. Those who plan to study abroad during junior year should apply by the spring of the freshman year, but no later than the first Tuesday in September of the sophomore year. Admission criteria include good academic standing; evidence of commitment to the field of education; interest in issues of social justice issues as they affect education, particularly in urban schools; and capacity for growth as an intellectually resourceful and reflective teacher. Enrollment is limited.

** Please note that some applied science courses will not be accepted.

Certification Requirements

The Urban Teaching program is accredited by AAQEP and approved by the New York State Education Department to recommend students who complete the program for Initial Certification in either Childhood Education (grades 1-6) or Adolescent Education (grades 7-12). New York State has reciprocity with most other states, allowing graduates of the program the ability to apply for certification in another state through our membership in the Interstate Certification Agreement.

Certification is based on demonstrated competency in both academic and field settings. Students are required to complete a minimum of 360 hours of educational based clinical experiences. 260+ hours must be supervised field based experiences. Students must pass the New York State Teacher Certification Examinations and the edTPA performance assessment. Also required are workshops in Child Abuse Identification; School Violence Intervention and Prevention; and the Dignity for All Students Act (DASA), offered at Teachers College.

Requirements for the Education Studies Minor/Special Concentration

To complete the Minor (BC) or Special Concentration (CC/GS) in Education Studies, students must complete 21-24 points of course work, listed below.

The Education Studies track requires a minimum of six courses:

Prerequisites: The instructor's permission.

Prerequisites: the instructors permission. Course enrollment will be determined after the first class meeting. Open to all students; preference given to Urban Teaching, Education Studies, and Urban Studies students. This course explores a broad continuum of educational policies, with a critical eye toward the impact these policies have on promoting equity and justice. Because no one course can do everything, our focus will be on educational policy in the United States. However, a major research assignment will be for you to do a critical analysis of one of these policies in the context of another country

Prerequisites: the instructors permission. In partnership with the American Museum of Natural History students investigate science, science pedagogical methods, and ways to use New York City as a resource for science teaching and learning. Sessions will be held at Barnard and the museum. Field trips and fieldwork required. Non-science majors pre-service elementary students and first year students, welcome. Note: Students in the Childhood Urban Teaching Program may use this course as a pedagogical elective

EDUC BC3051 SEMINAR URBAN EDUCATION. 4.00 points.

This seminar serves as the capstone course for students pursuing the Education Studies minor/special concentration or the Urban Studies major/concentration with an Urban Education Specialization. The Seminar in Urban Education explores the historical, political and socio-cultural dynamics of urban education in the U.S. context. Over time, a range of social actors have intervened in the "problem" of urban education, attempting to reshape and reform urban schools. Others have disputed this "problem" focused approach, arguing that policy makers, teachers, and researchers should start from the strengths and capacities located in urban communities. Despite decades of wide ranging reform efforts, however, many urban schools still fail to provide their students with an adequate, equitable education. Seminar in Urban Education investigates this paradox by pursuing three central course questions: 1) How have various social actors tried to achieve equity in urban schools over time? 2) What are the range and variation of assets and challenges found in urban schools? and 3) Considering this history and context, what would effective reform in a global city like NYC look like? Students will engage these questions not only through course readings and seminar discussions, but through a 40-hour field placement in a New York City public school classroom, extra-curricular program, or other education based site

EDUC BC3053 MULTICULTURAL ELEMENTARY PEDA. 4.00 points.

This seminar will engage prospective teachers in developing effective strategies for teaching at the elementary school level in ways that draw upon five specific domains of knowledge: knowledge of self, content, pedagogy, context and students. Students will be introduced to a variety of teaching approaches and develop ways to adapt them to teach various subjects to students in urban public school settings, understanding the intellectual, social and emotional needs of elementary school students. Students will learn to write lesson plans, develop assessments and practice teaching in "microteaching" sessions taught to peers. We will explore state standards, approaches to classroom management, and Universal Design for Learning as we develop approaches to create caring, democratic learning communities

EDUC BC3054 MULTICULTURAL SECONDARY PEDAG. 4.00 points.

What does it mean to be an excellent teacher? The Seminar in Secondary Multicultural Pedagogy will engage this question as you work to develop methods for teaching your subject(s) in ways that draw upon five specific domains of knowledge: knowledge of self, content, pedagogical methods, context, and students. You will be introduced to a variety of multicultural teaching approaches and develop ways to adapt them to your particular subject area and to the intellectual, social, and emotional needs of adolescent learners. Throughout the course, we will consider how to effectively differentiate instruction for and support ELL students and students with special needs. Seminar sessions will include discussions, presentations of lessons, group activities, and problem-solving issues teachers encounter in the classroom. We will explore culturally responsive approaches to: learning; learning standards; instruction and assessment; creating caring, democratic learning communities; selecting curriculum content, and engaging all students in learning. Assignments will ask you to reflect on the teaching/learning process in general, and on the particulars of teaching your academic discipline. We will accomplish this through lesson planning, practice teaching two mini-lessons, observing your peers teaching and offering feedback, and exploring stances and strategies for multicultural pedagogy in your content area

Using the theme of "Arts and Humanities in the City", this seminar will build participants' knowledge of critical literacy, digital storytelling methods, and ways to use New York City as a resource for teaching the Arts (Dance, Theatre, Music, and Visual Arts), Social Studies, and English Language Arts in grades K-12. Critical literacy is an approach to teaching and learning that focuses on developing students' abilities to read, analyze, understand, question, and critique hidden perspectives and socially-constructed power relations embedded in what it means to be literate in a content area

EDUC BC3025 INCLUSIVE APPROACHES TO TEACHING LITERACY: THEORY AND PRACTICE. 4.00 points.

This seminar engages students in an exploration of how schools prepare students to be literate across multiple subject areas. Engaging students with theory and practice, we will look at how students learn to read and write, considering approaches for literacy instruction from early childhood through adolescence. Understanding that schools are required to meet the needs of diverse learners, we will explore literacy instruction for K-12 students with special needs, multilingual learners, and students from diverse cultural backgrounds

EDUC BC3030 Critical Pedagogies. 4.00 points.

This course explores education as a process through which critical consciousness and epistemic justice combat oppression in communities. Students will connect seminal work by critical pedagogues, such as Paulo Freire and bell hooks, to systemic educational challenges and lived experience. As a class, we will investigate power dynamics and structural inequalities at the systemic, institutional, interpersonal and individual levels. Students will problem-pose, dialogue and create pedagogical tools through praxis, by integrating the theory learned in the class to educational practice

EDUC BC3040 MIGRATION, GLOBALIZATION, AND EDUCATION. 4.00 points.

Globalization and mass migration are reconfiguring the modern world and reshaping the contours of nation-states. New technologies that facilitate the movement of information, goods and people across borders have made it easier for people to remain culturally, politically, economically and socially connected to the places from which they migrated. This seminar focuses on the experiences of the youngest members of these global migration patterns—children and youth—and asks: What do these global flows mean for educating young people to be members of the multiple communities to which they belong? This seminar will explore the following questions: What is globalization and why is it leading to new patterns of migration? How do children and youth experience ruptures and continuities across contexts of migration? How do language policies affect young people's capacity to be educated in a new land? What does it mean to forge a sense of belonging and citizenship in a "globalized" world, and how does this challenge our models of national citizenship? How are the processes by which young people are incorporated into their new country entwined with structures of race, class, and gender? Drawing on fiction, autobiography, and anthropological and sociological research this class will explore these questions from a variety of disciplinary perspectives

EDUC BC3042 GENDER, SEXUALITY, AND SCHOOL. 4.00 points.

Broadly, this course explores the relationship between gender, sexuality, and schooling across national contexts. We begin by considering theoretical perspectives, exploring the ways in which gender and sexuality have been studied and understood in the interdisciplinary field of education. Next, we consider the ways in which the subjective experience of gender and sexuality in schools is often overlooked or inadequately theorized. Exploring the ways that race, class, citizenship, religion and other categories of identity intersect with gender and sexuality, we give primacy to the contention that subjectivity is historically complex, and does not adhere to the analytically distinct identity categories we might try to impose on it

URBS UN3310 RACE. SPACE, URB SCHOOLS. 3.00 points.

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory

EDUC BC3250 EDUCATION IN A POLARIZED AND UNEQUAL SOCIETY. 4.00 points.

The rise in political polarization and social inequality over the past few decades has challenged the ideals that public schools were founded on nearly two centuries ago. In the past few years, we have witnessed a surge in homophobic, racist, misogynist, and xenophobic rhetoric in our society and our schools. At the same time, teachers in classrooms across this country have been engaged in the difficult work of challenging oppression and injustice in their schools, communities, and nation. These teachers know that the future of our democracy is at stake. Using a historical and sociological framework, this course examines the past and present conditions that have led to political polarization, escalating inequality, and persistent injustice. It seeks to examine the lineage of racism, sexism, nativism, and imperialism on our nation and its schools and to consider the extent to which these challenges are uniquely American or part of a more global phenomenon. It offers an introduction to the deep current of American social, political, and economic culture that many argue has produced the challenges that our nation faces today: personal and political gain marred by intolerance, derived from wealth, and rooted in the history of segregation, sexism, and exploitation. Instead of seeing these challenges as separate entities, the course acknowledges the intersectional nature of power and politics. Students will consider how these conditions affect their roles as educators and the lives of the youth and families in their schools and communities. They will leave the course with a deeper appreciation and understanding of the historical and sociological antecedents that have contributed to polarization, inequity, and injustice around the globe

Mission

The offering in English is designed to foster good writing, effective speaking, and heightened understanding of culturally significant texts. We encourage students majoring in English to develop their responsiveness to the literary imagination and their sensitivity to literary form through disciplined attention to language, historical contexts, and critical and scholarly methods.

For all students, including transfers, a minimum of six semester courses must be completed while the student is in residence at Barnard.

Student Learning Objectives for the English Major and the American Literature, Film, Theatre, and Creative Writing Concentrations

Our objectives represent the teaching aims of the English Department. All instructors are free to decide which of these objectives are consistent with their particular courses and teaching methods.

Students who graduate with a major in English should be able to obtain the following objectives:

- demonstrate critical and analytical reading skills.
- demonstrate critical and analytical writing skills.
- display an understanding of literary genre, form, and language.
- show a familiarity with the issues of literary criticism and theory.
- show an awareness of literary history.
- engage deeply with at least one major author.
- incorporate secondary sources, with proper citations, in a larger essay.
- understand texts in their cultural contexts.

Specific to the America Literature Concentration:

- demonstrate familiarity with American authors and texts across the span of American literary history.
- analyze American texts of various genres including poetry, fiction, drama, autobiography, and political documents.
- write a substantial research project on American texts. This project should integrate primary and secondary materials, demonstrating the student's ability to analyze texts and her familiarity with the critical landscape.

Specific to the Creative Writing Concentration:

- develop a mastery of the linguistic demands of a variety of literary forms.
- demonstrate a critically sound grasp of structure in prose and poetry.
- explore the formal possibilities of the genres in which they are working.
- develop critical sophistication in reading and speaking about others' work.
- grasp the importance of thoroughly revising their own work.
- detect concrete and figurative language in others' work.
- achieve precision in their own use of concrete and figurative language.
- produce an original piece of fiction, a set of poems, a play, or a work of creative non-fiction.

Specific to the Film Studies Concentration:

- explain the major concepts or ideas of film theory.
- write a basic/elementary screenplay.

- demonstrate an understanding of film's relationship to a range of other disciplines across the humanities and social sciences.

Specific to the Theatre Concentration:

- analyze dramatic literature in the context of theatre history, theory, criticism, and performance.
- develop skills in critical reading and writing, textual analysis, independent research, and oral presentation.

Requirements for the Major

A major program consists of at least ten courses that are a minimum of 35 credits in total. Six of the ten must be taken at Barnard or Columbia.

ENGL BC3193	CRITICAL WRITING (Best taken in the sophomore year.)	4
ENGL BC3159 and ENGL BC3160	The English Colloquium. ¹	8
Two courses in literature	written before 1900. ²	6-8
Three electives chosen from the entire English Department offering, excluding The English Conference. One of these courses must be a literature class. ³		9-12
Two senior seminars given by the Barnard English Department. ⁴		8
A course in American literature. It can simultaneously fulfill other requirements (elective, before 1900, etc.) where appropriate.		3-4

- ¹ Taken in the junior year. All sections of BC3159 (fall semester) are on the Renaissance; all sections of BC3160 (spring semester) are on the Enlightenment. Students may substitute three courses for the two semesters of Colloquium. At least one of these three must cover literature before 1660 (i.e., Medieval or Renaissance); one other must cover literature of the 17th or 18th century (i.e., The Age of Enlightenment); the last can cover either literature before 1660 or literature of the 17th or 18th century. Students may also take one Colloquium and two substitutions, as long as one of the substitutions covers literature of the same period as the Colloquium it replaces. The other substitution may cover either literature of that same time period or literature of the time period of the other Colloquium. In either case, one of the courses used as a substitution for either Colloquium will also count towards satisfying the "before 1900" requirement. Please note that only one Colloquium substitution may be a Shakespeare course. For further details, refer to the Substitutions tab above.
- ² If you have substituted courses for the Colloquium requirement, one of the substitutions will count towards fulfillment of this requirement. For details, refer to the Substitutions tab above.
- ³ With the approval of the Chair of the Barnard Department of English, one course based in the literature of a foreign language (in English translation or in the original language) can count as an elective.
- ⁴ Seniors who wish to substitute an independent study for a senior seminar should consult the Chair of the English Department. Permission is given rarely and only to proposals meeting the criteria specified under the guidelines for ENGL BC3999 INDEPENDENT STUDY.

Concentrations in the Major

American Literature

An English major with a concentration in American literature consists of 10 courses that are a minimum of 35 credits in total. Six of the 10 must be taken at Barnard or Columbia. Students interested in an American literature concentration should consult with [Prof. Jennie Kassanoff](#).

ENGL BC3193	CRITICAL WRITING (Best taken in the sophomore year.)	4
ENGL BC3159 and ENGL BC3160	The English Colloquium. ¹	8

Two courses in literature written before 1900. One of these courses must be either ²	6-7
ENGL BC3179 AMERICAN LITERATURE TO 1800 or ENGL BC3180 AMERICAN LITERATURE 1800-1870	
One survey course on American literature between 1871 and the present, either	3
ENGL BC3181 AMERICAN LITERATURE 1871-1945 or ENGL BC3183 AMERICAN LITERATURE SINCE 1945	
An additional American literature course.	3-4
An elective chosen from the entire English Department offering, excluding The English Conference. ³	3-4
Two senior seminars, one of which must focus on American literature.	8

¹ Taken in the junior year. All sections of BC3159 (fall semester) are on the Renaissance; all sections of BC3160 (spring semester) are on the Enlightenment. Students may substitute three courses for the two semesters of Colloquium. ³ With the approval of the Chair of the Barnard Department of English, one course based in the literature of a foreign language (in English translation or in the original language) can count as an elective.

Creative Writing

An English major with a concentration in creative writing consists of 11 courses that are a minimum of 38 credits in total. Six of the 11 must be taken at Barnard or Columbia. The creative writing concentration differs from the others in that students must submit an application to be considered for it.

Interested majors must be either in the second semester of their sophomore year or a junior to apply. Applications are due by the last day of the advanced registration period in that semester (occurring in mid-April for the spring semester or in mid-November for the fall semester). **The application deadline for English majors who are second semester sophomores or juniors in fall 2023 will be 11:59 pm ET on a Friday November, 19, 2023. The application deadline for English majors who are second semester sophomores or juniors in spring 2024 will be 11:59 pm ET on a Friday April, 19, 2024.**

Applications must consist of 15-20 pages of prose (including fiction, personal narrative, creative non-fiction or playwriting) and/or poetry writing, and must be submitted online via the [Barnard Creative Writing Concentration Application Form](#).

Students interested in a creative writing concentration should consult with [Prof. Ken Chen](#) or [Sarah Hilligoss](#) (shilligo@barnard.edu).

ENGL BC3193	CRITICAL WRITING (Best taken in the sophomore year.)	4
ENGL BC3159 and ENGL BC3160	The English Colloquium. ¹	8

Colloquia Substitutions

ENGL BC3159 and ENGL BC3160 are required of English majors in the junior year. All sections of BC3159 (fall semester) are on the literature of the Renaissance; all sections of BC3160 (spring semester) are on the literature of the Enlightenment.

Students may substitute three courses for the two semesters of Colloquium. At least one of these three must cover literature before 1660 (i.e., Medieval or Renaissance); one other must cover literature of the 17th or 18th century (i.e., The Age of Enlightenment); the last can cover either literature before 1660 or literature of the 17th or 18th century.

Students may also take one Colloquium and two substitutions, as long as one of the substitutions covers literature of the same period as the Colloquium it replaces. The other substitution may cover either literature of that same time period or literature of the time period of the other Colloquium.

In either case, one of the courses used as a substitute for either the fall or spring Colloquium will also count towards satisfying the "before 1900" requirement.

Please note that only one Colloquium substitution in total may be a Shakespeare course.

To see if other courses may qualify, consult with your major adviser.

Courses which can serve as a Medieval/Renaissance substitution include

ENGL BC3154	Chaucer Before Canterbury
ENGL BC3155	Canterbury Tales

ENGL BC3162	DONNE, THE METAPHYSICALS, AND HIS LEGACY ¹
ENGL BC3165	The Elizabethan Renaissance: The Complete Nondramatic Poetry of Marlowe and Shakespeare
ENGL BC3166	17TH-CENTURY PROSE # POETRY ¹
ENGL BC3167	MILTON ¹
ENGL BC3169	Renaissance Drama
ENGL BC3170	LITERATURE AND SCIENCE 1600-1800 ¹
ENTH BC3190	Diabolical Drama of the Middle Ages
ENGL BC3246	WRITING THE MEDIEVAL SELF
ENGL BC3288	ROMANCE
ENGL BC3297	UNSILENT VOICES: THE MEDIEVAL LYRIC IN EUROPE
ENGL BC3309	RENAISSANCE DRAMA
ENGL GU4010	THE CANTERBURY TALES

Only one substitution may be a Shakespeare course

ENTH BC3136	SHAKESPEARE IN PERFORMANCE
or ENGL BC3163	SHAKESPEARE I
or ENGL BC3164	SHAKESPEARE II
or AFEN BC3817	Black Shakespeare

Courses which can serve as an Age of Enlightenment substitution include

ENGL BC3162	DONNE, THE METAPHYSICALS, AND HIS LEGACY ¹
ENGL BC3166	17TH-CENTURY PROSE # POETRY ¹
ENGL BC3167	MILTON ¹
ENGL BC3170	LITERATURE AND SCIENCE 1600-1800 ¹
ENGL BC3173	THE EIGHTEENTH-CENTURY NOVEL
ENGL BC3174	The Age of Johnson
ENGL BC3179	AMERICAN LITERATURE TO 1800

¹ This course may count as *either* a Renaissance/Medieval substitution *or* an Age of Enlightenment substitution. Please note that it cannot simultaneously count for both substitutions.

Courses in Literature Written before 1900

If you have substituted two or three courses for the Colloquium requirement, *one* of the substitutions will count towards fulfillment of this requirement. To see if a course not listed here may qualify for this requirement, consult your major adviser.

¹ Please note that as ENGL BC3223 NEW YORK IN TEN OBJECTS and ENGL BC3229 AMERICAN LIVES, AMERICAN STORIES are creative writing courses and not literature courses, they *cannot* count toward the American literature requirement.

Substituting with Courses from Other Departments

ENGL BC3193 CRITICAL WRITING *must* be taken in the Barnard English Department.

To Qualify as a Substitution

For a literary period requirement, the substituting course must cover material from the same literary period covered by the course it is replacing, not just include some of that period's material in a larger range of literature. With the approval of the Chair of the Barnard English Department, one literature course taken outside the department in English translation or in another language can count as an elective. If your adviser or the Chair is not familiar with the course (even if given at Columbia), you must provide the syllabus.

Please note that the English Department requires that six of the 10 courses required for graduation as an English major be taken at Barnard or Columbia.

Writing

ENGL BC3101 THE WRITER'S PROCESS. 4.00 points.

Prerequisites: Application process and permission of instructor. Enrollment limited to Barnard students. Application process and permission of instructor required: <https://writing.barnard.edu/become-writing-fellow>. Exploration of theory and practice in the teaching of writing, designed for students who plan to become Writing Fellows at Barnard. Students will read current theory and consider current research in the writing process and engage in practical applications in the classroom or in tutoring. The Writer's Process is only open to those who applied to and were accepted into the Writing Fellows Program.

Note: This course now counts as an elective for the English major

ENGL BC3102 ACADEMIC WRITING INTENSIVE. 4.00 points.

Academic Writing Intensive is a small, intensive writing course for Barnard students in their second or third year who would benefit from extra writing support. Students attend a weekly seminar, work closely with the instructor on each writing assignment, and meet with an attached Writing Fellow every other week. Readings and assignments focus on transferable writing, revision, and critical thinking skills students can apply to any discipline. Students from across the disciplines are welcome. This course is only offered P/D/F. To be considered for the course, please send a recent writing sample to wschorha@barnard.edu, ideally from your First-Year Writing or First-Year Seminar course, or any other writing-intensive humanities or social sciences course at Barnard (no lab reports please)

ENGL BC3103 THE ART OF THE ESSAY. 3.00 points.

Prerequisites: Students who are on the electronic waiting list or who are interested in the class but are not yet registered MUST attend the first day of class.

NOTE: Students who are on the electronic waiting list or who are interested in the class but are not yet registered MUST attend the first day of class. Fall 2022 course description: Essay writing above the first-year level. Reading and writing various types of essays to develop one's natural writing voice and craft thoughtful, sophisticated and personal essays. Summer 2022 course description: The Art of the Essay is a writing workshop designed to help you contribute meaningfully in public discourse about the issues that matter most to you. You will write three types of essays in this class, all of which will center personal experience as valuable evidence of larger phenomena or patterns. Your essays will build in complexity, as you introduce more types of sources into conversation about your topics as the semester goes on. You will hone your skills of observing, describing, questioning, analyzing, and persuading. You will be challenged to confront complications and to craft nuanced explorations of your topics. We will also regularly read and discuss the work of contemporary published essayists, identifying key writerly moves that you may adapt as you attempt your own essays. You will have many opportunities throughout the semester to brainstorm ideas, receive feedback from me and your peers, and develop and revise your drafts. At the end of the semester, you will choose a publication to which to submit or pitch one or more of your essays

Creative Writing

A writing sample is required to apply to all Barnard creative writing courses. As space is limited in creative writing courses, not all students who apply are guaranteed admittance.

Students are unable to self-register for Barnard creative writing courses. Interested students who have submitted writing samples may put the course on their online schedule, which will automatically place them on the wait list. If they are accepted, the instructor will take them

off the wait list, but until that time no one is officially registered for the class.

The spring 2024 submission deadline for all creative writing courses is 11:59 pm ET on Wednesday, December 29, 2023. Please see the [Applying to Creative Writing Courses](#) page of the English Department website for directions.

Please note: if you are accepted into a creative writing course, attendance at the first meeting of the course is mandatory. If you do not show up for the first class, your spot may be given to someone else.

ENGL BC3150 INVENTION, REVISION, AND IMAGINATION. 3.00 points.

Writing sample required to apply. Instructions and the application form can be found here: <https://english.barnard.edu/english/creative-writing-courses>. A creative writing workshop in fiction, devoted to the imaginative process, and most specifically, to the arts of invention and revision. In addition to considering the wellspring of creative ideas themselves, students will write stories in a variety of lengths— moderate, long, and as short-shorts. Through this process, apprentice writers will become intimate with the most essential aspect of creating imaginative work: the dedication to seeing one's ideas morph and grow over time

ENGL BC3208 WHAT'S YOUR STORY ANYWAY? - TRAUMA RESISTANCE THROUGH CREATIVE WRITING. 3.00 points.

Writing sample required to apply. Instructions and the application form can be found here: <https://english.barnard.edu/english/creative-writing-courses>. In this class we will explore the process of healing from trauma through the art of storytelling. We will ground ourselves in the writing of Latina authors whose work demonstrates the resistance from erasure in the United States. The goal of the class is to understand the connection between trauma and healing, through storytelling and creative writing. Moreover, we will develop three pieces of creative non-fiction that will encompass this relationship over the three different lenses of place, person and personal experience

ENGL BC3223 NEW YORK IN TEN OBJECTS. 4.00 points.

"New York in Ten Objects" introduces students to the creative possibilities of the podcast. Drawing on the possibilities of interdisciplinary analysis and creative non-fiction, this course aims to use quotidian objects to critically engage with the city, re-rendering those objects extraordinary and telling untold stories. The starting points for our investigation are ten concrete objects – some iconic, some ironic, but all characteristic of New York City. Beginning with these objects, students will develop projects, in small groups and individually, that connect these objects with a broader societal movement, cultural idea, political cause, or scientific development significant to past or present New York City life. To prepare students to develop their projects in an audio medium, we will first become familiar with a range of current podcasts, and will begin to break down the elements of podcast-storytelling as practiced today. Through workshops with IMATS in a weekly lab session and hands-on experience, students will learn how to collect audio interviews, ambient sound, and to record voice-over narration. Every student will outline their ideas, develop scripts, and produce a podcast by layering and editing their audio files. In the end, this course will investigate how the popular medium of the podcast can serve as a locus of local conversation and public intellectual activity. Students will learn how ordinary objects can breathe life into a story and how audio stories can advance critical analysis. Applications are due by 1 August: <https://forms.gle/Gtb5YWgeq59Mnfhy5>. Please note that this seminar is limited to 14 students. You will be notified of your acceptance or non-acceptance to the course before the first day of classes. After receiving admittance into the course, you MUST come to the first class to secure your seat

ENGL BC3229 AMERICAN LIVES, AMERICAN STORIES. 3.00 points.

Writing sample required to apply: <https://english.barnard.edu/english/creative-writing-courses> In this class we will discuss the narrative of the "American" story, and how stories of immigrants and minority identities redefine and complicate it. The goal of the class is to investigate how writers frame a sense of identity in relation to the "American ideal". We will explore this theme through three creative non-fiction pieces each focusing on a different perspective of place, person, and personal experience. What are your stories, and what makes them "American"?

Film Studies

ENFL BC3001 BLACK SPECULATIVE FICTION. 3.00 points.

Black Speculative Fiction encompasses a whole range of Black subgenres from Science Fiction and Fantasy to Horror and Afrofuturism. For the duration of this course, we will attempt to begin the work of extrapolating the function of Blackness within these various genres—interrogating which syntactical elements are required to label a piece of fiction “Black” and how Blackness informs genre. Through formal analysis of texts and the application of various theories presented in class, we’ll begin to understand how Blackness moves through genre to understand its relationship to the world and in some cases, to the artform itself. We will look at various texts: Film, Television, Prose, and Music. By looking across genres, we will be able to honor the inherent intertextuality of Black work and the constant inter-discursive work done across genre, text, and time. Whether a critique of structural anti-Blackness writ large, an expression of the complexity of the positionality of Black persons, or a statement of the function of Blackness, these texts make a case for the theoretical rigor and provocative discourses that lies at the heart of Black Speculative Fiction

Speech

Registration in these courses is limited.

ENGL BC3121 PUBLIC SPEAKING. 3.00 points.

Open only to undergraduates. This course will introduce you to principles of effective public speaking and debate, and provide practical opportunities to use these principles in structured speaking situations. You will craft and deliver speeches, engage in debates and panel discussions, analyze historical and contemporary speakers, and reflect on your own speeches and those of your classmates. You will explore and practice different rhetorical strategies with an emphasis on information, persuasion and argumentation. For each speaking assignment, you will go through the speech-making process, from audience analysis, purpose and organization, to considerations of style and delivery. The key criteria in this course are content, organization, and adaptation to the audience and purpose. While this is primarily a performance course, you will be expected to participate extensively as a listener and critic, as well as a speaker

ENTH BC3136 SHAKESPEARE IN PERFORMANCE. 4.00 points.

Shakespeare's plays as theatrical events. Differing performance spaces, acting traditions, directorial frames, theatre practices, performance theories, critical studies, cultural codes, and historical conventions promote differing modes of engagement with drama in performance. We will explore Shakespeare's plays in the context of actual and possible performance from the Renaissance to the twenty-first century

ENTH BC3139 MODERN AMERICAN DRAMA # PERFORMANCE. 4.00 points.

Modern American Drama and Performance in an era of cultural contestation. What is united about the United States? How are the important claims of cultural difference related to the intercultural claims of shared community? Is there a place for historical continuity in the modernist pursuit of change? How have these issues been addressed in the emergence and development of modern drama and performance in America? Questions such as these will be addressed in the context of theatrical exploration, performance history, and social change. Canonical and experimental playwrights include Rachel Crothers, Susan Glaspell, Georgia Douglas Johnson, Eugene O'Neill, Clifford Odets, Thornton Wilder, Tennessee Williams, Arthur Miller, Lorraine Hansberry, Edward Albee, Suzan-Lori Parks, Sarah Ruhl, and Dominique Morisseau

ENTH BC3141 EARLY 20TH-CENTURY UNITED STATES DRAMA AND PERFORMANCE. 4.00 points.

The beginning of the 20th century in the United States was a time of turbulence: the excitement of a new century mixed with the flurry of voices trying to define "What makes an American, American." Theatre reflected and inflected discussions, arguments, debates and celebrations of identity and belonging. And, everything was up for debate: morals, religion, sexuality, gender roles, race—all factions clawing towards ideals of citizenship. In this seminar, we will explore early 20th-century American theater as a forum for these debates—plays and performances of all types assert visibility of both issues and bodies, politicizing both in the process. We will begin by looking at the end of the 19th century as the nation engaged with the end of legally enslaving African Americans, the Women's Suffrage movement gearing up, and the national debates on immigration, morality and religion—and all made their way to the stages of theater and Performance in the United States. Topics in this seminar will include The Harlem Renaissance, The Little Theatre Movement, Comstock/Censorship Laws, Broadway Fare, Popular Entertainment, Female Playwrights, Queer Theatre, Popular Music (to name a few more than "a few")

ENTH BC3144 Black Theatre. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 16 students.
 Exploration of Black Theater, specifically African-American performance traditions, as an intervening agent in racial, cultural, and national identity. African-American theatre artists to be examined include Amiri Baraka, Kia Corthron, W.E.B. Du Bois, Angelina Grimke, Langston Hughes, Georgia Douglas Johnson, Adrienne Kennedy, Suzan-Lori Parks, Adrian Piper, and August Wilson. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

ENTH BC3145 EARLY AMERICAN DRAMA # PERFRMNC. 4.00 points.
Not offered during 2023-2024 academic year.

Competing constructions of American identity in the United States date back to the early republic when a newly emerging nation struggled with the questions: What makes an American American? What makes America America? From colonial times forward, the stage has served as a forum to air differing beliefs as well as medium to construct new beliefs about Nation, self and other. The texts we will read, from colonial times through WWI, explore diverse topics such as politics, Native American rights, slavery, labor unrest, gender roles, and a growing immigrant population

ENTH BC3190 Diabolical Drama of the Middle Ages. 3 points.
Not offered during 2023-2024 academic year.

Hell bursts onto the European stage at the end of the Middle Ages. Satan and his attendant devils, although present in earlier forms of Christian drama, become a defining feature of the dramatizations of Christian history and morality in Late Medieval England. The devils of these plays are disruptive, anarchic, seductive and repulsive. They are rhetorically bewitching and morally dangerous. This course will pay close attention to these devils and their devilry. What do they do? How do they speak? What do they know and what choice do they have in being so diabolical? Rather than viewing devils simply as spiritual antagonists, instead we will investigate them as complex creatures doing serious theological work in the difficult and spiritually tumultuous towns of late medieval England. Through close critical inquiry, contextual reading and some of our own imaginative stagings, we will explore the central role of the "diabolic" in late medieval drama and its sometimes troubling vision of Christian life.

ENGL BC1901 INTRODUCTION TO COMICS # GRAPHIC NOVELS. 3.00 points.

This course provides students with an introduction to the scholarly study of comics and graphic novels. It is designed to teach students how to analyze these texts by paying special attention to narrative forms and page design. As part of this focus, attention will be given to the way that comics and graphic novels are created and the importance of publication format. In addition to studying comics and graphic novels themselves, we will look at the way that scholars have approached this emergent field of academic interest

AFEN BC3009 TONI MORRISON: AN ETHICAL POETICS. 4.00 points.
Not offered during 2023-2024 academic year.

Toni Morrison set herself a challenge: to engage language in complex literary ways in order to reveal the 'fact' of race in the lived experiences of Americans—those made to bear the burden of being 'raced,' those exercising the prerogative of 'racing,' and those who imagine that none of this applies to them. We travel with her artistic path from *The Bluest Eye* to her later novels to learn how her choice to create figurative, logical narratives seek their own understanding of the ethics of what she called the "manageable, doable, modern human activity" of living in 'the house of race.'

ENGL BC3098 THE ENGLISH CONFERENCE. 1.00 point.

The English Conference: The Lucyle Hook Guest Lectureship is a two to four-week course each semester on a special topic presented by a visiting scholar. The series was endowed by a gift from Professor Emerita of English Lucyle Hook to bring our students and faculty the perspective of scholars of literature in English working outside the College community. It can only be taken for pass/fail for 1 point. Students must attend all four class sessions and write a final paper in order to receive credit for this course. To see the dates/times that The English Conference will meet this semester, the current course description, and the biography of the visiting scholar, please visit the English Department website: <https://english.barnard.edu/english/english-conference>

ENGL BC3130 THE AMERICAN COWBOY AND THE ICONOGRAPHY OF THE WEST. 4 points.

This upper-level research-oriented seminar will study the all-American icon of the cowboy, with its signature embrace of masculinity, stoicism, elegiac music, and love of nature. We will read Cormac McCarthy's *The Border Trilogy* and other works that emerge from this icon, watch a curated series of cowboy movies, and write critical essays.

AFEN BC3134 UNHEARD VOICES: AFRICAN WOMEN. 4.00 points.
Not offered during 2023-2024 academic year.

How does one talk of women in Africa without thinking of Africa as a mythic unity? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora

AFEN BC3135 Zora Neale Hurston: A Writing Life. 4.00 points.

On her "Record of Freshman Interest" form, Zora Neale Hurston, Barnard class of 1928, wrote in response to the question of what vocation or profession she had in mind after graduation, "I have had some small success as a writer and wish above all to succeed at it. Either teaching or social work would be interesting, but consolation prizes." No consolation prize was necessary as Hurston became one of American and African American literature's finest writers, America's first Black anthropologist, and a Black feminist ancestor and icon. A deep dive into Hurston's work and writing life, this course reads Hurston as a narrative stylist and theorist in multiple genres: as poet, essayist, writer of short stories, novelist, playwright, folklorist, and memoirist. The goal of this class is to read Hurston closely and widely and to identify and examine her aesthetic philosophy and stylistic choices as one of the first African American women able to have a writing "career." We will concentrate on her work from the 1920s through the 1930s, when she was at Barnard, and a leading figure in the Harlem/New Negro Renaissance. In her time, Hurston was adamant about writing for and about people like herself; she saw ordinary black people as keepers of a rich culture that should be celebrated and shared. In this spirit, the assignments for this course will lead to final digital projects that can be shared with the Barnard community in anticipation of the centennial of Hurston's matriculation and graduation from Barnard (1925-1928). We will partner with the Digital Humanities Center at Barnard, as well as Barnard Archives; we will engage resources at Barnard, such as Hurston-focused issues of *The Scholar* and *Feminist Online*, and other institutions, such as Columbia's Rare Book Collection, the Schomburg Center for Research in Black Culture, and the Library of Congress. No prior experience with digital tools is necessary.

ENGL BC3146 Walk This Way. 3 points.

Not offered during 2023-2024 academic year.

What's in a walk? This course undertakes an interdisciplinary study of a fundamental human activity, focusing on philosophical and aesthetic treatments of human locomotion. After first examining the history of walking as a social, economic, religious, and political activity, the course will concentrate on urban walking and how it has been represented in text and image from ancient times to the present.

Topics will include walking as introspection, escape, recreation, and discovery; walking and gender; the psychogeography of walking, walking in the city, etc. Readings from Austen, Wordsworth, Dickens, Thoreau, Whitman, Joyce, Woolf, O'Hara, De Certeau, and many others.

Images from film, painting, and photography to be provided by student research. Ditto for musical strolls.

ENGL BC3147 Introduction to Narrative Medicine. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Post-bacc students require instructor permission.

Narrative Medicine was designed to give doctors and healthcare professionals a more profound understanding of, and empathy for, the experience of illness. It teaches how to listen and what to listen for. While the skills developed are directly applicable to the practice of medicine, they are also important in any field in which human relationships are central: business, law, architecture, social work, and the creative arts. The multidisciplinary course entails a rigorous integration of didactic and experiential methodology to develop a heightened awareness of self and others and build a practical set of narrative competencies.

ENGL BC3151 Bad Feelings: The Uses of Literature in Difficult Times. 4 points.

Not offered during 2023-2024 academic year.

This course will explore the purposes of literary study--and, by extension, humanistic education--during periods of turmoil. Working in sustained dialogue with one another, we will explore the treatment of emotions such as despair, anxiety, loss, fury & ecstasy in a wide variety of literary texts, ranging from literature that is ancient (e.g., Sophocles, Euripides) to early modern (William Shakespeare, Margaret Cavendish) to modern (Virginia Woolf, Ralph Ellison, Elena Ferrante). In the process, we will explore various schools of critical theory, such as Aristotle's *Poetics* (including the ancient theory of catharsis), psychoanalysis, and feminism, in a context where the stakes of these intellectual traditions will come to the fore.

ENGL BC3154 Chaucer Before Canterbury. 3 points.**Not offered during 2023-2024 academic year.**

Chaucer's innovations with major medieval forms: lyric, the extraordinary dream visions, and the culmination of medieval romance, *Troilus and Criseyde*. Approaches through close analysis, and feminist and historicist interpretation. Background readings in medieval life and culture.

ENGL BC3159 THE ENGLISH COLLOQUIUM. 4.00 points.

Prerequisites: Enrollment limited to Barnard English majors. In the Renaissance colloquium we will examine English and European imaginative and intellectual life from the sixteenth to mid-seventeenth centuries. Defined by humanism, the Protestant Reformation, and revolution, this was a period of ideological struggle on many levels. Long-held ways of ordering the world came under increasing strain and sometimes ruptured irreparably. Writers discussed and debated the aims of human knowledge, retooled old literary forms for new purposes, scrambled to take account of an expanded awareness of the globe, and probed the tension between belief and doubt. Throughout this process, they experimented with new literary styles to express their rapidly changing worldviews. This is an intensive course in which we will take multiple approaches to a variety of authors that may include Petrarch, Erasmus, Machiavelli, Castiglione, More, Rabelais, Luther, Calvin, Montaigne, Spenser, Bacon, Marlowe, Shakespeare, Milton, and Behn, among others

ENGL BC3160 THE ENGLISH COLLOQUIUM. 4.00 points.

Prerequisites: Enrollment limited to Barnard English majors. In the Enlightenment colloquium we will look at English and European imaginative and intellectual life during the late seventeenth and eighteenth centuries. During this period, writers tried in new ways to reconcile the tensions between reason and religion. Categories of thought that underlie our world today were taking shape: secularity, progress, the public and the private, individual rights, religious tolerance. Writers articulated principles of equality in an era of slavery. Literary forms like the novel, which emerges into prominence during this period, express in irreducibly complex ways these and other changes. In this intensive course, we will study from multiple angles a variety of authors that may include Hobbes, Dryden, Locke, Spinoza, Lafayette, Defoe, Swift, Pope, Richardson, Voltaire, Fielding, Johnson, Diderot, Sterne, and Wollstonecraft, among others

ENGL BC3162 DONNE, THE METAPHYSICALS, AND HIS LEGACY. 3.00 points.

John Donne is the most famous “Metaphysical Poet” of the 17th century. The term “metaphysical” to refer to his poetry was first used by Samuel Johnson in the 18th century. It was popularized in the 20th century by T. S. Eliot, who lamented what he called a “dissociation of sensibility” that set in during the 17th century, whereas (Eliot said) “a thought to Donne was an experience,” as if mind was not simply a separate thing from embodied experience. Donne’s poetry has long been admired, indeed loved, embraced by later readers, writers, and artists—not just in England and America but in different parts of the world. He has left a rich legacy, and what Judith Scherer Herz calls his “voiceprint” on diverse later writers. In my experience, students always want to spend more time on Donne. In this course, we will do that, reading his poetry with attention but also his prose Devotions Upon Emergent Occasions, written in 1623 during the plague when he came close to dying. The Devotions found a new life during the AIDs crisis, and then again during our Covid pandemic. The line from the Devotions that begins “No man is an island” has been part of our culture for a century, though many have no idea where it comes from. In this course, we will engage in “attentive,” patient reading of his texts, entering in them, trying to figuring them out, much as Donne sought to figure out lived experience in richly metaphorical writing. Though Donne is at the center of the course, we will also read a selection of poems by other 17th-century Metaphysical poets—George Herbert, Henry Vaughan, Katherine Philips, Andrew Marvell—and Sir Thomas Browne’s prose *Hydriotaphia: Or Urn Burial*, occasioned by the excavation of ancient burial urns discovered in Norwich. Browne tries to figure out the identity of these urns, then moves to a fascinating survey of the burial practices of different cultures over a long period of time, and then concludes with a profound meditation on memory, legacy, and our desire for immortality, perpetuating our earthly connections. Donne left an impression on so many writers such as Yeats, Dylan Thomas, and Seamus Heaney; Emily Dickinson, Elizabeth Bishop, and Adrienne Rich; Djuna Barnes (her novel *Nightwood*, a lesbian classic), Robert Lowell and Anthony Hecht, the Bengali Rabinadrath Tagore; Joseph Brodsky, Yehudah Amichai and Leonard Cohen; Linda Gregerson, and Kimberly Johnson. So many possibilities for anyone interested in exploring beyond the limits of syllabus. Donne’s poetry has had (and continues to have) a transhistorical and transcultural currency. This course begins to opening up possibilities, as we think about how and why we read imaginative literature from the past

ENGL BC3165 The Elizabethan Renaissance: The Complete Nondramatic Poetry of Marlowe and Shakespeare. 3 points. Not offered during 2023-2024 academic year.

In this course, we will read the complete nondramatic poetry of Christopher Marlowe and William Shakespeare, working closely through sonnets, epyllia (mini epics), and translations. How do Marlowe and Shakespeare put into play inherited and new ideas about history, gender, sexuality, politics, law, God, race, matter, print, and literary form (especially the sonnet)?

ENGL BC3166 17TH-CENTURY PROSE # POETRY. 3 points.
Not offered during 2023-2024 academic year.

The seventeenth century was a century of revolution, giving birth to modern ways of thinking, and calling into question many of the old ways. In the early years, many were affected by melancholy, some believing the world was approaching the endtimes. England experienced plagues, particularly in London, and other catastrophes. So we might find some affinity with our own current situation, facing new challenges, our world turned upside down, which is what many people felt during that time. Out of all of this turmoil, however, came great literature including lyric poems by John Donne and others exploring love and desire, doubt and faith, sex and God. Donne also wrote a series of Devotions grappling with mortality over a course of 23 days when he was suffering from typhus or relapsing fever and almost died. Others turned to find solace in the natural world and friendship (Amelia Lanyer, Katherine Philips, Henry Vaughan). Robert Burton wrote a book on melancholy, which he kept adding to. Francis Bacon thought a revolution in science could redeem the world. Thomas Browne, a physician as well as writer, tackled the problem of intolerance and religious conflict. Thomas Hobbes thought only a firm (authoritarian?) government could reestablish peace and security, while Gerard Winstanley (a "Leveller") thought that owning land (and money) was the source of all war and misery. Transgressive women had their own ideas. The Quaker leader Margaret Fell defended women's right to preach. We will read selections from these and other writers, understanding them in their historical context and with a sense of their current resonance. Out of all of this turmoil, however, came great literature including lyric poems by John Donne and others exploring love and desire, doubt and faith, sex and God. Donne also wrote a series of Devotions grappling with mortality over a course of 23 days when he was suffering from typhus or relapsing fever and almost died. Others turned to find solace in the natural world and friendship (Amelia Lanyer, Katherine Philips, Henry Vaughan). Robert Burton wrote a book on melancholy, which he kept adding to. Francis Bacon thought a revolution in science could redeem the world. Thomas Browne, a physician as well as writer, tackled the problem of intolerance and religious conflict. Thomas Hobbes thought only a firm (authoritarian?) government could reestablish peace and security, while Gerard Winstanley (a "Leveller") thought that owning land (and money) was the source of all war and misery. Transgressive women had their own ideas. The Quaker leader Margaret Fell defended women's right to preach. We will read selections from these and other writers, understanding them in their historical context and with a sense of their current resonance.

ENGL BC3167 MILTON. 3.00 points.

How and why might we read Milton now? And how do his writings and thinking intersect with issues in our present moment? We will read his influential epic *Paradise Lost* after reading selections of Milton's earlier poetry and prose (attack against censorship, defenses of divorce, individual conscience, toleration, complicated issues of political and religious liberty). He wrote about these matters as he was involved in the English Civil war, an advocate of liberty (we will consider what kind, for whom?) and revolution, which Americans would embrace as inspiration and to justify the American Revolution. We will critically read Milton's literary and political texts within the contexts of religious, political, and cultural history of early modern England and Europe but also colonial and revolutionary America—asking difficult questions, and with a sense of how Milton's writing connects to present issues of our time

ENGL BC3169 Renaissance Drama. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 25 students.

This class will examine English drama at the moment when it arose as a major art form. In Renaissance London, astonishingly complex plays emerged that reflected the diverse urban life of the city, as well as the layered and often contradictory inner life of the individual. This poetically rich theater was less concerned with presenting answers, and more with staging questions—about gender, race, religion, literary tradition, love, sex, authority, and class. In this course, we will try to tap into this theater's cosmopolitan, enlivened poetics by studying not only Shakespeare, but also the various other major authors who constituted this literary world: Christopher Marlowe, Ben Jonson, Thomas Dekker, Thomas Middleton, John Webster, and the female playwright Aphra Behn.

ENGL BC3170 LITERATURE AND SCIENCE 1600-1800. 3.00 points.

The "Scientific Revolution" began in England in the early seventeenth century, with the experiments of John Dee and the reforming projects of Francis Bacon, to culminate in Isaac Newton's discovery of the natural laws of motion. This was also a period of great literary innovation, from Shakespeare's plays and the metaphysical poetry of Marvell and Donne, to the new genre of the novel. This course will explore both the scientific and literary "revolutions" – indeed we will attempt to put them in a kind of conversation with one another, as poets and scientists puzzled over the nature of spirit, body, and the world

ENGL BC3171 LITERATURE AND PSYCHOANALYSIS. 3.00 points.
Not offered during 2023-2024 academic year.

Love him or hate him—or both, as is more often and more fittingly the case—you must admit that Freud turned the world upside-down. Against the supposed supremacy of rational consciousness, he found the power of the unconscious. At the heart of civilized order, he uncovered ever more sophisticated mechanisms of repression. Where the world saw the march of progress, he saw the death drive. And he discovered all of this through a new invention, a science of narrative, called psychoanalysis. According to this science, we are the stories we tell. And this means that we, our lives, our joys and anxieties, our past and our future, are like any story: always open to interpretation. In this course, we turn this lens back upon psychoanalysis, opening its clinical history and fundamental concepts to critical, literary interpretation. Beginning with Freud but moving beyond him, we will read foundational psychoanalytic texts alongside plays, poetry, novels, short stories, and films that corroborate, complicate, and contest the Freudian framework. We will consider the intrinsically literary qualities of psychoanalysis and, inversely, we will ask what literature, literary criticism, and literary theory gain or lose in this critical relation to psychoanalysis

ENGL BC3173 THE EIGHTEENTH-CENTURY NOVEL. 3.00 points.

In the seventeenth century, a new genre appears across Europe: the novel. Why does it appear? What accounts for its increasing popularity across the eighteenth century? What role does it play, in personal psychology as well as society? To puzzle these questions, we will place the development of the novel within the history of art, philosophy and science, as well as psychology and literary theory. Readings may include novels by Mme. de La Fayette, Aphra Behn, Daniel Defoe, Henry Fielding, John Cleland, the Marquis de Sade, William Godwin, and Jane Austen, as well as essays by Benjamin, Adorno, Foucault, Elias, Moretti, and others

Not offered during 2023-2024 academic year.

The works of Johnson, Boswell, and their contemporaries in historic context; rise of the novel (Richardson, Fielding, and Sterne); poets from Pope to Blake and Wordsworth; women writers from Carter to Collier to Wollstonecraft; working class writers; topics include slavery and abolition in literature, the democratization of culture, and the transition to romanticism.

ENGL BC3176 The Romantic Era. 3 points.
Not offered during 2023-2024 academic year.

Romantic writers in their intellectual, historical, and political context, with reference to contemporary movements in philosophy, music, and the plastic arts. Authors include Blake, Wordsworth, Coleridge, Byron, P.B. Shelley, and Keats. An emphasis on close reading of the poetry.

ENGL BC3177 VICTORIAN AGE IN LITERATURE. 3.00 points.

"We have become a novel-reading people," wrote Anthony Trollope in 1870. "Novels are in the hands of us all; from the Prime Minister down to the last-appointed scullery maid." This course will consider why the novel was so important to Victorian culture and society. What made the Victorian novel such a fertile form for grappling with the unprecedented cultural changes of the nineteenth century? To address this question, we will explore how Victorian novels both responded to, and participated in, major social and cultural shifts of the period, including industrialism and urbanization; colonialism and empire; the changing status of women, sexuality, and marriage; the emergence of Darwinism; class conflict and social reform; and the expansion of education and literacy. This course will also consider more broadly what novels are for, and what the Victorians thought they were for. Do novels represent the world as it really is, or do they imagine it as it ought to be? What kinds of solutions to social and political problems can novels offer? Can novels ethically improve (or corrupt) their readers? We will consider these issues in the context of realism, Victorian literature's trademark genre, but we'll also explore an array of other genres, such as the industrial novel, the Bildungsroman, the sensation novel, detective fiction, and gothic fiction. Authors include Jane Austen, Charles Dickens, Charlotte Brontë, George Eliot, Wilkie Collins, and others

Not offered during 2023-2024 academic year.

Poetry, art, and aesthetics in an industrial society, with emphasis on the role of women as artists and objects. Poems by Tennyson, Arnold, Christina and D.G. Rossetti, Swinburne, and Elizabeth and Robert Browning; criticism by Ruskin, Arnold, and Wilde; paintings by the Pre-Raphaelites and Whistler; photographs by J.M. Cameron.

ENGL BC3179 AMERICAN LITERATURE TO 1800. 3.00 points.

This course surveys American literature written before 1800. While we will devote some attention to the literary traditions that preceded British colonization, most of our readings will be of texts written in English between 1620 and 1800. These texts—histories, autobiographies, poems, plays, and novels—illuminate the complexity of this period of American culture. They tell stories of pilgrimage, colonization, and genocide; private piety and public life; manuscript and print publication; the growth of national identity (political, cultural, and literary); Puritanism, Quakerism, and Deism; race and gender; slavery and the beginnings of a movement towards its abolition. We will consider, as we read, the ways that these stories overlap and interconnect, and the ways that they shape texts of different periods and genres

"...but she had no worldly wisdom; her powers were unadapted to the practical business of life; she would fail to defend her most manifest rights, to consult her most legitimate advantage. An interpreter ought always to have stood between her and the world." Charlotte Brontë on her late sister the novelist Emily Brontë. This course examines the development of literary fiction in response to history. Through a diverse selection of books—novels, novellas, and verse—spanning nearly 2400 years, we will investigate the seemingly contradictory condition of the author as both outsider and insider. We will look at how writers from various backgrounds have addressed social and political alienation, national and personal crisis, through narrative. The uniqueness of the texts lies not just in how implicated they are in history, but in their resistance against generalization and intolerance. Two areas of critical concern govern the selection: Romanticism brings to focus responses to estrangement and injustice; and Modernism is seen as individual expression to alienation and exile. However, implicit also is the desire to complicate the distinction between those two schools. What unites these concerns, however, is how our writers' artistic commitment, as both witnesses and participants, creates an opportunity for literature to reveal more than the author intends and, on the other hand, more than what power desires

ENGL BC3194 LITERARY THEORY. 4.00 points.

In this course, we will trace the complex category of imitation from its ancient roots to some of its modern theoretical and literary manifestations. Interpreted differently by different thinkers, imitation can refer to the problem of art's imitation of things in the world (e.g., your portrait looks like you), art's imitation of other artistic works (e.g., your portrait looks like a Rembrandt), people's imitation or even mimicry of one another (who does she think she is?). The latter form of imitation raises the most overtly socio-political questions, whether by replicating social power structures in order to "pass" in a potentially hostile environment or by subverting these same structures through mimicking, outwitting, critiquing, or mocking them. At its core, the category of imitation focuses our attention on what is so central to artmaking that it almost eludes our notice: the question of resemblance. Put in its simplest form: What are we doing (philosophically, artistically, socially) when we make one thing resemble another?

Not offered during 2023-2024 academic year.

Psychoanalysis, world war, and shifting gender paradigms inspire fragmented narratives, stream-of-consciousness prose, and improbable blends of erudition and the avant-garde. Stylistic innovation notwithstanding, Modernism authorizes a remarkably traditional literary canon. Special attention will be devoted to how seminal manifestos, most notably "Tradition and the Individual Talent" and *A Room of One's Own*, frame the movement's embattled aesthetics. Works by Eliot, Woolf, Barnes, Faulkner, Hemingway, Joyce, Lawrence, Pound, Stein, Toomer, and Yeats.

Home to Harlem focuses on the relationship between art, activism and social justice during the Harlem/ New Negro Renaissance. Exploring the cultural contexts and aesthetic debates that animated Harlem in 1920s to 1930s, the course discusses the politics of literary and theatrical production, while exploring the fashioning and performance of New Negro identity through fiction, poetry, essays, and artwork. Topics considered include: role of Africa/slavery/the south in New Negro expression, patronage, passing, primitivism/popular culture, black dialect as literary language, and the problematics of creating a "racial" art in/for a community comprised of differences in gender, class, sexuality, and geographical origin

ENGL BC3204 WORLD LITERATURE REVISITED I. 3.00 points.

(Please note that you do not need to take ENGL BC3204 World Literature Revisited I and ENGL BC3205 World Literature Revisited II in sequence; you may take them in any order.) What/where/whom constitutes the world in World Literature? Traditionally, why have some types of writing and inscription been privileged over others when determining the category of literature? How can we read and trace literary influence across these literatures without reducing them to a mere repetition of the same themes and ideas? Finally, we will think about the role that translation plays in the production and politics of World Literature and how the issue of translation differentiates between the disciplines of Comparative Literature and World Literature. This course will be taught over one year. Taking both halves of the course is recommended, but not required. In the first semester, we will deal with ancient texts until around the 14th century, and our focus will be origin stories and epic narratives, lyric poetry, and sacred/religious texts

ENGL BC3205 WORLD LITERATURE REVISITED II. 3.00 points.

(Please note that you do not need to take ENGL BC3204 World Literature Revisited I and ENGL BC3205 World Literature Revisited II in sequence; you may take them in any order.) As a discipline, World Literature dates back to the early 19th century and Goethe's concept of weltliteratur. Yet, despite the fact that Goethe was well-versed in the literature of the "Orient" and he emphasized their centrality in weltliteratur, the languages that he spoke of and underlined within the formation of this literature were mostly German and Romance languages. Institutionally speaking, not much has changed over the past couple of centuries. More often than not, studying the literature of locations such as the Middle East, Africa, or East Asia takes place in Area Studies departments, and offerings of these areas' literatures in Comparative Literature departments are few and far in between. In World Literature Revisited I, we imagined what a survey of World Literature in a literary studies department could look like, as we dealt with ancient texts until around the 14th century, with a focus on origin stories and epic narratives, lyric poetry, historical narratives, and sacred/religious texts. In World Literature Revisited II, we will continue to investigate and challenge the categories of "Eastern" and "Western" literature and think through the categories of "world" and "literature" in the course title. In this part of the course, we will work on (classical, early modern, and modern) drama, modern poetry, and the novel, with a particular focus on reading in comparison adaptations, appropriations, and literary responses. What/where/whom constitutes the world in World Literature? How can we read and trace literary influence across these literatures without reducing them to a mere repetition of the same themes and ideas? Finally, we will think about the role that translation plays in the production and politics of World Literature, particularly when it comes to adaptations and appropriations, and how the issue of translation differentiates between the disciplines of Comparative Literature and World Literature

ENGL BC3207 THE 'GLOBAL' NOVEL. 3.00 points.

"Yes, globalization can produce homogeneity, but globalization is also a threat to homogeneity." –Kwame Anthony Appiah, "The Case for Contamination," New York Times Magazine, 2006 Thinking through the arguments both in favor of and against globalization, particularly in the realm of cultural productions, in this course we will discuss the "global" novel. To that end, we will read essays from The Global Novel: Writing the World in the 21st Century about works such as Americanah, Snow, and The Reluctant Fundamentalist (along with the novels themselves) to investigate what is meant by "global" and what the criteria for including novels in this categorization are. We will also consider whether there is an erasure of cultural difference and nuance in reading novels using a globalizing perspective in order to render them more approachable for a (primarily) US audience. In order to think through and challenge this category of the global, we will also read novels that can be roughly categorized as postcolonial. We will thus consider how struggles for independence and the desire to locate one's identity either within freshly liberated nation-states or in the process of immigrating to former metropolises could give rise to cultural and psychological anxieties. We will also consider the manner in which late-stage capitalism could indeed push toward homogenized senses of self that manifest in a category such as the "global novel" and whether arguments could be made in favor of such homogenization. Ultimately, we will think about the politics of globalization and the desire to include in or exclude from the "global" certain locations, cultural products, or peoples

This course encompasses themes of race, ethnicity, mass incarceration, and immigration in the modern United States, with special attention to the stories of Latinx people. We will consider the roles of journalistic writing, documentaries, and personal narratives in shaping public policy and attitudes towards lives behind bars. Guest speakers will also provide personal experiences to help reframe our own narratives and perspectives on these issues. ENGL BC3215 VICTORIAN SCIENCE#SCIFI. 3.00 points.
Not offered during 2023-2024 academic year.

Although Victorian fiction is best known today for its realist commitment to representing the world “as it really is,” especially in genres such as the courtship novel and the Bildungsroman, Victorian novelists also wrote during an age of enthusiastic scientific inquiry that questioned and revised the very fabric of the reality that realist genres purported to represent. This course will accordingly explore the more adventurous and speculative fiction of the Victorian period that was most closely attuned to these new ways of representing and thinking about reality. How did new scientific developments such as evolutionary theory in biology, and the atomic theory in physics, reshape how writers viewed the relationships between human and animal, self and other, space and time, body and mind? How did departing from traditional realist modes enable Victorian science fiction writers to explore the ethical, social, and political implications of scientific theories in ways that scientific prose may not have envisioned? In this course we will read major works of Victorian fiction, by such authors as Mary Shelley, H.G. Wells, H. Rider Haggard, Robert Louis Stevenson, and others, alongside selections of scientific prose in such fields of Victorian science as biology, physics, mathematics, anthropology, and psychology. Throughout the course, we will understand “science” to include both major developments in the history of science, such as the emergence of evolutionary thought, as well as more eccentric Victorian areas of inquiry, such as phrenology, mesmerism, telepathy, and degeneration. The first three units into which the course is divided each explore a major field of Victorian science alongside a major conceptual category that it challenged and altered: biology and the nature of the human; psychology and the constitution of the self; the physical sciences and the nature of space and time. In each unit, we will investigate how writers’ engagements with these conceptual questions led them to experiment with literary categories such as character, narration, and plot. The course will close with a unit on texts that more broadly address Victorian conceptions of progress, technology, and development. In addition to these specific thematic and formal questions, we will think broadly about how the Victorians understood the value of science and technology in relation to the arts and to literature, and ask what their answers to these questions can offer us as we navigate similar questions today. What does scientific thinking offer to literature, and what kinds of questions can literature answer that scientific prose cannot? Do technological and scientific progress open up utopian vistas for humanity’s future, or are they more likely to lead to dystopian nightmares? Throughout the course, we will explore the resources that the literary imagination offers for thinking through the social consequences of scientific theories.

ENGL BC3218 THE 'ETHNIC' IN THE LITERARY MARKETPLACE. 3 points.

Not offered during 2023-2024 academic year.

This course proposes to examine the implications of what Trinh T. Minh-Ha has called “specialness,” or the distinctiveness of “ethnic” or “third world” experience, as it is represented and consumed in the literary marketplace (including classes like this one). That consumption has a discourse of its own, centered on often conflicting demands for authenticity. The test of authenticity for one reading community might be a book’s perceived difference from that community’s own experience; for another community (usually the one the author is perceived as coming from), the same book must represent a familiar experience to pass the test. Some questions we will address: How might “ethnic” writing and production both expose itself to and insulate itself from critique via claims to authenticity? How does an author negotiate others’ demands for a certain kind of authenticity, and his or her own deeply felt (authentic?) need to consolidate identity by returning to ethnic “origins”? What in a set of publisher’s or reader’s demands for the “real” form or shape what we determine to be “fake”? We will study the primary texts in the context of mainstream literary reviews and other theoretical/polemical statements concerning the “meaning” of ethnic experience. Authors studied may include: Richard Wright, Zora Neale Hurston, Leslie Silko, Louise Erdrich, Sandra Cisneros, Richard Rodriguez, Ishmael Reed, Gloria Anzaldúa, Maxine Hong Kingston, Frank Chin, Jeanine Cummins, and Trinh Minh-Ha.

ENGL BC3242 ANTI-COLONIAL LITERATURE BEFORE 1900. 4.00 points.

“We are all bound up together in one great bundle of humanity,” wrote the abolitionist writer Frances Ellen Watkins Harper a few years after the Civil War. This course explores the creative productions, critiques, and political projects of colonized people themselves, specifically focusing on writers in the indigenous, African American, and global anti-imperialist traditions. How did these heterogeneous communities differently diagnose the context of colonialism? What positive horizons of freedom, equality, and democracy did they aspire towards? What do their works tell us about gender, land, and labor? We explore themes of sovereignty against settler colonialism in the work of indigenous writers like Kandiaronk, William Apess, E. Pauline Johnson, Sarah Winnemucca, Zitkala Sa, and Liliuokalani, Queen of Hawaii. Next, we read the African American abolitionist tradition, beginning with Phillis Wheatley and slave narratives (Frederick Douglass, Mary Prince, Harriet Jacobs) followed by works by Harriet Wilson, Ida B. Wells, and Machado de Assis. The final third of the class will focus on works by those encountering imperialism in Egypt, South Asia, Latin America, the Philippines, and China: Al-Jabarti, Dinabandhu Mitra, José Martí, Jose Rizal, Huang Zunxian, and Qiu Jin

ENGL BC3243 ABSENT MOTHERS, WICKED STEPMOTHERS. 4.00 points.

Why are stepmothers and stepdaughters inevitable enemies in folk and fairy tales? Why are fathers blameless and biological mothers absent (and usually dead)? And how do these narratives, so deeply woven into our own media and language, affect our sense of our own lived reality? In this course, we'll untangle the complicated web of relationships between mothers, daughters, and stepmothers in folk and fairy tales, from ancient Rome to current cinema. We'll read analytic psychology, feminist literary theory, cultural history, and other critical perspectives to help us analyze the absent mother, virginal daughter, hapless father, and evil stepmother tropes across time and space, so we can defamiliarize these familiar figures and develop a deeper understanding of how and why they dominate the popular imagination. This is an upper-level course, with priority for juniors and seniors

ENGL BC3244 PROUST: SWANN'S WAY. 4.00 points.

This class is organized around one book, Swann's Way, volume one of Marcel Proust's magnum opus, In Search of Lost Time, a work that is central to the history of the novel. Due to the length and complexity of the six volumes that make up In Search of Lost Time, it is not a novel that benefits from a schematic reading. It calls, instead, on our attention to be paid in an unusually close manner. It is a novel that is committed to the details, to close observation and the expansive and meditative nature of the life of the mind. Therefore, as well as being about Proust's work, the class is also concerned with questions of attention. As Adorno argued, In Search of Lost Time is a book that is "against the brutal untruth of a subsuming form forced on from above..." Students will get a chance to read Swann's Way—a book that is just under 500 pages long—in great depth over the course of the semester. And because the adjective "Proustian", it could be argued, has come to refer to works that have both succeeded as well as preceded Proust himself, students will be introduced to works by authors who might have influenced Proust — such as: Baudelaire, Balzac, George Eliot, Thomas Hardy, John Ruskin and Ralph Waldo Emerson — as well as examples of writers who had been inspired by Proust's work — such as: Virginia Woolf, Vladimir Nabokov, Javier Marias, Thomas Bernhard and W.G. Sebald. Creative and analytic close reading will be the primary tool of analysis

ENGL BC3246 WRITING THE MEDIEVAL SELF. 3.00 points.

The late Middle Ages and early Renaissance saw an explosion in the use of the first-person singular "I" by European writers of narrative texts. Although these narratives — among them dream visions, philosophical allegories, spiritual autobiographies, and straight-up novels — do not always correspond to modern ideas about autobiography, they nonetheless demonstrate a growing interest in such "autobiographical" topics as personal identity, sexual difference, mental illness, and disability, even as they experiment with a variety of literary forms and raise fundamental questions about the relationship between truth and writing. Writers will include Augustine, Dante, Boccaccio, Chaucer, Christine de Pisan, Thomas Hoccleve, Julian of Norwich and Teresa de Cartagena, among others. No foreign language experience is required for this course, but knowledge of Latin or Romance languages may be useful

ENGL BC3249 THE MARRIAGE PLOT. 4.00 points.

This upper-level research-oriented seminar will engage with literary expressions of the universally interesting topic of marriage. Tony Tanner in his famous Adultery in the Novel characterizes marriage as "the structure which supports all structure." Contemporary critics have seen marriage as essential to maintaining the "family values" of the bourgeoisie; feminists and Marxists have challenged the economic assumptions of patriarchally-defined marriage. Folklorists have treated marriage as the endpoint of the search for a safe domestic space. Starting in ancient times with classic fairy tales and the Hebrew Bible, moving on to a famous medieval poem, a medieval memoir, and three nineteenth-century novels, we will encounter cultural expressions which address intimate partnerships with an emphasis on marriage as a defining condition

ENGL BC3250 INTRODUCTION TO US LATINX LITERATURE. 3.00 points.

This course introduces students to a growing body of work by Latina and Latino writers in the United States, and engages with the critical tools necessary for analyzing a field of inquiry and practice that continues to reframe itself, right down to the label "Latinx." What does that name include, and what does it exclude, in cultural productions born of conflicts of origin, language, race, gender, sexuality, and nationality? For some understanding of context, we will turn to the history and pressures of transnational migration, exile, assimilation, bilingualism and queerness as these variously affect the means and modes of the literary productions with which we're concerned. At the same time, the course will emphasize the invented and hybrid nature of Latinx literary and cultural traditions, and it will investigate the place of those inventions in the larger framework of American intellectual and literary traditions. Readings will be drawn from work written primarily in English, but we will also consider graphic novels, Latinx performance, and works in translation

ENGL BC3251 NINETEENTH-CENTURY THRILLERS. 4.00 points.

This class will investigate the ways in which the nineteenth-century novel is shaped by the forces of horror, sensation, suspense and the supernatural. We will ask how the melodramatic imagination, the rhetoric of monstrosity, and the procedures of detection mark high narrative realism with the signs of cultural anxieties building up around nineteenth-century revolution, industrialization, capitalism, bigamy, Catholicism and immigration. Looking at representative samples of the Romantic neo-gothic novel, mid-century ghost stories, the highly popular and controversial sensation novels of the 1860's along with their spectacular iterations on the Victorian stage, we will come away with a deeper and more nuanced understanding of the intersection between the novel and popular entertainment. Readings will probably include Austen's *Northanger Abbey*, Brontë's *Villette*, Braddon's *Lady Audley's Secret*, Collins's *The Woman in White*, Dickens's *Bleak House*, Stoker's *Dracula*, plays by Boucicault, Hazelwood, Lewis, and Wood, and ghost stories by Edwards, Gaskell, Hood, and Mulock

ENGL BC3281 ILLEGAL IS NOT A NOUN: DISRUPTING NARRATIVES OF THE IMMIGRANT EXPERIENCE. 4.00 points.

This course engages with narratives about detention and deportation in the modern United States, with special attention to the stories of Latinx people. We will analyze how journalistic writing, documentaries, and personal narratives shape public policy and American attitudes about the "the immigrant experience." What are these narratives, how are they told, and what are their implications? How do writers disrupt these narratives? We will develop four scholarly essays over the course of the semester to investigate these questions

ENGL BC3288 ROMANCE. 3.00 points.

The literary mode we call "romance" has been enormously popular and influential from its origins in Hellenistic antiquity to current science fiction, and at all levels of textual ambition from popular culture to canonical literature. Within this mass of material, one constant element is romance's encounter with boundaries. This course will explore such boundary moments in texts from the 5th to the 20th centuries: boundaries and transgressions of desire (romances of marriage and adultery), of time (the reimagining of antiquity), of national foundation, of geography (settings in a fantasy east), of gender, and of class, indeed the boundary of the human and the monstrous

ENGL BC3291 FICTIONS OF LAW AND CUSTOM: WHITENESS IN AMERICAN LITERATURE. 3.00 points.

This course examines "white" American identity as a cultural location and set of discourses and traditions with a history—in Mark Twain's terms, "a fiction of law and custom." What are the origins of "Anglo-Saxon" American identity? What are the borders, visible and invisible, against which this identity has leveraged position and power? How have these borders shifted over time, and in social and cultural space? How has whiteness located itself at the center of political, historical, social and literary discourse, and how has it been displaced? How does whiteness mark itself, or mask itself, in literature and in larger cultural practices? What does whiteness look like, sound like, and feel like from the perspective of the racial "other"? And in what ways do considerations of gender and class complicate these other questions?

ENGL BC3292 QNYC. 3 points.

Not offered during 2023-2024 academic year.

The cultural history of New York City is inextricable from the history of LGBTQI+ life. American poetry, theatre, ballet, opera, and visual art would be unrecognizable if New York had not been a hub for LGBTQI + people. In this sprawling city, life could be characterized equally by its anonymity as by the sometimes exacting bonds of its many tight-knit sub-communities. This course will provide a survey of LGBTQI + literature and some related arts based in the city, starting in the colonial era and extending to the present day.

ENGL BC3294 EXOPHONIC WOMEN. 3.00 points.

Language is the writer's instrument; what happens when there is more than one language to choose from, or when a dominant or initial language is replaced by another? What inspires, or necessitates, a writer to practice exophony: to migrate into "foreign" linguistic territory? And in the case of bilingual or plurilingual writers, what factors determine the language(s) chosen for creative expression, and what might cause that choice to shift over time? To what degree do exophonic writers create a third, hybrid language? And how might their works underscore the mutability and instability of language itself? This seminar will focus on a series of women who, either for political or personal reasons, have reshaped and revised their linguistic points of reference, radically questioning—and perhaps willfully subverting—notions of nationality, identity, linguistic normativity, and a "mother tongue". Special attention will be paid to the reception of exophonic writers, to feminist narratives of separation and self-fashioning, to mother-daughter dyads, to cases of self-translation, to colonialist and post-colonialist frameworks, and to how the phenomenon of exophony further complicates, but also enriches, the translator's task. Readings will combine literary texts with essays, interviews, and theoretical writings by and about exophonic writers. In addition to analytical papers, students will have the opportunity to experiment writing in another language and translating themselves into English. All readings will be in English; advanced reading knowledge of a foreign language is recommended but not required

ENGL BC3296 AGAINST COLONIALISM, AGAINST FASCISM. 4.00 points.

The Caribbean poet Aimé Césaire argued that the terrors of World War II simply reflected colonial practices returned home to their origin, Western Europe. This course investigates the relationship between fascism and colonialism, during moment when we are experiencing a global rise in right-wing authoritarian governments premised on anti-migrant politics. What is the relationship between fascism and colonialism, and democracy, equality, and internationalism? What are the class alliances behind fascism? What are institutions that facilitate it? In a spirit of internationalism, this class brings together classic anti-colonial and anti-fascists works under one umbrella. We will start by reading theoretical texts by Umberto Eco, Toni Morrison, Susan Sontag, G.M. Tamás, W.E.B. Du Bois, Gandhi, Tagore, Nancy Cunard, and George Padmore. Texts include: *The Underdogs*, Azuela's novel of the Mexican Revolution; Chestnut's *The Marrow of Tradition*; *Family Lexicon*, Natalia Ginzburg's memoir of Italian fascism; *The Seventh Cross*, a thrilling novel about escaping a German concentration camp by Anne Seghers, who herself escaped through France; Arab writers Etel Adnan, Emile Habibi, and Ghassan Kanafani; *My Tender Matador* by Chilean queer/trans author Pedro Lemebel; *Philadelphia Fire* by John Edgar Wideman; *Ministry of Utmost Happiness* by Roy; and Kureishi and Frears's queer countercultural film, *Sammie and Rosie Get Laid*

ENGL BC3297 UNSILENT VOICES: THE MEDIEVAL LYRIC IN EUROPE. 3.00 points.

From the fall of the Western Empire to the Protestant Reformation, a period of over 1000 years, poets in Europe produced an extraordinarily rich and varied body of lyric poetry that continues to exert a major influence on world literature today. While some of this poetry is religious in nature, a great deal also addresses such diverse themes as desire, selfhood, politics, gender, and humanity's relation to the non-human world. In this class we will examine medieval lyrics originally composed in a number of languages including but not limited to Old and Middle English, Latin, Occitan, Hebrew, Arabic, Italian, French, German and Portuguese. Aspiring polyglots welcome, but all readings will be provided in English translation. This course presumes no previous knowledge of medieval history or literature

ENGL BC3299 THE AUTOBIOGRAPHICAL EFFECT: EARLY MODERN TO MODERN. 4.00 points.

American poetry after 1960 famously took on a new intimacy and freshness of tone. Often called "confessional," this poetry often does not actually express the kind of guilty self-revelation such a term implies. As the critic David Kalstone put it, "American poetry of this period became increasingly available to autobiographical energies of all sorts, not simply to writing which was desperate and on the edge." This course examines some of that poetry, and its non-confessional use of an autobiographical "I." We will explore how this poetry, far from representing a rejection of tradition, drew on early modern work to imbue seemingly modern autobiographical effects with new quickness and life

ENGL BC3417 PERSIAN POETICS IN WORLD LITERATURE. 4.00 points.

Through a transcontinental network of poets and poetics from Iran and Russia to Germany and the United States, in this course we will: 1) learn about classical Persian poetry that was translated widely and contributed to the development of World Literature (the cornerstone of which was Johann Wolfgang Goethe's weltliteratur) and to study different translations and adaptations of this poetry; 2) study world poetry that Iranian poets had translated into Persian and analyze how these translations may have affected modern Persian poetics; 3) read in comparison modern Persian poetry and African diasporic poetry, discuss the intersections of the power structures of gender, class, race and ethnicity, and analyze how these power structures manifested themselves in pre-revolutionary Iran (and ultimately, what can be learned from including this historical context in contemporary Caribbean and African American studies). On a broader scale, this course aims to place Persian poetry and poetics within a world literature discourse, both in terms of its historical contributions to this discourse as well as the discourse's contributions to Persian poetics. It is meant to encourage you to investigate the role that translation plays in world literary studies; at the same time, it acknowledges the limits of global markets of literature and their politics of translation. Weeks eight through thirteen of the course in which Iranian poetry is put into conversation with African diasporic poetry, therefore, demonstrate the possibilities that open up in world literary studies when scholars expand their focus beyond proven literary connections and underscore cultural provenance as a basis for comparison

ENGL BC3418 DESIRE AND METAMORPHOSIS. 3.00 points.

Change is fundamental to our experience as human beings, and the experience of change lies at the heart of most great stories. Sometimes this is a transition that the heroine has desired; other times, alteration and transformation arise from sources mysterious and unknown, or as a result of the journey the story has brought them. This course examines the element of change in a wide range of literature, from Ovid to Maggie Nelson, from Shakespeare to Roxane Gay—but it also provides an opportunity for students to consider the ways in which they, too have been changed—by joy, by trauma, by time. In addition to writing critically about the works we will read together, students will also write a personal essay about their experience of metamorphosis; this essay will be examined in a modified workshop format. At semester's end, students will re-write and change that same essay, in hopes of seeing how revision on the page might provide a model for understanding the metamorphoses we experience as human beings on this earth. Authors will likely include Ovid, Kafka, Robert Louis Stevenson, Borges, Shaun Tan, Roxane Gay, George Saunders, Arthur C. Clarke, Shakespeare, and Maggie Nelson. There will be a final exam and a critical paper, as well as the personal essay, in two drafts

AFEN BC3815 SHANGE # DIGITAL STORYTELLING. 4.00 points.

Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at <http://bit.ly/Ntozake2019>. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Women's Studies. Students who successfully complete into this course will be eligible to take the second half of the course in Spring 2019. NOTE: There will be three extra sessions scheduled in the Digital Humanities Center. Prerequisites: Enrollment limited to 12 students. Permission of the instructor required. Interested students should complete the application at: <http://bit.ly/ShangeWorlds>. Students should have taken a course beyond the intro level from ONE of the following areas: American Literature (through the English Department), Africana Studies, American Studies, Theatre or Womens Studies. Please note that this is a yearlong course; students who are accepted into this course will need to take its second half, AFEN BC3816, in the spring semester. A poet, performance artist, playwright and novelist, Ntozake Shanges stylistic innovations in drama, poetry and fiction and attention to the untold lives of black women have made her an influential figure throughout American arts and in Feminist history. In a unique collaboration between Barnard, the Schomburg Center for Black Culture and the International Center for Photography, and with support by the Mellon funded Barnard Teaches grant, this year long seminar provides an in-depth exploration of Shanges work and milieu as well as an introduction to digital tools, public research and archival practice. You can find more information and apply for the course at <http://bit.ly/ShangeWorlds>. On Twitter @ShangeWorlds

AFEN BC3816 The Worlds of Ntozake Shange and Digital Storytelling. 4 points.

Prerequisites: AFEN BC3815 or equivalent.

This course has a prerequisite and an application: <http://bit.ly/AFEN3816>. This hands-on, project based course introduces students to the use of digital tools and sources to organize and manage their archival research, creatively interpret their findings, and communicate their results to the public. This semester, the course is somewhat different from the usual research course in that, rather than simply going more deeply into the course focus, you will be asked to apply your knowledge to make new things. Working with the Barnard Digital Humanities Center, you will develop projects that teach some aspect of Shange’s work and or feminist movements. But while making these new things, we will have ongoing discussions about the nature of digital life and evolving protocols for digital work. You will make plans to visit the archive appropriate to your project (in most cases this will be the Barnard Archives, but they might include sites such as The Billy Rose Theatre Division at the NYPL, or the Amiri Baraka collection at Columbia University) as well as doing background reading for your project. By the end of the semester, you’ll have sharpened your research skills while also acquiring digital, teamwork, and project management skills that will be useful in other classes and beyond.

AFEN BC3817 Black Shakespeare. 4.00 points.

This course examines Shakespeare’s role in shaping Western ideas about Blackness, in processes of racial formation, and in Black freedom struggle. As one of the most enduring representations of a Black man in Western art Shakespeare’s Othello will be a focal point. However, this course will examine other “race” plays as well as works perceived as “race-neutral” in tandem with Black “respeakings” of Shakespeare’s works. This class is antiracist in intent and is shaped by several interlocking questions: What is Black Shakespeare? Can creators and scholars separate Shakespeare from the apparatus of white supremacy that has been built around his works? What are the challenges for BIPOC actors performing Shakespeare on the dominant stage? What are the challenges and obstacles for BIPOC scholars working on Shakespeare in academia? Can performing Shakespeare be an activist endeavor

ENGL GU4010 THE CANTERBURY TALES. 3.00 points.

This course has several parallel purposes. First and foremost, we explore an enormously ambitious and brilliant work of literature, both in its local variety (the individual tales, their prologues and epilogues, their self-conscious placement within late medieval cultural conventions), and in its overarching structures. This of course involves learning about the language in which Chaucer wrote, Middle English. Second, we think about Chaucer’s position in late medieval literary culture, especially in England, and in the social world of his own day: at once a minor royal functionary and increasingly recognized as an important writer; an innovator in his immediate literary context but an historical situation of our own readership, for which Chaucer has become “Chaucer” (as he started to be in his own day), even many kinds of “Chaucer,” which continue to evolve as our reading culture does

Senior Seminars and Senior Project in Creative Writing

Enrollment in English senior seminars and the senior project in creative writing is restricted to Barnard senior English majors. Enrollment in the English/Film senior seminar is limited to Barnard senior English majors with a Film Studies concentration and Barnard senior Film Studies majors. For senior seminar course descriptions and the exact expected graduation dates for which the registration system considers students to be seniors this academic year, visit this page of English Department website: <https://english.barnard.edu/english/senior-seminars>

ENGL BC3992 SENIOR PROJECT IN CREATIVE WRITING. 4.00 points.

Enrollment limited to Barnard senior English majors with a concentration in creative writing. This creative writing workshop represents an opportunity for creative writing concentrators to focus on one large project that will serve as a capstone senior project. As in a typical writing workshop, much of the focus will be on sharing and critiquing student work. Unlike other workshops, in this class students will focus on building out a longer project—such as a more ambitious full-length story for fiction and creative nonfiction writers and a chapbook for poets. This means students will discuss work by writers who may not share their own genre. We will focus on generating new work, developing your writing process, and creating new possibilities and momentum for your piece, as well as trying to create a sense of community among the concentrators. We will also conduct in-class writing exercises in response to short reading assignments and class lectures. Students should be aware of two important notes: (1) This class is limited to senior English majors who have already been approved to be creative writing concentrators; and (2) this course fulfills the requirement for concentrators to finish a senior project, but not the academic senior seminar requirement. This class is about your own writing and that of your classmates. This class will be what you make of it!

Independent Studies

ENGL BC3996 SPECIAL PROJECT IN ENGLISH. 1.00 point.

Application required: <https://english.barnard.edu/english/independent-studies>. Senior English majors who are concentrating in writing and who have completed two creative writing courses will normally take this Special Project in combination with an additional creative writing course. Senior English majors who are concentrating in theatre and who have completed three courses in theatre history/dramatic literature will normally take this Special Project in combination with an additional dramatic literature course. For both writing and theatre concentrators, this combined special project counts in place of one senior seminar. In certain cases, ENGL BC3999 may be substituted for the Special Project. In rare cases, the English Department Chair may permit an English major not concentrating in writing or theatre to take ENGL BC3996 in combination with another course

Application required: <https://english.barnard.edu/english/independent-studies>. Senior majors who wish to substitute Independent Study for one of the two required senior seminars should consult the chair. Permission is given rarely and only to students who present a clear and well-defined topic of study, who have a department sponsor, and who submit their proposals well in advance of the semester in which they will register. There is no independent study for screenwriting or film production

Summer Courses

ENGL BC1021 FEMINIST LIFE WRITING. 3.00 points.

Feminists have famously claimed that "the personal is political." Accordingly, life writing—in various genres—has been an important form for feminists across generations. In this class, we will explore the different ways in which feminists have used these modes to create visions of the self, to challenge the roles and self-images given to them, and to imagine new narratives. In particular, we'll explore questions of genre: so many of these writers have developed hybrid genres or challenged the boundaries of genre in order to write their lives. Looking at examples of life writing including letters, diaries and journals, graphic memoirs, and "traditional" autobiographies, we will examine these forms through the lens of gender, race, sexuality, class, and disability. Readings are subject to change, but may include: Audre Lorde, *Zami*; Alison Bechdel, *Fun Home*; Cherrie Moraga, *Loving in the War Years*; Maggie Nelson, *The Argonauts*; Maxine Hong Kingston, *Woman Warrior*; poems by Adrienne Rich; Carmen Maria Machado, *In the Dream House*; *This Bridge Called My Back: Writings by Radical Women of Color*; Janet Mock, *Redefining Realness*, and selected shorter pieces. Additionally, we will read critical and theoretical works that will urge us to consider our primary texts from various critical approaches: including sexuality studies, critical race studies, disability studies, and transgender studies

ENGL BC1022 BAD LOVE. 3.00 points.

This seminar will read stories of love gone bad, of romances that end catastrophically, that damage lovers or leave victims along the way. We will illuminate the consuming fantasy of the romance genre in its quest for "true love," as well as a range of emotions – rage and revenge, narcissism and self-protection, obsession and oblivion – that surface in its wake. We will also look at shifting interpretations of "bad love," from Plato, to the Galenic theory of the humors, to the sociology of court-culture, to Freudian and finally contemporary neurobiological explanations of feelings. Students are welcome to propose texts of their own interests to open this course to the widest range of interests. In addition to seminar discussion, there will be weekly individual tutorials with Professor Hamilton as well as interviews with a neurobiologist and a psychologist

ENGL BC1023 FEMINISM, SCIENCE, # REPRODUCTIVE TECH. 3.00 points.

Reproduction is both a biological and social process—one that is often the target of deep-seated ideas about identity, culture, science, and technology. How have contraceptives, pharmaceuticals, and other technologies shaped reproductive experiences? What does the use and distribution of these scientific innovations reveal about existing power structures and social stratification? What liberatory possibilities do these technologies enable, and what are their limitations? Course material will center work by reproductive justice scholar-activists and feminist science and technology studies scholarship, including work by Dorothy Roberts, Alexandra Stern, Emily Martin, Alondra Nelson, and others

ENGL BC3304 THE ART OF THE ESSAY. 3.00 points.

What makes the essay of personal experience an essay rather than a journal entry? How can one's specific experience transcend the limits of narrative and transmit a deeper meaning to any reader? How can a writer transmit the wisdom gained from personal experience without lecturing her reader? In *The Art of the Essay*, we explore the answers to these questions by reading personal essays in a variety of different forms. We begin with Michel de Montaigne, the 16th-century philosopher who popularized the personal essay as we know it and famously asked, "What do I know?," and follow the development of the form as a locus of rigorous self-examination, doubt, persuasion, and provocation. Through close reading of a range of essays from writers including Annie Dillard, George Orwell, Jamaica Kincaid, and June Jordan, we analyze how voice, form, and evidence work together to create a world of meaning around an author's experience, one that invites readers into conversations that are at once deeply personal and universal in their consequences and implications

ENGL BC3307 THE 'GLOBAL' NOVEL. 3.00 points.

"Yes, globalization can produce homogeneity, but globalization is also a threat to homogeneity." – Kwame Anthony Appiah, "The Case for Contamination," *New York Times Magazine*, 2006. Thinking through the arguments both in favor of and against globalization, particularly in the realm of cultural productions, in this course we will discuss the "global" novel. To that end, using the introductory essay from *The Global Novel: Writing the World in the 21st Century* as a starting point to discuss five novels from across the globe, we'll investigate what is meant by "global" and what the criteria for including novels in this categorization are. We will also consider whether there is an erasure of cultural difference and nuance in reading novels using a globalizing perspective in order to render them more approachable for a (primarily) US audience. In order to think through and challenge this category of the global, we will also read novels that can be roughly categorized as postcolonial. We will thus consider how struggles for independence and the desire to locate one's identity either within freshly liberated nation-states or in the process of immigrating to former metropolises could give rise to cultural and psychological anxieties. We will also consider the manner in which late-stage capitalism could indeed push toward homogenized senses of self that manifest in a category such as the "global novel" and whether arguments could be made in favor of such homogenization. Ultimately, we will think about the politics of globalization and the desire to include in or exclude from the "global" certain locations, cultural products, or peoples

ENGL BC3308 QUEER GENRES. 3.00 points.

In this class, we will focus on queer narratives of the self to explore how authors represent queerness across centuries and genres, and how these queer narratives are informed by various historical, national, cultural and political contexts. Through a comparative, transnational and intersectional approach that takes into account the particularities of each author's context, we will aim to answer the following questions: How do various cultural, national, linguistic, religious or political contexts affect the way queer identities are defined and represented in literature? How do these authors represent the intersections of queerness with race, class, ethnicity, disability and citizenship? How have queer narratives developed over time and across cultures in conversation with local and global modes of conceptualizing gender and sexuality? How do queer authors utilize the particularities of each genre to create new forms of self-expression? Texts will span various genres such as short stories, poems, memoirs, graphic novels, novels and personal essays by authors such as James Baldwin, Audre Lorde, Sappho, Carmen Maria Machado, Alison Bechdel, Adrienne Rich, Casey Plett and Imogen Binnie. Additionally, we will read critical and theoretical works that will urge us to consider these works from a range of perspectives, such as queer studies, feminist studies, disability studies, and transgender studies

ENGL BC3309 RENAISSANCE DRAMA. 3.00 points.

This class offers a general introduction to English drama at the moment when it became a major art form. Renaissance London gave birth to a booming theatrical world, with plays that reflected the diverse urban life of the city, as well as the layered and often contradictory inner life of the individual. This poetically rich theater was less concerned with presenting answers, and more with staging questions—about gender, religion, power, love, sex, authority, class, violence, and more. We will encounter these questions in works by Shakespeare and other major authors who populated this literary scene: Ben Jonson, Thomas Dekker, Thomas Middleton, John Webster, the ever-popular “Anonymous,” and others. Putting them in dialogue with their social world, and situating them within a culture of performance, we will engage with the plays via detailed close reading and literary analysis

Cross-Listed Courses

CPLT BC3204 Literary Worldmaking: Two Case Studies. 4.00 points.

This seminar engages students in the immersive and intensive reading of two masterworks of modern prose fiction: *Middlemarch*, published by George Eliot (the pseudonym of Mary Ann Evans) in 1871-2 in England, and *The Story of the Stone, or the Dream of the Red Chamber*, composed by Cao Xueqin (and continued by Gao E) in the late 18th-century moment of Qing-dynasty China. While using devices and conventions from different narrative traditions, these novels operate in the mode of realism and do so at a monumental and panoramic scale, creating literary worlds that reflect the realia of historical lifeworlds. Beyond representing aspects of empirically recognizable worlds, these novels also incorporate philosophical reflection on their own means of representation, on their very status as fiction, on the power and limits of imaginative worldmaking. By studying these novels as cases of literary worldmaking, we will take the opportunity also to reflect critically in this class on the world that emerges—and the process of worldmaking that gets activated—in our very experience of studying these texts together. We will consider how cosmopolitanism, as a guiding ideal of the Enlightenment and post-Enlightenment university, may be renewed by literary study to help us inhabit a world of common humanity that is richer and more complex than is evident in particularist localisms or a satellite-view, techno-economic globalism. *Middlemarch* we will read in its entirety. For the sake of time, we will read, in David Hawkes’ translation, the 80-chapter version of *The Story of the Stone, or the Dream of the Red Chamber*, attributed to Cao Xueqin, instead of the 120-chapter version, with the last 40 chapters attributed to Gao E. If you can and wish to read the text in Chinese, please speak to Professor Sun about the option of scheduling extra discussion sessions

ENGL UN3033 THE EARLY CHAUCER. 3.00 points.**FILM BC3119 SCREENWRITING FUNDAMENTALS. 3.00 points.**

Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.

Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)

Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority. Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.) This course is ideal for writers of their FIRST, SECOND AND THIRD screenplays. The first several weeks will focus on STORY: What it is, what it isn't, how to recognize the difference. How to find your own individual stories that nobody else in the universe can tell. From there we will make the transition to the highly individualized techniques, the strengths and limitations, the dynamics of telling a SCREEN STORY; what to leave in, what to leave out. As Michelangelo puts it—starting with a block of marble and chipping away everything that isn't David. Through studies of existing screenplays and films in coordination with and hands-on writing exercises which we will share in class, we will develop our skills in all aspects of screenwriting; building fascinating characters, dialogue, story construction (The BIG PICTURE) and scene construction (The Small Picture) Perfection is not the goal; but rather it is to be able to say truly at the end of each day's writing, "I did the best I could with what I had at the time. Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.

Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)

Prerequisite: FILM BC3201 or equivalent. First priority enrollment is given to senior Film Studies majors/concentrations. For more information on this semester's visiting instructor from the Artemis Rising Foundation Filmmaker Fellowship Program, visit: <https://athenacenter.barnard.edu/arff> This screenwriting seminar provides students an in-depth understanding of the short form which will help them turn their ideas into a short film script (up to 10 pages in length). With a focus on studying contemporary international short films students will learn to write their own short screenplay, as well as learn to give and receive feedback and receive tips on revising their scripts. Homework assignments will include watching films, reading short stories, writing exercises and reading screenplays

FILM BC3201 INTRO FILM # MEDIA STUDIES. 3.00 points.

Prerequisites: Open to first-year students. We derive much of our information about the world from visual media. Social networks, television, cinema: all shape our aesthetic sensibilities and our political visions. Yet we often lack a basic understanding of what could be called "visual literacy." This introductory course gives students the critical tools to analyze how film and other visual media really work – in order to appreciate their artistic and social achievements, as well as to guard against their insidious manipulative devices. In the first part of the semester, we focus on film analysis through a detailed study of the different production phases of filmmaking – from screenwriting and mise-en-scène to editing and film scoring. We pay special attention to the way in which certain stylistic and narrative choices have particular ideological effects. The second part of the course looks at film history through a comprehensive, chronological overview of its main movements and periods, including the coming of sound in Hollywood cinema, post-war Italian Neorealism, the emergence of world auteurs, New Waves of the 1960s and 1970s, etc. Students will use the hermeneutical tools learnt in film analysis to intellectually engage with some masterworks of film history. In the third and final part of the semester, we study the major debates of film theory from perspectives such as auteurism, formalism, psychoanalysis, Marxism, feminism, postcolonial and queer studies, etc. Required screenings include *Nanook of the North* (Flaherty, 1922), *Sunrise* (Murnau, 1927), *Man with a Movie Camera* (Vertov, 1929), *Casablanca* (Curtiz, 1942), *Bicycle Thieves* (De Sica, 1948), *Rashomon* (Kurosawa, 1950), *Breathless* (Godard, 1960), *Belle de Jour* (Buñuel, 1967), *The Hour of the Furnaces* (Solanas, 1968), *Seven Beauties* (Wertmüller, 1974), *Blue Velvet* (Lynch, 1986), *Paris Is Burning* (Livingstone, 1990), and *Children of Men* (Cuarón, 2006)

THTR UN3150 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 1. 3.00 points.

Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the classical theatre through the early modern period to early romanticism; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to classical Athens, medieval cycle drama, the professional theatre of early modern England, the rival theatres of seventeenth century France and Spain, and eighteenth-century theatre in England and Germany; topics include the sociology of theatre, the impact of print on conceptions of performance, representing gender and race, and the dynamics of court performance. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors.

Environmental Biology

404 Altschul Hall
212-854-5618
212-854-5760 (fax)

Department Assistant: Catherine Cook

Mission

The mission of the Environmental Biology major is to provide students with an understanding of the structure, function and interrelationships of diverse living systems within the context of earth's changing environment. It addresses some of the most important issues of our time—climate change and declining biological diversity—and efforts to address these problems. To this end, students take courses in both the Environmental Science and Biology departments, including laboratory and field courses that help them learn how to design and test hypotheses, use modern scientific equipment, interpret data, and evaluate and solve problems. Students learn scientific communication skills by critiquing research articles, writing laboratory reports and research papers, and participating in oral presentations and debates.

Environmental Biology students are encouraged to become involved in research under the guidance of a faculty member at Barnard or elsewhere in New York City. Our urban setting, the proximity to the Hudson River, and the numerous affiliations we maintain with Columbia University through Lamont#Doherty Earth Observatory, the Earth Institute, and the School of Public Health, as well as Black Rock Forest, the American Museum of Natural History, and other institutions, allow us to offer undergraduates unparalleled opportunities for student research and educational experiences. Upon successful completion of our program, our students are well prepared to pursue successful careers in research, teaching or the allied health sciences. The Environmental Biology major is appropriate for students interested in careers as diverse as university-level research and teaching, curatorial work and research in natural history museums and parks,

environmental education, and decision-making in environmental policy, law, public health, and government agencies.

Student Learning Outcomes

- Discuss the structure, function, and interrelationships of key environmental systems: climate, earth, life
- Demonstrate an appreciation of the many different life forms on planet Earth
- Design and execute an independent scientific analysis, including the formulation of a testable hypothesis and assembling a logical chain of reasoning ranging from observation to inference
- Locate, integrate, and evaluate information from multiple and disparate sources
- Apply appropriate analytical and quantitative approaches including calculating statistics and displaying data to interpret relationships, trends and make predictions about past and future changes
- Resolve uncertain, complex problems in the lab and field
- Clearly communicate analyses, interpretations and significance through variable media: oral presentation, poster, proposal, research or review article, report

The program in Environmental Biology is jointly administered by the departments of Biology and Environmental Science, and students should maintain contact with the advisers in both departments. A major in Environmental Biology provides a strong background for students interested in the intersection of Biology and Environmental Science. The major is suitable for students who intend to pursue a research career in conservation biology, ecology, or environmental biology as well as for students interested in environmental law or policy. Students who elect the Environmental Biology major will enroll in introductory and advanced courses in Biology and Environmental Science and related fields. All Environmental Biology majors complete a senior essay either in the Biology or Environmental Science departments.

Students may substitute courses taught at Columbia (in the Departments of Biology, E3B, Earth and Environmental Sciences, or Statistics) or at other institutions with the prior approval of both major advisers. Students interested in Environmental Biology often choose to spend a semester abroad in the field. Courses completed in such programs may be accepted in fulfillment of some major requirements.

Students may also pursue an interdisciplinary program by electing a major in either Biology or Environmental Science and a minor in the other discipline, or by planning a double major.

There is no minor in Environmental Biology.

Advisers: Hilary Callahan (Biological Sciences), Paul Hertz (Biological Sciences), Brian Mailloux (Environmental Science), Krista McGuire (Biological Sciences), Martin Stute (Environmental Science)

Advice for the Environmental Biology Major

Adviser: Co-Chair, Brian Mailloux

Students may substitute courses taught at Columbia (in the Departments of Biology, Earth and Environmental Sciences, or Statistics) or at other institutions with the prior approval of both major advisers. Calculus, Physics, and a second year of Chemistry are

recommended for students planning graduate study in Environmental Biology.

Students interested in Environmental Biology often choose to spend a semester "abroad", at the [School for Field Studies](#) program, the [Organization for Tropical Studies](#), or at comparable programs offered by other institutions. We encourage students to take advantage of such opportunities, and we expect that most of the courses they complete in these programs will be accepted in lieu of some of the major requirements. In addition, we recommend that those students planning to go abroad in the junior year elect to do so in the Fall Semester rather than the Spring Semester in order to take best advantage of senior seminar research planning and programming.

Students who elect a major in Environmental Biology will have a major adviser in each department. Although one member of the faculty will serve as the primary adviser, requests to substitute courses from Columbia or other institutions must be approved by both major advisers.

Internships or some type of work or field experience are extremely valuable in preparing students for careers in the environment. Go to the Environmental Science website for [Opportunities & Affiliations](#) for listings or see [Beyond Barnard](#). Studies have shown that students who have had related work experience are more attractive to employers and graduate schools.

Students should check the catalogue and the department for additional information on the major and courses offered by Barnard and Columbia. Classes with grades less than C- or taken pass/fail can not be counted towards the major. The minimum number of course points for the Environmental Biology Major is 51.5 points.

See also Senior Research Seminar for information on senior thesis requirements completed in Environmental Science Department.

Cross-Listed Courses Biological Sciences (Barnard)

BIOL BC1500 INTRO ORGANISMAL/EVOL BIOL. 3.50 points.

Prerequisites: This course is suitable for majors & fulfillment of pre-health requirements. A high school biology background or equivalent preparation is highly recommended. For those without this background seeking to major in biology, BIOL BC1002 & BIOL BC1012 are recommended in the fall of their freshmen year, followed by the year-long 1500-level lecture & lab sequence. BIOL BC1500 & BIOL BC1502 do not have to be taken in a fall to spring sequence. Course suitable for fulfillment of premedical requirements. Detailed introduction to biological phenomena above the cellular level; development, anatomy, and physiology of plants and animals; physiological, population, behavioral, and community ecology; evolutionary theory; analysis of micro-evolutionary events; and systematics

Fall 2023: BIOL BC1500

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 1500	001/00345	M W F 9:00am - 9:50am 304 Barnard Hall	John Glendinning, Abigail Gutierrez, Henry Truong	3.50	221/220

BIOL BC1501 INTRO LAB/ORGANISMAL#EVOL BIO. 2.00 points.

Prerequisites: BIOL BC1500 lecture is a pre- or co-requisite (preferred). Students must also enroll for a section of BIOL BC1511 recitation. A high school biology background or equivalent preparation is highly recommended. This course is suitable for fulfillment of biology major and pre-health requirements. Enrollment is limited to 16 students per section.

A laboratory-based introduction to the major groups of living organisms; anatomy, physiology, evolution, and systematics; and laboratory techniques for studying and comparing functional adaptations

BIOL BC2240 PLANT EVOLUTION # DIVERSITY. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. Survey of plant biology emphasizing evolutionary and ecological perspectives on mating and reproduction, physiology, anatomy, and morphology.

Fall 2023: BIOL BC2240

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2240	001/00351	M W 11:40am - 12:55pm 903 Altschul Hall	Hilary Callahan	3.00	14/40

BIOL BC2262 Vertebrate Biology. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503 or the equivalent.

Systematic survey of the Phylum Chordata: fossil history, biogeography, systematics, natural history, body architecture, energetics, locomotion, feeding, and behavior.

BIOL BC2272 ECOLOGY. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent. This course is a pre- or co-requisite for BIOL BC2873 Laboratory in Ecology.

The definition of ecological problems in experimentally tractable ways; the design of experiments and analysis of ecological data; class projects on population ecology. Students conduct individual projects during last month of term

Spring 2024: BIOL BC2272

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 2272	001/00570	M W 10:10am - 11:25am 805 Altschul Hall	Emlyn Resetarits	3.00	5/40

BIOL BC2286 Statistics and Research Design. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent, college-level algebra or the equivalent. General Educational Requirement: Quantitative and Deductive Reasoning (QUA) Introduction to basic principles of statistics and experimental design. Topics include common statistical procedure, analysis of data, sampling populations, power analysis, and the design of experiments. This course differs from traditional statistics courses by explicitly integrating statistics into research process.

BIOL BC2873 Laboratory in Ecology. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: BIOL BC2272 (which can be taken as a pre- or co-requisite). Enrollment is limited to 16; must attend first lab to hold place.

The definition of ecological problems in experimentally tractable ways; the design of experiments and analysis of ecological data; class projects on population ecology. Students conduct individual projects during last month of term.

BIOL BC3320 MICROBIOLOGY. 3.00 points.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503, and BIOL BC2100 or the equivalent. This course is a pre-requisite for BIOL BC3321 Laboratory in Microbiology.

Prerequisites: BIOL BC1500, BIOL BC1501, BIOL BC1502, BIOL BC1503 or the equivalent, and BIOL BC2100. Survey of the diversity, cellular organization, physiology, and genetics of the major microbial groups. Also includes aspects of applied microbiology and biotechnology, the function of microorganisms in the environment, and the role of microbes in human diseases

Fall 2023: BIOL BC3320

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3320	001/00361	T Th 10:10am - 11:25am 903 Altschul Hall	Stephen Sturley	3.00	40/45

BIOL BC3591 GUIDED RESEARCH # SEMINAR. 4.00 points.

Per Semester

The introductory biology sequence is a pre-requisite for this yearlong course (BIOL BC1500, BIOL BC1501, BIOL BC1502, and BIOL BC1503). An independent research project in Biology under the guidance of a faculty member and suiting the needs of the individual student. A Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in this year-long course. A Project Approval Form must be submitted to the department in the fall. Attendance at a weekly seminar is required. By the end of the year, students enrolled in BIOL BC3591-BIOL BC3592 will write a scientific paper and give a poster presentation of their work at the Barnard Biology Research Symposium. Completion of this year-long course fulfills two upper-level laboratory requirements for the major. Must be taken in sequence, beginning in the fall

Fall 2023: BIOL BC3591

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
BIOL 3591	001/00370	M 1:10pm - 3:00pm 308 Diana Center	Jessica Goldstein, Alison Pischedda, Jordan Balaban	4.00	10/9

BIOL BC3593 SENIOR THESIS RESEARCH # SEMINAR. 4.00 points.

Per Semester

Prerequisites: Permission of a faculty sponsor and the department. Cannot be taken concurrently with BIOL BC3591 or BIOL BC3592. Same as BIOL BC3591-BIOL BC3592, including attendance at a weekly seminar. By the end of the year, students enrolled in BIOL BC3593-BIOL BC3594 will write a scientific paper and orally present their work at the Barnard Biology Research Symposium. A Barnard research mentor (if your lab is at Barnard) or internal adviser in the Biology Department (if your lab is elsewhere) must approve your planned research before you enroll in this year-long course. A Project Approval Form must be submitted to the department in the fall. Completion of this year-long course fulfills the senior capstone requirement for the major; it cannot be taken at the same time as BIOL BC3591-BIOL BC3592. Must be taken in sequence, beginning in the fall

CHEM BC2002 General Chemistry II. 5 points.

Not offered during 2023-2024 academic year.

Prerequisites: CHEM BC2001 or permission of the instructor. Students who have completed CHEM BC3230 or its equivalent may not subsequently receive credit toward the degree for CHEM BC2002. Lecture: TuTh 8:40-9:55; Lab lecture and laboratory: M 1:10-5:00. Corequisites: Counts towards Lab Science requirement. Kinetics and mechanisms of chemical reactions; nuclear chemistry and radioactivity; atomic and molecular structure; selected topics in environmental chemistry, atomic, organic chemistry, and biochemistry.

CHEM BC3230 ORGANIC CHEMISTRY I-LEC. 3.00 points.

Prerequisites: CHEM BC2001 or equivalent. Credit will not be given for any course below the 3000 level after completing CHEM BC3230 or its equivalent. Lecture: MWF 10:00 - 10:50 AM
Corequisites: With lab, counts towards Lab Science requirement. Prerequisites: CHEM BC2001 or equivalent. Credit will not be given for any course below the 3000 level after completing CHEM BC3230 or its equivalent. Corequisites: With lab, counts towards Lab Science requirement. Atomic and molecular structure; stereochemistry of organic molecules; introduction to organic reactions, reaction mechanisms, and synthesis

Environmental Science (Barnard)

EESC V2100 Earth's Environmental Systems: Climate. 4.5 points.

BC: Partial Fulfillment of General Education Requirement: Laboratory Science (SCI)., BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA)., Lab Required

Prerequisites: High school algebra. Recommended preparation: High school chemistry/physics, and one semester college science. Enrollment limited.

Studies formation of winds, storms, and ocean currents. Recent influence of human activity: global warming, and climate change. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling.

EESC V2200 Earth's Environmental Systems: Solid Earth. 4.5 points.

BC: Partial Fulfillment of General Education Requirement: Laboratory Science (SCI)., Lab Required

Studies plate tectonics: Origin and development of continents, ocean basins, mountain systems on land and sea. Earthquakes, landslides, volcanoes, diamonds, oil. Land-use planning for resource development and conservation. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling.

EESC BC3014 Field Methods in Environmental Science. 3 points.

Prerequisites: Enrollment limited. Five required field trips that take a substantial portion of the day.

Problem-oriented, hands-on approach emphasizing the tools, techniques, and observational skills necessary for the understanding of forest ecology and deer management. Field and laboratory work as well as data analysis and interpretation. Field Methods utilizes the outdoor resources of the Hudson River Valley, especially the forest environment at Black Rock Forest, a 4,000-acre preserve near Cornwall, N.Y.

EESC BC3016 ENVIRONMENTAL MEASUREMENTS. 3.00 points.

Prerequisites: Enrollment limited. Required field trip on first Friday of the semester.

Prerequisites: Enrollment limited. Required field trip on first Friday of the semester. Hands-on approach to learning environmental methods. Students take a one-day cruise on the Hudson River to collect environmental samples. These samples are then analyzed throughout the semester to characterize the Hudson River estuary. Standard and advanced techniques to analyze water and sediment samples for nutrients and contaminants are taught

Fall 2023: EESC BC3016

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 3016	001/00748	T Th 10:10am - 12:00pm 405 Altschul Hall	Brian Mailloux	3.00	14/14

EESC BC3017 ENVIRONMENTAL DATA ANALYSIS. 3.00 points.

Prerequisites: One year of college science or EESC V2100 or permission of the instructor.

Prerequisites: One year of college science or EESC V2100 or permission of the instructor. Acquisition, analysis, interpretation, and presentation of environmental data, assessment of spatial and temporal variability. Focus on water quality issues and storm surges. Uses existing and student-generated data sets. Basic principles of statistics and GIS, uses standard software packages including EXCEL and ArcGIS. Includes a half-day field trip on a Saturday or Sunday. General Education Requirement: Quantitative and Deductive Reasoning (QUA)

Fall 2023: EESC BC3017

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
EESC 3017	001/00555	T Th 2:10pm - 4:00pm 222 Milbank Hall	Elizabeth Cook	3.00	16/20

EESC BC3025 HYDROLOGY. 3.00 points.

Prerequisites: EESC V2100, physics, or permission of instructor. Includes a weekend field trip. Alternate years. Hands-on study and discussion of the basic physical principles of the water cycle (evaporation, condensation, precipitation, runoff, and subsurface flow), as well as environmentally relevant applications based on case studies. Special focus on the New York City area, the arid Southwest, and the developing world. Coverage of contemporary global water resources issues, including pollution control, sustainable development, and climate change. General Education Requirement: Quantitative and Deductive Reasoning (QUA)

EESC BC3800 ENVIR SCIENCE SENIOR SEMINAR. 3.00 points.

Enrollment limited to senior majors (juniors with the instructor's permission). Provides credit for the senior thesis. The Senior Research Seminar can be taken Spring/Fall or Fall/Spring sequence.

Guided, independent, in-depth research culminating in the senior thesis in the spring. Includes discussion about scientific presentations and posters, data analysis, library research methods and scientific writing. Students review work in progress and share results through oral reports. Weekly seminar to review work in progress and share results through oral and written reports

Mission

Barnard College's Environmental Science Department provides highly motivated young women with challenging and rewarding programs

in Environmental Science, Environmental Biology, and Environmental Policy. High academic standards, multidisciplinary courses, and training in methodologies such as field work, measurements, and data analysis, ready our students with the tools needed to think critically, evaluate and solve problems, and understand and communicate science to address the needs of society. Faculty members are nationally and internationally recognized scholars and educators, active in research and curriculum development. Courses are innovative, featuring multimedia and technologically advanced resources. The urban setting, the proximity to the Hudson River, and the numerous affiliations we maintain with Columbia University through Lamont-Doherty Earth Observatory, the Earth Institute, and the School of Public Health, as well as Black Rock Forest, the American Museum of Natural History and other institutions, allow us to offer undergraduates unparalleled opportunities for student research and educational experiences. Upon successful completion of our program, our students are well prepared to continue their academic studies as graduate students or to pursue successful careers in a wide range of fields.

Student Learning Outcomes

We expect that students graduating with an environmental major will learn to:

- recognize the history, structure, function, interactions, and trends of key environmental systems: climate, earth, life, socio#political;
- assemble a logical chain of reasoning ranging from observation to inference and action, not only to identify and characterize a problem, but also to find solutions:
 - design an independent scientific inquiry, from methods to interpretation;
 - locate, organize, analyze, integrate, synthesize, and evaluate complex information from multiple and disparate sources;
- apply appropriate analytical and quantitative approaches:
 - organize, visualize, and statistically analyze environmental data, and interpret relationships, trends and make predictions about future changes;
- handle uncertain, complex, real-world problems in the lab, field, community, and workplace:
 - observe analytically and integrate diverse information from variable sources outside of the classroom;
 - think critically, creatively, resourcefully, and strategically, including identifying steps needed to reach goals, manage projects, evaluate progress, and adapt approaches, developing both self reliance, and civic-mindedness;
 - develop spatial literacy, understand the role of maps and 2-3 dimensional spatial systems; effectively process, reason, problem solve and communicate issues within a spacial context;
- utilize advances in environmental sciences and technology to resolve issues and anticipate implications;
- clearly communicate complex analyses, interpretations and significance through variable media (oral presentation, poster, proposal, research article, report), to audiences ranging from scientific to policy, and the general public;
- collaborate in teams, with peers and mentors, and work with others in diverse group settings, developing flexibility and leadership skills.

Environmental Science provides a scientific basis for management of earth systems. It focuses on the interaction between human

activities, resources, and the environment. As human population grows and technology advances, pressures on earth's natural systems are becoming increasingly intense and complex. Environmental Science is an exciting field where science is used to best serve society. The department offers two majors, Environmental Science and Environmental Policy. A third major, Environmental Biology, is offered in conjunction with the Department of Biological Sciences.

The curriculum recognizes the need for well-trained scientists to cope with balancing human requirements and environmental conservation. Majors acquire an understanding of earth systems by taking courses in the natural sciences, as well as courses investigating environmental stress. Students learn to critically evaluate the diverse information necessary for sound environmental analysis. Our courses foster an interdisciplinary approach to environmental problem-solving.

Internships or some type of work or field experience are extremely valuable in preparing students for a career in Environmental Science. We strongly encourage students to consider an internship in the summer before the senior year because it may lay the foundation for the senior thesis. Studies have shown that students who have had related work experience are more attractive to employers and graduate schools.

Students interested in environmental science might want to consider a semester or summer program at the [SEE-U](#), [SEA Semester at Woods Hole](#), the [School for Field Studies](#), the [Organization for Tropical Studies](#), or some other field program. In addition, we recommend that those students planning to go abroad in the junior year elect to do so in the Fall Semester rather than the Spring Semester in order to take best advantage of senior seminar research planning and programming.

Students wishing to go on to graduate school or careers in earth science and the physical sciences should take at least two semesters each of calculus, physics, and chemistry. Those considering graduate school or careers in biological/chemical fields are recommended to take calculus as well as upper-level courses in biology and chemistry, and may wish to consider enrolling in an Environmental Biology major or minors in these fields. Students interested in pursuing further work in environmental policy, economics, environmental law, journalism, or teaching may consider enrolling in an Environmental Policy major or pursuing a double major, a special major, or a major/minor combination in relevant fields.

Requirements for the Environmental Science Major

For requirement details, see [Environmental Science Major Worksheet](#), on the [Environmental Science Major page](#).

Part A

The following four courses with labs:

EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST	4.5
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH	4.5
CHEM BC2001	GENERAL CHEMISTRY I	5.00
BIOL BC1500 - BIOL BC1501 or EESC UN2300	INTRO ORGANISMAL/EVOL BIOL and INTRO LAB/ORGANISMAL#EVOL BIO EARTH'S ENVIRO SYST: LIFE SYST	4.5-5.5

*Students may NOT receive credit for BOTH BIOL BC1500, 1501 AND EESC UN2300.

Part B

Select two courses:

CHEM BC3230	ORGANIC CHEMISTRY I-LEC	3
CHEM BC3328	INTRO ORGANIC CHEMISTRY-LAB (recommended)	
CHEM BC2002	General Chemistry II	5
CHEM BC3231	ORGANIC CHEMISTRY II-LEC	3
BIOL BC1502	INTRO CELL AND MOLECULAR BIOL	3
BIOL BC1503	INTRO LAB CELLULAR#MOLEC BIO (recommended)	
PHYS V1201	General Physics I	3
PHYS V1202	General Physics II	3
PHYS BC2001	MECHANICS - LECTURE LAB	4.5
PHYS BC2002	ELECTRICITY#MAGNETISM-LEC LAB	4.5
PHYS BC3001	CLASSICAL WAVES - LECTURE LAB	5

Part C

Select two courses in calculus, statistics, data analysis, and/or economics

MATH UN1101	CALCULUS I (or other Calculus class)	3
MATH UN1102	CALCULUS II (or other Calculus class)	3
EESC BC3017	ENVIRONMENTAL DATA ANALYSIS (or other statistical or data analysis class)	3
ECON BC1003 or ECON UN1105	INTRO TO ECONOMIC REASONING PRINCIPLES OF ECONOMICS	3

Part D

Select four electives courses. For details, see Environmental Science Major Worksheet on the departmental website (link above).

Advice for the Environmental Science Major

Adviser: Co-Chair, Brian Mailloux

Students with a strong science background who are interested in majoring in Environmental Science are advised to take EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST early on, followed by EESC UN2200 EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH. These two courses are required for all Environmental Science majors.

If you are interested in exploring Environmental Science or are concerned about your science background, you could take EESC BC1001 Environmental Science I in the fall. In the spring, you can shift into the major sequence of EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST.

EESC BC1001 Environmental Science I may be taken as a major elective*, however, the course must be completed prior to taking EESC UN2100, UN2200 or UN2300.

We recommend that Environmental Science majors take CHEM BC2001 GENERAL CHEMISTRY I and BIOL BC1500 INTRO ORGANISMAL/ EVOL BIOL, plus the corresponding lab, BIOL BC1501 INTRO LAB/ ORGANISMAL#EVOL BIO, early in their academic career at Barnard in order to prepare for upper level courses with prerequisites. Students with concerns about their science preparation should not take both at the same time. If you want advice on taking an Introductory Biology course, visit [Biology](#), and for advice on taking an Introductory Physics course, visit [Physics](#).

Students should check the catalogue and the department for additional information on the major, minor and courses offered by Barnard and Columbia. Classes with grades less than C- or taken pass/fail can not be counted towards the major. The minimum number of course points for the Environmental Science Major is 48.5 points.

See also Senior Research Seminar for information on senior thesis requirements.

Requirements for the Environmental Science Minor

Students wishing to minor in Environmental Science should have a plan approved by the Environmental Science Department Minor Advisor, [Sedelia Rodriguez](#) by the end of their junior year.

5 courses are required, meeting the following criteria:

- At least 3 of the 5 courses taken at Barnard/Columbia
- 1 laboratory science course
- 4 electives
 - 3 credits per course or higher
 - 3 courses at 3000 level or above
 - At least 2 courses based in the natural sciences

Elective courses listed below may be substituted only with the approval of the Minor Advisor and complete an [Environmental Science Minor Worksheet](#). Please note that many of the courses below are not offered every year.

Select one laboratory science course (with corresponding labs) from the following:		9
EESC BC1001	Environmental Science I	4.5
EESC UN1011	Earth: Origin, Evolution, Processes, Future	4
EESC UN2100	EARTH'S ENVIRO SYST: CLIM SYST	4.5
EESC UN2200	EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH	4.5
EESC UN2300	EARTH'S ENVIRO SYST: LIFE SYST (students must enroll in the corresponding LAB course, EESC UN2310.)	4.5

Select at least two Natural Science Electives:

BIOL BC2272	ECOLOGY	3
BIOL BC3320	MICROBIOLOGY	3
EAEE E2002	ALTERNATIVE ENERGY RESOURCES	3
EEEB UN3087	CONSERVATION BIOLOGY	3
EESC BC3001	CONSERVATION AND PRESERVATION	3
EESC BC3012	BROWNFIELDS	3
EESC BC3013	SHORELINES AND STREAMS	3

EESC BC3014	Field Methods in Environmental Science	3
EESC BC3016	ENVIRONMENTAL MEASUREMENTS	3
EESC BC3017	ENVIRONMENTAL DATA ANALYSIS	3
EESC BC3021	FORESTS AND ENVIRONMENTAL CHANGE	4
EESC BC3023	The Hudson: The Estuary, The River, and Our Environment	3
EESC BC3025	HYDROLOGY	3
EESC BC3026	BIRD, PLANT #LAND-USE DYNAMICS	3
EESC BC3032	Agricultural and Urban Land Use: Human-Environment Interactions	4
EESC BC3033	Waste Management	3
EESC BC3043	Water, Sanitation, and Health	3
EESC BC3050	BIG DATA WITH PYTHON	3
EESC UN1600	EARTH RESOURCES # SUSTAIN DEV	3
EESC UN2330	SCIENCE FOR SUSTAINABLE DEVPT	3
PUBH UN3100	FUNDAMENTALS OF GLOBAL HEALTH	3
SDEV UN3390	GIS FOR SUSTAINABLE DEVELOPMNT	3
SDEV UN3450	SPATIAL ANALYSIS FOR SDEV	3
URBS UN3200	Spatial Analysis: GIS Methods and Urban Case Studies	4

Minors in Environmental Science are required to complete five courses, each of which should be three credits or above, and at least three of the five courses must be taken at Barnard/Columbia. Of the four electives, two courses must be based in the natural sciences and three courses must be at 3000 level or above. (For Electives for the Environmental Science Minor, please see link for Minor Requirements Worksheet above. Any substitutions must have the approval of the Minor Advisor.) 9

Students wishing to minor in Environmental Science who are interested in field programs and seek minor credit must contact [Sedelia Rodriguez](#). The only current field program within Columbia University is SEE-U.

There is currently no minor in Environmental Biology or Environment and Sustainability.

Environment and Sustainability Major

Sustainability is a growing field focusing on finding solutions in an ever-changing environment. Majors develop an understanding of the processes and stresses of earth's systems, handle environmental data and make reasoned assessments, and engage in collaborative and interdisciplinary work required for developing approaches to maintain a sustainable environment.

The Environment and Sustainability major is designed to equip students to play effective roles as citizens or career professionals who can actively engage in environmental decision-making and policy in a rapidly changing environment. Majors learn to analyze and evaluate environmental, political, and economic systems and public policies in the context of environmental concerns, and to use these interdisciplinary skills to navigate development with the environment in mind. The major begins with foundations in the natural sciences, social sciences, and quantitative analysis, followed by upper level electives in both the natural and social sciences, as is a required hands-on, client-based collaborative workshop at the junior level is required. Many exciting opportunities for student research exist on this campus and in the greater metropolitan community.

Environment and Sustainability as did Policy graduates will go on to a variety of careers, including national and international environmental policy, law, economics, journalism, business, public administration, government agencies, corporations, multilateral institutions, nongovernmental organizations, academia, and consulting firms. There is no minor in Environment and Sustainability.

Advice for the Environment and Sustainability Major

Advisers: Co-Chair, Martin Stute

Because this Major was approved by the Faculty in Fall 2017 as a updated replacement for the Environmental Policy, any student may elect the Environment and Sustainability major, but only students in the Class of 2019 or 2018 can graduate with a major in Environmental Policy because it is being phased out.

Students with a strong science background who are interested in majoring in Environment and Sustainability are advised to take Earth's Environmental Systems: Climate (EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST).

If you are interested in exploring Environment and Sustainability or are concerned about your science background, you could take EESC BC1001 Environmental Science I in the fall. In the spring, you would need to find another introductory level Environmental Science course such as EESC UN1011, Earth, Origin, Evolution, Processes, Future (with Lab) or shift into the major sequence of EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST which is a Natural Science Foundation course. Please also note the following:

For the second Natural Science Foundation course requirement can be fulfilled by Majors in Environment and Sustainability with either CHEM BC2001, General Chemistry or EESC BC3016x, Environmental Measurements along with either another Additional Science Foundations Course or a Quantitative Foundations Analysis/Skills course. There are a few options to fulfill the 3rd Natural Foundation course requirements, so see above or the Environment and Sustainability Major Requirement Worksheet, [envsustworksheet.doc](#) for more specifics.

We recommend that Environment and Sustainability majors take CHEM BC2001 GENERAL CHEMISTRY I and BIOL BC1500 INTRO ORGANISMAL/EVOL BIOL plus the corresponding lab, BIOL BC1501 INTRO LAB/ORGANISMAL#EVOL BIO, early in their academic career at Barnard in order to prepare for upper level courses with prerequisites, but it is not recommended that they be taken concurrently. Students with concerns about their science preparation should realize the option of taking EESC BC2016, Environmental Measurements (plus the additional course). If you want advice on taking an Introductory Biology course, visit [Biology](#) (p. 145), and for advice on taking an Introductory Physics course, visit [Physics](#) (p. 456).

Students should check the catalogue and the department for additional information on the major, minor and courses offered by Barnard and Columbia. Classes with grades less than C- or taken pass/fail can not be counted towards the major. The minimum number of course points for the Environment and Sustainability Major is 47.5 points.

EESC BC1001 Environmental Science I. 4.5 points.

Prerequisites: Prerequisites: Enrollment limited. Students must also sign up for the corresponding lab course, EESC BC1011 to receive credit. Note BC1001 is not required for an environmental policy major. This class examines the basic principles of environmental science using current local and global environmental news as case studies. Issues covered are climate change, invasive species, water resources, sustainability, etc. A major goal is for students to understand the science behind environmental issues. Readings from the scientific literature, various newspaper articles, magazines and an online textbook are carefully coordinated with the topics. Because of our location, the lab curriculum features studies of the Hudson River and its forested shorelines. The lab is closely paired with the lecture and features hands-on and inquiry-based lab and field studies of statistics, data presentation, writing in the format of a scientific paper, data collection (on land and on the Hudson River), water chemistry, microbiology, microscopic and macroscopic life in the river, birds and plants in Riverside Park, biodiversity on a green roof, local geology, topographical maps, compass use, and museum studies. Students must also register for one of the eight lab sections EESCX1011. Students must take both lecture and lab.

EESC BC1007 Earth and Environmental Science in Today's World. 3.00 points.

In responding to the environmental issues we face today, it is critical to recognize the science behind them. This course will teach students the basic concepts in earth science/geology essential to understanding the mechanisms of our current climate crisis. These foundational concepts are crucial for any student who is interested in not only the natural sciences, but for those who wish to pursue careers related to environmental justice, sustainability, and other social science fields. Students will explore how and where natural resources form, as well as how we are rapidly depleting these reserves. Students will also learn about natural disasters and how these affect certain communities more than others. Students will gain an understanding of the formation of rocks and minerals and their economic significance. Students will be able to use the cumulative knowledge they gained during the first weeks of class to have a better understanding of the global climate issues we face and to use this information to conduct presentations on an environmental topic of their choice. The format of the course will be as follows: Primarily lecture, followed by class discussions, group activities and at least one lab component

EESC UN2100 EARTH'S ENVIRO SYST: CLIM SYST. 4.50 points.

Prerequisites: high school algebra. Recommended preparation: high school chemistry and physics; and one semester of college science.

Origin and development of the atmosphere and oceans, formation of winds, storms and ocean currents, reasons for changes through geologic time. Recent influence of human activity: the ozone hole, global warming, water pollution. Laboratory exploration of topics through demonstrations, experimentation, computer data analysis, and modeling. Students majoring in Earth and Environmental Sciences should plan to take EESC W2100 before their senior year to avoid conflicts with Senior Seminar

EESC UN2200 EARTH'S ENVIRONMENTAL SYSTEMS: THE SOLID EARTH. 4.50 points.

CC/GS: Partial Fulfillment of Science Requirement

Priority given to Columbia and Barnard earth science, environmental science, and environmental biology majors should enrollment limits be necessary.

Prerequisites: high school algebra and chemistry. Recommended preparation: high school physics.

Recommended preparation: high school chemistry and physics; and one semester of college science. Exploration of how the solid Earth works, today and in the past, focusing on Earth in the Solar system, continents and oceans, the Earth's history, mountain systems on land and sea, minerals and rocks, weathering and erosion, glaciers and ice sheets, the hydrological cycle and rivers, geochronology, plate tectonics, earthquakes, volcanoes, energy resources. Laboratory exploration of topics through examination of rock samples, experimentation, computer data analysis, field exercises, and modeling. Columbia and Barnard majors should plan to take W2200 before their senior year to avoid conflicts with the Senior Seminar

EESC UN2300 EARTH'S ENVIRO SYST: LIFE SYST. 4.50 points.

CC/GS: Partial Fulfillment of Science Requirement

Priority given to Columbia and Barnard earth science, environmental science, and environmental biology majors should enrollment limits be reinstated.

Prerequisites: high school algebra. Recommended preparation: high school chemistry and physics.

Prerequisites: high school algebra. Recommended preparation: high school chemistry and physics. Role of life in biogeochemical cycles, relationship of biodiversity and evolution to the physical Earth, vulnerability of ecosystems to environmental change; causes and effects of extinctions through geologic time (dinosaurs and mammoths) and today. Exploration of topics through laboratories, data analysis, and modeling. REQUIRED LAB: EESC UN2310. Students will be expected to choose a lab section during the first week of class from the options listed in the Directory of Classes. Co-meets with EEEB 2002

EESC BC3001 CONSERVATION AND PRESERVATION. 3.00 points.

Conservation and preservation is an interdisciplinary study of earth materials, their transformation into art objects and architectural structures, and the philosophy and analytical techniques required to prepare conservation and preservation strategies for these objects and structures. The course is Beyond Barnard being hands-on and field trip oriented with a focus on the Metropolitan Museum of Art and local geology and infrastructure

EESC BC3012 BROWNFIELDS. 3.00 points.

Prerequisites: One college level science course or permission of the instructor. Anyone who has taken EESC BC1002 Introduction to Environmental Science cannot take this course.

Prerequisites: One college level science course or permission of the instructor. Anyone who has taken EESC BC1002 Introduction to Environmental Science cannot take this course. Brownfields considers interconnections between groundwater contamination, toxics, human health, government, economics, and law using the award-winning interactive learning simulation Brownfield Action, Through a semester-long, laboratory exploration of a simulated brownfield, students engage in an environmental site assessment and development of a plan for remediation and revitalization

EESC BC3013 SHORELINES AND STREAMS. 3.00 points.

Prerequisites: Enrollment limited. Four required field trips that take a substantial portion of the day.

Prerequisites: Enrollment limited. Four required field trips that take a substantial portion of the day. An interdisciplinary study of shoreline processes, the larger ecosystems of which they are a part, and the geologic events and human impacts that have brought them through time to their current state. A problem-oriented, field-methods course, providing hands-on experience with tools and observational methods in a variety of outdoor environments. Involves sampling and measurement techniques for rocks and minerals, fossils, water, soil, flora, and fauna, as well as field and laboratory work, data interpretation and analysis, and the creation of a sample collection. Emphasis on the writing process through the reading of Rachel Carsons The Edge of the Sea, a daylong field trip to Montauk Point, and the writing of a term essay on the natural history and origin of a grain of garnet found at the top of the dune at Napeague Bay

EESC BC3014 Field Methods in Environmental Science. 3 points.

Prerequisites: Enrollment limited. Five required field trips that take a substantial portion of the day.

Problem-oriented, hands-on approach emphasizing the tools, techniques, and observational skills necessary for the understanding of forest ecology and deer management. Field and laboratory work as well as data analysis and interpretation. Field Methods utilizes the outdoor resources of the Hudson River Valley, especially the forest environment at Black Rock Forest, a 4,000-acre preserve near Cornwall, N.Y.

EESC BC3016 ENVIRONMENTAL MEASUREMENTS. 3.00 points.

Prerequisites: Enrollment limited. Required field trip on first Friday of the semester.

Prerequisites: Enrollment limited. Required field trip on first Friday of the semester. Hands-on approach to learning environmental methods. Students take a one-day cruise on the Hudson River to collect environmental samples. These samples are then analyzed throughout the semester to characterize the Hudson River estuary. Standard and advanced techniques to analyze water and sediment samples for nutrients and contaminants are taught

Prerequisites: One year of college science or EESC V2100 or permission of the instructor.

Prerequisites: One year of college science or EESC V2100 or permission of the instructor. Acquisition, analysis, interpretation, and presentation of environmental data, assessment of spatial and temporal variability. Focus on water quality issues and storm surges. Uses existing and student-generated data sets. Basic principles of statistics and GIS, uses standard software packages including EXCEL and ArcGIS. Includes a half-day field trip on a Saturday or Sunday. General Education Requirement: Quantitative and Deductive Reasoning (QUA)

Fall 2023: EESC BC3017

EESC BC3019 Energy Resources. 3 points.

Energy Resources utilizes the physical plant of Barnard and Columbia to involve students in a semester long real-life policy study that explores the interconnections between energy resources and sustainable energy efficiency. Students work collaboratively as a team and interface with college faculty, administration, staff and student organizations to produce and disseminate a professional level policy report describing existing usage of energy, analyzing where change is needed.

EESC BC3023 The Hudson: The Estuary, The River, and Our Environment. 3 points.

An interdisciplinary study of the relationship between ecosystem function and sustainable human habitation for one of the great rivers of the world. Topics include: geological origins, the watershed, basic hydrology, and estuarine dynamics; habitats and plants, energy flow, and nutrient dynamics; the invertebrates; fishes, fisheries, and other animals; water quality, water supply, and sewage treatment; sediment dynamics and PCBs; colonization and revolution; industrialization and transformation of the landscape; the Storm King controversy, conservation and environmentalism

EESC BC3025 HYDROLOGY. 3.00 points.

Prerequisites: EESC V2100, physics, or permission of instructor. Includes a weekend field trip. Alternate years. Hands-on study and discussion of the basic physical principles of the water cycle (evaporation, condensation, precipitation, runoff, and subsurface flow), as well as environmentally relevant applications based on case studies. Special focus on the New York City area, the arid Southwest, and the developing world. Coverage of contemporary global water resources issues, including pollution control, sustainable development, and climate change. General Education Requirement: Quantitative and Deductive Reasoning (QUA)

EESC BC3026 BIRD, PLANT #LAND-USE DYNAMICS. 3.00 points.

Prerequisites: Enrollment limited to 12 students. Permission of the instructor required.

Prerequisites: Enrollment limited to 16 students. One year of college-level science. Primarily for Environmental Majors, Concentrators and Minors. This class looks at the response of wildlife (birds and plants) to climate change and land-use issues from the end of the last glaciation to the present. Case study topics are: (1) land-use and climate change over time: a paleoenvironmental perspective, (2) environmental transformations: impact of invasive plants and birds and pathogens on local environments and (3) migration of Neotropical songbirds between their wintering and breeding grounds: land-use, crisis and conservation. We visit wildlife refuges along a rural-suburban-urban gradient in order to observe and measure the role refuges play in conservation. Format: lecture, student presentations, short labs, data collection/analysis and field trips (some on a weekend day in April in place of the week day meeting)

EESC BC3027 Urban Ecosystems. 3.00 points.

Urban Ecosystems will cover scientific principles, concepts, and methodologies required to understand complex systems and the natural and social-ecological relationships at work in cities. You will learn the basics of ecological process and patterns of ecosystems especially applied in cities, understand how humans interact with and impact ecological processes and patterns in cities, and explore approaches for dealing with current and future urban challenges.

Format: Lecture, discussion, small group work, field trips

EESC BC3028 Volcanoes and the Environment. 3.00 points.

This course seeks to impart students with knowledge of volcanic eruptions on Earth and the effects on the environment as a whole. The course will focus on the physical mechanisms responsible for eruptions, the effects eruptions have on humans and other living organisms, as well as the environment. The course will investigate how eruptions have contributed to global climate change. The course will also look at the positive effects volcanoes have had on Earth, such as providing nutrient rich soils for growing crops and providing renewable geothermal energy—a cleaner energy resource. Format: lecture, field trip, data collection and analysis, student presentations

EESC BC3032 Agricultural and Urban Land Use: Human-Environment Interactions. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Prerequisites: One year of college science or permission of instructor. Alternate years.

Human transformation of the terrestrial environment since Paleolithic times. Biophysical processes involved in human-environment interactions. Guidelines for sustainable agricultural and urban development using present and past examples of environmental use and abuse. *General Education Requirement: Cultures in Comparison (CUL).*

EESC BC3033 Waste Management. 3 points.

Alternate years.

Project-oriented study of waste management issues and policy. Cradle-to-grave analysis of product and waste streams. Analysis of municipal solid waste, landfills, incineration, recycling, sewage waste and sewage treatment.

EESC BC3040 ENVIRONMENTAL LAW. 3.00 points.

Process-oriented introduction to the law and its use in environmental policy and decision-making. Origins and structure of the U.S. legal system. Emphasis on litigation process and specific cases that elucidate the common law and toxic torts, environmental administrative law, and environmental regulation through application and testing of statutory law in the courts. Emphasis also on the development of legal literacy, research skills, and writing

EESC BC3043 Water, Sanitation, and Health. 3 points.

This course focuses on understanding water, sanitation and health in the developing world and how these factors interact to affect people's lives. Specifically, what are the options for providing cleaner water and improved sanitation in order to reduce the incidence of waterborne diseases in the developing world?

EESC BC3045 Responding to Climate Change. 3 points.

Prerequisites: One of the following courses that introduces the structure and functioning of the climate system and processes underlying climate change: EESC V1002, Climate and Society: Case Studies; EESC V2100 Earth's Environmental Systems: Climate; EESC W2330, Science of Sustainable Development; or EAEE E1100, A Better Plant by Design.

Analysis of climate change adaptations, responses, and mitigation options. Consideration of impacts of projected climate changes including global water, food and health complemented by regional case studies. Scientific, technologic, economic, political, and behavioral aspects of potential solutions.

EESC BC3050 BIG DATA WITH PYTHON. 3.00 points.

Big Data is changing how we interact with and understand the environment. Yet analyzing Big Data requires new tools and methods. Students will learn to use Python programming to analyze and visualize large environmental and earths systems data sets in ways that Excel is not equipped to do. This will include both time series and spatial analyses with programming occurring interactively during class and assignments designed to strengthen methods and results. Students will learn to write code in Python, plot, map, sub-select, clean, organize, and perform statistical analyses on large global scale data sets, using the data in analysis, and take any data set no matter how large or complicated

EESC BC3200 Ecotoxicology. 3 points.**Not offered during 2023-2024 academic year.**

Prerequisites: CHEM BC1601, BIOL BC2002, or permission of instructor. Alternate years.

The study of anthropogenic contaminants within our natural environment and their subsequent effects on biological organisms. Effects to be examined: the molecular scale (biochemical pathways of metabolism and detoxification), the organismal scale (target organs, behavioral effects), and the ecosystem scale (species viability). Lectures and hands-on activities are used to teach the material.

EESC BC3300 WORKSHOP SUSTAINABLE DEVEL. 4.00 points.

Students address real-world issues in sustainable development by working in groups for an external client agency. Instruction in communication, collaboration, and management; meetings with and presentations to clients and academic community. Projects vary from year to year. Readings in the course are project-specific and are identified by the student research teams

European Studies

Mission

The European Studies program at Barnard College enables students to combine disciplinary approaches to the study of Europe. Students ground themselves in a core discipline (history, political science, anthropology, sociology, theater, and philosophy, among others) that provides them with methodological expertise. They also take courses in the language and literature of a chosen region of Europe and complement this program with a selection of courses exploring Europe from other disciplinary perspectives. Students are encouraged to study abroad in the region of their interest.

Student Learning Outcomes

Students who graduate with a major in European Studies will be able to attain the following outcomes:

- Demonstrate an understanding of the breadth of Europe's cultural heritage as well as its distinctive components;
- Explain the role of language and literature within culture;
- Apply different disciplinary perspectives to the study of a single region.

This program is supervised by the Committee on European Studies:

Co-Chairs: Erk Grimm (Associate Professor of German), Lisa S. Tiersten (Professor of History)

Requirements for the Major

Students who intend to major in European Studies should consult a member of the department in their sophomore year to plan their academic programs.

The senior requirements vary according to the discipline studied. Majors should consult their advisers for details.

Students may focus on one country or one region of Europe. Competence in the language of the region is expected. The major includes:

1. A concentration consisting of five courses in an academic discipline chosen in consultation with the major adviser. A maximum of two of these courses that deal with European topics may be counted among the ten courses in the regional concentration (Part B).
2. Ten courses focusing on a country or region to include:
 - Two courses in European History;
 - Two courses in the literature or cultural studies of one country in the original language;
 - Two semester senior projects under the direction of the program adviser or an adviser in the minor field;
 - Four courses outside the field of concentration dealing with the selected country or region.

The following list is only a sample selection of courses that may be applied to the major.

HIST BC3062 Medieval Economic Life and Thought ca 1000 to 1500. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Traces the development of economic enterprises and techniques in their cultural context: agricultural markets, industry, commercial partnerships, credit, large-scale banking, insurance, and merchant culture. Examines usury and just price theory, the scholastic analysis of price and value, and the recognition of the market as a self-regulating system, centuries before Adam Smith.

HIST BC2116 The History of Money. 3 points.

Examining the history of money and the history of ways of thinking about money. We investigate how different monetary forms developed and how they have shaped and been shaped by culture, society, and politics. Tracing money from gift-giving societies to the European Monetary Union, the focus is on early modern Europe.

HIST BC2180 Merchants, Pirates, and Slaves in the Making of Atlantic Capitalism. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Examines how the Atlantic Ocean and its boundaries were tied together through the flow of people, goods, and ideas. Studies the cultures of the communities formed by merchants, pirates, and slaves; investigates how their interactions and frictions combined to shape the unique combination of liberty and oppression that characterizes early modern capitalism.

HIST BC2230 Central Europe: Nations, Culture, and Ideas. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

The making and re-making of Central Europe as place and myth from the Enlightenment to post-Communism. Focuses on the cultural, intellectual, and political struggles of the peoples of this region to define themselves. Themes include modernization and backwardness, rationalism and censorship, nationalism and pluralism, landscape and the spatial imagination.

HIST BC2321 COLONIAL ENCOUNTERS. 3.00 points.

Examines the shaping of European cultural identity through encounters with non-European cultures from 1500 to the post-colonial era. Novels, paintings, and films will be among the sources used to examine such topics as exoticism in the Enlightenment, slavery and European capitalism, Orientalism in art, ethnographic writings on the primitive, and tourism

Prerequisites: PHIL UN2211 Required Discussion Section (0 points).

PHIL UN2101 is not a prerequisite for this course. Exposition and analysis of the metaphysics, epistemology, and natural philosophy of the major philosophers from Aquinas through Kant. Authors include Aquinas, Galileo, Gassendi, Descartes, Spinoza, Leibniz, Berkeley, Hume, and Kant. This course has unrestricted enrollment

PHIL W3264 19th Century Philosophy: Hegel. 3 points.

Examines major themes of Hegel's philosophy, with emphasis on social and political thought. Topics include Hegel's critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in a rational society. Readings from Fichte help explain how Hegel's project develops out of Kant's transcendental idealism. Some knowledge of Kant's moral theory and his *Critique of Pure Reason* is presupposed. Prerequisite: *at least one* of PHIL 2201, 2301, or 3251.

PHIL UN3352 Twentieth Century European Philosophy. 3 points.

Prerequisites: one prior philosophy course.

Reading and discussion of selected texts by central figures in phenomenology, existentialism, hermeneutics, critical theory, and recent Continental philosophy. Authors may include Heidegger, Sartre, Merleau-Ponty, Gadamer, Horkheimer, Adorno, Foucault, Bourdieu.

Political Science (Barnard)

POLS UN3401 Democracy and Dictatorship in Europe. 3 points.

This course will examine the development of democracies and dictatorships in Europe from the French Revolution to the present day. It will analyze the nature and dynamics of European political history and use the European experience as a foundation upon which to build a broader understanding of how different types of political regimes emerge, function and are sustained over time. Prior knowledge of European history and comparative politics is welcome, but not presumed.

POLS BC3505 COLL: MAKING DEMOCRACY WORK. 4.00 points.

Beginning in the mid-1970s a democratic wave swept the globe. It started in Southern Europe, spread throughout Latin America, parts of East Asia and Africa, and engulfed the former Soviet bloc. In all, dozens of new democracies emerged during the late twentieth century and by the early 21st century there were more democracies in the world than there had ever been before. Over the last decade and a half, however, a democratic undertow has sent in. Many new democracies have slid back towards dictatorship and many old democracies have experienced significant problems as well. This colloquium will examine the literature on democratic consolidation and backsliding, providing students with an overview of the most important theories about what makes democracy work—or not

Theatre (Barnard)

THTR V3141 Socialism/Communism in Performance. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Sophomore standing. Enrollment limited to 16 students. Analyzes dramatic texts and performances under the Communist regimes behind the Iron Curtain before 1989. Principal focus is on Czech, Polish, and East German playwrights and their productions; we will consider their work in both legal and illegal contexts. In order to gain a wider understanding of the diversity of underground performative cultures, works from Hungary, Romania, and Slovenia will be considered as well. The seminar also attends to dissident performative activities in the framework of the 1980s revolutions, and reflects on works by western authors and emigrant/diasporic writers produced on stages behind the Iron Curtain. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

THTR V3152 Nazism in Performance. 4 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Prerequisites: Course enrollment limited to 16; permission of instructor given at first class meeting.

Explores the cultivation of national and transnational performances as a significant force of National Socialism, at the same time as challenging the notion of "Nazi Theatre" as monolithic formation. The core of the course inquires into the dialectical analysis of artistic creations in diverse art genres, while working towards an understanding of the social dramaturgy of such events as staging the Führer and the racialized body of the privileged people. Nazism did not harbor ideologies without benefits for the allied nations. Thus, the dynamic performance of transnationalism among the "brothers in arms" will be included as well, in order to elucidate how works of art crossing into the Third Reich were reimagined, sometimes in ways challenging to the presumed values of the state stage. Fulfills one (of two) required courses in dramatic literature for Theatre/Drama and Theatre Arts major.

Film Studies

The Film Studies Program

The Program in Film Studies at Barnard College offers a theoretical, historical and practical approach to the study of film. Through this course of studies, students come to understand film as a dominant cultural medium of the twentieth century and its influence on the present, as well as an art form with profound and continuing connections to a range of disciplines that span the humanities and the social sciences.

Mission

The educational goal of the film major is to provide a solid grounding in the history and theory of film and as well as place the study of film in relation to other art forms. Students are introduced to visual storytelling, film technology, and the economic and sociopolitical context of the film industry. The trajectory of the major moves from

introductory level courses (primarily surveys) to intermediate level courses (that introduce the mechanics of writing for film as well as film making), to advanced level courses (including two labs and the senior seminar), plus two electives from the approved list. While the course of study is rooted in film history and theory, all majors take workshops in screenwriting and filmmaking and produce a script and a short film. Our place in a premier college for women invites our Program to pay special attention to questions of gender, and our home in New York City allows students to connect their study to the city's vibrant film industry as well as range of film in arts houses and revival theaters.

Student Learning Outcomes

Students who graduate in Film Studies will be able to attain the following outcomes:

- Demonstrate in-depth knowledge of film history;
- Explain the major concepts or ideas of film theory;
- Communicate in-depth knowledge of film in one other language tradition;
- Write a basic/elementary screenplay;
- Create a short film;
- Demonstrate an understanding of film's relationship to a range of other disciplines across the humanities and social sciences;
- Conduct original research on a film (usually one film) intensively in the context of a limited enrollment senior seminar.

Requirements for the Major

Please note that Columbia courses have been renumbered and retitled, but content remains the same.

The major requirements are a total of 36 credits, namely twelve 3-point courses. However, only seven classes are required, and five are electives. Moreover, we will no longer separate survey courses into "American" and "International." Please note that most classes are offered only one semester per academic year.

Please also note that FILM GU1000 Film and Media Theory is only available during the fall term.

FILM BC3119 SCREENWRITING FUNDAMENTALS. 3.00 points.

Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority.

Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.)

Prerequisites: FILM BC3201 or equivalent. Enrollment limited to 12 students. Priority is given to Film Studies majors/concentrations in order of class seniority. Corequisites: (Since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.) This course is ideal for writers of their FIRST, SECOND AND THIRD screenplays. The first several weeks will focus on STORY: What it is, what it isn't, how to recognize the difference. How to find your own individual stories that nobody else in the universe can tell. From there we will make the transition to the highly individualized techniques, the strengths and limitations, the dynamics of telling a SCREEN STORY; what to leave in, what to leave out. As Michelangelo puts it—starting with a block of marble and chipping away everything that isn't David. Through studies of existing screenplays and films in coordination with and hands-on writing exercises which we will share in class, we will develop our skills in all aspects of screenwriting; building fascinating characters, dialogue, story construction (The BIG PICTURE) and scene construction (The Small Picture) Perfection is not the goal; but rather it is to be able to say truly at the end of each day's writing, "I did the best I could with what I had at the time. FILM BC3201 INTRO FILM # MEDIA STUDIES. 3.00 points.

Prerequisites: Open to first-year students. We derive much of our information about the world from visual media. Social networks, television, cinema: all shape our aesthetic sensibilities and our political visions. Yet we often lack a basic understanding of what could be called "visual literacy." This introductory course gives students the critical tools to analyze how film and other visual media really work – in order to appreciate their artistic and social achievements, as well as to guard against their insidious manipulative devices. In the first part of the semester, we focus on film analysis through a detailed study of the different production phases of filmmaking – from screenwriting and mise-en-scène to editing and film scoring. We pay special attention to the way in which certain stylistic and narrative choices have particular ideological effects. The second part of the course looks at film history through a comprehensive, chronological overview of its main movements and periods, including the coming of sound in Hollywood cinema, post-war Italian Neorealism, the emergence of world auteurs, New Waves of the 1960s and 1970s, etc. Students will use the hermeneutical tools learnt in film analysis to intellectually engage with some masterworks of film history. In the third and final part of the semester, we study the major debates of film theory from perspectives such as auteurism, formalism, psychoanalysis, Marxism, feminism, postcolonial and queer studies, etc. Required screenings include Nanook of the North (Flaherty, 1922), Sunrise (Murnau, 1927), Man with a Movie Camera (Vertov, 1929), Casablanca (Curtiz, 1942), Bicycle Thieves (De Sica, 1948), Rashomon (Kurosawa, 1950), Breathless (Godard, 1960), Belle de Jour (Buñuel, 1967), The Hour of the Furnaces (Solanas, 1968), Seven Beauties (Wertmüller, 1974), Blue Velvet (Lynch, 1986), Paris Is Burning (Livingstone, 1990), and Children of Men (Cuarón, 2006)

FILM BC3204 Discussion Section. 0 points.

Enrollment in one of the following sections is required when registering for FILM BC 3201: Introduction to Film and Film Theory.

FILM BC3225 INDEPENDENT CINEMA. 3.00 points.

Prerequisites: FILM BC 3201 or equivalent.

Prerequisites: FILM BC 3201 or equivalent. Some film scholars seem confused when the term “Independent Cinema” is used in academic discussions. “Independent of what?” and “How independent really?” immediately come up as questions to dismiss the term as too general and misleading. Yet Independent Cinema is not a vague concept: quite the contrary, it very specifically designates the terrain where one of the most controversial debates in America’s film history has taken place. In this course, we study 1) the most important alternative film practices in the US during the 1980s and 1990s, assessing their political and aesthetic accomplishments, and 2) the way “Indie” Cinema was simultaneously incorporated, neutralized, and/or neglected by mainstream media conglomerates. For that purpose, we first focus on the development of non-standard modes of production in the 1940s and 1950s – as exemplified in some works by Maya Deren, Kenneth Anger, and John Cassavetes – as well as Hollywood’s commercial strategies to renew its hegemony from the 1960s onwards – we take Dennis Hopper’s *Easy Rider* (1969) as a case study. We then turn to the analysis of “minor” American cinemas, their forms of thinking, and their impact in public debates concerning freedom of speech, civil rights, and the representation of minorities in the screen during the 1980s. In the last part of the semester, we examine the commodification of independent filmmaking in the 1990s (Disney’s takeover of Miramax, cooptation of the Sundance Film Festival, etc) to further understand that subtle division between art and commercialism in recent American cinema. In-class screenings include *Eraserhead* (David Lynch, 1977), *Chan Is Missing* (Wayne Wang, 1982), *Down by Law* (Jim Jarmusch, 1986), *Do the Right Thing* (Spike Lee, 1989), *sex, lies, and videotape* (Steven Soderbergh, 1989), *American Dream* (Barbara Kopple, 1990), *Reservoir Dogs* (Quentin Tarantino, 1992), and *Inside Llewyn Davis* (Coen brothers, 2013)

FILM BC3245 American Television Drama. 3 points.

Between prestige and streaming, the medium of television has never covered a wider breadth of narratives, voices, and concerns. This course will take a closer look at the format of the American Drama and how it has served as a cultural tool since its inception, reflecting the concerns of the time in one form or another. Through theoretical readings and sociological texts, the course will survey and sharpen our understanding of the power of the medium when placed in conversation with the greater American discourse.

FILM BC3250 ADAPTATION. 3.00 points.

In the same way that there can never be a single objective account of an historical event, using one medium to convey a story first told in another is never as straightforward as it might seem. Translating the essence of an existing story to the screen may require making significant changes to the events or characters as they were originally presented. As a screenwriter faced with such an adaptation, you must understand the idiosyncrasies of your craft well enough to recognize what to keep, what to change, and what to leave behind. This course will explore what makes a screen story work, balancing faithfulness and invention

Corequisites: Please note that since this is a Film course, it does not count as a writing course for English majors with a Writing Concentration.

[Prerequisite: FILM BC3201 or equivalent. Please note that since this is a Film Studies course, it does not count as a creative writing course for English majors with a creative writing concentration.] This course will focus on the primary pillar of television production: the teleplay. Through a number of creative exercises, students will learn the intricacies of the unique screenwriting formats that are the half-hour and hour-long teleplays. Together we will cover the differences between an episode arc and a seasonal one, the requirements of A/B/C story plotting, and how to write an effective show bible. We will survey the existing pantheon of great television writing in order to help students narrow in on their individual sensibilities. By the end of the course, students will have a written original pilot and a mini series bible

FILM BC3265 The Producer's Role. 3 points.

Not offered during 2023-2024 academic year.

This course follows a producer’s role from the selection of material through its development, preproduction, production and post-production to the delivery of the completed work. Once a project has been developed and financed and is in pre-production, a producer organizes and provides the best possible support system and equipment for the director. S/he is responsible for providing all the elements, human and material, as well as her/his own experience, professional judgment and assistance, to carry out the combined vision of the film’s writer, director and producer. When budgets are low the producer often has to do script revisions; casting; finding props and wardrobe; obtaining equipment at low rates; legal and accounting work; collaborating with the director and editor during the shoot and post-production, and plan marketing and distribution. Producing low-budget fiction and non-fiction films/videos offers invaluable experience in learning how to handle larger productions: how to arrive at a compelling storyline, judge the talents and skills of above and below-the-line personnel and supervise the production. Guests include a Director and Editor. Students choose a project they want to produce, “pitch it to the class,” and then write a professional proposal for it.

FILM BC3275 NONFIC DIGTL VIDEO PRODCN. 3.00 points.

Nonfiction Digital Video Production: Enrollment limited to 12 students. Registering for the course only through myBarnard or SSOL will NOT ensure your enrollment. Attend first class for instructor permission. Lab section required. This workshop course is designed to familiarize students with digital video technologies while they investigate various aesthetic and theoretical concepts related to nonfiction cinema and its engagement with the real. Through weekly readings, discussions, screenings, critiques, and practical exercises, students will develop a solid understanding of how to use digital video as an expressive tool. The course will culminate in the completion of a short video work by each student. Students should be both self-directed and interested in developing a support system for each others work

FILM BC3278 DIGITAL PRODUCTION. 3.00 points.

Prerequisites: both FILM BC3201 (or equivalent) and FILM BC3200 (or equivalent). Digital Production offers visual storytellers an incredible medium to connect and build an audience. It is an inexpensive, accessible platform to launch micro-budget concepts. Developing the storytellers voice inexpensively is critical to the evolution of any student, no matter their starting point. The Digital Series course is intended to take students from story ideation through creation of an independent digital series. Emanating from a writers room setting, all steps of the process will be explored and supported by in-class discussion, examples and workshops. This hands-on class revolves around the TV series production model: breaking story, writing pages, preproduction planning, filming and post-production review. We will emphasize the writers voice, construction of series storytelling, and establishing realistic scopes of production

Not offered during 2023-2024 academic year.

In spring 2024, this course dives deeply into the world of Arab cinema, offering a comprehensive exploration of its history, cultural significance, and its massive role in shaping the Arab world. Through a selection of films, readings, discussions, and essays, students will gain an understanding of the diverse nature of Arab cinema and how it mirrors, influences, and responds to both political and cultural landscapes in the Arab world and beyond

FILM BC3280 Truffaut and Rohmer: From Page to Screen. 4.00 points.

A comparative analysis between a literary source and its film adaptation can be a useful tool to understand how both cinema and literature work. In this course, we focus on five outstanding adaptations written and directed by French auteurs François Truffaut and Éric Rohmer during the 1970s: *The Wild Child* (1970), *Two English Girls* (1971), *The Story of Adèle H.* (1975), *The Marquise of O...* (1976), and *Perceval* (1978). By carefully examining the literary texts and their transpositions to the screen, we study the specific qualities of film adaptations and discuss seminal ideas on originality, authorship, and hybridization in the arts. We start by reading three "classical" essays on film and literature –Sergei Eisenstein's "Dickens, Griffith, and the Film Today" (1944), André Bazin's "For an Impure Cinema: In Defense of Adaptation" (1952), and George Bluestone's "The Limits of the Novel and the Limits of the Film" (1957)– in order to recognize the affinities and differences between "the concept of the mental image" in literature and "the percept of the visual image" in cinema. We then pay attention to the different methods used by Truffaut and Rohmer to translate the original texts to the screen. For that purpose, before watching each film, we closely read its "source": a medieval romance (Chrétien de Troyes' *Perceval, the Story of the Grail*, 1191), a medical report (Jean Itard's *The Education of a Savage Man*, 1798), a Romantic novella (Heinrich von Kleist's *The Marquise of O...*, 1808), a secret diary (Adèle Hugo's *Journal of Exile*, 1866), and a semi-autobiographical novel (Henri-Pierre Roché's *Two English Girls and the Continent*, 1952). Each reading is followed by an in-depth analysis of Truffaut's and Rohmer's films, with emphasis on the significant changes in narrative structure, point of view, and characterization – which, in turn, allow for audio-visual patterning appropriate to film. The study of the directors' styles (camera movement, lighting techniques, use of sound and music, montage, etc) will enable us to verify to what extent the serious film adaptor becomes a creator in his own right

FILM BC3301 Advanced Production. 3 points.

Prerequisites: FILM BC3201 or equivalent. Sophomore standing. Enrollment limited to 12 students. Attend first class for instructor permission.

Advanced Film Production will teach students how to create a short narrative film; emphasizing the steps taken in pre-production, production and post-production. Through hands-on workshops and theory, students will learn narrative editing, shot progression, camera lenses, lighting and audio equipment. Students will work in teams of four, learning the roles and responsibilities of the different crew members.

FILM BC3610 NEW CINEMAS IN LATIN AMERICA. 3.00 points.

This seminar will analyze the historical similarities and differences between the two major "New Wave" periods of Latin America cinema. The first part of this course will examine the emergence of the 1960s nuevos cines in Mexico, Brazil, Cuba, Argentina, and Chile through an in-depth analysis of landmark films such as Jomi García Ascot's and María Luisa Elío's "On the Empty Balcony" (1962), Glauber Rocha's "Entranced Earth" (1967), and Tomás Gutiérrez Alea's "Memories of Underdevelopment" (1968). Some key concepts in Benedict Anderson's book "Imagined Communities" will help us to understand why "national identities" played such a primordial role among Latin American film intellectuals in the 1960s and 1970s. Special attention will be paid to the manifestos written by Julio García Espinosa, Fernando Solanas, and Octavio Getino, and to how they confronted Hollywood's hegemony in order to create an auteurist film tradition in the region. In the second part of the seminar, we will study the global success of the Latin American cinemas of the 2000s from a transnational perspective: features such as Alfonso Cuarón's "Y tu mamá también" (2001), Lucrecia Martel's "The Swamp" (2001), and Fernando Meirelles and Kátia Lund's "City of God" (2002) will be examined in relation to the political and aesthetic traditions discussed in part one. We will explore how these contemporary Latin American filmmakers have shifted their interests from national identities to questions of gender, race, class, and sexuality. The critical interpretation of these films will allow us to redefine the idea of "national cinemas" and to reexamine the historical tensions between state control, commercialism, and independent cinema in Latin America

FILM BC3702 MAJOR WOMEN FILMMAKERS. 4.00 points.

Traditional film history has consigned a multitude of cinema practices to an inferior position. By accepting Hollywood's narrative model as central, film scholars have often relegated non-male, non-white, non-Western films to a secondary role. Often described as "marginal" or "peripheral" cinemas, the outcomes of these film practices have been systematically excluded from the canon. Yet... are these motion pictures really "secondary"? In relation to what? And according to whom? This course looks at major films by women filmmakers of the 20th Century within a tradition of political cinema that 1) directly confronts the hegemonic masculinity of the Hollywood film industry, and 2) relocates the so-called "alternative women's cinema" at the core of film history. Unlike conventional feminist film courses, which tend to be contemporary and anglocentric, this class adopts a historical and worldwide perspective; rather than focusing on female directors working in America today, we trace the origins of women's cinema in different cities of the world (Berlin, Paris, New York) during the silent period, and, from there, we move forward to study major works by international radical directors such as Lorenza Mazzetti, Agnès Varda, Forough Farrokhzad, Věra Chytilová, Chantal Akerman, Liliana Cavani, Barbara Kopple, Larisa Shepitko, and Mira Nair. We analyse how these filmmakers have explored womanhood not only as a source of oppression (critique of patriarchal phallogocentrism, challenge to heteronormativity, etc) but, most importantly, as a source of empowerment (defense of matriarchy, equal rights, lesbian love, inter- and transexuality...). Required readings include seminal texts of feminist film theory by Claire Johnston, Laura Mulvey, Ann Kaplan, bell hooks, and Judith Butler. Among the films screened in the classroom are: silent movies – "Suspense" (Lois Weber, 1913), "The Smiling Madame Beudet" (Germaine Dulac, 1922)–, early independent and experimental cinema – "Girls in Uniform" (Leontine Sagan, 1931), "Ritual in Transfigured Time" (Maya Deren, 1946)–, "new wave" films of the 1950s and 1960s – "Together" (Mazzetti, 1956), "Cléo from 5 to 7" (Varda, 1962), "Daisies" (Chytilová, 1966)–, auteur cinema of the 1970s – "Jeanne Dielman" (Akerman, 1975), "The Ascent" (Shepitko, 1977)–, and documentary films – "Harlan County, USA" (Kopple, 1976), "Paris Is Burning" (Jennie Livingston, 1990)

East Asian Languages and Cultures

EAAS W4106 Global Genres and East Asian Cinema. 3 points.

Discussion Section Required

Not offered during 2023-2024 academic year.

This course explores East Asian Cinema from the perspective of film genre. In particular, the course examines East Asian genre films as active interaction with the circulation of global film genres as well as mass mediated engagement with specific economic, social, and political histories of East Asia. We will study contemporary theories of film genre, examine how the case of East Asian genre films complicate existing theories, while paying due attention to the parallel transnational traffics—between East Asian Cinema and global film genre, and across East Asian Cinema in their history of cultural and economic flow as well as political confrontation. We will integrate our investigations of genre-specific questions (industry, style, reception, spectatorship, affect) with those of gender, ethnicity, power as well as nation and transnational/transregional identity.

English

ENGL W4670 American Film Genres. 3 points.

Not offered during 2023-2024 academic year.

(Lecture). Some critics contend that all Hollywood film is either melodrama or morality play, no matter what its claims to the contrary; others see it as purely wish-fulfillment fantasy. This course will examine a range of genres in Hollywood film, while also scrutinizing and questioning the formation and usefulness of genre distinctions. Our orientation will be formal as well as social and historical, as we examine codes and conventions of generic illusion and verisimilitude; the look and sound of different genres; genre and acting style; the rise and fall of specific genres (the Western, the slasher film, etc.), increasing self-reflexiveness in especially such genres as noir, the musical, romantic comedy; genre-bending and postmodernity; and genre as projection and organization of public sentiment. We will also explore why certain genres are linked to political parties, as are specific styles of heroism. Genres will include: the combat movie, romantic comedy, horror, action, animation, musicals and “independent” films.

French (Barnard)

FREN BC3062 Women in French Cinema since the 60s. 3 points.

This course traces the evolving nature of the relationship between women and society in French cinema from the New Wave of the 60's to the present. Attitudes of women and towards women will be examined in the light of the changing social, political, and intellectual context. *FREN BC1204: French Intermediate II or the equivalent level is required.*

Department Administrator: Sarah Pasadino

Department Assistant: Julissa Acosta

Mission

First-Year Writing (FYW) courses invite students into the vibrant scholarly life of the college. Working in small, discussion-based seminar classes over the course of one semester, we read challenging literary texts and critical scholarship, helping students to develop fundamental skills in analysis and academic writing that allow them to take their place in vitally important scholarly conversations. Students may choose from a variety of special topics that focus on a particular literary tradition, theme, or phenomenon (see course descriptions for details).

Student Learning Outcomes

Students who successfully complete this one-semester course should be able to:

- closely analyze evidence to develop persuasive claims
- develop claims into sophisticated, consequential ideas
- communicate ideas clearly through well-organized, lucid writing
- develop skills in critical reading and academic writing that transfer to courses across the curriculum
- conduct interdisciplinary research to ground literary works in different contexts (historical, theoretical, etc.)
- document sources and incorporate scholarship into original analytical arguments
- avoid plagiarism and other academic violations of Barnard's Honor Code
- gain confidence in speaking as well as writing skills in a small seminar setting

First-Year Writing: Critical Conversations

First-Year Writing (FYW) courses invite students into the vibrant scholarly life of the college. Working in small, discussion-based seminar classes over the course of one semester, we read challenging literary texts and critical scholarship, helping students to develop fundamental skills in analysis and academic writing that allow them to take their place in vitally important scholarly conversations. Students may choose from a variety of special topics that focus on a particular literary tradition, theme, or phenomenon (see course descriptions for details).

A “critical conversation” is a conversation about ideas. It is sophisticated and thoughtful rather than one-sided and simplistic; it’s not about finding one right answer but rather about closely analyzing all of the evidence at hand and discovering something meaningful. By communicating what you discover clearly and cogently, you add to the broader scholarly conversation. When engaged in a critical conversation with other scholars, you consider their ideas in ways that help you develop your own thinking, rather than merely agreeing or disagreeing with what others have to say. The critical reading, discussion, and academic writing skills we focus on in First-Year Writing provide a foundation that crosses disciplinary boundaries and will help you in all of your courses.

FYWB BC1106 Seeing, Surveilling, and Performing. 3.00 points.

In this course, we will study the way culture influences how we make sense of what we see. We will examine how power is exercised by making people feel as though they are always being seen, how this surveillance polices the way gender, race, class, and sexuality are expressed, and how people perform their identities to reinforce or push back against this policing. Literary texts will include *Passing* by Nella Larsen, “The Husband Stitch” by Carmen Maria Machado, *Fantomina* by Eliza Haywood, and the films *Paris is Burning* and *Portrait of a Lady on Fire*. Secondary texts will include John Berger, Talia Bettcher, Judith Butler, W.E.B. Dubois, Frantz Fanon, Michel Foucault, Jack Halberstam, bell hooks, Audre Lorde, and Laura Mulvey

FYWB BC1109 Wild Tongues. 3.00 points.

In this course, we’ll examine storytelling and language through the lens of gender. How are constructions of gender used to police what kinds of stories are told, who can tell them, and who is believed? What forms and strategies of narration are available and to whom? Our focus on tongues—both linguistic and anatomical—allows us to ask questions about the forms that language takes and the relationship of narrations and language to the body. How have women engaged and re-deployed existing myths and narratives? How is the self both constructed and policed through narratives of gender, race, class, sexuality, family? In our analyses, we’ll work to challenge fixed or binary understandings of gender and power by asking how these writers engage and challenge the various ways in which the category of “women” is constructed within culture. Readings are subject to change but may include *The Hymn to Demeter*, selections from Ovid’s *Metamorphoses*, selected poems by Sor Juana Ines de la Cruz, Toni Morrison’s *The Bluest Eye*, Yvette Christiansë’s *Castaway*, and/or selections from Cherrie Moraga’s *Loving in the War Years* and Theresa Hak Kyung Cha’s *Dictée* and critical conversation texts by authors including Gloria Anzaldúa, Sara Ahmed, and Audre Lorde

FYWB BC1113 BODIES AND DESIRES. 3.00 points.

In this First-Year Writing course, we’ll examine a series of questions centered on bodies and desires. How is the body both constructed and policed through narratives of gender, race, class, and sexuality? How are bodies and desire mediated through and represented in language? We’ll consider how bodies become not just sites of objectification or of power but also of pleasure. We’ll think about the politics of respectability, in questioning who can be a subject, rather than object, of desire. In our analyses, we’ll work to challenge fixed or binary understandings of gender and power. Readings are subject to change but may include: Nella Larsen’s *Passing*, Eliza Haywood’s *Fantomina*, short stories by Luisa Valenzuela, Carmen Maria Machado and/or ir’ene lara Silva, poems by Sally Wen Mao and Sor Juana Ines de la Cruz and conversation texts by Audre Lorde, Patricia Hill Collins, bell hooks, Sara Ahmed, John Berger, and/or Judith Butler

FYWB BC1114 WOMEN OF COLOR IN SPECULATIVE LITERATURE. 3.00 points.

"The Future is Female" except in science fiction, where it still looks pretty white and male. What happens when women of color take on such tropes as space exploration, cybernetics, superpowers, and the end of the world? How can women of color change the way we not only think of the future, but think of the present as well? In this class we'll look at how speculative literature looks at the intersections of race, gender, class, sexuality, technology, and environmental concerns. Readings will include work from such authors as Octavia Butler, Franny Choi, Sam Chanse, G Willow Wilson, and Tananarive Due with potential critical readings from Lisa Yaszek, Charlotte E Howell, and bell hooks

FYWB BC1115 MODERNITY. 3.00 points.

"All that is solid melts into air." So wrote Karl Marx and Friedrich Engels in 1848, registering the astonishing pace with which daily life was being transformed around them. For them, and for many of their contemporaries, the central feature of the modern world was its ceaseless change. Under the pressure of political, scientific, and economic revolutions, traditional ways of living and thinking might disappear almost overnight, to be replaced not by a new order but instead with an unending experience of instability and dislocation. This course reads a set of writers who both respond to and participate in that process of constant transformation – in what we have learned to call modernity. Should culture try to protect timeless values from the shock effects of modernization? Or should it find, in change, an opportunity for new forms of life and new styles of expression? If – as Marx and Engels did – we imagine modernity as a distinctively European event, how might writers outside of Europe make use of and respond to a modernity that excludes them? Is modernity something that happened, and is over – or are we today still swept up in it? Readings may include: literature from Milton, Wordsworth, Shelley, Douglass, Woolf, Kincaid; philosophy and criticism from Montaigne, Kant, Marx, Weber, Du Bois, Kracauer, Chakrabarty

FYWB BC1121 LIVES IN TRANSLATION. 3.00 points.

This class focuses on the theme of translation and what happens when texts and people cross national, cultural, linguistic, racial or gendered borders. Through our classroom discussions and essays, we will explore the following questions: Why or how do texts lend themselves to or resist translation? How do encounters with dominant discourses necessitate acts of self-translation or resistance to translation, especially for people of color, immigrants or queer communities? How do narratives (both fictional and personal) change when translated across cultures and time to fit with local discourses? What is the role of the translator in these acts of remaking? Drawing on postcolonial and translation theory, we will consider how writers have pushed back against dominant narratives through texts that cross and complicate linguistic, cultural and national borders. Readings are subject to change but will likely include a selection from following: literary texts by James Baldwin, Sappho, Marjane Satrapi, Ocean Vuong, Fatimah Asghar, Irena Klepfisz, as well as various English translations of the 1001 Nights; and scholarly texts by Gloria Anzaldúa, Edward Said, bell hooks, Friedrich Schleiermacher and Jorge Luis Borges. FYWB BC1123 WRITING AND THE ENVIRONMENT. 3.00 points.

Beginning with the Popol Vuh, the Mayan myth of creation, which records the first contact with the Spanish conquistadors about 1555, we will explore the history of American nature writing up to the present, with particular attention to problems of environmental justice. Description and interpretation of nature has shaped artistic representation from the very beginning of human history, and we will read both texts and images from the Americas in relation to selected European texts: from Crèvecoeur's "Letters from an American Farmer" (1765) to excerpts from Wordsworth's "Prelude" in England (1798), which in turn influenced Emerson's essay "Nature" (1836) and Thoreau's writing in Walden and "Civil Disobedience" (1851). We will also consider both texts and contexts from John Steinbeck's *The Grapes of Wrath* (1939); Rachel Carson's *Silent Spring* (1962); John McPhee's *Encounters with the Archdruid* (1971); and international reports and organizations including the International Panel on Climate Change (IPCC) and COP28. Engaging with activist organizations, we will both write and analyze the impact of contemporary environmental journalism such as Bill McKibben's *The End of Nature*, Liz Kolbert's *The Sixth Extinction*, and Alexis Pauline Gumbs, *Undrowned: Black Feminist Lessons from Marine Mammals*

FYWB BC1124 HAUNTED AMERICAS. 3.00 points.

In this course, we will encounter ghosts and hauntings in literature from the Americas, primarily from Latin American and Caribbean writers. These ghosts expose something hidden in the past and pull dark secrets into the light. We will think about haunting not just as a supernatural experience, but as a mechanism that reveals layers of history and unearths long buried injustices. A few of the characters we will meet are: A Cuban exile living in Miami who is haunted by the life he left behind; a teenager in Argentina who explores her queer identity and confronts the ghosts of the state violence; a General accused of genocide who defends his innocence, though the ghosts in his home say otherwise. The ghosts in these stories force the characters to reckon with, or fall prey to, legacies of colonialism, war, and migration. Readings include literary works by Mariana Enriquez, Edwidge Danticat, Carlos Fuentes, Jean Rhys, Ana Menéndez, and others

FYWB BC1126 READING THE FUTURE. 3.00 points.

How do we think about the future? Why do we develop the hopes and fears that we do? How do present conditions and discourses inform, influence, or limit our senses of personal and political possibility? In this section of First-Year Writing, we will explore conceptions of the future in 19th through 21st-century literary fiction. We will begin by close reading 20th-century short stories that evoke hopes and fears for the future on individual, social, and global scales. We will then turn to H.G. Wells' classic novella *The Time Machine* and place its portrayal of the future in the context of late Victorian science and socioeconomics. Finally, we will consider how contemporary literature reflects and responds to the accelerating climate crisis, and explore fiction's role in helping us apprehend the potential for radical environmental disruption

FYWB BC1128 MUSIC IN NARRATIVE. 3.00 points.

How and to what ends does literature represent musical form or the feeling of musical encounter? In this course, we will discuss narratives in which music plays a significant role, whether through musical allusion or its sustained thematic presence, or through principles of musical composition and gesture that play in the background, informing a text's structural flow. We will consider complex resonances between literary narratives and histories of music culture and aesthetics, asking how writers use music to world-build, to characterize, and to situate a text culturally and politically. Throughout the semester, we will pay particular attention to narratives that showcase the musical lives of characters belonging to historically marginalized groups. In doing so, we will question how race, gender, and sexuality intersect with musical histories of aesthetic power. Literary readings may include works by Jane Austen, James Baldwin, Toni Morrison, and James Joyce. Secondary readings in performance studies and musical aesthetics may include selections by Jennifer Lynn Stoeber, Judith Butler, Immanuel Kant, Arthur Schopenhauer, Maria Edgeworth, and others

FYWB BC1129 SPECULATING THE PAST. 3.00 points.

Recent works as diverse as *The New York Times's Overlooked Project* and Netflix's *Bridgerton* raise questions about what records we keep, how we narrate history, and the factors that determine what stories we can tell. In this class, we will probe these questions by reading literary works that turn to a speculative mode to make sense of history, past and present. As we enter the critical conversation about the historical record, we will explore how authority and value are assigned to different texts and accounts. In so doing, we will also develop our ability to read texts' and documents' own theorizations of truth and fact. Readings may include work by Virginia Woolf, Marlene NourbeSe Philip, Carmen Maria Machado, Adrienne Rich, and N.K. Jemisin alongside critical texts by Saidiya Hartman, Ngũgĩ wa Thiong'o, and others. Course costs will not exceed \$15

FYWB BC1130 TALKING BACK. 3.00 points.

Inspired by bell hooks's assertion that "moving from silence to speech is for the oppressed...a gesture of defiance that heals," we read and write with attention to the power dynamics of speech and silence, of talking and talking back. Our literary and critical texts demand attention to the ways in which power shapes narrative, and narrative shapes power. We will think especially about how the oppressed, the colonized, the exploited, speak to and against erasure; and also how the marginalized create community by talking and talking back. The readings include literary works by Nella Larsen, Jamaica Kincaid, Toni Morrison, and Layli Long Soldier; and critical works by Frantz Fanon, Judith Butler, bell hooks, and others. The only book length work you will need is Toni Morrison's *Jazz* (around \$15 new)

FYWB BC1132 ATTENTION!. 3.00 points.

Attention is the foundation of investigation, action, and intention. It means concentration and deliberation. It can also mean distraction and confusion. Quietly reading a difficult work of literature, puzzling over a math problem, revising a paper for class, or cooking an elaborate meal are forms of attention. So is endlessly scrolling through social media, binge-watching a television series, or strolling aimlessly through the city. Where and how we use our attention is the foundation, the bedrock, of nearly everything we think and do. It is therefore unsurprising that gathering and directing our attention is also an enormous, lucrative industry. In this course we will study the science and philosophy of attention alongside the history of the "attention economy" and evolving techniques and technologies of attention harvesting. We will explore these subjects while reflecting upon and writing about our own habits of paying attention. By paying attention to attention, we will nurture a brighter awareness of the many interests vying for our time, mental engagement, money, our very lives, and of our abilities to scrutinize, critically examine, or resist our entrapment within the modern attention industry

FYWB BC1135 CONTESTED TRUTHS: MEMORY, AUTHORITY AND HISTORY. 3.00 points.

This class examines the ways that a historical event can be remembered and described differently by direct participants, and how personal biases, such as race, gender and class, affect the process of recollection and narration. Some of the texts that we will read and discuss include Sara Collins' *The Confessions of Fannie Langton*, Ian McEwan's *Atonement*, and Kurt Vonnegut's *Slaughterhouse Five*, among others. Our analysis of these texts will be augmented by theoretical works drawn from psychology, literary studies and trauma studies

FYWB BC1136 TO UPEND A WORLD: ABOLITIONIST POETICS. 3.00 points.

In our class we will discuss abolition as a name for a set of imaginings that call for complete and total eradication of systems ("Worlds") that perpetuate collective harms. We will think about how capitalism, colonialism, and white supremacy limit our imaginations, and how we can think in ways that remake our world. Students will read essays by Ruth Wilson Gilmore, Pheng Cheah, Denise F. DaSilva, Edouard Glissant, and Christina Sharpe, and will trouble received readings of significant literary texts through abolitionist lenses to discern a range of liberatory strategies in the poetry, literary nonfiction, and fiction of writers including Audre Lorde, W.E.B. DuBois, James Baldwin, Lucille Clifton, M Nourbese Philip, Robin Coste Lewis, Etheridge Knight, Randall Horton, dg nanouk okpik, and Jackie Wang. As a class, students will discuss and consider these writers', as well as their own, interventions in the context of literature's world-making power. (*Readings subject to change)

FYWB BC1137 THE TEENAGE STRANGE. 3.00 points.

Teenagers inhabit a strange land: in exile from childhood, still immigrating to adulthood. How have different writers mapped the liminal territory of the teenage experience? In this class, we will step away from the rich tradition of realistic Coming-of-Age narratives and explore how genre frameworks—including speculative, horror, fairy tale, gothic, and quest traditions—have been used to illuminate the Teenage Strange. How have writers used the strangeness of genre to render this slice of time? How does genre capture the teenage intersection between public and private inquiry—between larger questions about the world, and more private questions about the self? How does genre construct questions about fear, desire, rage, shame, power, culture, and love? How does it deconstruct reality so it can be seen, investigated, and felt? Readings may include work by Octavia Butler, A.S. King, Angela Carter, Carmen Maria Machado, Shirley Jackson, Joan He, Francesca Lia Block, Kelly Link, Viktor Shklovsky, Ursula K. LeGuin, Akwaeke Emezi, and others

FYWB BC1138 LETTERS. 3.00 points.

Dear student: I write to you, who now read these words. Or, perhaps, I don't: perhaps I never had you in mind at all; perhaps you are just someone passing by, who has taken these words as though meant for yourself. This course examines how writers have made use of the privacy of letters in their public writing. What happens when we address our written words to a particular other? How, on the other hand, do we read words meant for someone else? What intimacies does the letter form make possible, or violate? And what might the special case of the letter have to tell us about writing in general? Objects in the course may include: fiction by Goethe, DeWitt, Diderot, Poe, West; epistolary poems by Ovid, Dickinson, Rankine, Shockley; paintings of letter-reading by Vermeer and Greuze; letter-memoirs by Baldwin and Vuong; criticism and theory by Althusser, Barthes, Benveniste, Fried, Howe, Jackson, Reed

FYWB BC1139 COLONIALISM, IMPERIALISM, AND SEXUALITY. 3.00 points.

This course considers the abundance of European literature and travel writing that detail the encounter between the colonizer and colonized. These narratives deploy stereotypes to characterize non-European geographies and people as excessively sensual and cast outside the progressive flow of time, waiting to be discovered by the white traveler. Edward Said termed this projected fantasy of sexual decadence "Orientalism," or the cultural/historical reduction of "the East" into a stockpile of recognizable tropes. This reduction serves an ideological goal: to portray the North/West as the intellectual/cultural elite, and the South/East as the mere object of the former's cataloguing fetish. This First-Year Writing course interrogates canonical texts of nineteenth- and twentieth-century European literature and travel writing by formulating questions about the erotic dimension of empires, with Said's critical intervention as our guide. How is sexuality configured in colonial writing? What do these configurations tell us about the ideological map superimposed over the colony and the metropole? How do these constructions of sexuality continue to proliferate in our contemporary moment, and for what political ends?

FYWB BC1140 FEMINIST FAIRYTALES. 3.00 points.

In this class we will read and discuss feminist fairy tales: adaptations of classic tales and newly-imagined stories which—rather than promising a simple and tidy "happily ever after"—privilege female agency and offer up critiques of patriarchal structures. In dialog with texts that center women and other intersecting identities, we will talk about colorism, sexuality, desire, misogyny, motherhood, and more. Analyzing how these texts unmask and challenge various forms of oppression, we will explore how and why the magical and often didactic nature of the fairy tale genre lends itself to thinking critically about our current world and to envisioning more equitable futures. Readings include literary texts by Ovid, Julia Alvarez, Olga Broumas, Charles Perrault, Luisa Valenzuela, Nalo Hopkinson, Jeanette Winterson, Amal El-Mohtar, and Kelly Link. In dialog with these literary texts, we will also engage with various theoretical texts and perspectives; with film (Georges Méliès and Disney's *Frozen*); with artwork; and with music (Taylor Swift)

First-Year Writing Workshop

First-Year Writing (FYW) Workshop is a four-credit course designed for students who feel they would benefit from extra preparation for the critical reading and writing that you will do at Barnard. FYW and FYW Workshop are equally rigorous – both courses have the same critical reading and writing goals, and both courses satisfy your First-Year Writing requirement. FYW Workshop, however, meets 3 days per week instead of 2; it is worth 4 credits instead of 3; and the class sizes are smaller. NOTE: FYW Workshop is only offered in the Fall (not in the Spring).

[Read about students' experiences in FYW Workshop here.](#)

FYWB BC1500 (WORKSHOP) READING THE BODY. 4.00 points.

In this course, we'll think of the body as a text we can read—one that both represents and creates intersections between the body, science, and identity. We'll read literary texts that reveal how scientific authority gets mapped onto the body and embedded in ideas of race, gender, class, sexuality, family, and nation; we'll also analyze how writers in turn investigate and play with these scientific scripts. How do literary depictions of the body both represent and resist scientific authority? What do they teach us about the "factness" and fluidity of identity and belonging? Readings are subject to change, but will likely include literature by Ovid, Octavia Butler, Amy Bonnaffons, Isabel Allende, and Nella Larsen, as well as select texts from feminist science studies, critical race studies, and queer theory

FYWB BC1506 (WORKSHOP) HAUNTED AMERICAS. 4.00 points.

In this course, we will encounter ghosts and hauntings in the fiction of Latin American and Caribbean writers. A Cuban exile is haunted by the life he left behind; a teenager in Argentina explores her queer identity and confronts the ghosts of state violence; a young woman courts colonial power and becomes a ghost herself. We will look to theories of hauntology to investigate the ways in which the characters in these stories reckon with, or fall prey to, legacies of colonialism, war, and migration. Readings may include literary works by Mariana Enriquez, Edwidge Danticat, Daniel Alarcón, Jean Rhys, and Ana Menéndez

First-Year Seminar

332G Milbank Hall

212-854-3577

Department Assistant: Marsha Peruo

Mission

Every Barnard first-year student is required to take a First-Year Seminar during her first or second semester at Barnard. First-Year Seminars are designed to develop further the essential and prerequisite skills a student brings to Barnard in critical reading and analysis, writing, and effective speaking. First-Year Seminars are intellectually challenging interdisciplinary courses which explore important issues through significant texts ranging across genres and historical periods. Seminars also serve to initiate students into the intellectual community of the college.

Student Learning Outcomes

1. Students in First-Year Seminars will develop their skills in critical reading and analysis, writing, and effective speaking.
2. They will assess and use textual evidence in support of oral and written arguments.
3. Students will explore important issues through significant texts ranging across genres, disciplines, and historical periods.

First-Year Seminars fall into two categories: **Special Topics** and **Reacting to the Past**.

Special Topics seminars reflect the variety of faculty interests and expertise, and thus vary in topic from year to year. They offer students and faculty opportunities to explore topics of interest across disciplinary lines, genres, and historical periods. Use the "Courses" tab above to view the full Special Topics offerings; current semester offerings are indicated with schedule details.

In Reacting to the Past seminars, students participate in role-playing games that enable them to relive important intellectual debates in three separate historical moments.

In *The Threshold of Democracy: Athens in 403 B.C.*, students draw on Plato's *Republic* as well as excerpts from Thucydides, Xenophon, and

other contemporary sources to debate the prospects for Athenian democracy in the wake of the Peloponnesian War.

In Confucianism and the Succession Crisis of the Wanli Emperor, students study the Analects of Confucius and apply Confucian thought to issues of governance during the Ming dynasty. The final semester's final game varies by section. Some sections explore seventeenth-century Massachusetts, drawing on the Bible, Calvin's Institutes, and colonial trial testimony to participate in The Trial of Anne Hutchinson. Other sections draw on texts by Marx, Freud, and Wollstonecraft to explore the contest between women's suffrage advocates and labor activists for the hearts and minds of "Bohemian" Greenwich Village in the spring of 1913.

This program is supervised by the First-Year Experience Committee led by the First-Year Seminar Co-Directors: Pamela Cobrin (Senior Lecturer in English) and Vrinda Condillac (Lecturer in First-Year Writing); Director of First-Year Writing: Wendy Schor-Haim (Senior Lecturer in English); Director of First-Year Writing Workshop: Cecelia Lie-Spahn (Lecturer in English)

Instruction in the First-Year Seminar Program is provided by the following faculty members:

Professors, Associate Professors and Assistant Professors:

Mark Carnes (History), Tamara Walker (Africana Studies), Emily Black (Computer Science), Ralph Ghoche (Architecture), Gale Kenny (Religion)

Courses of Instruction

Every Barnard first-year student is required to take a First-Year Seminar during their first or second semester at Barnard. Transfer students are not required to take First-Year Seminars.

Special Topics

FYSB BC1105 Language and Power. 3 points.

This course will address the relationship between language and power from a philosophical perspective. We will investigate questions such as: How does language influence the way we think of gender, race, society, and politics? What are the limits, if any, on free speech? In what ways, if any, can language be used to harm people? Some topics we will discuss include hate speech, trigger warnings, slurs, dog whistles, propaganda, and silencing. Readings will include philosophical papers and recent op-eds.

FYSB BC1107 Race, Science, # Reproductive Justice (Wkshop). 4.00 points.

This course is about reproduction—a biological and social process that is often the target of deep-seated ideas about nation, culture, conflict, and definitions of life. With an emphasis on the reproductive justice movement in the United States, which centers the experiences and leadership of BIPOC women and LGBTQ people, we will explore a variety of literary works, films, journalism, public health studies, and policy/legal texts, all of which differently narrate, debate, script, and theorize about reproduction. Questions we will explore include: what is reproduction—scientifically, culturally, politically, and rhetorically? What is reproductive justice, and how is it distinct from reproductive rights and health? How have recent innovations in medicine and reproductive technologies both empowered and harmed reproductive experiences? And what kind of world does the reproductive justice movement urge us to imagine and create? Please note that the material for this class discusses obstetric violence; this material is important for understanding the relationships between race, science, and reproductive justice. Throughout the semester, we will discuss as a class how to work through this difficult material in respectful and inclusive ways. NOTE: This 4-credit version of First-Year Seminar (FYS)—FYS "Workshop"—is specially designed for students who believe they would benefit from extra support with their critical reading and academic writing skills. In addition to regular seminar meetings twice per week, students are also required to participate in six Friday "writing labs" over the course of the semester. The writing labs for this section will take place on the following Fridays, 11:40am-12:55pm: 1/15, 1/22, 1/29, 2/5, 2/12, and 3/26. These dates are for the Spring 2021 semester only.

FYSB BC1113 Feminist Futures. 3.00 points.

This course uses feminist and queer anti-racist engagements with science fiction as a starting point for considering speculation as a mode of inquiry and practice more generally. How and why do feminist authors, artists, activists, and theorists invoke the future in order to analyze and contest gendered inequalities and dominations that are experienced in the present? What are the consequences of speculation in the context of platform design and reproductive technologies? What is the role of imagination in dealing with archival documents? By posing these and other questions throughout the semester, we will explore numerous issues about the role of speculation, imagination, and forecasting in the everyday practice of feminist critique. The seminar meetings, readings, and assignments in this class all serve the larger goal of helping students cultivate intersectional approaches to the study of power.

FYSB BC1114 HOT STUFF. 3.00 points.

Long before humans walked the earth; before dinosaurs were wiped out; before any sign of sentient life on earth; volcanoes were a feature of our planet. With the power to help create life, as well as wreak devastation and destruction, volcanoes inspire awe and terror in equal measure. This seminar will explore the science behind volcanoes, their impact on the environment and societies, as well as our enduring fascination with them through the lenses of history, arts, mythology and religion. Where and why do volcanoes erupt? How do they affect nature, climate and society? How has our understanding of these amazing natural phenomena evolved over time? Why do people stay in close proximity to volcanoes, despite the dangers? Can we predict when the next catastrophic eruption will occur? Can we harness the power of volcanic activity as alternative energy source? These are some of the many questions that students will seek to answer and will serve as a starting point for our deeper investigation into the subject throughout the semester. Students will study historical texts, case studies, current data and methods of analysis, as well as depictions of volcanoes in art and film. Group discussion, independent study and individual and group presentations. Students will research case studies and present their findings to the class

FYSB BC1189 THE ENCHANTED IMAGINATION. 3.00 points.

A survey of fantasy works that examines the transformative role of the imagination in aesthetic and creative experience, challenges accepted boundaries between the imagined and the real, and celebrates Otherness and Magicity in a disenchanted world. Readings will be selected from fairy tales, Shakespeares A Midsummer Nights Dream and The Tempest; Romantic poetry by Blake, Coleridge, Keats, and Dickinson; Romantic art by Friedrich, Waterhouse, and Dore; Mary Shelleys Frankenstein, Lewis Carrolls Alice books, Tennysons Idylls of the King, Tolkiens Lord of the Rings; Magical Realist works by Borges, Garcia Marquez, and Allende; Sondheim - Lapines Into the Woods, Rushdies Haroun and the Sea of Stories

FYSB BC1196 MODERNISM IN THE CITY. 3.00 points.

In this course, we explore Modernism in literature, art, architecture, music and dance. How do these different disciplines express the explosive and jarring experiences of twentieth-century life? Primary sources will include the cubist paintings of Pablo Picasso, the poetry of T. S. Eliot, Gertrude Stein, and Langston Hughes, Bebop and Boogie Woogie jazz, Igor Stravinsky's classical music "The Rite of Spring," International Style architecture, and Alvin Ailey's dance. Our classwork will be enriched by excursions throughout New York City

FYSB BC1199 LOSING YOURSELF: ABSORPTION IN VISUAL ME. 3.00 points.

How do we pay attention now: too well, or not well enough? This course aims to clarify the ongoing debate about both the value and the meaning of absorption in visual media. We will begin by comparing contemporary polemics on the decline of attention with writings by a generation of cultural critics writing in Germany in the 1920s and 30s, for whom distraction was both a symptom of and a response to an increasingly commodified culture. Next, we'll draw on recent theorists to help us consider how three representative works (a painting, a sequence in a video game, and a chapter from a novel) shape the way we attend to them. When we imagine the way we pay attention now, we tend to think of ourselves as not reading, and of the book as a medium in decline. In the second half of the class, we'll therefore turn our attention to the late eighteenth century, when it was widespread reading that seemed strange and new. Together, we'll focus on two mixed forms from the period – the epistolary novel and the ballad collection – that helped make reading itself at once troublingly distracting and dangerously absorbing

FYSB BC1200 BANNED: DANGEROUS ART. 3.00 points.

In this course we will engage with various forms of artistic production (literary, cinematic, pictorial, musical) that have been banned or censored by religious authority, governmental institutions, or by public opinion. While discussing these primary texts we will investigate who gets to censor art, to what ends, and according to which criteria. Who is protected from tasteless, subversive, or obscene art? How do these categories change with time, and from culture to culture?

FYSB BC1286 CULTURE, ETHICS, AND ECONOMICS. 3.00 points.

What if humans were only capable of caring for their own interests? What kind of economic world could we expect to find? One in which the common good would be attained by market forces, or one in which many would be left behind? This course uses a diversity of sources to examine the interplay of culture, ethics and economics. The starting point is Adam Smith's work. Economists and policy makers have focused on one side of Adam Smith's work represented by self-regarding behavior and the supremacy of the invisible hand in market functioning. However, Adam Smith also pointed out that one of humans' central emotions is sympathy, a natural tendency to care about the well-being of others. In light of the recent events as well as research this other side of Adam Smith's work appears now more relevant. We analyze evidence of cooperative versus self-regarding behaviors and its relationship with the economy, human evolution and cultural values in a variety of settings. Readings include works from Adam Smith, Milton Freedman, Charles Dickens, David Rockefeller and Chris Gardner

FYSB BC1294 ART, SEX # AMERICAN CULTURE. 3.00 points.

Sex is the ultimate forbidden public topic and yet from the New England Puritans' sermons to Bill Clinton's (in)famous affair, sex has often been publicly staged in dramatic, literary, religious, political, legal and social forums. In this seminar, we will explore how issues of sex and sexuality have insinuated themselves into the formation of American identity. We will examine texts from the seventeenth century to the present with a particular emphasis on the arts, politics and sex. Texts include Puritan sermons, Nathaniel Hawthorne's The Scarlet Letter, Tennessee Williams's Cat on a Hot Tin Roof, Suzan-Lori Parks's Venus, photographs by Robert Mapplethorpe, literature from Margaret Sanger's birth control movement, and theoretical works by Michel Foucault, Laura Mulvey and Judith Butler

FYSB BC1296 The Hudson: America's River. 3 points.

Called "America's River," the Hudson not only runs right behind our campus, but right through American history. Throughout American history the Hudson River has been a complex social and cultural entity, simultaneously a commercial conduit, a historic place at the center of the American Revolution, an industrial resource, and a privileged site for aesthetic experiences and the as birthplace of modern environmentalism. In this course you will explore the Hudson in relationship to the varied historical communities which have made meaning with it, identifying its contributions to discourses of nation and nature, but also race, gender, art and science. Readings will include literary works by Washington Irving and James Fenimore Cooper as well as essays and poems on subjects from fairies to trees to architecture to railroad travel. Close analysis of works of architecture, landscape design, and the iconic paintings of the Hudson River School will be accompanied by an exploration of the various methods for "reading" these objects and paintings. Visits to Museum collections and to sites along the river will be an important part of the curriculum.

FYSB BC1336 WITCHES. 3.00 points.

From ancient Greece to *Wicked*, the figure of the witch has fascinated and frightened, compelled and repulsed. In this seminar, we will analyze written and visual texts from Homer to The Brothers Grimm and beyond to develop a deeper understanding of the witch and the anxieties about gender and power that she represents

FYSB BC1337 Feminism & Politics of Anger. 3 points.

Of late, much attention has been given to the political role of feminist anger. However, not all feminist anger is received or interpreted in the same way; not all women have had the same freedom to express or represent anger. This course asks us to think critically about expressions and perceptions of anger. How do race, sexuality, gender identity, class, and ethnicity shape who is perceived as "angry" and whose anger is taken seriously? What other affects circulate and interact with anger: from rage and irritation to wonder and joy? We'll begin with the figure of the "feminist killjoy," as theorized by Sara Ahmed and will consider texts by authors including Audre Lorde, Adrienne Rich, June Jordan, Susan Stryker, and Nella Larsen, alongside manifestos, comics, film, visual art, and zines.

FYSB BC1400 Walking and Looking. 3 points.

Walking and looking are among the most "natural" of human activities. But what really goes on—physiologically, culturally, socially—when we engage in them? And what can we learn if we examine the two practices together, as fundamental parts of how humans explore their world? This course will study how the interacting behaviors of walking and looking have been represented in word and image, from the Bible to Impressionist painters to Hollywood films. Our base texts will be *Wanderlust: A History of Walking* by Rebecca Solnit (2000) and *On Looking: A Walker's Guide to the Art of Observation* by Alexandra Horowitz (2013).

FYSB BC1421 CROSSING BORDERS: AMERICAS. 3.00 points.

This course cuts across the borders between North, South and Central America and the Caribbean, in a search for the ways in which literature illuminates different aspects of American identity. We see the Americas as active historical and aesthetic agents, acting and interacting with each other. We might even say that modernity, in the sense of freedom from tradition, first developed in the Americas; as a result, the literatures of the Americas are characterized by diversity and innovation from their beginning. We will devote particular attention to the roots of Modernism in North and South America at the end of the 19th century, and the development of modernism, post-modernism and post-colonialism in the 20th and early 21st centuries through the study of key novels, short stories, and poetry from North and South America and the Caribbean. By looking at these works in their historical, political and aesthetic contexts, we can grapple with the multiple formations of American identities. Though class discussions are in English, students are encouraged, to the greatest extent possible, to read the works in the original language. Latinx students are particularly welcome

FYSB BC1422 Art, AIDS, Activism. 3 points.

This seminar explores the varied ways artists responded to the AIDS crisis of the 1980s and 90s. As government indifference persisted and deaths soared, artists became radicalized and contemporary art became a vehicle for activism. We will follow different tactics in artwork responding to AIDS including the use of gay desire as a weapon and emblem of the fight for visibility. The work we will view, think about, discuss, and write about is political, often angry, and always tinged with loss. Because AIDS affected marginalized communities, whose histories are still being told, we will examine a range of artists and materials that includes but also moves beyond the gay white male perspective. We will spend time with videos by Juanita Mohammad, visual art by Kia LaBeija, Feliz Gonzalez-Torres, and David Wojnarowicz, plays by Reza Abdoh and Tony Kushner, and the writings of Audre Lorde, Essex Hemphill, and Sarah Schulman. The final project will be an academic/creative hybrid: students will develop and pitch their own activist artwork.

FYSB BC1460 Memory. 3 points.

Memory is arguably the most important faculty that we possess. Not surprisingly, memory has been a ubiquitous topic in poetry, science, fiction, and in the media. Ironically, memory's value is perhaps best understood when it ceases to exist. Indeed, it isn't hard to imagine the devastation that comes with memory loss. In this course, we will survey various components of memory, including its role in writing and history, and its existence in various non-human populations. In addition, we will explore the fragility of memory, including distortions, unusual memories, and basic forgetting. Readings will include poems, theoretical essays, scientific articles, and fiction. Assignments will consist of essays, opinion pieces, and creative stories. Students will also participate in a final in-class debate. Readings will include works from William Blake, James Joyce, Mary Elizabeth Coleridge, Emily Dickinson, Ben Jonson, Mary Carruthers, Francis Yates, Aristotle, William James, Elizabeth Loftus, Spinoza, Luria, J.L. Borges, S. Freud, Oliver Sacks, Truman Capote

FYSB BC1465 On Dreams and Nightmares. 3 points.

In the dead of night it is not uncommon for even the most socially staid of individuals to fly, to ride an elephant at breakneck speed, to visit with the dead, or to expose themselves in public. Ancient Egyptians struggled to understand how and why we dream, as have countless individuals in other times and cultures. Some thinkers, ancient and modern, have dismissed dreams as essentially meaningless byproducts of natural processes. Others have taken dreams seriously as a primary means of access to an ordinarily imperceptible world in which one can commune with spirits and deities and receive from them valuable information about future events or even one's own health. The implications of this belief have led to vigorous theological debates as to whose dreams may be trusted (and, alternatively, whose need to be actively suppressed). From Freud onward, many have felt that dreams offer the key not to other worlds but to the complicated realm of the psyche. Over the course of our semester we'll look at how scientists, philosophers, hypochondriacs, pious pagans and monotheists, opium addicts, psychologists, playwrights, novelists, artists, and film directors have understood dreams and been inspired by them. Authors whose works we'll read include Aristotle, Cicero, Chung Tzu, Freud, Carl Jung, Andre Breton, H.P. Lovecraft, Jorge Borges, Ursula Le Guin, Neil Gaimon, and many others. Special attention will likewise be paid to the phenomenon of lucid dreaming and to the immense influence this practice has had on the creative output of both writers and filmmakers.

FYSB BC1466 Sustainability. 3 points.

Sustainability is being hailed as the solution that is going to link activists, citizens, and corporations to solve the world's environmental problems. However, there are many ways to define the term and assess the long-term effects of so-called sustainable measures. In this course, we will examine current and historical writings about human interactions with the environment in order to understand and identify our most profound environmental challenges and the most appropriate responses. Responding critically to the ideas of the past, we will also ask how our views have changed over time and what it might take to tackle the current large-scale.

FYSB BC1469 LIBERATION. 3.00 points.

Liberation can be defined as freedom from limits on thought or behavior. More specifically, it can be defined as setting someone (or oneself) free from imprisonment, slavery, or oppression. This seminar examines political, philosophical, aesthetic, and theological traditions and movements for liberation, with an emphasis on collective liberation

FYSB BC1474 Think Like A Scientist: From Plato to Hawking. 3 points.

This course will examine the "scientific worldview" throughout the history of the Western world. Key questions will include: how do science and philosophy intersect to influence our views of nature?; how does science help us to understand our place in the world and in the universe?; what happens when objective scientific inquiry clashes with political and societal interests?; how does popular opinion affect the way that science is conducted? In attempting to answer these questions, we will reflect on what it means to use what we have learned (from both science and history) to synthesize new viewpoints that can have a positive impact on our future.

FYSB BC1583 CARIBBEAN DIASPORA LITERATURE IN NEW YORK. 3 points.

Historically, Caribbean cultures have been profoundly affected and shaped by the massive displacement and migration of their populations. In this course, we will examine how this condition of displacement is articulated in the writings of the Caribbean diaspora and how these literary representations of mobility, migration, and intercultural contact reflect current globalizing processes and discourses. Texts will be drawn from the Francophone, Anglophone, and Hispanic Caribbean diaspora. These include the novel *The Mimic Men* by the recent Nobel-Prize-winning Trinidadian writer V.S. Naipaul; the novel *Lucy* by the Antiguan writer Jamaica Kincaid; and short stories by Junot Díaz and Edwidge Danticat, writers of Dominican and Haitian descent respectively, the latter a Barnard graduate. These readings will be complemented by essays from critics such as Edouard Glissant, Stuart Hall, and James Clifford.

FYSB BC1597 Taboo and Transgression. 3 points.

This seminar explores taboo and transgression within a range of mythic, scientific, anthropological, psychoanalytical, feminist, and literary work. Topics include the treatment of the corpse during the Paleolithic, the centrality of the incest taboo in kinship studies, and the equation of secular modernity with the successive breaking of taboos.

FYSB BC1598 BUILDING UTOPIA. 3.00 points.

Building Utopia examines the rich tradition of utopian thinking in literature, social philosophy, architecture, and the visual arts. Here, utopia is explored in its modern form: as a call to transform the world through human planning and ingenuity. Aside from an important excursus on Thomas More's pivotal novel *Utopia* (1516), the course centers on nineteenth- and twentieth-century thinkers whose often wild and idealistic imaginings profoundly affected the shape of the real world. We'll read and explore the works of Charles Fourier, Edward Bellamy, the Italian Futurists, and Le Corbusier, among many others. The purpose of the course is to better understand the role that the utopian imagination has played in the construction of power

FYSB BC1599 Tipping Points. 3 points.

The printing press helped pave the way for the scientific revolution and the invention of human rights. What will transpire in the digital age of artificial intelligence and globalization? This seminar questions whether intellectual, economic, technological, and ethical tipping points transform what it means to be human. Authors include Locke, Jefferson, Shelley, Freud, Rushdie, Ishiguro, McLuhan, Lyotard, and Offill.

FYSB BC1707 CONFESSION. 3.00 points.**FYSB BC1709 DRAMA, THEATRE, AND ART. 3.00 points.**

Drama, Theatre, and Art will consider the ways in which the performing arts and the visual arts help change the ways we see art and life. Beginning with reimagined classics and Shakespeare's plays, we will move to the 18th-21st centuries and note how views of individual agency, social justice, and collective responsibility have changed over time. We will also ask what the performing arts and visual arts of the past have to say about issues confronted in the arts of the present. This will help us to understand how evolving aesthetic movements such as realism, impressionism, and modernism promote and critique our cultural perspectives and our social values. Plays include Sarah Ruhl's *Eurydice*, Shakespeare's *Twelfth Night*, Timberlake Wertenbaker's *Our Country's Good*, Elizabeth Baker's *Partnership*, Anton Chekhov's *The Seagull*, Thornton Wilder's *Our Town*, Lorraine Hansberry's *A Raisin in the Sun* and *Les Blancs*, Yasmina Reza's *Art*; novels include Virginia Woolf's *To the Lighthouse*; musicals include Stephen Sondheim's *Sunday in the Park with George*. Art from the Metropolitan Museum, The Museum of Modern Art, and other sites will promote student engagement, visual and verbal interactions, and cross disciplinary conversations

FYSB BC1713 THINGS AND STUFF. 3.00 points.

How do our material choices shape our cultural and individual narratives? How do the things we make, buy, use, keep, and discard tell stories, impact our environment, and help define who we are? Americans create over 125 million tons of landfill every year, and up to 60%-80% of global greenhouse gas emissions have been traced to household consumption (food, stuff, and transport). With this contemporary reality as our reference point, we will examine how designed and built objects contribute to the human story over time, and how our decisions about "things and stuff" might change our stories moving forward

FYSB BC1715 Artful Adaptations. 3.00 points.

Can the violent fantasies of a fairytale shape romantic comedy? Can dance tell the same story as classical tragedy? What does Bollywood have to do with Renaissance England? Can ancient mythology animate American slave narrative? As biologists ask why does life appear in such a dazzling array of forms, this class asks why do certain stories get told and retold in such a dazzling array of varieties? Using as possible textual anchors *Snow White*, *Medea*, and *Romeo and Juliet*, this course will explore poems, short stories, plays, novels, paintings, films, musicals, dance, illustration, advertisement, song, memes, and other cultural objects to consider the accretion of meaning that results when stories cross, historical, cultural, and generic borders

FYSB BC1722 WRITING AMERICAN LIVES. 3.00 points.

This interdisciplinary course explores the problem of representing American experience, one's own or someone else's, in the context of a nation-state's fraught history of self-fashioning. What motivates a person to tell his or her life story, or to investigate someone else's, and how are these stories bound by both authors and readers to narratives of citizenship, belonging, and/or exclusion? What motivates a writer to share what she shares, and what motivates an audience to demand what it demands from her? What claims about the exemplary or excessive qualities of the life story are made, or are emulated, by the life story's readers? In addition to critical consideration of biography and memoir in traditional media, your work in this class will include examinations of the fake memoir and the digital overshare; you will also be invited to curate a branded footprint of your own, using tools of new media

FYSB BC1724 Postcolonial Comics. 3 points.

In postcolonial studies, we look at the history, politics, and culture of countries that were once colonized. In literature, this work is done through careful close-reading and paying attention to how the struggle for independence is represented in literary texts, both on an individual and collective level. In this course, we will push the boundaries of the discipline of postcolonial studies and use its methodologies to read about locations and peoples that weren't formerly (or formally) colonized (for example, Ancient Greece, New Orleans during Hurricane Katrina, 20th century Iran, and female Jewish immigrants in New York city circa 1910). We'll also investigate why graphic novels present an appropriate medium for studying postcolonialisms.

FYSB BC1725 MYSTICS: MEDIEVAL AND MODERN. 3.00 points.

This course will compare and contrast medieval and modern mysticism, or aspirations toward the sublime. Through careful examination of literature, art, and music, we will explore how peoples from distinct cultures and time periods engaged in various rhetorical strategies to express their union with God. We will discuss how mystics of all stripes, from Hildegard of Bingen, a twelfth-century German nun, and Rebecca Cox Jackson, a formerly enslaved person in antebellum Philadelphia, to Kazimir Malevich, the founder of Soviet Suprematism, enlisted the written word, bodily gesture, vocalized song, and painted form in their attempts to convey the transcendent. Museum visits are required

FYSB BC1727 Periodic Tales of the Elements. 3 points.

What is the "cosmic history" of the atoms that compose our bodies and the world around us? How do these elements come together to make us us during life's fleeting journey? What becomes of our atoms after we die? In happy coincidence, 2019 is the 150th anniversary of Dimitri Mendeleev's publication of an organized chart of the chemical elements, as well as the year of Walt Whitman's 200th birthday. We will celebrate the Periodic Table with Mendeleev as one of humanity's great intellectual achievements and sing elemental songs with Whitman on scales minute and enormous, instantaneous and eternal. Readings to include Whitman's "Song of Myself," Primo Levi's *The Periodic Table*, Oliver Sacks's *Uncle Tungsten*, and a selection of Shakespeare's Sonnets.

FYSB BC1729 AMERICA'S SOCIAL DIVIDES. 3.00 points.

This first year seminar explores some of the central cleavages dividing American society today, along such lines as social class, region, race, and political ideology. We will focus how social divisions are constituted, experienced, questioned, and bridged. Most of the assigned material will be based on primary research in the social sciences, along with a small number of documentaries, novels, and/or memoirs. Assigned books may include Arlie Hochschild, *Strangers in their Own Land*; Eric Klinenberg, *Palaces for the People*; Barbara Ransby, *Making All Black Lives Matter*; Rachel Sherman, *Uneasy Street: The Anxieties of Affluence*; and Jeffrey M. Berry and Sarah Sobieraj, *The Outrage Industry: Political Opinion Media and the New Incivility*

FYSB BC1730 THINKING THE ECOLOGICAL CRISIS: A LATIN AMERICAN PERSPECTIVE. 3 points.

What is the origin of the notion of “natural resource”? What is the connection between past and present colonialism and the current ecological crisis in Latin America? And, what is the relation between cultural diversity and a sustainable economy? In this seminar, we will explore these questions (and more) by looking at the history of Latin America through primary and secondary texts, including Latin American Literary, philosophical, aesthetic, legal, political, and economic texts. We will read both canonical and non-canonical writings from the colonial and modern periods as well as indigenous literature. The course will place this tradition in dialogue with the most recent developments of eco-feminism, materialist ontologies, discussions of environmental justice, “deep ecology,” and the rights of non-human nature. Readings will be selected from Domingo Sarmiento, Jose de Acosta, Andres Bello, Domitila Barrios, Ivonne Guevara, Enrique Leff, Luis Sepulveda, Donna Haraway, Jason Moore, McKenzie Wark, Timothy Morton, Naomi Klein, and John Clark. Throughout the course, we will consider how indigenous ideals of solidarity, reciprocity, and emancipation offer an alternative to strategies of domination.

FYSB BC1731 From Epic Hero To Superhero. 3.00 points.

The enormous box office success of recent moves like *Avengers: Endgame*, *Wonder Woman* and the *Batman* franchise attests to our present societal fascination with heroes. Yet this fascination is a millennia-old phenomena. *Gilgamesh*, one of the oldest surviving literary works in the world, tells the story of a great hero and his accomplishments. What accounts for the enduring appeal of heroes throughout history, across cultures and in different forms of media? What connects ancient epic heroes like *Gilgamesh* to modern superheroes like *Batman*? This seminar will seek answers to these questions by comparatively studying a range of artistic texts depicting heroes. Course readings will include *Gilgamesh*, *Beowulf*, *Gladiator*, *The Dark Knight Returns*, as well as studies by Marco Arnaudo, Joseph Campbell and Grant Morrison, among others

FYSB BC1732 FEMINISM # POLITICS OF ANGER (WKSHOP). 4.00 points.

Of late, much attention has been given to the political role of feminist anger. However, not all feminist anger is received or interpreted in the same way; not all women have had the same freedom to express or represent anger. This course asks us to think critically about expressions and perceptions of anger. How do race, sexuality, gender identity, class, and ethnicity shape who is perceived as “angry” and whose anger is taken seriously? What other affects circulate and interact with anger: from rage and irritation to wonder and joy? We'll begin with the figure of the “feminist killjoy,” as theorized by Sara Ahmed and will consider texts by authors including Audre Lorde, Adrienne Rich, June Jordan, Susan Stryker, and Nella Larsen, alongside manifestos, comics, film, visual art, and zines. NOTE: This 4-credit version of First-Year Seminar (FYS)—FYS “Workshop”—is specially designed for students who believe they would benefit from extra support with their critical reading and academic writing skills. In addition to regular seminar meetings twice per week, students are also required to participate in six ‘writing labs’ over the course of the semester. The writing labs for this section will take place on the following Fridays, 11:40 am-12:55 pm: 1/31, 2/14, 2/28, 3/6, 3/27, and 4/3

FYSB BC1733 Women # Comedy. 3.00 points.

“What a language it is, the laughter of women, high-flying and subversive. Long before law and scripture we heard the laughter, we understood freedom.” -Lisel Mueller “I’m not funny, what I am is brave.” - Lucille Ball This course focuses on the intersection between comedy and gender, race, class and sexuality. We will explore laughter as a subversive act and how the identity of a “funny woman” can be both dangerous and liberating. As Margo Jefferson writes, “Given the history of social restriction and sexual regulation, how many women have been in a position to – or been willing to – take these risks?” We will explore how the tools of comedy can be used to make mischief, to transgress the bounds of genre and form and to contest popular ideas about difference and power. How can humor be illuminating? How can humor be feminist? How can humor be intersectional? How can humor help us tell the hard truths? Can we laugh at oppression without laughing it off? At every step, we will put our inquiry into action – trying our hand at satire, sketch and storytelling to explore our own intersections. Readings may include Audre Lorde’s *Sister Outsider*, Samantha Chanse’s *Lydia’s Funeral Video* and Patricia Lockwood’s *Motherland Fatherland Homelandsexuals*

FYSB BC1734 CULTURE, IDENTITY, & THE SELF. 3 points.

In this First Year Seminar, we explore how people discover themselves and others in the frameworks of different cultures and times. Our focus is on the idea of the self (who are you?) and the other (who are you not?), and we investigate these concepts as they appear in six great books from Western and Non-Western sources. The texts include: *The Epic of Gilgamesh*, *The Aeneid*, *The Golden Legend*, *Austin’s Emma*, *Satrapis’s Persepolis*, and *Woolf’s A Room of One’s One*. Additionally, we will contrast these with their movie versions and a visit to a museum. Students in this class will develop key fundamental skills, such as active reading and analysis, how to write in different rhetorical modes, and how to verbalize and present ideas effectively.

FYSB BC1735 IS GOD DEAD?. 3 points.

Friedrich Nietzsche’s 1882 pronouncement that “God is dead” is one of the most notorious and widely-referenced criticisms of the relationship between Theology and Modernity in contemporary thought. But what does it mean to say “God is dead,” in fact? What was Nietzsche talking about? How might this statement be “true”? How might it be inaccurate? In this class, we will use Nietzsche’s statement as a jumping-off point to begin thinking about how modern ideas about the continuities and distinctions between religion and politics developed between the 16th to the 20th centuries in such a way that to say “God is dead” became a meaningful summation of Modernity. In addition to Nietzsche, we will read classical and critical works of political theology from a diverse array of authors such as Jean Bodin, Thomas Hobbes, Benedict de Spinoza, Beatriz Kampa Vita, Carl Schmitt, Max Weber, Zora Neale Hurston, W.E.B. DuBois, and Simone Weil to answer for questions: What does it mean to talk about God? Is God dead? If so, when and how did God die? And if God is not dead, how has God been kept alive — and where can this figure be found today?

FYSB BC1736 TECH & SOCIETY: GOOD, BAD & OTHER. 3 points.

Computing and information technology has improved our lives in many ways, contributing to significant advances in science and medicine; making it easy and efficient to communicate with people across the world; and enabling online business and recreational activities; and more. However, the same technologies can also have negative impacts, such as the move to a surveillance society and surveillance capitalism; major disruptions in the workforce of the future as automation becomes more widespread; and social media contributing to depression in young people and the weaponization of disinformation. This seminar will explore technical, cultural, legal, and economic factors that can impact how computing technology is used, while raising the question of how to encourage and ensure that these technologies are used for good, while eliminating or mitigating the potential negative impacts.

FYSB BC1737 SURVEILLANCE, CONTAGION, AND CARE. 3 points.

Very recent events have forced local, regional, and international communities to once again confront contagion as a globally shared event. This seminar examines some of the historical and contemporary expressions of contagion as moral and ethical experience. We will interrogate the surveillance systems that are utilized by modern governments and economies not only as public health goods and private sector assets, but also legacies of conquest, colonialism, and capitalism. Finally, we explore the role of care within these systems, its inherent power dynamics, and the politics of vulnerability. Texts include (and are not limited to) Katherine Anne Porter’s *Pale Horse, Pale Fire*; excerpts from Camus, Galeano, Sontag, Foucault; historical and sociological accounts of tuberculosis; anthropological and ethnographic accounts of the global HIV epidemic; feminist philosophers on the politics of care and the sciences (e.g., Sandra Laugier, Annemarie Mol); and written and audio journalism topical to these accounts.

FYSB BC1738 PERFORMING PUBLICS # POLITICAL ACTIVISM. 3.00 points.

This seminar examines how different publics engage in the political process through performance. We start our exploration with the notion of “the publics” as introduced by the twentieth-century German philosopher Jürgen Habermas and then expand our view of this concept to the contemporary political setting. We will look at both how elected representatives use theatrical tropes to shape their public personas, and equally at how popular protests stage large scale public interventions. How might performance as a series of citational strategies allow us to think about the political process? We will draw heavily on the works of feminist performance scholars like Judith Butler, Shannon Jackson and Peggy Phelan, who discuss the different ways in which gendered bodies navigate public space. In this seminar students will be required to draw on their personal experiences of public performances. This may be in the shape of their own activism, politics in their hometowns, their favorite public figures, or memorable live shows they have watched. Writing ethnographically, students will engage with the theorists we read to investigate how performance has shaped their lives. For Fall 2020 we will be focusing on public responses to the COVID-19 crisis. Different populations reacted differently to the global pandemic. From local politicians, medical professionals, frontline workers to everyday citizens, everyone reflected, in different measure, on the loss of the public sphere. We assembled in the digital commons instead. How did we deal with our own isolation from public life while at the same time thinking of keeping the collective body safe from contagion? What are the ways in which we engaged with our community to reaffirm a common humanity?

FYSB BC1739 Dead and Undead (Wkshop). 4.00 points.

What does it mean to be dead? Why the fascination—across time and culture—with conceiving of ways in which the dead can become un-dead? And how is being undead different from being alive? To investigate and trouble the boundaries between life and death (and un-death), we will analyze works from various genres and media, discussing near-death experiences, beating-heart cadavers, and a range of figures including zombies, ghosts, and other revenants. Objects of study include texts by Zora Neale Hurston, Ovid, Montaigne, Shakespeare, Edgar Allen Poe, Nalo Hopkinson, and Mary Shelley; music by Camille Saint-Saëns; artwork by Hans Holbein and Breughel; television and film (*Buffy the Vampire Slayer* and Tim Burton’s *Frankenweenie*); and more. NOTE: This 4-credit version of First-Year Seminar (FYS)—FYS “Workshop”—is specially designed for students who believe they would benefit from extra support with their critical reading and academic writing skills. In addition to regular seminar meetings twice per week, students are assigned a Writing Fellow who they meet with for one hour every other week. APPLICATION IS REQUIRED BY 11/3 @ 5PM – please fill out this form: <https://forms.gle/dZ9B1t4oxaRmE7c67>

FYSB BC1740 Approaching Trauma. 3.00 points.

Trauma today is evoked in a variety of contexts. But what precisely are we referring to when we use this term? Drawing on psychoanalytic and anthropological approaches, our seminar will interrogate the politics of diagnosing, treating and healing from disturbing past events. We will watch films and read case histories of hysteria, studies of infants, and attempts to integrate mind, brain and body. The course will also examine the rise of PTSD, attend to questions of intergenerational transmission, and learn about responses to national and racial trauma. Featured authors include Sigmund Freud, Beatrice Beebe, Allan Young, Marilyn Ivy and Resmaa Menakem

FYSB BC1741 Science and Society on Screen. 3 points.

When we turn on TV and go to the movies we are typically looking to be entertained. When it comes to science on screen is the purpose for entertainment or education? How do science-related movies and TV reflect but also impact society? Can movies and TV be used to discuss the complex intersection between science and society and how are they received by the public? To discuss these questions and more, we will analyze texts, including *Silent Spring* and *Demon Haunted World* and visual media such as *Hidden Figures*, *The Twilight Zone*, and *Erin Brockovich*.

FYSB BC1742 Journeys. 3.00 points.

The journey is a central motif in narrative writing dating back many thousands of years. The classical example of the journey comes from the experiences of Odysseus in Homer's *The Odyssey* but journeys also feature in the narratives of the Hebrew Bible as well as the Buddha. The idea of the journey as a transformative experience has remained relevant and, indeed, become so prevalent that it is arguably the foundation of modern popular culture. This class examines the idea of the journey (and travel in a wider sense) through five primary analytic frameworks. The course begins (framework #1) with the interplay between travel and wonder as epitomized in the classical Islamic literary tradition through the travel accounts of Battuta and the famous story of Sinbad. It then turns to Jonathan Swift's use of travel as a means for social satire in *Gulliver's Travels* (framework #2) before drawing on William James' psychological framework to consider the journey as a metaphor for conversion (framework #3) through the example of Malcolm X. The course then considers travel writing in the modern period as a performative or confessional act through representative examples from Kerouac, Didion, Krakauer, and Gilbert. This is followed by an engagement with Joseph Campbell's notion of the monomyth as embodied by the films *Star Wars: A New Hope* (1977) and *Spirited Away* (1991). The final reading in the course centers on Octavia Butler's *Kindred* which depicts a series of voyages through time that demand a reckoning or confrontation with the past

FYSB BC1743 Existentialism in Lit # Film. 3.00 points.

This seminar explores literary and cinematic depictions of themes in existential thought. The term "existentialism" was first coined to refer to German and French philosophy from (roughly) 1920 to 1950, but it also applies to writers of the previous century, especially Kierkegaard, Dostoevsky, and Nietzsche. Moreover, its central subjects – perennial matters of human concern such as freedom, anxiety, alienation, faith, the meaning of life -- can be found in fiction and cinema, from Kafka to Martin Scorsese. Authors will also include Camus, Sartre, and Beauvoir, and we will watch and discuss films directed by Carol Reed, Alain Resnais, Jean-Luc Godard, and Michelangelo Antonioni

FYSB BC1744 Here/There: Migrant Narratives. 3.00 points.

This first-year seminar brings together texts, films and contemporary art that focus on migrant, immigrant, refugee, expat and exile experiences. We will explore how migrant subjects negotiate dominant discourses of nationality and citizenship, and how their identities as migrants intersect with their other positionalities, with a particular emphasis on race, gender and queerness. Some questions we will consider: How are immigrant, migrant and refugees marginalized, racialized and queered by dominant discourses? How do immigrants, migrants and refugees negotiate belonging when they cross cultural, national, linguistic and religious borders? How do these authors, filmmakers and artists resist erasure and complicate our understanding of home, belonging and identity? Readings are subject to change but will likely include literary and nonfiction texts by writers such as James Baldwin, Fatimah Asghar, Ocean Vuong, Karla Cornejo Villavicencio, Jamaica Kincaid, Viet Thanh Nguyen, Kazim Ali, Edward Said and Hannah Arendt; films such as *Saving Face* and *Flee*; as well as contemporary visual art, op-eds and other media

FYSB BC1745 The Soul of the Nation?. 3.00 points.

One will hear from across the political spectrum references to an entity called the "soul of the nation." But how to think about this mystified idea? This seminar explores the literary history of the idea of the soul in connection with the question of American identity. By way of interdisciplinary readings from theology, philosophy, and science in accord with readings in American prose and poetry, we come to see how the concept of the soul changes over time as scientific innovation leads culture to reassess what counts as reality. We learn to navigate the arc and contour of this literary history and sharpen our sensitivity to what's at stake in contemporary uses of the soul's idea, insofar as they inflect how we think about important questions as what should be valued about the nation and within our lives. Readings will include James Baldwin, St. Augustine, René Descartes, Ralph Waldo Emerson, Henry David Thoreau, Charles Darwin, Audre Lorde, and Antonio Damasio

FYSB BC1746 WOMEN OF COLOR IN SPECULATIVE LITERATURE. 3.00 points.

"The Future is Female" except in science fiction, where it still looks pretty white and male. What happens when women of color take on such tropes as space exploration, cybernetics, superpowers, and the end of the world? How can women of color change the way we not only think of the future, but think of the present as well? In this first-year seminar, we'll look at how speculative literature approaches the intersections of race, gender, class, sexuality, technology, and environmental concerns. Readings will include work from such authors as Octavia Butler, Franny Choi, Sam Chanse, G Willow Wilson, and Tananarive Due with potential critical readings from Lisa Yaszek, Charlotte E Howell, and bell hooks

FYSB BC1747 Writing Caribbean Feminisms. 3.00 points.

This course offers an in-depth engagement with the Critical Caribbean Feminisms series, organized at Barnard College since 2015. These in-person conversations with contemporary Caribbean and Caribbean diaspora women authors and the accompanying podcast series center their experience with race, gender, diaspora, and writing. In this course we consider how the authors' thoughts on the Caribbean, feminism, and their experience in the U.S. are represented and expanded upon in their writings through close readings of their novels, short stories, essays, and poems. The course culminates with each student proposing a Caribbean woman writer to add to the podcast series and suggesting how this writer's voice resonates with and expands on the authors and themes studied throughout the course. Some of the authors we will read and discuss are Jamaica Kincaid, Audre Lorde, Claudia Rankine, Edwidge Danticat, and Roxane Gay, among many others

FYSB BC1748 Immortality, Death, # Meaning in Life. 3.00 points.

How are conceptions of the self tied to notions of temporality and mortality, life and the end of life? This seminar will take us on an exploration of various attitudes one can have towards the prospect of death, and what such attitudes might reflect about the meaning of life. We will address the coherence and desirability of immortality in both its literal and metaphorical senses. In what manner might one 'live on' through one's creations? Does death render life meaningless, or does it give meaning to life? Works include readings by Tolstoy, Albert Camus, Virginia Woolf, as well as poetry, artwork, and plays

FYSB BC1749 Psychopolitics. 3.00 points.

What shapes our psychic lives today? How are histories of pain and possibility transmitted, ruptured, and transformed across generations? This class draws on anthropology, psychoanalysis, critical theories, literature, and poetry to explore the politics of the psyche. We will read writings by bell hooks, Frantz Fanon, Natalie Diaz, Ocean Vuong, Sigmund Freud, Michel Foucault, Gananath Obeyesekere, David Eng, Shinhee Han, and others. We begin with common encounters that inform and disrupt our lives, move to concepts of self and culture, explore how these are inflected by violent histories and extractive economies, and end with questions of what lives on

FYSB BC1750 Literature on Trial. 3.00 points.

Why are novels so interested in trials? What is the relationship between literary and legal interpretation, and between the role of a reader and that of a juror? How do we interpret "facts" in a literary text versus a legal context? What does justice look like in a literary work? In this course, we will read works that feature trials in order to explore the relationship between the literary and the legal, two very different ways of making sense of the world that collide in literature about trials. We will put literary characters on trial in order to explore how guilt, judgment, and redemption operate in the works we read, and to consider our own role and responsibility as readers. Readings will include works by James Baldwin, Fyodor Dostoevsky, Vladimir Nabokov, Claudia Rankine, and Marjane Satrapi

FYSB BC1751 Creativity and Inspiration. 3.00 points.

Where do creative ideas come from? The Muses, according to Plato. The unconscious, according to some later thinkers. One thing both answers share is the thought that creative ideas come from something "other than" or "not controlled by" the creator – or, as we'll put it, that creativity requires inspiration. In this class, we will explore this and related ideas in Western thinking about creativity. In doing so, we'll examine how creative people themselves, from painters to mathematicians, have described their own creative process and experiences. We'll examine approaches to creativity from the Taoist tradition, comparing them with the Western approaches that will be our main focus. At the end of the class, we'll think about whether computer programs can be creative, and what it might mean for claims about inspiration if they can be. Readings will include selections from James Baldwin, Margaret Boden, Chung-yuan Chang, Samuel Taylor Coleridge, bell hooks, Immanuel Kant, Henri Poincaré, Flannery O'Connor, Elizabeth Robinson, and others

FYSB BC1752 Dreamstories. 3.00 points.

The complex relationship between dreaming and narrative storytelling is as contemporary as it is ancient. In this first-year seminar, we will examine Greco-Roman, medieval, modern, and postmodern representations of dreaming in literature, philosophy and film - texts that range from classical epic (Homer, Virgil) through medieval allegory (Dante, Machaut) to psychoanalysis (Freud and his contemporaries), queer metafiction (Winterson, Sarduy, Lynch), and beyond. We will consider among other topics how dreams raise fundamental questions about being, memory, desire, interpretation, and Utopian politics. Students will practice critical writing and discussion, and also have the opportunity to engage their own dreams and fantasies both analytically and creatively

FYSB BC1753 Illusion. 3.00 points.

How do you know that what you see or sense is real? What if what you thought you knew about the world, other people, and yourself, was wrong? In this course we will look at the idea of illusion through several different discourses including philosophical, religious, scientific, political, and artistic. We will consider skeptical positions on the external world, consciousness and free will; we will look at debates about self-deception and political ideology. We will discuss fantasies and dreams, and consider whether being in love or being a child have illusory dimensions. And throughout we will consider works of art (especially film and photography), and will ask whether art itself is a kind of illusion. We will also consider normative and ethical questions: is it always bad to be under some illusion? Are individuals blameworthy when they are taken in by an illusion? Can illusions ever be helpful? Historical authors include: Plato, Vasubandhu, Sextus Empiricus, Descartes, Marx, Nietzsche, Freud, Baldwin, Butler. Films to be screened include: Imitation of Life and The Last Unicorn

FYSB BC1754 Border Stories (Wkshop). 4.00 points.

The topic of this Seminar course takes an interdisciplinary approach to thinking about, and traversing, the constructs of the border. The U.S.- Mexico border delimits more than nations; it is both a political and a social geography, marked by bodies of water, mountains, walls, ideologies, repression, and resistance. The crisis currently taking place at the border is an unfolding story with many narrators. We will study literary texts: fiction, poetry, and memoir written by those who know the border, and borderlands, intimately. We will also engage histories, social movement doctrine, and media coverage to mine the stories they tell. NOTE: This 4-credit version of First-Year Seminar (FYS)—FYS “Workshop”—is specially designed for students who believe they would benefit from extra support with their critical reading and academic writing skills. FYSB BC1755 Race, Science, # Reproductive Justice. 3.00 points.

This course is about reproduction—a biological and social process that is often the target of deep-seated ideas about identity, nation, culture, and definitions of life. With an emphasis on intersectional approaches to reproductive justice, we’ll read a variety of literary works, journalism, films and television shows, public health studies, and policy/legal texts, all of which differently narrate, debate, script, and theorize about reproduction. Questions we will explore include: what stories do we tell about reproduction? What role have innovations in reproductive technologies played in this process, from contraceptive uses of medicinal plants, to in-vitro fertilization and so-called “DIY” abortions, to population and development projects all over the world? How do long histories of obstetric violence inform modern definitions of reproductive health, rights, and justice? What kind of world does an intersectional and inclusive reproductive justice movement urge us to create? Please note that some of the material for this course includes references to or descriptions of obstetric violence

FYSB BC1756 Reading Dance. 3.00 points.

Dance as action takes place in a variety of places and by organisms, and is represented in literature, film, the proscenium stage in just as many ways as there are forms of dance. Reading Dance will explore how authors employ movement to enrich narrative, reflect the human condition, view class and gender, experience how choreographers use text to support a silent form of communication and consider choreography itself text. Primary sources will include Shakespeare, Jane Austen, Ntozake Shange, T.S. Eliot, Zadie Smith, Martha Graham, Michael Jackson, and Brian Friel

FYSB BC1757 Change and Climate Change. 3.00 points.

Change and Climate Change explores how we spark, facilitate, and accelerate change - or block, impede, and slow it - on the individual, social, and planetary levels. In the context of the climate emergency and the vast global social and environmental changes it both brings and demands, this course asks: what is change, and how do we do it? Students will identify and characterize different change processes, and analyze strategies for adapting to, mitigating, accelerating, or shaping change. Readings and projects will explore activism, education, research, storytelling, and performances by scientists, artists, indigenous leaders, and activists including Paul Hawken, Ruth DeFries, Janine Benyus, Cynthia Li, Atul Gawande, Octavia Butler, Adrienne Maree Brown, Rosi Braidotti, Ian Hodder, Robin Wall Kimmerer, Elizabeth Kolbert, Naomi Klein, and Suzan-Lori Parks. Student projects will explore how natural and human systems shape and experience change and apply those lessons to the current climate challenge

FYSB BC1758 The Secret Life of Stuff. 3.00 points.

“It has a mind of its own,” we shriek as the TV channels change without our input or the garage door opens when no one is home. Things can spark joy, grant authority, lead to our demise, and reveal our deepest secrets. They mediate social relationships, define political alliances, and provide economic opportunities. Sometimes it is not the presence of things but their absence – a misplaced phone, an expired passport, a childhood home – that more keenly shapes our reality. While people make objects, objects also make people. This class will investigate the secret life of stuff, from maps to cups and buildings to body parts, to explore how inanimate objects can be seen to have an agency and power of their own. Our discussions will draw on a wide array of authors from a variety of fields, including Bill Brown, Martin Heidigger, Anni Albers, Neel Ahuja, Katherine Ott, Bruno Latour, Donna Haraway, and Anna Tsing. To accompany these texts, we will also turn to other, less traditional sources of information, from podcasts to museum exhibits and our own personal histories with things

FYSB BC1759 Political Fare: Food # Freedom - Philosophies and Fictions of Food and Freedom. 3.00 points.

In *Wretched of the Earth* (1961), Franz Fanon famously writes that to “hunger with dignity is preferable to bread eaten in slavery.” Taking this provocation as our starting point, this course will chart the function of food and hunger in philosophical and political conceptions of freedom. From Jonathan Swift’s “A Modest Proposal” (1729) to the political-promise-turned-fiction of 40 acres and a mule following the U.S. Civil War, we will also examine the legal, historical, and literary representations of food at the heart (and belly) of the human story. Core texts will include Hannah Arendt’s *On Revolution* (1963), Andrea Stuart’s *Sugar in the Blood: A Family’s Story of Slavery and Empire* (2016), Paul Beatty’s *The Sellout* (2015), Vandana Shiva’s *Manifestoes on the Future of Food and Seed* (2007), Bong Joon-ho’s *Okja* (2017), and Andreas Johnsen’s *Bugs* (2016). Along the way, we will investigate how the shifting conception of the human as a political and ecological concept is defined in relation to hunger, farming, and animal rights

FYSB BC1760 Storytelling. 3.00 points.

Why do we tell stories? Why do we feel a need to relate the things that happen to us? Why do writers and artists make things up? In this section of First-Year Seminar, we will explore these questions as well as others connected to the fundamental practice of storytelling. We will read and discuss short stories, novels, and memoirs that reflect on or call into question the narrator’s reasons for telling the story. We will also consider essays by literary critics, psychologists, and scientists on the human impulse to narrate. Literary texts may include works by Henry James, Franz Kafka, Jorge Luis Borges, Lydia Davis, Alice Munro, Haruki Murakami, and Carmen Maria Machado. Critical and theoretical texts may include works by Sigmund Freud, James Baldwin, and Joan Didion

FYSB BC1761 American Utopias. 3.00 points.

Can the idea of an imaginary island think us out of the world we know? To what degree are all attempts at world-building doomed to repetition? Can Utopia be separated from its colonial roots? Beatriz Pastor Bodmer has defined utopia as “movement, transformation, incessant change” against the grain of history. We will read and rethink Utopia about and from the Americas. Authors include Sor Juana Inés de la Cruz, Edward Bellamy, Luisa Capetillo, W. E. B. Du Bois, Magda Portal, Octavia Butler, and Emily St. John Mandel

FYSB BC1762 Poetry, Identity, Word Sorcery. 3.00 points.

Poetry is a very complicated series of words found in perpetually dust-covered books written by white men who died a half of century before you were born. Or is it? Poetry is archaic. Poetry is academic. Poetry is hard. Or in the words of Ntosake Shange, it’s “razzamatazz hocus pocus zippity-do-dah.” The magic of poetry is not in its mystery, but in its ability to connect with people, and to connect people with people, even across space and time. In this class we will explore how poetry speaks to identity, speaks to history, and speaks intersections of race, gender, sexuality, tragedy, triumph, and trauma. We will read poetry – mostly contemporary poets, mostly female-identified poets, mostly poets of color, and mostly poets from the margins – read theories on poetry, and maybe try our hand at a little poetry writing. Readings will include such authors as Tina Chang, Yolanda Wisher, Jillian Weise, Vanessa Angélica Villarreal, Tracie Morris, Audre Lorde, Laylia Long Soldier, and the word sorceress herself Sonia Sanchez

FYSB BC1763 Writing and the Environment. 3.00 points.

Beginning with the Popol Vuh, the Mayan myth of creation, which records the first moment of contact with the Spanish conquistadors about 1555, we will explore American nature writing up to the present. Description and interpretation of nature has shaped artistic representation from the very beginning of human history. We will look at indigenous narratives, at activist texts, and at writing and images from the Americas in relation to selected European works, moving from Crèvecoeur’s “Letters from an American Farmer” (1765) to excerpts from Wordsworth’s “Prelude” in England (1798), which in turn influenced Emerson’s essay “Nature” (1836) and Thoreau’s writing in *Walden* and “Civil Disobedience” (1851). Twentieth century works include selections from John Steinbeck’s *The Grapes of Wrath* (1939); Rachel Carson’s “*Silent Spring*” (1962); and John McPhee’s “*Encounters with the Archdruid*” (1971). Painting, photography and films will be included, with images from the Hudson River School, photographs of National Parks, and contemporary environmental films. An essential element is the study of activist organizations alongside international collaborations (COP27), the UN Sustainable Development Goals, and issues of environmental justice. Finally, we will both write and analyze contemporary environmental journalism, including Bill McKibben’s “*The End of Nature*” and Liz Kolbert’s *The Sixth Extinction*

FYSB BC1764 On Friendships Between Women. 3.00 points.

How do we reflect on the intimacies of friendship, and what might be particular to such intimacies between women? What makes a friendship good or bad? What tensions or correspondences might we trace between friendship and adjacent categories of relationality—'frenemies,' sisterhood, lovers? In this course, we will apply close analytical examinations of literary and cultural texts in order to theorize the various shapes friendship may take. Throughout the semester, we will question how the friendships we encounter are situated within and/or against a variety of cultural and socioeconomic contexts. In doing so, we will explore friendship's conceptual role in narratives of emotional development, education and intellectual life, work, community, and domesticity. Literary and theoretical texts may include works by Jane Austen, Toni Morrison, Maggie Doherty, Zadie Smith, bell hooks, Virginia Woolf, Audre Lorde, and Adrienne Rich. Selections from film and television may include the tv dramatization of Elena Ferrante's *My Brilliant Friend* and Keira Knightley's portrayal of Georgiana Cavendish in *The Duchess*, among others. In discussions and writing assignments both formal and creative, we will consider how the (un)friendly relationships represented in these texts shift, break, and thrive given the conditions under which they are conducted

FYSB BC1765 The Ethics of Identity. 3.00 points.

This course will explore evolving understandings of three central aspects of identity - gender, race, and disability - by focusing on their impact on contemporary ethical issues. Should pregnant people be categorized as a 'vulnerable' population in medical research, for instance, and how can race and/or disability status be factored into these discussions in ways that support rather than erase marginalized groups? Is trans-phobia the reason people were so dismissive of Rachel Dolezal's claim to be Black, or is there a difference between gender and race that makes someone's claim to be transgendered quite different from Dolezal's claim to be transracial? If we could eliminate disabilities in the womb, should we, or is that just another form of objectionable eugenics? To address these sorts of questions, we'll need to talk about different views of what gender, race, and disability are, as well as what people's experiences of how these identities intersect tells us about power, prejudice, and pride. Readings will include selections from Simone deBeauvoir's *The Second Sex*, Cathy Park Hong's *Minor Feelings: an Asian-American Reckoning*, Kwame Anthony Appiah's *Color Conscious: The Political Morality of Race*, the edited collection *What is Race?: Four Philosophical Views*, Elizabeth Barnes's *The Minority Body: A Theory of Disability*, and Eva Kittay's *Learning from My Daughter: The Value and Care of Disabled Minds*

FYSB BC1766 American Exceptionalism. 3.00 points.

In this course we probe the ideology of American "exceptionalism." We treat the literary history of this idea as a transtemporal conversation involving its founding architects, ardent critics, and experimental reformers, concerned with the question of what should be valued on the American continents and within American experience. We become cartographers of this conversation and interlocutors within it, as we explore how habits of conceiving truth, power, and the relationship of human beings to the natural world have controlled what counts as exceptional and what ordinary. Where should we direct our awe? Readings will include James Baldwin, Ralph Waldo Emerson, bell hooks, Robin Wall Kimmerer, Audre Lorde, Henry David Thoreau and William Carlos Williams

FYSB BC1767 The End of the World. 3.00 points.

According to the great philosopher Ludwig Wittgenstein, "The limits of my language mean the limits of my world." What, then, is the world? Is it an object? An interpretation? An inheritance? A point of view? Is the world a social and linguistic construct? If so, how many worlds are there? If Wittgenstein is right and every world ends at the limits of its language, then what lies beyond? What happens after the end? This course will consider these questions by investigating the end of the world in a variety of texts and contexts from the fourteenth century to the present: as a recurrent literary theme, religious fixation, philosophical conundrum, source of endless entertainment, and spring of existential anxiety. Contrary to what the phrase portends, we will find that there is no singular "end" of the world. Worlds end all the time. We therefore will approach the idea of the end as a question of ruins and remnants, an encounter with the void at the end of history, but also as a site of new beginnings, of futures we have yet to imagine—or can only imagine, if this means to glimpse what might be beyond the patterns of thought, belief, and action, the terms and conditions, the very language of the decaying world we inhabit. Authors, texts, and other materials will include fiction by Giovanni Boccaccio, Octavia Butler, Daniel Defoe, and Jeff VanderMeer; plays by Tom Stoppard and Samuel Beckett; films including *Eternal Sunshine of the Spotless Mind*, *Aniara*, *Bombay Beach*, and *Manufactured Landscapes*; and studies in cultural anthropology, environmental humanities and radical ecologies

FYSB BC1768 Gender Outlaws. 3.00 points.

This course explores literary and historical figures who challenge gender norms and contravene laws about gender and sexuality. We will encounter trans rogues, desiring women, ballroom queens, and feminist killjoys as we think through how these rules are enforced and resisted. Cultural objects we may consider include literary works by Toni Morrison, Jordy Rosenberg, and Virginia Woolf; the documentary *Paris is Burning*; and art from *Against Our Vanishing*. We will bolster our understanding with historical and critical works by Judith Butler, Saidiya Hartman, Sara Ahmed, and more

FYSB BC1769 Tracing the Mystic. 3.00 points.

What does it mean to be a mystic?—to follow a mystical path? This course will explore questions posed by narratives gesturing at such a path. We will expand our purview to examine how artists, writers, and thinkers have employed mystical approaches in their respective creative processes, sometimes to a surprising degree. In addition, this course will invite personal reflection, storytelling, and creative work that re-envisions the ways that our lives can be enriched when engaged in the process of tracing the mystic; i.e., viewing texts through a mystical lens. Our readings will unfold in a process of discovery and will likely include the works of William Blake, Nella Larsen, bell hooks, W.B. Yeats, Valorie D. Thomas, and others, alongside cinematic, musical, and astrological texts

FYSB BC1770 Anger. 3.00 points.

This course is a transcultural exploration of anger through significant works of contemporary literature, with a particular focus on situations inflected by gender, sexuality and race. Students will reflect on the representation and role of anger, what S. Ngai has called a dysphoric, “ugly” affect at the border between internal feeling and objective reality, affective consciousness and material political conditions, by reading a range of twentieth- and twenty-first-century novels, short stories and poetry, and by viewing films. Authors will include Sylvia Plath, Toni Morrison, Virginia Despentes, Elena Ferrante, Nawal El Saadawi and Tayeb Salih

FYSB BC1771 Freedom and Captivity. 3.00 points.

How has freedom been conceptualized and practiced across time and space? How have forms of captivity challenged and constrained pursuits of liberation? In this interdisciplinary first-year seminar, students will examine a broad range of texts, including activist manifestoes, audio podcasts, graphic novels, memoirs and letters, moving-image media, and works of political theory. We will study processes of industrial change, political revolution, and social upheaval, and we will analyze freedom and captivity from the vantage point of the colony and the liberated territory, the factory and the office, the home and the school, the farm and the prison, the dinner party and the moving train. We will consider works by the Attica Liberation Faction, Héctor Babenco, Simone de Beauvoir, Bong Joon-ho, Luis Buñuel, Aimé Césaire, the Combahee River Collective, Critical Resistance, Angela Davis, W. E. B. Du Bois, Michel Foucault, Antonio Gramsci, Rebecca Hall, George Jackson, Joy James, Robin D. G. Kelley, Laleh Khalili, Andreas Malm, Karl Marx, the New York City Black Panther 21, Kwame Nkrumah, Jacques Rancière, Joe Sacco, Ousmane Sembène, Baruch Spinoza, Sunaura Taylor, Ernest Wamba Dia Wamba, Lea Ypi, and others

FYSB BC1772 Transnational Feminism. 3.00 points.

What does it mean to be a feminist? In this course, we will examine the link between feminist activism and social policies from the eighteenth-century to the postMeToo era through the example of the UK, Iran, Argentina, and France. How does activism influence law making and how do social policies influence feminism? How does activism differ from one country to another? What do these differences reveal about our own culture? We will focus on issues such as the history of women’s suffrage, the fight for political representation, access to child care and education, reproductive rights, bodily autonomy, parental leave policies, and gender-based violence. We will examine these matters through novels, scholarly works, newspaper articles, political pamphlets as well as comics and street art

FYSB BC1773 Vote Counting Counts. 3.00 points.

Elections have always had controversy. Campaign advice going back to Cicero has encouraged lies, bribes, and buttering up. And today there are more opportunities to vote than ever, be it for “American Idol” or New York State Governor. You know you can’t be counted if you don’t vote. In this class, the question is how will you— or should you, be counted when you do. How we count votes, from any type of ballot, reflects the goals of the process and impacts strategy for both candidates and voters. We consider counting options and their impacts, while executing an election of our own

FYSB BC1774 Queer Times. 3.00 points.

This first-year seminar brings together poems, fiction, films, contemporary art, and nonfiction (essays, op-eds and critical theory) that focus on expressions of queer identities across different historical moments and cultural contexts. We will explore how understandings of queerness have shifted across times and cultures, how queer subjects (now and in the past) have negotiated dominant discourses of sexuality and gender, and how narratives of queerness in our course texts intersect with other positionalities such as race, ethnicity, religion, and citizenship. Organized around three sections (queer pasts, queer presents and queer futures), the course will consider the following questions: How has queerness been articulated and defined at various points in the past, especially outside of Western Europe and North America, and how does this inform or change the way we view it today? What are some of the key preoccupations of queer writers and activists in our present day and how might we participate in their conversations? How do we envision queer futures, and how can queer imaginings of the future allow us to think critically about our presents today? Readings are subject to change but will likely include a selection from the following and more: fiction and poetry by Sappho, Emily Dickinson, Akwaeke Emezi, Irena Klepfisz, Alexis Pauline Gumbs; memoirs and essays by Carmen Maria Machado, Edefe Okporo, Kazim Ali; artwork by Zanele Muholi, Salman Toor and Nilbar Gures, films and documentaries on various course topics, as well as critical theory by Michel Foucault, Heather Love and others

FYSB BC1775 Impostors and Impersonators. 3.00 points.

In this class, we will look at the fascination and the fear we have about impostors who construct false identities and impersonators who take on the identity of someone else—from folk and fairy tales to popular shows like *Inventing Anna* and the *Tinder Swindler* to conversations about identity deception in deep fakes and ChatGPT. We will examine the stories of con artists, doppelgängers, catfishers, identity theft fraudsters and those with impostor syndrome to understand: How do we construct what is real and what is fake? How do we determine what is deceptive and what is authentic? We will also look at current advances in artificial intelligence and machine learning and interrogate legal rulings on identity deception to understand how we authenticate and determine the originality of the self. Texts will include *The Impostor* by Silvina Ocampo, *The Double* by Fyodor Dostoevsky, *The Talented Mr. Ripley* by Patricia Highsmith and *Passing* by Nella Larsen among others. Visual media will include *Parasite*, *The Return of Martin Guerre*, *Kagemusha*, and *Orphan Black*

FYSB BC1776 Cults. 3.00 points.

As a former member of one so-called cult said (and many others have repeated): "Nobody joins a cult." What, then, does this designation mean and how has it been used in the past? How has "cult" become a way to demarcate "good" and "bad" religion, to condemn communities and practices that defy established norms, and what are the consequences of the "cult" label for marginalized groups? In this First-Year Seminar, we will evaluate the history of the term "cult" and its varied uses in the US and elsewhere. We will consider a variety of groups that have been labeled "cults," as we ask how the members of such New Religious Movements (NRMs) responded to and revealed the fractures of modern economic, political, gender, racial, and social relations

FYSB BC1777 EMIGRE VOICES. 3.00 points.

The central goal of this course is to provide first-year students with an opportunity to learn from the émigré experience in literature, with attendant questions of nationality and identity coming to the foreground. For example: What happens to language and identity in immigration? To what degree can a "lost" home culture continue to affect its carriers in their new cultural matrix? To this end, readings have been chosen to form an overview of the last century of émigré literature written by authors from the former Russian Empire and the former Soviet Union, primarily from places located in present-day Russia and Ukraine. Students will choose an assigned work of their liking and write original explorations of their selected topics (to be chosen from a list or created in consultation with the instructor). Naturally, these authors are a varied group. They come from various places and generations and have varied overarching concerns, such as fractured identity, survival techniques that look unusual within their new cultures, and the necessity of conscious self-fashioning. While the central readings assigned for the course are works of literary fiction (some artworks and publications based on diaries will also be included), the instructor will provide the necessary historical and cultural context for each work during class meetings

FYSB BC1778 Adultery: Realism and Desire. 3.00 points.

"Rising from the most basic human needs, marriage is essential to our most profound hopes and aspirations." So writes the United States Supreme Court in *Obergefell v. Hodges* (2015), finding in marriage the "keystone of our social order" — the means by which individual desire is stably fixed within the family unit and, thereby, linked to civility and law. This course studies a rich counter-tradition of film and literature interested in adultery. These works suggest ways in which human desire and identity exceed social bounds; they also examine ways in which private desire is not only limited but formed by social forces

Reacting to the Past

In these seminars, students play complex historical role-playing games informed by classic texts. After an initial set-up phase, class sessions are run by students. These seminars are speaking- and writing-intensive, as students pursue their assigned roles' objectives by convincing classmates of their views. Examples of games played in First-Year Seminar Reacting classes include: 1) *The Threshold of Democracy: Athens in 403 B.C.* explores a pivotal moment following the defeat of Athens in the Peloponnesian War, when democrats sought to restore democracy while critics, including the supporters of Socrates, proposed alternatives. The key text is Plato's *Republic*. 2) *Confucianism and the Succession Crisis of the Wanli Emperor* examines a dispute between Confucian purists and pragmatists within the Hanlin Academy, the highest echelon of the Ming bureaucracy, taking *Analects* of Confucius as the central text. 3) *The Trial of Anne Hutchinson* revisits a conflict that pitted Puritan dissenter Anne Hutchinson and her supporters against Massachusetts Governor John Winthrop and the orthodox ministers of New England. Students work with testimony from Hutchinson's trial as well as the Bible and other texts. 4) *Greenwich Village, 1913: Suffrage, Labor and the New Woman* investigates the struggle between radical labor activists and woman suffragists for the hearts and minds of "Bohemians," drawing on foundational works by Marx, Freud, Mary Wollstonecraft, and others.

French

Mission

The Department's primary goals are firstly to enable students to develop competence in spoken and written French, and secondly to expose students to the literature and culture of French and French-speaking countries. An important additional objective of the French Department is to encourage students to consider studying in France or a Francophone country.

In regard to students' linguistic competence, our specific goals are:

1. To enable students to express themselves on a range of topics with an acceptable degree of fluency and accuracy.
2. To facilitate their comprehension of a variety of texts (both from literature and the media) written in French.
3. To foster students' confidence in the possibility of their living and studying in a French environment.

In the context of the language requirement (the first and second years), this implies a competence premised on students' ability to achieve, by Intermediate French II, oral and written fluency. Students will be able to use all tenses in the indicative and subjunctive, to deploy pronouns appropriately and understand the expressive and grammatical utility of conjunctions, rhetorical devices, and so on. Students will have the ability to write a cogent essay in French on a literary or cultural topic, and will possess a vocabulary beyond basic French, including rhetorical and conceptual vocabulary. In the context of the major requirement (the third and fourth years), students will progress to a greater competence in French, including advanced speaking skills, particularly in terms of discussing literary and cultural topics, and writing extended analytical essays. The culmination of a student's progress is the one-semester cap stone experience in the spring semester of the senior year, where she will write a substantial thesis on a topic of her choice, supervised by senior members of the department, and defended before an appropriately selected committee.

Student Learning Outcomes

Students majoring in French are expected to satisfy the following learning outcomes:

- Read literary texts closely and critically (explication de texte).
- Discuss complex ideas in French with satisfactory proficiency.
- Write analytical papers in French using appropriate theoretical and exegetical on given literary or cultural topics with satisfactory proficiency.
- Demonstrate knowledge of French literature and other cultural materials.
- Engage fully with another culture in a variety of intellectually sophisticated ways, including close textual analysis.
- Conduct original research on a literary or cultural topic culminating in a 30 page thesis. For students in the Translation and Literature track the ability to translate a 30 page text from French into English accompanied by an introduction to the work.

All first-year, transfer, and/or returning students who studied French prior to entering Columbia/Barnard must take the placement exam before taking any Barnard French courses. Questions about the exam should be directed to the department chair.

Students entering Barnard in Fall 2016 and thereafter will receive points of credit for Advanced Placement (AP) and International Baccalaureate (IB) credit, but these credits will not exempt students from General Education Requirements. Further information may be found on the Registrar's website. For additional information about language courses, students should consult the department chair.

Students who have satisfied the language requirement may immediately enroll in literature and culture courses (FREN BC3021 MAJOR FRENCH TEXTS I, FREN BC3022 MAJOR FRENCH TEXTS II, FREN BC3037 BAUDELAIRE, RIMBAUD, MALLARME); and advanced language courses (FREN BC3006 COMPOSITION AND CONVERSATION-FREN BC3019 ADVANCED PHONETICS).

In cooperation with Columbia College, the department offers a program at Reid Hall in Paris open to majors and non-majors. Visit the [Study Abroad website](#) for more information.

Requirements for the Major

Students may choose one of three programs for the major, from which eleven (11) courses are required:

Language and Literature: This program emphasizes the language, culture, and literature of France and other French-speaking countries.

Translation and Literature: This program teaches students to translate from French into English and English into French, within a context of French culture and literature.

French and Francophone Studies: This program emphasizes the historical and contemporary interrelationship between France and the French-speaking world in their social, literary, and cultural aspects.

Students are expected to declare an option by the end of the junior year. Programs may include additional courses in French literature, culture, and language, or in other subjects which vary with the interest of the student. Certain courses in the French and Romance Philology

Department at Columbia University may be substituted with the approval of the chair.

All students are required to write a thesis in their senior year. This thesis, of about 30 pages in length, will be written while the student is enrolled in FREN BC3091 SENIOR THESIS. Thesis specification will vary depending on the major program that has been chosen.

A student who elects French as part of a combined double or interdisciplinary major will establish her individualized program with the departments concerned. All combined or interdisciplinary majors require approval from the Committee on Petitions and Academic Standing.

FREN BC3025 Theater of the Classical Age. 3 points.

This course will provide a detailed introduction to the three great French dramatists of the seventeenth century, rightly known as the golden age of French theatre. Reading several canonical works by each of these three playwrights—Corneille, Racine, and Molière—students will closely examine the thematic concerns (the relationship between love and duty, the individual and the state, free will and divine providence; the problems of hypocrisy, dishonesty, sexual jealousy, and avarice; the nature of kingship and the extent or the limits of royal control; the differences between prescribed gender roles for men and for women; the recourse to and reworking of mythological and Biblical sources) the plays set forth, and the rhetorical strategies they employ (from classical, Greco-Roman devices such as metaphor, apostrophe, irony, preterition, prosopopoeia, and anagnorisis to the specifically French metrical pattern of the alexandrin). *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3036 THE AGE OF ENLIGHTENMENT. 3.00 points.

Dans ce cours, nous examinerons le phénomène qui domine—et révolutionne—le discours philosophique, religieux, sociologique et politique au 18e siècle en Occident: les Lumières. Visant les dogmes jusque-là incontestables d'un Etat monarchique et d'une Eglise catholique autoritaires, ce mouvement réclame la liberté de la pensée et du culte; condamne l'intolérance religieuse, l'iniquité politique et le préjugé culturel; expose et déplore l'inégalité sociale; examine les bases de l'autorité politique; et subvertit par ses propos l'idéologie. A l'exception d'un texte de l'Allemand Immanuel Kant, nous nous bornerons à lire des écrits des principaux philosophes francophones des Lumières (Voltaire, Diderot, et Rousseau), aussi bien que deux romans "dystopiques" (Charrière et de Sade), et deux textes politiques parus durant la Révolution française

Evolution of the novel, aesthetics of Romanticism, Realism, Naturalism, and Symbolism. Particular attention is paid to the formal problems of narrative, the rhetoric of sentiment, *decadence*, and issues of sexual identity. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3040 Twentieth-Century French Fiction. 3 points.

Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.

Topics will include the theory of the gratuitous act, literature and the rise of Fascism, war and the literature of commitment, erotic violence. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3041 Twentieth-Century French Thought. 3 points.

Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.

Thorough study of the major intellectual movements in France from Surrealism to post-structuralism. Particular attention given to theories of political commitment, textuality and deconstruction. Readings include works by Breton, Senghor, Sartre, Levi Strauss, and Derrida.

FREN BC3044 THEATER OF THE ABSURD. 3.00 points.

Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.

Close reading and occasional screening of major plays associated with the Theater of the Absurd. Philosophical and literary origins of the concept of the absurd; social and political context of its emergence; theatrical conventions of early performances; popular and critical reception. Authors include: Jarry, Adamov, Arrabal, Beckett, Genet, Ionesco, Maeterlinck, Sartre, Camus.

FREN BC3043 Twentieth-Century French Women Writers. 3 points.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.

Writings by women will be analyzed in the changing philosophical and literary contexts of the 20th century: Simone de Beauvoir, Nathalie Sarraute, Marguerite Duras, Hélène Cixous, and others.

FREN BC3054 Translation Through Film. 3 points.

Prerequisites: Course capped at 15.

Using filmic dialogue as a medium, this course seeks to develop skills in "spoken" or "live" translation from French into English. This practice, close to consecutive interpretation (oral translation), will help students to augment and refine their fluency in French. All aspects of language will be involved: grammar, vocabulary, tone, register and context, but in a manner more "immediate" than with the translation of written texts. Six French films will be chosen from a variety of periods and genres from which segments will be isolated for interpretation (oral translation). A preliminary discussion of each film will precede the work in translation. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3056 Proust. 3 points.

Prerequisites: FREN BC3021, BC3022, BC3023, BC3024, or the equivalent.

In this course, we will read the whole of Marcel Proust's 7-volume novel, *A la Recherche du temps perdu*. One of the greatest novels of all time, the *Recherche* addresses issues of: romantic and familial love; hetero- and homosexuality; social class; anti-Semitism; social life and friendship; the persistence of memory; and the relationship between art and life.

FREN BC3062 Women in French Cinema since the 60s. 3 points.

This course traces the evolving nature of the relationship between women and society in French cinema from the New Wave of the 60's to the present. Attitudes of women and towards women will be examined in the light of the changing social, political, and intellectual context. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3063 Structuralism and Post-Structuralism. 3 points.

Introduction to the conceptual foundations of structuralism and post structuralism or to what is known as *French Theory*. Readings include works by Saussure, Levi Strauss, Lacan, Foucault, Cixous, and Deleuze. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3065 SURREALISM. 3.00 points.

An examination of the relationship between traditional & avant-garde literature and visual culture; the use of word-play & language games as tools of artistic expression; the thematization of the unconscious and dreams; the vexed relationship between aesthetics & politics; the poetics and politics of sexuality & gender. Authors and artists will include Andre Breton, Louis Aragon, Man Ray, Dorothea Tanning, and Salvador Dali. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3067 GOLDEN AGE OF VERSAILLES. 4.00 points.

This seminar explores the cultural production emanating from the court of Louis XIV (1638-1715), including the social, economic and historical context that led to the construction of Versailles. We also examine colonization as a social reality contemporary to the creation of Versailles. The reading of literary texts is combined with consideration of the arts, architecture, dance and music. Special focus on the court as spectacle, women writers of the court, and the classical period as preparation for the Enlightenment. Work in developing skills in HTML, CSS and Timeline JS culminates in a final digital project allowing completion of the Mode of Thinking Technologically and Digitally

FREN BC3070 Negritude. 3 points.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.

Analysis of the theoretical and literary precursors of négritude; major figures of the movement; relations with the Harlem Renaissance; and the formulation of creolity by contemporary Caribbean writers and thinkers. Authors will include Gobineau, Maran, Price-Mars, Hughes, McKay, Césaire, Senghor, Damas, Fanon, Sartre, Glissant, and Chamoiseau. Taught in French. General Education Requirement: Cultures in Comparison (CUL).

FREN BC3073 Africa in Cinema. 3 points.

Considerations of African-directed twentieth century films concerning French-speaking, sub-Saharan West Africa. Reflections on tradition and modernity, politics and popular culture, the status of women, youth problems, identity construction. Placement of African film within its own tradition. Class taught in English.

FREN BC3077 La Jalousie dans la Litterature Francais. 3 points.

This course takes jealousy in its psychosexual, socio-political, ontological dimensions, and in its formal implications-as a lens through which to view a series of seminal works of French literature from the Middle Ages to the 21st century. These works include: 12th-century Arthurian legend (Béroul); a late-medieval, proto-feminist short story (Navarre); 17th-century neo-classical tragedy (Corneille); 12th and 17th-century folkloric forms (Marie de France's lai and Perrault's fairy tale, respectively); the Enlightenment "philosophical" novel (Montesquieu); the 19th-century realist novel (Balzac); the early 20th-century modernist novel (Proust); and the nouveau roman (Robbe-Grillet). Two contemporary adaptations (Singer's 2008 novel based on the Navarre story, and Chabrol's 1996 film based on Proust's novel) will also be studied. In addition, a selection of highly condensed, relevant secondary readings (excerpts of 10 pages or less) will provide students with an introduction to an array of theoretical approaches to literary study: most notably, psychoanalysis, political philosophy, and literary theory. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3079 HISTORY OF THE FRENCH LANGUAGE. 4.00 points.

This seminar examines the history of the French language, both in France and in the many areas of the world in which French is a primary language. In the first part of the semester we engage in a chronological study of how the language emerged from a fusion of late medieval Latin with Germanic dialects to become a strong national institution. The development of the language is contextualized by consideration of the social and political history of France. We also devote two weeks of discussion to the situation of the French language today, with topics such as linguistic legislation, regional languages and dialects today, and gender inclusivity. This diachronic approach is carried over into the second part of the semester in which we concentrate on French in several regions outside of France including the Caribbean, North Africa, Central Africa, and North America. Here we examine how the language was first introduced, what it represented at different moments in history, the relation of French to other languages, and the situation of French in the region today. Work for the course includes a digital project (digital timeline and map, and website) to document visually the presence of French in the world, across history and in the 21st century

FREN BC3080 Advanced Seminar: Flaubert. 3.00 points.

Prerequisites: Limited to 15 students; priority given to French majors and seniors.

In depth study of the life and works of Gustave Flaubert (1821-1880). Exploration of 'literary realism' and the novelist's representation of money, marriage, ambition, class, sex, stupidity, and sainthood. While you will be expected to read all of Flaubert's major works, we will concentrate in class on *Madame Bovary* (1857), *L'Education sentimentale* (1869), *Trois Contes* (1877), *Bouvard et Pécuchet* (1881), and the *Correspondance*. We will consider also cinematic adaptations of *Madame Bovary* and *Un Coeur simple*. FREN BC1204: French Intermediate II or the equivalent level is required.

FREN BC3091 SENIOR THESIS. 4.00 points.

French majors will write their senior thesis under the supervision of the instructor

FREN BC3100 Podcasting in French Workshop. 3.00 points.

In this advanced French conversation class we will use podcasts to generate discussion, debate, and creative work focusing on current events and cultural trends. Participants will use existing podcasts to build listening and speaking skills in French, and to develop the ability to converse and debate on important topics in the world today; these will include questions of identity (gender, race, sexuality), feminism, civil unrest, the U.S. elections, and the French language. Work for the course culminates in the creation by each participant of a short podcast on a topic of their choice; in-class sessions on podcast production and editing, as well as open digital lab hours will be held by IMATS to assist in the final project. Reflection on the evolution and place of podcasting as a digital medium will also be included in our discussions

FREN BC3101 LOVE # LITERATURE. 3.00 points.

This course offers an in-depth study of love as it has been treated in a variety of French literary texts. These texts will be related to a number of important philosophical and theological approaches to love, particularly in respect of certain ideas concerning ethical love, erotic love, and religious faith as an act of loving God. The first objective of this class is to show how one can relate literature to philosophy and theology; the second is to gain a broad, but thematically focused familiarity with French literature, and with some literary works beyond the French tradition. FREN BC1204: French Intermediate II or the equivalent level is required

FREN BC3102 WOMEN OF THE LEFT BANK. 3.00 points.

This course will group together the women who shaped and epitomized Left Bank culture in Paris from the Belle Époque to the mid-twentieth century; it will also situate these women in relation to their male peers whose works went on to establish the canons of Symbolism, Dadaism, Surrealism, and Existentialism. We will focus primarily on the realms of literature, philosophy, and art, but we will also examine how some of these women advanced cultural production more broadly—by starting publishing presses, opening bookshops, holding salons, etc. Readings will be primarily in French (Colette, Anna de Noailles, Renée Vivien, Simone de Beauvoir; Breton, Valéry, Aragon, Sartre) but will also include some English-language authors (Gertrude Stein, Djuna Barnes, Anaïs Nin). All discussions, coursework, and examinations will be in French

FREN BC3103 WOMEN, SEX # POWER IN 17TH-CENTURY FRANCE. 3.00 points.

When thinking of 17th Century France, we tend to focus on the all-encompassing figure of Louis XIV, Roi Soleil. However, the 17th Century was also the century of women: women writers, women philanthropists, and women intellectuals who led some of the most influential literary salons of their time. The presence and agency of women during that period had a major influence on the representation of women in literature. Between heroic idealizations and caricatural portrayals, this course will attempt to discern between these two extremes to form an image of the real contribution of women to the literature of this period

FREN BC3104 Women Writers of Contemporary Middle East # North Africa. 3.00 points.

Since the last decades of the twentieth century there has been a dramatic increase in the number of women writers from the Middle East and North Africa. This advanced course, which will be taught mainly in French, provides a window into this rich and largely neglected branch of world literature. Students will encounter the breadth and creativity of contemporary Middle Eastern and North African women's literature by reading a range of twentieth- and twenty-first-century novels, short stories, memoirs and poetry available in French or in translation, and by viewing films that are from or about Iran, Lebanon, Algeria, and Egypt. How do Middle Eastern women authors address women's oppression – both social and physical – and enunciate issues such as the tension between tradition and modernity, sexuality, identity and class from a female perspective? What literary traditions and models do they draw on? How different are those texts written in French for a global audience, as opposed to those written in Persian or Arabic? What are the effects of reading them in translation? Authors will include Marjane Satrapi, Shahrnush Parsipur, Assia Djebar, Maïssa Bey and Nawal El Saadawi

FREN BC3105 Existentialism. 3 points.

Prerequisites: Successful completion of Intermediate II French or the equivalent.

In-depth survey of the writers who exemplified French existentialism: Albert Camus, Jean-Paul Sartre, and Simone de Beauvoir. The texts have been chosen for the richness with which they address fundamental philosophical questions about the meaning of life, especially questions of death and suffering, freedom and responsibility, legitimate and illegitimate violence. The first objective of this class is to show how existentialist thought combines literature and philosophy; the second objective is to gain a broad, but also deep familiarity with 20th-century French literature and thought. *FREN BC1204: French Intermediate II or the equivalent level is required.*

FREN BC3106 Transatlantic Translation. 3.00 points.

A workshop in which students from the BC/CU community collaborate with a team of students from the École Normale Supérieure-Lyon on two translation projects. In addition to video-conferenced group sessions, students will work virtually with their translation partner in France, and consult in-person with their Barnard instructor.

Prerequisite: completion of at least Intermediate II level of French

Department Assistant: Sondra Phifer

Mission

The German Department’s mission is to engage a wider audience of students within the Barnard Community. Its curricular program and cultural events serve a large and diverse academic community on the Barnard and Columbia campuses. The Department is committed to creating venues for students, faculty and the public interested in the many facets of cultural life in the German-speaking countries or communities.

As an active contributor to campus life, the Department has constantly initiated new venues—from readings, lectures and film screenings to excursions—to supplement and enrich its annual course offerings. In disciplines such as Art History, Philosophy or History, a familiarity with the German language is an asset; in interdisciplinary areas such as Comparative Literature or European Studies, German often serves as the main or second language of study.

It is the goal of our department:

- to teach the German language in a professionally reflected manner through a clear sequence of courses

- to help attain and expand knowledge of Austrian, German and Swiss literatures through reading exemplary texts in theme- or period-oriented courses
- to make familiar with characteristic features of Germanophone cultures by raising awareness of their geographical diversity and their historical richness in introductory survey courses
- to give students the rhetorical and intellectual tools for moving confidently between two languages’ cultural traditions by offering exercises, sketches and other forms of active participation from elementary to advanced levels of expression
- to create a learning environment that instills appreciation for critical thought and is conducive to acquiring a clearly defined set of skills, from language proficiency to interpretive adroitness and intercultural literacy

Courses in German are designed to develop proficiency in language skills and to present the traditions as well as the current developments in the literature and culture of the German-speaking countries: Austria, Germany, and Switzerland. Courses in Dutch, Finnish, Swedish, and Yiddish are offered by the Department of Germanic Languages. For information contact 319 Hamilton Hall.

GERM BC3022 VIENNA STORIES. 3.00 points.

Prerequisites: (GERM UN3002)

Prerequisites: (GERM UN3002) Students explore film, podcasts and digital technology as tools for analyzing culture, language and identity. Integrated in this course is an in-person, on-site segment involving faculty leading study abroad in one of Europe's most diverse cities: Vienna, Austria. During a one-week stay in Vienna during the spring break, students will put their German-language, filming and digital technology skills to use and gather ethnographic material to produce a short German-language documentary film on identity, the notion of homeland, and stereotypes. Live encounters with native Viennese as well as with recent migrants from Turkey, Ukraine, Poland, former Yugoslavia, and/or Syria in formal and informal settings and a field study project will serve as the main sources for the video. After the on-site and out-of-classroom segment, students will edit their film material and present the final video in the class, Advanced German II: Vienna now and then, which will take place during the same semester. A course website will be created to host final video projects for future reference. Student videos will thereby serve as authentic classroom material for German courses at Barnard and elsewhere. This course includes a one-week study abroad project in Vienna during spring break

GERM BC3105 Comical Expression in Multicult Lit/Film. 3.00 points.

This course is designed for participants who are interested in learning more about the role of humor in 20th/21st-c. literature and film. The survey begins with an introduction to key elements of the comical in literature and film, including slapstick, clowning, mime, or stunts. Discussions revolve around the issue of how or whether humor is universally recognizable or whether it is regionally, historically, and culturally defined. To shed light on this difficult question we will consider both historical and geographical settings. In close studies of popular films and literary texts we will examine the characters' proclivities and discuss their gender-based perspectives as well as the influence of racial, religious or age-related identities. Our weekly readings—which include excerpts from major novels, selected scenes from films as well as short stories—provide us with rich and instructive examples of how eating habits, choice of food, calendrical events (holiday vs. weekday) may be related to the formation and expression of cultural identity. Romantic comedies reveal not only personal preferences and the joy of eating—they also signal collective taste patterns and indicate what kind of fantasies or constraints have governed the daily or festive dietary practices from the early 20th c. on. While the comical is first and foremost represented in time-honored genres such as comedies or jokes, we will concentrate on the modern tradition in this course. This approach allows us to address the social, political, and cultural issue of multiculturalism and to build bridges between individual text/film and their historical contexts in the German-speaking countries. The emphasis of the course lies on a critical investigation of how cultural identity is related to self-expression and to physical interaction on the page, the stage or the screen. The course is taught in English, all readings are in English, and there are no prerequisites

GERM BC3215 From Text to Screen: German Literature and Film. 3 points.

Prerequisites: GERM UN2101 or the equivalent.

Prerequisites: GERM UN2101 or the equivalent. Intermediate German UN2102 is conducted entirely in German and emphasizes the four basic language skills, cultural awareness, and critical thinking. A wide range of topics (from politics and poetry to art) as well as authentic materials (texts, film, art, etc.) are used to improve the 4 skill. Practice in conversation aims at enlarging the vocabulary necessary for daily communication. Grammar is practiced in the context of the topics. Learning and evaluation are individualized (individual vocabulary lists, essays, oral presentations, final portfolio) and project-based (group work and final group project)

History

813 Milstein Center

Senior Department Assistant: Sully Rios

Mission

History encompasses the whole of human experience, helping us understand ourselves in the context of our times and traditions through the study of times and traditions other than our own. History means not only the record of the past but also the discipline of investigating and interpreting the past. The study of history develops habits of critical thinking and effective writing, as well as it cultivates the careful analysis of various types of quantitative and qualitative evidence. It should be of value not only to undergraduates who intend to pursue advanced degrees in the field, but also to students interested in exploring the diversity and complexity of the human past, even as they hone their analytical and expository skills.

Student Learning Outcomes

Students graduating with a major in History should be able to attain the following objectives:

- Use and evaluate primary materials through critical reading and interpretation
- Understand the difference between primary materials and secondary materials
- Use and evaluate secondary materials through critical reading and interpretation
- Develop critical writing skills
- Gain exposure to theories and methods of historical study
- Explore in depth and gain a good acquaintance with the history of a geographic area, a period, or a theme

Professors: Mark C. Carnes, Joel Kaye (Emeritus), Dorothy Ko, Robert A. McCaughey (Emeritus), Nara Milanich, Jose Moya, Premilla Nadasen, Celia Naylor, Anupama Rao, Lisa Tiersten, Deborah Valenze, Carl Wennerlind

Associate Professors: Gergely Baics, Abosede George, Andrew Lipman

Assistant Professors: Angelo Caglioti

Other officers of the University offering courses in History:

[Columbia History Faculty](#)

Requirements for the Major

Students who are interested in majoring in History should consult a History professor or the Chair in their sophomore year to plan their academic programs. They may choose to focus their study of history on a region (such as Africa, Asia, Europe, Latin America, South Asia, U.S., transnational), period (such as ancient, medieval, early modern), or theme.

The History major consists of eleven courses: six in the area of concentration; the other five may be either within or without. Six of the eleven courses must be taken at Barnard or Columbia. The minimum number of credits required for the History major is 38.

The eleven required courses should include:

1. Three introductory lecture courses (at least one 1000-level course; the two others may be 1000- or 2000-level courses. Note that a Columbia global core course is listed at 2000 level but counts as a 1000-level course);
2. Two seminars (3000- or 4000-level courses), one of which must be taken at Barnard or Columbia;
3. At least one course (lecture or seminar) must demonstrate your temporal breadth. This usually means one course that covers themes and topics related to the pre-modern period (generally taken to mean the period before the nineteenth century);
4. At least one course (lecture or seminar) must demonstrate a geographic range unless your area of concentration already does so. If your concentration is geography-based, this means a geographical area or region that is outside your field of study;

5. The two-semester senior research seminar (HIST BC3391 RESEARCH SEMINAR IN HISTORY I and HIST BC3392 RESEARCH SEMINAR IN HISTORY II) normally taken in sequence, beginning in the Fall and continuing into Spring of the senior year.

Majors may, with the approval of their advisers, include two non-history courses in their list of eleven if the subjects are closely related to their concentrations.

Thematic Concentrations

history.barnard.edu/thematic-concentrations

Barnard history courses are numbered to reflect the type of course and world region:

By course type:

1000-level: introductory lecture courses

2000-level: other undergraduate lecture courses

3000-level: undergraduate seminars

By world region/epoch:

x000-x059: Ancient

x060-x099: Medieval

x1xx-x199: Early Modern Europe

x2xx-x299: East Central Europe

x3xx-x399: Modern Western Europe

x4xx-x599: United States

x600-x659: Jewish

x660-x699: Latin America

x700-x759: Middle East

x760-x799: Africa

x800-x859: South Asia

x860-x899: East Asia

x9xx-x999: Research, Historiography, Trans-National

Senior Research Seminar

The senior research seminar, in which students write their senior essays (30-50 pages), represents the culmination of the undergraduate history major. Students should discuss tentative topics with their advisers by the end of the junior year. Halfway through the first semester of the senior year students must submit a formal prospectus defining the problem under investigation, outlining the issues involved, and identifying the primary and secondary sources consulted. They must draft part of the essay by the end of the Fall semester, then complete their research and writing in the Spring.

Requirements for the Minor

The minor in history requires five courses, four in an area of concentration and one outside the concentration. The five courses must include one seminar. *At least three of the minimum five courses* must be Barnard or Columbia courses. Students planning to minor in history should consult the department chair.

HIST BC2366 CLIMATE # HISTORY: INTERSECTING SCIENCE, ENVIRONMENT # SOCIETY. 3.00 points.

Climate change poses an imminent threat to the future of humanity and is a crucial feature of the Anthropocene, namely the age of anthropogenic transformations of the Earth's environments on a global scale. How did we get here? History is fundamental to answer this question. This course examines the relationship between climate, scientific knowledge, and human societies. The class will first survey the role of climate as an historical actor of global history, rather than as the backdrop of political, social and economic events. In the second part of the course, we will examine the history of weather and climate science, as well as climate change denialism. The class offers a wide range of case studies around the world of the tight relationship between climate and history. The instructor encourages all majors to register from the humanities, social sciences, and natural sciences

HIST BC2374 France in Modern Times, 1789-Present. 4 points.

Not offered during 2023-2024 academic year.

Explores the history of modern France in its wider European Mediterranean and imperial contexts. Major themes include: republicanism and rights; revolution and reaction; terror and total war; international rivalry and imperial expansion; cultural and political avant-gardes; violence and national memory; decolonialization and postcolonial migration; May '68 and temporary challenges to the republican model.

HIST BC2375 Fascism in European History. 3.00 points.

What was Fascism? What kind of appeal did authoritarianism and dictatorship have in interwar Europe? How did the Fascist "New Order" challenge liberal democracies and why did it fail in World War II? What was the common denominator of Fascist movements across Europe, and in particular in Mussolini's Italy, Salazar's Portugal, Franco's Spain, culminating in Nazi Germany? This class examines the history of Fascism as an ideology, constellation of political movements, and authoritarian regimes that aimed at controlling the modernization of European societies in the interwar period. Thus, the course focuses in particular on the relationship between politics, science and society to investigate how Fascism envisioned the modernity of new technologies, new social norms, and new political norms. The class will also explore Fascism's imperialist goals, such as the calls for national renewal, the engineering of a new race, and the creation of a new world order

HIST BC2380 HISTORY OF FOOD IN EUROPE. 3.00 points.

Prerequisites: Previous course in history strongly recommended.

Prerequisites: Previous course in history strongly recommended.

Course enables students to focus on remote past and its relationship to social context and political and economic structures; students will be asked to evaluate evidence drawn from documents of the past, including tracts on diet, health, and food safety, accounts of food riots, first-hand testimonials about diet and food availability. A variety of perspectives will be explored, including those promoted by science, medicine, business, and government

HIST BC2482 REVOLUTIONARY AMERICA, 1763-1. 3.00 points.

How did thirteen diverse British colonies become a single boisterous but fragile new nation? Historians still disagree about the causes, motives, and meanings surrounding the founding of the United States of America. Major themes include the role of ideologies, material interests, global contexts, race, gender, and class

HIST BC2500 Poverty, Race, and Gender. 3 points.

This course will begin with a theoretical overview of the relationship between race, gender and poverty. We will look at definitions and sources of economic inequality, emerging discourses of poverty in the early 20th century, and changing perceptions of “the poor” over the course of American history. We will examine race and gender segmentation in the labor market, racial and gender conflict in the union movement, ideological foundations of the welfare state, cultural constructions of single motherhood, political debates about the “underclass,” as well as contemporary campaigns to alleviate poverty.

Our goal is to think critically about discourses of poverty and welfare as well as antipoverty, labor and feminist organizing.

HIST BC2549 EARLY AMERICA TO 1763. 3.00 points.

This course examines the three critical centuries from 1492 to 1763 that transformed North America from a diverse landscape teeming with hundreds of farming and hunting societies into a partly-colonized land where just three systems empires held sway. Major themes include contrasting faiths, power relationships, and cultural exchanges among various Native, European, and African peoples. HIST UN2661 LATIN AMERICAN CIVILIZATION II. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course explores major themes in Latin American history from the independence period (ca 1810) to the present. We will hone in on Latin America’s “chronic” problems of social inequality, political polarization, authoritarianism, incomplete democratization, and troubled memory politics. The course covers economic, social, and cultural histories, and gives special weight to the transnational aspects of Latin American ideological struggles – from its dependency on Western capital to its ideological “inner Cold War” – and the way they influenced the subaltern strata of society. The section discussions are a crucial component of the course, and will focus on assigned historiography. While the lecture centers on constructing a cogent meta-narrative for Latin America’s modern era, in the section we will explore not only the historical “facts,” but will instead ask: how do historians know what they know about the past? What sources and analytic methods do they use to write history? And what ethical dilemmas do they confront when narrating politically-sensitive topics?

Particular emphasis on debates about commerce, luxury, greed, poverty, empire, slavery, and liberty.

HIST BC3130 Failed Empire: Sweden in the Early Modern World. 4.00 points.

The geopolitical map of the world was in flux during the seventeenth century. As Spain was losing its control over Europe and the Atlantic world, a number of ambitious small states on the periphery of Europe set their sights on achieving imperial glory. By mid-century, The Dutch Republic, England, and Sweden were the primary contenders. Each nation developed a sense of manifest destiny and dedicated scarce resources to establish an imperial presence, from which they could conquer the world. While the former two nations succeeded in creating vast empires, the latter enjoyed only a brief stint as a world power. This failure had nothing to do with a lack of effort or moral considerations. This course explores Sweden's imperial efforts and investigates its failures. It examines how military, political, religious, commercial, and scientific endeavors contributed to Sweden's quest for riches and prominence. The seminar begins by discussing Sweden's sudden military success during the Thirty Years' War and the consequent formation of a Baltic empire. We next investigate Sweden's presence on the west coast of Africa, where it built fort Carlsborg, and the east coast of North America, where it founded New Sweden. While these ventures failed relatively rapidly, Sweden continued to pursue a colonial presence through trade and the acquisition in 1784 of St. Barthélemy, a colony from which they engaged in trade, including the slave trade

HIST BC3177 SCARCITY: ECONOMY AND NATURE. 4.00 points.

Current patterns of economic growth are no longer environmentally sustainable. Global industrialization and the associated transference of carbon from the ground to the air are leading to a rapid exhaustion of resources and a warming of the planet. These changes have triggered a set of dangerous climactic transformations that are likely to cause massive ecological disruptions and disturbances of food production systems. These changes, in turn, might have a profound impact on poverty, migration, and geopolitics. To better understand how we have arrived at the present predicament, this seminar explores the history of how social and economic theorists have conceptualized the interaction between the economy and nature. The focus will be on the concept of scarcity as a way of understanding the relationship between economic growth and environmental sustainability. The course begins in the Renaissance and traces the evolution of the nature/economy nexus to the present

HIST BC3301 Science and Fascism. 4.00 points.

In 1942, the American sociologist Robert Merton described modern science as an intellectual enterprise that can produce truthful and factual knowledge only if inspired by democratic values. Yet such concept contrasted starkly with the reality of science in the interwar period and World War II, at the peak of the clash between liberal democracies and fascist dictatorships. What was the role of science in the global conflict between liberalism and the fascist 'New Order'? What did science and technology look like under fascism? This class examines the relationship between science and fascism in Fascist Italy, Nazi Germany, Franco's Spain, and Salazar's Portugal. During the Great War (1914-1918), science and technology were enlisted as critical assets for the war effort and the international scientific community was shattered across national lines. The Great War proved the importance of the scientific organization of society and state-controlled scientific advancement. Fascism developed this lesson in the interwar period to pursue its nationalist and imperialist goal: the creation of a new world order. Thus, the seminar explores the entanglement between science, technology and fascism by examining a wide range of disciplines, such as physics, medicine, eugenics, statistics, demography, agronomy, and engineering. Focusing in particular on fascism's central themes of race and empire, the course examines the relationship between state power and scientific expertise, the persecution of Jewish scientists in Nazi Germany and Fascist Italy, and scientists' critical competition in World War II ahead of the creation of the atomic bomb, which ushered in the new era of the Cold War

HIST BC3370 Science, Environment and European Colonialism. 4.00 points.

Science and colonialism were driving forces in the making of the global and interconnected world where we live today. The history of "Western science" is deeply intertwined with Europe's encounter with the world, as colonialism provided the laboratory for disciplines such as geography, natural history, medicine, and anthropology. The challenges and opportunities of new natural environments shaped the way Europeans explored, analyzed, and studied nature and society. The circulation of specimens, data, and scientific expertise made colonial governance possible. This course will introduce students to major themes regarding the relationship between science, colonial environments and European empires. Students will develop reading skills and will explore key topics in early and late modern European history, the history of science, and environmental history

HIST BC3444 Freedom Dreams: Struggles for Justice in the U.S. and Beyond. 4 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I), BC: Fulfillment of General Education Requirement: Social Analysis (SOC II).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

This course will interrogate freedom as a conceptual category and explore how the meaning and practice of freedom has been deployed in different historical moments. We will consider how gender, race, sexuality, slavery, colonization, work and religion influenced thinking about individual and collective notions of freedom.

HIST BC3456 The Craft of Urban History. 4 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I), BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

This seminar introduces students to the key issues and the interdisciplinary practice of modern urban history. Readings draw from the scholarly literature on 19th and 20th century cities from across Europe and the Americas. We explore economic, spatial, ethnographic, and cultural approaches to studying modern cities.

HIST BC3475 Covid-19 and Care Work: An Oral History Approach. 4.00 points.

In this seminar students will conduct oral histories of essential service and care workers on the front lines of the COVID-19 crisis, develop a conceptual and theoretical framework for service and care work, and be trained in the art of oral history. They will interrogate the archive, discuss oral history as a methodological approach and historical source and will be trained in the technical skills of preparing a consent form, formulating questions, using recording equipment, and transcribing interviews. We will be collaborating with the Columbia Oral History Archive, the Columbia M.A. Oral History Program and IMATS. This course builds upon the instructor's research and writing about care and domestic work. Students will examine the gendered and racialized history of the expanding service sector in the 20th century, interrogating the language of "care work" and what Arlie Hochschild called the emotional labor that is central to it. Students will analyze how the notion of care has become a form of coercion making it difficult for workers to establish boundaries or make demands

HIST BC3479 Colonial Gotham: The History of New York City, 1609-1776. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

How did a tiny Dutch outpost become a bustling colonial urban society and a major port in the British Empire? New York City's first two centuries offer more than just "pre-history" to the modern metropolis. Topics include frontier wars, slave conspiracies, religious revivals, conflicts between legitimate and contraband economies.

HIST BC3491 MAKING BARNARD HISTORY. 4.00 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Prerequisites: Permission of the instructor. Preregistration required. Examines construction of home as private space and gender expectations defining reproductive labor as "women's work." Emphasis on US, but also explores global patterns of race, labor and migration, shifting notions of "Rights" and citizenship as well as domestic workers' strategies of resistance in a context of labor and feminist organizing.

HIST BC3504 19TH CENTURY NYC:A SPATIAL HISTORY. 4.00 points.

History of 19th-century New York City with a focus on spatial history. We explore three major themes, including the city's rapidly changing built environment, its social environment, and urban metabolism. Methodologically, we focus on spatial analysis, especially historical Geographic Information Systems

HIST BC3505 Pandemic Tales: Curated Conversations with Migrant Workers. 4.00 points.

Pandemic Tales: Curated Conversations with Migrant Workers will work collaboratively with a New York City-based organization, Damayan. The course will chronicle the pandemic's disproportionate impact on economically vulnerable Black and Brown communities. We will read about the history of Filipino migrant workers and be trained in the interview process. Our intention is to uplift the stories of undocumented migrant workers' battles around housing and food insecurity and the collective efforts to provide support and care. Students will work with Damayan leaders in preparation for speaking to members who will share their stories of pain, hardship and resilience during the pandemic. From these stories we will work with Damayan to curate conversations about the impact of the pandemic on Filipino migrants and produce a webpage or podcast for Damayan's use. This is a Barnard Engages course, supported by the Mellon Foundation, with the intention of fostering long-term relationships between Barnard college faculty and students and New York City-based community organizations addressing issues of poverty, immigration or labor rights. We will partner with Damayan Migrant Workers Association, an organization I have worked with for many years. A worker-run and directed organization, Damayan has been at the forefront of the effort to rescue and advocate on behalf of Filipino migrant workers. They were also involved in providing support for needy families when the pandemic hit. Our class project will be designed in collaboration with Damayan to assist them in their work. They have asked us to uplift the voices of the people severely impacted by the pandemic by curating conversations. There will be a joint public launch of our final product, which could be a webpage or a podcast. Because this is a community-directed project, students should be prepared for changes to the syllabus and end product. Much of the work for this course will be collaborative. Students will be working in teams and I will be working alongside students to produce the final product. In addition to the scheduled class times, there will be other scheduled meetings and/or workshops

Explores historical constructions of heredity, origins, and identity in the modern world in terms of family/genealogy; race/ethnicity; and citizenship. Drawing on evidence from diverse societies around the globe, considers how science, law, and culture define origins and how definitions have changed over time. Interdisciplinary focus ranges across history, anthropology, sociology, and cultural studies.

HIST BC3669 Inequalities: Interdisciplinary Perspectives on Latin America. 4 points.**Not offered during 2023-2024 academic year.**

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. A general background on Latin America recommended but not absolutely required. Course limited to 15 students.

Latin America has long been characterized by extreme and enduring inequalities - of class, income, race, and ethnicity. Examines patterns of inequality from different disciplinary perspectives, both historically and in the present. Examines not only causes and solutions but how scholars have approached inequality as an intellectual problem.

HIST BC3670 SEEKING ASYLUM. 4.00 points.

Note: This course meets as a lecture but it is a seminar.

Prerequisites: NA

Prerequisites: NA This seminar explores the roots of and responses to the contemporary refugee crisis at the U.S.-Mexico border. We examine the historical factors that are propelling people, including families and unaccompanied minors, to flee the so-called Northern Triangle of Central America (El Salvador, Honduras, Guatemala); the law and politics of asylum that those seeking refuge must negotiate in the U.S.; and the burgeoning system of immigration incarceration that detains ever-greater numbers of non-citizens. The course is organized around a collaboration with the Dilley Pro Bono Project, an organization that provides legal counsel to detainees at the country's largest immigration detention prison, in Dilley, Texas

HIST BC3672 Perspectives on Power in 20th Century Latin America. 4 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I)., BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Examination of recent Latin American historiography concerns with power in the context of 20th-Century Latin America. Focus on such diverse topics as the Mexican Revolution and migrant culture in Costa Rica, labor mobilization in Chile and the dirty war in Argentina. Themes include the relationship between popular culture and the state; the power of words and the power of symbols; structure and agency; the role of the law; the relationship between leaders and followers; and the intersections of gender, race, and power.

HIST BC3692 ANARCHISM: A GLOBAL HISTORY. 4.00 points.

Explores the historical development of anarchism as a working-class, youth, and artistic movement in Europe, North and Latin America, the Middle East, India, Japan, and China from the 1850s to the present. Examines anarchism both as an ideology and as a set of cultural and political practices

HIST BC3761 CHILDHOOD AND YOUTH IN AFRICAN HISTORY. 4.00 points.

This course focuses on the history of childhood and youth in African societies and how young people as historical agents have impacted the social histories of their communities. How did young Africans live in past times? What forces shaped understanding of their status as children or youth? How have major historical processes such as colonialism, industrialization, apartheid, and liberation, neocolonialism, and neoliberalism impacted and been impacted by children and youth in Africa? What roles have young people themselves played in the making of African histories? These questions will be explored in course readings, discussions, and students' original research projects

HIST BC3763 Children and Childhood in African History. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

HIST BC3770 African Communities in New York, 1900 to the Present. 4.00 points.

This class explores the history of voluntary migrations from Africa to the United States over the course of the 20th century. This course is designed as a historical research seminar that is open to students with prior coursework in African Studies, Africana Studies, Race and Ethnic Studies, or History. Thematically the course dwells at a point of intersection between African history, Black History, and Immigration History. As part of the Barnard Engages curriculum, this class is collaboratively designed with the Harlem-based non-profit organization, African Communities Together. The aim of this course is to support the mission of ACT by producing a historically grounded digital advocacy project. The mission of ACT is to empower immigrants from Africa and their families to integrate socially, advance economically, and engage civically. To advance this mission, ACT must confront the reality that in the current political moment new legal, political, and social barriers are being erected to the integration, advancement, and engagement of African immigrants on a daily basis. As immigrants, as Black people, as Africans, and often as women, low-income people, LGBT people, and Muslims, African immigrants experience multiple intersecting forms of marginalization. Now more than ever, it is critical that African immigrants be empowered to tell their own stories—not just of persecution and suffering, but of resilience and resistance

HIST BC3771 Critical Perspectives on the Mobilization of Race and Ethnicity on the Continent and in the Study of Africa. 4 points. Not offered during 2023-2024 academic year.

Prerequisites: Sophomore Standing.

Critically examines the relationship between social difference and narratives and practices of power in historical and contemporary African publics. Race and Ethnicity are the key axes of social difference that will be examined. Other axes of difference such as gender, sexuality, class, caste, generation and nationality will also be examined through points of intersection with race and ethnicity.

HIST BC3776 MAPPING AFRICAN MIGRATIONS. 4.00 points.

*In this course, we will be studying African migrations to Africa, and within the continent, in the 19th and 20th centuries. We will be reading scholarly works on spatial history, African migrations, and 'Back-to-Africa' movements. *We will also be analyzing primary sources on African migrations, which shall form the bases of a series of digital scholarship workshops. These workshops will cover mapping with ArcGIS, translating qualitative knowledge into quantitative data, and effective digital storytelling

HIST BC3788 GENDER,SEXUALITY,POWER,AFRICA. 4.00 points.

This course deals with the scholarship on gender and sexuality in African history. The central themes of the course will be changes and continuities in gender performance and the politics of gender and sexual difference within African societies, the social, political, and economic processes that have influenced gender and sexual identities, and the connections between gender, sexuality, inequality, and activism at local, national, continental, and global scales

HIST BC3791 Lagos: From Pepper Farm to Megacity. 4 points. Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Examines the many Lagos that have existed over time, in space, and in the imagination from its origins to the 21st century. This is a reading, writing, viewing, and listening intensive course. We read scholarly, policy-oriented, and popular sources on Lagos as well as screening films and audio recordings that feature Lagos in order to learn about the social, cultural, and intellectual history of this West African megacity.

HIST BC3805 Caste, Power, and Inequality. 4 points. Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Draws on the experiences of life and thought of caste subalterns to explore the challenges to caste exploitation and inequality.

HIST BC3823 RACE/RACISM/ANTIRACISM: STUDIES IN GLOBAL THOUGHT. 4.00 points.

RACE/RACISM/ANTIRACISM: STUDIES IN GLOBAL THOUGHT Recent protests against racial violence erupting across the United States have demanded that the United States address systemic injustice entrenched in its national history. The Black Lives Matter movement has extended still further, inciting communities across the globe to raise their voices against discrimination and inequality. Rather than viewing the United States— and the north Atlantic, more generally — through an exceptionalist lens, this seminar draws on the strong transnational resonance of the Black Lives Matter movement and the compelling responses of global communities across distinct demographics and colonial histories to decenter the historical origins of race thinking and provincialize its conceptual centrality as a first step in understanding its reach and relevance as a global signifier of “difference” today. How might we develop critical studies of race and racism that are truly global and extend beyond the historical experience of the North Atlantic, and North America in particular? Might we consider the concept history of race, commonly associated with the Atlantic World and plantation slavery as a form of historical difference proximate to other practices of social hierarchy and distinction across the modern world? How can scholarship that addresses questions of black vitality, fugitivity and Afropessimism engage productively and rigorously with questions of colonial servitude and postcolonial sovereignty that emanates from anticaste thought, ideas of Islamic universality, Pan-Africanism, or heterodox Marxisms? An exercise in comparative thinking, this seminar will function as an interstitial home for intellectual engagements in both the Global South and North, excavating linkages between injustices perpetrated through divisions of race, caste, and minority status, as well as the conceptual innovations born from struggles against them. We are explicitly focused on the relationship between worldmaking and concept formation. Questions of historical comparison and conceptual convergence are important. So, too the forms of sociopolitical solidarity and political utopias that have arisen as a consequence of struggles against enslavement and imperialism. Every seminar session will open with a twenty-minute discussion about political and social historical contexts. However, this is a course focused on the close and careful reading of ideas and concepts in a manner similar to courses in the history of ideas and/or political thought

HIST BC3825 RACE, CASTE, AND THE UNIVERSITY: B. R. AMBEDKAR AT COLUMBIA. 4.00 points.

B. R. Ambedkar is arguably one of Columbia University’s most illustrious alumni, and a democratic thinker and constitutional lawyer who had enormous impact in shaping India, the world’s largest democracy. As is well known, Ambedkar came to Columbia University in July 1913 to start a doctoral program in Political Science. He graduated in 1915 with a Masters degree, and got his doctorate from Columbia in 1927 after having studied with some of the great figures of interwar American thought including Edwin Seligman, James Shotwell, Harvey Robinson, and John Dewey. This course follows the model of the Columbia University and Slavery course and draws extensively on the relevant holdings and resources of Columbia’s RBML, [Rare Books and Manuscript Library] Burke Library (Union Theological Seminar), and the Schomburg Center for Research in Black Culture among others to explore a set of relatively understudied links between Ambedkar, Columbia University, and the intellectual history of the interwar period. Themes include: the development of the disciplines at Columbia University and their relationship to new paradigms of social scientific study; the role of historical comparison between caste and race in producing new models of scholarship and political solidarity; links between figures such as Ambedkar, Lala Lajpat Rai, W. E. B. Du Bois and others who were shaped by the distinctive public and political culture of New York City, and more. This is a hybrid course which aims to create a finding aid for B. R. Ambedkar that traverses RBML private papers. Students will engage in a number of activities towards that purpose. They will attend multiple instructional sessions at the RBML to train students in using archives; they will make public presentations on their topics, which will be archived in video form; and students will produce digital essays on a variety of themes and topics related to the course. Students will work collaboratively in small groups and undertake focused archival research. This seminar inaugurates an on-going, multiyear effort to grapple with globalizing the reach and relevance of B. R. Ambedkar and to share our findings with the Columbia community and beyond. Working independently, students will define and pursue individual research projects. Working together, the class will create digital visualizations of these projects

HIST BC3830 BOMBAY/MUMBAI AND ITS URBAN IMAGINARIES. 4.00 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Explores the intersections between imagining and materiality in Bombay/Mumbai from its colonial beginnings to the present. Housing, slums, neighborhoods, streets, public culture, contestation, and riots are examined through film, architecture, fiction, history and theory. It is an introduction to the city; and to the imaginative enterprise in history

HIST BC3842 Subaltern Urbanism: South Asia. 3.00 points.

This course asks how spatial politics intersect with economic inequality and social difference. The course draws on the convergent yet distinct urban trajectories of cities in the global South (Bangalore; Bombay/Mumbai; Lahore; New Delhi; Dhaka) as an enabling location for exploring broader questions of comparative and global urbanism from an explicitly South-South perspective. That is, we ask how distinct yet connected urban forms might force us to alter our approaches to the city; approaches that are largely drawn from modular Euro-American paradigms for understanding urbanization as coeval with modernity, as well as industrialization. We do so in this seminar by focusing on people and practices—subaltern urbanity (and on those whose labor produced the modern city), as well as on spatial orders—the informal or unintended city—to ask the question: “what makes and unmakes a city?” How might questions about built form, industrialization, capital flows, and social life and inhabitation that takes the perspective of “city theory from the Global South” shed new understanding on the history of the city, the extranational frames of colonial modernity, and the ongoing impact of neoliberalism? How can we rethink critical concepts in urban studies (precarity, spatial segregation, subalternity, economies of eviction, urban dispossession) through embedded studies of locality and lifemaking?

HIST BC3861 Body Histories: The Case of Footbinding. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

The deceptively small subject of footbinding provides a window into the larger family dynamics and sexual politics in Chinese history and society. Explores the multiple representations of footbinding in European travelogues, ethnographic interviews, Chinese erotic novels and prints, and the polemics of modern and feminist critiques.

HIST BC3864 Feast/Famine: Food Environment China. 4.00 points.

Food has always been a central concern in Chinese politics, religion, medicine, and culture. This course takes an ecological approach to the provision, preparation, and consumption of food in Chinese history, from the Neolithic times to the post-socialist era today. In examining Chinese approaches to soil fertility, healthy diet, and culinary pleasures, we explore alternative food systems for a more sustainable future

HIST BC3866 Fashion in China. 3 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

This course challenges the long-standing association of fashion with the West. We will trace the transformation of China's sartorial landscape from the premodern era into the present. Using textual, visual, and material sources, we will explore: historical representations of dress in China; the politics of dress; fashion and the body; women's labor; consumption and modernity; industry and the world-market. We will also read key texts in fashion studies to reflect critically on how we define fashion in different historical and cultural contexts. Our approach will be interdisciplinary, embracing history, anthropology, art, and literature. *Field(s): EA*

HIST BC3870 GENDER# MIGRATN:GLOBAL PERSPC. 4.00 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Sophomore Standing. Explores migration as a gendered process and what factors account for migratory differences by gender across place and time; including labor markets, education demographic and family structure, gender ideologies, religion, government regulations and legal status, and intrinsic aspects of the migratory flow itself

HIST BC3879 Feminist Traditions in China. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Background in Women's Studies and/or Chinese Studies helpful, but not necessary. Sophomore standing. Enrollment limited to 15. Preregistration required.

Explores the intellectual, social and cultural grounds for the establishment and transmission of feminist traditions in China before the 19th century. Topics include pre-modern Chinese views of the body, self, gender, and sex, among others. Our goal is to rethink such cherished concepts as voice, agency, freedom, and choice that have shaped the modern feminist movement.

HIST BC3886 Fashion. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Prerequisites: At least one course in a Non-U.S. Area in History, Literature, Anthropology, Film Studies or Art History. Permission of the instructor. Enrollment limited to 15. Preregistration required. Investigates the cultural, material and technological conditions that facilitated the development of "fashion systems" in early modern Europe, Japan and contemporary Asian diasporic communities. In the global framework, "fashion" serves as a window into the politics of self-presentation, community formation, structure of desires, and struggles over representation.

HIST BC3901 Reacting to the Past II. 4 points.

BC: Fulfillment of General Education Requirement: Reason and Value (REA)., BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Ethics and Values.

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 20. Preregistration required. Reacting I, a First-Year seminar, is recommended.

Collision of ideas in two of the following three contexts: "Rousseau, Burke and Revolution in France, 1791;" "The Struggle for Palestine: The British, Zionists, and Palestinians in the 1930s," or "India on the Eve of Independence, 1945".

HIST BC3903 Reacting to the Past III: Science and Society. 4 points.

BC: Fulfillment of General Education Requirement: Reason and Value (REA)., BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Not offered 2008-09. \nPermission of the instructor. Enrollment limited to 15. Preregistration required.

HIST BC3904 INTRO HISTORICAL THEORY# METHOD. 4.00 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Preference to JUNIOR and SOPHOMORE Majors. Fulfills General Education Requirement (GER); Historical Studies (HIS); Reason and Value Confronts a set of problems and questions attached to the writing of good history by examining the theories and methods historians have devised to address these problems. Its practical focus: to prepare students to tackle the senior thesis and other major research projects. The reading matter for this course crosses cultures, time periods, and historical genres. Fulfills all concentrations within the history major

HIST BC3905 Capitalism, Colonialism, and Culture: A Global History. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of Instructor. Enrollment limited to 15. Preregistration required.

From Indian Ocean worlds of the seventeenth century, to Atlantic world slavery, to the establishment of colonies in Asia and Africa during the nineteenth century, colonization was critical to the development of metropolitan ideas regarding politics and personhood. This seminar will examine these histories, along with emerging constructions of race and gender, as precursors to debates about human rights and humanitarianism in the twentieth century.

HIST BC3907 Edible Conflicts: A History of Food. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Conflicts emerging from the production and consumption of food from prehistoric to modern times. Settled agriculture and the significance of geography and social stratification in determining food consumption; ideologies of social status and "taste" in Europe; impact of knowledge about health and hygiene on European dietary habits; drink in diets and social life; dining out in European culture; role of transport and technology in consumer culture; food and the welfare state; mass production and globalization of food.

HIST BC3909 History of Environmental Thinking. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preference to upper-class students. Preregistration required.

A consideration of how experiences of the natural world and the meaning of "nature" have changed over the past three centuries. Follows the development of the environmental sciences and the origins of environmentalism. The geographical focus will be Europe, with attention to the global context of imperialism.

HIST BC3910 Global Politics of Reproduction: Culture, Politics, and History. 4 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Comparative, cross-cultural examination of social organization and historical construction of human reproduction, with emphasis on 20th century. Topics include role of states and local and transnational "stratification" of reproduction by race, class, and citizenship; eugenics; population politics; birth control; kinship as social and biological relationship; maternity; paternity; new reproductive technologies.

HIST BC3953 Anarchism: A Global History. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Explores the historical development of anarchism as a working-class, youth, and artistic movement in Europe, North and Latin America, the Middle East, India, Japan, and China from the 1850s to the present. Examines anarchism both as an ideology and as a set of cultural and political practices.

HIST BC3973 20th Century Cities: Americas and Europe. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required.

Urban history of 20th century cities in the Americas and Europe. Examines the modern city as ecological and production system, its form and built environment, questions of housing and segregation, uneven urban development, the fragmentation of urban society and space. Course materials drawing on cities in the Americas and Europe.

HIST BC3999 INDEPENDENT STUDY. 1.00-4.00 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Examines the theory and practice of transnational feminist activism. We will explore the ways in which race, class, culture and nationality facilitate alliances among women, reproduce hierarchical power relations, and help reconstruct gender. The course covers a number of topics: the African Diaspora, suffrage, labor, development policy, colonialism, trafficking, consumerism, Islam, and the criminal justice system

Mission

The Human Rights Studies Program introduces Barnard undergraduates to the basic normative, theoretical and empirical knowledge and skills necessary to contribute cogently to public debates and policy initiatives related to social justice in the modern world. This mission reflects the proliferation of human rights concerns and the associated growth of public and private human rights institutions over the past half century, but more importantly the daunting theoretical and practical challenges that still remain. Human Rights Studies at Barnard is an interdisciplinary program, a joint major that combines the study of human rights with a complementary disciplinary, regional or other expertise at the choice of each student. These options include but are not limited to Africana Studies, American Studies, Anthropology, Asian and Middle Eastern Cultures, Comparative Literature, English, French, German, History, Italian, Political Science, Psychology, Religion, Slavic, Sociology, Spanish, and Women's Studies.

Student Learning Goals

Human rights learning objectives fall into four broad categories:

- Competence with respect to the normative dimensions concerned with social justice, and the related institutions.
- Mastery of the empirical skills required to collect, evaluate and report accurately data on human rights abuses and institutional activities.
- A basic knowledge of the causes and effects associated with human rights situations, including the factors that ameliorate or aggravate violations.
- An understanding of the factors that contribute to effective remedial or response strategies and take into account the different political, economic, social and cultural contexts of each set of problems.

Student Learning Outcomes

In the case of undergraduate women majoring in human rights, these four broad goals would require students to possess the following knowledge and skills. The capacity to:

1. Identify, and understand the work of, the main public and private institutions that comprise the modern international human rights regime.
2. Identify the main past and present currents of theory and practice that define and challenge the contemporary consensus on human rights norms, particularly with respect to the core concepts of discrimination, equality, diversity, pluralism and human dignity.
3. Identify and trace the impact of the major events over the last hundred years that have led to the formation of the contemporary human rights norms and institutions.
4. Understand the major taxonomies, paradigms and current debates in the field of international human rights.
5. Exhibit competency in the integration of normative, institutional, public policy and empirical materials.
6. Understand the ways in which international standards are implemented and enforced in both international and domestic fora, including the nature of the obligations on states and other national and international actors.

7. Think and write critically about human rights institutions, theories, strategies and their relationship to other social priorities.
8. Discuss in detail two or more case studies, groups at risk, or specific human rights problems such as public health, specific rights, refugees, indigenous people, poverty etc., incorporating as appropriate the resources of other Barnard departments and programs.
9. Identify the ways in which the human rights regime offers tools to address violations of women's human rights as well as the ways in which women have been influential in the field.
10. Examine the relationships between human rights paradigms and those in related fields, notably development studies, peace and conflict management, security studies, social work, refugee and migration studies and especially women's studies.
11. Complete and defend advanced original research that draws on diverse sources and addresses one or more of the above questions.

Human rights studies at Barnard is designed to contribute to a liberal arts curriculum. Its cross-disciplinary character enriches and benefits from Barnard's teaching in the humanities and social sciences. Its core courses examine critically universally accepted intellectual and political frameworks for debates on social justice, i.e. international human rights law. Many of these debates focus on domestic and international issues that are the grist of ongoing political and ethical debates that are legitimately the concern of all citizens and for which they ought to be well prepared. As such, human rights studies forms an integral part of the expanding field of international education at Barnard. The Program draws on Columbia's and NYC's unique human and documentary resources. It also provides an intellectual base and appropriate skills for social advocacy. These different dimensions do not coincide with individual disciplines. The range of issues that now fall within the field of human rights is extensive, reflecting the scope of the Universal Declaration of Human Rights and its subsequent associated treaties. The unique and defining dimensions of human rights studies are the problems raised by its normative and prescriptive or remedy-oriented dimensions (the first and the fourth of the fields of study above).

Requirements for the Combined Major

A minimum of six courses (with a minimum of 18 credits) in the Human Rights Program, including one introductory course (either HRTS BC1025 HUM RGTS IN THEORY# PRACTICE or HRTS UN3001

INTRODUCTION TO HUMAN RIGHTS); at least two courses from among those designated "core courses"; three "related" courses; and a complete major in a relevant department. Where courses in the Human Rights Program also satisfy departmental requirements, no more than three Human Rights courses may count toward the major. Besides the six courses in the Human Rights Program, students submit a senior thesis or project in the area of human rights, written in the major department. Those interested in a combined major should consult with the Director or other members of the Committee on Human Rights Program.

POLS UN3173 Power, Rights, and Social Change: Achieving Justice. 4 points.

This lecture course, accompanied by its weekly discussion section, will introduce students to the field of justice. It will combine an intellectual history of conceptions of justice and modes of political change with an exploration of the main areas of public interest and advocacy. The course is intended to serve as a bridge from the Columbia Core to present issues of social justice. Throughout, the discussion will question how we—contemporary subjects and citizens—can improve our social and political condition and achieve justice.

HRTS UN3190 INT'L HUMAN RIGHTS LAW. 3.00 points.

This course will introduce students to the international law of human rights, and give a basic orientation to fundamental issues and controversies. The course has two principal focal points: first, the nuts and bolts of how international law functions in the field of human rights, and second, the value and limitations of legal approaches to a variety of human rights issues. Throughout the course, both theoretical and practical questions will be addressed, including who bears legal duties and who can assert legal claims, how these duties might be enforced, and accountability and remedy for violations. Attention will be given to how international law is made, what sorts of assumptions underlie various legal mechanisms, and how the law works in a variety of contexts

Examines the constitutional right of freedom of speech and press in the United States. Examines, in depth, various areas of law, including extremist or seditious speech, obscenity, libel, fighting words, the public forum doctrine, and public access to the mass media. Follows the law school course model, with readings focused on actual judicial decisions

HRTS BC3360 Our Bodies and the Struggle to Define Personal Autonomy. 4.00 points.

One of the most hotly debated issues of today is the extent to which the state can legitimately dictate or impinge on one's bodily autonomy. This is a long-running debate in the area of sexual and reproductive rights, but also is relevant to such current debates as the right to die / right to death with dignity; the right to use drugs for recreational or ritual purposes; engaging in hunger strikes as a protected form of freedom of expression; and the debate about whether the state can mandate vaccines. It is a debate that is highly gendered but also raises questions about how political power and socio-economic status influences how governments act on individuals and communities

HIST BC3670 SEEKING ASYLUM. 4.00 points.

Note: This course meets as a lecture but it is a seminar.

Prerequisites: NA

Prerequisites: NA This seminar explores the roots of and responses to the contemporary refugee crisis at the U.S.-Mexico border. We examine the historical factors that are propelling people, including families and unaccompanied minors, to flee the so-called Northern Triangle of Central America (El Salvador, Honduras, Guatemala); the law and politics of asylum that those seeking refuge must negotiate in the U.S.; and the burgeoning system of immigration incarceration that detains ever-greater numbers of non-citizens. The course is organized around a collaboration with the Dilley Pro Bono Project, an organization that provides legal counsel to detainees at the country's largest immigration detention prison, in Dilley, Texas

RELI UN3671 Religion and Human Rights. 4.00 points.

What is the relationship between religion and human rights? How have different religious traditions conceived of "the human" as a being worthy of inherent dignity and respect, particularly in moments of political, military, economic, and ecological crisis? How and why have modern regimes of human rights privileged some of these ideas and marginalized others? What can these complicated relationships between religion and human rights explain some of the key crises in human rights law and politics today, and what avenues can be charted for moving forward? In this class, we will attempt to answer these questions by first developing a theoretical understanding of some of the key debates about the origins, trajectories, and legacies of modern human rights' religious entanglements. We will then move on to examine various examples of ideas about and institutions for protecting "humanity" from different regions and histories. Specifically, we will examine how different societies, organizations, and religious traditions have addressed questions of war and violence; freedom of belief and expression; gender and sexual orientation; economic inequality; ecology; and the appropriate ways to punish and remember wrongdoing. In doing so, we will develop a repertoire of theoretical and empirical tools that can help us address both specific crises of human rights in various contexts, as well as the general crisis of faith and observance of human rights as a universal norm and aspiration for peoples everywhere

HRTS BC3850 HUMAN RIGHTS # PUBLIC HEALTH. 4.00 points.

Prerequisites: Enrollment in the course is open to 18 undergraduates who have completed at least one core course in human rights and / or international law. This seminar introduces students to the field of health and human rights. It examines how to advocate for and implement public health strategies using a human rights framework. It takes note of current international and domestic debates about the utility of a human rights-based approach; to health, discusses methods and ethics of health-related human rights research, and examines case studies of human rights investigations to explore the role of human rights analysis in promoting public health

HRTS BC3851 Human Rights # Public Health: Advanced Seminar. 4.00 points.

As we face the triple threats of inequalities, climate change, and a pandemic, the dignity and well-being of many people are under attack or at imminent risk. Exploring several specific issues through the lens of human rights principles and public health standards will provide students with a strong analytic framework for understanding the challenges of and potential for systemic change to address these threats. Specifically, we will be looking at disparate health impacts and how to understand what drives the disparities; intellectual property laws and how they apply during a global crisis; the double-edged sword of digital technology particularly as it applies to health surveillance; the strengths and weaknesses of a biomedical model dominating the public health discourse; and, the politization of health policy. Specifically, we will explore systems of oppression that drive inequalities and lead to disparate health outcomes; the lack of a transnational accountability framework to address both climate change and the rights of those most impacted by it; and how a corporate-driven intellectual property regime has put access to essential medicines, including vaccines, beyond the reach of people living in poverty. Finally, looking at reports ripped from the headlines, we will look at how the COVID-19 pandemic has thrown open the door to widespread digital surveillance with few safeguards to protect privacy rights or to address the biases in many of the algorithms driving this technology

While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third, the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific. Human Rights elective

HRTS UN3933 Mobilities: Migration and Disabilities. 4.00 points.

In this course students will work in an applied setting to learn about issues that impact asylum seekers with disabilities in a real-world context in cooperation with asylum lawyers from the International Refugee Assistance Project (IRAP). In essence, IRAP will be our "client" and our class projects and assignments will take the form of research projects that produce materials that will be of assistance to immigration lawyers representing asylum seekers with disabilities. In collaboration with IRAP, we will produce reports addressing the challenges faced by asylum seekers with disabilities from Central America. Specifically, students will work in teams to research country conditions issues relating to the challenges faced by people with impairments and disabilities in Central America and in Mexico. Through a series of individual and team assignments students will prepare a report and presentation to be submitted to IRAP at the end of the semester

HRTS UN3934 Seeking Sanctuary in New York City. 5.00 points.

In a renewed age of anti-immigrant fervor, the last few years have seen attention focused on people seeking asylum – the process under international law by which people fleeing persecution can seek protection in a country not of their citizenship. New York has become a particular flashpoint with a large influx of asylum seekers, most of them from Latin America. Often, they have arrived on buses sent here by southern governors intending to make the border “problem” that of a so-called “sanctuary city.” How has New York responded? And how does this fit into the city’s long history of refuge? This course will offer students an introduction to the theory, ethics, and history of the idea of international protection. We will look specifically at how Latin American citizens have engaged with the US asylum system over time and how this engagement has changed the shape of US immigration laws. We will study the origins of the ideas of international protection, who is understood to qualify and why, how the system has changed over time, and what these developments mean for a broader understanding of human rights across borders. We will also take a critical look at asylum, examine ideas of deservingness and innocence and their intersection with categories of race, class and gender, and question what it means for certain people to be constructed as victims and others to be seen as not eligible – or worthy – of protection. This is an engaged pedagogy course. The class will be organized around a close collaboration with a NY legal organization that has taken on the work of representing many asylum seekers in the city. Students will learn the complexities of US asylum law and will work collectively to use this knowledge, while developing their research skills, to put together reports to be used in active asylum cases

HRTS BC3935 Power, Politics, and Procedure in US Immigration Court. 5.00 points.

Immigration court has been described as akin to trying death penalty cases in traffic court. With a backlog of over two million cases and counting, judges have impossibly full dockets, cases get continued at the last minute, and many people are left to their own devices to try to make sense of what their options might be to stay in the United States. A key part of this confusion is because immigration court – though the stakes of decisions are as high as can be – is civil, not criminal. Given this, individuals are not guaranteed the right to a court appointed attorney. New York City, however, has been on the forefront of trying to remedy at least this part of the equation, piloting a unique program to guarantee representation to New Yorkers facing removal proceedings. While having access to an attorney can make a meaningful difference, immigration judges still enjoy wide discretion in how they decide a given case. The core idea of this course is that there is a real utility to observing immigration court, both for research and for contributing to social change. This course will center around a practice of court watching in immigration court in order to develop a scholarly analysis of systems, institutions, and the functioning (or not) of the law. At the same time, this court watching practice will also involve the systematic collection of qualitative data that may be directly useful to immigration attorneys and their clients in their perpetual effort to hold immigration courts accountable and create as fair as possible of a playing field that upholds the basic principles of human rights. To that end, in this class we will study how to conduct courtroom observations, drawing from different methodological approaches and findings, study the idea, history, and critiques of immigration law from across disciplines, and conduct extensive, in depth, immigration court watching. We will partner with local legal services organizations in order to sharpen our sense of what kinds of data is useful for their specific legal interventions and to ensure that the data that we do collect and interpret can become part of a larger project to hold courts accountable. This course will offer students a unique opportunity to see how rigorous social science research and analysis can have real impacts in the world beyond the classroom, and how those two realms, through collaboration, can mutually contribute to advancing social change. They will learn first-hand how the careful application of qualitative research can reveal and sometimes remedy real world situations of structural injustice. This is an engaged pedagogy course. The class will be organized around a close collaboration with a local legal services provider that represents immigrants in court in New York City. Students will learn the complexities of US immigration law and will work collectively, with the local organization, to develop data that could be useful in broader efforts to reform the process by which immigration claims are adjudicated

SOCI UN3937 Sociology of Human Rights. 4.00 points.

Sociology came to the study of human rights much later than law, philosophy, or political science. In this course, you'll learn (1) what constitutes a sociology of human rights and (2) what sociology, its classics, and its diverse methods bring to the empirical study and theory of human rights. We'll explore the history, social institutions and laws, ideas, practices, and theories of human rights. We'll become familiar with the social actors, social structures, and relationships involved in practices such as violation, claims-making, advocacy, and protection. We'll consider how social, cultural, political, and economic forces affect human rights issues. We'll learn about the questions sociologists ask, starting with the most basic (but far from simple) question, "what is a human right?" We'll tackle key debates in the field, considering – for instance – whether human rights are universal and how human rights relate to cultural norms/values, national sovereignty, and national security. Finally, we'll apply the concepts we've learned to a wide range of issues (ex: how racial, ethnic, gender, and other social inequalities relate to human rights), rights (ex: LGBTQ rights, the rights of laborers, the rights of refugees), and cases (ex: enslavement, the separation of children from their families, circumcision, sterilization, the use of torture). We'll consider human rights cases in the United States and across the globe, and how events and actions in one place relate to human rights violations in another

HRTS UN3940 History of Human Rights. 3.00 points.

This course provides students with an introduction to the history of human rights as a compelling, contested, and dynamic constellation of discourses, structures, and practices. As a framework for articulating and pursuing justice at local, national, and global levels, human rights in the 21st century draw on the diverse histories of social movements, moral philosophy, legal institutions, and political maneuvers across the modern period. Claimed most frequently when their violation is most egregious, the history of human rights is also a history of wrongs, with the changing nature and scope of oppression serving to provoke different kinds of human rights struggles. Often invoked as timeless and universal standards, the history of human rights demonstrates their basic malleability, both in terms of which rights are recognized and who qualifies as human, and their fundamental contingency, both in terms of the precariousness of any human rights 'victory' and their potential for co-optation in the interests of power. Finally, while this course is primarily concerned with the history of human rights, we will also consider the human rights of history, reflecting on the role of history and historical consciousness in the pursuit for justice. Learning Outcomes Aligned with the critical, historical, and integrative grounding of the course, the objectives for student learning encompass areas of knowledge, skills, and values. They include: Students will analyze the change over time of human rights discourses, institutions, practices. Students will analyze the continuities and discontinuities between historic and contemporary forms of human rights. Students will develop knowledge and understanding of various strategies for promoting human rights deployed by historic actors. Students will develop knowledge and understanding of the role of history and historical consciousness in contemporary efforts to secure human rights. Students will develop their capacity for empathy across difference. Students will orient their own values in relation to the dynamic principles of human rights

HRTS UN3960 Refugees, Rights, and Representation. 3.00 points.

Given that, according to the UNHCR, there are currently 108.4 million forcibly displaced people worldwide, over 35 million of whom are refugees, it is unsurprising that their predicament preoccupies international lawyers, academics from the social sciences to the humanities, engineers and economists, journalists, policy specialists at NGOs, government officials, artists, tech companies, philanthropists, and, most significantly, displaced persons themselves. This seminar asks how these different actors draw on specific discourses and arguments—technological, scientific, personal, moral, historical—as they construct the figure and the problem of ‘the refugee.’ We will recognize refugee crises as an issue of urgent public concern as well as an occasion for interrogating how such crises are represented across academic, legal, and cultural conversations. Does displacement caused by personal persecution, natural disasters and climate change, armed conflict, or economic deprivation invite different kinds of international attention or sympathy? Where does the sanctuary promised the citizen end and the hospitality owed the stranger begin? How do contemporary developments in climate science, social media technologies, and big data intersect with discourses on refugees? And if ‘the refugee’ tells the lie to the nation state’s capacity to account for the world’s people, what other forms of political and social organization does the refugee live, inspire, create, or warn against? To consider such questions, we will examine political theory, history, anthropology, and philosophy; analyze international legal documents, policy proposals, investigative journalism, and NGO reports; and engage with novels, poetry, film, and photography, among other materials

HRTS UN3970 Introduction to Genocide Studies. 3.00 points.

This course provides students with an introduction to the study of genocide. In this class, we will take a critical approach to understanding genocide, meaning: we will try to avoid easy moralizing and distancing of genocide; we won’t take existing legal and political definitions of genocide for granted; and we will think about power in relation to genocide perpetration and prevention. Our strategy will be interdisciplinary, meaning: we will explore the ways historians, psychologist, lawyers, political scientists, and others have tried to understand genocide; and we will reflect on the limits on what and how we can know about genocide as a human experience. This course aspires to be practical and applied, meaning this course fundamentally anti-genocidal in its purpose, and students will have the opportunity to contribute to and/or develop practical efforts commemorate, advocate against, or prevent the perpetration of genocide

HRTS GU4185 HUMAN RIGHTS AND GLOBAL ECONOMIC JUSTICE. 3.00 points.

The world economy is a patchwork of competing and complementary interests among and between governments, corporations, and civil society. These stakeholders at times cooperate and also conflict over issues of global poverty, inequality, and sustainability. What role do human rights play in coordinating the different interests that drive global economic governance? This seminar will introduce students to different structures of global governance for development, trade, labor, finance, the environment, migration, and intellectual property and investigate their relationship with human rights. Students will learn about public, private, and mixed forms of governance, analyze the ethical and strategic perspectives of the various stakeholders and relate them to existing human rights norms. The course will examine the work of multilateral organizations such as the United Nations and the International Financial Institutions, as well as international corporate and non-governmental initiatives

HRTS GU4195 Topics in History, Memory and Transitional Justice. 3 points.

How do societies address their “bad pasts” in order to create “good futures” in the aftermath of conflict, state-sponsored repression, dictatorship, and genocide? Transitional Justice has generated numerous strategic and tactical approaches for redressing often irreparable harms. These include: international criminal tribunals, national or local legal proceedings, truth commissions, restitution, the accurate revision of history, public apologies, the establishment of monuments and museums, and official commemorations.

The aim of this course is to examine and analyze from a historical perspective the characteristics and problems of transitions from non-democratic/dictatorial/totalitarian/criminal political regimes to the beginnings of democracy and civil society. We shall focus on concepts and comparative cases, and current and past transitional justice-related questions, including historical reconciliation. We will study, among others, the experience of Germany at and after the Nuremberg proceedings, transitional justice in Africa, post-Soviet efforts at coming to terms with its Communist past, the ICTY/ICTR/ICC, amnesty and amnesia, and the legacy and memory of genocide and mass political repression. Students will gain a substantive framework for understanding the questions and challenges related to transitional justice today.

HRTS GU4210 Equality, Identity and Rights. 3.00 points.

By connecting law, philosophy, and key human rights cases, this course will examine one of the main dilemmas in human rights theory and practice: the balance between equality and identity in the protection of rights. What forms of equality should be recognized to assure effective rights for all? What forms of identity should be recognized? Can there be effective human rights without an intersectional approach? Should we prioritize redistribution or recognition? What can we learn from cases developed in the UN System, in regional systems of human rights, and in specific countries in Asia, Africa, Latin America, North America, and Europe? How can we be effective human rights defenders in a growingly complex field? With these questions in mind, we will address different possibilities of protecting black women in the U.S. and Brazil, Muslim immigrants in Denmark, Indigenous women in Kenya and Canada, persons with disabilities in Tanzania, mothers with HIV in South Africa, poor workers in the Amazon Forest, abducted children in Argentina, and so forth. Learning objectives: • Overview of how equality in human rights is connected to the recognition of identities, or more specifically, to the recognition of an intersectional approach to rights • Understanding different forms of equality that can be advanced through human rights • Adopting a problem-solving approach to an increasingly complex field of human rights, in order to become more effective human rights advocates • Critically analyzing and getting acquainted with cases in the UN system, the regional systems of human rights, and domestic jurisdictions around the world

HRTS GU4215 NGOs # THE HUMAN RIGHTS MOVEMENT. 3.00 points.

This class takes a social movement perspective to analyze and understand the international human rights movement. The course will address the evolution of the international human rights movement and focus on the NGOs that drive the movement on the international, regional and domestic levels. Sessions will highlight the experiences of major human rights NGOs and will address topics including strategy development, institutional representation, research methodologies, partnerships, networks, venues of engagement, campaigning, fundraising and, perhaps most importantly, the fraught and complex debates about adaptation to changing global circumstances, starting with the pre-Cold War period and including some of the most up-to-date issues and questions going on in this field today

HRTS GU4230 REFUGEES, FORCED MIGR # DISPLACEMENT. 3.00 points.

Refugees, forced migration, and displacement: these subjects top the headlines of the world's newspapers, not to mention our social media feeds. Over a million refugees have reached Europe's shores in recent years, and conflicts in the Middle East and elsewhere continue to force people to flee their homes. In the aftermath of the financial crisis and 9/11, politicians in the Global North have focused on borders: who crosses them and how. Walls are being erected. Referendums are being held. We are consumed with thorny questions about who gets to join our political communities. Today there are over 65 million refugees, displaced persons, and stateless persons in the world, represented at last summer's Olympics by their own team for first the time, a testament to their increasing visibility on the world stage. Global forced displacement recently hit a historical high. And while numbers are increasing, solutions are still elusive. The modern refugee regime, the collection of laws and institutions designed to address the problems faced by refugees, has developed slowly over the course of the last 100 years, first in response to specific crises. That regime has been shaped by a changing geopolitical landscape. At the end of the Cold War, institutions in the field expanded their mandates and preferred solutions to the "problem" of refugees changed. And yet today many scholars and policy makers argue the regime is not fit for purpose. They point to the European refugee crisis as the latest case in point. Why? What went wrong and where? Can it be fixed? This course will largely focus on the issues of forced migration, displacement and refugees related to conflict, although this subject is inevitably intertwined with larger debates about citizenship and humanitarianism. Taking an interdisciplinary perspective, this course will address both scholarly and policy debates. Utilizing human rights scholarship, it will draw on work in history that charts the evolution of institutions; legal scholarship that outlines international and domestic laws; work in political science that seeks to understand responses in a comparative perspective, and anthropological studies that address how refugees understand these institutions and their experiences of exile and belonging. These topics are not only the purview of those in the academy, however. Investigative journalists have most recently provided trenchant coverage of the world's refugees, especially the current European crisis, where many have reported from the shores of the Mediterranean Sea. Policy makers scramble to keep up with a crisis literally in motion. We will read their communiqués as well. While we will only begin to skim the surface of these issues, in this course you should expect to gain the following expertise: 1) Knowledge of the modern refugee regime and its origins 2) An analysis of actors and institutions who are tasked with responding to refugee crises and how their roles have changed 3) An understanding of a few critical historical case studies, both in the United States and abroad 4) Critical analysis of the current refugee crisis in Europe and the Middle East 5) Knowledge of the asylum process in the US and in comparative perspective 6) An understanding of the debates about conducting research with vulnerable populations such as refugees and displaced persons

HRTS GU4270 SOCIAL MEDIA AND HUMAN RIGHTS. 3.00 points.
 PRIORITY:HRSMA. GRAD & UNDERGRAD(3&4YR) ON 1ST DAY OF TERM

This course examines how changes in information and communications technology have, over the past two decades, fundamentally transformed the practices of civil society actors engaged with human rights issues. New communications tools such as Twitter, blogs, and Facebook have changed the ways that organizations communicate with their followers and seek to influence public debate. The increasing accessibility of analytic tools for researching and visualizing changing patterns of human rights abuse has empowered groups to better understand and respond more forcefully to these issues. Indeed, the use of social media as a communications tool has made it a data source for those monitoring and analyzing patterns of activity, in ways that draw increasingly on the techniques of big data analysis

HRTS GU4300 ECON#SOC RTS:POL/PRAC. 3.00 points.

This course will address economic and social human rights through the lens of what is happening now in the early 21st century, in light of the enormous shifts that have taken place since the modern human rights movement first emerged in the aftermath of WWII. The course will address many of the central debates about economic and social rights and then examine how those debates apply to specific rights and topics including development, health, housing, work, food and education. Throughout, the course will examine how activists and policymakers have responded to all these changes, and ask what might lie ahead for the human rights movement in addressing economic and social rights in a multilateral, globalized world

HRTS GU4340 Human Rights Accountability & Remedies. 3 points.
 Not offered during 2023-2024 academic year.

Effective remedies for violations of human rights is a core tenet of human rights law. Yet in practice, victims are rarely able to rely on formal accountability mechanisms to deliver remedies. This course examines how advocates combine political, legal and reputational accountability strategies to hold violators accountable where formal enforcement mechanisms are unavailable. The course will look beyond the international criminal legal system, and instead draw on case studies from contexts where the accountability gap is particularly stark: transnational actors who lack direct accountability relationships with rights-holders, including in international development, peacekeeping and corporate activities.

By delving into practical and tactical considerations, students will build an understanding of how various strategies work together to build a successful campaign for accountability that results in remedies for victims. Students will engage in simulated exercises in media advocacy, political lobbying, engaging with the UN human rights system, and public campaigning. Students will learn how to build empowering narratives that shape public opinion, center victims in their work, and nurture transnational partnerships to overcome power differentials. Through discussions grounded in both theory and practice, students will also critically interrogate the practice of human rights advocacy.

HRTS GU4360 Menstruation, Gender, and Rights: Interdisciplinary Approaches. 3.00 points.

The course will explore the contemporary discourse around menstruation in global and local contexts. The recent shift in public discourse around menstruation is crucial because efforts to support menstruators across the lifespan not only confer health benefits but are also part of an enduring project of pursuing gender equality and women’s rights. Centering attention on menstrual health resists pernicious social control of women’s bodies and recognizes the body as foundational, urgent and politically relevant. This is why menstruation matters: it unites the personal and the political, the intimate and the public, the physiological and the socio-cultural. The course examines gender justice and women’s rights through the lens of menstruation, discussing questions of gender stereotyping, transnational feminism, and gender identity. Students will gain an understanding of the relevance of menstruation across different spheres of life combining bio-medical and socio-cultural factors. We will ask: What is the relationship between menstruation, human rights and gender equality? What does it mean to approach menstrual health research from an interdisciplinary perspective? – Over the course of the semester, we will examine different spheres of life, including health, education, equality in the work place, freedom of religion, and cultural rights. In doing so, the course will pay particular attention to the intersection of gender and other markers of inequalities, including disability, socio-economic status, age, caste, and gender identity. The course development is supported by the Provost’s Interdisciplinary Teaching Award

HRTS GU4380 Advocacy for Socio-Economic Rights. 3.00 points.

This course will examine practical issues, opportunities, tactics and strategies to advocate for economic and social rights. The course will incorporate central debates about economic and social rights, such as how to identify violators and define state responsibility, whether these rights can be litigated, and how to make implementable recommendations for change, measure implementation and measure impact. The course will also look more in depth at the standards and fulfillment challenges on several of the key rights including health, housing, education, and labor. Throughout the course, you will focus on one economic and social rights topic of your choice. Through the lens of your chosen topic, you will review how organizations and social movements have engaged to affect change on similar issues, and use that research to explore many of the practical skills of advocacy and campaigning: framing recommendations and calls to action; drafting policy briefs; crafting media pitches and social media content; and designing and evaluating an overall advocacy strategy

HRTS GU4400 SEXUAL ORIENT,GENDR ID,HUM RTS. 3.00 points.
PRIORITY:HRSMA. GRAD & UNDERGRAD (3&4YR) ON 1ST DAY OF TERM

Debates over the rights of lesbian, gay, bisexual and transgender people have never been more visible in the international arena. Advocates are beginning to have some success in putting sexual orientation and gender identity on the agenda for inclusion in human rights instruments. But in many local and regional contexts, state-sanctioned homophobia is on the rise, from the official anti-gay stance of Russia featured during the Sochi Winter Games to the passage of Mississippi's anti-gay bill and Uganda's anti-homosexuality act. This course examines these trends in relation to strategies pursued by grassroots activists and NGOs and the legal issues they raise, including marriage and family rights, discrimination, violence, torture, sex classification, and asylum. We will also focus on current debates about the relation between sexual rights and gender justice, tensions between universalist constructions of gay/trans identity and local formations of sexual and gender non-conformity, and legacies of colonialism

CSER GU4484 CULTURAL RIGHTS AS HUM RIGHTS. 4.00 points.

The seminar will situate the historical, legal and political analysis within the context of current debates of human rights theory, cultural relativism, racism, "dialogue among civilizations" the post- September 11th era and the increasingly prominent phenomenon of destruction of cultural heritage. Reviewing international legal instruments, national and international practice, jurisprudence and literature of the last sixty years, and using a multidisciplinary approach, the seminar will explore what cultural rights mean both as individual and as collective human rights, with special references to the rights of minorities and indigenous peoples, women, migrants and other groups, offering a vision for pluricultural democratic and peaceful societies

HRTS GU4500 SOCIO-ECONOMIC RIGHTS. 3.00 points.

The course addresses selected issues in the protection of socio-economic rights in an international and comparative perspective. Socio-economic rights have emerged from the margins into the mainstream of human rights. The course will take this status as its starting point and examine the human rights to housing, food, water, health and sanitation in depth. We will explore conceptual issues through the lens of specific rights which will help us ground these principles and ideas in concrete cases. We will discuss developments on socioeconomic rights and examine their relevance in the United States as well as selected other countries, particularly those with progressive legislation, policies and jurisprudence. What is the meaning and scope of the rights to housing, food, water, health and sanitation? What is the impact of discrimination and inequalities on the enjoyment of socio-economic rights? How can governments be held accountable for the realization of human rights? What machinery is there at the international level to ensure that the rights are protected, respected and fulfilled? How can this machinery be enhanced? How can judicial, quasijudicial, administrative and political mechanisms be used at the domestic level? What is the role of different actors in the context of human rights, the role of States and individuals, but also (powerful) non-State actors and civil society? How have activists and policymakers responded to challenges? And what lies ahead for the human rights movement in addressing economic and social rights in a multilateral, globalized world?

CLEN GU4550 NARRATIVE AND HUMAN RIGHTS. 3.00 points.

(Lecture). We cant talk about human rights without talking about the forms in which we talk about human rights. This course will study the convergences of the thematics, philosophies, politics, practices, and formal properties of literature and human rights. In particular, it will examine how literary questions of narrative shape (and are shaped by) human rights concerns; how do the forms of stories enable and respond to forms of thought, forms of commitment, forms of being, forms of justice, and forms of violation? How does narrative help us to imagine an international order based on human dignity, rights, and equality? We will read classic literary texts and contemporary writing (both literary and non-literary) and view a number of films and other multimedia projects to think about the relationships between story forms and human rights problematics and practices. Likely literary authors: Roberto Bolaño, Miguel de Cervantes, Assia Djebar, Ariel Dorfman, Slavenka Drakulic, Nuruddin Farah, Janette Turner Hospital, Franz Kafka, Sahar Kalifeh, Sindiwe Magona, Maniza Naqvi, Michael Ondaatje, Alicia Partnoy, Ousmane Sembène, Mark Twain . . . We will also read theoretical and historical pieces by authors such as Agamben, An-Naim, Appiah, Arendt, Balibar, Bloch, Chakrabarty, Derrida, Douzinas, Habermas, Harlow, Ignatieff, Laclau and Mouffe, Levinas, Lyotard, Marx, Mutua, Nussbaum, Rorty, Said, Scarry, Soyinka, Spivak, Williams

HRTS GU4600 HUMAN RIGHTS IN ANTHROPOCENE. 3.00 points.

In August 2016, a working group of the International Geological Congress voted to acknowledge a new geological epoch, following 11,700 years of the Holocene, and that it would be called The Anthropocene. The announcement indicated a new era in the earth's chronology marked by the consequences of human activity on the planet's ecosystems. Closely related to discussions of sustainability, investigations into the Anthropocene tend to focus on environmental and ecological issues while ignoring its social justice dimensions. This course will investigate how Human Rights has and will be impacted by the Anthropocene, with special attention paid to the human dimensions and consequences of anthropogenic change. Do new and troubling revelations about anthropogenic mistreatment of the earth and its resources modify or amplify the kinds of responsibilities that govern activity between individuals and communities? How do we scale the human response from the urban, to the periurban, to the rural? How must the study of Human Rights evolve to address violence and mistreatment associated not just among humans but also amid human habitats? What sorts of juridical changes must occur to recognize and respond to new manifestations of social injustice that relate directly to consequences of anthropogenic changes to the Earth system? Topics will include discussions of the Environmental Justice movement, agribusiness, access to (and allocation of) natural resources, population growth; its global impact, advocacy for stronger and more accountability through environmental legal change, biodiversity in urban environments, and the growing category of environmental refugees

HRTS GU4650 CHILDREN'S RIGHTS ADVOCACY. 3.00 points.

This course is designed to introduce contemporary children's rights issues and help students develop practical advocacy skills to protect and promote the rights of children. Students will explore case studies of advocacy campaigns addressing issues including juvenile justice, child labor, child marriage, the use of child soldiers, corporal punishment, migration and child refugees, female genital mutilation, and LGBT issues affecting children. Over the course of the semester, students will become familiar with international children's rights standards, as well as a variety of advocacy strategies and avenues, including use of the media, litigation, and advocacy with UN, legislative bodies, and the private sector. Written assignments will focus on practical advocacy tools, including advocacy letters, op-eds, submissions to UN mechanisms or treaty bodies, and the development of an overarching advocacy strategy, including the identification of goals and objectives, and appropriate advocacy targets and tactics

HRTS GU4700 Ethical Dilemmas in Healthcare: A Human Rights Approach. 3 points.

This course examines major ethical dilemmas that emerge in the convergence between human rights and public health at the national and international levels. Using specific case studies, Attention will be given to the rationales, meaning and implementation of the right to health across borders; the theories and practices of allocation of scarce resources; the challenges of providing care for minority groups –including sexual minorities, children, and persons with disabilities; and the ethical, legal, and social implications of international health governance. This is an interactive course, with interdisciplinary scholarship and exploration of issues in historical, cultural and political contexts.

HRTS GU4810 RELIGION AND HUMAN RIGHTS. 3.00 points.

Priority given to human rights studies M.A. students. Open to 3rd and 4th year undergraduates on first day of term with the instructor's permission.

The resurgence of religion over the past three decades has had a transformative influence globally and within nations. Religious nationalism, fundamentalism, and communalism have arisen to forcefully compete with secular democracy. With the fall of the Soviet bloc and the bilateralism of the Cold War, ethnic particularism, often of a religious character, has emerged as the locus of identity for people on all continents. These rapid changes engendered by a new, often commanding, role for religion challenge the very concept of individual and universal human rights. They raise difficult theoretical and painfully practical questions as to the preservation of individual human rights, and the relationship of democracy to religion. At the same time, recent currents such as economic globalization, the triumph of the free market, and the communications revolution promote individual autonomy, a cornerstone of human rights. There can be no doubt that religion will occupy an increasingly salient role in the social and political life of nations during the course of the 21st century. The relevance of religion to human rights in our time cannot be undervalued. The course examines the relationship of religion to human rights from several standpoints, including religions role in abetting intolerance, religious minorities as victims of human rights violations, and religion as a framer of human rights ideals which inspire action

HRTS GU4880 HUMAN RIGHTS IN THE UNITED STATES. 3.00 points.

The United States has a long complex relationship with the international human rights system. Although its founding was grounded in fundamental norms of inalienable rights, equality and freedom, U.S. history is characterized by divisive and sometimes violent disagreements about who counts as human, what is fundamental to the human condition, and which/how rights should be protected. How has this history contributed to our contemporary struggles? Through engaging with issues related to racial justice, criminal justice, reproductive justice, disability justice, gender justice, and indigenous people's rights, students are asked to consider how certain rights are sites of contestation within the U.S. political system and within U.S. society. This course offers a multidisciplinary survey of urgent contemporary human rights issues in the United States and seeks to advance students' skills to examine human rights research and analysis through intersectional approaches. Part of the inquiry of this course is ensuring that students understand existing tensions among several key concepts (1) human rights as a body of international human rights law and institutions; (2) human rights movements using human rights discourse to further their aspirations; (3) constitutional rights in the U.S. as interpreted by U.S. courts that may or may not allude to/be contained in international law; and (4) political rhetoric that use the language of "rights" for political ends. Coursework will ground current human rights debates in their social, legal, and political contexts. It will outline the different actors in the human rights landscape, focusing on mobilization strategies of human rights movements and the policy reforms that they seek to advance human rights agendas. Students will engage with legal cases and legislation in the United States. By the end of this course, you should expect to be able to: Understand critical human rights issues in the United States, and apply international and domestic human rights principles and practice to these contemporary human rights debates; Understand the role of social movements in shaping narratives around human rights; Analyze (through case studies) the real-life application and effects of human rights policies, as well as how they contribute to the promotion, progressive enforcement, and internalization of international human rights

HRTS GU4900 UN HUMAN RIGHTS BODIES:IMPACT-REFORM-ADV. 4.00 points.

The course is part of the programs offerings in experiential learning. Students will engage in an applied research project with an NGO partner focused on the role of UN Special Rapporteurs and the strategies they employ. Students will become familiar with the intricacies of the UN human rights system, while also taking a birds-eye view on the system, its challenges and the need for reform. The course seeks to combine critical reflection with practical application, including through the perspectives of practitioners and guest speakers who discuss their strategies for advocacy

HRTS GU4910 Children's Rights, Armed Conflict, and Peacebuilding. 3 points.

According to the UN Secretary-General's (SG) annual report on children and armed conflict last year armed conflicts around the world led to at least 4,000 verified rights violations against children committed by government forces and over 11,500 by non-state armed groups. The violations include killing or maiming, recruitment or use of children in hostilities, sexual violence, using children as human bombs, abductions, the denial of humanitarian access, and attacks on schools and hospitals. About 50 per cent of the estimated 26 million people currently displaced by armed conflicts and violence are children.

This course examines global approaches, challenges and problems associated with providing resources, implementing laws and guidelines, and ensuring education to children before, during and after armed conflicts. Students will be asked to interrogate current approaches and literature in light of critical theories of childhood, human rights and children's rights more specifically. The course utilizes case studies that show the failures of international human rights and NGOs to address the needs of children before, during, and after conflict, as well as the problems with not taking into account children's perspectives and lived experience. The course seeks to the extent possible to incorporate children's views on conflict through a review of children's drawings, writing, and interviews. It questions the common representations about children and armed conflict that mass media, international development literature, children's literature, and film promote. The course will also explore the international norms for protecting children in emergencies which have also been strengthened considerably, by a number of UN Security Council resolutions, notably resolutions 1612 and 1820, aimed at ending the abuse of children and civilians in the context of war. What are the responsibilities of the International Community to protect and support children of war? What preventative measures can be taken to better ensure children do not fall victims to armed conflict? Finally, the course takes a special look at education prior to, during conflict, and post-conflict, to understand how and whether the root causes of conflict-- discrimination, intolerance, economic inequality-- are addressed by educational systems.

HRTS GU4915 HUMAN RIGHTS # URBAN PUB SPACE. 3.00 points.
 Priority for 3rd & 4th yr CC/GS HUMR studs & to HRSMA studs

The course will explore the often-contested terrain of urban contexts, looking at cities from architectural, sociological, historical, and political positions. What do rights have to do with the city? Can the ancient idea of a right to the city tell us something fundamental about both rights and cities? Our notion of citizenship is based in the understanding of a city as a community, and yet today why do millions of people live in cities without citizenship? The course will be organized thematically in order to discuss such issues as the consequences of cities developments in relation to their peripheries beginning with the normative idea of urban boundaries deriving from fortifying walls, debates around the public sphere, nomadic architecture and urbanism, informal settlements such as slums and shantytowns, surveillance and control in urban centers, refugees and the places they live, catastrophes natural and man-made and reconstruction, and sovereign areas within cities the United Nations, War Crimes Tribunals. At the heart of our inquiry will be an investigation of the ways in which rights within urban contexts are either granted or withheld

HRTS GU4930 INT'L HUMANITARIAN LAW/HUM RGTS. 4.00 points.

This seminar will cover various issues, debates, and concepts in the international law of armed conflict (known as international humanitarian law), particularly as it relates to the protection of non-combatants (civilians and prisoners of war). In doing so, we will examine how international humanitarian law and human rights law intersect. Both sets of legal norms are designed to protect the lives, well-being, and dignity of individuals. However, the condition of armed conflict provides a much wider set of options for governments and individuals to engage in violent, deadly action against others, including killing, forcibly detaining, and destroying the property of those designated as combatants. At the same time, the means of waging war are not unlimited, but rather are tightly regulated by both treaty and customary law. This course will examine how these regulations operate in theory and practice, focusing on the principles of distinction, proportionality, and military necessity

Prerequisites: the instructor's permission. Please e-mail the instructor at bc14@columbia.edu.

Prerequisites: the instructor's permission. Please e-mail the instructor at bc14@columbia.edu. This course will examine the tension between two contradictory trends in world politics. On the one hand, we have emerged from a century that has seen some of the most brutal practices ever perpetrated by states against their populations in the form of genocide, systematic torture, mass murder and ethnic cleansing. Many of these abuses occurred after the Holocaust, even though the mantra never again was viewed by many as a pledge never to allow a repeat of these practices. Events in the new century suggest that these trends will not end anytime soon. At the same time, since the middle of the twentieth century, for the first time in human history there has been a growing global consensus that all individuals are entitled to at least some level of protection from abuse by their governments. This concept of human rights has been institutionalized through international law, diplomacy, international discourse, transnational activism, and the foreign policies of many states. Over the past two decades, international organizations, non-governmental organizations, and international tribunals have gone further than any institutions in human history to try to stem state abuses. This seminar will try to make sense of these contradictions

HRTS GU4955 Narrative and Representation in Post-Conflict Societies. 3 points.

This course explores the relationship between narrative and the legacy of violence and atrocity in post-conflict societies, focusing particularly on the Holocaust, Cambodia, Rwanda and the former Yugoslavia (and more briefly Indonesia and Armenia). Examining a range of medium – including, but not limited to, eye-witness accounts, memoirs, history books, government reports, film, theater, memorials - we will consider how different narratives address issues of history and memory, justice and judgment. We will also discuss how narrative influences efforts to achieve reconciliation and come to terms with the past on both personal and societal levels. Does revisiting the past allow people who either suffered or inflicted terrible violence – or both – once again live together? Are there particular modes or genres of narrative that are particularly successful in terms of enabling societies to reflect on their past and respond adequately? Can justice and accountability ever be achieved? These are some of the questions we will consider as we examine the ways in which atrocities are written about, remembered, judged and interpreted.

HRTS GU4965 Gender-Based Violence # Human Rights. 3.00 points.

The term 'gendercide' highlights a range of distinct and specific forms of violence executed against human beings based on their own gender self-identification as well as patriarchal assumptions about their gender. In this course, we will examine research discerning, movements challenging, and the adjudication, and/or lack thereof, of Gender Based Violence (GBV) in several major categories traversing spatial, temporal, and ideological contexts, including: reproductive rights and health; trafficking and migration; and disaster and pandemics. It is critical to: interrogate the ideologies that drive and sustain GBV; examine in detail the harm it presents to human beings; explore what can be done to protect the security of those experiencing GBV; and to think about measures of prevention to guard additional human beings from experiencing it. The heart of the course will involve an intersectional analysis of specific case studies; highlighting the GBV associated with each case; examining the impact of GBV on human rights; and how GBV has been addressed in society. The close study of each case will assist students in illuminating intricacies, complexities, and challenges to human security in specific contexts

HRTS GU4975 Borders, Surveillance, Rights. 3.00 points.

This interdisciplinary course grapples with the relationship between borders, surveillance, power and rights, critically examining the ways in which lines, boundaries, and caesuras are drawn among geographical entities, communities, identities, environments, and ultimately, social relations – demarcating self and other, establishing hierarchical relationships and activating infrastructures of violence. This seminar explores the dynamics, contradictions and politics surrounding borders and surveillance, and borrows from the fields of film, architecture, art and urban studies to explore the effect on access to and formulations of human rights. To this end, we engage notions of biopolitics, racialization, exclusion/exception, necropolitics, coloniality, hospitality and securitization, among others. The course also engages visual and spatial methodologies and maps out everyday practices of resistance that seek to challenge, subvert or collapse the multifaceted violence of borders. Taken together, this course provides an alternative to conventional scholarship on this subject. It engages with and provides an alternative to the mainstream literature to take for granted the inclusive and integrative character of nation-states. At first glance, the course may appear highly theoretical, but not to worry – we will move slowly through the texts and concepts together. The instructor will also ensure that we apply the ideas discussed in class to concrete and tangible case studies with examples given to enable easier access and collective learning

Across the world, conflict and violence are on the rise, in many forms and due to myriad factors. This course explores the relationship between war, conflict, and education. Drawing on a human rights framework and its applications to education, this course will explore the possibilities and limitations inherent in this framework. Questions we will explore include: How does education contribute to, or mitigate conflict? What is the role of education in emergencies? What is the role of education in addressing the needs of refugees? What is the role of education in post conflict contexts and peacebuilding? What is human rights education?

This course considers key questions at the foundation of political thought. What is justice? How do we justify the coercive power of states? Do we have an obligation to obey the government? Who should make and enforce the law? What basic rights and liberties should governments protect? How should our economic system produce and divide wealth and material resources? What are the claims of excluded or marginalized groups and how can these claims be addressed? We explore these questions through the works of several classical and contemporary political thinkers. A major goal of the course is to practice the skills needed to understand a political thinker's arguments and to construct one's own

MDES UN2004 Conflicts: Race, Region, Religion. 4.00 points.

Prior to “conflict resolution,” there is conflict. But what is conflict and how do we understand it? This introductory lecture course proposes to explore established objects in their presumed ties to the fact and concept of “conflict.” We will inquire into the nature of conflict as well as into the kinds of conflicts that operate, or seem to operate, perhaps even to structure, the understanding of race, of region, and of religion. We will attend to the solidity and fragility of geographic divisions (regional and trans regional conflicts), their history (modern / premodern, colonial / pre- and post-colonial), the emergence of race (racial and ethnic conflicts), the pertinence of religions (religious strife and violence), their relation to political associations (religion and politics, religion and nationalism) and to other social and/or economic divisions (class, gender). We will interrogate the analytic and descriptive value of keywords like war, enmity, dispute, division, partition. We will also reflect on disciplinary tensions and divisions toward an understanding and perpetuation of conflict. Finally, we will think about the possibility and impossibility of “speaking with the enemy.”

Topics include the division of labor between home and market, the relationship between labor force participation and family structure, the gender earnings gap, occupational segregation, discrimination, and historical, racial, and ethnic group comparisons.

ANTH UN2017 Mafias and Other Dangerous Affiliations. 3.00 points.

Regimes of various shapes and sizes tend to criminalize associations, organizations, and social relations that these ruling powers see as anathema to the social order on which their power depends: witches, officers of toppled political orders, alleged conspirators (rebels, traitors, terrorists, and dissidents), gangsters and mafiosi, or corrupt officers and magnates. Our main goal will be to understand how and under what conditions do those with the power to do so define, investigate, criminalize and prosecute those kinds of social relations that are cast as enemies of public order. We will also pay close attention to questions of knowledge – legal, investigative, political, journalistic, and public – how doubt, certainty, suspicion and surprise shape the struggle over the relationship between the state and society. The main part of the course is organized around six criminal investigations on mafia-related affairs that took place from the 1950s to the present (two are undergoing appeal these days) in western Sicily. After the introductory section, we will spend two weeks (four meetings) on every one of these cases. We will follow attempts to understand the Mafia and similarly criminalized organizations, and procure evidence about it. We will then expand our inquiry from Sicily to cases from all over the world, to examine questions about social relations, law, the uses of culture, and political imagination. *Although this is a social anthropology course, no previous knowledge of anthropology is required or presumed. Classroom lectures will provide necessary disciplinary background

ANTH UN2215 CULTURE, SOCIETY, AND CATASTROPHE. 3.00 points.

Catastrophes and disasters are often seen as inherently natural crises when in reality they are both caused and affected by anthropogenic forces and their impacts are conditioned by existing social, economic, and political factors. To truly understand catastrophes, such as the incipient climate crisis, extreme weather events, and even the current coronavirus pandemic, we will examine the complex interplay between environmental and social factors through both anthropological and human rights lenses. Specifically, the course will address the social and cultural aspects of catastrophe by focusing on the climate crisis, its causes, and its impacts. First, the course will consider the phenomena of anthropogenic climate change. Second, the course will examine the theoretical and empirical literatures that have elucidated the nature of climate change as a social, as well as a biophysical, process. Finally, the course will consider how human rights and other legal regimes do or do not address the social justice and humanitarian issues created by anthropogenic climate change. This course is an equivalent to ANTH S3215 and you cannot receive credit for both courses

HIST UN2222 NATURE # POWER: ENV HIST NORTH AMERICA. 4.00 points.

Environmental history seeks to expand the customary framework of historical inquiry, challenging students to construct narratives of the past that incorporate not only human beings but also the natural world with which human life is intimately intertwined. As a result, environmental history places at center stage a wide range of previously overlooked historical actors such as plants, animals, and diseases. Moreover, by locating nature within human history, environmental history encourages its practitioners to rethink some of the fundamental categories through which our understanding of the natural world is expressed: wilderness and civilization, wild and tame, natural and artificial. For those interested in the study of ethnicity, environmental history casts into particularly sharp relief the ways in which the natural world can serve both to undermine and to reinforce the divisions within human societies. Although all human beings share profound biological similarities, they have nonetheless enjoyed unequal access to natural resources and to healthy environments—differences that have all-too-frequently been justified by depicting such conditions as “natural.”

AHIS UN2425 Visual Activism. 4.00 points.

How has visual culture played a role within the social movements of the last several decades, such as #BlackLivesMatter and Extinction Rebellion? How, we might ask, is activism made visible; how does it erupt (or disappear) with collective fields of vision? Drawing upon Black South African queer photographer Zanele Muholi's term “visual activism” as a flexible rubric that encompasses both formal practices and political strategies, this lecture class interrogates contemporary visual cultures of dissent, resistance, and protest as they span a range of ideological positions. We will examine recent developments in and around recent intersections of art and politics from around the world, looking closely at performances, photographs, feminist dances, graffiti, murals, street art, posters, pussy hats, and graphic interventions, with a special focus on tactics of illegibility and encodedness. Topics include visual responses to structural racism, global climate change, indigenous land rights, state violence, gentrification, forced migration, and queer/trans issues

ANTH BC2427 ANTHROPOLOGY OF CLIMATE CHANGE. 3.00 points.

This course focuses on some of the present, and possible future, socio-ecological conditions of life on planet earth. In particular we will work to understand the historic, economic, political, and socio-cultural forces that created the conditions we call climate change. With this we will take a particular interest in the question of how race, ethnicity, Indigeneity, class, and gender articulate with the material effects of climate change. The course also focuses on how we, as scholars, citizens, and activists can work to alter these current conditions in ways that foster social and ecological justice for all living beings. Although we will ground our scholarship in anthropology, to encourage interdisciplinary and even transdisciplinary thought, weekly readings will be drawn from across scholarly and activist canons. While becoming familiar with scholarly and activist conversations about space and place, risk and vulnerability, and ontology and epistemology, we will work through a series of recent events as case studies to understand causes, effects, affects, and potential solutions

SOCI UN2500 Mass Incarceration and Beyond. 4.00 points.

This course for undergraduate students provides a sociological perspective on mass incarceration and examines alternative politics and policies for reform. Through seminar discussions and presentations, students will engage with key lines of scholarship examining the emergence and consequences of historically large prison populations in the United States and review current policy debates. Key themes of the course will include the close connection between mass incarceration and racial inequality, contemporary criminal justice policy, and alternative visions of justice. Building on a collaboration between a researcher in the field of criminal justice policy (Western) and a leading advocate for reform (Nixon), this course will offer a systematic review of research while also employing strong images and language that convey the moral urgency of America's incarceration crisis. Enlisting theoretical and empirical analysis paints a clear and convincing picture that mass incarceration is not just a solution to a criminal justice problem, but is a sociological problem itself. Seminar discussions each week will introduce students to key lines of research, present current community justice initiatives, and explore strategies that could significantly reduce incarceration

HIST UN2523 HEALTH INEQUALITY: MODERN US. 4.00 points.

Through assigned readings and a group research project, students will gain familiarity with a range of historical and social science problems at the intersection of ethnic/racial/sexual formations, technological networks, and health politics since the turn of the twentieth century. Topics to be examined will include, but will not be limited to, black women's health organization and care; HIV/AIDS politics, policy, and community response; benign neglect; urban renewal and gentrification; medical abuses and the legacy of Tuskegee; tuberculosis control; and environmental justice. There are no required qualifications for enrollment, although students will find the material more accessible if they have had previous coursework experience in United States history, pre-health professional (pre-med, pre-nursing, or pre-public health), African-American Studies, Women and Gender Studies, Ethnic Studies, or American Studies

ARCH UN2530 Life Beyond Emergency: Domesticities of Displacement, Inhabitations of Migration. 3.00 points.

Life Beyond Emergency examines constructed environments and spatial practices in contexts of displacement, within the connected histories of colonialism and humanitarianism in the postcolonial world. People migrating under duress, seeking refuge, practicing mutual aid, and sheltering in governmental or nongovernmental settings invest architecture with a critical heritage value and imaginaries of life beyond emergency. The course considers a politics and poetics of an architecture of partitions, borders, and camps: territories and domesticities of concern to authorities and inhabited by ordinary people forging solidarities and futures. We will investigate the connected histories and theories of humanitarianism and colonialism, which have not only shaped lives as people inhabit spaces of emergency, but produced rationales for the construction of landscapes and domesticities of refuge, enacted spatial violence and territorial contestations, and structured architectural knowledge. The course examines iconic forms such as refugee camps in relation to histories of colonial institutions such as archives and prisons. From Somalia to Palestine to Bangladesh and beyond, our inquiry into contested 'borderlands' where the greatest number of people have been forced to migrate as 'refugees' invites students to interrogate normalized discourses and spaces in order to imagine and analyze emergency environments as constructions that people have resisted, endured, and transcended

HIST UN2533 US LESBIAN # GAY HISTORY. 4.00 points.

This course explores the social, cultural, and political history of lesbians, gay men, and other socially constituted sexual and gender minorities, primarily in the twentieth century. Since the production and regulation of queer life has always been intimately linked to the production and policing of "normal" sexuality and gender, we will also pay attention to the shifting boundaries of normative sexuality, especially heterosexuality, as well as other developments in American history that shaped gay life, such as the Second World War, Cold War, urbanization, and the minority rights revolution. Themes include the emergence of homosexuality and heterosexuality as categories of experience and identity; the changing relationship between homosexuality and transgenderism; the development of diverse lesbian and gay subcultures and their representation in popular culture; the sources of antigay hostility; religion and sexual science; generational change and everyday life; AIDS; and gay, antigay, feminist, and queer movements

Unsettling Science invites students to do exactly that: ask big questions about science and interrupt preconceived ideas about what science is and who does it. This course is an introductory dive into the interplay between science, technology, health, environment, and society. By offering deep historical and contemporary perspectives, this course equips students with skills essential to critically exploring not only longstanding questions about the world but also urgent issues of our time. Unsettling Science will provide students with the critical and methodological tools to think creatively about local and global challenges and develop interventions. To do so, the course focuses on a series of fundamental questions that underpin the study of science and society from a variety of perspectives

POLS BC3035 Feminist Political Thought. 3.00 points.

Feminism is often recognized as a political movement. But is there a feminist way of thinking about politics? In this course, we'll investigate the core premises, provocations, proposals, and tensions of feminism as they relate to specifically political problems, focusing particularly on feminist political thought as it developed in the twentieth century. Who is the subject of feminist politics? What is the meaning of "difference," and how can—or should—feminists seek to organize across it? What are appropriate topics for politics, and what should remain private? Is the family a space for politics? The household? The body? How much of the personal can, and should, be made political? Are there feminist ways of doing politics? We will consider these questions with reference to texts from both feminist activists and feminist scholars

EDUC BC3040 MIGRATION, GLOBALIZATION, AND EDUCATION. 4.00 points.

Globalization and mass migration are reconfiguring the modern world and reshaping the contours of nation-states. New technologies that facilitate the movement of information, goods and people across borders have made it easier for people to remain culturally, politically, economically and socially connected to the places from which they migrated. This seminar focuses on the experiences of the youngest members of these global migration patterns—children and youth—and asks: What do these global flows mean for educating young people to be members of the multiple communities to which they belong? This seminar will explore the following questions: What is globalization and why is it leading to new patterns of migration? How do children and youth experience ruptures and continuities across contexts of migration? How do language policies affect young people's capacity to be educated in a new land? What does it mean to forge a sense of belonging and citizenship in a "globalized" world, and how does this challenge our models of national citizenship? How are the processes by which young people are incorporated into their new country entwined with structures of race, class, and gender? Drawing on fiction, autobiography, and anthropological and sociological research this class will explore these questions from a variety of disciplinary perspectives

This course focuses on understanding water, sanitation and health in the developing world and how these factors interact to affect people's lives. Specifically, what are the options for providing cleaner water and improved sanitation in order to reduce the incidence of waterborne diseases in the developing world?

ECON BC3049 Economic Evaluation of Social Programs. 3 points. Not offered during 2023-2024 academic year.

Prerequisites: ECON BC3035 Intermediate Micro Theory and ECON BC2411 Statistics for Economics, or the equivalents

A study of the effectiveness of social programs and the different quantitative techniques economists use to evaluate policy interventions. Cost-benefit analysis, testing predictions of economic theories. Specific examples of successful and unsuccessful social programs in the U.S. and around the world.

EDUC BC3055 ARTS AND HUMANITIES IN THE CITY:CRITICAL. 4.00 points.

Using the theme of "Arts and Humanities in the City", this seminar will build participants' knowledge of critical literacy, digital storytelling methods, and ways to use New York City as a resource for teaching the Arts (Dance, Theatre, Music, and Visual Arts), Social Studies, and English Language Arts in grades K-12. Critical literacy is an approach to teaching and learning that focuses on developing students' abilities to read, analyze, understand, question, and critique hidden perspectives and socially-constructed power relations embedded in what it means to be literate in a content area

GRKM UN3070 Picturing Antigone. 3.00 points.

What is it that makes Antigone, Sophocles's tragedy from the 5th century B.C.E, such a powerful vehicle for the consideration of subjectivity, ethics, and politics in the present day? In this seminar an anthropologist and a photojournalist consider Antigone's productivity for political analysis, philosophy, psychoanalysis, and feminist studies and consider how the play has evolved into a contemporary site for the consideration of war, fascism, ethical action, gender, democracy, and colonialism in places such as Nazi-occupied Paris, the Texas-Mexico border, "dirty-war" Argentina, apartheid South Africa, Taliban-sieged Kandahar, and Covid-stricken New York. This investigation draws on a wide range of materials, including literary criticism, film, and archival photographs. Throughout the semester, students also develop familiarity with photography as a medium of inquiry, in preparation for their final projects on a modern adaptation of Antigone

POLS UN3100 JUSTICE. 3.00 points.

An inquiry into the nature and implications of justice in areas ranging from criminal justice to social justice to the circumstances of war and peace, considering issues such as abortion, the criminalization of behavior, the death penalty, climate change, global poverty, civil disobedience, and international conflict

POLS BC3102 * Colloquium on Race and Modern Political Thought. 4 points.

Admission by application through the Barnard department only. Enrollment limited to 16 students.

Prerequisites: POLS 1013 or the equivalent.

Race and Modern Political Thought is a Political Theory colloquium that explores how the concept of race became available to modern thought as a legitimate conceptualization of human being and difference and to political thought as an idea useful to structuring political communities. Is race best understood in ideological terms, i.e., as a viewpoint shared by philosophers and lay-persons alike about difference that usefully reflected the needs and aspirations of slaveholders and colonialists? Or is race instead an artifact of modern forms of reasoning? Or should we ignore questions of origin and simply take seriously the notion that the only practical—ethically correct or politically progressive—approach to theorizing race is to attend critically to the organization of racial power? What kind of idea is race?

POLS UN3112 GANDHI, KING # POLS OF NONVIOLENCE. 4.00 points.

Since Gandhi's experiments in mass satyagraha over a century ago, nonviolence has become a staple of protest politics across the globe. From the Occupy movements to the Arab Spring to Movement for Black Lives, it might even be entering a new phase of revitalization. At the same time, what exactly nonviolence is and what it can accomplish in politics is very much under debate. This course aims to understand the politics of nonviolence by examining the political ideas and political careers of its most well-known twentieth-century advocates, M.K. Gandhi and Martin Luther King, Jr. Though still venerated as founding figures of nonviolent protest, Gandhi and King have come to be remembered in ways that can misconstrue how they understood and practiced nonviolent politics. To many, Gandhi is a saintly idealist, who wanted to imbue politics with the spirit of ahimsa, truth, and conscience. Likewise, King is taken to be a spokesman for interracial brotherhood and Christian love. While partly true, these images also downplay the political side of their nonviolence – the techniques of organizing and strategies of protest that made their movements successful. We will examine the evolution of Gandhi's and King's political thinking in relation to the movements they led – the Indian independence movement and the civil rights movement in the US. We will consider how the theory and practice of nonviolence evolved and changed as it moved from one context to another. We will be especially focused on understanding the dynamics of nonviolent protest

POLS UN3122 Citizenship, Rights, and Immigration. 3 points.

Our political discourse is inundated with talk of citizenship. In this course we will examine various theories of citizenship, paying particular attention to the way the increasing complexity and multiculturalism of societies have challenged our understanding of this concept. We will also consider how different conceptions of citizenship address the challenges raised by both global and local forces. After an overview of different theories of citizenship, we explore the debates about political rights and representation for oppressed groups and minorities and consider the nationalist and cosmopolitan understandings of civic identity. What should be the criteria for citizenship? What rights should citizens have? Does citizenship require boundaries? Does democratic citizenship demand a particular kind of patriotism? What rights should illegal immigrants have? What role does the court play in defining citizenship rights? Can there be global or transnational citizenship? Though the primary focus will be to explore normative theories of citizenship, we will briefly consider how the European Union and the United States are dealing with some of the pressing issues regarding citizenship: immigration and assimilation.

WMST UN3125 INTRO TO SEXUALITY STUDIES. 3.00 points.

This course is designed to introduce major theories sexuality, desire and identity. We will be considering the relations between the history of sexuality and the politics of gender. We will read some primary texts in gender theory, and in the study of sexuality, desire, and embodiment. This course also provides an introduction to the interdisciplinary examination of human sexual and erotic desires, orientations, and identities. We will study how desires are constructed, how they vary and remain the same in different places and times, and how they interact with other social and cultural phenomena such as government, family, popular culture, scientific inquiry, and, especially, race and class.

MDES UN3131 Crisis and War in the Horn of Africa. 3.00 points.

The Horn of Africa is often described as a disaster story, a land of terror, crisis and failure. But is it really a place in crisis? In what ways and for whom? For the people of the region, what constitutes meaningful social and political life? Is it possible to approach politics in the Horn of Africa through lenses other than those of violence and disaster? Are there other methods of understanding the experiences of crisis and recovery? In addition to examining emerging research trends in the region the course examines various approaches to the questions of war, humanitarian intervention, peace building, democratization, and economic reform. It considers how the study of popular culture, religious change, and social movements provide other ways to think about collective life. The seminar is intended for those interested in the study of Africa and the Middle East, and other regions that may seem bleak to outsiders but can provide new ways of understanding politics

WMST BC3132 GENDERED CONTROVERSIES. 4.00 points.

Love and sex have long been studied as historical constructs that are traversed by social, political, and economic systems. In this course, we will supplement those dimensions with the often-overlooked lens of technological mediation. Starting from the premise that romantic love is deeply shaped by the affordances of the technology of the time, a critical awareness of technological mediation in romance –especially of digital technologies, i.e. online dating, social media, or cybersex – will afford us an understanding of how social categories such as gender, race, class, ability, and sexuality are shaped by technologies and in turn govern social and cultural perceptions of love, dating, and sex. Sandra Moyano-Ariza is Term Assistant Professor of WGSS and Research Director at BCRW. Her research works at the intersection of culture, philosophy, and digital technologies, with interests in the fields of media studies and digital scholarship, contemporary feminist theory, critical race theory, posthumanism, and affect theory

ENGL BC3214 LATINX AND THE ICE/PRISON INDUSTRIAL COMPLEX - ACCESS AND STRATEGIES FOR NEWS COVERAGE. 4.00 points.

This course encompasses themes of race, ethnicity, mass incarceration, and immigration in the modern United States, with special attention to the stories of Latinx people. We will consider the roles of journalistic writing, documentaries, and personal narratives in shaping public policy and attitudes towards lives behind bars. Guest speakers will also provide personal experiences to help reframe our own narratives and perspectives on these issues. The course's primary goal is to challenge the process of how stories of race, immigration, and mass incarceration are written, by developing scholarly pieces

AMST BC3220 ABORTION IN CONTEXT. 4.00 points.

Abortion access will shape the lives of your generation—and yet the issue of abortion is too often left to misinformation and disconnected from its role in overall reproductive freedom. In this course, we will put abortion into multiple contexts (historical, political, legal, pharmaceutical, religious), drawing interdisciplinary material from scholars, activists, community organizers, lawyers, care providers, and journalists. Each class will feature a guest speaker who has dedicated their career to advocating for abortion as a critical part of overall reproductive healthcare in the United States and internationally. Grounded in the reproductive justice framework, which aims not only to protect the “right to choose” but also to create the economic, social, and environmental conditions in which people can parent with dignity, we will think of abortion as one critical part of a constellation of projects that, together, work toward total reproductive freedom

POLS UN3255 RACE AND THE US CARCERAL SYSTEM. 3.00 points.

This course will introduce students to research on the institutions of the US carceral system, including the police, courts, prisons, and immigration control. We will focus on two questions: how race relates to experiences with the institutions of the carceral state, and how those institutions in turn influence racial politics. The main objective is not the accumulation of factual knowledge about this system, but familiarity with theoretical frameworks with which to make and critically assess arguments about the functioning of carceral institutions as they relate to racialized people and the functioning of democracy

CSER UN3303 Whiteness, Sentiment and Political Belonging. 4.00 points.

Scholars of gender, sexuality, ethnicity and race have long been preoccupied with the terms, categories, and processes through which the United States has excluded or qualified the citizenship of particular groups, including women, immigrants, indigenous nations, and descendants of enslaved Africans. Yet it has spent less time interrogating the unqualified content of Americanness, and the work that the imagination of a "default" American identity does in contemporary political life. This seminar introduces students to this problem through an unspoken racial dimension of American political belonging – the presumed whiteness of ideal American citizens. Readings drawn from several disciplinary traditions, including anthropology, linguistics, sociology, history, and journalism, will ground students in the course's key concepts, including racial markedness, the history of racialization, and public sentiment. Students will mobilize these tools to analyze several cases that rendered white sentiment explicit in politically efficacious ways, including the "panic" incited by the destabilization of race-based residential segregation, the "paranoia" of conspiracy theorists, the "sympathy" associated with natural disasters, and the "resentment" or "rage" associated with the loss of racial privileges

POLS BC3307 *Colloquium on Racial Violence. 4 points.

Prerequisites: POLS 1201 Intro to American Politics or an equivalent American Politics course. [Admission by application](#) through the Barnard department only. Enrollment limited to 16 students.

This colloquium examines two particular episodes of racial violence, each of which situates the political differently: lynchings and prisons. The goal is to not only explore how to bring the state back in but also examine the differences, similarities and points of intersections across disciplines.

WMST UN3312 THEORIZING ACTIVISM. 4.00 points.

Considering local, national, and international activist case studies through social movement theories, we work together to understand what activism looks like, the people who engage in it, how activist messages are constructed, and how visions of transformation are developed. Prerequisite: Either one introductory WGSS course or Critical Approaches to Social and Cultural Theory or Permission of the Instructor

URBS UN3315 METROPOLITICS OF RACE # PLACE. 3.00 points.

Prerequisites: Students must attend first class.

This class explores how racism and racialized capitalism and politics shape the distribution of material resources among cities and suburbs in metropolitan areas and the racial and ethnic groups residing in them. Readings and discussion focus on the history of metropolitan area expansion and economic development, as well as contemporary social processes shaping racial and ethnic groups' access to high-quality public goods and private amenities. We address racial and ethnic groups' evolving political agendas in today's increasingly market-driven socio-political context, noting the roles of residents; federal, state, and local governments; market institutions and actors; urban planners, activist organizations, foundations, and social scientists, among others. Here is a sample of specific topics: race/ethnicity and who "belongs" in what "place;" inequitable government and market investment across racial and ethnic communities over time and "sedimentation effects" (for example, the "redlining" of Black communities leading to their inability to access loan and credit markets and the resulting wealth gap between Blacks and Whites); gentrification processes; creating sufficient, sustainable tax bases; and suburban sprawl. Assignments will include two short response papers, mid-term and final exams, and another project to be determined

MDES UN3331 URBAN SPACE # CONFLICT IN MIDDLE EAST. 3.00 points.

This course explores how civil war, revolution, militarization, mass violence, refugee crises, and terrorism impact urban spaces, and how city dwellers engage in urban resilience, negotiate and attempt to reclaim their right to the city. Through case studies of Beirut (1975-present), Baghdad (2003-present), Cairo (2011-present), Diyarbakir (1914-present), Aleppo (1914-present), and Jerusalem (1914-present), this course traces how urban life adjusted to destruction (and post-conflict reconstruction), violence, and anarchy; how neighborhoods were reshaped; and how local ethnic, religious, and political dynamics played out in these cities and metropolises. Relying on multi-disciplinary and post-disciplinary scholarship, and employing a wealth of audiovisual material, literary works, and interviews conducted by the instructor, the course scrutinizes how conflicts have impacted urban life in the Middle East, and how civilians react to, confront, and resist militarization in urban spaces

WMST UN3335 Gender and Wars: Perspectives from the Global South. 3 points.

Wars are salient features of globalization. But, how can we understand the relationship between gender and war? How do notions of masculinities and femininities operate in the organizing, waging, protesting, and commemorating war? Starting from the premise that gender is crucial to explaining what happens in national revolutionary wars, postcolonial conflicts and civil wars, peacekeeping and humanitarian interventions, and the social and personal aspects when wars come to an end; this course considers a transnational feminist analysis to reflect on the relationship between gender and militarism. It pulls together literature from different disciplinary fields to explore the gendered dimensions of wars of national liberation, armed conflicts, wartime gender based/sexual violence, politics of victimhood, anti-war activism, resistance and agency. We will pay particular attention to case studies from the global South.

The gendered analyses of war will be explored from a multi-disciplinary framework including history, anthropology, sociology, political science, international relations, philosophy, literature and film. We will utilize film, journalistic accounts, ethnographic narratives and other resources to explore the complex ways in which people, especially men and women experience and respond to wars differently.

POLS BC3370 DOMESTIC REALITY OF AMER FOREIGN POLICY. 4.00 points.

Who determines American foreign policy? How does the CNN Effect impact choices in American foreign policy? This course seeks to answer those questions by focusing on how domestic politics can influence American foreign policy decisions. The Domestic Reality of American Foreign Policy will examine how formal and informal political actors affect the foreign policy process. The course will briefly review the determinants of American Foreign Policy, such as the role theory, external sources, and psychological and societal sources. This course will place a premium on the outer concentric circle of the American foreign policy process by examining how informal political actors can influence foreign policy decisions, such as the mass media, interest groups, and public opinion polls can sway presidential decisions regarding foreign policy issues. The course will rely on using the garage can model to critically analyze how foreign policy decisions are decided that require public support. Moreover, this course will examine broad topics, including how internal matters in the United States, such as racial unrest, queer social movements, and other domestic considerations, can impact American foreign policy issues

POLS UN3401 Democracy and Dictatorship in Europe. 3 points.

This course will examine the development of democracies and dictatorships in Europe from the French Revolution to the present day. It will analyze the nature and dynamics of European political history and use the European experience as a foundation upon which to build a broader understanding of how different types of political regimes emerge, function and are sustained over time. Prior knowledge of European history and comparative politics is welcome, but not presumed.

RELI UN3415 Climate, Religion, and the Anthropocene. 4.00 points.

This course examines intersections between religious life and climate change in a comparative and global perspective. In recent years, the idea of the Anthropocene—the period of geological time during which human activity has become the primary force shaping the Earth's climate—has abounded in both academic and popular literature. This focus on human agency over the climate raises questions about the extent to which humans share equally responsibility for and vulnerability to climate change, as well as differing understandings of human relationships and responsibilities toward the environment. This course uses religion as a lens to examine the role of humans in both creating ecological destruction and efforts to repair and rework relationships with the natural world. We will draw on primary texts from religious traditions around the world in a bid to unsettle human-centric and universalist narratives of the Anthropocene. By the end of the semester, students will have deepened and nuanced their understandings of the notoriously vexed categories of religion and the Anthropocene, and come away with new ways of thinking about the climate crisis

Prerequisites: Admission by application through the Barnard Political Science Department only. Enrollment limited to 16 students. Requires POLS 1011 (Political Theory) or equivalent. This colloquium examines how the law can participate in the justification of various forms of violence, exclusion, and inequality. It focuses on the power of law to determine which subjects get recognized as persons entitled to rights. Possible topics include slavery, migration, gender, sexual orientation, disability, homelessness, and nonhuman animals

HIST UN3437 CORP BEHAVIOR # PUBLIC HEALTH. 4.00 points.

Priority given to majors and concentrators, seniors, and juniors.

In the decades since the publication of *Silent Spring* and the rise of the environmental movement, public awareness of the impact of industrial products on human health has grown enormously. There is growing concern over BPA, lead, PCBs, asbestos, and synthetic materials that make up the world around us. This course will focus on environmental history, industrial and labor history as well as on how twentieth century consumer culture shapes popular and professional understanding of disease. Throughout the term the class will trace the historical transformation of the origins of disease through primary sources such as documents gathered in lawsuits, and medical and public health literature. Students will be asked to evaluate historical debates about the causes of modern epidemics of cancer, heart disease, lead poisoning, asbestos-related illnesses and other chronic conditions. They will also consider where responsibility for these new concerns lies, particularly as they have emerged in law suits. Together, we will explore the rise of modern environmental movement in the last 75 years

WMST UN3450 Topics in Sexuality and Gender Law. 3 points.

As society shifts in its views about sexuality and gender, so too does the law. Indeed, legal developments in this area have been among the most dynamic of the past couple of decades. Yet law does not map easily or perfectly onto lived experience, and legal arguments do not necessarily track the arguments made in public debate.

In this seminar, we will explore the evolving jurisprudence of sexuality and gender law in a variety of areas. Our goal throughout the semester will be to understand and think about these issues as lawyers do - with our primary focus on understanding and evaluating the arguments that can be made on both (or all) sides of any particular case, with some attention to the factors outside of the courtroom that might shape how courts approach their work. Related to this, we will also seek to understand how and why some of the jurisprudence has changed over time.

URBS UN3480 From Homelessness to Foreclosure: NYC Geographies of Shelter and Home. 4 points.

This course will examine the social, political, and economic elements that have aligned in New York City to produce the most expansive infrastructure of homeless shelters in the United States, as well as ongoing changes in the city's homeless policy since the housing foreclosure crisis. While we will focus primarily on the past 30 to 40 years in New York City, we will consider the history of homelessness and housing in the United States since the Great Depression. Major themes will include criminalization, origin myths, and representations of people who are experiencing homelessness. Key questions will include: In what ways is the current geography of homelessness the result of historical patterns of racism and discrimination? How does studying homelessness provide insight into the ways urban spaces are made? Why have shelters become the primary public response to homelessness in New York? How are race and gender central to the project of building a shelter infrastructure in New York? How are shelters experienced by those living in them? What are some of the ways people living in shelters organize to advocate for their rights and to resist mainstream representations?

CSER UN3490 POST 9/11 IMMIGRATION POLICIES. 4.00 points.

Since September 11, 2001, there has been an avalanche of immigration enforcement policies and initiatives proposed or implemented under the guise of national security. This course will analyze the domino effect of the Patriot Act, the Absconder Initiative, Special Registration, the Real I.D. Act, border security including the building of the 700-mile fence along the U.S./Mexico border, Secured Communities Act-that requires the cooperation of state and local authorities in immigration enforcement, the challenge to birthright citizenship, and now the congressional hearings on Islamic radicalization. Have these policies been effective in combating the war on terrorism and promoting national security? Who stands to benefit from these enforcement strategies? Do immigrant communities feel safer in the U.S.? How have states joined the federal bandwagon of immigration enforcement or created solutions to an inflexible, broken immigration system?

POLS BC3505 COLL: MAKING DEMOCRACY WORK. 4.00 points.

Beginning in the mid-1970s a democratic wave swept the globe. It started in Southern Europe, spread throughout Latin America, parts of East Asia and Africa, and engulfed the former Soviet bloc. In all, dozens of new democracies emerged during the late twentieth century and by the early 21st century there were more democracies in the world than there had ever been before. Over the last decade and a half, however, a democratic undertow has sent in. Many new democracies have slid back towards dictatorship and many old democracies have experienced significant problems as well. This colloquium will exam the literature on democratic consolidation and backsliding, providing students with an overview of the most important theories about what makes democracy work—or not

POLS UN3528 NEW/OLD FORMS OF POL PROTEST. 3.00 points.

This course will introduce the students to the important topic of political protest. Each week we will address different aspects of the phenomenon: from the determinant to the actors and strategies of protest. We will discuss how the forms of protest have changed and the current role of the internet in general and social media in particular. Finally, we will discuss the role of the state and state repression, in particular censorship in the dynamics of protest. Since this is a comparative politics course, we will cover a range of different countries, including the United States, as well as both democratic and authoritarian regimes

POLS BC3543 COLL:NON-STATE GOV CRIME/WAR. 4.00 points.

Prerequisites: (POLS UN1501)

Prerequisites: (POLS UN1501) The conventional wisdom is that crime and civil war are linked to disorder. But these are far from disorderly and ungoverned spaces. Unpacking these settings reveals complex forms of non-state governance constructed by a range of actors, including rebel and guerillas, gangs, vigilantes, and protection rackets – sometimes facilitated by the state

POLS UN3565 DRUGS # POLITICS IN AMERICAS. 4.00 points.

A major challenge for governments across the Western Hemisphere is the complex relationship between illicit drugs, violence, and politics. We can see this relationship operating at multiple levels, from everyday politics in gang-controlled neighborhoods to the global arenas where governments debate and craft international drug policy. These links also reach back in history to global wars of empire and colonial rule, race relations during and following the collapse of the institution of slavery, and contemporary drug wars being waged across the Western Hemisphere and other parts of the world. Today, the dynamics and consequences of the politics of illicit drugs touch all our lives in different ways, including individual and family struggles with substance abuse, everyday encounters with militarized police, and the strains on democracy and citizenship, among many others. This course will examine some of these dynamics and consequences with a theoretical and empirical focus mainly on Latin America and the United States. Throughout our time together we will connect these pressing issues to broader theories, concepts and empirical findings in political science. The course is divided into several individual modules (denoted below with the headings A – G) under three overarching themes for this semester: 1. Politics of Drugs in a Historical Perspective: The first theme is a broad historical overview of the political origins of illicit drugs and the global drug regime. Some of the main questions we will tackle are: When and why did states label drugs as illicit? How did domestic and global politics come together to shape the global drug regime and the “war on drugs?” What role did race and gender play in the early social construction of illicit drugs? 2. Illicit Drugs, Politics and Governance: The second theme focuses on contemporary linkages between illicit drugs, violence, and politics. Here we will examine the conditions under which illicit drug markets are either violent or (relatively) peaceful. We will tackle questions like: Do states always seek to dismantle drug markets? What is the relationship between illicit drugs and electoral politics? What role do illicit drugs play in governance by armed non-state actors? Are states and criminal actors involved in the drug trade always at “war” with each other? 3. Democracy, Citizenship, and the War on Drugs: The third and final theme centers on the political consequences of the war on drugs for questions of democracy and citizenship in the Western Hemisphere. Some of the questions that will help us make sense of these consequences are: How does the war on drugs impact democracy and citizenship? What is the political economy of imprisonment? And in what ways do imprisonment and police-citizen interactions – stemming from the war on drugs – shape individual and collective political behavior and political subjectivity?

AFRS BC3585 POOR IN AMERICA: THE EXPERIENCE AND IMPACT OF FINANCIAL DEPRIVATION. 4.00 points.

This course focuses on the life experiences and impact of poverty in the contemporary United States. We will be exploring the consequences of financial and material deprivation on work, housing, health, parenting, children, as well as the limits and opportunities for inter-generational mobility and how each of these intersect with gender, racial and ethnic identities. We will be learning about the experiences of individual persons as well as how these particular experiences reflect the overarching patterns of social, political and economic trends in the United States. The course will incorporate a diverse set of disciplinary perspectives to shed light on the challenges faced by persons living in poverty. In addition, there will be an emphasis on learning about and critically assessing methodological approaches applied in the literature. No prior knowledge of methods is required and any technical references will be explained in class

Prerequisites: At least sophomore standing, except in consultation with the instructor. Interested students should join the wait list; attendance at the first class is required in order to secure a spot in the class.

Registration to discussion section is mandatory.

This course analyzes the causes of violence in wars and examines the debates around emergency aid, peacekeeping and peacebuilding. In addition, it focuses on recent conflict situations in Africa – especially Congo, Sudan, and Rwanda – as a background against which to understand the distinct dynamics of violence, peace, and international interventions in civil and international conflicts.

POLS BC3605 The Global Politics of Climate Change. 4.00 points.

Climate change mitigation is the greatest global political challenge of our times. This course uses concepts drawn from the broader political science literature to analyze the recent history and possible future trajectories of interactions between international politics and climate change, including the international political economy of various relevant commercial sectors. It has no prerequisites, and no background knowledge is required

This course provides an introduction to the politics of war termination and peace consolidation. The course examines the challenges posed by ending wars and the process by which parties to a conflict arrive at victory, ceasefires, and peace negotiations. It explores how peace is sustained, why peace lasts in some cases and breaks down in others and what can be done to make peace more stable, focusing on the role of international interventions, power-sharing arrangements, reconciliation between adversaries, and reconstruction

ANTH UN3703 Climate Change and Colonialism. 4.00 points.

In 2022, the Intergovernmental Panel on Climate Change (IPCC) recognized colonialism's contributions to the climate crisis, citing its "historical and ongoing patterns of inequity." This was the first time that this group of climate experts had ever formally acknowledged colonialism, despite activists, writers, artists, and scholars from around the world emphasizing the devastations of colonial extractions. A sole focus on the present and future of the climate crisis obscures a deeper understanding of how the crisis came to be. This course asks: How has colonialism, namely, colonial processes of domination, extraction, control, dispossession, knowledge-making, and violence, created the climate crisis as well as enduring inequalities? How does the past intimately structure the possibilities of the present? How can an understanding of colonialism's "historical and ongoing" effects deepen calls for climate justice? This interdisciplinary seminar features an anthropological and historical exploration of the specificities of colonial regimes' extractive violence against people, land, and resources. We will see how climate change is intensified through unequal social, political, and economic distributions of harm and advantage, and how climate vulnerability is created and maintained. The goal of the course is to provide students with conceptual tools for historicizing climate change, and for critically engaging the consequences of colonial relations of power

SOCI UN3721 Social Justice: Connecting Academics to Action. 5.00 points.

This course will create an opportunity for active engagement between students doing sociology and a local organization working for social change by organizing immigrant communities, Make the Road New York. Students will be expected to actively study and/or participate in a project designed by the instructor and organization leaders. The action/research will primarily take the form of interviews (conducting interviews with members and leaders from an organization or campaign) and participant observation (taking part in the activities of the organization/campaign) and analysis of those interviews and observations. To accomplish this collaborative research project, students will take on different roles throughout the course, including that of fieldworker, project coordinator, analysis coordinator, and context researcher. Students will also read, discuss, and write about literature on scholarly-community partnerships and community organizing. Admittance by application and interview only. Preference to Sociology majors. Spanish speakers and writers, juniors, and seniors

PHIL UN3752 Philosophy of Law. 3 points.

This course explores philosophical reflection on the relationship between law, society and morality. We discuss the nature of law, the nature of legal reasoning, the relationship between law and social policy, and central concepts in civil and criminal law. Readings are drawn from such sources as the natural law tradition, legal positivism, legal realism, and Critical Legal Theory. Readings will be supplemented by analysis of classic cases.

PHIL UN3800 PHILOSOPHY, JUSTICE AND SOCIAL ACTIVISM. 4.00 points.

In his Theses on Feuerbach, Karl Marx writes, "Philosophers have only interpreted the world in various ways; the point is to change it." The questions to ask in response to Marx's exhortation include: how do we recognize the need for change and appropriately effect it? What are the relations between our goals and the means to them? How can we better understand our goals to make the means more suitable? When we organize to produce results, what are we doing? Do we know exactly who and what we want to change? What are the "ethics of process"? What exactly do we do when we organize? A tentative definition: to organize is to bring together individuals who have common interests in a way that will enhance their power. What kind of power is this? What other forms of power are there? What is the best form of coordinating among individuals? If we better understand the dynamics of organizing, should we reconceive our goals accordingly? How do we better tap into shared values and concerns? What temptations and distractions get in the way of our goals? What problems prevent us from achieving them? Do we have goals that can be achieved? If not, how can we revise them?

POLS BC3810 *Colloquium on Aid, Politics & Violence in Africa. 4 points.

Prerequisites: POLS UN1601 or the equivalent. Admission by application through the Barnard department only.

Explores the concepts, theoretical traditions and debates around development and humanitarian aid, focusing on the relationships between aid, politics, and violence. It looks at the political and military impacts of aid, the linkage between humanitarian aid and conflict resolution, and aid's contribution to perpetuating subtle forms of domination. (Cross-listed by the Africana Studies and the Human Rights Programs.)

HIST BC3870 GENDER# MIGRATN:GLOBAL PERSPC. 4.00 points.

Prerequisites: Permission of the instructor. Enrollment limited to 15. Preregistration required. Sophomore Standing. Explores migration as a gendered process and what factors account for migratory differences by gender across place and time; including labor markets, education demographic and family structure, gender ideologies, religion, government regulations and legal status, and intrinsic aspects of the migratory flow itself

ANTH UN3878 Neoliberal Urbanism and the Politics of Exclusion. 4 points.

Enrollment limit is 20.

This seminar examines the impact of neo-liberal strategies and practices of urban development and governance on contemporary American cities with special emphasis on the dividing practices that have led to the segregation, stigmatization and exclusion of urbanites on the basis of class, race, sex/gender and other power-laden ascriptions of difference and pathology. We will situate the formative period of neoliberal urbanism in the urban renewal or "slum clearance" programs of the 1950s and 1960s-initiatives that registered post-war anxieties concerning civil defense, urban disinvestment and growing populations of racial-cum-ethnic "minorities." Through a reading of key anthropological ethnographies and other literature across disciplines, we will examine topics including: deindustrialization and the construction of the inner city and "ghetto underclass," the cultural politics of neo-liberal governance, the privatization and policing of public space, gated communities, gentrification and socioeconomic polarization, and homelessness

RELI UN3881 The Doctrine of Discovery: Religion, Law, and Legacies of 1492. 4.00 points.

How did European-Christians justify the colonization of the Americas? Did these justifications vary between different European empires, and between the Protestant and Catholic faiths, and if so, how? Do these justifications remain in effect in modern jurisprudence and ministries? This class explores these questions by introducing students to the Doctrine of Discovery. The Doctrine of Discovery is the defining legal rationale for European Colonization in the Western Hemisphere. The Doctrine has its origins in a body of ecclesiastic, legal, and philosophical texts dating to the late-fifteenth century, and was summarized by Chief Justice John Marshall of the United States Supreme Court, in the final, unanimous decision the judiciary issued on the 1823 case *Johnson v. M'Intosh*. Students will be introduced to the major, primary texts that make up the Doctrine, as well as contemporary critical studies of these texts and the Doctrine in general

SOCI BC3909 Ethnic Conflict and Unrest. 4 points. Not offered during 2023-2024 academic year.

Prerequisites: Sophomore Standing. SOCI BC1003 or permission of the instructor. Enrollment limited to 20 students.

Post-1965 immigration in the U.S. has prompted conflicts between new immigrant groups and established racial and ethnic groups. This seminar explores ethnic conflict and unrest that takes place in the streets, workplace, and everyday social life. Focus is on sociological theories that explain the tensions associated with the arrival of new immigrants.

SOCI UN3914 INEQUALITY, POVERTY # MOBILITY. 4.00 points.

This is an undergraduate seminar in social stratification. The course focuses on the current American experience with socioeconomic inequality and mobility. The goals of the course are to understand how inequality is conceptualized and measured in the social sciences, to understand the structure of inequality in the contemporary U.S. to learn the principal theories and evidence for long term trends in inequality, to understand the persistence of poverty and the impact of social policies on American rates of poverty, and to understand the forces that both produce and inhibit intergenerational social mobility in the U.S. Given the nature of the subject matter, a minority of the readings will sometimes involve quantitative social science material. The course does not presume that students have advanced training in statistics, and any readings sections that contain mathematical or statistical content will be explained in class in nontechnical terms as needed. In these instances, our focus will not be on the methods, but rather on the conclusions reached by the author concerning the research question that is addressed in the text

This course considers stigma and discrimination as general processes that apply to a broad range of phenomena, from mental illness to obesity to HIV/AIDS to racial groups. We will use a conceptual framework that considers power and social stratification to be central to stigma and discrimination. We will focus on both macro- and micro-level social processes and their interconnections, and we will draw on literature from both sociology and psychology.

WMST UN3915 GENDER # POWER IN GLOBAL PERSP. 4.00 points.

Enrollment limited to 15.

Prerequisites: Instructor approval required

This seminar considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist movements that have emerged to address contemporary gendered inequalities. Topics include political economy, colonialism/postcoloniality, war, refugees, global care chains, sexuality, sex and care work. Required for the major in Women's, Gender, and Sexuality Studies (WGSS), but open to non-majors, space permitting. Prerequisite: Either one introductory WGSS course or *Critical Approaches to Social and Cultural Theory* or Permission of the Instructor

SOCI BC3918 Gender and Inequality in Families. 4 points.

Critical exploration of contemporary US families. Analyzes the ways gendered forces structure relations between and among family members. Investigates changes over time in roles and expectation for family members. Topics include social class differences, LGBT families, transnational families, parent-child relationships, domestic violence, racial/ethnic variation in men’s experiences.

CSER UN3924 Latin American and Latina/o Social Movements. 4 points.

In Latin America, a wave of new popular social movements have been transforming politics and social reality. In the United States, latino/as are building on decades of organizing and demographic growth to claim a new public persona and challenge their marginal status. What are the significant areas of political action, and how can we understand them? What claims can those disenfranchised for reasons of race, class, or national origin make on societies? Indigenous survival movements in Brazil, multi-ethnic electoral alliances in Bolivia, growing Afro-Colombian assertion, Dominican community organizing in New York City, and poetic post-marxist guerrillas in Mexico are just a few of the new forms of social activism that are transforming class, ethnic identity, and citizenship throughout the Americas, and combating the dominance of free-market social and economic policies. We will discuss a number of important social movements throughout the region, while developing tools for understanding social movements and their possibilities. This class is designed to give you an opportunity to do independent research; as a result, it will demand your intensive engagement, and your willingness both to master the information and tools we go over in class, and to pursue a specific topic of your own choosing. Students will all write a term paper based on independent research.

HIST UN3928 SLAVERY/ABOLITION-ATLANTC WRLD. 4.00 points.

Prerequisites: seminar application required. SEE UNDERGRADUATE SEMINAR SECTION OF THE HISTORY DEPARTMENT’S WEBSITE.

This seminar investigates the experiences of slavery and freedom among African-descended people living and laboring in the various parts of the Atlantic World. The course will trace critical aspects of these two major, interconnected historical phenomena with an eye to how specific cases either manifested or troubled broader trends across various slaveholding societies. The first half of the course addresses the history of slavery and the second half pertains to experiences in emancipation. However, since the abolition of slavery occurs at different moments in various areas of the Atlantic World, the course will adhere to a more thematic and less chronological structure, in its examination of the multiple avenues to freedom available in various regions. Weekly units will approach major themes relevant to both slavery and emancipation, such as racial epistemologies among slaveowners/employers, labor regimes in slave and free societies, cultural innovations among slave and freed communities, gendered discourses and sexual relations within slave and free communities, and slaves’ and free people’s resistance to domination. The goal of this course is to broaden students’ comprehension of the history of slavery and freedom, and to promote an understanding of the transition from slavery to freedom in the Americas as creating both continuities and ruptures in the structure and practices of the various societies concerned

SOCI UN3974 SOCI OF SCHOOLS,TEACH,LEARNING. 4.00 points.

In this class we will examine the school as a central institution in modern society, and we will grapple with an important question in the sociology of education: what role to schools play in reinforcing or challenging broader patters of social inequality? We will pay special attention to the ways in which students class, race/ethnicity and gender shape their educational experiences. We will also look at how schools are organized, how schools construct differences among students, and how schools sort kids into different (and unequal) groups. Finally we will explore the types of interventions - at both the individual and organizational levels - that can mitigate inequality in educational achievement and help low-income students to succeed. One such intervention that has shown promise is tutoring in academic and social and behavioral skills, and interventions that strengthen self-affirmation. A major component of this class is your experience as a tutor. You will be trained as tutors to work with students from local high schools both through in-person tutoring and through tutoring using social networking technologies. Throughout the semester we will combine our academic learning with critical reflection on our experience sin the field. Because you will be working with NYC high school students, we will pay special attention to how NYC high schools are organized and how current issues in education play out in the context of NYC schools

WMST GU4317 ADVANCED TOPICS. 4.00 points.

In this course, our point of departure will be the precariousness of embodied existence, in which precarity is understood as both an existential condition and as the socially uneven culmination of neoliberal political and economic trends. We will draw upon a variety of interdisciplinary literatures—including feminist, critical race, and queer studies; science and technology studies; disability studies; and medical sociology and anthropology—to consider some of the ways in which our bodies have served as both the repository and substratum of recent social transformations. Within the context of current pandemic crises relating to both public health and to myriad forms of social inequality, we will also consider appeals to the beneficence of science, technology, medicine, and the rational governance of dis-ease. What can critical histories of plagues, epidemics, and quarantines teach us about emergent forms of biopolitics? We will conclude by considering the interventions of contemporary disability and social justice activists, and the alternative possibilities that they have posited for self-care and mutual aid

CPLS GU4325 Abolition Medicine: Medical Racisms and Anti-Racisms. 3.00 points.

In 1935, WEB Dubois wrote about abolition democracy: an idea based not only on breaking down unjust systems, but on building up new, antiracist social structures. Scholar activists like Angela Davis, Ruth Gilmore and Mariame Kaba have long contended that the abolition of slavery was but one first step in ongoing abolitionist practices dismantling racialized systems of policing, surveillance and incarceration. The possibilities of prison and police abolition have recently come into the mainstream national consciousness during the 2020 resurgence of nationwide Black Lives Matters (BLM) protests. As we collectively imagine what nonpunitive and supportive community reinvestment in employment, education, childcare, mental health, and housing might look like, medicine must be a part of these conversations. Indeed, if racist violence is a public health emergency, and we are trying to bring forth a “public health approach to public safety” – what are medicine’s responsibilities to these social and institutional reinventions? Medicine has a long and fraught history of racial violence. It was, after all, medicine and pseudoscientific inquiry that helped establish what we know as the racial categorizations of today: ways of separating human beings based on things like skin color and hair texture that were used (and often continue to be used) to justify the enslavement, exclusion, or genocide of one group of people by another. Additionally, the history of the professionalization of U.S. medicine, through the formation of medical schools and professional organizations as well as and the certification of trained physicians, is a history of exclusion, with a solidification of the identity of “physician” around upper middle class white masculinity. Indeed, the 1910 Flexner Report, whose aim was to make consistent training across the country’s medical schools, was explicit in its racism. From practices of eugenic sterilization, to histories of experimentation upon bodies of color, medicine is unfortunately built upon racist, sexist and able-ist practices. This course is built on the premise that a socially just practice of medicine is a bioethical imperative. Such a practice cannot be achieved, however, without examining medicine’s histories of racism, as well as learning from and building upon histories of anti-racist health practice. The first half of the semester will be dedicated to learning about histories of medical racism: from eugenics and racist experimentation to public health xenophobic fear mongering. The second half of the semester will be dedicated to examining medical and grassroots anti-racist practices: from the free health clinics and hospital takeovers of the Black Panther and Young Lords Parties, to environmental activism in Flint and the Sioux Rock Reservation to antiracist AIDS and COVID activism

CSER GU4340 Visionary Medicine: Racial Justice, Health and Speculative Fictions. 4 points.

In Fall 2014, medical students across the U.S. staged die-ins as part of the nationwide #blacklivesmatter protests. The intention was to create a shocking visual spectacle, laying on the line “white coats for black lives.” The images were all over social media: students of all colors, dressed in lab coats, lying prone against eerily clean tile floors, stethoscopes in pockets, hands and around necks. One prone student held a sign reading, “Racism is Real.” These medical students’ collective protests not only created visual spectacle, but produced a dynamic speculative fiction. What would it mean if instead of Michael Brown or Eric Garner or Freddie Gray, these other, more seemingly elite bodies were subjected to police violence? In another viral image, a group of African American male medical students from Harvard posed wearing hoodies beneath their white coats, making clear that the bodies of *some* future doctors could perhaps be more easily targeted for state-sanctioned brutality. “They tried to bury us,” read a sign held by one of the students, “they didn’t realize we were seeds.” Both medicine and racial justice are acts of speculation; their practices are inextricable from the practice of imagining. By imagining new cures, new discoveries and new futures for human beings in the face of illness, medicine is necessarily always committing acts of speculation. By imagining ourselves into a more racially just future, by simply imagining ourselves any sort of future in the face of racist erasure, social justice activists are similarly involved in creating speculative fictions. This course begins with the premise that racial justice is the bioethical imperative of our time. It will explore the space of science fiction as a methodology of imagining such just futures, embracing the work of Asian- and Afroturism, Cosmos Latinos and Indigenous Imaginaries. We will explore issues including Biocolonialism, Alien/nation, Transnational Labor and Reproduction, the Borderlands and Other Diasporic Spaces. This course will be seminar-style and will make central learner participation and presentation. The seminar will be interdisciplinary, drawing from science and speculative fictions, cultural studies, gender studies, narrative medicine, disability studies, and bioethics. Ultimately, the course aims to connect the work of science and speculative fiction with on the ground action and organizing.

MDES GU4349 Concentration Camps from Cuba to East Asia. 3 points.

Forcibly moving civilians to designated areas as a wartime measure has constituted a widely practiced military strategy for centuries. In the late 19th and early 20th centuries, colonial powers increasingly provided more structure and organization to these policies of relocation and internment in the Americas, Africa, and East Asia. This course provides a social history of civilian internment and mass murder from late-19th century colonial cases to World War II.

Through case studies of the Spanish-Cuban war, the South African War, the Philippines-American War, the genocide of the Herrero and Nama in Southwest Africa, the Armenian Genocide, and the Holocaust, the course traces the evolution of the concentration camp from a counter-insurgency strategy in wartime to a weapon of mass murder. The course also examines the internment of Japanese Americans, and the Japanese “comfort stations” in comparative perspective.

MDES GU4357 WAR, GENOCIDE, # AFTERMATH COMP PERSPECTIV. 4.00 points.

This 4000-level course examines how societies grapple with the legacy of mass violence, through an exploration of historical texts, memoirs, textbooks, litigation, and media reports and debates on confronting the past. Focusing on case studies of the Herero Genocide, the Armenian genocide during WWI, and the Holocaust and the Comfort Women during WWII, students investigate the crime and its sequelae, looking at how societies deal with skeletons in their closets (engaging in silence, trivialization, rationalization, and denial to acknowledgment, apology, and repair); surveying responses of survivors and their descendants (with particular attention to intergenerational transmission of trauma, forgiveness, resentment, and the pursuit of redress); and dissecting public debates on modern day issues that harken back to past atrocities

POLS GU4409 Political Activism and Social Movements. 3 points.

How do ordinary citizens participate in democratic politics? The course examines main concepts in the comparative study of political participation and social and political movements to address this question. The first part of the course focuses on normative and methodological aspects related to the study of political activism. In this part, we examine the role that citizens' political activism plays in democratic politics and look at how these normative views are reflected in the methods used to study political activism (individual and organizational surveys, protest event analysis, participant observation). In the second part of the course, we focus on the individual-level political participation. Here we discuss various modes of political action available to citizens of contemporary democracies and examine micro-, meso-, macro-factors that determine people's willingness to get involved in politics. The third part of the course focuses on the meso-level of political actors that organize and coordinate people's political activism – social movements, interest groups and civil society organizations. This part of the course discusses the role of organizational resources, strategic action repertoire, political opportunities and framing and campaigning strategies of mobilizing actors.

ECON GU4438 ECONOMICS OF RACE IN THE U.S.. 3.00 points.

POLS GU4474 Politics, Justice and Human Rights in Southeast Asia. 4 points.

The course starts from the premise that questions of justice are essentially political, and their study cannot be safely left in the sole hands of lawyers and legal experts. In recent years, a number of important global trends have become evident in the study of justice. These include a growing focus on transitional justice – especially how the transition from an authoritarian regime, or from conditions of violent conflict, may best be handled. Another important trend is the so-called 'new constitutionalism' – efforts to strengthen checks and balances through establishing new institutions such as constitutional courts. A third trend concerns disturbing developments in the use of the criminal justice system for essentially political purposes. This course will explore how these recent trends are being played out in various parts of Southeast Asia.

WMST GU4506 Gender Justice. 3 points.

This course will provide an introduction to the concrete legal contexts in which issues of gender and justice have been articulated, disputed and hesitatingly, if not provisionally, resolved. Readings will cover issues such as Workplace Equality, Sexual Harassment, Sex Role Stereotyping, Work/Family Conflict, Marriage and Alternatives to Marriage, Compulsory Masculinity, Parenting, Domestic Violence, Reproduction and Pregnancy, Rape, Sex Work & Trafficking. Through these readings we will explore the multiple ways in which the law has contended with sexual difference, gender-based stereotypes, and the meaning of equality in domestic, transnational and international contexts. So too, we will discuss how feminist theorists have thought about sex, gender and sexuality in understanding and critiquing our legal system and its norms.

HIST GU4518 Research Seminar: Columbia and Slavery. 4 points.

In this course, students will write original, independent papers of around 25 pages, based on research in both primary and secondary sources, on an aspect of the relationship between Columbia College and its colonial predecessor King's College, with the institution of slavery.

PSYC GU4612 Frontiers of Justice. 4.00 points.

Frontiers of Justice is designed to encourage students and equip them with the skills to become active and effective “Change Agents” within their academic institutions and larger communities.. Oriented by the question, What does justice look like?, this course aims to raise political and social awareness and engagement with the challenges facing New York City and strengthen ties between Columbia University, disadvantaged communities, and city government agencies and community organizations. Through sharing ideas about how to make structural and systemic change in ways that integrate science, law, politics, history, narrative and community engagement, the course is intended to support students in working to break down racial and ethnic barriers and toward a more fair and just society

SOCI GU4801 Israel and the Palestinians. 4.00 points.

The seminar will examine the main political, economic, and social processes that have been shaping contemporary Israel. The underlying assumption in this seminar is that much of these processes have been shaped by the 100-year Israeli-Arab/Palestinian conflict. The first part of the course will accordingly focus on the historical background informing the conflict and leading to the Palestinian refugee problem and establishment of a Jewish, but not Palestinian, state in 1948. The second part of the seminar focuses on Israel's occupation of the West Bank (and Gaza) and the settlement project, as well as on USA's role and its impact on the conflict, the occupation, and Israel. These topics did not get much academic attention until recently, but as researchers began to realize that the Occupation and the West Bank settlements are among the most permanent institutions in Israel, they have come under the scrutiny of academic research. The third part the seminar will concentrate on the development of the conflict after the establishment of Israel and its effects on sociological processes and institutions in contemporary Israel. Analyzing patterns of continuity and change in the past seven decades, we will discuss immigration and emigration patterns, as well as issue relating to ethnicity, gender, religion and politics, and the Israeli military

POLS GU4852 Insurgencies and Civil Wars. 3 points.

Civil wars have become the predominant type of conflict in recent years and decades, as exemplified by the civil wars in Syria, Iraq, Afghanistan, or Yemen, among others. Invariably, these civil wars feature insurgencies, i.e., organized, protracted politico-military struggles designed to weaken control and legitimacy of an established government, occupying power, or other political authority, while increasing insurgent control.

The purpose of this course is to examine the causes, nature, and termination of civil wars and the insurgencies that characterize them. Special emphasis is placed on the conduct of civil wars—the nature of insurgency and counterinsurgency (COIN). The course offers different theoretical perspectives and provides historical and contemporary case studies.

RELI GU4999 GLOBAL INDIGENOUS RELIGIOUS HISTORIES. 4.00 points.

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of lacking religion; as pagan, barbarian, non-modern, and without history or civilization. Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative

SIPA U6700 Inside the Situation Room. 3.0 Points.

Category: EPD:Political, GPP, ISP, MIA Core: Interstate Relations, TMAC, IO/UNS

In an era increasingly defined by geopolitical competition, it is more important than ever for future policymakers to understand why and how foreign policy decisions are made. Inside the Situation Room, co-taught by Secretary Hillary Rodham Clinton and Dean Keren Yarhi-Milo, employs insights from diverse academic fields—including political psychology, domestic politics, and international relations—and the direct experience of high-level principals in the room to understand the key factors which underpin a nation's most crucial decisions. This course allows students to engage with a range of case studies and examine decision-making in a variety of historical and contemporary contexts, from the search for Osama bin Laden, to the "red line" in Syria, to negotiating with Iran. Students will be taught how to analyze and understand the complex interplay between individual psychology, domestic politics, public opinion, bureaucracy, the international environment, and other factors which feed into decisions about foreign policy—from crisis diplomacy to the use of force, signaling and perception, intelligence and its analysis, the deployment of other instruments of statecraft, and more. Through this course, students will think carefully and analytically about how leaders and other actors view the world, how they arrive at their decisions, and how various social, political, and psychological factors shape the policies they devise to promote their interests abroad. Italian

320 Milbank Hall

212-854-5418 / 212-854-5481 / 212-854-8312

Department Assistant: Sondra Phifer

Mission

The Italian Department seeks to provide students with the opportunity for in-depth study of the language, literature, and culture of Italy; it aims to enrich students' understanding of Italian culture through an interdisciplinary curriculum; it offers students the advantages of closely supervised work with its faculty. Through its full intergration with the Columbia University Italian Department, the Barnard Italian Department aims to provide a wide range of courses covering Italian literature and culture from Middle Ages to the present.

Student Learning Outcomes

Students who graduate with an Italian major should be able to attain the following outcomes:

- Write, speak, read, and listen in Italian at the intermediate-high level in Italian language and carry-on an everyday conversation;
- Identify and discuss the historical significance of major cultural works such as film, novels, plays, and opera;
- analyses of Italian literary texts and films at an advanced level;
- Demonstrate a broad knowledge of Italian literature and culture;
- Demonstrate knowledge of major texts and authors in the Italian literary tradition, from the Middle Ages to the present;
- Knowledge of the historical, political, cultural and literary aspects of the North/South divide in Italy;
- Conduct original research on a literary or cultural topic project culminating in a 30-40 page thesis, successfully demonstrating an advanced level of textual and/or historical interpretation and the coherent presentation of an argument.

Undergraduate instruction in Italian has long been fully and successfully integrated among the various undergraduate schools—Barnard College, Columbia College, and the School of General Studies. All courses are open to Barnard students. The Advanced Italian courses, though part of the requirement for a major in Italian, are open to all qualified students whose main goal is to improve their competence in the language.

A major in Italian offers the advantages of closely supervised work for a small number of students. Through the senior tutorial, students pursue research in a chosen area of Italian culture under the guidance of a specialist.

The courses given in English have no prerequisites and are open to students majoring in other departments who nevertheless wish to study Italian literature and culture.

The Barnard Italian office is located in 320 Milbank, and the Columbia department is housed in 502 Hamilton.

Graduate courses are open to qualified students with permission of the instructor.

Chair: Nelson Moe (Associate Professor)

Other officers of the University offering courses in Italian:

Assistant Professors: Pier Mattia Tommasino, Konstantia Zanou
Senior Lecturers: Maria Luisa Gozzi, Barbara Spinelli, Carol Rounds (Hungarian)
Lecturers: Felice Italo Beneduce, Federica Franze, Patrizia Palumbo, Alessandra Saggin

Requirements for the Major

The courses in Italian are designed to develop proficiency in all the language skills and to present the literary and cultural traditions of Italy. The program of study is to be planned as early as possible.

The following courses are required unless advanced standing is attained in the Department placement examination:

Select one of the following: 6-8

ITAL UN1101	ELEMENTARY ITALIAN I	
- ITAL UN1102	and ELEMENTARY ITALIAN II	
ITAL UN1121	INTENSIVE ELEMENTARY ITALIAN	

Select one of the following: 6-8

ITAL V1201	Intermediate Italian I	
- ITAL V1202	and Intermediate Italian II	
ITAL UN1203		6

Ten courses above ITAL V1202 Intermediate Italian II or ITAL UN1203 are required for the major, including:

Select one of the following: 6

ITAL UN3333	INTRO TO ITALIAN LITERATURE I	
- ITAL UN3334	and INTRO TO ITALIAN LITERATURE II	
ITAL GU4502	ITALIAN CULTURAL STUDIES I	
- ITAL GU4503	and ITL CULTRL ST II:WWI-PRESENT	
ITAL UN3335	ADVANCED ITALIAN I	3
ITAL UN3336	ADVANCED ITALIAN II	3
or ITAL UN3337	ITALIAN THROUGH CINEMA	
ITAL V3993		3

Plus at least five more courses in Italian including and numbered above ITAL V3333-ITAL V3334

Requirements for the Minor

A minimum of five courses is required for the minor, to be selected from courses including and numbered above ITAL UN3333 INTRO TO ITALIAN LITERATURE I.

Language Requirement

The language requirement can be fulfilled with ITAL UN1101 ELEMENTARY ITALIAN I-ITAL UN1102 ELEMENTARY ITALIAN II and ITAL V1201 Intermediate Italian I-ITAL V1202 Intermediate Italian II or ITAL UN1121 INTENSIVE ELEMENTARY ITALIAN-ITAL UN1203 (or their equivalents). Students who have taken courses in Italian elsewhere (whether in high school, in college, or both) but not at Barnard or Columbia, must take the Italian placement test before registering for any Italian course. The test is given during the preregistration period in 502 Hamilton. Please call 854-8312 or 854-2308 for hours and date.

Limited enrollment.

An intensive course that covers two semesters of elementary Italian in one, and prepares students to move into Intermediate Italian. Students will develop their Italian communicative competence through listening, (interactive) speaking, reading and (interactive) writing. The Italian language will be used for real-world purposes and in meaningful contexts to promote intercultural understanding. This course is especially recommended for students who already know another Romance language. May be used toward fulfillment of the language requirement

Prerequisites: Intermediate Italian II *ITAL UN2102* or the equivalent.
Prerequisites: Intermediate Italian II *ITAL UN2102* or the equivalent.
UN3334x-UN3333y is the basic course in Italian literature. UN3333: This course, entirely taught in Italian, introduces you to Medieval and early modern Italian literature. It will give you the opportunity to test your ability as a close-reader and discover unusual and fascinating texts that tell us about the polycentric richness of the Italian peninsula. We will read poems, tales, letters, fiction and non-fiction, travel writings and political pamphlets. The great "Three Crowns" - Dante, Petrarca and Boccaccio - as well as renowned Renaissance authors such as Ludovico Ariosto and Niccolò Machiavelli, will show us the main path to discover Italian masterpieces and understand the European Renaissance. But we will also explore China with Marco Polo and the secrets of the Medieval soul diving into the mystical poems by Jacopone da Todi. We will study parody and laughter through the "poesia giocosa" (parodic poetry) by Cecco Angiolieri and the legacy of Humanism through the letters of Poggio Bracciolini. This first overview will allow you to explore Italian literature from its complex and multicultural beginnings to its diffusion across Europe during the Renaissance

ITAL UN3338 Italiana. Introduction to Italian Culture, the High, the Low, and the In-between. 3 points.

"*Italiana. Introduction to Italian Culture, the High, the Low, and the In-between*" aims at expanding the students' knowledge of Italian culture and improving and refining their language skills, through writing, reading, speaking, and listening. This is a content based course in which the students familiarize with the most crucial moments of Italian history and are exposed to the issues that are currently debated in Italy, such as national identity, immigration, emigration, homoparental family, and the truthfulness or deceptiveness of the brand Made in Italy. Naturally, considerable attention is given to the distinctive geographical, economical, and cultural traits of Italian regions and their cities. The students apply their communicative skills in Italian by conversing with the Italian students currently registered at Columbia University and by conducting interviews within New York's Italian communities on the subjects studied and discussed in class.

ITAL UN3590 Anatomy of Fantastic Fiction: The Uncanny, the Monstrous and the Other in Modern and Contemporary Italy. 3 points.

What is a fantastic text and what renders it "scandalous" (R. Caillois)? How do nineteenth-century fantastic tropes and motifs survive in present-day narratives? What assumptions about "real" and "reality" do they reveal? How can fantastic representations of the inexplicable, supernatural and inhuman shape and enrich our understanding of the human mind and the world around us? And finally, why are we so fascinated by that which frightens us? In this course, we will address these and many other questions by looking at short stories, films, TV shows and comic books from the Italian and other traditions, from the 19th century to the present day. The course will be loosely chronological, but will be based mainly around thematic units. Through a comparative approach, we will explore the relationship between the fantastic mode and notions such as the uncanny, the repressed and the unconscious. We will look at our primary texts through an interdisciplinary lens spanning literary theory and genre studies to psychoanalysis and reader-response theory. Some primary texts are only available in Italian; however, accommodations can be made for non-Italian speakers.

ITAL UN3642 ROAD TRIPS: TRAVEL IN ITAL CIN. 3.00 points.

Explores the representation of national identity in Italian cinema from the Fascist era to the present. Examines how both geography and history are used to construct an image of Italy and the Italians. Special focus on the cinematic representation of travel and journeys between North and South. Films by major neo-realist directors (Rossellini, De Sica, Visconti) as well as by leading contemporaries (Moretti, Amelio).

ITAL GU4089 Petrarch's Canzoniere. 3 points.

This course presents a reading of Petrarch's *Canzoniere* and a theory of the lyric sequence as a genre. In this course we examine Petrarch as he fashions himself authorially, especially in the context of Ovid, Dante, and previous lyric poets. We bring to bear ideas on time and narrative from authors such as Augustine and Ricoeur in order to reconstruct the metaphysical significance of collecting fragments in what was effectively a new genre. We will consider Petrarch's lyric sequence in detail as well as read Petrarch's *Secretum* and *Trionfi*. Lectures in English; text in Italian, although students from other departments who can follow with the help of translations are welcome.

ITAL GU4100 Narratives of Modernity. 3 points.

In revisiting two major authors of the Italian modern novel, the course investigates the relation between fiction and the "conditions of modernity" (personal risk, anxiety and lack of control on reality, secularization, to name a few). Special attention will be paid to the response of the novelistic discourse to modernity, and to Italy's peculiarly peripheral position in the modern world. Primary texts will be read in Italian, while theoretical references will be in English.

ITAL GU4395 Fifty Years of Impatience: The Italian Novel between 1950-2000. 3 points.

The course examines some of the most important novels that belong to Italy's period of major social and economic transformations. Only after WWII Italy finally becomes a modern nation, i.e. a republic based on truly universal suffrage, and an industrialized country. Such accelerated progress, though, causes deep social instability and mobility which obviously results in heavy psychological pressures on the people: adaptation becomes crucial and inevitable. Fiction therefore resumes the task to represent such awkwardness of integration into a modern bourgeois society that, contrarily to its European and American counterpart, is extremely tentative and insecure per se, since its political identity has extremely precarious grounds. Among other authors, primary readings include Giuseppe Tomasi di Lampedusa's *The Leopard* and Italo Calvino's *If on a Winter's Night a Traveler*. Primary Readings in Italian.

Jewish Studies

218 Milbank Hall
212-854-2597

Chair: Beth A. Berkowitz, Professor of Religion and Ingeborg Rennert Chair of Jewish Studies

Mission

The program in Jewish Studies enables undergraduates to acquire a thorough knowledge of the most important aspects of Jewish culture, civilization, and history in an interdisciplinary setting. The purpose of the program is to help the student identify resources for constructing rigorously detailed and methodological majors.

The program begins from the assumption that a meaningful major can be most profitably framed in one of the existing departments-such as, but not limited to, American Studies, Ancient Studies, Anthropology, Art History, Asian and Middle Eastern Cultures, Classics, Comparative Literature, English, History, Music, Religion, Sociology, and Women's

Studies. The program director would then certify that the subject matter of that major contains enough interest in Jewish subjects and is rigorous enough in methodology.

Faculty at Barnard and Columbia who teach courses in Jewish Studies Include:

Chair: Beth A. Berkowitz, Professor of Religion and Ingeborg Rennert Chair of Jewish Studies

Professors: Gil Anidjar (Religion), Elisheva Carlebach (History), Yionon Cohen (Sociology), Jeremy Dauber (German), Zohar Goshen (Law), Achshah Guibbory (English), Gil Hochberg (MESAAS), Ira Katznelson (Political Science and History), Jose Moya (History), Seth Schwartz (History), Michael Stanislawski (History)

Associate Professor, Gil Eyal (Sociology), Rebecca Kobrin (History)

Assistant Professors: Clémence Boulouque (Religion), Tina Fruehauf (Music)

Lecturer. Naama Harel (Lecturer in Hebrew), Agnieszka Legutko (Lecturer in Yiddish)

Requirements for the Combined Major

- RELI UN2306 INTRO TO JUDAISM
- Five additional courses in Jewish Studies
- Total of a minimum of 18 credits

A complete major in a relevant department is required for a combined major in Jewish Studies. Where courses in Jewish Studies also satisfy departmental major requirements, the student must complete at least three courses in Jewish Studies over and above what is required for the other major. Students are encouraged to consult the offerings of other relevant departments and frame a major by centering on the methodological requirements of that major and utilizing the advising capacities of that department. Students, especially those who plan to continue in graduate Jewish Studies of any kind, are strongly encouraged to seek competence in Hebrew and other languages which were used by Jews in their particular area of concentration. Where possible, the courses in Jewish Studies should be taken across the major areas of Jewish history: Ancient (biblical); Hellenistic and Talmudic; Medieval; and Modern. Besides the six courses specifically in Jewish Studies, students must submit a Senior Thesis or project in the area of Jewish Studies, written in the major department.

For a complete list of faculty and courses visit the [Columbia University Institute for Israel and Jewish Studies](#).

Requirements for the Minor

- RELI UN2306 INTRO TO JUDAISM
- Four additional courses in Jewish Studies

A Jewish Studies minor comprises five courses in Jewish Studies (minimum 15 credits). The five courses must include RELI UN2306 INTRO TO JUDAISM as well as at least one seminar. Students are encouraged to distribute their Jewish Studies courses across different disciplines, historical eras, and geographical regions.

Eligible courses include those listed each semester by the Columbia University Institute for Israel and Jewish Studies or that contain a majority of Jewish Studies content (to be determined by the Jewish Studies Chair based on the course syllabus). Departments that

normally host Jewish Studies courses include the Institute for Israel and Jewish Studies, Germanic Languages, History, MESAAS, Political Science, Religion, Sociology, and Women's and Gender Studies. Please consult the [Columbia University Institute for Israel and Jewish Studies](#) for eligible courses.

Three of the five courses must be taken at Barnard/Columbia. Students are encouraged to study Jewish languages such as Hebrew or Yiddish, but only two of the five courses required for the minor may be fulfilled by language courses. All eligible courses must be offered by an accredited academic institution.

Students interested in minoring in Jewish Studies should contact the Chair of Jewish Studies at Barnard. Although Barnard policy allows for students to sign up for the minor through the end of senior year, the Program in Jewish Studies encourages students to sign up early and to consult with the Chair regarding selection of courses and completion of requirements.

Mathematics

332G Milbank Hall
212-854-3577
Department Assistant: Marsha Peruo

General Information

Students who have special placement problems, or are unclear about their level, should make an appointment with a faculty member or the Chair.

Two help rooms, one in 404 Mathematics (on Columbia's campus) and one in 502 Milstein Center (on Barnard's campus), are available. Hours will be posted in the rooms and on <https://math.barnard.edu/math-tutoring-schedules> for students seeking individual help and counseling from Barnard tutors and Columbia teaching assistants. No appointments are necessary. Both Barnard and Columbia students are welcome. NOTE: Changes to tutoring schedules and remote tutoring can occur in response to COVID-19.

Courses for First-Year Students

The systematic study of Mathematics begins with one of the following alternative sequences:

Calculus I, II, III, IV

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN1202	CALCULUS IV

Honors Math A-B

MATH UN1207	HONORS MATHEMATICS A
MATH UN1208	HONORS MATHEMATICS B

Credit is allowed for only one of the calculus sequences. The calculus sequence is a standard course in differential and integral calculus.

Honors Mathematics A-B is for exceptionally well-qualified students who have strong advanced placement scores. It covers second-year Calculus (MATH UN1201 CALCULUS III–MATH UN1202 CALCULUS IV) and MATH UN2010 LINEAR ALGEBRA, with an emphasis on theory.

Calculus II is NOT a prerequisite for *Calculus III*, so students who plan to take only one year of calculus may choose between I and II or I and III. The latter requires a B or better in Calculus I and is a recommended option for some majors.

MATH UN2000 INTRO TO HIGHER MATHEMATICS is a course that can be taken in their first or second year by students with an aptitude for mathematics who would like to practice writing and understanding mathematical proofs.

Placement in the Calculus Sequence

College Algebra and Analytical Geometry is a refresher course for students who intend to take Calculus but do not have adequate background for it.

Advanced Placement: Students who have passed the advanced placement test for Calculus AB with a grade of 4 or 5 or BC with a grade of 4 receive 3 points of credit. Those who passed Calculus BC with a grade of 5 will receive 4 points of credit or 6 points on placing into Calculus III or Honors Math A and completing with a grade of C or better.

Calculus I, II, III: Students who have not previously studied calculus should begin with Calculus I. Students with 4 or higher on the Calculus AB or BC advanced placement test may start with Calculus II. Students with 5 on the Calculus BC test should start with Calculus III.

Honors Mathematics A: Students who have passed the Calculus BC advanced placement test with a grade of 5, and who have strong mathematical talent and motivation, should start with Honors Mathematics A. This is the most attractive course available to well-prepared, mathematically talented first-year students, whether or not they intend to be mathematics majors. Students who contemplate taking this course should consult with the instructor. If this is not possible ahead of time, they should register and attend the first class.

Chair: Daniela De Silva (Olin Professor of Mathematics)

Professors: Dave Bayer, Daniela De Silva (Olin Professor of Mathematics), Dusa McDuff (Joan Lyttle Birman '48 Chair of Mathematics)

Assistant Professor: Alisa Knizel

Term Associate Professor: Lindsay Piechnik

Professors Emeriti: Joan Birman, Walter Neumann

Requirements for the Major

The major programs in both Mathematics and Applied Mathematics are appropriate for students who plan to continue their training in graduate school. The major in Mathematical Sciences combines the elements of Mathematics, Computer Science and Statistics. It is designed to

prepare students for employment in business, administration, and finance, and also give excellent background for someone planning graduate study in a social science field. Students who plan to obtain a teaching qualification in mathematics should plan their course of study carefully with an advisor, since courses that are too far from mathematics do not count towards certification.

For a major in Mathematics: 14 courses (a minimum of 35 credits) as follows:

- Four courses in calculus or Honors Mathematics A-B, including Advanced Placement Credit. A student who places out of Calc I/II with AP credits, will need to take a replacement course.
- Six courses in mathematics numbered at or above 2000.
- Four courses in any combination of mathematics and cognate courses.

The courses in mathematics must include:

MATH UN2010	LINEAR ALGEBRA (also satisfied by Honors Math A-B)
MATH GU4041	INTRO MODERN ALGEBRA I (I)
MATH GU4042	INTRO MODERN ALGEBRA II (II)
MATH GU4061	INTRO MODERN ANALYSIS I (I)
MATH GU4062	INTRO MODERN ANALYSIS II (II)
MATH UN3951	UNDERGRADUATE SEMINARS I (at least one term)
or MATH UN3952	UNDERGRADUATE SEMINARS II

* Note: It is strongly recommended that the sequences MATH GU4041 INTRO MODERN ALGEBRA I - MATH GU4062 INTRO MODERN ANALYSIS II and MATH GU4061 INTRO MODERN ANALYSIS I - MATH GU4062 INTRO MODERN ANALYSIS II be taken in separate years.

However, students who are not contemplating graduate study in mathematics may replace one or both of the two terms of MATH GU4061 INTRO MODERN ANALYSIS I - MATH GU4062 INTRO MODERN ANALYSIS II with one or two of the following courses:

- MATH UN2500 ANALYSIS AND OPTIMIZATION,
- MATH UN3007 COMPLEX VARIABLES,
- or MATH GU4032 FOURIER ANALYSIS

and may replace MATH GU4042 INTRO MODERN ALGEBRA II with

- MATH UN3020 NUMBER THEORY AND CRYPTOGRAPHY
- or MATH UN3025 MAKING, BREAKING CODES

In exceptional cases, the chair will approve the substitution of certain more advanced courses for those mentioned above.

For a major in Applied Mathematics: 14 courses (a minimum of 35 credits)

Four courses in calculus or Honors Mathematics A-B, including Advanced Placement Credit. A student that places out of Calc I/II with AP credits, will need to take a replacement course.

MATH UN2010	LINEAR ALGEBRA (also satisfied by Honors Math A-B)
MATH GU4061	INTRO MODERN ANALYSIS I
APMA E4901	SEM-PROBLEMS IN APPLIED MATH

APMA E4903	SEM-PROBLEMS IN APPLIED MATH
APMA E3900	UNDERGRAD RES IN APPLIED MATH (APMA E3900 may be replaced, with approval, by another technical elective for seniors that involves an undergraduate thesis or creative research report)

Additional electives, to be approved by the Applied Math Committee, e.g.:

MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH UN3007	COMPLEX VARIABLES
or MATH GU4065	HONORS COMPLEX VARIABLES
or APMA E4204	FUNCTNS OF A COMPLEX VARIABLE
MATH UN3027	Ordinary Differential Equations
or MATH UN2030	ORDINARY DIFFERENTIAL EQUATIONS
MATH UN3028	PARTIAL DIFFERENTIAL EQUATIONS
or APMA E4200	PARTIAL DIFFERENTIAL EQUATIONS
MATH GU4032	FOURIER ANALYSIS

For a major in Mathematical Sciences: 14 courses (a minimum of 38 credits):

6 from Mathematics, 5 from a combination of Statistics and Computer Science and 3 electives from a combination of Mathematics, Statistics, Computer Science.

Mathematics

Six required courses:

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN2010	LINEAR ALGEBRA (also satisfied by Honors Math A-B)
MATH UN2000	INTRO TO HIGHER MATHEMATICS
MATH UN2030	ORDINARY DIFFERENTIAL EQUATIONS
or MATH UN3027	Ordinary Differential Equations

Possible further courses selected from the following:

MATH UN1202	CALCULUS IV
MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH UN3020	NUMBER THEORY AND CRYPTOGRAPHY
MATH UN3025	MAKING, BREAKING CODES
Any 3 credit MATH course numbered 2000 or above	

Statistics

Select at least one of the following:

STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN1201	CALC-BASED INTRO TO STATISTICS

or equivalent

Other courses from the Statistics list (eg, STAT UN2102, STAT UN2103, STAT UN2104, STAT UN3105, STAT UN3106)

Computer Science

Select at least one of the following programming courses:

COMS W1002	COMPUTING IN CONTEXT
------------	----------------------

COMS W1004	Introduction to Computer Science and Programming in Java (preferred)
COMS W1005	Introduction to Computer Science and Programming in MATLAB
COMS W1007	Honors Introduction to Computer Science
Possible further courses selected from the following:	
Other classes from the Computer Science Core	
COMS W3203	DISCRETE MATHEMATICS
COMS W3210	Scientific Computation
ENGI E1006	INTRO TO COMP FOR ENG/APP SCI

More generally, electives may be any course with a prerequisite of at least one semester of Calculus, Statistics or Computer Science with the prior approval of the Mathematics Chair.

The Capstone Experience can be fulfilled by a significant thesis written under the supervision of faculty of any one of the three departments or by the Undergraduate Seminar in Mathematics.

NOTE: A student that places out of Calc I/II with AP credits, will need to take a replacement course.

For a major in Mathematics-Statistics: 14 courses (a minimum of 38 credits):

Mathematics

Select one of the following sequences:

MATH UN1101	CALCULUS I
- MATH UN1102	and CALCULUS II
- MATH UN1201	and CALCULUS III
- MATH UN2010	and LINEAR ALGEBRA
- MATH UN2500	and ANALYSIS AND OPTIMIZATION
MATH UN1207	HONORS MATHEMATICS A
- MATH UN1208	and HONORS MATHEMATICS B
- MATH UN2500	and ANALYSIS AND OPTIMIZATION

Statistics

Statistics required courses

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS

And select one of the following courses:

STAT GU4207	ELEMENTARY STOCHASTIC PROCESS
STAT GU4262	Stochastic Processes for Finance
STAT GU4264	STOCHASTIC PROCESSES-APPLICTNS I
STAT GU4265	STOCHASTIC METHODS IN FINANCE

Computer Science

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
COMS W1007	Honors Introduction to Computer Science
ENGI E1006	INTRO TO COMP FOR ENG/APP SCI

or an advanced Computer Science offering in programming

Electives

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

Students should plan to include a senior thesis or the Undergraduate Seminar in Mathematics in their program, in consultation with their advisors.

NOTE: Students must obtain approval from an adviser in each of the two departments before selecting electives.

NOTE: A student that places out of Calc I/II with AP credits, will need to take a replacement course.

For a major in Mathematics-Computer Science 15 courses (a minimum of 38 credits):

Mathematics

Four courses in calculus or Honors Mathematics A-B, including Advanced Placement Credit. A student that places out of Calc I/II with AP credits, will need to take a replacement course; and the 3 following courses:

MATH UN2010	LINEAR ALGEBRA (also satisfied by Honors Math A-B)
MATH GU4041	INTRO MODERN ALGEBRA I
MATH UN3951	UNDERGRADUATE SEMINARS I (at least one term)
or MATH UN3952	UNDERGRADUATE SEMINARS II

Computer Science

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W3134	Data Structures in Java
COMS W3157	ADVANCED PROGRAMMING
COMS W3203	DISCRETE MATHEMATICS
COMS W3261	COMPUTER SCIENCE THEORY
CSEE W3827	FUNDAMENTALS OF COMPUTER SYSTS

Note A: AP Computer Science with a grade of 4 or 5 or similar experience is a prerequisite for COMS W1007.

Electives: Two additional electives from computer science or math should be included. At least one should be level 3000 or higher; the second should be level 2000 or higher. With adviser approval, appropriate electives from other departments can be considered, such as Statistics or Applied Math.

CSOR W4231	ANALYSIS OF ALGORITHMS I
COMS W4241	Numerical Algorithms and Complexity
MATH UN3020	NUMBER THEORY AND CRYPTOGRAPHY
MATH BC2006	COMBINATORICS
MATH GU4061	INTRO MODERN ANALYSIS I
MATH UN2500	ANALYSIS AND OPTIMIZATION
MATH UN3007	COMPLEX VARIABLES
MATH UN3386	DIFFERENTIAL GEOMETRY
MATH GU4051	TOPOLOGY

Students seeking to pursue a Ph.D. program in either discipline are urged to take additional courses, in consultation with their advisors.

For a major in Economics and Mathematics, see the catalogue.

Requirement for the Minor in Mathematics

For a minor in Mathematics or Applied Mathematics: Six courses from any of the courses offered by the department except MATH UN1003 COLLEGE ALGEBRA-ANLYTC GEOMTRY, MATH UN1101 CALCULUS I / MATH UN1102 CALCULUS II. Some cognate courses are also acceptable with prior approval from the department chair.

Requirements for the Minor in Mathematical Sciences

The minor in Mathematical Sciences comprises 6 courses, at least two from Mathematics and one from each of Statistics and Computer Science. There should be a minimum of three courses in Statistics and Computer Science. Eligible courses are any listed in the Mathematical Sciences Major with the exception of Calculus I and II.

MATH UN1003 COLLEGE ALGEBRA-ANLYTC GEOMTRY. 3.00 points.

Prerequisites: score of 550 on the mathematics portion of the SAT completed within the last year, or the appropriate grade on the General Studies Mathematics Placement Examination. For students who wish to study calculus but do not know analytic geometry. Algebra review, graphs and functions, polynomial functions, rational functions, conic sections, systems of equations in two variables, exponential and logarithmic functions, trigonometric functions and trigonometric identities, applications of trigonometry, sequences, series, and limits

Medieval & Renaissance Studies

417 Barnard Hall

212-854-2116

Director: Rachel Eisendrath

Mission

The Medieval and Renaissance program at Barnard College is designed to enable students to acquire both a broad knowledge of the European Middle Ages and/or Renaissance and a richer and more detailed understanding in one area of concentration chosen by the student. Students can elect to concentrate in one of the following disciplines: art history, history, literature, philosophy, romance languages and

cultures, music, or religion. We encourage our students to take advantage of relevant courses taught at Columbia as well as at Barnard, with the result that more than sixty courses are currently listed as approved for the major.

Student Learning Outcomes

Students who graduate with a major in Medieval and Renaissance Studies will be able to attain the following outcomes:

- Demonstrate a broad knowledge of the European Middle Ages and/or Renaissance.
- Show they also have in-depth knowledge in their chosen concentration of study.
- Create an original research project centered in primary sources.

Director

Rachel Eisendrath (Tow Associate Professor of English)

Professors

Christopher Baswell (Professor of English; Acting Chair, Film Studies Program)

Elizabeth Castelli (Professor of Religion)

Achsah Guibbory (Professor of English)

Najam Haider (Professor of Religion)

Kim Hall (Lucyle Hook Professor of English and Africana Studies)

Joel Kaye (Ann Whitney Olin Professor of History)

Keith Moxey (Professor of Art History)

Peter Platt (Ann Whitney Olin Professor of English)

Deborah Valenze (Professor of History)

Associate Professor

Orlando Bentancor (Associate Professor of Spanish and Latin American Cultures)

Assistant Professors

Gregory Bryda (Assistant Professor of Art History)

Matthew L. Keegan (Moinian Assistant Professor of Asian and Middle Eastern Cultures)

Senior Lecturers

Laurie Postlewait (Senior Lecturer in French)

Senior Scholar

Anne Lake Prescott (Emerita)

For Columbia University Medieval and Renaissance faculty, see [their website](#).

Requirements for the Major

Major programs are established individually with a concentration in one of these disciplines: art history, history, literature, philosophy, romance philology, music, or religion. Each student, after consultation with the chair, chooses an adviser in her area of concentration who guides her in developing a sequence of courses to be taken in the field.

A minimum of 11 courses that are at least 41 credits in total are required for the major in Medieval and Renaissance Studies:

- Five courses in the area of concentration;
- Two history courses for students who are not concentrating in history;
- Two courses in the other disciplines mentioned above for those who are;

- Two electives in areas outside the concentration, to be chosen in consultation with the adviser; and
- MEDR BC3998 DIRECTED RESEARCH-SR PROJECT and MEDR BC3999 DIRECTED RESEARCH-SR PROJECT, a two-semester program of interdisciplinary research leading to the writing of the senior essay.

(In some cases, a senior seminar in one of the departments may be substituted for MEDR BC3998 DIRECTED RESEARCH-SR PROJECT or MEDR BC3999 DIRECTED RESEARCH-SR PROJECT.)

Students are required to write an interdisciplinary senior essay based on two semesters of research in their field of concentration and in another discipline, carried out under the supervision of their area adviser and another from the second discipline. The choice of topic for this senior project and the appointment of a second adviser are determined in consultation with the area adviser and the chair of the program.

In addition to the language used to fulfill the general four-semester requirement for graduation, the student must have completed two semesters of a second language (or the equivalent) relevant to her area of concentration.

The following courses represent only a sample of those that can be taken to satisfy the program requirement. Other relevant courses may be taken with the permission of the chair.

No minor is offered in Medieval and Renaissance Studies.

AHIS UN2305 RENAISSANCE IN IMPERIAL SPAIN. 3.00 points.

Prerequisites: Required discussion section AHIS UN2306

The course will survey Renaissance art in Hapsburg Spain, considered in the wide geographical context of the extended and dispersed dominions of the different crowns of the Spanish monarchy, which connected the Iberian Peninsula with Italy, Flanders and the New World. It will concern visual art in its various media, mainly painting, sculpture and architecture, but also tapestries, prints, armor, goldsmithery and ephemeral decoration, among others. Works of the main artists of the period will be introduced and analyzed, giving attention to the historical and cultural context of their production and reception. The course will particularly focus on the movement of artists, works and models within the Spanish Hapsburg territories, in order to understand to what extent visual arts contributed to shaping the political identity of this culturally composite empire

AHIS W3407 Early Italian Art. 3 points.

Discussion Section Required

Not offered during 2023-2024 academic year.

An introduction to the origins and early development of Italian Renaissance painting as a mode of symbolic communication between 1300-1600. Artists include Giotto, Fra Angelico, Masaccio, Mantegna, and Leonardo da Vinci. Emphasis on centers of painting in Florence, Siena, Assisi, Venice and Rome.

AHIS GU4023 Medieval Art II: Castles, Cathedral, and Court. 4.00 points.

This advanced lecture course is intended for students with little or no background in medieval art of Latin ("Western") Europe. It provides a comprehensive introduction to a period spanning roughly one millennium, from Pope Gregory the Great's defense of art ca. 600 to rising antagonism against it on the eve of the Protestant Reformation. Themes under consideration include Christianity and colonialism, pilgrimage and the cult of saints, archaism versus Gothic modernism, the drama of the liturgy, somatic and affective piety, political ideology against "others," the development of the winged altarpiece, and pre-Reformation iconophobia. We will survey many aspects of artistic production, from illuminated manuscripts, portable and monumental sculpture, stained glass, sumptuous metalworks, drawings, and reliquaries to the earliest examples of oil paintings and prints. While this course is conceived as a pendant to Medieval Art I: From Late Antiquity to the End of the Byzantine Empire (AHIS GU4021), each can be taken independently of one another. In addition to section meetings, museum visits to the Metropolitan Museum of Art, The Cloisters, and The Morgan Library are a required component to the course. Students must register for a mandatory discussion section

AHIS GU4027 Architecture and Associated Arts in Western Europe from 1066 until 1399: Building with Blood, Sweat, and Tears. 3.00 points.

This course will study building practice, sculpture, and architectural ornamentation in Western Europe during the Middle Ages. The monuments selected belong to a period that starts when architecture moved away from Roman antique models and ends just before the re-adoption of Classical standards in the Renaissance. In this course the originality of medieval architecture, its relationship with earlier and later monuments, and the dramatic effort involved in its creation will be discussed. Major themes of medieval society such as pilgrimages, crusades, piety, the cult of relics, and the social and intellectual context of the Middle Ages are also part of this lecture. The course will also introduce students on how to harness digital technologies such as laser scanning or photogrammetry for the study of medieval art. No preliminary knowledge of medieval history or architectural history is needed and no knowledge of digital technologies or specific computer skills is expected. (Virtual) Museum visits will complement the regular lectures

AHIS GU4031 Art of Italy: 1300-1520. 3.00 points.

This course is a survey of the art of Italy from the early fourteenth century until the onset of the Reformation. It will cover the major artists and cultural centers of the peninsula, examining them in the context of broader artistic currents and conventions of the period. Special attention will be paid to the social, political, and historical factors that led to changes in the visual arts as well as the impact of cultures beyond classical antiquity on the form and iconography of paintings and sculptures in the Early Renaissance. The lectures will provide students with a deeper understanding of the canonical works of Italian artists from Cimabue and Giotto to Leonardo da Vinci and Giovanni Bellini, of the development of new criteria for assessing the visual arts, of the relationship between artists, patrons, and audiences in the period. The readings, in turn, will familiarize them with key primary sources of the fourteenth and fifteenth century, as well as the writings of distinguished Renaissance scholars from the nineteenth century until the present

ENGL UN3343 WOMEN IN RENAISSANCE DRAMA CULTRE. 4.00 points.

Concentrating on the drama of early modern England, this course will investigate a culture of surveillance regarding women's bodies in the period. We will give special focus to the fear of female infidelity, the theatrical fascination with the woman's pregnant body, and the cultural desire to confirm and expose women's chastity. We will read plays in which women are falsely accused of adultery, in various generic contexts (such as William Shakespeare's *Cymbeline* and *Much Ado About Nothing*), along with plays in which women actually commit infidelity (such as the anonymous *Arden of Faversham* and Thomas Middleton's *A Chaste Maid in Cheapside*). Focusing on a different play each week, we will ask: what does it take, ultimately, to believe women about their fidelity? At the same time, what is the effect of being doubted on women themselves? We will also give consideration to the particular resources of dramatic form, paying attention to moments in plays that coerce spectators themselves into mistaken judgments about women. We will supplement our reading of drama with pamphlets, advice literature, poems, church court cases, and ballads, in order to place these plays within a broader and more varied culture of female surveillance in early modern England. Finally, we will work to recover past strategies of liberation from this surveillance in the plays we read, in women's writing that warns against male betrayal, and in dramatic and historical instances of female cross-dressing

The literary mode we call "romance" has been enormously popular and influential from its origins in Hellenistic antiquity to current science fiction, and at all levels of textual ambition from popular culture to canonical literature. Within this mass of material, one constant element is romance's encounter with boundaries. This course will explore such boundary moments in texts from the 5th to the 20th centuries: boundaries and transgressions of desire (romances of marriage and adultery), of time (the reimagining of antiquity), of national foundation, of geography (settings in a fantasy east), of gender, and of class, indeed the boundary of the human and the monstrous

ENGL BC3136 Renaissance Epic. 3 points.

The epic tradition raises crucial questions about the interrelationship of literature and power. In telling the story of war and empire building, how does epic both promote and also challenge the cause of the winner?

How does epic preserve a space for more lyrical forms of subjectivity? What does this literary form tell about the role of women, the nameless majority and the global 'other' in the West? In this course, we will trace the European epic tradition, studying Homer's *Iliad*, Virgil's *Aeneid*, Spenser's *The Faerie Queene* and Milton's *Paradise Lost*. Finally, we will read a contemporary poet's reflection on this tradition, Alice Oswald's *Memorial: An Excavation of the Iliad*.

Not offered during 2023-2024 academic year.

It's easy to forget that medieval literature wasn't always old and " quaint" as it seems to many of us today. For writers and artists of that era, they were modern, too. But they also imagined their own past and (like many of us) they often had a nostalgic yearning for that lost time. This course will explore a number of forms of medieval literature, mostly British but also some continental, as it explores versions of its past, and especially the ultimately tragic story of King Arthur. We will read across many medieval genres, including some little known today, like lives of saints. But the course will focus on narratives of quest: heroic, psychological, and erotic. We will also explore some of the often beautiful medieval manuscripts in which these texts were often copied. We will read most Middle English texts in the original language; we'll study French and Latin texts in translation.

Not offered during 2023-2024 academic year.

In this course, we will read the complete nondramatic poetry of Christopher Marlowe and William Shakespeare, working closely through sonnets, epyllia (mini epics), and translations. How do Marlowe and Shakespeare put into play inherited and new ideas about history, gender, sexuality, politics, law, God, race, matter, print, and literary form (especially the sonnet)?

ENGL BC3166 17TH-CENTURY PROSE # POETRY. 3 points.

Not offered during 2023-2024 academic year.

The seventeenth century was a century of revolution, giving birth to modern ways of thinking, and calling into question many of the old ways. In the early years, many were affected by melancholy, some believing the world was approaching the endtimes. England experienced plagues, particularly in London, and other catastrophes. So we might find some affinity with our own current situation, facing new challenges, our world turned upside down, which is what many people felt during that time. Out of all of this turmoil, however, came great literature including lyric poems by John Donne and others exploring love and desire, doubt and faith, sex and God. Donne also wrote a series of Devotions grappling with mortality over a course of 23 days when he was suffering from typhus or relapsing fever and almost died. Others turned to find solace in the natural world and friendship (Amelia Lanyer, Katherine Philips, Henry Vaughan). Robert Burton wrote a book on melancholy, which he kept adding to. Francis Bacon thought a revolution in science could redeem the world. Thomas Browne, a physician as well as writer, tackled the problem of intolerance and religious conflict. Thomas Hobbes thought only a firm (authoritarian?) government could reestablish peace and security, while Gerard Winstanley (a "Leveller") thought that owning land (and money) was the source of all war and misery. Transgressive women had their own ideas. The Quaker leader Margaret Fell defended women's right to preach. We will read selections from these and other writers, understanding them in their historical context and with a sense of their current resonance. ENGL BC3167 MILTON. 3.00 points.

How and why might we read Milton now? And how do his writings and thinking intersect with issues in our present moment? We will read his influential epic *Paradise Lost* after reading selections of Milton's earlier poetry and prose (attack against censorship, defenses of divorce, individual conscience, toleration, complicated issues of political and religious liberty). He wrote about these matters as he was involved in the English Civil war, an advocate of liberty (we will consider what kind, for whom?) and revolution, which Americans would embrace as inspiration and to justify the American Revolution. We will critically read Milton's literary and political texts within the contexts of religious, political, and cultural history of early modern England and Europe but also colonial and revolutionary America—asking difficult questions, and with a sense of how Milton's writing connects to present issues of our time

ENGL BC3169 Renaissance Drama. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 25 students.

This class will examine English drama at the moment when it arose as a major art form. In Renaissance London, astonishingly complex plays emerged that reflected the diverse urban life of the city, as well as the layered and often contradictory inner life of the individual. This poetically rich theater was less concerned with presenting answers, and more with staging questions—about gender, race, religion, literary tradition, love, sex, authority, and class. In this course, we will try to tap into this theater's cosmopolitan, enlivened poetics by studying not only Shakespeare, but also the various other major authors who constituted this literary world: Christopher Marlowe, Ben Jonson, Thomas Dekker, Thomas Middleton, John Webster, and the female playwright Aphra Behn.

ENGL BC3246 WRITING THE MEDIEVAL SELF. 3.00 points.

The late Middle Ages and early Renaissance saw an explosion in the use of the first-person singular "I" by European writers of narrative texts. Although these narratives – among them dream visions, philosophical allegories, spiritual autobiographies, and straight-up novels – do not always correspond to modern ideas about autobiography, they nonetheless demonstrate a growing interest in such "autobiographical" topics as personal identity, sexual difference, mental illness, and disability, even as they experiment with a variety of literary forms and raise fundamental questions about the relationship between truth and writing. Writers will include Augustine, Dante, Boccaccio, Chaucer, Christine de Pisan, Thomas Hoccleve, Julian of Norwich and Teresa de Cartagena, among others. No foreign language experience is required for this course, but knowledge of Latin or Romance languages may be useful

ENGL BC3297 UNSILENT VOICES: THE MEDIEVAL LYRIC IN EUROPE. 3.00 points.

From the fall of the Western Empire to the Protestant Reformation, a period of over 1000 years, poets in Europe produced an extraordinarily rich and varied body of lyric poetry that continues to exert a major influence on world literature today. While some of this poetry is religious in nature, a great deal also addresses such diverse themes as desire, selfhood, politics, gender, and humanity's relation to the non-human world. In this class we will examine medieval lyrics originally composed in a number of languages including but not limited to Old and Middle English, Latin, Occitan, Hebrew, Arabic, Italian, French, German and Portuguese. Aspiring polyglots welcome, but all readings will be provided in English translation. This course presumes no previous knowledge of medieval history or literature

AFEN BC3817 Black Shakespeare. 4.00 points.

This course examines Shakespeare's role in shaping Western ideas about Blackness, in processes of racial formation, and in Black freedom struggle. As one of the most enduring representations of a Black man in Western art Shakespeare's *Othello* will be a focal point. However, this course will examine other "race" plays as well as works perceived as "race-neutral" in tandem with Black "respeakings" of Shakespeare's works. This class is antiracist in intent and is shaped by several interlocking questions: What is Black Shakespeare? Can creators and scholars separate Shakespeare from the apparatus of white supremacy that has been built around his works? What are the challenges for BIPOC actors performing Shakespeare on the dominant stage? What are the challenges and obstacles for BIPOC scholars working on Shakespeare in academia? Can performing Shakespeare be an activist endeavor

FREN GU4425 Medieval Animals, Human and Other. 3.00 points.

How did medieval people separate themselves from other (non-human) animals? Was it the ability of humans to talk, use tools, exercise rationality or something else? We will consider these questions in the first unit of this class, in which we'll look at cases of what Agamben calls "the anthropological machine"—the ways in which humans have distinguished themselves from other species. Why do some bestiaries (catalogues of animals) include human animals but not others? How did medieval people understand Genesis and the notion of 'dominion' given to humans over the rest of creation? In the next unit, we will turn to talking animals, both in medieval philosophical texts and in literature. Do they speak differently from human animals? Do humans speak differently when speaking of them (for example, do texts about parrots or other bird mimics start to 'parrot' other texts?). We next turn to cases of metamorphosis (human to animal or vice versa) and hybridity (in which a single body is both human and animal). What do these texts reveal about what is proper to the human and how does the body play a role in shoring up species identity? In a final unit, we turn to assemblages—conglomerations in which human and nonhuman animals act together. We will look both at chivalry (knight horse) and at medieval lovers, who are often surrounded by birds

FREN BC3025 Theater of the Classical Age. 3 points.

This course will provide a detailed introduction to the three great French dramatists of the seventeenth century, rightly known as the golden age of French theatre. Reading several canonical works by each of these three playwrights—Corneille, Racine, and Molière—students will closely examine the thematic concerns (the relationship between love and duty, the individual and the state, free will and divine providence; the problems of hypocrisy, dishonesty, sexual jealousy, and avarice; the nature of kingship and the extent or the limits of royal control; the differences between prescribed gender roles for men and for women; the recourse to and reworking of mythological and Biblical sources) the plays set forth, and the rhetorical strategies they employ (from classical, Greco-Roman devices such as metaphor, apostrophe, irony, preterition, prosopopeia, and anagnorisis to the specifically French metrical pattern of the alexandrin). *FREN BC1204: French Intermediate II or the equivalent level is required.*

Not offered during 2023-2024 academic year.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.

Experimentation and discovery in the arts, in science and technology, and in the understanding of the human experience. Explores how the works of French poets, *prosateurs*, and playwrights reflect both the vibrancy and splendor of the time, as well as the struggle of an era preoccupied with death and rebirth.

FREN BC3034 French Baroque and Classical Literature. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: FREN BC1204: French Intermediate II or the equivalent level is required.

Interdisciplinary exploration of the literature and culture of the *Grand Siecle*.

History

HIST GU4083 Crime and Punishment in the Middle Ages. 4 points.

Priority given to majors and concentrators, seniors, and juniors.

Prerequisites: the instructor's permission.

How a society defines crime, and how it deals with the criminals tells us a lot about the moral values, and the political and economic structure of that society, as well as its internal conflicts, superstitions, and fears. Often supposed to be a barbaric community of ignorant unruly men governed by greedy kings and popes, the medieval society in the popular culture is often an inspiration to the grotesque representations of violence and torture. Even an intellectual like Michel Foucault did not hesitate to advance a theory of medieval punishment, albeit a terribly wrong one, as one that focuses on the body and spectacle. This course is designed to trace the origins of the modern criminal legislation and practices to the Middle Ages, some of which were jury trial, public persecution, and prisons. How did these practices come about, and under which social conditions? The focus of the course will be on violent crimes, such as murder, robbery, assault and suicide, and some particularly medieval crimes like sorcery, blasphemy and sodomy. The geographical scope will be limited to England, Italy and France. The class discussions are expected to take the form of collective brainstorming on how the political powers, social classes, cultural values, and religious beliefs affect the development of criminal legislation and institutions. Whenever possible the weekly readings will feature a fair share of medieval texts, including trial records, criminal laws, a manual for trying witches, and prison poetry. *Field(s): *MED*

HIST W4101 The World We Have Lost: Daily Life in Pre-Modern Europe. 4 points.

Not offered during 2023-2024 academic year.

What was daily life like for the "average" European in pre-industrial society? This course will examine the material circumstances of life in Europe from 1400-1800, and will investigate how historians are able to enter into the inner life and mental world of people who lived in past. How did people respond intellectually and emotionally to their material circumstances? The readings and discussions in the course aim to examine such questions, with an eye both to learning about the material conditions of life in pre-modern Europe, and to understanding the techniques by which historians are able to make the imaginative leap back into the mental world of the past. *Field(s): *EME*

Italian

ITAL GU4091 DANTE'S DIVINA COMMEDIA 1. 4.00 points.

ITALIAN MAJORS AND ITALIAN DEPT GRADUATE STUDENTS MUST REGISTER FOR SECTION 001.

Prerequisites: SECTION 001: reading knowledge of Italian. SECTION 002: none.

A year-long course in which the "Commedia" is read over two consecutive semesters; students can register for the first, the second, or both semesters. This course offers a thorough grounding in the entire text and an introduction to the complexities of its exegetical history. Attention not only to historical and theological issues, but also to Dante's mimesis, his construction of an authorial voice that generations of readers have perceived as "true," and the critical problems that emerge when the virtual reality created in language has religious and theological pretensions. SECTION 001: Lectures in English, text in Italian; examinations require the ability to translate Italian. SECTION 002: Lectures in English, examinations in English; students who can follow lectures with the help of translations but who cannot manage the Italian should register for this section.

ITAL GU4092 DANTE'S DIVINA COMMEDIA 2. 4.00 points.**ITAL GU4079 Boccaccio's <i>Decameron</i>. 3 points.**

ITALIAN MAJORS AND ITALIAN DEPT GRADUATE STUDENTS MUST REGISTER FOR SECTION 001.

While focusing on the Decameron, this course follows the arc of Boccaccio's career from the *Ninfale Fiesolano*, through the Decameron, and concluding with the *Corbaccio*, using the treatment of women as the connective thread. The Decameron is read in the light of its cultural density and contextualized in terms of its antecedents, both classical and vernacular, and of its intertexts, especially Dante's *Commedia*, with particular attention to Boccaccio's masterful exploitation of narrative as a means for undercutting all absolute certainty. Lectures in English; text in Italian, although comparative literature students who can follow with the help of translations are welcome.

RELI W4170 History of Christianity: Topics in Pre-Modern Papal History. 4 points.

Prerequisites: the instructor's permission.

An examination of a series of episodes that are of special consequence for papal history in Late Antiquity and the Middle Ages. Readings in both primary and secondary sources in English translation.

RELI W4171 Law and Medieval Christianity. 4 points.

Prerequisites: the instructor's permission.

An introduction to the importance of Church law for the study of medieval Christianity through readings in both primary and secondary sources (all in English or English translations). Topics will be selected, as the sources permit, to illustrate the evolution of Western canon law and its impact both as a structural and as an ideological force, in medieval Christianity and in medieval society in general.

Spanish

SPAN UN3368 The Spanish Inquisition. 3 points.

Prerequisites: Knowledge of written and spoken Spanish.

Founded to combat Christian heresy in the late fifteenth century but based on previous medieval models, the Spanish Inquisition is notorious as an institution of religious persecution. Converts from Judaism and Islam to Christianity, not to mention a host of other minority Christian communities, often fell under inquisitorial suspicion. The interrogation and censorship tactics employed by inquisitors and their agents to police these communities sometimes but not always entailed violence. Punishments for those convicted of infractions similarly ranged widely, from the notorious *auto-de-fé* to more minor acts of contrition. In this course, we will study these inquisitorial procedures and their underlying theological presuppositions. We also will examine how the "Holy Office," as it the inquisition was likewise known, fit into the broader religious and political cultures of the Iberian world during the sixteenth century. That is, both Catholic and Protestant reformers of the period often emphasized inquisitorial violence in order to smear their adversaries or make Spain seem backward, while some apologists for Spanish empire and orthodoxy insisted upon the noble intentions driving inquisition. These early modern tensions have shaped our late modern understanding of inquisition history. Over the course of the semester we will aim to test these "black" and "white" legends of Spanish inquisitorial and imperial violence not only against a range of primary sources and archival documents from the sixteenth century, but also against our own presuppositions about tolerance and intolerance, religious freedom, and the relationship between religion and secularism in the present. Readings include inquisitorial case archives, polemical and pedagogical works by Nicolas Eimeric, Hernando de Talavera, Tomás de Torquemada, and other early inquisitors and their critics, and articles and book chapters by modern scholars such as Christine Caldwell Ames, Wendy Brown, Michel Foucault, Carlo Ginzburg, Henry Kamen, Doris Moreno, and others.

Mission

The Barnard Music Program provides the vocal program for the university, which includes the Barnard-Columbia Chorus and Chamber Choir, solo studio voice lessons and two levels of limited-enrollment vocal classes, Technique in Singing, and the Vocal Repertoire Class. In addition, the program provides a music history course, Introduction to Music, which is a year-long survey of Western European art music, from sixth-century Gregorian Chant to the work of living composers. The course fulfills the Fine and Performing Arts requirement of the General Education Requirements and also serves as a pre-requisite

for the music major. Students may complete a senior project in music repertoire by presenting an hour-long recital, or may write a fifty-page thesis project in music research. The successful student will gain professional level performance skills through studio lessons and the theory and ear training sequence, and gain a comprehensive knowledge of music history from the courses in historical musicology and ethnomusicology provided by the Music Department at Columbia University.

Student Learning Outcomes

Students who successfully graduate with a major in music will be able to attain the following outcomes:

1. Analyze the harmonic structure of art music and identify schools of composition by historic period and nationality;
2. Read music at sight at the keyboard, with their instrument, or sight sing representative excerpts from all periods of Western European art music;
3. Perform at a professional level vocally or instrumentally;
4. Demonstrate in-depth knowledge of the diversity of style, musical period and mastery of the representative literature for voice or instrument.
5. Apply knowledge of musical theories, traditions and periods to the study of the major;
6. Communicate effectively orally and in writing;
7. Explain the theoretical concepts and organizational principles, harmony, pitch, and rhythm of both non-Western and Western art music.

Requirements for the Music Major

You need a total of 48 points, minimum, for our major across two tracks:

- 12 points Music Theory I-IV
- 4 points Ear Training I-IV
- 6 points Music History I/II
- 6 points 2000-level courses
- 9 points 3000-4000-level courses
- 4 points vocal or instrumental lessons
- 4 points Senior Seminar
- 3 points Senior Project: Research or Repertoire

Program of Study: To be planned with the department consultant before the end of the sophomore year. Prospective music majors should complete the prerequisites by the end of their sophomore year and are encouraged to complete them by the end of their first year. By the end of her first year as a music major, the student should select a faculty adviser.

Prerequisite: MUSI BC1001 AN INTRODUCTION TO MUSIC I or MUSI BC1002 AN INTRODUCTION TO MUSIC II, MUSI UN1002 FUNDAMENTALS OF MUSIC, and MUSI UN1312 INTRODUCTORY EAR-TRAINING. Prospective music majors are advised to satisfy the prerequisites prior to their declaration as majors or before the end of their sophomore year. This requirement may be fulfilled either through successful completion of the courses or satisfactory performance on examinations administered each semester by the department.

Courses: At least 40 points, including MUSI UN2318 MUSIC THEORY I - MUSI UN2319 MUSIC THEORY II; MUSI UN3321 MUSIC THEORY III - MUSI UN3322 MUSIC THEORY IV; four semesters of ear training, unless the student is exempt by exam; the following two history courses: MUSI UN3128 HIST-WEST MUS: MID AGE-BAROQUE and MUSI UN3129 HIST-WEST MUS:CLASSICAL-20TH CENTURY; and at least three 3000- or 4000-level electives in her area of interest (theory, history, composition, or ethnomusicology). The remaining points are chosen from 2000- to 4000-levels. No more than 6 points of 2000-level courses and no more than 4 points of instrumental or vocal lessons will count toward the major.

Senior Project: In the fall semester of the senior year, a major must enroll in MUSI BC3992 SENIOR SEM FOR MUSIC MAJORS in which she will write a paper which deals with primary sources. In the spring semester of the senior year, a student will either work with her adviser to expand the paper written in the senior seminar by taking MUSI BC3990 SENIOR PROJ:RESEARCH FOR MUSIC, or she will take MUSI BC3991 SENIOR PROJ: MUSIC REPERTORY and prepare an hour-long vocal or instrumental recital, or compose an original composition.

Keyboard Proficiency: Music majors will be required to take a keyboard proficiency exam, which must be arranged by making an appointment with a member of the piano faculty, immediately upon declaration of the major. Those who do not pass the exam will be required to take MUSI W1517 Keyboard Harmony and Musicianship - MUSI UN1518 KEYBOARD HARMONY/MUSICIANSHIP, for 1 point each term, which will count against the maximum 4 points allowed toward completion of the major.

Languages: For students who plan to do graduate work in music, the study of German, French, Italian, and/or Latin is recommended.

Note: With the permission of Gail Archer, Barnard Director, students may take lessons at the Manhattan School of Music or the Julliard School. For non-majors, there is a six semester limit, but majors may continue for the remainder of their program.

Practice Rooms: Piano practice rooms are available, at a nominal fee, upon application to the Music Department in 319 Milbank. Application should be made during the first week of classes. Preference in assigning hours is given to students taking piano instruction, majors, and concentrators, in order of application. The organ studio in St. Paul's Chapel is available for organ practice. Arrangements should be made with Mary Monroe, Associate in Organ Performance, during the first week of classes.

Requirements for Ethnomusicology Track in the Music Major

The ethnomusicology track combines the social science of music in such courses as the Social Science of Music and Asian Music Humanities, together with anthropology as a regular option for all students. All special majors in ethnomusicology must take two courses in anthropology at the recommendation of the Barnard anthropology department in consultation with ethnomusicology faculty at Columbia.

This course is designed for developing singers. Group vocalizing, learning of songs and individual workshop performances are aimed at improving the students technical skill and the elements necessary to create a meaningful musical and dramatic experience. Attention to text, subtext, emotional and psychological aspects of a piece and the performers relationship to the audience are included in the work. Repertoire is predominantly in English and comes from both classical and popular traditions Individual coaching sessions are available with the class accompanist and help strengthen the students confidence and skill. The class culminates with an in-class performance

MUSI UN2021 MUSIC IN CONTEMP NATIVE AMER. 3.00 points.

Music in Contemporary Native America is a historical, ethnographic, and topical examination of contemporary Native American musical practices and ideologies. The course emphasizes popular, vernacular, and mass mediated musics, and calls into question the simple distinction between traditional and modern aspects of Native American cultures. Our readings and class guests (several of whom will be Native American scholars) emphasize the importance of understanding Native 2 American perspectives on these topics. Three short papers and one substantial final project are required. Approximately 100-150 pages of reading per week

MUSI UN2023 BEETHOVEN. 3.00 points.

Prerequisites: HUMA UN1123 or the equivalent.

A study of the life and works of Ludwig van Beethoven, with emphasis on selected symphonies, string quartets, and piano sonatas. Also consider the changing nature of the critical reception of Beethoven and issues of classicism and romanticism in music.

MUSI UN2025 THE OPERA. 3.00 points.

Prerequisites: *HUMA W1723* or the equivalent.

The development of opera from Monteverdi to the present. IN FALL 2011, THE OPERA WILL BE OFFERED MON/WED 2:40-3:55 in 622 DODGE.

MUSI UN2030 JEWISH MUSIC IN NEW YORK. 3.00 points.

Prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard).

Prerequisites: Music Humanities (Columbia University) or An Introduction to Music (Barnard). With the arrival of the first Jewish immigrants in New York in the mid-1600s until today, Jewish music in the City has oscillated between preserving traditions and introducing innovative ideas. This course explores the variety of ways people have used music to describe, inscribe, symbolize, and editorialize their Jewish experience. Along these lines, it draws upon genres of art music, popular music, and non-Western traditions, as well as practices that synthesize various styles and genres, from hazzanut to hiphop. Diverse musical experiences will serve as a window to address wider questions of identity, memory, and dislocation. We will also experience the Jewish soundscape of New York's dynamic and eclectic music culture by visiting various venues and meeting key players in today's music scene, and thus engage in the ongoing dialogues that define Jewishness in New York. A basic familiarity with Judaism and Jewish culture is helpful for this course, but it is by no means required. You do not need to know Jewish history to take this class, nor do you need to be able to read music. Translations from Hebrew and Yiddish will be provided, and musical analysis will be well explained

MUSI UN2230 History and Practice of Electronic Music. 3.00 points.

This course will provide a critical survey of the development of electronic and computer music and sound from around the globe. From early experiments and precursors in the late 19th century through to modern-day experimental and popular music practices, this course aims to trace the development of technologies used in the production of electronic and computer derived sound and music alongside the economic, cultural, and social forces that contribute to the development of audiences. The course will focus intently on listening through a series of curated playlists in an effort to unpack style and genre distinctions. Readings and listening examples will be paired with small, hands-on assignments, that demonstrate the effect of music making tools on the process and structure of musical genres and styles ranging from the experimental practices of musique concrete, drone, and harsh noise to the mainstream practices of dub, techno, vaporwave, hyperpop, and hip hop and more

MUSI UN2240 The Song Within Us: Composition, Analysis, Performance. 3.00 points.

This class offers insight through composing, analysis, and performance for the composer, singer/songwriter, and performance artist. Coupling specifics of rhythm, melody, and harmony with story telling, lyric writing and the voice itself, students will be encouraged to share their imagination in song regardless of style, genre, or aesthetic. Music ranging from Chant to Music Theatre, the German lied to international pop fusion will be included as models upon which to base discussion and creative endeavor. Improvisation and musicianship techniques will complement pedagogical presentations of tonal and non-tonal compositional practice. A required final project based on any combination of composition, analysis, and performance, and in any media will be due at the end of the semester. All levels of experience and all types of instruments are welcome. Notation software is recommended but not required

This course explores the relationship between women, music, and performance from a thematic and a cross-cultural perspective. Through the analysis of different case studies, we will investigate different topics from the perspective of ethnomusicology, cultural anthropology, and performance studies. A number of critical questions we will consider include: how does a particular gender ideology constructs and is constructed by musical aesthetics? What are some of the critical roles for women in performance? What is the significance of gender in performances? What does it mean for women to have have and to be the voice? And how is a musical performance bound up with emotions?

MUSI UN2582 JAZZ IMPROVISTN:THRY,HIST,PRAC. 3.00 points.

This course offers an introduction to jazz improvisation for instrumentalists. Through recordings, transcriptions, daily performance and selected readings, students will actively engage the history of jazz through their instruments and intellect. The idea of improvisation will be explored in an historical context, both as a musical phenomenon with its attendant theory and mechanics, and as a trope of American history and aesthetics. This class is for instrumentalists who wish to deepen their understanding of the theory, history and practice of jazz improvisation. The history of jazz will be used as a prism through which to view approaches to improvisation, from the cadences of the early Blues through the abstractions of Free Jazz and beyond. The student will be exposed to the theory and vocabularies of various jazz idioms, which they will also learn to place in their social and historical contexts

MUSI UN3103 Afrofuturism and Society: Music, Media, and Race. 3.00 points.

An aesthetic, perspective, and practice, Afrofuturism places Afro-diasporic peoples at the center of science-fiction and speculative narratives, affording Black people narrative agency over their past, present, and future. Afrofuturism exists as an essential site for the interrogation and celebration of Black life, while also serving as a thoughtful critique of anti-Black sentiments and white supremacy. This course will familiarize students with the historical underpinnings, contexts, and both seminal and contemporary works that are a part of the movement and which situate Afrofuturism as part of a larger socio-cultural discourse on race, creativity, and activism. We will be discussing Afrofuturism's historical and socio-cultural positionality, but will also ask: in the midst of global anti-Blackness, the post-Trump era, a pandemic, and the era of Black Lives Matter, where does Afrofuturism fit in the existing discourse?

MUSI UN3342 Beyond Boundaries: Radical Black Experimental Music. 3 points.

This discussion seminar focuses on African American composer/improvisers in the twentieth- and twenty-first centuries whose work rejects and critiques simplistic compartmentalization in terms of improvisation, composition, genre, gender, race, and place. On the contrary, these musicians embody Duke Ellington's famous dictum regarding great music being "beyond category." Students will critically discuss some of the common threads in this network—musicians' means of creating and performing their original music, its distribution in the marketplace and surrounding critical discourse, their engagement with issues of race, gender, and class within and outside of their communities, and interdisciplinary and community-based collaboration. Musical communities such encompassed in this course include the Association for the Advancement of Creative Musicians (AACM), Sun Ra's Arkestra, and the Jazz Composers Guild and extends up to the current day to include contemporary artists such as Nicole Mitchell, Matana Roberts, and Tyshawn Sorey. The incredibly rich multifarious pieces and performances that we will listen to and discuss reference and incorporate elements of improvisation, theatre, twelve-tone serialism, aleatoric composition, bebop, electro-acoustic and computer music, conduction, popular music, the voice, free jazz, Afrofuturism, the blues, orchestral music, opera, and graphic notation

MUSI UN3343 Shades of Brown: Music in the South Asian Diaspora . 3 points.

This course explores the musical world of the South Asian diaspora in Europe and North America. We will read ethnographic accounts of diasporic musics and experiences and develop methods for analysis and interpretation of such accounts, situating the songs of the South Asian diaspora within its broader social history. We will address the concepts of belonging and identity, nostalgia and affect, and the dismantling or upholding of dominant discourses such as gender, race, and caste. Our focus will be on the last half century, although deeper histories will need to be considered. Students will learn to analyze instrumentation and lyrics in various genres and traditions of South Asian music, including both art, folkloric, and popular idioms, and to correlate these with aspects of the social context of diaspora. While the specific focus of the course is on a particular diasporic history, the class will help students understand and think critically about the broader phenomenon of "diaspora" and its cultural dimensions, and through this to engage critically with important aspects of cultural globalization and migration.

Students from all departments are welcome. Reading music not required.

MUSI UN3344 Curating Popular Music: From Song Pluggers to Spotify. 3 points.

How is popular music made popular? And who makes it popular? This discussion-based course seeks to answer these questions by focusing on the critical role that music industry professionals—song pluggers, sheet music publishers, producers, talent scouts, record executives, and content curators—have played in shaping the markets of production, circulation, and consumption of popular music in the United States from the beginning of the twentieth century to the present day. Readings, listening selections, and class discussion will address a number of key genres of American popular music—Tin Pan Alley, folk, blues, country, rock, pop, and hip hop—while individual assignments (including a final project centered on creating and producing a podcast) will allow students to apply the knowledge gained in class to genres, styles, and works of their own choosing. Students will not be required to have prior knowledge of music theory or to be able to read music. Completion of Masterpieces of Western Music: “Music Humanities” (HUMA UN 1123) is preferred, but not required.

MUSI UN3400 TOPICS IN MUSIC # SOCIETY. 3.00 points.

Music Majors and Concentrators.

This course seeks to approach the study of music and society by comparatively studying repertoires from different parts of the world, how the history of ideas and methods of studying such repertoires shaped them, the practices that constitute them and the ways they are understood and used by different peoples. Central to this course is the interrelationship between the constitution of a repertoire and the history of the construction of knowledge about it

MUSI UN3410 The Polycultural Roots of U.S. Popular Music. 3.00 points.

This course will explore the rich hybrid development of U.S. popular music genres and vernacular music traditions. Focusing on the contributions of Indigenous, Latinx, Asian, and African American musicians and musical traditions in addition to European American musicians and musical traditions, in genres as various as country music, hip hop, jazz, reggaeton, and rock, students will enlarge their sense of the multiracial and crosscultural makeup of the music that constitutes “American popular music.”

MUSI UN3425 Music, Sound and the Law. 3.00 points.

This course is a historical overview of the relationship between music and the law in which students will employ both critical listening skills and critical thinking to understand how sound came to be understood as property, how the law impacts creativity, identity and labor, and how music has been used as a tool for enforcing and challenging legislative and political processes. We will discuss the origins of copyright law in the Enlightenment, how music has been used as a tool of colonization through formation of archives, examples of Native American conceptions of cultural property and modes of repatriation, the birth of the music industry and its segregationist history, how the law impacts creativity through the study of sampling, infringement and extension of rights, the ways in which musicians and listeners subvert legal strictures, how music can influence policy as protest or as propaganda, musical bans, noise ordinances, the relationship between music and the First Amendment, alternatives to copyright law in the digital age, music piracy, and the recent changes in the music industry to focus on data gathering as the primary model for music distribution. Music is our point of departure, and students will learn ways in which sonic practices shaped and challenged legislative paradigms. Our focus is on American musics such as Native American music, blues, country, jazz, rhythm and blues, rock and roll, experimental music, hip hop, pop, as well as some European classical music, “world” music, and EDM. Students will read and analyze legal primary sources such as the Music Modernization Act, as well as landmark court cases, critical legal literature, and musicological texts. Students will learn debate skills, acquire practical knowledge of the law through concepts such as fair use, the public domain and mechanical and performance rights, and develop listening skills to understand legal concepts such as infringement. This course is open to students of all majors and will be of particular interest to musicians, students with plans to pursue a law degree in IP or technology law, as well as those interested in working in the music industry. There are no prerequisites and no previous knowledge of music, music theory, or the law is necessary. Masterpieces of Western Music or Asian Music Humanities are recommended

MUSI UN3995 HONORS RESEARCH. 2.00-3.00 points.

Open to honors candidates in music only.

Prerequisites: a formal proposal to be submitted and approved prior to registration; see the director of undergraduate studies for details.
Prerequisites: a formal proposal to be submitted and approved prior to registration; see the director of undergraduate studies for details. A creative/scholarly project conducted under faculty supervision, leading to completion of an honors essay, composition, or the equivalent

MUSI GU4060 MEDIEVAL MUSIC DRAMA. 3.00 points.

In this seminar we will study examples of music drama from the tenth century to the fourteenth, taking into account both the manuscript sources and methodological questions raised by performative works at the intersection of literature, music, and ritual

MUSI GU4108 Critical Approaches to Opera Studies. 3.00 points.

Why opera now? In what ways can a 400-year-old art form speak to the needs of contemporary society? This seminar provides an introduction to critical opera studies: we will analyze a broad range of lyric repertory (spanning from Monteverdi to Saariaho) while interrogating the debates these works have generated, both historically and in the present day. Topics to be considered include: operatic institutions and conventions; gender and voice; theories of "text" and liveness; modernist staging; the troubling legacies of Empire and exoticism; and the intersections of opera and multimedia (opera on/as film, opera in HD, site-specific opera). While completion of Music Humanities is a suggested pre-requisite, this class welcomes interdisciplinary perspectives. Individual assignments may be tailored to accommodate student interests and backgrounds outside of the field of music. Note: While the original description for this course emphasized live concert attendance, the present circumstances have clearly rendered this impossible! Our meetings will now make use of Columbia's extensive resources for online streaming (Met Opera on Demand, medici.tv); feature zoom discussions with prominent figures from the opera world; and take care to critically consider the ways that the art form and its practitioners have responded to the crises of the spring and summer

MUSI GU4113 Medieval Mediterranean Love Songs. 4.00 points.

This seminar will focus on love poetry in the medieval western Mediterranean. Readings will consist primarily of medieval lyric in Old Occitan, Galician Portuguese, Old French, Italian, and Castilian in conversation with concurrent kindred forms of the lyric in classical Arabic and medieval Hebrew from medieval Iberia and Italy. Most weeks will include listening examples but a background in music is not a prerequisite. All texts will be available in translation; originals will also be made available. We will emphasize close reading and analysis, often addressing the relationship between text and music

MUSI GU4230 Sounding Alternative Perspectives in Electronic Music. 3.00 points.

In this seminar we will explore examples of electronic music composition and practice as propositions that centered situated perspective and dialogic world-making in the creative space as a means of resistance. We will look at historical and contemporary figures that animated alternative identity articulations, proposed distributed power dynamics, and challenged environmental bifurcations from the grounded and speculative province of music making. We will engage feminist methodologies in our approach, as they uphold the supposition that practice is praxis and scholarship, and support collective learning techniques. Readings in critical theory, musicology, and media studies will support our research as well as practice-based projects. With this seminar we will ask how electronic music functioned(s) as place or form of identity formation and challenge to normative expression. Can electronic music work as an experience that resists patriarchal and/or colonial structures or disciplines? What strategies have been taken that reset or rescript techno-masculinist spaces, tools and practices? And how can we create an analysis method that makes these qualities legible? No in-depth experience with either computers or electronic music is required, though music and sound will be the principle focus of our inquiry. Interdisciplinary methods of critical response and analysis will be explored in this class

MUSI GU4325 Topics in Music Cognition. 3.00 points.

This advanced seminar builds on the Introduction to Music Cognition (MUSIC UN2320) with an in-depth inquiry into selected key topics in the field of Music Cognition. Specific topics vary each year, depending on interest and availability of instructors, and include human development; evolution; communication and music's relation to language; embodied knowledge; first-person awareness; metaphor; ineffability; neuroscience; mental representations; memory and anticipation; cross-cultural studies; emotions; musical aesthetics; artificial intelligence; agency; creativity; and music's relation to other art forms. Each semester the course delves into recent research on 3-4 of these topics, focusing in particular on how this research can be applied to questions of musical knowledge. Advanced readings are drawn from fields as diverse as music theory, psychology, biology, anthropology, philosophy, and neuroscience. They include general works in cognitive science, theoretical work focused on specific musical issues, and reports of empirical research

MUSI GU4380 Topics in Sound Studies. 3.00 points.

Sound studies is a burgeoning interdisciplinary field that explores the question of how does listening to sound, beyond having a phone conversation or listening to your favorite tunes, influence culture, knowledge, and society by initiating dialogues across musicology, philosophy, cultural studies, disability studies, race and gender studies, and science and technology studies. In this course, students will examine three interrelated debates within the field: 1. the role of sound in understanding and uncovering historical and cultural knowledge; 2. the function of sound in the invention of media and technologies that have transformed listening culture; 3. the capacity of sound to shape social perceptions of race and gender. Reading texts that have revolutionized the way we think about sound, students will learn how sound and listening participated in historical and contemporary meaning-making

MUSI GU4407 Songs and Sounds of Protest of Latin America and the Caribbean: Relisting to the 1960s and 1970s. 3.00 points.

This course is a topical (not comprehensive) survey of musical-poetic manifestations from Latin America, the Caribbean and their diasporas that emerged during the 1960s and the 1970s. The course revisits this time period by exploring the contributions of myriad countries among which Puerto Rico, Brazil, Nicaragua, Cuba, Québec, Haiti, Chile, Argentina, Jamaica, Trinidad and Tobago, Martinique/Guadeloupe, and the United States (with a strong emphasis on New York). It analyzes objects and experiences engaged in contesting colonialism, settler colonialism, imperialism, patriarchy, racism, capitalism and Eurocentrism highlighting as well the limits (and limitations) of these radical discourses. Using a decolonial/postcolonial lens and an ethnomusicological approach, the course pays careful attention to the politics of these musics, their historical context and aesthetics, and the social imaginary of those who made them possible

MUSI GU4308 Theory and Analysis of Jazz and Improvisation. 3.00 points.

This course explores diverse approaches to analyzing jazz and improvisation. Students will engage with analytical methods stemming from both scholars and improvisers, learn to apply traditional analytical approaches, examine critical issues underlying them, and develop new applications of heretofore underexamined ones. We will focus alternatively on harmony, solos, interaction, cognition, rhythm, and pedagogy, among other issues, and the survey will afford students insight into the priorities, methodologies, outcomes, and shortcomings of each of them. Additionally, the course covers theoretical texts produced by improvising musicians, as well as instances where improvisers engage with preexisting theoretical texts. Finally, we will also examine intersections between identity—encompassing issues such as race, ethnicity, gender, and class among others—and music theory. We will investigate characterizations of music theory, composition, and improvisation in terms of identity and suggest ways that we might incorporate the diverse range of theorists and analysts in our course into larger intellectual and musical histories

MUSI GU4425 SOUNDING ISLAM. 3.00 points.

The objective of this course is to explore the relationship between sound, music and Islam and, in doing so, to focus on a philosophy of listening (sama') which is deeply embedded in the experiential. The course aims to analyze how sound and music directly or indirectly associated with Islam are produced, circulated, and listened to by a wide variety of audiences in local and transnational settings; to explore the ways in which multiple sonic dimensions of Islam have affected the public sphere in different historical moments and contexts (particular in relation to ideas about nationalism, secularism and modernity); and to examine the effect of these sonic dimensions on Muslim and non-Muslim listeners in a local and a transnational perspective

MUSI GU4500 JAZZ TRANSCRIPTION # ANALYSIS. 3.00 points.

MUSI GU4505 JAZZ ARRANGING # COMPOSITION. 3.00 points.

Prerequisites: MUSI UN2318 - MUSI UN2319 Diatonic Harmony or equivalent.

Course designed to train students to arrange and compose in a variety of historical jazz styles, including swing, bebop, hard bop, modal, fusion, Latin, and free jazz.

MUSI GU4515 CONDUCTING MUSIC. 3.00 points.

Prerequisites: advanced music major and extensive contemporary music background.

Prerequisites: advanced music major and extensive contemporary music background. Analysis of the modern repertory of contemporary music with directional emphasis on actual conducting preparation, beating patterns, rhythmic notational problems, irregular meters, communication, and transference of musical ideas. Topics will include theoretical writing on 20th-century conducting, orchestration, and phrasing

MUSI GU4525 INSTRUMENTATION. 3.00 points.

Prerequisites: extensive musical background. Analysis of instrumentation, with directional emphasis on usage, ranges, playing techniques, tone colors, characteristics, interactions and tendencies, all derived from the classic orchestral repertory. Topics will include theoretical writings on the classical repertory as well as 20th century instrumentation and its advancement. Additional sessions with live orchestral demonstrations are included as part of the course

MUSI GU4630 RECORDED SOUND. 3.00 points.

Prerequisites: The instructor's permission.

Prerequisites: The instructor's permission. As music moves into the 21st century, we find ourselves surrounded by an ever-evolving landscape of technological capability. The world of music, and the music industry itself, is changing rapidly, and with that change comes the opening – and closing – of doorways of possibility. What does this shift mean for today's practicing artist or composer? With big label recording studios signing and nurturing fewer and fewer artists, it seems certain that, today, musicians who want to record and distribute their music need to be able to do much of the recording and production work on their own. But where does one go to learn how to do this – to learn not only the “how to” part of music production, but the historical underpinnings and the development of the music production industry as well? How does one develop a comprehensive framework within which they can place their own artistic efforts? How does one learn to understand what they hear, re-create what they like and develop their own style? This class, “Recorded Sound,” aims to be the answer. It's goal is to teach artists how to listen critically to music from across history and genres in order to identify the production techniques that they hear, and reproduce those elements using modern technology so they can be incorporated into the artist's own musical works

MUSI GU4802 Sound, Music and Death. 3 points.

This seminar is an exploration of the roles of sound and music play in people's attempts to grapple with death and its many auras. We will read literature from ethnomusicology, anthropology, and sound studies, and listen to musics from many parts of the world, so as to investigate how 1) the processes of aging, decay, and mourning; 2) metaphorical deaths including war and exile; and 3) imaginations of afterlives resound among the living.

MUSI GU4810 Sound: Foundations. 3.00 points.

This foundational course in sound will begin by exploring how listening happens as well the tools necessary capture and present that listening. Through hands-on experimentation and demonstration, this seminar will examine both the technical and semiotic use of sound as a material within creative practice. Fundamental studio techniques will be explored including soldering for building cables, microphones, and loudspeakers. We will also explore the building blocks of analog and digital processes for the creation of sound, including microphones (types, patterns, and placement), basic synthesis, and techniques for recording, mixing, editing, and mastering. Through creative projects that implement these skills we will learn by doing. We will study theories of sound and listening that determine or are determined by technology, from the physical and social dimensions of the sounds we use to create, language (sound as a symbol or object), acoustics (sound in space), acousmatics (sound without a visual reference), and psycho-acoustics (sound as cognitive process). This class assumes no prior knowledge or technical skill. Some reading will be assigned and we will look and listen to a lot of work, students are encouraged to participate actively in discussions

Mission

The Neuroscience and Behavior major provides a strong background in the neural underpinnings of behavior and cognition. It is intended for students who plan to pursue a research career in neuroscience or a related discipline. Students electing this major are exposed to basic courses in biology, psychology and statistics, and to advanced courses in neuroscience and behavior.

All majors engage in two semesters of independent research during the senior year while taking the Senior Research Seminar. In the junior year, majors must begin developing a plan for the senior research project.

Student Learning Goals

Students graduating with a major in Neuroscience and Behavior should be able to attain the following outcomes:

- acquire a strong intellectual foundation in neuroscience
- develop competence in the interpretation and evaluation of neuroscience research
- understand the role of experimentation in neuroscience
- learn basic methods of experimental design and hypothesis testing
- acquire effective oral presentation skills
- demonstrate a capability to write a scientific paper
- understand statistical approaches to data analysis.

Student Learning Outcomes

Upon successfully completing the major, students should have the ability to

- discuss neuroscience phenomena from many different levels of organization (e.g., explain how the destruction of myelin in people with multiple sclerosis leads to cognitive and motor deficits);
- describe the basic features of nervous system development, organization, signaling, integration, and higher-level processing;
- explain the neural basis of sensory-motor integration, learning and the generation of complex behaviors;
- conceive of, implement, and present an original research project;
- generate a testable hypothesis and develop a controlled experimental design;

- perform modern scientific measurement techniques;
- write an original research paper.

As an alternative to the Neuroscience and Behavior major, students may pursue an interdisciplinary program by majoring in either Biology or Psychology and taking a minor in the other discipline.

Core Faculty: Peter Balsam (Chair), Kara Pham (Departmental Representative), Elizabeth Bauer, BJ Casey, Maria de la Paz Fernandez, John Glendinning, Gabrielle Gutierrez, Russell Romeo, Rae Silver, Alex White

The new NSBV curriculum requires the completion of a minimum of 13 courses (5 core neuroscience courses; 3 introductory courses from cognate disciplines; 3 elective courses; a year-long research seminar counting as 2 courses) and a senior thesis. All NSBV majors must take 5 core neuroscience courses that provide foundational knowledge and laboratory training. No more than 2/5 core neuroscience courses can be taken outside the NSBV Department, including Columbia University or other institutions. For many courses, NSBV majors have multiple options. Reflecting the interdisciplinary nature of our discipline, students can select introductory and elective courses offered in other departments either at Barnard or Columbia. Furthermore, students have the option of selecting elective courses in one suggested track – cognitive/behavioral, computational, or molecular.

Five Core Neuroscience Courses

NSBV BC1001	INTRODUCTION TO NEUROSCIENCE
NSBV BC2001	LABORATORY IN NEUROSCIENCE
NSBV BC3001	SYSTEMS AND BEHAVIORAL NEUROSCIENCE
BIOL BC3362	MOLECULAR # CELLULAR NEUROSCIENCE
NSBV BC2002	STATISTICS AND EXPERIMENTAL DESIGN

Three Introductory Courses from Other Disciplines

One course must be Introduction to Cellular and Molecular Biology (BIOL BC1502 + lab BIOL BC1503); the other courses (1lect; 1lect+lab) from cognate disciplines (Biology, Chemistry, Computer Science, Physics, or Psychology)

Senior Research Seminar

Seniors can choose among three options: Senior Research Seminar (NSBV BC3593-4), Neuroscience Guided Research (NSBV BC3591-2) or Neuronal Circuits (NSBV BC3590)

Three Elective Courses

Approved electives are listed on the [department webpage](#). One elective course must be a 3000-level seminar.

Fall 2023

NSBV BC1001	INTRODUCTION TO NEUROSCIENCE
NSBV BC2001	LABORATORY IN NEUROSCIENCE
NSBV BC2002	STATISTICS AND EXPERIMENTAL DESIGN
NSBV BC2004	Fundamentals in Computational Neuroscience Models
NSBV BC3405	NEUROSCIENCE OF TRAUMA
NSBV BC3361	CELLULAR # MOLECULAR NEUROSCIENCE
NSBV BC3381	Visual Neuroscience: From the Eyeball to the Mind's Eye
NSBV BC3376	PSYCHOBIOLOGY OF INFANT DEVELOPMENT

NSBV BC3384	RHYTHMS OF THE BRAIN
NSBV BC3387	TOPICS IN NEUROETHICS
NSBV BC3388	MODELS OF NEUROPSYCHIATRIC DISORDERS
NSBV BC3385	NEUROETHOLOGY
NSBV BC3390	NEURONAL CIRCUITS: NEUROGENETICS AND PRINCIPLES OF NEURONAL CONNECTIVITY
NSBV BC3591	NEUROSCIENCE GUIDED RESEARCH
NSBV BC3593	RSRCH/SEM-NEUROSCNCE# BEHAVIOR
NSBV BC3099	INDEPENDENT STUDY

Spring 2024

NSBV BC1001	INTRODUCTION TO NEUROSCIENCE
NSBV BC2001	LABORATORY IN NEUROSCIENCE
NSBV BC2002	STATISTICS AND EXPERIMENTAL DESIGN
NSBV BC2006	MIND/BRAIN DISORDERS
NSBV BC2154	HORMONES AND BEHAVIOR
NSBV BC3001	SYSTEMS AND BEHAVIORAL NEUROSCIENCE
NSBV BC3387	TOPICS IN NEUROETHICS
NSBV BC3389	Hallucinations, illusions, dreaming and imagination
NSBV BC3391	NEURONAL CIRCUITS: NEUROGENETICS AND PRINCIPLES OF NEURONAL CONNECTIVITY
NSBV BC3392	PSYCHOBIOLOGY OF STRESS
NSBV BC3398	PSYCHOBIOLOGY OF SLEEP
NSBV BC3592	NEUROSCIENCE GUIDED RESEARCH
NSBV BC3594	RSRCH/SEM-NEUROSCNCE#BEHAVIOR
NSBV BC3099	INDEPENDENT STUDY

Past Courses

(Courses not offered in fall '23 and spring '24))

NSBV BC2003	Neuroendocrinology of Stress
NSBV BC2005	FLAVOR PERCEPTION AND THE HUMAN DIET
NSBV BC2008	ADAPTIVE OR ARRESTED DEVELOPMENT OF THE ADOLESCENT BRAIN
NSBV BC3105	Neuroimmunology Seminar
NSBV BC3394	Neurobiology of Social Behaviors

Philosophy

326 Milbank Hall

Department Assistant: Maia Bernstein

Mission

Philosophy is an effort to see how things – not just objects and persons, but also ideas, concepts, principles, and values – hang together. Philosophical questions explore the foundations and limits of human thought and experience. What is there? What can we know? What is good? How should we live? What is a person? What is reason? How do words have meaning? The philosophy major introduces students to central concepts, key figures, and classic texts so they may

broaden and deepen their own understanding as they learn how others have approached foundational questions in the past. An education in philosophy also teaches students to think and write with clarity and precision – intellectual resources essential to future study and rewarding professional lives.

Student Learning Outcomes

Students graduating with a B.A. in philosophy will have acquired skills in critical thinking, conceptual analysis, argumentation, close reading of classic and contemporary philosophical texts, and composition of clear, cogent, and persuasive prose. More specifically, they will be able to:

1. Demonstrate their knowledge of major thinkers (such as Plato, Aristotle, Descartes, Hume, Kant) and texts of the ancient and modern philosophical traditions;
2. Demonstrate their understanding of central problems and dominant theoretical traditions in moral theory (Kantianism, utilitarianism) and either epistemology (skepticism, other minds, the problem of induction, decision theory), metaphysics (the mind-body problem, free will and determinism, causation, the nature of space and time), or the philosophy of language;
3. Construct and evaluate deductive arguments using formal symbolic notation;
4. Discuss and reflect critically on difficult philosophical texts and outstanding problems in a seminar setting with their fellow majors.

Although it is not required for the major or for the minor, students who have not had previous training in philosophy are advised to take PHIL UN1001 INTRODUCTION TO PHILOSOPHY.

Chair: John Morrison (Professor)

Professor: Taylor Carman

Professor: Frederick Neuhauser

Associate Professor: Karen Lewis

Assistant Professor: Francey Russell

Term Professor: Christina Van Dyke

Term Assistant Professor: Christopher Prodoehl

Professor Emeritus: Alan Gabbey

Other officers of the University offering courses in Philosophy:

Professors: David Z. Albert, Akeel Bilgrami, Haim Gaifman, Lydia D. Goehr, Robert J Gooding-Williams, Axel Honneth, Wolfgang R. Mann, Christia Mercer, Michele M Moody-Adams, Christopher A.B. Peacocke, Carol Rovane, Achille C. Varzi, Katja Vogt

Associate Professors: Justin Clarke-Doane, Jessica Collins, Tamar Lando

Assistant Professors: Allison E. Aitken, Melissa Fusco, Dhananjay Jagannathan

Requirements for the Major

A major in Philosophy consists of at least 10 courses (with a minimum of 30 credits), as follows:

1. One course in ancient or early medieval philosophy:

PHIL UN2101	HISTORY OF PHILOSOPHY I
PHIL UN3121	Plato
PHIL UN3131	ARISTOTLE

2. One course in late medieval or early modern philosophy:

PHIL UN2201	HISTORY OF PHILOSOPHY II
-------------	--------------------------

PHIL UN3237	LATE MEDIEVAL # MODERN PHILOS
PHIL UN3251	Kant
3. One course in logic:	
PHIL UN1401	INTRODUCTION TO LOGIC
PHIL UN3411	SYMBOLIC LOGIC
4. One course in ethics:	
PHIL UN3701	ETHICS
5. One of the following courses:	
PHIL UN3601	METAPHYSICS
PHIL UN3960	EPISTEMOLOGY
6. The Senior Seminar	
PHIL BC4050	SENIOR SEMINAR (This course is required for the major and is offered only in the fall semester of each year.)
7. Either of the two-course groups below:	
PHIL BC4051	SENIOR ESSAY
PHIL BC4052	SENIOR ESSAY
OR: One advanced seminar (PHIL UN 3912 or a PHIL seminar above 4000, other than PHIL BC 4050), plus one elective beyond the two stipulated in 8 (below).	
8. Two electives in addition to the eight courses stipulated above.	
"Elective" refers to any PHIL course not used to satisfy a major requirement.	

PLEASE NOTE:

- Only one of the two introductory courses offered at Barnard and Columbia (PHIL UN1001 and PHIL UN1010) may be counted towards the ten PHIL courses required by the major.
- Only one of the two logic courses mentioned above—PHIL UN3411 and PHIL UN1401—may be counted towards the ten PHIL courses required by the major.

Requirements for the Minor

Five courses (with a minimum of 15 credits) constitute a minor in philosophy. The courses must be selected in consultation with the department chair.

PHIL UN2685 INTRO TO PHIL OF LANGUAGE. 3.00 points.

This course gives students an introduction to various topics in the Philosophy of Language

PHIL UN2702 Contemporary Moral Problems. 3 points.

Questions about how people should act have historically been central to philosophy. This course introduces students to philosophy through an examination of some important moral problems that arise in the twenty-first century. The aim is not only to offer ideas for thinking through the issues covered, but also to provide tools for general moral reflection. Topics covered will include: the legitimacy of asking migrants to abandon their traditional practices, responsibilities to distant people and to future generations, abortion and genetic testing of the unborn, the proper treatment of animals, and the permissibility of war and terrorism.

PHIL UN3000 BUDDHIST PHILOSOPHY. 3.00 points.

Buddhist philosophers generally agree about what doesn't exist: an enduring, unitary, and independent self. But there is surprisingly little consensus across Buddhist traditions about what does exist and what it's like. In this course, we will examine several Buddhist theories about the nature and structure of reality and consider the epistemological and ethical implications of these radically different pictures of the world. We will analyze and evaluate arguments from some of the most influential Indian Buddhist philosophers from the second to the eleventh centuries, including Nāgārjuna, Vasubandhu, Dignāga, Candrakīrti, Śāntarakṣita, Śāntideva, and Ratnakīrti. Topics will include the existence and nature of the external world, the mind, and the self; practical and epistemological implications of the Buddhist no-self principle; personal identity; the problem of other minds; and causal determinism and moral responsibility

PHIL UN3121 Plato. 3 points.

Prerequisites: One philosophy course or permission of the instructor. Introduction to Plato's philosophy through analysis of characteristic dialogues.

PHIL UN3131 ARISTOTLE. 3.00 points.

Prerequisites: One philosophy course or permission of the instructor. Introduction to Aristotle's philosophy through analysis of selected texts.

PHIL UN3237 LATE MEDIEVAL # MODERN PHILOS. 3.00 points.

Prerequisites: One philosophy course or permission of the instructor. Study of one or more of the major philosophers from the Renaissance through the 18th century. Sample topics: substance and matter; bodies, minds, and spirits; identity and individuation; ideas of God; causation; liberty and necessity; skepticism; philosophy and science; ethical and political issues. Sample philosophers: Descartes, Spinoza, Leibniz, Conway, Locke, Berkely, Hume, Kant.

PHIL UN3248 Darwin. 3 points.

Darwin's theory of evolution by natural selection has been revolutionary, not just for scientists but for everyone who reflects on human nature and human destiny. The first aim of this course is to separate Darwin's own theory from its scientific, religious, and cultural aftershocks, and to consider how its influence developed and changed over the century and a half since *On the Origin of Species* was published in 1859. After careful consideration of Darwin's own life and historical context, we will read our way through the *Origin*, and then consider reactions to it starting Darwin's own day, proceeding through the "Modern Synthesis," and ending in our present moment. The final sessions of the course will explore Darwin's impact on contemporary philosophical debates over faith, ethics, and scientific knowledge.

PHIL UN3251 Kant. 3 points.

Explores the connections between theoretical and practical reason in Kant's thinking with special attention to the Critique of Pure Reason and the project of "transcendental" philosophy.

Spring 2024: PHIL UN3251

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 3251	001/00016	M W 11:40am - 12:55pm 405 Milbank Hall	Frederick Neuhouser	3	53/80

PHIL UN3252 Philosophy of Language and Mind. 3 points.

This course will provide an introduction to meaning, reference, understanding, and content in language, thought, and perception. A central concern will be the question of the relation of meaning to truth-conditions, and what is involved in language and thought successfully latching on to reality. If you have not already taken an elementary course in first order logic, you will need to catch up in that area to understand some crucial parts of the course. All the same, the primary concerns of the course will be philosophical, rather than technical.

PHIL UN3264 19TH CENTURY PHILOSOPHY: HEGEL. 3.00 points.

Prerequisites: Phil UN2201 or PHIL UN3251

Prerequisites: Phil UN2201 or PHIL UN3251 Examines major themes of Hegel's philosophy, with emphasis on social and political thought. Topics include Hegel's critique of Kant, the possibility of metaphysics, the master-slave dialectic, and the role of freedom in a rational society. Readings from Kant's Third Critique help explain how Hegel's project develops out of Kant's transcendental idealism. Some knowledge of Kant's moral theory and his Critique of Pure Reason is presupposed. Prerequisite: at least one of PHIL UN2201, PHIL UN2301, or PHIL UN3251

PHIL UN3278 Nietzsche. 3 points.

Prerequisites: one prior course in the history of philosophy (either ancient or modern).

An examination of major themes in Nietzsche's thought. Topics include the philosophical significance of Greek tragedy, the nature of truth, the possibility of knowledge, the moral and metaphysical content of Christianity, the death of God, perspectivism, eternal recurrence, and the power to will.

PHIL UN3351 PHENOMENOLOGY # EXISTENTIALISM. 3.00 points.

Prerequisites: Two prior philosophy courses. Enrollment limited to 30. Survey of selected works of Husserl, Heidegger, Sartre, and Merleau-Ponty. Topics include intentionality, consciousness and self-consciousness, phenomenological and hermeneutical method, the question of being, authenticity and inauthenticity, bad faith, death, and the role of the body in perception.

PHIL 3351	001/00017	M W 10:10am - 11:25am LI104 Diana Center	Taylor Carman	3.00	36/50

PHIL UN3352 Twentieth Century European Philosophy. 3 points.

Prerequisites: one prior philosophy course.

Reading and discussion of selected texts by central figures in phenomenology, existentialism, hermeneutics, critical theory, and recent Continental philosophy. Authors may include Heidegger, Sartre, Merleau-Ponty, Gadamer, Horkheimer, Adorno, Foucault, Bourdieu.

PHIL UN3353 EUROPEAN SOCIAL PHILOSOPHY. 3.00 points.

Prerequisites: one philosophy course.

Prerequisites: one philosophy course. A survey of European social philosophy from the 18th to the 20th century, with special attention to theories of capitalism and the normative concepts (freedom, alienation, human flourishing) that inform them. Also: the relationship between civil society and the state

PHIL UN3751 POLITICAL PHILOSOPHY. 3.00 points.

Six major concepts of political philosophy including authority, rights, equality, justice, liberty and democracy are examined in three different ways. First the conceptual issues are analyzed through contemporary essays on these topics by authors like Peters, Hart, Williams, Berlin, Rawls and Schumpeter. Second the classical sources on these topics are discussed through readings from Hobbes, Locke, Hume, Marx, Plato, Mill and Rousseau. Third some attention is paid to relevant contexts of application of these concepts in political society, including such political movements as anarchism, international human rights, conservative, liberal, and Marxist economic policies as well as competing models of democracy

PHIL UN3752 Philosophy of Law. 3 points.

This course explores philosophical reflection on the relationship between law, society and morality. We discuss the nature of law, the nature of legal reasoning, the relationship between law and social policy, and central concepts in civil and criminal law. Readings are drawn from such sources as the natural law tradition, legal positivism, legal realism, and Critical Legal Theory. Readings will be supplemented by analysis of classic cases.

PHIL UN3756 Critical Philosophy of Race: What is Race?. 3.00 points.

This course is a philosophical examination of the meaning and significance of the concept of race. The course will chiefly aim to answer: What do we mean by the term "race"? And why is it often tied to the existence of racism? From where does the concept come? And what role did "race" play in the philosophical thought and the culture of Western modernity? Among the questions that can be asked are, How do concepts of race contribute to the formation and justification of various economic, political, and social institutions and practices, such as slavery, colonialism, and segregation? However, we will also inquire at the end of the course whether "race" is always a destructive concept, or whether it can be re-defined as part of a liberation project centered on racial identity: the appreciation and celebration of racial difference and solidarity

PHIL UN3768 ALLIES, ADVOCATES, ADVERSARIES. 3.00 points.

This course will survey political and epistemological questions that are centered around living in a society with oppression, including: What is oppression? What does it mean to be an ally? When is it right to speak for others and advocate for their interests? Do we have a duty to dissent and protest under certain circumstances? What is solidarity and how can we act in solidarity with others?

PHIL UN3769 LIVING, DYING, AND THE MEANING OF LIFE. 3.00 points.

Bringing together scholars from the fields of Philosophy, Medicine, Ethics, and Religion, this course exposes students to modes of inquiry that can help to answer central questions that are often elusive and/or unconsidered: What constitutes a good human life? What do I need to be truly happy? How does the fact that I will one day die impact how I should live today? This interdisciplinary course provides a rare opportunity to consider how a wide variety of thinkers and writers have approached these questions, while also engaging with them in a personal way within our contemporary context. Lectures will be combined with group discussion and a weekend retreat, creating possibilities for interpersonal engagement and deep learning

PHIL UN3800 PHILOSOPHY, JUSTICE AND SOCIAL ACTIVISM. 4.00 points.

In his Theses on Feuerbach, Karl Marx writes, "Philosophers have only interpreted the world in various ways; the point is to change it." The questions to ask in response to Marx's exhortation include: how do we recognize the need for change and appropriately effect it? What are the relations between our goals and the means to them? How can we better understand our goals to make the means more suitable? When we organize to produce results, what are we doing? Do we know exactly who and what we want to change? What are the "ethics of process"? What exactly do we do when we organize? A tentative definition: to organize is to bring together individuals who have common interests in a way that will enhance their power. What kind of power is this? What other forms of power are there? What is the best form of coordinating among individuals? If we better understand the dynamics of organizing, should we reconceive our goals accordingly? How do we better tap into shared values and concerns? What temptations and distractions get in the way of our goals? What problems prevent us from achieving them? Do we have goals that can be achieved? If not, how can we revise them?

PHIL UN3840 The Nature and Significance of Animal Minds. 3 points.

Humans have a complicated relationship with other animals. We love them, befriend them and save them. We hunt, farm and eat them. We experiment on and observe them to discover more about them and to discover more about ourselves. For many of us, our pets are amongst the most familiar inhabitants of our world. Yet when we try to imagine what is going on in a dog or cat's mind—let alone that of a crow, octopus or bee—many of us are either stumped about how to go about this, or (the science strongly suggests) getting things radically wrong. Is our thought about and behavior towards animals ethically permissible, or even consistent. Can we reshape our habits of thought about animals to allow for a more rational, richer relationship with the other inhabitants of our planet? In this course, students will reflect on two closely intertwined questions: an ethical question, what sort of relationship ought we to have with animals?; and a metaphysical question, what is the nature of animal minds? Readings will primarily be from philosophy and ethics and the cognitive sciences, with additional readings from literature and biology. There are no prerequisites for this class—it will be helpful but certainly not necessary to have taken previous classes in philosophy (especially ethics and philosophy of mind) or in cognitive science.

PHIL UN3841 Advanced Introduction to Aesthetics: Philosophy of the Image. 3 points.

This course is an advanced introduction to philosophical aesthetics focused primarily on (modern and contemporary art, film, and literary length works), thinkers, and traditions. Students will leave having read at least one

PHIL UN3851 IF I WERE YOU: IDENTITY, ESSENCE, LIMITS OF MODAL VARIATION. 3.00 points.

This course will be devoted to the topic of being other than oneself and the metaphysical debate surrounding questions like: What does the possibility of being different from who we are amount to? What does it mean to be someone else? How different from ourselves can we be? Students will be offered analytical and philosophical tools that will help them to rigorously formulate those and related questions, and to think through the nature of modal variation and its boundaries. In the final weeks of the semester, we will explore the application of those theoretical tools to relevant themes in metaphysics of gender. Throughout the seminar, students will be encouraged to think of the implications of our discussion for related debates in philosophy, especially in the epistemology of the modal and counterfactual claims at issue. This course will be most suitable for students who have some background in analytical metaphysics, e.g. Philosophy 3601, "Metaphysics."

PHIL UN3852 PHILOSOPHY OF LITERATURE. 3.00 points.**PHIL UN3855 The Potential and Actual Infinite. 3 points.**

This course examines the concept of infinity throughout the history of western philosophy, looking at how the puzzles that surround the concept led to the construction and defense of many different philosophical positions on the infinite. In particular, we will examine how many different historical figures have attempted (in many different ways) to draw a distinction between what is potentially infinite and what is actually infinite, and further, how this distinction is used in attempts to solve puzzles of the infinite. We move chronologically, starting with Zeno and Aristotle, through the invention of calculi of infinitesimals, to the development of set theory, model theory, and modern mathematical logic. We will also use the tools we develop in our historical investigation to address modern discussions in philosophy about the infinite, such as the debates about supertasks and the limitations of computation. This course has no prerequisites (although having taken Symbolic Logic may be useful), and it serves well as an introduction to philosophy of mathematics because of its chronological presentation. It also intersects with a wide range of topics in other fields, such as mathematics, logic, physics, computer science, religion, and artificial intelligence, which should make it of interest even to those who may not have a strong formal background.

PHIL UN3856 Political Realism and Social Injustice. 3 points.

Rectifying injustice remains a central motivation for social and political thought. The aim of a theory of justice or injustice is often to guide us in dealing with the grave wrongs in our social world. But how should philosophy support the advancement of justice, and what do its moral ideals have to do with the political realities of power and conflict? Do we need an “ideal theory” of a perfectly just society to set the aims of social progress? Can we properly respond to racial and gendered injustices without understanding how they wrong people as members of social groups (e.g. as black Americans, women, etc.)? What limits do our theories face in helping us navigate real political decisions and problems? This course will examine different answers to these questions as well as their substantive consequences for addressing pressing injustices based on race and gender. Our investigations will emphasize the relations between political philosophy, social science, the social construction of identity, and real-world politics.

PHIL UN3857 The Public and the Private. 3 points.

In an era in which government surveillance, hacking, and social media regularly challenge the line between our public and private lives, exploring the nature of the public/private dichotomy is a pressing task. In this course we will explore how philosophers in the Western tradition have understood the contrast between the public and the private beginning with the ancient ideal of the polis as the site of genuine human flourishing and freedom, we will go on to explore the way in which modern thinkers have problematized this ideal in the context of capitalism, mass culture, and modern pluralistic societies.

By engaging with thinkers such as Aristotle, Arendt, Dewey, Rawls, and Habermas, we will ask questions such as: what kind of freedom do we enjoy when we are in public with other people, and what kind of freedom do we enjoy in private? Are both equally valuable? What is the relationship between public opinion and a healthy democracy? How does capitalism and the mass media affect the public sphere? What are the dangers of an impoverished public sphere? Is the very distinction between the public and the private gendered in pernicious ways?

PHIL UN3858 CULTIVATING INDIVIDUALITY. 3.00 points.

Talk about “individuality”, about being (or becoming) “yourself” is all around us. But what exactly does this mean? What is genuine individuality, and how can we develop it, in ourselves (though self-development) and in others (by designing appropriate educational institutions)? What is the relationship between being an individual and being a part of society? Is there a tension between the non-conformism often associated with genuine individuality on the one hand, and the demands of community and good citizenship, on the other? Can educational institutions be designed to fulfill both those demands (to the extent they are distinct)? And how might oppressive social institutions hinder the development of “individuality”? In this course, we will explore these and related questions by drawing on both the classics of philosophy of education (Plato, Rousseau, Nietzsche, Dewey, Du Bois), and on relevant literary material that is in conversation with the philosophical texts (Rilke, Tolstoy, Woolf)

PHIL UN3861 Language # Society. 3.00 points.

Language is our primary means for influencing each other's thoughts and attitudes. Sometimes, we use it to convey information explicitly, and to influence others directly. But sometimes, language is used to convey information implicitly (e.g., in hints, sarcasm and irony), or to shape the opinions of others surreptitiously (e.g., in propaganda). How do these forms of communication work? What distinguishes them? What makes for their success or failure? In this course, we will critically examine some classic theories in the philosophy of language that try to answer these questions. Then, we will turn to recent work that rejects or extends these theories in response to careful examination of the ways in which language can be exploited as a means for manipulation and control

PHIL UN3863 HAPPINESS AND WELL-BEING. 3.00 points.

“What is it to be happy?” Philosophers have passionately debated this question from antiquity until now. Especially in times when happiness seems difficult to find, we naturally want to know what happiness is and how best to secure it. In this course, we will consider happiness in relation to well-being, examining four major theories of well-being (hedonism, desire-fulfillment theories, objective list theories, and eudaimonism/perfectionism). We will gain a nuanced understanding of each view by juxtaposing their ancient and modern advocates and opponents

PHIL UN3864 Philosophy, Science, and Politics of Learning. 3 points. Not offered during 2023-2024 academic year.

At the broadest level, this course addresses questions, What does it mean to respond to new information in a rational way? How should we update our beliefs in response to evidence? This is a central question in the philosophy of science and epistemology, but it also connects to important issues in social and political philosophy. For example, one's views about what it means to learn in a rational way might inform one's view about the significance of political polarization. Is polarization a sign that certain groups are responding to information in an irrational way? In order to address questions like this, one must first think carefully about what rational responses to inform amount to. This is what we'll do in this course. The course has three parts. In the first part, we will read some classical philosophical texts about the problem of induction. This part of the course will introduce students to some influential concepts from logic (formal learning theory), statistics (Bayesian inference), and computer science and artificial intelligence (PAC learning). Having developed a toolkit for thinking about rational learning, we will, in the third part of the course, turn to some issues in social and political philosophy. In addition to thinking about political polarization, mentioned above, we will ask whether learning based on the testimony of others has any distinctive significance, and we will study the concept of epistemic injustice. The course has no prerequisites. All of the technical concepts will be introduced in a self-contained and elemental way.

PHIL UN3867 Philosophy & Literature: Jane Austen & Moral Philosophy. 3 points.

In the 1790s, when Jane Austen was beginning to write fiction, there was much debate over the value and function of the novel. Some argued that novels were dangerous to their readers, inciting violent emotional responses and corrupting the imagination (*especially* in women and children, who were believed to be more sensitive to such stimuli). Others saw potential in this narrative form, arguing that novels could contribute to the moral and sentimental education of their readers. Adam Smith, for example, claims that “[t]he poets and romance writers, who best paint the refinements and delicacies of love and friendship, and of all other private and domestic affections, Racine and Voltaire; Richardson, Maurivau, and Riccoboni; are, in such cases, much better instructors than Zeno, Chrysippus, or Epictetus” (*Theory of Moral Sentiments* III.3.14). And David Hume argues that there is a kind of moral philosophy that paints virtue and vice rather than anatomizing it. Such philosopher-painters, he says, “make us *feel* the difference between vice and virtue; they excite and regulate our sentiments” (*Enquiry Concerning Human Understanding* 1.1).

In this course, we will keep these questions about one possible function of literature in the back of our minds as we read through four of Austen’s novels. With each novel, we will focus on a specific ethical theme treated in and by that novel: with *Sense and Sensibility* we’ll focus on the role of the emotions in morality; with *Mansfield Park* we’ll focus on questions about moral education and virtue; with *Emma* we’ll focus on the difficulties of accurate discernment and judgment in moral matters; and with *Persuasion* we’ll focus on the relation between the individual and society and the complications caused by differences in gender, class, and social status. Each novel will be paired with selections from authors who were near contemporaries of Austen’s, including Samuel Johnson, David Hume, Jane Collier, Hannah More, Adam Smith, and Mary Wollstonecraft.

Two warnings/things to be aware of: first, this course will require a significant amount of reading; and second, in this course, we will be approaching literature with an interest in philosophical themes and questions. We will occasionally discuss formal and stylistic aspects of Austen’s novels (for example, her use of irony and of a technique referred to as “free indirect discourse”), but these sorts of concerns will not be our main focus

PHIL UN3870 PHILOSOPHY AND ARTIFICIAL INTELLIGENCE. 3.00 points.

Artificial intelligence (AI) promises—or threatens—to transform every area of our lives and societies. It has already begun to upend our understanding of human nature, radically alter our social institutions, and revolutionize scientific practice. And in some circles, there is increasing concern that AI is developing intelligence to rival our own. This course will explore these issues through the philosophy of mind, cognitive science, and ethics. We will ask whether AI systems could have minds like ours, whether they could be conscious, whether they might eventually deserve moral consideration, and how we can use them fairly in our current societies

PHIL UN3912 SEMINAR. 3.00 points.

Required of senior majors, but also open to junior majors, and junior and senior concentrators who have taken at least four philosophy courses. This exploration will typically involve writing a substantial research paper. Capped at 20 students with preference to philosophy majors

PHIL GU4080 PLATO. 3.00 points.

The course offers an advanced introduction to key themes in Plato's philosophy. It is open to undergraduate and graduate students and does not presuppose prior study of Plato. At the end of the semester, students will have the tools and preparation to think independently and critically about Plato's philosophy. Beyond the study of Plato, the course teaches students crucial skills in the history of philosophy, such as the careful reconstruction of arguments, attention to concepts that may not be familiar today, critical discussion of philosophical proposals that were formulated in a foreign language and conceptual scheme, and an awareness of the range of different modes of inquiry and philosophical writing. The class covers three texts that, according to standard relative chronology of Plato's dialogues, are considered "early"—the Protagoras—"middle"—the Phaedo—and "late"—the Sophist. We focus on themes where Plato's arguments and proposals have lasting influence: virtue, the soul, perception, pleasure and pain, the Forms, being and becoming, and truth and falsity. The Protagoras introduces themes that we pursue throughout the semester. What is the soul? How does one become a good person? What is the role of pleasure and pain in a well-lived human life? In the Protagoras, Socrates advances a famous proposal, the so-called unity of the virtues: for someone to have one virtue such as justice or courage, she needs to have all the virtues. The question of how one becomes a good person involves a key distinction in Plato's metaphysics between being and becoming. Presumably, we can only become good, but we can never be good. The Phaedo examines four arguments for the soul's immortality. None of these arguments is presented as conclusive. And yet, Socrates trusts that the soul is immortal and this commitment informs his stance toward his own death. This theme is personal for Socrates, who is awaiting his death penalty. But it involves perennial questions in metaphysics and the philosophy of mind. What is the relation between body and soul? Are perception, pleasure, and pain bodily? Is our own mind the cause of our actions? What, if anything, is the role of mind—nous—in the cosmos? And what is the role of the famous "Forms"? Plato's Sophist belongs to a group of late dialogues that explore, fine-tune, and problematize Plato's earlier proposals, specifically with respect to the Forms, the notions of being and not-being, and the distinction between true and false statements. The interlocutors set out to define sophistry, using a definitional method that Plato develops in several late dialogues. This method is the ancestor of a powerful but contested scientific tool: the division of things into kinds. Finally, we use the Sophist to ask general questions about Plato's dialogues. Why does Plato write dialogues, rather than treatises? What is philosophically distinctive about his method?

PHIL GU4089 Aristotle. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: undergraduate students must obtain the instructor's permission.

The course offers a high-level survey of central themes in Aristotle's ethics: happiness, motivation, agency, excellence, deliberation, pleasure, responses to relativism, and the nature of ethics.

PHIL GU4100 Paradoxes. 3 points.

Various paradoxes, from many areas, including mathematics, physics, epistemology, decision theory and ethics, will be analyzed. The goal is to find what such paradoxes imply about our ways of thinking, and what lessons can be derived. Students will have a choice to focus in their papers on areas they are interested in.

PHIL GU4137 Non-Classical Logics. 3 points.

Not offered during 2023-2024 academic year.

Prerequisites: one term of formal logic (V3411/G4415, Introduction to Symbolic / Formal Logic, or G4801, Mathematical Logic I)

An overview of the main extensions and alternatives to classical logic, including: many-valued logics, fuzzy logics, partial logics, free logics, inclusive logics, paraconsistent logics, modal logics, intuitionism.

Prerequisite: One term of formal logic (V3411/G4415, Introduction to Symbolic/ Formal Logic, or G4801, Mathematical Logic I).

PHIL GU4449 Philosophy of Logic. 3 points.

Prerequisites: PHIL UN3411

This course is an opinionated introduction to the philosophy of logic. Topics covered include logical form, logical constants, logical necessity, the normative role of logic, metaphysical neutrality, justification and reliability, higher-order quantification, the paradoxes, revisions to

logic and to the T-schema, and deflationary pluralism about fundamental logical notions.

PHIL GU4451 History of Philosophy: From De Morgan to Frege. 3 points.

Prerequisites: one term of Symbolic Logic.

The roots of logic may be traced to Aristotle, who systematized and codified the subject in a way that was not significantly surpassed for over two millennia. As we know it today, however, logic stems largely from certain advancements that took place in the mid-nineteenth century, when the subject developed into a rigorous discipline whose exemplar was the exact method of proof used in mathematics.

The aim of this course is to provide a critical reconstruction of such advancements along with an assessment of their philosophical significance.

PHIL GU4490 LANGUAGE AND MIND. 3.00 points.**PHIL GU4491 William James's Principles of Psychology. 3 points.**

The primary goal of this course is to give sufficiently advanced students an opportunity to read through, in its entirety, one of the most influential works in the history of psychology. Although James conceived his two-volume work as an exhaustive scientific account of the mind, its approach is vastly different from contemporary psychology—which, since his time, has generated many subfields and methodologies, and benefitted from advances in related fields, such as computer science, linguistics, evolutionary biology, and neuroscience, to name just a few. Apart from subsequent developments within the mind sciences, another major difference between James's pioneering work and current scientific work is that it is explicitly governed by some concerns that currently belong more to philosophy than to science. These include James's focus on the *phenomenological* dimensions of mind that are open to direct introspection, which are no longer regarded as reliable indicators of mental reality, and his interest in the ethical significance of his findings. Being a pragmatist, he could not help but regard a correct account of the mind as providing a basis for *improvement* of human life, and *right action*.

PHIL GU4495 PERCEPTION. 3.00 points.

This course addresses the fabulously rich range of issues about the nature of perception, including: perceptual mental representation and its content; computational explanation; justifying beliefs; knowledge and thought about perception; and perception of music. Perception is an interdisciplinary subject par excellence. Readings will be drawn from philosophy and psychology, aesthetics, and artificial intelligence

PHIL GU4561 PROBABILITY & DECISION THEORY. 3.00 points.

Examines interpretations and applications of the calculus of probability including applications as a measure of degree of belief, degree of confirmation, relative frequency, a theoretical property of systems, and other notions of objective probability or chance. Attention to epistemological questions such as Hume's problem of induction, Goodman's problem of projectibility, and the paradox of confirmation

Fall 2023: PHIL GU4740

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PHIL 4740	001/14108	T 4:10pm - 6:00pm 417 Mathematics Building	Souleymane Diagne	3	27/40

PHIL GU4763 Feminist, Social and Political Philosophy of Language. 3.00 points.

This course explores different ways in which social and political settings affect our language – what we can do with our words and what our words mean – as well as ways in which our language affects our social and political setting – the effects of people saying things, or saying things using certain words, or words with specific meanings. Topics and texts may vary with instructor and semester

PHIL GU4810 LATTICES AND BOOLEAN ALGEBRA. 3.00 points.

Prerequisites: PHIL UN3411 or 4801

Prerequisites: PHIL UN3411 or 4801 This course is designed as an introduction to lattices and Boolean algebras. In the first part of the course, we study partial orders and view lattices both as partial orders and as algebraic structures. We study some basic constructions involving sublattices, products of lattices, and homomorphic images of lattices. In the second part of the course, we study Boolean algebras, with an aim to proving several representation theorems: first, a representation theorem for finite Boolean algebras, and toward the end of the course, the famous Stone Representation Theorem. We end the course with a look at the connection between classical mereology (or the theory of parthood) and complete Boolean algebras

PHIL GU4900 TOPICS IN EARLY MODERN PHILOSOPHY. 3.00 points.

Open to undergraduates with previous work in the history of philosophy and to graduate students. Focuses either on an important topic in the history of early modern philosophy (e.g. skepticism, causation, mind, body) or on the philosophy of a major figure in the period (e.g. Descartes, Leibniz, Spinoza, Gassendi, Conway)

PHIL GU4910 Topics in Metaphysics. 3 points.

Not offered during 2023-2024 academic year.

Description forthcoming.

Department Administrative Assistant: Rebecca Perrington

Mission

The mission of the Physics and Astronomy Department at Barnard College is to provide students with an understanding of the basic laws of nature, and a foundation in the fundamental concepts of classical and quantum physics, and modern astronomy and astrophysics.

Majors are offered in physics, astronomy, or in interdisciplinary fields such as, astrophysics, biophysics, or chemical physics. The goal of the department is to provide students (majors and non-majors) with quality instruction and prepare them for various post-graduate career options, including graduate study in physics and/or astronomy, professional careers in science, technology, education, or applied fields, as well health-related professions. The department strives to be a source of distinguished women scientists. The faculty in the department maintain NSF or NASA-sponsored active research programs that involve undergraduate students. All majors engage in at least one summer of independent research that is often continued during the semester, or the following summer. Students may also carry out their research at other institutions nationally, through NSF-REU (Research Experience for Undergraduates) programs. Students are required to present the results of their research in the annual departmental "Senior Talks," held in May.

Student Learning Goals

- Acquire a strong intellectual foundation in physics and/or astronomy.
- Apply scientific thinking to problems in physics and/or astronomy, and translate this to real life problems.
- Use mathematics to describe and manipulate abstract concepts in physics and/or astronomy.
- Perform laboratory experiments to study various physical phenomena, and use statistical approaches to analyze and interpret the data obtained in these experiments.
- Acquire effective oral and written presentation skills to communicate scientific ideas.
- Participate in a research project and stimulate the ability of empirical thought.
- Demonstrate the ability to give a scientific talk on a research topic.

Student Learning Outcomes

Upon successfully completing the major, students should have the ability to:

- demonstrate a conceptual understanding of the physical laws of nature.
- demonstrate a thorough knowledge of the various subject areas of physics (e.g. classical mechanics, quantum physics, electromagnetism, and thermodynamics) and/or astronomy (e.g. stellar structure and evolution, physics of the solar system, physical cosmology, and observational astronomy).
- apply problem-solving skills beyond graduation in advanced physics and/or astronomy courses in graduate school and independent research projects.
- apply problem-solving and computation skills in future situations in applied or technical jobs, or careers in finance and industry.
- make an effective oral presentation to an audience of peers and faculty on a particular research topic.

From Aristotle's *Physics* to Newton's *Principia*, the term "physics," taken literally from the Greek φυσικς (= Nature), implied natural science in its

very broadest sense. Physicists were, in essence, natural philosophers, seeking knowledge of the observable phenomenal world. Astronomy originally concentrated on the study of natural phenomena in the heavens with the intent to understand the constitution, relative positions, and motions of the celestial bodies in our universe. Though practitioners of these disciplines have become somewhat more specialized in the past century, the spirit that guides them in their research remains the same as it was more than two millennia ago.

In cooperation with the faculty of the University, Barnard offers a thorough pre-professional curriculum in both physics and astronomy. The faculty represents a wide range of expertise, with special strength and distinction in theoretical physics, condensed matter physics, and observational astrophysics.

Separate majors in physics and astronomy are offered. A major in astrophysics is also possible. Furthermore, there are many special interdisciplinary majors possible, such as biophysics, chemical physics, engineering physics, and mathematical physics. There is a physics minor as well. Students should consult members of the department early on in their undergraduate careers in order to plan the most effective course of study. Qualified seniors are invited to participate in the seniors honors program, in which they carry out a year-long research project leading to the thesis.

There are several quite distinct introductory sequences in physics, only one of which may be taken for credit:

1. PHYS UN1001 PHYSICS FOR POETS - PHYS UN1001 PHYSICS FOR POETS is a lecture course in physics intended for liberal arts students. A semester of this CU lecture course satisfies the BC Quantitative Reasoning requirement. Note, however, that 1001-2 does not satisfy the premedical nor physics requirement for any major. It should also not be taken to satisfy the BC lab science requirement.
2. PHYS UN1201 GENERAL PHYSICS I - PHYS UN1202 GENERAL PHYSICS II is satisfactory preparation for medical school and is appropriate for most non-science major premedical students. This course is taught at Columbia in a large lecture hall setting. It is not recommended as a foundation for more advanced work in the field. Taken in conjunction with PHYS UN1291 GENERAL PHYSICS I LAB - PHYS UN1292 GENERAL PHYSICS II LABORATORY, this sequence does satisfy the college LAB requirement, but the student population is essentially premed. Note that PHYS UN1201 GENERAL PHYSICS I / PHYS UN1202 GENERAL PHYSICS II are required in order to take the lab course.
3. PHYS BC2001 MECHANICS - LECTURE LAB - PHYS BC2002 ELECTRICITY#MAGNETISM-LEC LAB, PHYS BC3001 CLASSICAL WAVES - LECTURE LAB is Barnard's own three-semester, calculus based introductory sequence in physics. Characterized by modest class sizes, it is designed specifically for Barnard women with a serious interest in any of the natural sciences or mathematics. Moreover, it is especially appropriate for majors in physics, chemistry, or biochemistry, whether premedical or not. Biology majors with some calculus background are also encouraged to take this sequence. Finally, Barnard women contemplating a major in physics or astronomy should take PHYS BC2001 MECHANICS - LECTURE LAB - PHYS BC2002 ELECTRICITY#MAGNETISM-LEC LAB in their first year, if possible, or in their second at the latest, to be followed by the third-semester course, Classical Waves and Optics.
4. First-year students with exceptional aptitude for physics (as evidenced, for example, by scores of 4 or 5 on the advanced

placement C exam) and a good mathematical background may be admitted into the Columbia-taught two-semester sequence PHYS UN2801 ACCELERATED PHYSICS I - PHYS UN2802 ACCELERATED PHYSICS II, which replaces all three terms of the sequence for majors. Students considering this sequence are strongly encouraged to consult a Barnard faculty member at the start of the term.

Students unsure about the most appropriate sequence should consult members of the department.

The following courses may be substituted for each other:

PHYS BC2001 MECHANICS - LECTURE LAB-PHYS BC2002 ELECTRICITY#MAGNETISM-LEC LAB (sect.1; 4.5pts) = PHYS UN1601 PHYSICS I:MECHANICS/RELATIVITY - PHYS UN1602 PHYSICS II: THERMO, ELEC # MAG (3.0pts.) + PHYS BC2001 MECHANICS - LECTURE LAB - PHYS BC2002 ELECTRICITY#MAGNETISM-LEC LAB (sect.3; 1.5pts.)
 PHYS BC3001 CLASSICAL WAVES - LECTURE LAB (sect.1; 5pts) = PHYS UN2601 PHYSICS III:CLASS/QUANTUM WAVE (3.0pts) + PHYS BC3001 CLASSICAL WAVES - LECTURE LAB(sect.3; 2pts)
 ASTR BC1753 LIFE IN THE UNIVERSE - ASTR BC1754 Stars, Galaxies, and Cosmology = ASTR UN1403 EARTH, MOON, AND PLANETS - ASTR C1404 Stars, Galaxies, and Cosmology

Chair: Janna Levin (Claire Tow Professor of Physics & Astronomy)

Professors: Timothy Halpin-Healy (Ann Whitney Olin Professor), Laura Kay, Janna Levin (Claire Tow Professor of Physics & Astronomy), Reshmi Mukherjee (Helen Goodhart Altschul Professor),

Lab Director: Stilian Savin

Other officers of the University offering courses listed below:

Professors: James Applegate, Norman Christ, Brian Cole, Arlin Crotts, Charles Hailey, Jules Halpern, Tony Heinz, David Helfand, Robert Mawhinney, John Parsons, Frederik Paerels, Joseph Patterson, Michael Shaeviz, Michael Tuts, Jacqueline van Gorkom, William Zajc

Associate Professors: Greg Bryan, Zoltan Haiman, Kathryn Johnson, Kristen Menou, David Schiminovich

Adjunct Professors: Burton Budick, Morgan May

Requirements for the Astronomy Major

The courses required for the major in astronomy are as follows:

PHYS BC2001	MECHANICS - LECTURE LAB *	4.5
PHYS BC2002	ELECTRICITY#MAGNETISM-LEC LAB *	4.5
PHYS BC3001	CLASSICAL WAVES - LECTURE LAB *	5
ASTR UN2001 - ASTR UN2002	INTRO TO ASTROPHYSICS I and INTRO TO ASTROPHYSICS II	6
Students are required to take four 3000-level ASTR or PHYS courses, and selected so that at least six total points of 3000-level lecture classes are ASTR courses. Of those four 3000-level course, at least one should be		
PHYS UN3003	MECHANICS	3.00
or		
ASTR UN3102	Planetary Dynamics and Physics of the Solar System	3

Some of the ASTR courses offered in recent years include:

ASTR UN3101	MODERN STELLAR ASTROPHYSICS	3.00
ASTR UN3103	GALAXIES	3
ASTR UN3105	EXOPLANETS AND ASTROBIOLOGY	3

ASTR UN3602	PHYSICAL COSMOLOGY	3
ASTR UN3273	HIGH ENERGY ASTROPHYSICS	3
ASTR UN3646	OBSERVATIONAL ASTRONOMY	3
ASTR C3601	General Relativity, Black Holes, and Cosmology	3

* **This is a 9 course minimum for the standard major described above.**

Students planning to study astronomy or astrophysics in graduate school are strongly urged to take PHYS U3003, 3007-8, 3006, GU4023, and some additional courses in Computer Science. We recommend W1004 (Java), Engineering E1006 (Python), COMS BC1016 (Intro to Computational Thinking), EESC BC3050 (Big Data with Python), or ASTR GU4260 (Modeling the Universe). Note: If the required courses are not offered for some reason, the department will recommend appropriate substitutions.

Students are encouraged to take the calculus I-IV sequence since calculus courses will be pre-requisites to many of the upper-level classes. Other Calculus options include Honors Math A-B, Accelerated Multivariable Calculus, and Multivariable Calculus for Engineering and Applied Science. Additional work in mathematics is recommended; e.g. Math UN1210: Linear Algebra, APMA E3102: Applied Mathematics II.

Substitutions:

While we recommend students take the Barnard sequence, in lieu of the two introductory courses BC2001 & 2002, a 2-semester Columbia introductory sequence acceptable for the physics major in Columbia College can be substituted (e.g. PHY UN1601-2) combined with BC2009 and BC2019, which are the lab only sections for the Barnard introductory sequence. If you choose to take the 2-semester Columbia sequence, please consult with an advisor in the Barnard Physics and Astronomy department as soon as possible. Note that PHY UN1201-2 is not acceptable for the major.

If a student opts to take the accelerated 2-semester Columbia College sequence PHY UN2801-2, we strongly encourage that student to seek advice from the Chair of the Barnard Physics and Astronomy Department to determine the remainder of required courses for the major.

Students who have taken two 1000 level courses may substitute an additional 3000-level course for ASTR UN2001-2.

Any other substitutions to the major may require a Degree Audit Change. A student should seek advice from their Astronomy advisor and/or the Chair of the Barnard Physics and Astronomy Department.

Requirements for the Physics Major

The courses required for the major in physics are:

PHYS BC2001	MECHANICS - LECTURE LAB *	4.5
PHYS BC2002	ELECTRICITY#MAGNETISM-LEC LAB *	4.5
PHYS BC3001	CLASSICAL WAVES - LECTURE LAB *	5
PHYS BC3006	QUANTUM PHYSICS (LECTURE + LAB)	3
PHYS UN3003	MECHANICS	3
PHYS UN3007	ELECTRICITY-MAGNETISM	3
PHYS UN3008	ELECTROMAGNETIC WAVES # OPTICS	3
PHYS GU4023	THERMAL # STATISTICAL PHYSICS	3

Also required are 6.0 points total of advanced lab work, preferably:

PHYS BC3086 - PHYS BC3088	QUANTUM PHYSICS LABORATORY and ADV ELECTROMAGNETISM LAB (taken concurrently with their cognate lecture courses, which are PHYS BC3006 and PHYS UN3007 respectively.)	6
------------------------------	--	---

Alternatively, in lieu of PHYS BC3088, students may opt for Electronics Lab PHYS UN3083 or a 3pt combination of PHYS UN3081 and PHYS BC3082.

The student must take a Computer Science class. We recommend		3
COMS W1004	Introduction to Computer Science and Programming in Java	3
COMS W1005	Introduction to Computer Science and Programming in MATLAB	3
ENGI E1006	INTRO TO COMP FOR ENG/APP SCI	3.00
ASTR GU4260	MODELING THE UNIVERSE	3.00
EESC BC3050	BIG DATA WITH PYTHON	3
COMS BC1016	Introduction to Computational Thinking and Data Science	3.00
PHYS UN3083	ELECTRONICS LABORATORY	3

* This is an 11 course minimum for the standard major described above.

Students planning to study Physics in graduate school are strongly encouraged to include 4000-level electives in their program. Students are expected to complete the calculus I-IV sequence by the end of the second year, as Calculus courses will be pre-requisites to many of the upper-level classes. Other Calculus options include Honors Math A-B, Accelerated Multivariable Calculus, and Multivariable Calculus for Engineering and Applied Science. Additional work in mathematics is recommended; e.g. Math UN1210: Linear Algebra, APMA E3102: Applied Mathematics II.

Substitutions:

While we recommend students take the Barnard sequence, in lieu of the two introductory courses BC2001 & 2002, a 2-semester Columbia introductory sequence acceptable for the physics major in Columbia College can be substituted (e.g. PHY UN1601-2) combined with BC2009 and BC2019, which are the lab only sections for the Barnard introductory sequence. If you choose to take the 2-semester Columbia sequence, please consult with an advisor in the Barnard Physics and Astronomy department as soon as possible. Note that PHY UN1201-2 is not acceptable for the major.

If a student opts to take the accelerated 2-semester Columbia College sequence PHY UN2801-2, we strongly encourage that student to seek advice from the Chair of the Barnard Physics Department to determine the remainder of required courses for the major.

Any other substitutions to the major may require a Degree Audit Change. A student should seek advice from their Physics advisor and/or the Chair of the Barnard Physics Department.

NOTE: A Physics major pursuing a Math Sciences minor should take electronics lab; otherwise, two distinct COMS courses are necessary.

Interdisciplinary Major

Special majors in, for example, astrophysics, biophysics, chemical physics, engineering physics, or mathematical physics are all possible and are arranged in conjunction with the relevant second department at Barnard. A student interested in such possibilities should speak to a faculty member early on (i.e., by late fall of her sophomore year) in order to permit the most effective construction of her program of study and the appropriate petition to be made to the Committee on Programs

and Academic Standing. The latter is a straightforward procedure associated with the declaration of all special majors at Barnard.

Requirements for the Physics Minor

Five courses are required for the minor in physics. They are: any three-semester introductory sequence acceptable for the major (see above) plus two additional 3-point courses at the 3000-level.

Requirements for the Astronomy Minor

2 semesters of Physics with Lab (7-9 pts)

*Students who are majoring in science can omit one semester of 1-1.5 pts of Physics Lab.

4 courses in astronomy or astrophysics at the 2000 level or above. (12 pts)

*One of these courses can be replaced by two 1000-level Astronomy courses.

*An additional 3 pts of physics at the 3000 level or above can substitute for 3 points of astronomy.

Astronomy Courses

ASTR BC1753 LIFE IN THE UNIVERSE. 3.00 points.

An introductory course intended primarily for nonscience majors. This interdisciplinary course focuses on the subject of Life in the Universe. We will study historical astronomy, gravitation and planetary orbits, the origin of the chemical elements, the discoveries of extrasolar planets, the origin of life on Earth, the evolution and exploration of the Solar System, global climate change on Venus, Mars and Earth, and the Search for Extraterrestrial Life (SETI). You cannot receive credit for this course and for ASTR UN1403 or ASTR UN1453. Can be paired with the optional Lab class ASTR UN1903

Spring 2024: ASTR BC1753

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
ASTR 1753	001/00347	T Th 2:40pm - 3:55pm 202 Altschul Hall	Nicholas Luber	3.00	129/120

ASTR BC1754 Stars, Galaxies, and Cosmology. 3 points.

BC: Fulfillment of General Education Requirement: Quantitative and Deductive Reasoning (QUA).

Prerequisites: Recommended preparation: A working knowledge of high school algebra.

Corequisites: Suggested parallel laboratory course: ASTR C 1904y. Examines the properties of stars, star formation, stellar evolution and nucleosynthesis, the Milky Way and other galaxies, and the cosmological origin and evolution of the universe. Students may not receive credit for both ASTR BC 1754 and ASTR C1404.

ASTR UN1234 UNIVERSAL TIMEKEEPER. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: high school algebra and latent curiosity are assumed. The goal of the course is to illustrate — and perhaps even inculcate — quantitative and scientific reasoning skills. The subject material employed in this task is the study of atoms and their nuclei which, through a wide variety of physical and chemical techniques, can be used to reconstruct quantitatively the past. Following an introduction to atoms, light, and energy, we will explore topics including the detection of art forgeries, the precise dating of archeological sites, a reconstruction of the development of agriculture and the history of the human diet, the history of past climate (and its implications for the future), the history and age of the Earth, and the history of the Universe. The course has no required text. Readings of relevant articles and use of on-line simulations will be required.

ASTR UN1403 EARTH, MOON, AND PLANETS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. The overall architecture of the solar system. Motions of the celestial sphere. Time and the calendar. Major planets, the earth-moon system, minor planets, comets. Life in the solar system and beyond. This course is similar to ASTR BC 1753. You cannot enroll in both courses and receive credit for both

ASTR UN1404 STARS, GALAXIES # COSMOLOGY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Distances to, and fundamental properties of, nearby stars; nucleosynthesis and stellar evolution; novae and supernovae; galaxies; the structure of the universe and theories concerning its origin, evolution, and ultimate fate. You can only receive credit for ASTR UN1404 if you have not taken ASTR BC1754, ASTR UN1420 or ASTR UN1836

ASTR UN1420 Galaxies and Cosmology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Galaxies contain stars, gas dust, and (usually) super-massive black holes. They are found throughout the Universe, traveling through space and occasionally crashing into each other. This course will look at how these magnificent systems form and evolve, and what they can tell us about the formation and evolution of the Universe itself. You cannot enroll in ASTR UN1420 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both.

ASTR UN1453 ANOTHER EARTH. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

This course cannot be taken for credit if BC1753 has been taken.

This course will explore the unique properties of Earth, compared to other planets in the Solar System, and the possibility of Earth-like planets around other stars. The basics of the Solar System, gravity, and light will be covered, as well as the geology and atmospheres of the terrestrial planets. The properties of Earth that allowed life to develop and whether life can develop on other planets will be discussed. Finally, the discovery of planets beyond our Solar System and the likelihood of another Earth will be a key component of the course

ASTR UN1610 THEOR-UNIVERS:BABYLON-BIG BANG. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Milestones in the science of cosmology over the past 6000 years. Skylore and observation in ancient cultures. The twin revolutions of the Greeks: Pythagoras and Ptolemy; and Aristotle, Aquinas, and the Great Chain of Being. The scientific revolution: the impersonal and deterministic world-order of Newton, Laplace, and Kelvin. The erosion of that world-order by mathematics and experiment in the 20th century (relativity, quantum physics, dark matter, and the expanding universe). Today's searches for a new grand order in the Universe, which can cope - or maybe not - with these blows to yesterdays comfortable wisdom

ASTR UN1836 STARS AND ATOMS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: recommended preparation: a working knowledge of high school algebra.

Prerequisites: recommended preparation: a working knowledge of high school algebra. What is the origin of the chemical elements? This course addresses this question, starting from understanding atoms, and then going on to look at how atoms make stars and how stars make atoms. The grand finale is a history of the evolution of the chemical elements throughout time, starting from the Big Bang and ending with YOU. You cannot enroll in ASTR UN1836 in addition to ASTR BC1754 or ASTR UN1404 and receive credit for both

ASTR UN3101 MODERN STELLAR ASTROPHYSICS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. Introductory astronomy is not required, but some exposure to astronomy is preferable. In the first half of the course, we will examine the physics of stellar interiors in detail, leading us to develop models of stellar structure and consider how stars evolve. In the second half of the course, we will discuss special topics, such as pre-main sequence evolution, the late stages of stellar evolution, and supernovae and compact objects.

ASTR UN3102 Planetary Dynamics and Physics of the Solar System. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based Physics. The physics and astrophysics of planets, comets, asteroids, natural and artificial satellites, and pretty much anything in the Solar System - including the Sun. Detailed study of the Earth's atmosphere and oceans: circulations, climate, and weather. Orbital dynamics. The emerging science of extrasolar planets. The origin, evolution, and eventual fate of planets.

ASTR UN3103 GALAXIES. 3.00 points.

Prerequisites: one year of calculus-based general physics.
 Prerequisites: one year of calculus-based general physics. Galaxies fill the universe with structure. They are bound objects that harbor stars, gas, dust and dark matter. This course will discuss the content and structure of galaxies. It will start with the Milky Way, a rotating spiral galaxy, with a particular emphasis on the properties of the interstellar medium. Dwarf galaxies, the building blocks of larger galaxies, will subsequently be discussed, followed by spiral, elliptical and irregular galaxies. The formation and evolution of these different galaxy types will be an important focus of the course, as well as the environment in which the galaxies reside. We will intersperse reviews of current papers on galaxies throughout the semester

ASTR UN3105 EXOPLANETS AND ASTROBIOLOGY. 3.00 points.

Prerequisites: One year of calculus-based physics.
 The emerging field of extrasolar planets and astrobiology will be covered at a quantitative level, with a major emphasis on astrophysical phenomena and techniques. The subject will be introduced through an investigation of current planetary formation theories and approaches to planet detection, including what we currently know about extrasolar planets and detailed reference to state-of-the-art studies. An astronomer's view of the origin of life and extreme biology will be developed and applied to questions of cosmo-chemistry, observable life-signatures, habitable zones and other astrophysical constraints on the development of organisms.

ASTR UN3106 The Science of Space Exploration. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one semester course in introductory astronomy or astrophysics (e.g., ASTR UN1403, ASTR UN1404, ASTR UN1420, ASTR UN1836, ASTR UN2001, ASTR UN2002, ASTR BC1753, ASTR BC1754). Ability in mathematics up to and including calculus is strongly urged. How and why do humans explore space? Why does it require such extraordinary effort? What have we found by exploring our Solar System? We investigate the physics and biological basis of space exploration, and the technologies and science issues that determine what we can accomplish. What has been accomplished in the past, what is being explored now, and what can we expect in the future? How do space scientists explore the Solar System and answer science questions in practice? What do we know about solar systems beyond our own?

ASTR UN3273 HIGH ENERGY ASTROPHYSICS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. No previous, \nastronomy background required.

A survey of the most energetic and explosive objects in the Universe and their radiation. Topics include: techniques of X-ray and gamma-ray astronomy; observations of neutron stars (pulsars) and black holes; accretion disks and relativistic jets; supernovae, supernova remnants, gamma-ray bursts, quasars and active galactic nuclei; clusters of galaxies; cosmic rays and neutrinos.

ASTR UN3602 PHYSICAL COSMOLOGY. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics.
 Prerequisites: one year of calculus-based general physics. The standard hot big bang cosmological model and modern observational results that test it. Topics include the Friedmann equations and the expansion of the universe, dark matter, dark energy, inflation, primordial nucleosynthesis, the cosmic microwave background, the formation of large-scale cosmic structures, and modern cosmological observations

ASTR UN3646 OBSERVATIONAL ASTRONOMY. 3.00 points.

Prerequisites: one year of general astronomy
 Prerequisites: one year of general astronomy Introduction to the basic techniques used in obtaining and analyzing astronomical data. Focus on ground-based methods at optical, infrared, and radio wavelengths. Regular use of the telescope facilities atop the roof of the Pupin Labs and at Harriman Observatory. The radio-astronomy portion consists mostly of computer labs, In research projects, students also work on the analysis of data obtained at National Observatories

ASTR UN3985 Statistics and the Universe (Seminar). 3 points.

Prerequisites: First year calculus required, introductory physics or astronomy

Essential statistical methods will be applied in a series of case studies and research projects taken from the latest advances in cosmology, astronomy and physics. Statistics of measurement and detection, fundamentals of hypothesis testing, classifications, data modeling, time-series analysis, correlation and clustering will be explored through hands-on investigation using data from recent experiments and surveys.

ASTR UN3996 Current Research in Astrophysics. 1 point.

Prerequisites: two semesters of astronomy classes and two semesters of physics classes.

The goal of this course is to introduce astronomy and astrophysics majors to the methods and topics of current astronomical research. The course will also help with the development of critical thinking skills. Each week, the topic of the course will be centered on the subject of the Astronomy department colloquium; this may include research on planets, stars, galaxies or cosmology. There will be two required meetings per week: the first will be to discuss papers related to the colloquium (time TBD), and the second will be the colloquium itself (at 4:15 pm each Wednesday). Grading is Pass/Fail.

ASTR GU4302 General Relativity, Black Holes, and Cosmology. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: one year of calculus-based general physics. Einstein's General Theory of Relativity replaced Newtonian gravity with an elegant theory of curved spacetime. Einstein's theory led to unforeseen and unnerving predictions of singularities and cosmological instabilities. Nearly a century later, these mathematical oddities have been confirmed astrophysically in the existence of black holes, an expanding universe, and a big bang. The course will cover Einstein's General Theory, beginning with special relativity, with an emphasis on black holes and the big bang.

Physics Courses

PHYS BC2001 MECHANICS - LECTURE LAB. 4.50 points.

Corequisites: Calculus I or the equivalent Fundamental laws of mechanics. Kinematics, Newtons laws, work and energy, conservation laws, collisions, rotational motion, oscillations, gravitation. PLEASE NOTE: Students who take PHYS BC2001 may not get credit for PHYS BC2009 or PHYS BC2010

PHYS UN3002 From Quarks To the Cosmos: Applications of Modern Physics. 3.5 points.

Prerequisites: PHYS UN2601 or PHYS UN2802

This course reinforces basic ideas of modern physics through applications to nuclear physics, high energy physics, astrophysics and cosmology. The ongoing Columbia research programs in these fields are used as practical examples. The course is preparatory for advanced work in physics and related fields.

Physical Education

200 Barnard Annex

212-854-2085

Department Administrator: Karen Arciola

Mission

The Physical Education Department subscribes fully to the College's commitment to help women realize their full potential. The diversity of the curriculum and the specialization of the faculty permit the student to focus on personal interests and learn the importance of

regular participation in physical activity as a lifetime choice. These opportunities instill the basic principles of physical activity in the pursuit of wellness.

The curriculum is driven by the seven components of wellness: physical, occupational, social, intellectual, environmental, emotional, and spiritual, using the physical dimension as a foundation. Through regular participation in guided physical movement, the student gains enhanced physical fitness, improved self-esteem, and stress management techniques. Physical Education and the extra-curricular programs address the body-mind connection as the student learns skills that will influence the quality of her life currently in academic achievement and in all future endeavors.

Student Learning Outcomes

Students will be able to:

1. Demonstrate an exercise to increase muscular endurance;
2. Identify methods of assessing body composition;
3. Demonstrate knowledge of a method for monitoring cardiovascular fitness;
4. Perform pertinent warm-up and cool down exercises;
5. Recognize the benefit of physical activity in reducing stress;
6. Demonstrate increased kinesthetic awareness in chosen activity;
7. Demonstrate proper safety techniques in chosen activity;
8. Demonstrate an exercise to increase muscular strength; and
9. Perform pertinent movement activities to increase flexibility

Chair: Laura Masone (Senior Associate)**Senior Associate:** Lisa Northrop**Associate:** Melanie Rodriguez**Term Associate:** Cindy Lanzas**Adjunct Associates:** Stephen Shulman, India Choquette, Talese Hunt, Eliana Laessig, Selma Trevino

Degree Requirement

One Physical Education course is required and must be completed by the end of the first year. One point will be earned for this one course. Students in the Barnard/JTS dual program must complete one Physical Education course by the end of the junior year. One additional point of elective Physical Education may be counted towards the 122 points required for graduation. Transfer students must complete one semester of Physical Education by the end of the junior year and are not eligible for the second point of credit. One-point studio courses in the Dance Department also fulfill the Physical Education requirement.

Students with Disabilities:

Both disabled and non-disabled students at Barnard are expected to complete the one semester physical education requirement by the end of the first year. Students with permanent or temporary disabilities will be individually advised and placed in a suitable activity, based upon the recommendations of the Director of the Center for Accessibility Resources and Disability Services (CARDS).

Prior to Physical Education course registration, students with disabilities are encouraged to discuss their needs with the Director of the Center for Accessibility Resources and Disability Services (CARDS)

or Chair of the Physical Education Department. Priority registration may be offered on a case-by-case basis to students who need to enroll in a particular class for disability-related reasons.

All students with disabilities should self-identify to their Physical Education instructors as soon as possible in the semester and discuss any disability-related needs they may have. Please register with CARDS if you have not previously done so. You may also want to consult with your private clinician and/or a clinician from the Student Health Service regarding your particular situation.

Curriculum: The curriculum is organized and administered by the faculty of the Department of Physical Education. Instruction is offered in the areas of fitness, mind/body, and self-paced courses. Courses are designed to promote the development and enjoyment of lifetime motor skills, which will afford opportunities to realize one's potential and to provide vigorous exercise to release tensions often generated by strong academic commitments and intense urban life.

Extracurricular Fitness: Recreational use of the Barnard Fitness Center and Fitbear group fitness program is encouraged. All Barnard students, faculty, and staff are eligible to use these programs.

The Barnard Fitness Center is under construction and will be closed for the 2023-2024 academic year. Please check membership at Dodge Fitness Center.

Intercollegiate Athletics: The Barnard/Columbia Athletic Consortium provides the opportunity for eligible undergraduate women to compete together as members of University-wide athletic teams. Sixteen varsity sports are currently sponsored: archery, basketball, crew, cross country, fencing, field hockey, golf, lacrosse, soccer, softball, squash, swimming & diving, tennis, indoor and outdoor track & field, and volleyball. Governed by NCAA and Ivy League rules, all teams are Division I. Competition is scheduled with teams from the Ivy League, the metropolitan area, and the eastern region. In addition, students are eligible to qualify for regional and national championships. Physical Education credit may be earned through satisfactory participation on a varsity team.

Registration: Registration takes place during assigned Registration window. Information is available in the Registrar's Office or web site. Students should include the Physical Education course by number, section, title, and I.D. number on final programs filed with the Registrar.

Cross Registration: Barnard students may receive credit for a Columbia Physical Education course. Admittance is at the discretion of the Columbia Physical Education Chair.

MIND/BODY COURSES

PHED BC1900 PILATES PRACTICE

This is a beginning level Pilates mat course adapted to an at-home practice format. A combination of online resources in Panopto/Canvas and in-person meetings will be used to track student practice and progress. Regular home practice will teach students to make exercise a part of their regular routine despite time constraints. It will teach them the confidence to incorporate exercise into their lives without being dependent on a group class.

TAI CHI (PHED BC1691)

BEGINNING YOGA (PHED BC1693)

An introduction to Hatha Yoga focusing on the development of the physical body to increase flexibility and strength. Breathing practices and meditation techniques that relax and revitalize the mind and body are included.

Department Administrator: Taylor Doran

The Department of Political Science

Political Science explores questions about power: what it is, where it comes from, who exercises it, how it is used and legitimized. Concretely, political scientists study the processes, policies and institutions of different political systems as well as critical issues such as health care policy, civil rights, the origins of wars, the nature of democracy, the causes of authoritarianism, the meaning of justice, and the genesis of terrorism.

Mission

In accordance with the mission of Barnard College, the political science department aims to create a community of teachers and students committed to intellectual discovery, rigorous analysis, and independent thought. The department's courses emphasize reflection, discussion, deliberation and intensive interactions between faculty members and students. The Barnard political science department strives to help students think clearly and methodically about the questions and issues that make up political science, equip them with the intellectual and presentational skills necessary to understand and address practical political issues as well as prepare them for a wide range of careers in federal, state and local governments; law; business; international organizations; nonprofit associations and organizations; campaign management and polling; journalism; pre-collegiate education; electoral politics; research and university and college teaching. The department recognizes four subfields of the discipline:

Political Theory: the study of the conceptual foundations of political systems and behavior.

- Student learning outcome: after completing one or more courses in Political Theory students should have a familiarity with some of the key concepts, theories and debates that have defined thinking about politics over time.

American Government and Politics: the study of all aspects of the American political system, including its development, institutions, procedures, and actors.

- Student learning outcome: after completing one or more courses in American Government and Politics students should understand the

basic structure of the American political system and how some of its institutions, procedures, and actors function.

Comparative Politics: the study of the political systems of other countries and regions, including the use of comparisons across cases in order to gain a broader and deeper understanding of events, institutions, and processes.

- Student learning outcome: after completing one or more courses in Comparative Politics students should have a familiarity with the political systems of other countries and regions, and be able to use comparisons across cases in order to gain a broader and deeper understanding of political events, institutions, and processes.

International Relations: the study of relations between countries and the dynamics and development of the international system.

- Student learning outcome: after completing one or more courses in International Relations students should understand the key approaches to the study of the relations between countries and a familiarity with the basic dynamics and development of the international system.

Student Learning Outcomes

Upon completion of the Barnard Political Science major, students should be able to:

- Analyze, speak and write about the subject matter and major theories of at least three of the four subfields of political science;
- Apply social scientific reasoning and theories to the analysis of a wide range of political issues and problems;
- Generate and test hypotheses about political processes, relationships and institutions or engage in conceptual analysis and interpretation of political ideas, arguments, and phenomena;
- Complete independent research projects in political science, particularly via the capstone senior project.

Five-Year Bachelors/Master of Arts Programs

Students interested in public careers should consider the five-year joint-degree programs at Columbia University's School of International & Public Affairs (SIPA).

- The SIPA programs include the Graduate Program in Public Policy & Administration (MPA) and the Master of International Affairs Program (MIA). For information, please contact the Department Chair.

Requirements for the Major

A total of ten courses are necessary to complete the Political Science major.

- Three introductory lecture courses at the 1000-level or 3000-level from different subfields,
- Four elective courses,
- Three colloquia

Please use the [Major Audit](#) to plan your program and track your courses for the major.

The department recognizes four subfields of the discipline:

- American Government and Politics: the study of all aspects of the American political system, including its development, institutions, procedures, and actors.
- Comparative Politics: the study of the political systems of other countries and regions, including the use of comparisons across cases in order to gain a broader and deeper understanding of events, institutions, and processes.
- International Relations: the study of relations between countries and the dynamics and development of the international system.
- Political Theory: the study of the conceptual foundations of political systems and behavior.

The three colloquia must be taken with faculty at Barnard College. Many of the lecture courses may be taken with faculty at Columbia College, if these courses are cross-listed. Various study-abroad options and summer courses also may meet your specialized interests, but these require

1. prior consultation with your major adviser, as well as
2. prior approval by the [Departmental Chair](#) and
3. subsequent approval by the Department Chair once you apply to transfer the credit to Barnard (use the Course Approval Request Form for steps 2 and 3).

Students interested in the **Sciences Po–Barnard five-year joint-degree program** are encouraged to meet with the Dean for Study-Aboard, also regarding the political science aspects of this BA/MA program. The requirements are at the end of this page.

Please use the [Major Audit](#) to plan your program and track your courses for the major.

Introductory-level Lecture Course Requirement (three lecture courses)

The political science department requires all students to take at least one introductory 1000- or 3000-level lecture course in three of the four subfields of political science (listed above). These courses are designed to provide an introduction to the main subject matter and major theories of each subfield.

These courses also serve to familiarize students with the analytic approaches that political scientists use. After taking lecture courses in the relevant subfields, students are eligible to take the two required colloquium courses.

Advanced Placement Credit

A student granted Advanced Placement (AP) credit by the College in either American Politics or Comparative Politics with an exam score of 5 will have fulfilled the prerequisite for courses that require the prior completion of POLS UN1201 INTRO TO AMERICAN POLITICS or POLS UN1501 INTRO TO COMPARATIVE POLITICS, respectively. If the student wants to take the introductory American Politics or

Comparative Politics course, she may do so, but she will forfeit her corresponding AP credit.

AP credit does **not** count toward the number of courses required for the major or minor, i.e. the student still needs to complete the ten courses for the major or the five for the minor.

Electives Requirement (four additional courses)

All political science courses emphasize social scientific reasoning and theory application. In addition, political science majors chose four electives (normally at the 3000- or 4000-level). These courses are designed to deepen and expand students' knowledge base and encourage them to apply social scientific reasoning and theories to the analysis of a broad range of political issues and problems.

What fulfills the Four-Course Electives requirement

1. All courses offered at Barnard or Columbia in political science listed in the Barnard Course Catalogue, including introductory lecture courses and colloquia, satisfy elective course requirements. Courses listed in Columbia catalogues which are not listed in the Barnard catalogue require approval by Barnard Department Chair, before counting toward the major or concentration (use the [Course Approval Request Form](#)).
2. The [Independent Study Option](#) POLS BC3799 INDEPENDENT STUDY. Students who wish to do an independent study project (ISP) should first speak to a political science faculty member willing to sponsor it. Credit is given for an academic research paper written in conjunction with an internship, but no academic credit is given for an internship or job experience per sé. The student must then apply to the Committee on Programs and Academic Standing (CPAS), which must approve all Independent Study requests. Once the request is granted, the Registrar creates a section and assigns a call number, and the student is notified of the call number so she can enter the course on her program. (Each instructor has a separate section and call number. Each instructor is limited to sponsoring one independent study per semester.) Students will consult with the sponsoring instructor as to workload and points of credit for the independent study course. Independent study counts as a course for the purpose of the nine-course requirement, provided the project is approved for 3 or 4 points. A project taken for 1 or 2 points does not count as a course toward the major, the minor, or the concentration requirement.
3. With pre-approval, first from the individual Major Advisor and then from the Department Representative, a student may substitute a course in another department for one of the four elective courses. This course cannot be an introductory course and it must have significant political science content (use the [Course Approval Request Form](#)). Approval after the fact will not be granted.
4. Six of the nine courses for the major must be taken from courses listed in the political science section of the Barnard Course Catalogue. Within the three-course limit of courses taken elsewhere, the following caps traditionally apply: three transfer courses; two Reid Hall courses; two study-abroad courses; one summer session course. On rare occasions the Department Representative may grant an exception (use the [Course Approval Request Form](#)).

What does not fulfill the Four-Course Electives requirements

The Independent Study Option POLS BC3799 INDEPENDENT STUDY does not satisfy the course requirement if the project is for 1 or 2 points.

College-granted AP credit for American Politics or Comparative Politics does not count as major course credit. (See Advanced Placement Credit, above.)

Courses taken at other colleges, in summer sessions, or abroad, which are not equivalent in rigor and workload to Barnard courses, as determined by the Department Representative, in consultation with other faculty of the department, will not count toward the major or minor requirements.

Colloquium Requirement (three one-semester courses)

Although all political science courses teach students to generate and test hypotheses about political processes, relationships and institutions and/or engage in conceptual analysis and interpretation of political ideas, arguments and phenomena, students are encouraged to do this at a higher level in their three required colloquia. These colloquia feature intensive, small group discussions and a major research paper, and provide students with an opportunity to work more independently than they probably have in previous courses.

The colloquium format involves weekly discussion of readings, and development of research skills through completion of a 25- to 30-page research paper, constituting the major piece of written work for the course. Admission is limited to sixteen students who are assigned by the department, not by individual instructors. Students must have completed one lecture course in the relevant subfield before enrolling in the colloquium (or must receive special permission from the instructor for that requirement to be waived). It is recommended but not required that the three required colloquia be taken with different Barnard instructors and selected from the asterisked colloquium offerings listed in the Barnard course catalogue. Columbia seminars do not fulfill this requirement.

If you plan on spending part or all of junior year abroad

Plan to take a colloquium during the second semester of your sophomore year. This means applying for the colloquium during the first semester of your sophomore year. Indicate on your colloquium application that you plan to be abroad one or both semesters during junior year.

If you plan to be away for the entire junior year, you must plan on taking a colloquium in your sophomore year. Please be sure to e-mail both your academic major advisor and the department administrator by the middle of March of your year abroad, in order to apply for a colloquium if you need to take one in the fall of your senior year.

Senior Projects and the Third Colloquium

Students must designate one of the three colloquia to fulfill the Senior Project. Students must indicate their intention to take a colloquium for the Senior Project colloquium on their application and work completed in this colloquium will be considered for Senior Project Distinction. The designated Senior Project colloquium cannot be changed after the Add/Drop deadline of the semester in which the colloquium is being offered.

All students will display a summary poster of their designated Senior Research Paper written for the third colloquium at the Political Science Majors Senior Event at the end of the Spring semester. Early graduates will be required to submit their poster to the Department prior to graduating. Posters can be displayed in absentia for those students who graduate early.

Requirements for the Combined Major

A student doing a combined major in [Human Rights](#) (p. 369) and Political Science must complete the full ten-course requirements for the Political Science major in addition to Human Rights courses. Both departments must agree on the potential departmental honors nomination.

A student doing a combined major in [Jewish Studies](#) (p. 409) and Political Science must complete the full ten-course requirements for the Political Science major in addition to Jewish Studies courses. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

A student doing a combined major in [Women's Studies](#) (p. 582) and Political Science must complete the full nine-course requirements for the Political Science major in addition to Women's Studies courses. She must consult both thesis advisors (=sponsors) on a regular basis throughout the colloquium and the completed thesis must integrate the two fields of inquiry. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

Any other combined major (for example, Art History-Political Science), or a special major, requires a petition to the Committee on Programs and Academic Standing (CPAS) and the approval of the Chairs of the sponsoring departments. (For Political Science, obtain the approval of the [Department Chair](#).) Obtain forms and instructions from the Class Dean in the Dean of Studies Office. The student will be required to take a minimum of seven political science courses of at least three points each, including two lecture courses and three colloquia, to be selected in consultation with the Departmental Representative. The student is expected to take a third colloquium. She must consult both essay advisors (=sponsors) on a regular basis throughout the colloquium, assuring integration of the two fields of inquiry. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

Requirements for the Double Major with One Integrating Senior Essay

The student is required to complete the coursework for each major with no overlapping courses, but will undertake only one integrating senior requirement project with two thesis advisors (=sponsors), one from each of the two departments. The student must consult both advisors on a regular basis throughout the colloquium and the completed thesis must integrate the two fields of inquiry. Both departments must agree on the senior requirement grade and the potential departmental honors nomination.

REQUIREMENTS FOR THE SCIENCES PO – BARNARD BA/MA EXCHANGE PROGRAM

In order to complete the Sciences Po – Barnard five-year Bachelor/Master of Arts requirements, the Barnard political science major should:

- Complete all her major requirements at Barnard, including two of three required colloquia;
- Fulfill her senior thesis requirement by choosing one of the following two options:

Option 1: Complete a third colloquium while at Barnard.

Option 2: When at Sciences Po, the student takes a personal one-semester tutorial with a Sciences Po professor assigned according to the student's interest. The tutorial must focus on advice on bibliographical search, research strategy, methodological issues, and writing on a given topic, in order to help the student write a research paper equivalent to a Barnard senior project in political science. The research paper should meet the following criteria:

- It should be a minimum of 30-40 pages double-spaced;
- It should be a coherent piece of analytical writing;
- It should embody the answer to some question about the operation of certain aspects of political or governmental institutions or processes, broadly conceived;
- It should be based on original research conducted by the student;
- It should be theoretically informed. It should be a social science paper, and not a policy one;
- The student should use, at least, secondary sources.

Please use the [Major Audit](#) to track your Barnard courses for the major.

Requirements for the Minor

A total of five courses are necessary to complete a minor. Four of these courses must be taken from courses listed in the Political Science section of the Barnard Course Catalogue. Only one political science course taken in a summer session, study-abroad program, Reid Hall Program, or another undergraduate college may be used to satisfy the five-course requirement for the minor, with the approval of the Department Representative.

Introductory Courses

Three introductory-level lecture courses, each from a different subfield, are required of all Barnard majors and concentrators. These courses are designed to provide an introduction to the main subject matter and major theories of each subfield. Any lecture course at the 1000-level that is listed in this section fulfills this requirement. In addition, selected lecture courses at the 3000-level may be substituted for a 1000-level course in the same subfield. [A list of appropriate Barnard and Columbia 3000-level political science lecture courses is on-line.](#)

The subfields of all Barnard courses are listed. These are:

- **Political Theory:** the study of the conceptual foundations of political systems and behavior.
- **American Government and Politics:** the study of all aspects of the American political system, including its development, institutions, procedures, and actors.
- **Comparative Politics:** the study of the political systems of other countries and regions, including the use of comparisons across

cases in order to gain a broader and deeper understanding of events, institutions, and processes.

- **International Relations:** the study of relations between countries and the dynamics and development of the international system.

Advanced Placement Credit

A student granted Advanced Placement (AP) credit by the College in either American Politics or Comparative Politics with an exam score of 5 will have fulfilled the prerequisite for courses that require the prior completion of POLS BC 1201 or V 1501, respectively. If the student wants to take the introductory American Politics or Comparative Politics course, she may do so, but she will forfeit her corresponding AP credit.

AP credit does **not** count toward the number of courses required for the major or minor, i.e. the student still needs to complete the ten courses for the major or the five for the minor.

Introductory Courses

POLS UN1101 POLITICAL THEORY I. 4.00 points.

This course considers key questions at the foundation of political thought. What is justice? How do we justify the coercive power of states? Do we have an obligation to obey the government? Who should make and enforce the law? What basic rights and liberties should governments protect? How should our economic system produce and divide wealth and material resources? What are the claims of excluded or marginalized groups and how can these claims be addressed? We explore these questions through the works of several classical and contemporary political thinkers. A major goal of the course is to practice the skills needed to understand a political thinker's arguments and to construct one's own

POLS UN1201 INTRO TO AMERICAN POLITICS. 4.00 points.

The purpose of this course is to introduce students to the principles of American politics and governance. Upon completing the class, students should be more informed about the American political process and better able to explain contemporary American political phenomena, as well as being more likely to engage with politics and elections

POLS UN1501 INTRO TO COMPARATIVE POLITICS. 4.00 points.

This course provides a broad overview of the comparative politics subfield by focusing on important substantive questions about the world today. The course is organized around four questions. First, why can only some people depend upon the state to enforce order? Second, how can we account for the differences between autocracies and democracies? Third, what different institutional forms does democratic government take? Finally, are some institutions more likely than others to produce desirable social outcomes such as accountability, redistribution, and political stability?

This introductory course surveys key topics in the study of international politics, including the causes of war and peace; the efficacy of international law and human rights; the origins of international development and underdevelopment; the politics of global environmental protection; and the future of US-China relations. Throughout the course, we will focus on the interests of the many actors of world politics, including states, politicians, firms, bureaucracies, international organizations, and nongovernmental organizations; the interactions between them; and the institutions in which they operate. By the end of the semester, students will be better equipped to systematically study international relations and make informed contributions to critical policy debates

Lecture Courses

POLS BC3025 American Political Parties. 3 points.

Political parties have evoked widespread scorn in the U.S. since the founding era; and yet, they arose almost immediately and have endured for over two centuries. In this course, we will examine why parties formed despite the Founders' disdain for them. (In 1789, Thomas Jefferson wrote, "If I could not go to heaven but with a party, I would not go at all." In 1800, he won the presidency as a candidate of a major party.) We will dig into scholarly debates about what exactly parties are, what purpose they serve, and how and why they have changed over time as organizations, in the electorate, and in government.

Topics will include the presidential nomination process from the founding through the much-discussed 2016 primary election season, the life cycle of third parties, and the relationship between political parties and interest groups. Students will learn what is and is not unique about the current historical moment, and how history might shape our expectations of parties moving forward.

Throughout the course, we will pay particularly close attention to the roots of contemporary party polarization, and the implications of this phenomenon for representation and governance. In 1950, the American Political Science Association released a report criticizing the two major parties for excessive similarity; today, party polarization evokes widespread concern. Is there an ideal level of party difference? How much is too much? We will address these difficult questions, among others, in this broad survey of American political parties.

POLS BC3031 THE AMERICAN PRESIDENCY. 3.00 points.

This course explores the role of the presidency in U.S. politics. Presidents have long been at the center of politics, yet the nature of the presidency has changed dramatically over time. The first part of the course will examine these long-run changes. It begins with debates over the form of the presidency at the U.S.'s founding and examines how the institution has been altered – and with what effects – at key historical moments. Having gained foundational historical knowledge during the first part of the course, the course's second part will focus on various theories of the presidency. These theories primarily address, in various ways, one primary question: which factors best explain presidential "success"? By the end of the course, students should be able to systematically assess contemporary presidential politics using various scholarly theories and by putting the president's actions into a broader historical context. The course, occurring during the 2020 presidential primaries, will also include "sidebars" in which we will discuss the election

POLS BC3254 FIRST AMENDMENT VALUES. 3.00 points.

POLS BC3601 INTL LAW # U.N. IN PRACTICE. 4.00 points.**POLS UN3213 AMERICAN URBAN POLITICS. 3.00 points.**

This course examines the pattern of political development in urban America, as the country's population has grown in urbanized locations. It explores the process by which cities and suburbs are governed, how immigrants and migrants are incorporated, and how people of different races and ethnicities interact in urbanized settings as well as the institutional relations of cities and suburbs with other jurisdictions of government. The course focuses both on the historical as well as the theoretical understandings of politics in urban areas

POLS UN3560 PLCS URBAN DEV LATIN AMERICA. 3.00 points.

What shapes the ways cities develop politically and socioeconomically? Why do some cities become seeming "models" of urban governance whereas others struggle with perpetual corruption, inequality, and crime and violence? How do formal and informal political and social institutions interact to shape patterns of urban development? How do relations between cities and other levels of the state, including regional and national governments, impact local democracy and development? Are impoverished urban peripheries fertile grounds for political revolution? These are some of the questions that we will tackle in this course through a focus on urban politics and development in Latin America. Perceptions among both scholars and policymakers regarding Latin America's urbanization are polarized. Some see the region's development including innovative forms of governance, like participatory budgeting, social urbanism through participatory planning, and community policing. Others view the swift and unprecedented pace of clientelism, and violence. Our task this semester is to mediate between these two perspectives as we explore and analyze urban politics and development in the region.

POLS UN3565 DRUGS # POLITICS IN AMERICAS. 4.00 points.

A major challenge for governments across the Western Hemisphere is the complex relationship between illicit drugs, violence, and politics. We can see this relationship operating at multiple levels, from everyday politics in gang-controlled neighborhoods to the global arenas where governments debate and craft international drug policy. These links also reach back in history to global wars of empire and colonial rule, race relations during and following the collapse of the institution of slavery, and contemporary drug wars being waged across the Western Hemisphere and other parts of the world. Today, the dynamics and consequences of the politics of illicit drugs touch all our lives in different ways, including individual and family struggles with substance abuse, everyday encounters with militarized police, and the strains on democracy and citizenship, among many others. This course will examine some of these dynamics and consequences with a theoretical and empirical focus mainly on Latin America and the United States. Throughout our time together we will connect these pressing issues to broader theories, concepts and empirical findings in political science. The course is divided into several individual modules (denoted below with the headings A – G) under three overarching themes for this semester: 1. Politics of Drugs in a Historical Perspective: The first theme is a broad historical overview of the political origins of illicit drugs and the global drug regime. Some of the main questions we will tackle are: When and why did states label drugs as illicit? How did domestic and global politics come together to shape the global drug regime and the “war on drugs?” What role did race and gender play in the early social construction of illicit drugs? 2. Illicit Drugs, Politics and Governance: The second theme focuses on contemporary linkages between illicit drugs, violence, and politics. Here we will examine the conditions under which illicit drug markets are either violent or (relatively) peaceful. We will tackle questions like: Do states always seek to dismantle drug markets? What is the relationship between illicit drugs and electoral politics? What role do illicit drugs play in governance by armed non-state actors? Are states and criminal actors involved in the drug trade always at “war” with each other? 3. Democracy, Citizenship, and the War on Drugs: The third and final theme centers on the political consequences of the war on drugs for questions of democracy and citizenship in the Western Hemisphere. Some of the questions that will help us make sense of these consequences are: How does the war on drugs impact democracy and citizenship? What is the political economy of imprisonment? And in what ways do imprisonment and police-citizen interactions – stemming from the war on drugs – shape individual and collective political behavior and political subjectivity?

Application through department <https://polisci.barnard.edu/colloquia>
This course examines the politics of guns from a number of different angles. We will critically assess the multitude of direct and indirect explanations of gun control politics that have been offered by scholars and informed observers, including those related to interest groups, political parties, and mass political behavior.

POLS BC3055 * Colloquium on Political Violence and Terrorism. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: POLS V1501 or POLS V1601 or the equivalent.

Admission by application through the Barnard department only.

Enrollment limited to 16 students. Barnard syllabus.

What causes political violence and terrorism? How should we define "terrorism"—is it true, as the old saw goes, that one man's terrorist is another man's freedom fighter? What is the role of religious belief, as opposed to more immediate political goals, in fomenting terrorist action? Are al Qaeda and those linked to it different from terrorists we've seen in various places around the world in the past, or does all terrorism and political violence stem from the same variety of goals and purposes? Can governments take effective action to prevent or counter terrorism, or are we all doomed to live in insecurity? What is the proper balance between protection against terrorism and protection of civil liberties? This course examines these questions through weekly assigned readings, analysis and discussion.

POLS BC3451 COLLOQUIUM ON ECONOMIC INEQUALITY IN THE UNITED STATES. 4.00 points.

In recent decades, economic inequality in the United States has soared to levels not seen for nearly a century: Wages for workers have stagnated, while the proportion of wealth concentrated among the most well-off Americans has steadily increased. These trends may have dire consequences for the state of representative democracy in the United States, as they endow a relatively small number of citizens with a disproportionate amount of resources to deploy politically. The result is a political system that often responds to the preferences of the wealthiest Americans, while frequently ignoring the views of most ordinary citizens. This course, in diverse ways, explores the political causes and consequences of rising inequality, especially with regards to who has political power. We will begin by examining the contours of inequality in the U.S. while also exploring the various ways that power manifests itself in politics. We'll then explore the relationship between wealth and public policy outcomes in the United States, along with the ways that the very wealthiest Americans – both individually and collectively – work to advance their policy views. Beyond just examining national-level politics, we will also discuss inequality and power on the state- and local-levels. We'll then explore how political and economic inequality are interrelated with race and social class, and how all of this connects to the rise of Donald Trump. Finally, we will assess potential remedies to political and economic inequality

Beginning in the mid-1970s a democratic wave swept the globe. It started in Southern Europe, spread throughout Latin America, parts of East Asia and Africa, and engulfed the former Soviet bloc. In all, dozens of new democracies emerged during the late twentieth century and by the early 21st century there were more democracies in the world than there had ever been before. Over the last decade and a half, however, a democratic undertow has sent in. Many new democracies have slid back towards dictatorship and many old democracies have experienced significant problems as well. This colloquium will exam the literature on democratic consolidation and backsliding, providing students with an overview of the most important theories about what makes democracy work—or not

POLS BC3512 Pandemics and Politics. 4.00 points.

The COVID-19 crisis offers a rare and unique opportunity to social science students to study how governments respond and how people behave during the pandemic. In this class, we focus on the government responses to the COVID pandemic (along with some other major pandemics in history) and investigate the questions of why governments around the globe did what they did in response to the pandemic, and how some social, political, and economic factors affected the kind of responses and the effectiveness of such responses. In analyzing different factors, we will survey and learn from existing relevant theoretical frameworks in social sciences particularly political science. we will cover a wide range of topics that are also major topics in political science such as federalism, authoritarianism, leadership, and trust in government. By examining this important contemporary global crisis from political science perspectives, students can learn about broader theories in social sciences in general and political science in particular. Another goal of this course is for students to learn how to make social science inquiry and analysis with comparative methods. Through the readings, class discussions, research, and writing of a research paper, students will be exposed to various ways to conduct research and making analysis which will be realized in a research paper

Prerequisites: Application through Political Science department (<https://polisci.barnard.edu/colloquia>), Prerequisite: Introduction to American Government and Politics (POLS UN1201) or equivalent, Strongly recommended: Empirical Research Methods in Political Science (POLS 3706) or equivalent
This course explores how and why people take action in the political sphere. We will pay particular attention to questions such as why people vote, form interest groups, and/or contribute money to candidates. We will also study the origins of partisanship, polarization, opinion, and political ideology. Finally, we will cover topics in "elite" behavior, examining candidates, lawmakers, and party officials

POLS BC3801 COLL:POLITICS OF DEVELOPMENT. 4.00 points.

Prerequisites: V 1501 or equivalent Description: The semester-long course aims to study political and social factors behind economic development and exam empirical cases of the success and failure in economic growth in order to understand the key features of the development processes. In the last two centuries, some countries successfully achieved economic growth and development, while other failed to do so. Even in the post-WWII period, the world has witnessed the rise and decline of economies around the world. Why do nations succeed or fail in economic development? How do political institutions affect economic outcomes? What are the ways in which state and market interact and influence each other? Can democracy be considered a cause of development, an outgrowth of development, or neither and to which extent? How do external factors such as foreign aid encourage or discourage development? We will try to examine these questions by taking a historical-institutional and comparative approach and take a critical look at the role of political and other institutions by applying theoretical guidelines and empirical cases. We will explore competing explanations for the successes and failures of economic development in the world. Objective:1. Understand some important concepts and theories within the fields of comparative politics and political economy. To explore the interconnections between politics, economy, and society in the context of development policy and practice.2. Develop basic analytic skills to explore various factors that shape political, economic, and social development and underdevelopment in the world;3. Understand some country specific political economy processes and how these processes prove or disprove certain theories and policies

POLS BC3810 *Colloquium on Aid, Politics & Violence in Africa. 4 points.

Prerequisites: POLS UN1601 or the equivalent. Admission by application through the Barnard department only.

Explores the concepts, theoretical traditions and debates around development and humanitarian aid, focusing on the relationships between aid, politics, and violence. It looks at the political and military impacts of aid, the linkage between humanitarian aid and conflict resolution, and aid's contribution to perpetuating subtle forms of domination. (Cross-listed by the Africana Studies and the Human Rights Programs.)

POLS BC3812 * Colloquium on State Failure, Warlords, and Pirates. 4 points.**Not offered during 2023-2024 academic year.**Prerequisites: POLS V1501 or POLS V1601 or the equivalent.Admission by application through the Barnard department only.Enrollment limited to 16 students. Barnard syllabus.

What are sovereign states, why do they fail, does their failure matter, and can the international community help? This course examines these questions using social science theories and historical case studies. It focuses on the political economy and security consequences of two current forms of state failure: warlordism and piracy.

POLS BC3816 COVID-19 and International Relations. 4.00 points.

Welcome to "International Relations of COVID-19." The onset of the global COVID-19 pandemic has sent political shockwaves around the world, affecting almost every aspect of international political life. From how countries cooperate with one another to redefining what constitutes national security, to recasting pressures for globalization and de-globalization, the world as we knew it prior to February 2020 appears to be dramatically changing. At the same time, scholars and policymakers are increasingly divided about how to understand and respond to many of these challenges. Is the COVID era truly new or will it actually accelerate recent trends in international politics and global governance? What are the similarities between this pandemic and previous global health crises and what lessons should we draw for managing international order? What are the implications for US leadership, and broad perceptions about the erosion of the US-led liberal world order, and how have strategic competitors like China dealt with the crisis globally? Finally, what are the tools, resources and networks available to researchers and policy makers interested in making more evidence-based assessments about international public policy? What are the challenges? The intensive nature of this colloquium is reflected in two ways- preparation and focus. First, the course carries a substantial reading load designed to inform and prepare students for each course session. These assignments will mostly be academic readings, but may also include podcasts, news articles, and digital archival materials. New materials and resources dealing with the course topic are added daily and may be added to the syllabus, so please check the Courseworks syllabus before each meeting for the current assignments. Importantly, our class lectures, group activities and individual assignments will build upon, not review, the assigned materials for the session. Second, the remote nature of the course will require active listening and focus. Each session typically will be split into 2 segments, roughly of 55-60 minutes each. Many of these segments will feature guest lecturers or experts who will give 25-30 mins presentations on their topic and then field questions. During our limited time for Q&A students should ask single, concise questions

Cross-Listed Courses

NOTE: All 3000 or 4000-level POLS courses taken at Barnard or Columbia are approved as Political Science electives. Below is a list of cross-listed courses from other departments.

MDES UN3260 RETHINKING MIDDLE EAST POLITCS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course examines a set of questions that have shaped the study of the politics of the modern Middle East. It looks at the main ways those questions have been answered, exploring debates both in Western academic scholarship and among scholars and intellectuals in the region itself. For each question, the course offers new ways of thinking about the issue or ways of framing it in different terms. The topics covered in the course include: the kinds of modern state that emerged in the Middle East and the ways its forms of power and authority were shaped; the birth of economic development as a way of describing the function and measuring the success of the state, and the changing metrics of this success; the influence of oil on the politics of the region; the nature and role of Islamic political movements; the transformation of the countryside and the city and the role of rural populations and of urban protest in modern politics; and the politics of armed force and political violence in the region, and the ways in which this has been understood. The focus of the course will be on the politics of the twentieth century, but many topics will be traced back into developments that occurred in earlier periods, and several will be explored up to the present. The course is divided into four parts, each ending with a paper or exam in which participants are asked to analyze the material covered. Each part of the course has a geographical focus on a country or group of countries and a thematic focus on a particular set of questions of historical and political analysis

URBS V3833 New York City: Politics and Governing. 4 points.

This course will examine through readings, class discussions, and in class debate, the complex politics and governing of New York City- the key political institutions, and who holds urban political power, voting and elections, and the changing roles of the electorate will be covered.

We will examine the structure of New York City government and how the New York City Budget is developed and adopted; the interplay between Mayoral and City council powers, the city charter, the process of governing and the role of political parties, special interest groups, lobbyists and labor unions. We will look back in the City's political history and consider that time in the mid 1970's when New York City suffered a major fiscal crisis and was close to financial bankruptcy. In this context, New York City's relationships with the state and federal governments will also be covered.

Psychology

415 Milbank Hall

212-854-2069

Department Administrator: Danielle Feinberg

The Department of Psychology

Psychology is the scientific study of the mind and behavior. The concerns of the discipline range widely, from fundamental questions about human nature to applications of psychology in daily life.

Research conducted by faculty members in the Department examine growth and development, learning and memory, perception, language, social knowledge and behavior, the self, the effects of stress, conflict and cooperation, and the neural functions that underlie behavior.

Students who choose the major concentration in Psychology study the literature and empirical practices across the discipline, and can gain direct experience by participating in laboratory settings on campus and in the wider community, and in health centers nearby. Many Psychology majors continue for graduate training in psychology, neuroscience, or education, while others enter professional schools for training in medicine, law, or business.

Mission Statement

Through courses, advising and laboratories, the Department of Psychology educates students about the intellectual perspectives and empirical methods of the contemporary discipline of Psychology. Introductory courses provide an overview of the field and its major components, emphasizing the practices by which hypotheses are formed and new evidence is created. Middle-level courses consider significant topics in sharp focus, while upper-level seminars use classic and recent technical literature as a springboard for discussion in groups of advanced students. The Department also encourages students to participate in research and in the many different Departmental and College-wide forums for discussion and refinement of scientific work.

Student Learning Goals

A student graduating with a major concentration in Psychology will know how to:

- Describe the historical foundations and contemporary problems in psychology;
- Portray the sub-disciplines in psychology;
- Explain the application of psychological knowledge to questions of behavior and mental processes;

- Identify and assemble current research literature about a topic within psychology;
- Critique a psychological theory and the evidence offered to secure its premises;
- Design a study to test a psychological hypothesis;
- Weigh the strengths and weaknesses of a research design and method;
- Perform basic descriptive and inferential statistical tests to summarize measures and to identify reliable results;
- Communicate theories, hypotheses, empirical methods, and research findings in written and spoken form.

Research

There are many opportunities for a student to participate in research in laboratories and in the field. Each member of the full time faculty supervises research by students, and many nearby laboratories, health centers and research institutions welcome the participation of our students in their projects. Independent Study, the Senior Research Seminar and the Toddler Center Seminar are courses for student researchers.

Field Work

The Field Work Seminar in Psychological Services and Counseling combines a placement in a clinical, educational, medical, and other institutional settings, with a weekly discussion of applied aspects of psychology. Drawing on a student's experience in the field, the discussions examine theoretical approaches to clinical problems and cases.

Teaching

Introductory and Laboratory courses provide opportunities for student teaching under the supervision of a member of the faculty. Teaching assistants are typically recruited for this role.

College Science Requirement

A student who wishes to fulfill the College science requirement in Psychology is encouraged to take her lab courses early in her career at Barnard. Senior students do not receive priority for placement in a lab course.

Requirements for Students following the Foundations Curriculum

Important Changes:

If you entered Barnard in or after Fall 2021, the requirements for a Major in Psychology have changed. Three core introductory psychology courses (BC1001, BC1101, BC1020) are pre-requisites for all 2000-level PSYC lab courses.

For all students: The minimum number of courses to complete the Psychology Major is 13. Note that at least six of the required PSYC courses, worth three or more credits each, must be taken at Barnard or Columbia. All PSYC courses must be taken for a letter grade (C- or better).

	Points
Three Core Introductory PSYC Courses	
PSYC BC1001	3
INTRODUCTION TO PSYCHOLOGY (lecture; prerequisite for higher level Psychology courses) ¹	
PSYC BC1101	4.00
STATISTICS LECTURE AND RECITATION (lecture with recitation, preferably taken by the end of sophomore year) ²	
PSYC BC1020	3
BEHAVIORAL RESEARCH METHODS AND ANALYSIS (REQUIRED FOR STUDENTS ENTERING BARNARD IN OR AFTER FA21)	

Three PSYC Lecture Courses

at least one from each group

GROUP 1:

PSYC BC2107	PSYCHOLOGY OF LEARNING - LEC
PSYC BC2110	PERCEPTION-LECTURE
PSYC BC2115	COGNITIVE PSYCHOLOGY - LEC
NSBV BC1001	INTRODUCTION TO NEUROSCIENCE

GROUP 2:

PSYC BC2125	PSYCHOLOGY OF PERSONALITY-LEC
PSYC BC2129	DEVELOPMENTAL PSYCHOLOGY-LEC
PSYC BC2138	SOCIAL PSYCHOLOGY-LEC
PSYC BC2156	CLINICAL PSYCHOLOGY

Two PSYC Laboratory Courses³

chosen from any group (taken concurrently with their associated lectures):

GROUP 1:

PSYC BC2106	PSYCH OF LEARNING - LAB
PSYC BC2109	PERCEPTION - LAB
PSYC BC2114	COGNITIVE PSYCHOLOGY - LAB
NSBV BC2001	LABORATORY IN NEUROSCIENCE

GROUP 2:

PSYC BC2124	PSYCH OF PERSONALITY - LAB
PSYC BC2128	DEVELOPMENTAL PSYCH - LAB
PSYC BC2137	SOCIAL PSYCHOLOGY - LAB
PSYC BC2155	CLINICAL LABORATORY

OR...

PSYC BC1010	INTRO LAB EXPERIMENTAL PSYCH ⁴
AND One laboratory course with its associated lecture from Group 1 or 2	

One Senior Requirement⁵

Includes Thesis, and Capstone Project written in any PSYC/NSBV 3000-level seminar, taken during the final two semesters, including:

PSYC BC3465	Field Work # Research Seminar: Toddler Center (PSYC BC3465 and PSYC BC3466 is a year-long course)
PSYC BC3473	CLINICAL FIELD PRACTICUM
PSYC BC3606	INDEPENDENT STUDY (taken for 3 or 4 credits)

Additional PSYC Courses⁶

At least one lecture or seminar course worth 3 or more credits each.

Outside Courses⁷

One course from a cognate discipline (ANTH, COMS, ECON, LING, PHIL, SOCI, and STEM)

Two lectures in another science, plus one laboratory course (ASTR, BIOL, CHEM, EESC, or PHYS)

One Additional Research Experience (*NOT REQUIRED FOR STUDENTS WHO ENTERED BARNARD IN OR AFTER FA21)

Choose from the following:

- a third PSYC lab (with lecture); or
- a lab in a science outside of PSYC; or
- one semester of BC3606 Independent Study (taken for 3 or 4 credits)

¹ When appropriate, approval for equivalent introductory courses taken at another school can be granted by the Department Vice Chair for Student Advising. A student who receives a score of 4 or 5 on the Advanced Placement (AP) examination in Psychology, or a score of 5 or 6 on the International Baccalaureate (IB) exam in Psychology can choose not to enroll in PSYC BC1001 INTRODUCTION TO PSYCHOLOGY. She must, however, enroll in another PSYC course, worth three or more credits, in its place. Also please note, that even with experience in a high school AP course, the Department highly recommends that all students enroll in PSYC BC1001. If a student with acceptable AP/IB scores chooses to enroll in BC1001, she will receive both major and college credit for the course, as well as three points toward graduation (for the AP/IB credit).

² If a student would like to enroll in a Statistics course outside of the Barnard Department of Psychology to fulfill this portion of the major requirements she should obtain prior approval from the Chair or the Vice Chair for Student Advising. Note that there are several courses offered by Columbia that are equivalent to PSYC BC1101 which means you cannot receive credit for both courses (you must choose one or the other to apply towards your major requirements).

³ Students are strongly advised to enroll in only one PSYC laboratory course per semester.

Also, students should check their calendar of commitments and review the lab attendance policy before signing up for a lab. Each laboratory follows the same policy about attendance:

- You must attend every Laboratory meeting, and you must be present for the duration of the meeting.
- You may not arrive late.
- You may not depart before you complete the day's procedure.

- If you miss more than a single Laboratory session you will be dismissed from the Laboratory and you will not be permitted to remain enrolled.

- ⁴ PSYC BC1010 is intended for First Year and Sophomore students who have not previously taken any psychology labs. It is *not* a requirement, however, if taken, it should be taken *prior to* one of the Group 1 and 2 topical labs. PSYC BC1001 must be taken prior to or concurrently with BC1010.
- ⁵ A student may elect to fulfill the Senior Requirement with a Columbia Psychology Department Seminar or Supervised Individual Research with a Columbia faculty member. prior approval for this is needed. For all other 3000-level courses, you must notify the professor at the beginning of the semester that the course will be used as your senior requirement.
- ⁶ A maximum of two of the following courses may count toward the major (though more could count toward College requirements):
- PSYC BC3465 Field Work # Research Seminar: Toddler Center (fall semester)
 - PSYC BC3466 FIELD WORK # RESEARCH SEMINAR: TODDLER CENTER (spring semester)
 - PSYC BC3606 INDEPENDENT STUDY (Formerly PSYC BC3601-3608)
- ⁷ The Psychology Department defaults to rules and exemptions allowed by the home department. Meaning, if Biology, for example, accepts a course substitution for one of its labs, Psychology will honor this course as fulfilling part of the Outside Science component of the Psychology Major. Also, the two science courses can be from different departments.

Requirements for the Minor

The minor consists of six courses in Psychology. All courses must be taken for a letter grade (C- or better). Exemption and substitutions are as noted for the major.

Two Introductory PSYC Courses

PSYC BC1001	INTRODUCTION TO PSYCHOLOGY
PSYC BC1101	STATISTICS LECTURE AND RECITATION (lecture with recitation)

One Core PSYC Lecture

chosen from the following courses:

GROUP 1

PSYC BC2107	PSYCHOLOGY OF LEARNING - LEC
PSYC BC2110	PERCEPTION-LECTURE
PSYC BC2115	COGNITIVE PSYCHOLOGY - LEC
PSYC BC2119	SYSTEMS # BEHAVIORAL NEUROSCIENCE-LEC

GROUP 2

PSYC BC2118	SYSTEMS # BEHAVIORAL NEUROSCIENCE-LAB
PSYC BC2125	PSYCHOLOGY OF PERSONALITY-LEC
PSYC BC2129	DEVELOPMENTAL PSYCHOLOGY-LEC
PSYC BC2156	CLINICAL PSYCHOLOGY

One PSYC Laboratory Course

chosen from the following courses:

GROUP 1

PSYC BC2106	PSYCH OF LEARNING - LAB
PSYC BC2109	PERCEPTION - LAB

PSYC BC2114	COGNITIVE PSYCHOLOGY - LAB

GROUP 2

PSYC BC2124	PSYCH OF PERSONALITY - LAB
PSYC BC2128	DEVELOPMENTAL PSYCH - LAB
PSYC BC2137	SOCIAL PSYCHOLOGY - LAB
PSYC BC2155	CLINICAL LABORATORY

Two Additional PSYC Courses

Lectures and/or seminars chosen from any course offered by the Department that is three or more credits each.

PSYC BC1001 INTRODUCTION TO PSYCHOLOGY. 3.00 points.

This course is a prerequisite for the Psychology Major, as well as for most other Barnard PSYC courses (be sure to check all course information before enrolling in a course). The following Columbia University courses are considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: UN1001 The Science of Psychology; and UN1021 Science of Psychology: Explorations/Applications

PSYC BC1010 INTRO LAB EXPERIMENTAL PSYCH. 1.50 point.

Prerequisites: Note: This introductory lab course is intended for students who have not previously been enrolled in a psychology lab course. It is also highly recommended for First Year and Sophomore students.

Corequisites: PSYC BC1001

Corequisites: PSYC BC1001, or its equivalent, must be completed prior to or concurrently with BC1010. This lab course is intended for students who have not previously been enrolled in a psychology lab course; and a majority of seats are reserved for First Year and Sophomore students. A laboratory-based introduction to experimental methods used in psychological research. Upon successful completion of this course, students will know how to review the primary literature and formulate a hypothesis, design an experiment, analyze data using statistical methods, communicate the results of a scientific study through oral presentation and written manuscript, and carry out research studies under ethical guidelines. Students will be able to apply the acquired knowledge in all disciplines of Psychology and will be prepared to engage in advance research in fields including, but not limited to, Cognition, Learning, Perception, Behavioral Neuroscience, Development, Personality, and Social Psychology

PSYC BC1020 BEHAVIORAL RESEARCH METHODS AND ANALYSIS. 3.00 points.

This course is a prerequisite for all 2000-level PSYC lab courses, and a requirement for the Psychology Major. PSYC BC1001, or its equivalent, must be completed prior to or concurrently with this course. This class will introduce students to the fundamental scientific principles, experimental methods, and analytical approaches involved in the study of human behavior. The initial major topics to be covered include how basic scientific approach can be gainfully and ethically used to study human behavior. The following topics in the course will cover the most prevalent manners of collecting data in behavioral research and the most common types of statistical analyses and tests such data is subjected to. The latter topics in the course will introduce some of the more advanced experimental designs and statistical approaches that are more specific to the social sciences

PSYC BC1088 THE SCIENCE OF LIVING WELL. 4.00 points.
3 points for lecture + 1 point for recitation

What does it mean to live a life well lived? The main mission of this course is to provide an up-to-date understanding of theoretical, empirical, and applied advances in the science of well-being and self-actualization. Consideration will be given to conflicting viewpoints and their respective empirical support, including the benefits of embracing both comfortable and uncomfortable emotions, the measurement and development of different models of well-being, and the implications of deliberately attempting to increase well-being. Throughout the course we will engage in experiential learning and practical exercises which will inform our theoretical and empirical understanding of the latest scientific findings and help you in your own personal journey to satisfy the fundamental needs of human existence and bring out the best in yourself. This course is comprised of a lecture and a discussion section

PSYC BC1099 SCIENCE AND SCIENTISTS. 1.00 point.

Prerequisites: BC1001 or permission of the instructor.

Weekly meetings with researchers from Barnard, Columbia, and other guests to discuss the nature of scientific inquiry in psychology; and intellectual, professional, and personal issues in the work of scientists

PSYC BC1101 STATISTICS LECTURE AND RECITATION. 4.00 points.

Prerequisites: BC1001 and instructor permission. Enrollment limited to 20 students per recitation section.

Prerequisite (or co-requisite): PSYC BC1001. Lecture course and associated recitation section introducing students to statistics and its applications to psychological research. The course covers basic theory, conceptual underpinnings, and common statistics. The following Columbia University courses are considered overlapping and a student cannot receive credit for both the BC course and the equivalent CU course: STAT UN1001 Introduction to Statistical Reasoning; STAT UN1101 Introduction to Statistics; STAT UN1201 Introduction to Statistics

PSYC BC3195 SEMINAR IN EDUCATIONAL PSYCHOLOGY: HUMAN LEARNING AND EDUCATIONAL PRACTICE. 4.00 points.

Prerequisites: PSYC BC1001

This seminar provides an introduction and overview of key contemporary research and professional issues in the field of Educational Psychology. Educational psychology can help students develop well-informed, empirically sound, creative, and ethical judgments about educational goals, policies, and practices. This course examines the theoretical and applied aspects of learning, motivation, human development, assessment and evaluation in the educational setting. Content includes the study of learning theories as well as cognitive, emotional, and social learning theories that underlie education and human development. Emphasis is placed on developing skills to better understand learners to foster improved learning, influence and manage classroom learning, and recognize and consider individual differences

PSYC BC3362 ANXIETY, OBSESSIVE-COMPULSIVE, AND RELAT. 4.00 points.

Prerequisites: (PSYCH BC2141) and (PSYCH BC1001)

Prerequisites: (PSYCH BC2141) and (PSYCH BC1001) This course presents an in depth investigation of anxiety disorders, obsessive-compulsive disorder (OCD), and OCD-related disorders, from a primarily psychological perspective. The course will focus on the phenomenology, correlates, and contributing factors of these conditions. Students will also learn about the current psychological treatments for these disorders. Emphasis will be placed on recent empirical research findings

PSYC BC3363 PEDAGOGY HIGHER EDUC:PSYCH. 4.00 points.

Designed to examine the science of psychology and the complexities of teaching to create an environment conducive to involved and active learning. The seminar, especially designed for current and intended Teaching Assistants, covers ethical concerns, strategies for maintaining boundaries, mastery learning, and approaches for leading discussions. Course uses case methods, videotaping, research projects, and scenario analysis. Enrollment limited to 12

PSYC BC3365 The Psychology Of Conspiracy. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: Psych BC1001, BC1101/1102, two PSYC laboratory courses, and permission of the instructor. Enrollment limited to 16. Why do some people believe in ghosts, psychic powers, UFO abductions, astrology, alternative medicine, or conspiracy theories? Does it matter? In this seminar, we will consider potential psychological explanations for a wide range of anomalous beliefs and experiences, and the consequences those beliefs can have.

PSYC BC3366 Eating Disorders. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: PSYC BC1001, PSYC BC2141
 This course presents an in depth investigation of eating disorders including anorexia nervosa, bulimia nervosa, and binge eating from a primarily psychological perspective. The course will present both the current understandings of causes, correlates, and outcomes of eating pathology as well as the complexity and controversy surrounding these conceptualizations. *Enrollment limited to 20 students.* Senior psych majors will get first preference.

PSYC BC3367 Concepts, Questions, and Controversies in Evolutionary Psychology. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and permission of the instructor. Enrollment limited to 15 students.
 An examination of the major concepts, debates, and research of evolutionary psychology. Will explore the extent to which the human mind and behavior are shaped by natural selection to solve specific, long-standing problems faced by our species over evolutionary time, such as finding a romantic partner, child-rearing, and gathering food.

PSYC BC3368 PSYCHOLOGY OF CREATIVITY. 4.00 points.

Prerequisites: BC1001 and permission of the instructor. Consideration of classic Psychodynamic (the unconscious/incubation), Psychometric (testing/training), and Personality (train/motivation) models of creativity. Application of contemporary Process (cognitive/problem-solving) models to art, literature, and independently selected areas of expertise. Process models are involving constraint selection within well-established domains are emphasized

PSYC BC3369 Language Development. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: BC1001, one Psychology laboratory course, one of the following: PSYC W2240, BC1128/1129, BC1129, or LIN BC V1101, and permission of the instructor. Enrollment limited to 15 students. Examines the acquisition of a first language by children, from babbling and first words to complex sentence structure and wider communicative competence. Signed and spoken languages, cross-linguistic variation and universalities, language genesis and change, and acquisition by atypical populations will be discussed.

PSYC BC3371 Gender Development. 4 points.

Prerequisites: (PSYC BC1001) and (PSYC BC1129) or (PSYC BC1138) PSYC BC1001 Introductory Psychology or equivalent, PSYC BC1129 Developmental Psychology or PSYC BC1138 Social Psychology, one Psychology laboratory course.

This course examines how individuals develop a concept of gender, across the lifespan. What cues trigger the classification of others, and oneself, by gender? What physiological, cognitive, and sociocultural processes guide this development? We will explore how various theoretical approaches in psychology help us understand this fundamental aspect of development.

PSYC BC3372 Comparative Cognition. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and one additional course in psychology. Or permission of the instructor. Enrollment limited to 20 students. Review and critical evaluation of current empirical research investigating cognitive processes in both human and non-human species. Topics include comparisons in episodic memory, metacognition, theory of mind, self-awareness, and language abilities.

PSYC BC3373 HEALTH PSYCHOLOGY. 4.00 points.

Prerequisites: BC1001 and two more psychology courses, and permission of the instructor required. Consideration of research on the interaction of biological, psychological, and social factors related to physical health and illness. Topics include the relationship of stress to illness, primary prevention, mind-body methods of coping with stress and chronic illness (such as meditation), and the relationship between psychological factors and recovery from illness. Enrollment limited to 15

PSYC BC3379 PSYCH OF STEREOTYPING/PREJUDIC. 4.00 points.

Prerequisites: (PSYC BC1001) Permission of the instructor. Prerequisites: (PSYC BC1001) Permission of the instructor. Review of current literature from experimental social psychology pertaining to stereotyping and prejudice. Topics include: functions and costs of stereotyping, the formation and maintenance of stereotypes, and stereotype change. Recent research concerning the role of cognitive processes in intergroup perception will be emphasized

PSYC BC3381 Theory of Mind and Intentionality. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and one other Psychology course, or permission of the instructor. Enrollment limited to 15 students. Survey and critical analysis of the developmental and neurological research on theory of mind -the attribution of mental states like belief, desire, and knowledge to others- in humans and nonhuman animals. Emphasis on the role of intentionality, stages of acquisition, neurological and genetic bases, and deficits in theory of mind.

PSYC BC3382 ADOLESCENT PSYCHOLOGY. 4.00 points.

Prerequisites: BC1001 and BC1129 Developmental Psychology or permission of the instructor. Enrollment limited to 20 senior majors. Barnard students receive priority. Examines adolescent development in theory and reality. Focuses on individual physiological, sexual, cognitive, and affective development and adolescent experiences in their social context of family, peers, school, and community. Critical perspectives of gender, race and ethnicity, sexuality, and teen culture explored

PSYC BC3384 Social Cognition. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC 1001 and one of the following: BC1138/1137 Social Psychology, BC1115/1114 Cognitive Psychology, or permission of the instructor.

Survey of research from the field of social cognition, exploring cognitive processes involved in social functioning. Topics include attention, interpretation, evaluation, judgment, attribution, and memory processes. Both controlled and automatic processes will be considered, and the roles of motives, goals, and affective variables will be discussed.

PSYC BC3388 Imitation and Language. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and one Psychology Lab course, or permission of the instructor. Enrollment limited to 20 students. Examines the concept of imitation in behavior through research on animals, human development, and adult language use. Class meetings focus on discussion of reading material to develop a theory of the cognitive mechanisms of imitation that apply to language change in spoken communication.

PSYC BC3389 CURRENT TOPICS IN PERSONALITY. 4.00 points.**PSYC BC3390 CANINE COGNITION. 4.00 points.**

Prerequisites: BC1001 and one other Psychology course. Enrollment limited to 15 students. Permission of the instructor is required. An examination of the scientific study of the domestic dog. Emphasis will be on the evolutionary history of the species; the dogs social cognitive skills; canid perceptual and sensory capacities; dog-primate comparative studies; and dog-human interaction

Spring 2024: PSYC BC3390

Course Number	Section/Call Number	Times/Location	Instructor	Points	Enrollment
PSYC 3390	001/00456	T 10:10am - 12:00pm LI016 Milstein Center	Alexandra Horowitz	4.00	15/15

PSYC BC3391 Psychology of Time. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC1001 and additional psychology course, or permission of the instructor.

The seminar will explore how times are perceived, learned, remembered and used to guide decisions and behavior. The underlying brain mechanisms that create a sense of time and organize action will be discussed. Students will research how temporal information processing is foundational to core areas of psychology.

PSYC BC3393 Psychological Interventions for Developmental Disabilities. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: PSYC BC1001, BC2129, BC2156, or permission of the instructor. Seniors Psychology Majors given priority.

This course provides an overview of psychological intervention processes in the field of developmental disabilities. Course content includes discussions of clinical and ethical issues related to diagnosis and treatment, and in-depth review of procedures used to teach appropriate behavior repertoires to individuals with developmental disabilities such as Autism Spectrum Disorders.

PSYC BC3394 METACOGNITION. 4.00 points.

Prerequisites: BC1001, and one psychology laboratory course; final enrollment determined on the first day of class Metacognition is one of the latest psychological buzzwords, but what exactly is metacognition? Metacognition enables us to be successful learners, problem solvers, and decision makers, and as often been used synonymously with words such as language, awareness, and consciousness. In this seminar, we will examine various components of metacognition, including its role in learning and memory, and its existence in various non-human populations. In addition, we will explore the fragility of metacognition, including illusions of confidence and harmful control strategies that people use. Readings will include classic and important recent papers in the field, looking at metacognition as a higher-level cognitive process, and as knowledge individuals use to guide behavior

PSYC BC3395 Emotion and Self Regulation. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: BC1001 Introduction to psychology and BC1138 Social Psychology, or permission of the instructor. Enrollment is determined at the first class meeting.

In this course, students will examine neuroscientific and psychological research and scholarly work pertaining to the ability to regulate – to control and manage – thoughts, emotions, behaviors, and social interactions. Research suggests what is possible to change, and by what mechanisms. Students will explore how evidence can reasonably be interpreted.

PSYC BC3399 HUMAN AND MACHINES. 4.00 points.

Prerequisites: (PSYC BC1001) and Instructor approval

Prerequisites: (PSYC BC1001) and Instructor approval This course will examine the social psychology of Human-Machine interactions, exploring the idea that well-established social psychological processes play critical roles in interactions with non-social objects. The first half of the seminar will examine the social psychology of perception across distinct sensory modalities (shape, motion, voice, touch), whereas the second half will focus on social psychological processes between humans and non-human entities (objects, computers, robots)

PSYC BC3406 SEM IN CLINICAL PSYCH: PSYCHOTIC DISORDERS AND BIPOLAR DISORDERS. 4.00 points.

Prerequisites: Prerequisites: BC2141 or permission of the instructor. Enrollment limited to 24 students. Final enrollment determined on the first day of class.

This seminar will focus on the schizophrenia-spectrum disorders and bipolar disorders. Topics include historical perspectives, diagnoses and symptoms, neural changes associated with the disorders, and research on effective treatments. Emphasis will be places on the impact of serious mental illness on families and communities as well as cultural differences in diagnosis, treatment and outcomes

PSYC BC3408 SEMINAR IN CLINICAL PSYCHOLOGY. 4.00 points.

This course offers an in-depth examination of depressive disorders, including major depressive disorder, persistent depressive disorder, post-partum depression, premenstrual dysmorphic disorder, and pediatric depression. Topics include historical perspectives, current understanding of diagnoses and symptoms, neural changes associated with the disorders, and research on effective treatments. Emphasis will be placed on the impact of depressive disorders on families and communities, as well as gender and cultural differences in diagnosis, treatment and outcomes. Adolescence is a peak period for the onset of mental disorders and suicidal behaviors. The seminar is designed to enhance understanding of topics including, prevalence, etiology, risk factors, mechanisms, prevention and treatment approaches, and ethical considerations related to clinical research

PSYC BC3409 SOCIAL INTERACTION. 4.00 points.

In this seminar, we will read and discuss current literature in psychology related to social interaction. We will examine fundamental processes involved in social interaction, consider how social interaction varies as a function of people's social identities (e.g., gender, social class, and race), and discuss how social interaction influences close relationships, intergroup attitudes, and well-being. We will pay close attention to how these topics are studied (e.g., to methods, samples, and researcher identities) and to the broader implications of the research

PSYC BC3465 Field Work # Research Seminar: Toddler Center. 4.00 points.

PSYC BC1129/2129 (with or without lab) as well as permission of the instructor. The Barnard Toddler Center provides the focus for this seminar and research in applied developmental psychology, an amalgam of developmental, educational, and clinical psychology. The seminar integrates theory and research and for AY 20-21 will use daily recordings of the toddler sessions as the centerpiece for understanding early development. The unique context of Covid19 will be used to understand risks in development, especially for vulnerable children and families. Second term students will also conduct research on parenting during the pandemic

Prerequisites: Three psychology courses and permission of the instructor required during program planning the fall semester before the course is offered. Enrollment limited to 12 students; seniors are given priority.

Prerequisites: Three psychology courses and permission of the instructor required during program planning the fall semester before the course is offered. Enrollment limited to 12 students; seniors are given priority. This course introduces students to clinical and counseling work, and to psychodynamic ways of understanding and supporting people in psychological distress. Students secure a clinical placement for the course, and apply readings on psychodynamic notions of parenting, psychopathology, and therapeutic process to their clinical experiences. The course helps students clarify their professional goals, and provides the clinical experience that strengthens applications to social work programs, and that is required for applications to clinical and counseling doctoral programs

PSYC BC3606 INDEPENDENT STUDY. 1.00-4.00 points.

Prerequisites: Open to majors and non-majors with written permission of the department member who will supervise the project.

This course can be worth 1 to 4 credits (each credit is equivalent to approximately three hours of work per week), and requires a Barnard faculty as a mentor. The course will be taken for a letter grade, regardless of whether the student chooses 1, 2, 3, or 4 credits. The expectations for each of these options are as follows: 1 credit, 3h/week commitment, 5-10 page "Research Report" at the end of the term; 2 credits, 6h/week commitment, 5-10 page "Research Report" at the end of the term; 3 credits, 9h/week commitment, 15-20 page "Research Report" at the end of the term; 4 credits, 12h/week commitment, 15-20 page "Research Report" at the end of the term. "Research Report" is a document submitted to the person grading the student, the instructor of record for the section in which the student has enrolled. If a student is working off-site, then input from the off-site research mentor will inform the grading. The "Research Report" can take a variety of forms: progress reports on data collected, training received, papers read, skills learned, etc.; or organized notes for lab notebooks, lab meetings, etc.; or manuscript-like papers with Intro, Methods, Results, Discussion; or some combination thereof, depending on the maturity of the project. Ultimately, this will take different forms for different students/labs

Not offered during 2023-2024 academic year.

Prerequisites: BC1118/1119, BC3177, BC3380, or BIOL BC3362. Enrollment limited to 30 students.

Explores the evolution of disorders affecting children due to some impairment in the brain or nervous system. Constitutional vulnerabilities demonstrate that nervous system injury varies as a function of neurodevelopmental stage. Disorders to be studied include those impacting language, hearing, vision, movement, mood and emotion, and learning.

NSBV BC3367 Transformative Landmarks in Neuroscience. 4 points.

Not offered during 2023-2024 academic year.

Modern neuroscience incorporates topics from molecular neurobiology to cognition. Cognate disciplines include psychology, biology, biochemistry, chemistry, neuropharmacology, neurology and psychiatry, physics, computational science. We review neuroscience landmarks through readings of scientific publications, news reports, and controversies surrounding apparently transformative research, and contemplate contemporary viewpoints that have the benefit of hindsight.

NSBV BC3376 PSYCHOBIOLOGY OF INFANT DEVELOPMENT. 4.00 points.

Prerequisites: BC1001 and BC1128/1129 Developmental (lab and lecture taken together) or BC1129 (only lecture). Or permission of the instructor. Enrollment limited to 15 students.

Prerequisites: BC1001 and BC1128/1129 Developmental (lab and lecture taken together) or BC1129 (only lecture). Or permission of the instructor. Enrollment limited to 15 students. Analysis of human development during the fetal period and early infancy. Review of effects of environmental factors on perinatal perceptual, cognitive, sensory-motor, and neurobehavioral capacities, with emphasis on critical conditions involved in both normal and abnormal brain development. Other topics include acute and long term effects of toxic exposures (stress, smoking, and alcohol) during pregnancy, and interaction of genes and the environment in shaping the developing brain of high-risk infants, including premature infants and those at risk for Sudden Infant Death Syndrome

NSBV BC3377 Adolescent Neurobehavioral Development. 4 points.

Prerequisites: PSYC BC1001 Introduction to Psychology, or its equivalent; and permission of the instructor.

This seminar will explore neurobehavioral development throughout pubertal and adolescent stages of development. Specifically, topics will include how neuroendocrine changes induce pubertal onset, structural and functional changes in the adolescent brain, and how these developmental changes influence normal and abnormal psychophysiological processes. Students who complete this seminar will learn to: 1) demonstrate experimental methods used in developmental psychobiological research; 2) demonstrate the impact of structural and functional changes in the nervous system on the physiology and behavior of an individual; 3) critically read and interpret the primary research literature and discuss the strengths and weaknesses of experimental results; 4) conduct literature searches and synthesize these searches in to a comprehensive literature review; and 5) write a scientific literature review.

NSBV BC3380 Cognitive Neuroscience. 4 points.

Prerequisites: BC1001 and permission of the instructor. Enrollment limited to 20 students.

Exposition of research and theory in neuroscience with an emphasis on the use of neural imaging techniques (EEG, evoked potentials, MEG, PET, fMRI) for exploring sensation, perception, and cognition in the healthy, intact brain.

NSBV BC3381 Visual Neuroscience: From the Eyeball to the Mind's Eye. 4.00 points.

By absorbing electromagnetic radiation through their eyes, people are able to catch frisbees, recognize faces, and judge the beauty of art. For most of us, seeing feels effortless. That feeling is misleading. Seeing requires not only precise optics to focus images on the retina, but also the concerted action of millions of nerve cells in the brain. This intricate circuitry infers the likely causes of incoming patterns of light and transforms that information into feelings, thoughts, and actions. In this course we will study how light evokes electrical activity in a hierarchy of specialized neural networks that accomplish many unique aspects of seeing. Students will have the opportunity to focus their study on particular aspects, such as color, motion, object recognition, learning, attention, awareness, and how sight can be lost and recovered. Throughout the course we will discuss principles of neural information coding (e.g., receptive field tuning, adaptation, normalization, etc.) that are relevant to other areas of neuroscience, as well as medicine, engineering, art and design

Prerequisites: BC1001 and one of the following: BC1115, BC1119, or BIOL BC3280. Permission of the instructor is required. Enrollment limited to 20 students.

Basic principles of the study of drugs that influence the neural systems and induce changes in behavior. Molecular, biochemical and behavioral characterization of psychotropic drugs: stimulants, sedative-hypnotics, anxiolytics, alcohol, hallucinogens, and opiates. Etiology and treatment of psychological and neurological disorders.

NSBV BC3387 TOPICS IN NEUROETHICS. 4.00 points.

Prerequisites: BC1001 and one of the following: Neurobiology, Behavioral Neuroscience, Fundamentals of Neuropsychology, or permission of the instructor. Enrollment limited to 20 students.

Recent advancements in neuroscience raise profound ethical questions. Neuroethics integrates neuroscience, philosophy, and ethics in an attempt to address these issues. Reviews current debated topics relevant to the brain, cognition, and behavior. Bioethical and philosophical principles will be applied allowing students to develop skill in ethical analysis

Prerequisites: BC1001 and one of the following: BC1117, BC1119, BC3362, or permission of the instructor. Enrollment limited to 15 students.

This seminar will explore factors that modulate stress reactivity and the impact of stress on the structure and function of the nervous system and behavior. Topics will include how developmental stage, sex/gender, time of day, and experience influence how an organism responds to stress at endocrinological, neurobiological, and behavioral levels

NSBV BC3394 Neurobiology of Social Behaviors . 4 points.

Prerequisites: (PSYC BC2119) or (PSYC BC3362)

This course explores behavioral neuroscience through a guided reading and discussion of recent scientific literature involving research in two "opposite" behaviors, sexual courtship and aggression. These are complex social behaviors that are highly conserved across species. Although some of their features are species-specific, there are broad similarities throughout the animal kingdom. Complex interactions between genes, environmental signals, and hormones influence the development and manifestation of these behaviors, but the core circuitries involved appear to be pre-wired in the nervous system, as animals with no previous social experience can engage in normal encounters that are characterized by stereotyped behavioral patterns. The study of innate social behaviors in genetically tractable organisms offers unique opportunities to identify underlying neuronal circuitry, understand how this circuitry is genetically specified and elucidate the contributions of neuronal sexual dimorphism.

NSBV BC3396 Topics in Systems Neuroscience: The Receptive Field. 4 points.

Prerequisites: (Psyc BC1119) or (Biol BC3362)

How should we think about the brain? How can we simplify and interpret its dizzying complexities? And specifically, what conceptual frameworks are useful in constraining our interpretations of neuronal activity? This seminar – Topics in Systems Neuroscience – is aimed at defining and dissecting the ideas and models that guide our thinking about the brain. This semester the focus will be on the concept of the receptive field. We will examine how this idea has been applied across brain regions and sensory modalities and has been examined with experimental/computational approaches. Attention will be paid to both the historical background and contemporary views. The receptive field has provided a useful conceptual framework since the early 20th century. After developing the traditional concept of a sensory receptive field, we will critically examine the limits of this concept. This potentially simplifying concept underlying brain function also contains open questions regarding perception, cognition and behavior. By the end of the course we will develop a richer understanding of how conceptual frameworks, in general, can help (and hurt!) but ultimately hone our thinking.

NSBV BC3397 Neural Modulation. 4 points.

Prerequisites: BC1001 and permission of the instructor. Enrollment determined at first class meeting.

Excitatory and inhibitory neurotransmission is often influenced and altered by neuromodulators such as dopamine, acetylcholine, and serotonin. Imbalances in neuromodulation are implicated in many psychiatric disorders. This course will assess the role of neuromodulation under normal circumstances and how dysfunction in neuromodulation can lead to psychiatric disorders. This course will draw from ground breaking primary literature and review articles published in the field of neuroscience.

NSBV BC3398 PSYCHOBIOLOGY OF SLEEP. 4.00 points.

Prerequisites: PSYC BC 1001, or equivalent, and permission of instructor. Enrollment limited to 20 students.

This seminar will explore sleep and circadian rhythms, emphasizing how these factors and their disruption influence health, function, and well-being. Topics will include the physiological and neurobiological generation of sleep and circadian rhythms, and the interaction between these systems with cognitive, behavioral, endocrine, metabolic, and mood/psychiatric variables in humans

Prerequisites: PSYBC1119

This course provides a comprehensive overview of theoretical models and research relevant to the neurobiology, neurophysiology, neuroanatomy and neurodevelopmental processes underlying psychological trauma. Cognitive, emotional and behavioral symptoms associated with post traumatic experience are examined from a neuroscience perspective. Neurotherapeutic treatment interventions are reviewed and critiqued as models of applied clinical neuroscience

Philosophy (Barnard)

PHIL V2400 Psychology and Philosophy of Human Experience. 3 points.

Not offered during 2023-2024 academic year.

We will discuss some of the most fundamental questions that one can pose about human experience. For example, we will investigate how we experience time, whether anything really has color, the difference between imagining and seeing, whether beauty is subjective, how we understand other people's emotions, the ways in which the human mind is structured and the extent to which our minds are functionally fractionable. By drawing on both scientific and philosophical texts we hope to combine the best features of both approaches.

Consortium for Critical Interdisciplinary Studies

221 Barnard Hall
212-854-6146
ccis@barnard.edu

Our Mission

A joint effort by the [Africana Studies](#), [American Studies](#), and [Women's, Gender & Sexuality Studies](#) Departments, the Consortium for Critical Interdisciplinary Studies (CCIS) is dedicated to creating a vibrant intellectual community across disciplinary boundaries and fostering the in-depth study of the complex intersections of race, ethnicity, Indigeneity, gender, sexuality, and class at Barnard College.

For Barnard undergraduates, CCIS offers four interdisciplinary minors/concentrations...

1. [Interdisciplinary Concentration on Race and Ethnicity and the Minor on Race and Ethnicity \(ICORE/MORE\)](#)
2. [Environmental Humanities Minor and Concentration \(EHMC\)](#)
3. [Feminist/Intersectional Science and Technology Studies \(F/ISTS\)](#)
4. [Native American and Indigenous Studies \(NAIS\)](#)

All Barnard students, regardless of their major, have an opportunity to minor in one or more of these offerings. Students majoring in one of the three CCIS disciplines (Africana Studies, American Studies, and Women's Gender & Sexuality Studies) also have the opportunity to concentrate in one of these offerings, integrating the curriculum into their major requirements.

Interdisciplinary Concentration on Race and Ethnicity (ICORE) and Minor on Race and Ethnicity (MORE)

This program is supervised by the Steering Committee of the Consortium for Critical Interdisciplinary Studies (CCIS) at Barnard:

Professors: Severin Fowles (Associate Professor, Department of Anthropology)

Associate Professors: Monica Miller (English and Coordinator of the Consortium for Critical Interdisciplinary Studies)

Environmental Humanities Minor/Concentration

The Environmental Humanities Minor/Concentration (EHMC) will serve Barnard students in two ways. As a *concentration*, it will permit students in the three CCIS majors (Africana Studies, American Studies, and Women's Gender and Sexuality Studies) to collectively focus their studies on the ways in which pressing issues surrounding environmentalism, global warming, land- and water-rights activism, and non-human rights intersect with race, ethnicity, gender, and class. As a *minor*, it will be available to all Barnard students, providing them an opportunity to explore how scholarship across the humanities and social sciences contributes to wider environmental conversations.

Core Requirements

Six courses will be required for the EHMC. All participating students will be required to take the introductory lecture and lab in the Environmental Science department (EESC BC1001 Environmental Science I and EESC BC1011 Environmental Science I Lab) as well as WMST BC2150 PRACTICING INTERSECTIONALITY. The remaining three requirements will be electives.

Capstone

An optional 1 credit mini-course, convened each spring for EHMC seniors to prepare their capstone presentations. During spring term of their senior year, EHMC students present their work in the Environmental Humanities.

Electives

Each year, new courses exploring environmental themes are developed by faculty in the humanities and social sciences.

Africana Studies (Barnard)**

AFRS BC2005 CARIBBEAN CULTURE # SOCIETIES. 3.00 points.

This course offers a chronological study of the Anglophone, Hispanophone, and Francophone insular Caribbean through the eyes of some of the region's most important writers and thinkers. We will focus on issues that key Caribbean intellectuals—including two Nobel prize-winning authors—consider particularly enduring and relevant in Caribbean cultures and societies. Among these are, for example, colonization, slavery, national and postcolonial identity, race, class, popular culture, gender, sexuality, tourism and migration. This course will also serve as an introduction to some of the exciting work on the Caribbean by professors at Barnard College and Columbia University (faculty spotlights)

AFRS BC3020 Harlem Crossroads. 3 points.
Not offered during 2023-2024 academic year.

Studies Harlem in the context of African-American and African diaspora culture and society as well as American urbanization. Primarily focusing on Harlem of the nineteenth and twentieth centuries, the course offers students opportunities to discuss political economy, immigration, migration and the role of the city in social life.

AFRS BC3055 Slave Resistance in the United States from the Colonial Era to the Civil War. 3 points.
Not offered during 2023-2024 academic year.

Analyzes the multifaceted nature of slave resistance, its portrayal and theorization by scholars. Critically examines the various pathways of resistance of enslaved Africans and African-Americans, both individually and collectively (e.g., running away, non-cooperation, theft, arson, as well as verbal and physical confrontation, revolts and insurrections). Considers how gender shaped acts of resistance.

AFRS BC3110 THE AFRICANA COLLOQUIUM. 4.00 points.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 18 students. Priority will be given to Africana majors and CCIS students (Africana Studies, American Studies and Women’s Studies majors; minors in Race and Ethnic Studies).

This course is concerned with two interrelated topics: 1) the long, complicated history of voyages to Latin America; and 2) the myriad and evolving ways voyagers to the region have portrayed its landscapes, people, food, festivals, and more. The course will move chronologically from the 15th century to the present, with each week devoted to grappling with a type of voyage characteristic of a given era, including: conquest voyages undertaken by figures such as Christopher Columbus and Hernán Cortés settler-colonial voyages undertaken by Iberians seeking new lives in the New World captive voyages undertaken by Africans destined for enslavement in households, cities, and rural environs freedom voyages undertaken by African Americans escaping from slavery sex-tourism voyages undertaken by North Americans and Europeans We will view these topics through a combination of different forms of media (such as letters, travel accounts, features, and films) and traditional scholarly sources that will help contextualize them

AFRS BC3120 History of African-American Music. 3 points.
Not offered during 2023-2024 academic year.

Survey interrogates the cultural and aesthetic development of a variety of interconnected musical genres - such as blues, jazz, gospel, soul, funk, R&B, hip-hop, classical and their ever changing same/names - viewed as complex human activities daringly danced at dangerous discourses inside and outside the American cultural mainstreams.

AFRS BC3146 African American and African Writing and the Screen. 4 points.

Not offered during 2023-2024 academic year.

Focuses on the context and history of representations of African Americans and Africans in early American and other cinematographies; the simultaneous development of early film and the New Negro, Negritude and Pan African movements; and pioneer African American and African cinema.

AFRS BC3148 Literature of the Great Migration. 3 points.
Not offered during 2023-2024 academic year.

(Also ENGL BC 3148) Examination of fiction, poetry, essays and films about the Great Migration (1910-1950) of African-Americans from the rural South to the urban North, focusing on literary production in New York and Chicago. (This course satisfies the Harlem Requirement for the Africana Studies major).

AFRS BC3150 RACE #PERFORMNCE IN CARIBBEAN. 4.00 points.
Not offered during 2023-2024 academic year.

Prerequisites: Permission of the instructor. Sophomore Standing. Enrollment limited to 18 students.

Analysis of the shifting place and perception of Afro-Caribbean performance in Caribbean societies. This course takes a cross-cultural approach that examines performance through the lens of ethnography, anthropology, music and literary criticism.

AFRS BC3550 GAY HARLEM. 4.00 points.

This course explores representations of queer Harlem in African American literature, sonic culture, and performance. We will consider the history and making of Harlem, key figures of the Harlem Renaissance, and the aesthetic innovations of writers and artists who defied the racial, sexual, and gendered conventions of their time. We will be guided by an intersectional approach to the study of race, gender, and sexuality and the methods of Black queer studies, African American and African diaspora literary studies, as well as sound and performance scholarship. We will ask when, where, and what was/is gay Harlem; how we might excavate its histories; map its borders; and speculate on its material and imagined futures

AFRS BC3570 Africana Issues: Diasporas of the Indian Ocean. 4 points.
Not offered during 2023-2024 academic year.

The Indian Ocean has been called the cradle of globalization, a claim bolstered by seasonal monsoon winds and the trade that these enabled. We will consider the aesthetic histories of such trade by engaging literary and other cultural exchanges (including film, visual arts, music, and dance). What did the Zulu prophet Isaiah Shembe learn from Gujarati poets? Other than a major slaving center and source of spices, what role did Zanzibar play in the development of music and literary forms that look to Oman as well as the East Coast of Africa? We focus on four sites: Durban (South Africa), Bombay (India), Zanzibar (Tanzania) and Port Louis (Mauritius). This course will be taught simultaneously between Barnard in New York and the University of Witwatersrand in Johannesburg, South Africa. Students from both campuses will be encouraged to interact electronically and to establish a blog and website. The course will also have live-streamed guest speakers from chosen sites around the Indian Ocean.

Prerequisites: A 1000 level course in anthropology is strongly recommended but not required as a prerequisite
 As an introduction to the field of medical anthropology, this seminar addresses themes of health, affliction, and healing across sociocultural domains. Concerns include critiques of biomedical, epidemiological and other models of disease and suffering; the entwinement of religion and healing; technocratic interventions in healthcare; and the sociomoral underpinnings of human life, death, and survival. A 1000 level course in Anthropology is recommended as a prerequisite, although not required. Enrollment limited to 30. 4 units

ANTH UN3300 Pre-Columbian Histories of Native America. 3 points.
 CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
 Enrollment limited to 40.

This course explores 10,000 years of the North American archaeological record, bringing to light the unwritten histories of Native Americans prior to European contact. Detailed consideration of major pre-Columbian sites is interwoven with the insight of contemporary native peoples to provide both a scientific and humanist reconstruction of the past.

ANTH V3810 Madagascar. 4 points.
 Enrollment limit is 15. **Not offered during 2023-2024 academic year.**

Prerequisites: Non-Anthropology majors require the instructor's permission.
 Critiques the many ways the great Red Island has been described and imagined by explorers, colonists, social scientists, and historians —as an Asian-African amalgamation, an ecological paradise, and a microcosm of the Indian Ocean. Religious diasporas, mercantilism, colonization, enslavement, and race and nation define key categories of comparative analysis.

ANTH V3928 Religious Mediation. 4 points.
 Enrollment limited to 16. Instructor's permission is required. **Not offered during 2023-2024 academic year.**

Reading theories of media and of religion, we will examine how transformations in media technology shift the ways in which religion is encoded into semiotic forms, how these forms are realized in performative contexts, and how these affect the constitution of religious subjects and religious authority. Topics include word, print, image, and sound in relation to Islam, Pentecostalism, Buddhism and animist religions.

ANTH V3988 Race/Sexuality Science and Social Practice. 4 points.
 Enrollment limited to 26. **Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission.
 Scientific inquiry has configured race and sex in distinctive ways. This class will engage critical theories of race and feminist considerations of sex, gender, and sexuality through the lens of the shifting ways in which each has been conceptualized, substantiated, classified, and managed in (social) science and medicine.

Art History (Barnard)

AHIS GU4089 NATIVE AMERICAN ART. 3.00 points.
 This course looks closely at objects and images produced by Native North Americans across history. Grounding our study in essays and guest lectures from Native scholars, we will investigate the significance of the works and how and to whom meaning is communicated. Beginning with an introduction that links aesthetics and worldview using the conventional organizing principle of the culture area, we quickly move on to case studies that take up key issues that persist for Native people living under settler colonialism today, including questions of sovereignty, self-expression, transformation and representation. Along the way, we will also tackle historiographic questions about how knowledge about Native art has been produced in universities and museums and how Indigenous people have worked to counter those discourses

Comparative Literature (Barnard)

CLRS W4190 Race, Ethnicity, and Narrative, in the Russian/Soviet Empire. 3 points.
 CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Not offered during 2023-2024 academic year.

This course examines the literary construction of ethnic and cultural identity in texts drawn from the literatures of ethnic minorities and non-Slavic nationalities that coexist within the Russian and Soviet imperial space, with attention to the historical and political context in which literary discourses surrounding racial, ethnic, and cultural particularity develop. Organized around three major regions – the Caucasus, Central Asia, and the Russian Far East – readings include canonical "classics" by Aitmatov, Iskander, and Rytkeu as well as less-known texts, both "official" and censored.

Center for the Study of Ethnicity and Race

CSER W1012 History of Racialization in the United States. 3 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

The History of Racialization in the United States examines the development of race and racism through the study of significant historical circumstances that define the institutional structure of American Empire and of the resulting interactions among its peoples. Race is not static. Consequently, it is not an ahistorical object, nor a predetermined identity, nor a uniform category of analysis. Traditionally, the history of American race relations is the contact between racially defined groups over time and space of the effort required to maintain social and economic differences among them. Racialization, then, refers to the process by which one population group or many are "placed" in distinct racial categories.

CSER V3440 The Changing American City. 4 points.

Not offered during 2023-2024 academic year.

After decades of economic disinvestment, physical decline and social out-migration, the 1990s ushered in an era of urban revitalization in many U.S. cities, the effects of which resonate today. How can we situate these recent changes within a longer trajectory of urban change in the United States? What do we make of the contested claims on space, belonging and identity made by, or on behalf of, people living in changing urban places? How should we evaluate development interventions whose end results seem so often to diverge from their intentions? This course will develop practical inroads into the problem of the changing American city that will both complement and complicate commonplace intuitions about the urban change we witness unfolding around us. Readings stay close to anthropological and ethnographic perspectives. We will consider how focusing on the meanings and experiences of everyday life in urban spaces can problematize ideals often associated with urban living, including various forms of diversity. Additional readings will introduce students to analytical perspectives on urbanism, race, ethnicity, space and citizenship. Taken together, readings, primary materials, discussions and a field trip will equip students with the tools to approach contemporary urban change with an anthropological lens.

CSER W3510 Novels of Immigration, Relocation, and Diaspora. 4 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Course listed as *ENGL W3510*.

The master narrative of the United States has always vacillated between valorizations of movement and settlement. While ours is a nation of immigrants, one which privileges its history of westward expansion and pioneering, trailblazing adventurers, we also seem to long for what Wallace Stegner called a "sense of place," a true belonging within a single locale. Each of these constructions has tended to focus on individuals with a tremendous degree of agency in terms of where and whether they go. However, it is equally important to understand the tension between movement and stasis within communities most frequently subjected to spatial upheavals. To that end, this course is designed to examine narratives of immigration, migration, relocation, and diaspora by authors of color in the United States.

CSER UN3904 Rumor and Racial Conflict. 4 points.

This course will take a transnational look at the strange ways that race and mass rumors have interacted. From the judicial and popular riots in the U.S. justified by recurrent rumors of African-American insurrection, to accusations that French Jews were players in the 'white slave trade,' to tales of white fat-stealing monsters among indigenous people of Bolivia and Peru, rumors play a key role in constructing, enforcing, and contesting regimes of racial identity and domination. In order to grasp rumor's importance for race, we will need to understand how it works, so our readings will cover both instances of racialized rumor-telling, conspiracy theories and mass panics, and some key approaches to how rumors work as a social phenomenon. The instructor will expect you to post a response to the reading on Courseworks each week and to engage actively in class discussion. There will be an in-class midterm exam, and you will be able to choose between writing an independent research project or doing a take-home exam.

CSER W3906 Race in Scientific and Social Practice. 4 points.

Not offered during 2023-2024 academic year.

This class presents a genealogy of the development of the race concept since the 19th century. Most centrally, we will examine the ways in which race been conceptualized, substantiated, classified, managed and "observed" in (social) science and medicine. We will read that history of science in tandem with philosophical, anthropological, and historical literatures on race and the effects of racial practices in the social and political world writ large. This class will address a series of questions, historical and contemporary. For example, how has the relationship between "race" and "culture" been articulated in the history of anthropology in particular, and in racial theory more broadly? How and why were particular phenotypes understood to signify meaningful biological and social differences? Can there be a concept of race without phenotype—a solely genotypic racial grouping? More broadly, we will examine how particular scientific projects have intersected with, authorized, or enabled specific social and political imaginations.

CSER UN3928 COLONIZATION/DECOLONIZATION. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement
Enrollment limited to 22.

Prerequisites: Open to CSER majors/concentrators only. Others may be allowed to register with the instructor's permission.

ENGL BC3196 HARLEM RENAISSANCE LITERATURE. 4.00 points.
Not offered during 2023-2024 academic year.

In the summer of 2021, Home to Harlem will focus on the writing and collaboration of Zora Neale Hurston and Langston Hughes in the 1920s. We will explore the cultural history and aesthetic debates that animated Harlem in the 1920s by reading them through the work (poetry, fiction, essays, plays) of Barnard and Columbia's own, who, for a time juggled student life in Morningside Heights and the joys and challenges of being major players in the Harlem or New Negro Renaissance. Hurston and Hughes navigated the demands of being an artist and representative of "the race" in both similar and different ways. They worked together to shape the Renaissance according to their radical visions and were friends and collaborators until they famously fell out. The goal of this class is to plot the individual and collective artistic growth and experimentation of Hurston and Hughes, as well as create a digital timeline and rendering of their individual and collaborative development. To that end, this class will use either or both of the digital tools Scalar and Timeline.js in creative and collaborative ways. The class will partner with the Digital Humanities Center at Barnard for workshops on these digital tools that will be linked to all of the course assignments and final projects. No prior experience with these tools is necessary.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students.

Examines roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as *AFRS BC3121 Black Women in America*.

WMST BC3132 GENDERED CONTROVERSIES. 4.00 points.

Love and sex have long been studied as historical constructs that are traversed by social, political, and economic systems. In this course, we will supplement those dimensions with the often-overlooked lens of technological mediation. Starting from the premise that romantic love is deeply shaped by the affordances of the technology of the time, a critical awareness of technological mediation in romance – especially of digital technologies, i.e. online dating, social media, or cybersex – will afford us an understanding of how social categories such as gender, race, class, ability, and sexuality are shaped by technologies and in turn govern social and cultural perceptions of love, dating, and sex. Sandra Moyano-Ariza is Term Assistant Professor of WGSS and Research Director at BCRW. Her research works at the intersection of culture, philosophy, and digital technologies, with interests in the fields of media studies and digital scholarship, contemporary feminist theory, critical race theory, posthumanism, and affect theory

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldúa, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

Religion

219 Milbank Hall
212-854-2597

Department Assistant: Anna Hotard

At the beginning of the twenty-first century, religion plays a central role in virtually every aspect of human society around the globe. The Religion department's curriculum offers students the opportunity to explore the histories, texts, and practices of many of the world's religious communities and to consider both the profound ways in which religion has worked historically and how it continues to inform and affect the cultural, political, and ethical debates of the current moment. In addition, our curriculum invites students to reflect on the challenging theoretical questions that are generated by the category "religion" itself, an abstract category that has its own complicated history. The academic study of religion is self-consciously interdisciplinary, drawing upon the methods and insights of literary studies, historiography, social analysis, and cultural comparison. Moreover, the study of religion reminds us that religious identities demand sustained critical analysis, intersecting complexly as they do with race, class, gender, and ethnicity, among other categories of affiliation and identification. In its teaching, research projects, and public programming, the Religion department promotes engaged intellectual inquiry into the rich diversity of religious institutions, rituals, ideas, and communities both past and present.

The Departments of Religion at Barnard and Columbia marshal an array of academic approaches to the study of religion, representing the depth and diversity of the world's religious traditions, past and present. The category of religion—along with key related terms like belief, spirituality, mystical experience, and ritual—is historically and culturally contingent; many of our courses interrogate these terms and the conditions of their construction. Yet we are committed to engaging "religion," which persists so strongly in common usage and public debate, and is so hard to capture in any related domain or theoretical system.

Morningside Heights provides unique resources for the study of religion. The University's specialized programs and centers, especially its regional institutes, create a context for exploring in depth the linguistic, literary, political, and cultural milieus that bear on particular religious traditions. The new Center for the Study of Science and Religion enriches curricular offerings in that field. Barnard's Center for Research on Women often focuses on issues of ethics and policy where questions of religion and gender are paramount, and Barnard Religion faculty are particularly active in the area. Barnard and Columbia offer intensive language training in the languages of the major religious traditions of the world: Arabic, Chinese, Greek, Hebrew, Japanese, Latin, Persian, Sanskrit and other Indic languages, and Tibetan, among others. The Jewish Theological Seminary of America and Union Theological Seminary, with their world-renowned libraries, are our neighbors. And the city as a whole provides one of the world's best laboratories for the study of religion.

Our program tries to help students discover these resources and use them well. Many courses fulfill the College's general education requirements.

Mission

Goals for the Academic Study of Religion at Barnard
The faculty in Religion at Barnard have organized the curriculum around several interlocking goals:

- To help students learn to engage critically with different religious traditions in their historical and cultural settings;

- To attune students to the different theoretical, methodological, and disciplinary approaches required for critically interrogating different religious archives, performances, communal formations, artifacts, and ideas;
- To provide students with the critical tools for understanding the influence of religion on individuals and society;
- To open up the category of —religion# to critical investigation, both to consider its history and to understand how it comes to be applied to a variety of human and social phenomena.

Student Learning Outcomes

What Students Learn when Pursuing the Academic Study of Religion at Barnard

Students who are successful in our curriculum will learn to:

- Read/view/engage primary sources and scholarly materials critically and with subtlety;
- Situate religious texts, performances, artifacts, and ideas in historical, social, political, and cultural contexts;
- Understand the importance of perspective when analyzing religious ideas, claims, and sources;
- Express themselves fluently in writing and speaking about the materials under investigation.

In addition, they will:

- Develop an acquaintanceship with the history of theoretical debates about "religion" —how the intellectual history of the field has shaped the object of knowledge for the field—and
- Become familiar with a range of methodological approaches appropriate to the object of study (e.g., literary interpretation and analysis; historical contextualization; ethnographic participant observation; philosophical inquiry; analysis of visual, artistic, archaeological, architectural evidence).

Requirements for the Major

The department's strengths in comparative study, textual and social analysis, philosophy, theory, and cultural history allow students to balance close study in one area with a broad investigation of the field we name "religion." Working closely with an advisor in the department, majors construct a cluster of five courses that relate to one another in a coherent fashion (#1, below) and support the senior thesis. To complement this depth, they select three courses that lend breadth to their studies in religion (#2). Students considering Religion as a major should contact the chair or a member of the department in their sophomore year to begin planning their programs.

The Religion major requires twelve courses (a minimum of 40 credits), as follows:

1) Major cluster: **five courses**, including one seminar. As many as two of these courses may come from other departments, and individually supervised research (UN 3901-2: Guided Readings) may also be included. This cluster of courses may be organized around a particular tradition or geographic area: Hinduism, Islam, Religion in America, etc. Alternatively, students may design clusters that focus on a set of related subjects and concerns, such as: Religion in New York; Religion in theory and practice; Religion and culture; Religious texts and histories; Religion and migration; Religion, women, gender; and Religion, race, nation, ethnicity.

Yet these are only exemplary. Students are urged to design their own clusters, supplementing departmental listings with religion-related courses posted on the Barnard Religion Department's website as [Religion Related Courses](#). Courses taken outside of the religion department must be approved by the student's adviser or department chair. Several [sample majors](#) are posted on the Barnard Religion Department's website.

2) Breadth: **three** Religion courses - either lecture or seminar - that lend geographical, historical, and/or disciplinary range to a student's program.

3) One semester of the course entitled "Religion Lab" (Religion GU4905), which focuses on methods, strategies, and materials utilized in the field of religious studies. Through guided exercises and selected exemplary readings, students learn research skills for locating and identifying primary and secondary sources. They are also exposed to important scholarly frameworks necessary for properly analyzing these sources. Majors are encouraged to take this course by their junior year as it serves to prepare them for their senior thesis.

4) One semester of the course entitled "Theory" (UN3799), engaging major theoretical issues in the field.

5) The two-semester Senior Research Seminar (BC 3997-8), which must be taken in sequence, beginning in autumn and continuing through the spring, and which structures the experience of preparing a senior thesis. Students work together in this seminar to develop, critique, and accomplish their research projects, submitting a formal proposal and partial draft in the fall, and completing the research and writing in the spring.

Language Courses: Students may fulfill up to two of their required twelve courses through language study pending department approval.

If a language is considered vital or important to a student's major concentration, she may petition for credit with 1 year (two semesters) of courses counting as one course towards the religion major.

To summarize:

5 courses – Concentration
3 courses – Breadth
1 course –Religion Lab
1 course –Theory
2 courses – Senior Seminar

The department encourages study abroad, particularly in summers or in one semester of the junior year, and is eager to help facilitate internships and funded research. These possibilities often contribute very meaningfully to the senior essay project.

Minors and Combined Majors

A Religion minor comprises five Religion courses at any level, one of which must be RELI GU4105 RELIGION LAB. In addition, students are encouraged to include among the remaining four courses at least one seminar. Students intending to minor in Religion should contact the department chair.

Combined majors are offered with programs in Human Rights and in Jewish Studies.

Courses of Instruction

RELI UN1310 GOD. 3.00 points.

What is religion? And what does God have to do with it? This course will seek to engage a range of answers to these questions. The class is not a survey of all religious traditions. Rather, it will address religion as a comparative problem between traditions as well as between scholarly and methodological approaches. We will engage the issue of perspective in, for example, the construction of a conflict between religion and science, religion and modernity, as well as some of the distinctions now current in the media between religion, politics, economics and race. And we will wonder about God and gods.

RELI UN2405 CHINESE RELIGIOUS TRADITIONS. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

This course provides a chronological and thematic introduction to Chinese religions from their beginnings until modern times. It examines distinctive concepts, practices and institutions in the religions of China. Emphasis will be placed on the diversity and unity of religious expressions in China, with readings drawn from a wide-range of texts: religious scriptures, philosophical texts, popular literature and modern historical and ethnographic studies. Special attention will be given to those forms of religion common to both “elite” and “folk” culture: cosmology, family and communal rituals, afterlife, morality and mythology. The course also raises more general questions concerning gender, class, political patronage, and differing concepts of religion

RELI UN2779 INTRODUCTION TO NATIVE AMERICAN RELIGIOUS TRADITIONS. 3.00 points.

There are over 800 distinct Native American nations currently within the borders of the United States. This course offers a broad introduction to the diversity of American Indian religious systems and their larger functions in communities and in history. We will explore general themes in the study of Native American religious traditions as well as look at some specific examples of practices, ideas, and beliefs. Of particular importance are the history and effects of colonialism and missionization on Native peoples, their continuing struggles for religious freedom and cultural and linguistic survival, and the ways in which American Indians engage with religion and spirituality, both past and present, to respond to social, cultural, political, and geographical change

RELI UN3202 RELIGION IN EARLY AMERICA. 4.00 points.

This course examines religion in North America from the 1500s through the early 1800s with a focus on colonial projects, race and slavery, and gender. We begin with comparing Spanish and French Catholic and English Protestant colonies, missionary efforts, and systems of enslavement as well as how religion factored into Native Americans and African people’s survival and resistance. The second part of the class turns to the 1700s and the emergence of religious revivals and evangelicalism alongside increasing religious variety in the British colonies of North America. Finally, we examine the early United States (1790s-1850s) and ask how disestablishment, imperial ambitions, new religious movement, and debates over the “slavery question” transformed the religious landscape. While focused on religious history (and primarily different Christian traditions), the category of “religion” itself and theoretical frameworks for studying religion are also integral to the class

RELI UN3203 RELIGION IN THE MODERN US. 4.00 points.

This course examines the history of religion in the United States from the Civil War to the present through thematic units focused on the legal structures of religious freedom; race, religion, and nationality; healing, aesthetics, and embodiment; and, finally, religion and politics. Over the course of the semester, students will explore various religious communities as well as the ways social, political, and economic factors have shaped those traditions – and how religious communities have in turn shaped US society, politics, and culture. Students will also be introduced to key themes and debates in the field of American religious studies

RELI UN3210 MILLENNIUM: APOCALYPSE AND UTOPIA. 3.00 points.

Study of apocalyptic thinking and practice in the western religious tradition, with a focus on American apocalyptic religious movements and their relation to contemporary cultural productions, as well as notions of history and politics

RELI UN3216 Religious Histories of New York City. 4.00 points.

This class examines different religious histories of New York City from the early 1800s through the 1950s. We will explore how different religious traditions were shaped by the city and its diversity, and how those people and institutions left their imprints on the city we live in today. The first half of the semester focuses on intersecting themes of religion and capitalism, religion and gender and sexuality, and on the social dynamics of the city’s symbolic meanings as place of refuge and liberation (for domestic and foreign migrants) or as a locus of sin in need of moral reform. The second half of the semester turns to case studies of different neighborhoods including Harlem, the Lower East Side, Williamsburg, and Flushing. How did different religious communities conceptualize “the neighborhood” in relation to the larger city, and how did they grapple with diversity and change? Students will also be introduced to archival collections of the East Harlem Protestant Parish and several settlement houses located at the Burke Library at Union Theological Seminary and at Butler Library

RELI UN3304 Memory and Violence in Shi'i Islam. 4 points.

Not offered during 2023-2024 academic year.

Why do humans insist on remembering and often memorializing violence? And how do they decide when violence is worth remembering or not? This course ponders these questions through a case study by examining the martyrdom of Husayn b. Ali (d. 680), grandson of the Prophet Muhammad and the third Imam in Shi'i Islam. We will explore the many ways in which this violent event has acquired meaning for people around the world from the seventh century until today using the lens of "collective memory" and its role in community formation. There are no prerequisites, but background knowledge of Middle Eastern history will be very helpful.

RELI UN3314 QURAN. 4.00 points.

This course conceives of the Qur'an as a living text in constant flux through interactions with other religious traditions. It focuses on developing an understanding of the Qur'an's form, style, and content through a close reading of comparable religious texts. Major topics covered include the Qur'anic theory of prophecy, its treatment of the Biblical tradition (both that of the Hebrew Bible and the New Testament), and its perspective on pre-Islamic pagan religion. The central goals of the course include the ability to (a) analyze primary religious sources in a critical and objective manner and (b) construct coherent arguments based on concrete evidence. In a class of this nature, class members will naturally hold or develop a wide variety of opinions about the topics covered. The goal is not to adopt a single opinion concerning the interpretation of a particular text, but rather to support personal conclusions in a clear logical manner

Examines the competing currents within early Christianity, with emphasis placed on the literary and social expressions of Christian belief and identity. Topics to be covered include persecution and martyrdom, debates over authority and religious experience, orthodoxy and heresy, and asceticism and monasticism, among others

RELI UN3406 Space, Narrative, and Religion in India. 3 points.

Not offered during 2023-2024 academic year.

Course Description: This course is fundamentally about sacred places and the stories that people tell about and within them. We will explore the role that narratives – mythological, historical, personal, and academic – have played in the creation, maintenance and conceptualization of sacred spaces in South Asia. Each class in the first section of the course is devoted to a particular site or category of sites, and examines the roles that religious texts and iconography play in the traditions with which the sites are associated. In the second section of the course, we will consider ethnographic perspectives on religious journeys. Finally, in the third section, we will focus on the idealization of region or nation as a sacred space, and examines the manner in which narratives are invoked to formulate identities and to negotiate conflicts and differentials of power.

As we navigate these topics, we will explore answers to the following questions: How are spaces made "sacred"? What are the multiple types of narratives that come to be associated with sacred spaces, and what roles do they play in their production? How are such narratives transmitted, and for whom? How do religious practitioners utilize these spaces and their narratives in order to negotiate various facets of daily life, and in order to situate themselves within the religious landscape of South Asia?

RELI UN3517 Queer Theory, Religion, and Their Discontents. 3.00 points.

For the most part queer studies and religious studies have met each other with great suspicion and little interest in the conceptual resources of the respectively other field. Our guiding questions will be: What does religion have to do with queerness? What does queerness have to do with religion? Queer theory and activists, unless they already identify as religious, often have little or little good to say about religion. Conversely, many religious traditions intensively regulate gender, sex, sexuality, and especially queerness. this course will explore how religious studies can enrich queer theory and how queer theory can reshape our thinking about religious studies. But beyond the mutual disinterest, anxieties, and animosities, queer studies and religious studies share actually a whole range of core interests and questions, such as embodiment, sexuality, gender-variability, coloniality, race appearing as religious identity and religious identity as gendered, as well as the role of catastrophe, utopia, and redemption in our experience of the world. We will examine questions about religion come to the fore when we paying especially attention to queerness, gender, sexuality, pleasure, pain, and desire. Equally, we will examine how queer discourses mobilize religious and theological images and ideas, especially where these images and ideas are no longer clearly recognizable as having religious origins. Rather than trying to settle on definitive answers, this course will cultivate a process of open-ended collective inquiry in which students will be encouraged to think autonomously and challenge facile solutions. Students should come away from the course with an expanded sense of how we grapple with issues related to gender, sexuality, desire, and embodiment in our everyday lives and how religion and religious formations are entangled with these issues well beyond religious communities. Ideally, students should experience this course as enlarging the set of critical tools at their hands for creative and rigorous thinking

RELI UN3671 Religion and Human Rights. 4.00 points.

What is the relationship between religion and human rights? How have different religious traditions conceived of “the human” as a being worthy of inherent dignity and respect, particularly in moments of political, military, economic, and ecological crisis? How and why have modern regimes of human rights privileged some of these ideas and marginalized others? What can these complicated relationships between religion and human rights explain some of the key crises in human rights law and politics today, and what avenues can be charted for moving forward? In this class, we will attempt to answer these questions by first developing a theoretical understanding of some of the key debates about the origins, trajectories, and legacies of modern human rights’ religious entanglements. We will then move on to examine various examples of ideas about and institutions for protecting “humanity” from different regions and histories. Specifically, we will examine how different societies, organizations, and religious traditions have addressed questions of war and violence; freedom of belief and expression; gender and sexual orientation; economic inequality; ecology; and the appropriate ways to punish and remember wrongdoing. In doing so, we will develop a repertoire of theoretical and empirical tools that can help us address both specific crises of human rights in various contexts, as well as the general crisis of faith and observance of human rights as a universal norm and aspiration for peoples everywhere

RELI UN3881 The Doctrine of Discovery: Religion, Law, and Legacies of 1492. 4.00 points.

How did European-Christians justify the colonization of the Americas? Did these justifications vary between different European empires, and between the Protestant and Catholic faiths, and if so, how? Do these justifications remain in effect in modern jurisprudence and ministries? This class explores these questions by introducing students to the Doctrine of Discovery. The Doctrine of Discovery is the defining legal rationale for European Colonization in the Western Hemisphere. The Doctrine has its origins in a body of ecclesiastic, legal, and philosophical texts dating to the late-fifteenth century, and was summarized by Chief Justice John Marshall of the United States Supreme Court, in the final, unanimous decision the judiciary issued on the 1823 case Johnson v. M’Intosh. Students will be introduced to the major, primary texts that make up the Doctrine, as well as contemporary critical studies of these texts and the Doctrine in general

RELI BC3996 Religion Salon: New Directions. 1.00 point.

The Religion Salon is a one-point course in the Religion department, designed to offer students an introduction to new areas of the academic study of religion and/or new approaches to the field. The Religion Salon will be offered as a supplement to an existing course offered in the same semester and will be open to (but not required of) the students in that existing course as well as to students who wish to take the Salon as a stand-alone one-point course. The Religion Salon will feature guest scholars whose research and teaching extend into new areas and/or engage in new approaches to the academic study of religion

RELI GU4002 CURATING ISLAM IN NEW YORK CITY. 4.00 points.

This course focuses on the ways in which museums conceptualize, contextualize, curate and display Islamic art. In the process, it interrogates the degree to which the orientalist past and the secular present shapes our understanding of the Muslim world. Students will not just engage with material objects from Muslim societies but also consider the choices museums make about their display and presentation. These choices, in turn, speak to the role of museums in defining a specific understanding of the "sacred." Finally, students will learn to thoughtfully and critically pose questions about the roles that museums as public institutions play in sharpening public and private understandings of Islam. The course begins with a general discussion of material objects in the study of religion. This is followed by a broad survey of Islamic Art which both describes and critiques the category as it has been framed in the Academy. Students then visit a number of museums to learn about the style and content of their Islamic collections. The course concludes by engaging a different kind of curation, namely oral histories in the Brooklyn Museum

In their research, scholars of religion employ a variety of methods to analyze texts ranging from historical documents to objects of visual culture. This course acquaints students with both the methods and the materials utilized in the field of religious studies. Through guided exercises, they acquire research skills for utilizing sources and become familiarized with dominant modes of scholarly discourse. The class is organized around a series of research scavenger hunts that are due at the start of each week's class and assigned during the discussion section (to be scheduled on the first day of class). Additional class meeting on Thursdays

RELI GU4172 Confession. 4.00 points.

This seminar explores the idea and practice of "confession" in a range of manifestations (in legal and judicial contexts, in religious practice, in memoir/autobiography, in political and personal reckoning with the past, in art and popular culture, among others) and from a variety of disciplinary perspectives (media studies, history, theology, literature, psychoanalysis, art history, and journalism). As the sacramental practice of confession recedes from significance within traditional religious contexts, the social practice of confession expands into new arenas. This seminar is devoted to theorizing this shifting terrain through the critical examination of a variety of primary sources and scholarly interventions

RELI GU4207 Religion and the Afro-Native Experience. 4.00 points.

African Americans and Native Americans have a shared history of racial oppression in America. However, the prevailing lenses through which scholars understand settler colonialism, religion, and black and indigenous histories focus overwhelmingly on the dynamics between Europeans and these respective groups. How might our understanding of these subjects change when viewed from a different point of departure, if we center the history of entanglements between black and native lives? How does religion structure the overlapping experiences of Afro-Native peoples in North America? From political movements in Minneapolis, Oakland, and New York City to enslavement from the Cotton Belt to the Rio Grande, this class will explore how Africans, Native Americans, and their descendants adapted to shifting contexts of race and religion in America. The course will proceed thematically by examining experiences of war, dislocation, survival, and diaspora

RELI GU4322 EXPLORING THE SHARIA: ISLAMIC LAW. 4.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The platform of every modern "Islamist" political party calls for the implementation of "the shari'a." This term is invariably (and incorrectly) interpreted as an unchanging legal code dating back to 7th century Arabia. In reality, Islamic law is an organic and constantly evolving human project aimed at ascertaining God's will in a given historical and cultural context. This course offers a detailed and nuanced look at the Islamic legal methodology and its evolution over the last 1400 years. The first part of the semester is dedicated to "classical" Islamic jurisprudence, concentrating on the manner in which jurists used the Qur'an, the Sunna (the model of the Prophet), and rationality to articulate a coherent legal system. The second part of the course focuses on those areas of the law that engender passionate debate and controversy in the contemporary world. Specifically, we examine the discourse surrounding Islamic family (medical ethics, marriage, divorce, women's rights) and criminal (capital punishment, apostasy, suicide/martyrdom) law. The course ends by discussing the legal implications of Muslims living as minorities in non-Islamic countries and the effects of modernity on the foundations of Islamic jurisprudence. This class is designed for students interested in a close examination of the Islamic legal system; it is not a broad introduction to the Islamic religion. The format of the class will vary from topic to topic but students should anticipate *extensive* participation through in-class debates

RELI GU4325 Sufism. 4 points.

Prerequisites: Permission of instructor.

This is a seminar for advanced undergraduate and graduate students who wish to gain an understanding of the richness of Sufism (Islamic mysticism). We will examine the historical origins, development and institutionalization of Sufism, including long-standing debates over its place within the wider Islamic tradition. By way of a close reading of a wide range of primary and secondary sources, we will examine Sufi attitudes toward the body, Sufi understandings of lineage, power and religious authority, as well as the continued importance of Sufism in the modern world

RELI GU4326 SUFISM IN SOUTH ASIA. 4.00 points.

Sufism or tassawuf has misleadingly been described as the mystical side of Islam, implying that it is somehow detached from the material world. Throughout the history of Islam, Sufi ideas, practices, and institutions have borne a complex, intimate, and sometimes fraught relationship with other aspects of Islamic tradition and practice, a relationship that has also been profoundly impacted by Orientalist scholarship in the colonial period and by global reformist currents in the postcolonial period. This seminar for advanced undergraduates and graduate students is an interdisciplinary investigation of how Sufism has been affected by the historical, sociocultural, political, and everyday environments in which it is experienced and practiced, with a particular focus on South Asia. Eclectic in approach, we will begin by considering how Sufism has been construed and even constructed by scholars, considering how modern notions of the self, religion, and the political have shaped scholarly understandings of what Sufism is. Focusing on bodily practices and well known individual Sufis who lived in South Asia during different historical periods, we will use them as a vehicle for understanding Sufi experience within the context of the evolving Sufi orders within specific local spaces. We will consider why Sufism has become such a target of controversy and ambivalence among Muslims in the modern world and trace some of the changing controversies and tensions that Sufis have struggled with over time, focusing on their understandings of self, society and reality

RELI GU4345 World Religions. 4.00 points.

(1) We begin with a study for the Parliament of the World's Religions (PWR), held at the Columbian Exhibition at Chicago in 1893, because it is so often regarded as one of the great annunciatory moments for the field. A number of the 19th-century European "founding fathers" were invited or present, as was Swami Vivekananda, who has been at least as significant as any of them for the development of the field as a global idea. The PWR's American location broadens Tomoko Masuzawa's magisterial description of the "invention of world religions" by initially shifting attention away from its European base. It also introduces us to the element of display involved in announcing this idea and to one of its most important institutional partners: the University of Chicago. (2) In the second part of the course we investigate the consolidation/invention of the conceptual entities that comprise "world religions," as well as debates about just how many of them they are, and by what principle of accounting: To exemplify the production of "isms" that are said to comprise the world religions, we investigate the conceptual origins of Hinduism, Buddhism, Islam, the Judeo-Christian Tradition, and most recently The Indigenous. (3) At the end we consider an institution founded around the idea of World Religions—Harvard's Center for the Study of World Religions—and wonder how it compares to what has been done at Columbia and its neighbor institutions in New York: the Interfaith Center of New York, the Jewish Theological Seminary, and Union Theological Seminary. (4) The course includes a workshop (2/21) in which we discuss various materials we might use if we ourselves were asked to teach a "world religions" course. We conclude with a mini-conference (4/24) in which you present your work and respond to that of others. There are two possibilities for the sort of work you might do, as listed below. Whichever you choose, please discuss your intentions with me by Friday, February 23. A two-page proposal and draft bibliography are due by midnight that day. OPTIONS: (a) You can do a research paper on some aspect of the course—possibly extending to areas about which we have not specifically read and talked. (b) Or, if you wish, you can design your own World Religions course, providing a syllabus with all its constituent parts and a 7-8 double-spaced paper explaining why you have structured the course as you have. Be sure to say how you envision the group of students you'll be working with. As part of your preparation, discuss the contents and approach of your course with members—or in some way affiliates (even apostates!)—of at least three of the religious groups or traditions involved

RELI GU4513 BUDDHISM AND NEUROSCIENCE. 4.00 points.

With the Dalai Lamas marked interest in recent advances in neuroscience, the question of the compatibility between Buddhist psychology and neuroscience has been raised in a number of conferences and studies. This course will examine the state of the question, look at claims made on both sides, and discuss whether or not there is a convergence between Buddhist discourse about the mind and scientific discourse about the brain

RELI GU4535 BUDDHIST CONTEMPLATIVE SCIENCES. 4.00 points.

Buddhist arts and sciences traditionally are divided into the interconnected disciplines of ethics (*śīla*), wisdom/philosophy (*prajñā*), and "meditation" or experiential cultivation (*samādhi/bhāvanā*). This seminar course introduces the latter discipline, thus complementing and completing Prof. Yarnall's Columbia seminars on Buddhist Ethics (RELI UN3500) and Indo-Tibetan Buddhist Philosophy (RELI GU4630), either of which—in addition to his introductory lecture course on Indo-Tibetan Buddhism (RELI UN2205)—are encouraged as prerequisites. This course will provide a detailed presentation of key Buddhist contemplative sciences, including: stabilizing meditation (*śamatha*); analytic insight meditation (*vipāśyanā*); cultivation of the four immeasurables, and form and formless trances; mind cultivation (*lo jong*); mindfulness meditation; Zen meditation; great perfection (*dzogchen*); and the subtle body-mind states activated and transformed through advanced tantric yoga techniques. These arts and sciences will be explored both within their traditional interdisciplinary frameworks, as well as in dialog with related contemporary disciplines, including: cognitive sciences, neuroscience, psychology, psychiatry, philosophy, epistemology, and so forth. To be conducted in a mixed lecture/seminar format (active, prepared participation required)

This seminar will examine the history of the impact of technology and media on religion and vice versa before bringing into focus the main event: religion today and in the future. We'll read the classics as well as review current writing, video and other media, bringing thinkers such as Eliade, McLuhan, Mumford and Weber into dialogue with the current writing of Kurzweil, Lanier and Taylor, and look at, among other things: ethics in a Virtual World; the relationship between Burning Man, a potential new religion, and technology; the relevance of God and The Rapture in Kurzweil's Singularity; and what will become of karma when carbon-based persons merge with silicon-based entities and other advanced technologies

RELI GU4619 Islam in Popular Culture. 4.00 points.

This course interrogates seminal issues in the academic study of Islam through its popular representation in various forms of media from movies and television to novels and comic books. The class is structured around key theoretical readings from a range of academic disciplines ranging from art history and anthropology to comparative literature and religion. The course begins by placing the controversies surrounding the visual depiction of Muhammad in historical perspective (Gruber). This is followed by an examination of modern portrayals of Muslims in film that highlights both the vilification of the “other” (Shaheen) and the persistence of colonial discourses centered on the “native informant” (Mamdani). Particular emphasis is given to recent pop cultural works that challenge these simplistic discourses of Islam. The second half of the course revisits Muhammad, employing an anthropological framework (Asad) to understand the controversies surrounding Salman Rushdie’s Satanic Verses. The obsession with a gendered depiction of Islam is then examined through an anthropological framework that sheds light on the problems of salvation narratives (Abu Lughod). The course ends with a look at the unique history of Islam in America, particularly the tension between immigrant and African-American communities

RELI GU4998 RELIGION AND THE INDIAN WARS. 4.00 points.

The frontier is central to the United States’ conception of its history and place in the world. It is an abstract concept that reflects the American mythology of progress and is rooted in religious ideas about land, labor, and ownership. Throughout the nineteenth century, these ideas became more than just abstractions. They were tested, hardened, and revised by U.S. officials and the soldiers they commanded on American battlefields. This violence took the form of the Civil War as well as the series of U.S. military encounters with Native Americans known as the Indian Wars. These separate yet overlapping campaigns have had profound and lasting consequences for the North American landscape and its peoples. This course explores the relationship between religious ideology and violence in the last half of nineteenth century. Organized chronologically and geographically, we will engage with both primary sources and classic works in the historiography of the Indian Wars to examine how religion shaped U.S. policy and race relations from the start of the Civil War through approximately 1910

RELI GU4999 GLOBAL INDIGENOUS RELIGIOUS HISTORIES. 4.00 points.

Nomads, natives, peasants, hill people, aboriginals, hunter-gatherers, First Nations—these are just a handful of the terms in use to define indigenous peoples globally. The names these groups use to describe themselves, as well as the varying religious practices, attitudes, and beliefs among these populations are far more numerous and complex. For much of recorded history however, colonial centers of power have defined indigenous peoples racially and often in terms of lacking religion; as pagan, barbarian, non-modern, and without history or civilization. Despite this conundrum of identity and classification, indigenous religious traditions often have well-documented and observable pasts. This course considers the challenges associated with studying indigenous religious history, as well as the changing social, political, and legal dimensions of religious practice among native groups over time and in relationship to the state. Organized thematically and geographically, we will engage with classic works of ethnohistory, environmental history, indigenous studies, anthropology, and religious studies as well as primary sources that include legal documentation, military records, personal testimony, and oral narrative

Mission

As part of the College’s mission to prepare scientists, policymakers, and an educated citizenry for the moral challenges presented by future scientific advances, Barnard offers a minor in which students can explore a unique collection of courses dealing with issues at the point where science, public policy, and societal concerns intersect. The minor consists of courses divided into two categories. One category is made up of more science-oriented courses and the other is made up of more policy-oriented courses. Students would select a total of 5 courses overall, with at least two from each of the categories. There are two seminar courses that explicitly deal with the interplay between science, policy and society, which are included in both categories, but can only be counted once. SCPP courses come from various disciplines and cover a range of issues, such as medicine, public health, genomics, technology, and the environment. Students who minor in SCPP will learn to analyze issues from scientific, policy, and societal perspectives.

Seminar

A comparative study of science in the service of the State in the U.S., the former Soviet Union, Fascist Italy, and Nazi Germany during pivotal periods through the first half of the 20th century. Topics to be covered include the political and moral consequences of policies based upon advances in the natural sciences making possible the development of TNT, nerve gas, uranium fission and hydrogen fusion atomic bombs. Considers the tensions involved in balancing scientific imperatives, patriotic commitment to the nation-state, and universal moral principles and tensions faced by Robert Oppenheimer, Andrei Sakharov, Neils Bohr and Werner Heisenberg. Selected readings include: Michael Frayn's play Copenhagen, Hitler's Uranium Club by Jeremy Bernstein, Brecht's Galileo, John McPhee's The Curve of Binding Energy, Richard Rhodes' The Making of the Atomic Bomb

SCPP BC3336 GENETICS AND SOCIETY. 4.00 points.

An exploration of the growing knowledge and technological advances in genetics, with a focus on human genetics, using scientific, popular and artistic sources. The course will cover areas such as genetic testing, personalized medicine, ancestry analysis, genome editing with CRISPR-Cas9, stem cells and cloning. It will involve an examination of scientific sources, portrayals in popular culture and discussions of some of the ethical implications and social/political impacts

Not offered during 2023-2024 academic year.

Corequisites: Enrollment limited to 18 students.

Museum exhibitions educate the public, inform discourse, and shape opinion. Students work with curators and exhibition designers on conceptualization and research, design and preparation, writing interpretative material, and developing media and ancillary programming. Students engage in the communication of learning goals through both the exhibition's content and its physical manifestation.

Cross-Listed Courses

BIOL UN3995 (Section 1) Topics in Biology: Crossroads in Bioethics. 1-2 points.

Prerequisites: at least one introductory course in biology or chemistry. This two credit multidisciplinary and interactive course will focus on contemporary issues in bioethics. Each topic will cover both the underlying science of new biotechnologies and the subsequent bioethical issues that emerge from these technologies. Classroom time will be devoted to student discussions, case presentations, and role playing. Topics include human trafficking, stem cell research, human reproductive cloning, neuroethics, genetic screening, human-animal chimeras, synthetic biology, bioterrorism, and neuroimaging.

COMS BC3420 PRIVACY IN A NETWORKED WORLD. 4.00 points.

The ubiquity of computers and networks in business, government, recreation, and almost all aspects of daily life has led to a proliferation of online sensitive data: data that, if used improperly, can harm the data subjects. As a result, concern about the use, ownership, control, privacy, and accuracy of these data has become a top priority. This seminar course focuses on both the technical challenges of handling sensitive data, the privacy implications of various technologies, and the policy and legal issues facing data subjects, data owners, and data users

EEEB GU4005 Conservation Policy. 3 points.

Prerequisites: Students should have completed at least one course in ecology, evolution or conservation biology.

The purpose of this course is to arm emerging scientists with an understanding of conservation policy at the city, state, federal and international levels. Our focus will be on understanding the science that informs conservation policy, evaluating the efficacy of conservation policies for achieving conservation goals, and learning about the role that scientists play in forming policy.

EEEB GU4321 HUM NATURE:DNA,RACE # IDENTITY. 4.00 points.

The course focuses on human identity, beginning with the individual and progressing to communal and global viewpoints using a framework of perspectives from biology, genetics, medicine, psychiatry, religion and the law

EEEB GU4700 RACE:TANGLED HIST-BIOL CONCEPT. 4.00 points.

Enrollment limited to 15. Priority given to EBHS majors/concentrators.

From Aristotle to the 2020 US census, this course examines the history of race as a biological concept. It explores the complex relationship between the scientific study of biological differences—real, imagined, or invented and the historical and cultural factors involved in the development and expression of "racial ideas." Scientific background not required. [Additional hour for film screenings weekly in second half of the semester—attendance at films is mandatory.] Please note that this course DOES NOT fulfill the SC requirement at the College or GS.

EESC UN2330 SCIENCE FOR SUSTAINABLE DEVPT. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

The course provides students with the natural science basis to appreciate co-dependencies of natural and human systems, which are central to understanding sustainable development. After completing the course, students should be able to incorporate scientific approaches into their research or policy decisions and be able to use scientific methods of data analysis. The semester will highlight the climate system and solutions from both physical and ecological perspectives; water resources; food production and the cycling of nutrients; and the role of biodiversity in sustainable development. The course emphasizes key scientific concepts such as uncertainty, experimental versus observational approaches, prediction and predictability, the use of models and other essential methodological aspects.

HSPB UN2950 Social History of U.S. Public Health. 4.00 points.

The purpose of this course is to provide students with an historical understanding of the role public health has played in American history. The underlying assumptions are that disease, and the ways we define disease, are simultaneously reflections of social and cultural values, as well as important factors in shaping those values. Also, it is maintained that the environments that we build determine the ways we live and die. The dread infectious and acute diseases in the nineteenth century, the chronic, degenerative conditions of the twentieth and the new, vaguely understood conditions rooted in a changing chemical and human-made environment are emblematic of the societies we created. Among the questions that will be addressed are: How does the health status of Americans reflect and shape our history? How do ideas about health reflect broader attitudes and values in American history and culture? How does the American experience with pain, disability, and disease affect our actions and lives? What are the responsibilities of the state and of the individual in preserving health? How have American institutions--from hospitals to unions to insurance companies--been shaped by changing longevity, experience with disability and death?

NSBV BC3387 TOPICS IN NEUROETHICS. 4.00 points.

PHIL V2593 Science and Religion. 3 points.

Open to all undergraduates. **Not offered during 2023-2024 academic year.**

The course investigates what many people have viewed as a "quarrel" between science and religion. It explores what science is, and what religion is, and asks what authority can offer for the various claims they make. As the natural sciences provide increased knowledge of the cosmos, is there still a place for religion? The course has no prerequisites.

PHIL UN2702 Contemporary Moral Problems. 3 points.

Questions about how people should act have historically been central to philosophy. This course introduces students to philosophy through an examination of some important moral problems that arise in the twenty-first century. The aim is not only to offer ideas for thinking through the issues covered, but also to provide tools for general moral reflection. Topics covered will include: the legitimacy of asking migrants to abandon their traditional practices, responsibilities to distant people and to future generations, abortion and genetic testing of the unborn, the proper treatment of animals, and the permissibility of war and terrorism.

PHIL UN3654 Philosophy of Psychology. 3 points.

Considers psychology from the perspective of philosophy of science and the plausibility of various philosophical positions in light of the best current theories of psychology. Examines the assumptions and explanatory strategies of past and present "schools of psychology" and the implications of recent work in psychology for such perennial philosophical problems as moral responsibility and personal identity.

BC: Fulfillment of General Education Requirement: Reason and Value (REA)., BC: Fulfillment of General Education Requirement: Ethics and Values.

Not offered during 2023-2024 academic year.

Prerequisites: Limited enrollment by permission of the instructor. First-day attendance required.

Philosophical examination of moral issues in medical theory and practice. Analysis of the ethics of the doctor-patient relationship, e.g., informed consent, truth-telling, paternalism; topics in bioethics, e.g., abortion, euthanasia, experimentation on humans; justice and access to health care; human genetics.

PHIL UN3800 PHILOSOPHY, JUSTICE AND SOCIAL ACTIVISM. 4.00 points.

In his Theses on Feuerbach, Karl Marx writes, "Philosophers have only interpreted the world in various ways; the point is to change it." The questions to ask in response to Marx's exhortation include: how do we recognize the need for change and appropriately effect it? What are the relations between our goals and the means to them? How can we better understand our goals to make the means more suitable? When we organize to produce results, what are we doing? Do we know exactly who and what we want to change? What are the "ethics of process"? What exactly do we do when we organize? A tentative definition: to organize is to bring together individuals who have common interests in a way that will enhance their power. What kind of power is this? What other forms of power are there? What is the best form of coordinating among individuals? If we better understand the dynamics of organizing, should we reconceive our goals accordingly? How do we better tap into shared values and concerns? What temptations and distractions get in the way of our goals? What problems prevent us from achieving them? Do we have goals that can be achieved? If not, how can we revise them?

PUBH UN3100 FUNDAMENTALS OF GLOBAL HEALTH. 3.00 points.

Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences, and humanities, students will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. The first unit of the class will focus on establishing the foundations for a public health approach to understanding the challenges of global health. This will involve exploration of the factors shaping the global distribution of disease and their connection with issues of social, economic, and political development, as reflected in the Millennium Development Goals. The second unit will explore in further detail a number of major health priorities. A significant goal of the class will be to identify common sources of vulnerability and challenge across health risks, and the consequent need for a systemic approach to their being addressed. The third and final unit builds upon this analysis to demonstrate the multi-disciplinary, multi-level approach required to effectively address global health priorities, and the political and organizational cooperation required to achieve this. The class concludes with an analysis of the major challenges and threats to global coordination regarding such threats as pandemic influenza and emerging health threats related to climate change. PUBH UN3200 INTRODUCTION TO PUBLIC HEALTH. 3.00 points.

An introduction to and overview of public health. Through a series of sessions with leading public health experts, this course views the multifaceted nature of public health through a prismic lens addressing key concepts, approaches, and issues of historical and contemporary import: What is public health and how has public health evolved over time? What are the core methods of public health? What are the approaches to understanding and addressing both infectious and chronic, non-communicable diseases? What role do micro- and macro-level determinants (i.e. biology and social context) play in public health? What are the global trends in population health? How does the individual life course bear on population health? How do systems, policy, and population health mutually shape each other? How are public health programs designed and evaluated? What are the limits of public health?

SDEV UN2050 ENVIRONMENTAL POLICY AND GOVERNANCE. 3.00 Points.

Sustainability is a powerful framework for thinking about business, economics, politics and environmental impacts. An overview course, Environmental Policy # Governance will focus specifically on the policy elements of sustainability. With an emphasis on the American political system, the course will begin by exploring the way the American bureaucracy addresses environmental challenges. We will then use the foundations established through our understanding of the US system to study sustainable governance at the international level. With both US and international perspectives in place, we will then address a range of specific sustainability issues including land use, climate change, food and agriculture, air quality, water quality, and energy. Over the course of the semester, we will study current events through the lens of sustainability policy to help illustrate course concepts and theories

SDEV UN3355 CLIMATE CHANGE AND LAW. 3.00 Points.

Enrollment limited to 15.

The purpose of this course is to provide students with a broad introduction to the field of climate law in the United States and at the international level. The course begins with an overview of the causes and effects of global climate change and the methods available to control and adapt to it. We then examine the negotiation, implementation and current status of the United Nations Framework Convention on Climate Change, the Kyoto Protocol, and the Copenhagen Accord. The focus then turns to the past and proposed actions of the U.S. Congress, the executive branch and the courts, as well as regional, state and municipal efforts. The Clean Air Act, the National Environmental Policy Act and the Endangered Species Act will receive special attention. We evaluate the various legal tools that are available to address climate change, including cap-and-trade schemes; carbon taxation; command-and-control regulation; litigation; securities disclosures; and voluntary action. The roles of energy efficiency, renewable energy sources, carbon capture and sequestration, and forestry and agriculture each receive close attention. Implications for international human rights, international trade, environmental justice, and international and intergenerational equity are discussed. The course concludes with examination of the special challenges posed by China; proposals for adaptation and geoengineering; and business opportunities and the role of lawyers. Offered in the Spring

SOCI UN3246 MEDICAL SOCIOLOGY. 3.00 points.

Prerequisites: None

Examines the ways sociologists have studied the field of medicine and experiences of health and illness. We cannot understand topics of health and illness by only looking at biological phenomena; we must consider a variety of social, political, economic, and cultural forces. Uses sociological perspectives and methods to understand topics such as: unequal patterns in health and illness; how people make sense of and manage illness; the ways doctors and patients interact with each other; changes in the medical profession, health policies and institutions; social movements around health; and how some behaviors but not others become understood as medical problems. One of the glaring forms of inequalities that persists today is the race-based gap in access to health care, quality of care, and health outcomes. This course examines how institutionalized racism and the structure of health care contributes to the neglect and sometimes abuse of racial and ethnic minorities. Quite literally, how does race affect one's life chances? This course covers a wide range of topics related to race and health, including: racial inequalities in health outcomes, biases in medical institutions, immigration status and health, racial profiling in medicine, and race in the genomic era

Department Assistant: Mary Missirian

Mission

The primary mission of the Slavic Department at Barnard is to prepare students linguistically, culturally, and academically to participate in the global community, specifically by engaging with the Slavic-speaking world. To this end, the Department, in cooperation with its Columbia counterpart, offers instruction in five Slavic languages and literatures, with particular emphasis on Russian. The department insists upon a strong foundation in language study, because this best prepares students for future involvement with the countries of Eastern Europe and Eurasia, as well as for graduate study in the literature, anthropology, sociology, history, economics, or politics of the region, and for careers in government, business, journalism, or international law.

The department offers major tracks in Russian Language and Literature, Slavic and East European Literature and Culture, Russian Regional Studies, and Slavic and East European Regional Studies. A minor program in Russian Literature and Culture is also available.

These programs are supported by an extensive array of courses designed to help the student obtain reasonable fluency in the spoken and written language and a reading ability adequate for interpreting texts of some difficulty in a variety of disciplines. While offering a range of courses designed to give the student a strong general background in Russian and Slavic literature, film, culture, and intellectual history, the department encourages students to supplement their knowledge by taking courses devoted to Russia, the former Soviet Union, and

Eastern Europe offered in other disciplines as well. The department co-sponsors and facilitates student participation in region-related extra-curricular activities held at the Harriman Institute and the Columbia Slavic Department and also fosters student engagement with the rich cultural resources available in New York City.

Student Learning Outcomes

In recognition of the National Standards for Foreign Language Learning published by the American Council on the Teaching of Foreign Languages, the Slavic Department expects the following outcomes for students in each of its major tracks:

- **Communication.** Students should be able to communicate orally and in writing in the language of study, and understand and interpret written and spoken language on a variety of topics.
- **Cultures.** Students should demonstrate an understanding of the perspectives, products, and practices of the culture studied.
- **Connections.** Students should be able to acquire information and recognize the distinctive viewpoints available to them through the foreign language and its cultures.
- **Comparisons.** Students should develop comparative insights into the nature of language and culture as a result of studying a language and culture other than their own.
- **Communities.** Students should be prepared to participate in multilingual communities at home and around the world.

In addition, the Department expects the following outcomes of all majors:

- Students should demonstrate broad knowledge of at least one major aspect (e.g. literature, politics, or history) of the culture studied
- Students should acquire and convey, in an appropriate academic form, deep knowledge of a particular topic or question relating to the culture studied

Entering students should see Professor Frank Miller (708 Hamilton, 854-3941) for a placement examination: a sufficiently high grade will automatically fulfill the language requirement; other students will be placed accordingly. Native speakers of Russian or any Slavic language should consult with the department chair. The Department is a member of "Dobro Slovo" (The National Slavic Honor Society) and is pleased to induct its qualifying students into the society.

Acting Chair: Edward Barnaby

Term Assistant Professor: John Wright

Other officers of the University offering courses in Slavic:

Professors: Valentina Izmirlieva, Liza Knapp—(Chair & DGS), Irina Reyfman, Mark Leiderman

Select two courses in Russian History

Select one course on Russia or the Soviet Union in any discipline (history, art history, geography, sociology, economics, literature, political science, etc.)

Select one course in Soviet/post-Soviet politics

Two semesters of a senior research seminar or the equivalent in independent study with research to be conducted predominantly in Russian language sources

Note: In consultation with her adviser, a student may elect to take one or more courses devoted to a region other than Russia that is located on the territory of the former Soviet Union.

Slavic and East European Regional Studies Major-Czech, Polish, Serbo-Croatian, Ukrainian

Select three years of language study

Select two courses Literature in relevant region

Select two courses of history in relevant region

Select one course on relevant region in any discipline (history, art history, geography, sociology, economics, literature, political science, etc.)

One course on politics in relevant region

Two semester of a senior research seminar or the equivalent in independent study with research to be conducted predominantly in relevant region's language sources

Requirements for the Minor

Minor in Russian

The Minor in Russian allows students to study the language and culture of Russia at a smaller scale than a Major. A total of five courses (minimum 15 credits) beyond the second year of Russian are required. These courses should relate to the language and culture of Russia.

Courses should be selected in consultation with a Slavic Department faculty member.

Minor in Czech, Polish, Serbo-Croatian or Ukrainian

A Minor in a Slavic language other than Russian allow students to pursue in-depth studies of this language and the region on a smaller scale than the one required for a Major. The Barnard Minor in Czech, Polish, Serbo-Croatian or Ukrainian consists of five courses (minimum 15 credits) beyond the second year of language study. It requires that three (3) of these courses be related to the country of the language (Poland, Czech Republic, etc) while the other two (2) should be related to the region and its cultural history more broadly.

LING UN3102 Endangered Languages in the Global City: Lang, Culture, and Migration in Contemporary NYC. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Of the world's estimated 7,000 languages – representing migrations and historical developments thousands of years old – the majority are oral, little-documented, and increasingly endangered under the onslaught of global languages like English. This course will take the unprecedented, paradoxical linguistic capital of New York City as a lens for examining how immigrants form communities in a new land, how those communities are integrated into the wider society, and how they grapple with linguistic and cultural loss. Interdisciplinary with an experiential learning component, the course will focus on texts, materials, encounters, and fieldwork with three of the city's newest and least-studied indigenous immigrant communities (indigenous Latin Americans, Himalayans, and Central Asians). Indigeneity, though often invisible or perceived as marginal in global cities like New York, is in fact pervasive and fundamental. Cities now constitute a crucial site for understanding migration and cultural change, with language a vehicle for culture. Studying cultures only in situ (i.e. in their homelands) risks missing a crucial dimension. Students will be immersed in stateless, oral, immigrant cultures while also gaining a hands-on critical understanding of language endangerment and urban sociolinguistic research, first through field experiences and guest speakers (Endangered Language Alliance partners) and then by going out together into communities to work on projects in small teams. The Endangered Language Alliance (ELA), where the instructor is Co-Director, was formed as a non-profit research institute in 2010 as a forum for researchers, community members, activists, artists, and other New Yorkers to come together to support indigenous and minority languages. ELA's video recordings provide first-hand testimony of endangered languages in the global city – in indigenous languages with English translation – available in few other places. Those texts will be central to this course, supplemented by the new, first-ever, detailed language map of New York City being produced by ELA

LING UN3103 Language, Brain and Mind. 3.00 points.

The ability to speak distinguishes humans from all other animals, including our closest relatives, the chimpanzees. Why is this so? What makes this possible? This course seeks to answer these questions. We will look at the neurological and psychological foundations of the human faculty of language. How did our brains change to allow language to evolve? Where in our brains are the components of language found? Are our minds specialized for learning language or is it part of our general cognitive abilities to learn? How are words and sentences produced and their meanings recognized? The structure of languages around the world varies greatly; does this have psychological effects for their speakers?

RUSS UN3105 Real World Russian. 3 points.

Prerequisites: (RUSS UN2102) (department placement test)

This content-based course has three focal points: 1) communicative skills 1) idiomatic language; 3) cross-cultural awareness.

The course is designed to help students further develop all of their language skills with particular focus on communicative and information processing skills, as well as natural student collaboration in the target language. The materials and assignments that will be used in class allow to explore a broad range of social, cultural, and behavioral contexts and familiarize students with idiomatic language, popular phrases and internet memes, developments of the colloquial language, and the use of slang in everyday life.

On each class students will be offered a variety of content-based activities and assignments, including, information gap filling, role-play and creative skits, internet search, making presentations, and problem-solving discussions. Listening comprehension assignments will help students expand their active and passive vocabulary and develop confidence using natural syntactic models and idiomatic structures.

Students will be exposed to cultural texts of different registers, which will help them enhance their stylistic competence. Students will learn appropriate ways to handle linguo-social situations, routines, and challenges similar to those they come across when traveling to Russia. They will explore various speech acts of daily communication, such as agreement/disagreement, getting and giving help, asking for a favor, expressing emotions, and so forth. Part of class time will be devoted to nonverbal communication, the language of gestures, emotional phonetics and intonation.

Prerequisites: two years of college Russian or the instructor's permission. The course is devoted to the reading, analysis, and discussion of a number of Russian prose fiction works from the eighteenth to twentieth century. Its purpose is to give students an opportunity to apply their language skills to literature. It will teach students to read Russian literary texts as well as to talk and write about them. Its goal is, thus, twofold: to improve the students' linguistic skills and to introduce them to Russian literature and literary history. In 2007-2008: A close study in the original of the "fallen woman" plot in Russian literature from the late eighteenth century. Conducted in Russian

GEOR GU4042 Expressive Culture of Soviet and Independent Georgia. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Expressive culture in the form of traditional and mediated performing and visual arts, film and literature has reflected and shaped modern Georgian social life in immeasurable ways. This seminar brings anthropological perspectives to bear on how expressive culture has served to articulate national and local senses of identity, grappled with collective trauma, and forged avant-garde creative networks within and beyond Georgia's borders in the socialist and postsocialist periods. The course is organized in three units: it begins by interrogating the curatorial interventions of international organizations like UNESCO and their role in commodifying Georgian culture for global markets, proceeds by exploring powerful creative responses to colonial and totalitarian experience, and concludes by focusing on the capital city of Tbilisi—its built spaces, ever-changing social configurations, and shifting value systems—as a persistent muse in expressive cultural forms. There are no prerequisites and the course assumes no prior knowledge of Georgian history, language, or culture

Russian Literature and Culture (in English)

CLRS BC3000 Power, Truth, and Storytelling: Framing Russian, English, and American Literature. 3.00 points.

How does a story's frame affect how we read it? What power does a storyteller have over how we interpret narratives and create meaning? How do we understand "truth" in the context of fictional stories? In this course, we will explore the power dynamics of frame narratives, or stories within stories. We will consider how multiple storytellers and levels of narration affect our understanding of "truth" in fiction, as well as our own role and responsibility as readers to uncover narrative truth. Our readings will include story cycles, standalone stories with competing narrators, stories that include "found" manuscripts, and narratives with temporal frames. We will also consider how authors and critics attempted to frame literary works and control how they were interpreted or read. In all of our works, we will pay particular attention to the power dynamics and ethics of framing. Our close readings of literary works will be informed by theoretical texts on framing and discussions of framing in works of art

SLCL UN3001 SLAVIC CULTURES. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The history of Slavic peoples - Russians, Czechs, Poles, Serbs, Croats, Ukrainians, Bulgarians - is rife with transformations, some voluntary, some imposed. Against the background of a schematic external history, this course examines how Slavic peoples have responded to and have represented these transformations in various modes: historical writing, hagiography, polemics, drama and fiction, folk poetry, music, visual art, and film. Activity ranges over lecture (for historical background) and discussion (of primary sources)

An introduction to the concept of folklore as an evolving, historical concept, and to primary source materials which have been framed as such. These are translated from Bosnian, Chukchi, Czech, Finnish, German, Polish, Russian, Serbian, Tuvan, Ukrainian, Yiddish, Yupik languages, and others. Geographical range is from South-Eastern Europe to the Russian Far East. We learn about particular oral traditions, their social mechanisms of transmission and performance, their central themes and poetics. Attention is paid to the broader sociopolitical factors (Romantic nationalism, colonization) which have informed the transcription, collection and publication of these traditions. For the final project, students learn how to conduct an ethnographic interview, and to analyze the folklore of a contemporary social group. Our goal is to experientially understand—as folklorists and as members of folk groups ourselves—the choices entailed in transcribing and analyzing folklore

RUSS UN3221 LIT # REVOLUTION (20TH C LIT). 3.00 points.

The revolutionary period (1905-1938) in Russia was not only one of extreme social upheaval but also of exceptional creativity. Established ideas about individuality and collectivity, about how to depict reality, about language, gender, authority, and violence, were all thrown open to radical questioning. Out of this chaos came ideas about literature and film (just for example) which have shaped Western thought on these subjects to this day. In this course we will study a variety of media and genres (poetry, manifestos, film, painting, photomontage, the novel, theoretical essays) in an effort to gain a deep understanding of this complex and fascinating period in Russian cultural history

Two epic novels, Tolstoy's War and Peace and Dostoevsky's The Brothers Karamazov, will be read along with selected shorter works. Other works by Tolstoy include his early Sebastopol Sketches, which changed the way war is represented in literature; Confession, which describes his spiritual crisis; the late stories Kreutzer Sonata and Hadji Murad; and essays on capital punishment and a visit to a slaughterhouse. Other works by Dostoevsky include his fictionalized account of life in Siberian prison camp, The House of the Dead; Notes from the Underground, his philosophical novella on free will, determinism, and love; A Gentle Creature, a short story on the same themes; and selected essays from Diary of a Writer. The focus will be on close reading of the texts. Our aim will be to develop strategies for appreciating the structure and form, the powerful ideas, the engaging storylines, and the human interest in the writings of Tolstoy and Dostoevsky. CLRS UN3313 Resistant Mind: Colonial Power, Optics, Narrative. 3.00 points.

"Narrative fiction provides a controlled wilderness, an opportunity to be and to become the Other," writes Toni Morrison. The immersion in the Other's inner self is one of the most valuable experiences we derive from reading fiction, but how, exactly, is this immersion effect created? What makes it possible for us to know fictional characters more intimately than we know our closest friends? Is it not slightly disturbing and even unethical to expose a subject, albeit fictional, as radically as the fiction writer exposes and studies the hero? This course surveys a variety of ways in which the private life and the consciousness of the Other can be represented through discursive practices of literature, film, and photography. Drawing its perspective from postcolonial studies, formal narratology, and poststructuralist criticism, this course examines how different methods of narrating the Other participate in constructing an ethics of power and resistance within a work of art. We read and view a diverse selection of works ranging from the classics of Russian and American fiction to postcolonial photography and documentary productions which experiment with perspective and power dynamic. No prerequisites

RUSS GU4013 Late Tolstoy (Beyond Anna Karenina): Thinker, Writer, Activist, Pacifist, Humanitarian, and Mortal. 4 points.

The focus of the course is Tolstoy's work in the last 35 years of his life. On finishing War and Peace and Anna Karenina, Tolstoy swore off the kind of literature and decided to devote himself to what he believed would be more meaningful work. This work included confessions, letters, tracts, critiques, proclamations, invectives, exposes, meditations, and gospel, and as more fiction, some of which is overly didactic and some which is, like his earlier fiction, more covertly so.

From Joseph Brodsky—the bad boy bard of Soviet Russia and a protégé of Anna Akhmatova, who served 18 months of hard labor near the North Pole for social parasitism before being exiled—to the most recent artistic descendants, this course will interrogate diaspora, memory, and nostalgia in the cultural production of immigrants and exiles

CLRS GU4038 DOSTOEVSKY,DEMONS,DICKENS. 3.00 points.

A study of Dostoevsky and Dickens as two writers whose engagement in the here and now was vital to their work and to their practice of the novel. Readings from Dostoevsky cluster in the 1870s and include two novels, Demons (1872) and The Adolescent (1876), and selections from his Diary of a Writer. Readings from Dickens span his career and include, in addition to David Copperfield (1850), sketches and later essays.

RUSS GU4046 The Trickster in the Modern Russian Lit. 3.00 points.

"Trickster" does not simply mean "deceiver" or "rogue" (the definition of trickster according to the Oxford Encyclopedic English Dictionary), but rather "creative idiot", to use Lewis Hyde's expression. This hero unites the qualities of characters who at first sight have little in common – the "selfish buffoon" and the "culture hero"; someone whose subversions and transgressions paradoxically amplify the culture-constructing effects of his (and most often it is a "he") tricks. The trickster is a typical comic protagonist – it is enough to recollect Renard the Fox from the medieval Roman de Renard, Panurge from François Rabelais' The Life of Gargantua and of Pantagruel, Cervantes' Sancho Panza, Beaumarchais's Figaro, Gogol's Khlestakov, Mark Twain's Tom Sawyer and Huckleberry Finn, Yaroslav Hašek's Švejk, Charlie Chaplin's Tramp, Max Bialystock in Mel Brooks' Producers, Bart Simpson and Borat (Sacha Baron Cohen), as well as Jon Stewart and Stephen Colbert along with many other comical characters of the same genre – to confirm this self-evident thesis

CLSL GU4075 POST COLONIAL/POST SOV CINEMA. 3.00 points.

The course will discuss how filmmaking has been used as an instrument of power and imperial domination in the Soviet Union as well as on post-Soviet space since 1991. A body of selected films by Soviet and post-Soviet directors which exemplify the function of filmmaking as a tool of appropriation of the colonized, their cultural and political subordination by the Soviet center will be examined in terms of postcolonial theories. The course will focus both on Russian cinema and often overlooked work of Ukrainian, Georgian, Belarusian, Armenian, etc. national film schools and how they participated in the communist project of fostering a «new historic community of the Soviet people» as well as resisted it by generating, in hidden and, since 1991, overt and increasingly assertive ways their own counter-narratives. Close attention will be paid to the new Russian film as it re-invents itself within the post-Soviet imperial momentum projected on the former Soviet colonies

RUSS GU4107 RUSS LIT/CULTR-NEW MILLENNIUM. 3.00 points.

The course examines most representative works of Russian literature and culture since the 1990s and until the present moment. While discussing recent novels, short stories, dramas, poems, and films, we will address the issues of politics, re-assessment of history, gender, family, national identity, violence and terrorism. No knowledge of Russian is expected

CLRS GU4111 Narrative and Repetition: Circling in Time and Space. 3.00 points.

An introduction to central concepts in narrative theory: plot, archetype, myth, story vs. discourse, Freudian analysis, history and narrative, chronotype and personal narrative. These are explored in the context of sustained investigation of a particular plot device: the time loop. Examples come from Russian modernist fiction, Soviet and American science fiction, and film. We compare being stuck in a time loop with being lost in space - a theme found in personal narratives shared orally and online, as well as in literary fiction. Students develop a final paper topic on time loop narrative of their choice

CLRS GU4112 Decadent Desires and the Russian Silver Age. 3.00 points.

The late nineteenth-century culture of “decadence” marks the moment when European literature and art decisively turn to the dark side. Decadence loves to depict depravity and deviant behavior; it revels in sensuality, eroticism, libertinism, and immoralism; the aesthetics of madness and intoxication abound. In this course we will explore how these decadent tendencies shaped the elegant and transgressive literary culture of Russia’s pre-revolutionary Silver Age. The decadent predilection for self-destructive behavior and the pervasive sense of impending doom took on new meaning within the Russian cultural context, on the eve of the communist revolution. We will first survey the defining figures of European decadence: from Baudelaire’s *Flowers of Evil* and the “accursed” French poets, to the radical lifestyle experiments of Huysmans and the bondage games of Sacher-Masoch. Considerable attention will also be devoted to the enormous influence of Nietzsche’s philosophy—his iconic conceptions of Dionysian ecstasy, the *Übermensch*, and “beyond good and evil.” In turn, our study of decadence in Russia will range from symbolist poets, chasing their ethereal “mysterious woman,” to major modernist novels: murder and madness in Sologub’s *The Little Demon*; Artsybashev’s sexually scandalous *Sanin*; Andrei Bely’s revolutionary masterpiece, *Petersburg*. Along the way, we will also focus on issues such as: symbolist theories of art and a new flowering of metaphysical philosophy in Russia new attitudes toward sexuality, new theories of desire and the unconscious the intellectual collaboration between literature and visual art the coming of revolution and terrorist violence, as seen through the prism of decadence

CLRS GU4213 Cold War Reason: Cybernetics and the Systems Sciences. 3.00 points.

The Cold War epoch saw broad transformations in science, technology, and politics. At their nexus a new knowledge was proclaimed, cybernetics, a putative universal science of communication and control. It has disappeared so completely that most have forgotten that it ever existed. Its failure seems complete and final. Yet in another sense, cybernetics was so powerful and successful that the concepts, habits, and institutions born with it have become intrinsic parts of our world and how we make sense of it. Key cybernetic concepts of information, system, and feedback are now fundamental to our basic ways of understanding the mind, brain and computer, of grasping the economy and ecology, and finally of imagining the nature of human life itself. This course will trace the echoes of the cybernetic explosion from the wake of World War II to the onset of Silicon Valley euphoria

CLRS GU4214 The Road to Power: Marxism in Germany and Russia. 3.00 points.

Before Marxism was an academic theory, it was a political movement, but it was not led by Marx. This course examines the years in between, when a new generation began the task of building the organizations, practices, and animating theories that came to define “Marxism” for the twentieth century. Two of the most important such organizations were the German and Russian Social Democratic Parties. Responding to dramatically different contexts, and coming to equally different ends, they nevertheless developed organically interconnected. This course selects key episodes from the road to power of both parties, from their founding to the Russian Revolution— what might be called the “Golden Age” of Marxism. This course is open to all undergraduates who have completed Contemporary Civilization

Slavic Literature and Culture

SLCL UN3001 SLAVIC CULTURES. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

The history of Slavic peoples - Russians, Czechs, Poles, Serbs, Croats, Ukrainians, Bulgarians - is rife with transformations, some voluntary, some imposed. Against the background of a schematic external history, this course examines how Slavic peoples have responded to and have represented these transformations in various modes: historical writing, hagiography, polemics, drama and fiction, folk poetry, music, visual art, and film. Activity ranges over lecture (for historical background) and discussion (of primary sources)

RMAN GU4002 Romanian Culture, Identity and Complexes. 3 points.

This course addresses the main problems that contribute to the making of Romanian identity, as fragmented or as controversial as it may seem to those who study it. The aim is to become familiar with the deepest patterns of Romanian identity, as we encounter it today, either in history, political studies, fieldwork in sociology or, simply, when we interact with Romanians. By using readings and presentations produced by Romanian specialists, we aim to be able to see the culture with an "insider's eye", as much as we can. This perspective will enable us to develop mechanisms of understanding the Romanian culture and mentality independently, at a more profound level and to reason upon them.

CLSL GU4012 Holocaust Literature: Critical Thinking in Dark Times. 3.00 points.

How do you write literature in the midst of catastrophe? To whom do you write if you don't know whether your readership will survive? Or that you yourself will survive? How do you theorize society when the social fabric is tearing apart? How do you develop a concept of human rights at a time when mass extermination is deemed legal? How do you write Jewish history when Jewish future seems uncertain? This course offers a survey of the literature and intellectual history written during World War II (1939-1945) both in Nazi occupied Europe and in the free world, written primarily, but not exclusively, by Jews. We will read novels, poems, science fiction, historical fiction, legal theory and social theory and explore how intellectuals around the world responded to the extermination of European Jewry as it happened and how they changed their understanding of what it means to be a public intellectual, what it means to be Jewish, and what it means to be human. The aim of the course is threefold. First, it offers a survey of the Jewish experience during WWII, in France, Russia, Poland, Latvia, Romania, Greece, Palestine, Morocco, Iraq, the USSR, Argentina, and the United States. Second, it introduces some of the major contemporary debates in holocaust studies. Finally, it provides a space for a methodological reflection on how literary analysis, cultural studies, and historical research intersect

CLSL GU4016 Socialist World Literature. 3.00 points.

This course researches the potentiality and development of a Socialist World Literature. Students will learn about the more contemporary constructions of World Literature in the West, and then look at how the Soviet Union and its satellites potentially crafted an alternative to the contemporary construction. The class will then examine whether the Soviet version addressed some of the criticism of the contemporary definitions of World Literature, particularly through addressing the colonialism and nationalism. Students will learn about the complex history of World Literature and its definitions, reading the major theorists of the concept as well as the major critics. They will also create their own arguments about World Literature in a highly-scaffolded major project due at the end of the term. All readings will be provided online

UKRN GU4054 CREATING ID-CONTEMP UKRN CULTR. 3.00 points.

This course presents and examines post-Soviet Ukrainian literature. Students will learn about the significant achievements, names, events, scandals and polemics in contemporary Ukrainian literature and will see how they have contributed to Ukraine's post-Soviet identity. Students will examine how Ukrainian literature became an important site for experimentation with language, for providing feminist perspectives, for engaging previously-banned taboos and for deconstructing Soviet and Ukrainian national myths. Among the writers to be focused on in the course are Serhiy Zhadan, Yuri Andrukhovych, Oksana Zabuzhko and Taras Prokhasko. Centered on the most important successes in literature, the course will also explore key developments in music and visual art of this period. Special focus will be given to how the 2013/2014 Euromaidan revolution and war are treated in today's literature. By also studying Ukrainian literature with regards to its relationship with Ukraine's changing political life, students will obtain a good understanding of the dynamics of today's Ukraine and the development of Ukrainians as a nation in the 21st century. The course will be complemented by audio and video presentations. Entirely in English with a parallel reading list for those who read Ukrainian

UKRN GU4121 Agent of Change: Ukrainian Art Between Revolutions. 3.00 points.

The course will trace the appearance of the avant-garde on the territory of the Russian Empire with a focus on Ukrainian art as compared to Russian. Examining the art aspiring not only to reflect but to alter the reality originating both in the center and the periphery, the class will explore the array of strategies employed by art for that end. The foundational theories of avant-garde, non-conformism, and dissident art will be studied alongside the most celebrated and influential examples of innovative and radical art from the region. Beginning with socially minded realist practices, the class will consider the impact of the collapse of the Russian and then Soviet Empires on art and reflect on how the societal upheavals affect the understanding of the function and the definition of art. The appearance of Socialist Realism and the versions of opposition to it will be studied, from dissident undermining to neglect and escapism of the second avant-gardes. Ukrainian art of recent decades will be studied in the context of several revolutions (Granite, Orange, Euromaidan) that defined its contemporary history. The class is offered for graduate and advanced undergraduate students. Knowledge of Russian or Ukrainian is not required

HNGR UN3343 DESCRIPTIVE GRAMMAR-HUNGARIAN. 3.00 points.

This course is designed for those curious about the structure of Hungarian - an unusual language with a complex grammar quite different from English, or, indeed, any Indo-European language. The study of Hungarian, a language of the Finno-Ugric family, offers the opportunity to learn about the phonology of vowel harmony, the syntax of topic-comment discourse, verb agreement with subjects and objects, highly developed case systems and possessive nominal paradigms. In addition to its inflectional profile, Hungarian derivation possibilities are vast, combinatory, and playful. During the semester we will touch upon all the important grammatical aspects of Hungarian and discuss them in relation to general linguistic principles and discourse, and finally, through some text analysis, see them in action. Although the primary discussion will center on Hungarian, we will draw on comparisons to other Finno-Ugric languages, most notably Finnish and Komi; students are encouraged to draw on comparisons with their own languages of interest. No prerequisite. Counts as Core Linguistics

Cross-Listed Courses

AFRS GU4000 HARLEM AND MOSCOW. 3.00 points.

Prerequisites: NA The Russian Revolution of 1917 is widely acknowledged as a watershed moment in the global struggle for worker's rights, but it also played a considerable role in the fights against racism and colonialism (Lenin considered both tools of capitalist exploitation). In Soviet Russia's project to make racial equality a central feature of communism, two urban locales featured prominently: its capital city of Moscow and the burgeoning Black cultural center that was Harlem, New York. This course will explore cross-cultural encounters between Moscow and Harlem as a way to ask larger questions about race, class, and solidarity across difference. Students can expect to read novels, memoirs, and cultural reportage from Harlem Renaissance figures (Langston Hughes, Claude McKay, Dorothy West) who traveled to Moscow. Students will also learn about the role of race in early Soviet culture, particularly visual culture (films, children's media, propaganda posters, etc.). This course includes a field trip to the Schomburg Center for Research in Black Culture in Harlem

Sociology

Mission

Sociology explores the intricacies of social life in all its variety: from the prosaic routines of everyday life to dramatic transformations of state and economy, from the symbolic realm of identity and culture to the structures of class, race and gender that generate inequality. Despite all this diversity, the discipline of sociology has a powerful coherence that comes from a collective dedication to developing theoretical principles about social life and testing them with empirical evidence. This commitment to systematic empirical research represents the strength of the discipline and the chance for a distinctive undergraduate experience for Sociology majors at Barnard. It exposes them to a range of approaches that include quantitative data collection and analysis, participant observation, intensive interviewing, historical-archival research, and discourse analysis.

All students taking courses in Sociology at Barnard can expect to learn about the relevance of empirical rigor and theoretical analysis for public policy, political and social debate, and civic engagement more broadly defined.

Sociology majors will develop critical analytic and research skills that they can take with them into a wide range of careers, whether they continue on to graduate study in sociology or choose to enter such fields as business, education, law, nonprofit enterprise or public policy.

The Department provides students with expertise in three areas:

1. a common foundation in the discipline's core theories and methodologies through the following three required courses:
 - SOCI UN1000 THE SOCIAL WORLD
 - SOCI UN3000 SOCIAL THEORY
 - SOCI UN3010 METHODS FOR SOCIAL RESEARCH
2. exposure to a range of substantive questions that motivate sociological research through a 3-tiered elective structure:

- 2000-level courses introduce non-majors and majors to substantive concerns through sociological texts and perspectives;
 - 3000-level courses are normally lecture courses that introduce upper level students (majors and non-majors) to dominant theoretical models and debates in more specialized subfields;
 - 3900-level courses are seminars that provide more intensive engagement with primary research in specialized subfields of the discipline and involve some significant primary or secondary research paper
3. direct research experience both within the classroom and under faculty supervision in the Senior Thesis Seminar or designated senior research seminars.

Student Learning Outcomes

Students who graduate with a major in sociology will be able to:

- Discuss the core theories of the discipline and apply them to contemporary issues.
- Identify the central questions that motivate sociological research in at least one specialized subfield.
- Describe and evaluate the strengths and limits of social science research.
- Apply the methods of social science research to a question of substantive or theoretical importance.
- Design, execute, and present original research projects.

Students who graduate with a minor in sociology will be able to:

- Discuss the core theories of the discipline and apply them to contemporary issues.
- Identify the central questions that motivate sociological research in at least one specialized subfield.
- Describe and evaluate the strengths and limits of social science research.

Requirements for the Major

There are no special admissions requirements or procedures for students interested in majoring in sociology. Students are assigned a major adviser on declaring the major; prior to that, students are encouraged to consult with any member of the department regarding their choice and sequence of courses.

Special note: Courses taken Pass/D/Fail **cannot** count toward the sociology major requirements. Students may elect sociology courses as P/D/F for course credit only. There are no departmental exceptions to this policy.

The Sociology major is comprised of a minimum of 10 courses (a minimum of 35 credits). These include:

Foundations (3 courses):

SOCI UN1000 THE SOCIAL WORLD (recommended no later than the sophomore year)

SOCI UN3000 SOCIAL THEORY

SOCI UN3010 METHODS FOR SOCIAL RESEARCH (no later than the junior year)

Electives (5 courses):

Of the five electives required for the major, *no more than one* can be at the 2000 level *and at least one* must be a seminar at the 3900 (or 4000) level.

With the exception of the senior thesis or designated research seminar (see below) the Foundations and Elective courses may be taken at either Barnard or Columbia

Senior Requirement (2 courses):

There are two ways to satisfy the senior requirement.

Research Paper Option: two upper level seminars, including enrollment in (1) a designated research seminar (3900 level) in the Barnard Sociology Department that requires a 25- to 30-page paper, including some primary research; and (2) any additional upper level seminar (3900 or 4000 level).

Thesis Option: two-semester senior thesis, involving original sociological research and analysis on a topic of the student's choice, in consultation with an advisor; requires enrollment in SOCI BC3087-3088.

Additional Information about the senior requirement

Research Paper Option: This option is intended for majors who are interested graduating with a broader exposure to the discipline of sociology, with more limited experience in conducting original research. Each semester the department offers 2-3 designated research seminars, which are listed on the department's website prior to the Spring program planning period. These seminars vary in content and format and are open to all students, with priority given to senior sociology majors taking the course to meet their senior requirement.

Prerequisites for students taking the designated research seminar to meet the senior requirement include successful completion of: (1) SOCI UN1000 THE SOCIAL WORLD; (2) SOCI UN3000 SOCIAL THEORY or SOCI UN3010 METHODS FOR SOCIAL RESEARCH; and (3) at least one elective course related to the focus of the seminar. Instructors may waive some aspect of the prerequisites.

Students may also enroll in these seminars prior to their senior year for elective credit.

Thesis Option: The two-semester senior thesis involves original sociological research and analysis on a topic of the student’s choice, in consultation with an advisor. This option is intended for majors who want the opportunity to explore a sociological subfield in depth and conduct independent primary research as their senior capstone experience. Students interested in writing a senior thesis must submit a 2-3 paragraph proposal, along with a brief letter of endorsement from a faculty member in the department who has agreed to serve as their thesis advisor to the Department Chair, no later than the advanced program planning deadline for the student’s first semester of their senior year. Decisions will be made in consultation with the student’s program and thesis advisors prior to the final program planning deadline for that semester. In exceptional cases, students may apply for and receive permission to enroll in the two-semester option before the deadline for final program approval in the first semester of their senior year.

Prerequisites: (1) SOCI UN1000 THE SOCIAL WORLD; (2) SOCI UN3010 METHODS FOR SOCIAL RESEARCH; and (3) at least one elective course related to the proposed thesis topic must be completed before the first semester of the senior year to be eligible for the two-semester thesis.

Students approved for the senior thesis will enroll in SOCI BC3087 INDIVIDUAL SENIOR PROJECTS and SOCI BC3088 INDIVIDUAL SENIOR PROJECTS with their selected adviser.

Special note: If a student taking a designated one-semester senior seminar in the first semester of their senior year would like to extend that work into a senior thesis in their final semester, they may petition for special permission to enroll in SOCI BC3088 INDIVIDUAL SENIOR PROJECTS to do so, with approval of their program adviser and a faculty member willing to advise them. Petitions must be received one week prior to the advance program filing deadline of their final semester and will only be granted in rare circumstances.

All seniors must submit a final, spiral-bound copy and an electronic file (PDF or Word) of the research paper or senior thesis to the Department no later than the last day of classes of the second semester of their senior year in order to receive credit (Pass or Pass with Distinction) for the senior requirement.

Use this [Major Requirements Worksheet](#) to identify the major requirements that you have completed.

Requirements for the Minor

5 courses are required for the minor in Sociology, including SOCI UN1000 THE SOCIAL WORLD, SOCI UN3000 SOCIAL THEORY and three elective courses (no more than one at the 2000-level), to be selected in consultation with the Sociology Department Chair.

SOCI UN1000 THE SOCIAL WORLD. 3.00 points.

SOCI BC3202 Structural Determinants of Health. 3.00 points.

The COVID-19 pandemic has made the underlying health disparities that exist in the United States more apparent. The traditional biomedical model places the responsibility of these disparities on the choices that an individual makes. The model assumes that one's smoking, eating and exercising habits are based on personal choice. Therefore, the prevalence of morbidities such as high blood pressure, obesity and diabetes is the result of an individual's poor decisions. This course will explore how the conditions under which individuals live, work, play and pray impact their health outcomes. Collectively these conditions are referred to as the Social Determinants of Health (SDoH) and often they reveal the systemic inequalities that disproportionately affect marginalized communities. This course will also call upon the need for a paradigm shift from the "Social" Determinants of Health to the "Structural" Determinants of Health. This shift is in recognition that it is the underlying structures (laws, material infrastructure) that impact health outcomes. The development of the SDoH has challenged health care providers to look beyond the biomedical model that stresses an individual's behavior as the main predictor of adverse health conditions. Instead the SDoH focuses on an "upstream" approach that examines the underlying systemic and racial inequalities that impact communities of color and their health outcomes. An analysis that focuses upstream reveals that government policies and social structure are at the core of health disparities. Through the lens of New York City and its health systems, this course will cover a wide range of topics related to race and health, including: racial inequalities in housing and homelessness, biases in medical institutions, and the unconscious bias that lead providers to have racialized perception of an individual's pain tolerance. In addition to exposing these inequalities the course will also provide innovative solutions that seek to mitigate these barriers including: home visiting programs, medical respite programs for homeless patients and food as medicine in health care systems. Students will demonstrate their knowledge through individual writing, and class discussion. The course revolves around important readings, lectures, and podcasts that illustrates how one's class position and the color of one's skin can influence the access to healthcare one has as well as their experience of it

SOCI BC3219 RACE, ETHNICITY # SOCIETY. 3.00 points.

Examines the social construction of race and ethnicity in the United States from colonial period to present. Analyzes how capitalist interests, class differences, gender, immigration, and who "deserves" the full rights and privileges of citizenship, shape boundaries between and within racial and ethnic groups. Also considers how racism affects resource access inequities between racial groups in education, criminal justice, media, and other domains. Explores factors underpinning major social change with an eye toward discerning social conditions necessary to create and sustain just social systems

SOCI UN3225 SOCIOLOGY OF EDUCATION. 3.00 points.

All of us have spent many years in school and understand that schools impact our lives in important ways. But how exactly does formal schooling shape young people? And how do students make sense of their lives in the context of schools and educational systems more broadly? In this class we will examine education as a central institution in modern society, and we will grapple with an important question: What role does education play in reinforcing or challenging broader patterns of social inequality and mobility? Particular emphasis will be placed on higher education as a critical site in which these processes take shape

This course examines the social roots and impacts of environmental contamination and disasters, in order to understand how humans relate to nature in the context of global racial capitalism and the possibilities for creating a more sustainable world. We will also explore how racism is foundational to environmental exploitation and consider why global struggles for racial justice are crucial for protecting both people and the earth, paying particular attention to how environmental health inequalities are linked to race, class, gender, and nation. We will consider key theories, debates, and unresolved questions in the subfield of environmental sociology and discuss future directions for the sociological study of human/environment relations

SOCI UN3246 MEDICAL SOCIOLOGY. 3.00 points.

Prerequisites: None
 Examines the ways sociologists have studied the field of medicine and experiences of health and illness. We cannot understand topics of health and illness by only looking at biological phenomena; we must consider a variety of social, political, economic, and cultural forces. Uses sociological perspectives and methods to understand topics such as: unequal patterns in health and illness; how people make sense of and manage illness; the ways doctors and patients interact with each other; changes in the medical profession, health policies and institutions; social movements around health; and how some behaviors but not others become understood as medical problems. Course is geared towards pre-med students as well as those with general interests in medicine, health and society

SOCI BC3248 Race, Ethnicity, and Education in the US. 3.00 points.

This course explores the sociology and history of race and racism, ethnicity and ethnocentrism, and unequal access to education in the United States through readings, films, audio, and multimedia. Experiences of students in public and private K-12 schools, colleges and universities, and alternative and informal educational settings will be considered. Movements by students and communities to fight discrimination and injustice, demand equal opportunities and resources, and to realize the promise of education as a means of achieving personal and collective liberation will also be examined. Case studies may include: boarding schools for Indigenous children; Reconstruction-era public schools; the settlement house movement; Freedom Schools of the Civil Rights Movement; the Black Panther Party's educational initiatives; community-controlled schools; Black, Mexican American, Puerto Rican, and Ethnic Studies programs; urban educational reform, public school closures, and charter schools; the school-to-prison pipeline; standardized testing and advanced placement courses; and more

The purpose of the course is to acquaint students with Israeli society through the lens of the Israeli- Palestinian conflict. The underlying assumption in this course is that much of the social, economic, political, and cultural processes in contemporary Israel have been shaped by the 100-year Israeli- Arab/Palestinian conflict

SOCI UN3302 Sociology of Gender. 3 points.

Prerequisites: One introductory course in Sociology suggested. Examination of factors in gender identity that are both universal (across time, culture, setting) and specific to a social context. Social construction of gender roles in different settings, including family, work, and politics. Attention to the role of social policies in reinforcing norms or facilitating change.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Using classical texts about cities (do they still work for us?) and on the diverse new literatures on cities and larger subjects with direct urban implications, we will use a variety of data sets to get a detailed empirical information, and draw on two large ongoing research projects involving major and minor global cities around the world (a total of over 60 cities are covered in detail as of 2008). Students will need to register for a discussion section as well; details to be announced.

SOCI UN3701 Sociology of Energy. 4 points.

This course explores many of the social forces that determine how energy is produced and what the consequences are. The course will focus in particular on how geographic communities, social identities, and related economics, cultures, and politics shape energy production.

SOCI BC3705 Surveillance. 4.00 points.

Surveillance has become a ubiquitous term that either conjures images of George Orwell's 1984, the popular series Black Mirror, or is dismissed as an inconvenience and a concern of only those who engage in criminal activity or have something to hide. Using sociological theories of power, biopower, racialization, and identity formation, Surveillance explores the various ways we are monitored by state authorities and corporations and our role in perpetuating the system (un)wittingly

SOCI UN3721 Social Justice: Connecting Academics to Action. 5.00 points.

This course will create an opportunity for active engagement between students doing sociology and a local organization working for social change by organizing immigrant communities, Make the Road New York. Students will be expected to actively study and/or participate in a project designed by the instructor and organization leaders. The action/research will primarily take the form of interviews (conducting interviews with members and leaders from an organization or campaign) and participant observation (taking part in the activities of the organization/campaign) and analysis of those interviews and observations. To accomplish this collaborative research project, students will take on different roles throughout the course, including that of fieldworker, project coordinator, analysis coordinator, and context researcher. Students will also read, discuss, and write about literature on scholarly-community partnerships and community organizing. Admittance by application and interview only. Preference to Sociology majors. Spanish speakers and writers, juniors, and seniors

SOCI BC3750 HOW RACE GETS UNDER OUR SKIN: THE SOCIOLOGY OF RACE, HEALTH, AND BIOMEDICINE. 4.00 points.

One of the glaring forms of inequalities that persists today is the race-based gap in access to health care, quality of care, and health outcomes. This course examines how institutionalized racism and the structure of health care contributes to the neglect and sometimes abuse of racial and ethnic minorities. Quite literally, how does race affect one's life chances? This course covers a wide range of topics related to race and health, including: racial inequalities in health outcomes, biases in medical institutions, immigration status and health, racial profiling in medicine, and race in the genomic era

SOCI UN3900 Societal Adaptations to Terrorism. 4 points.

Prerequisites: Junior or Senior standing
Examines how countries have adjusted to the threat of terrorism. How the adaptation reflects the pattern of terrorist attacks, as well as structural and cultural features of the society. Adaptations by individuals, families, and organizational actors.

SOCI UN3901 The Sociology of Culture. 4 points.

Prerequisites: SOCI BC1003 or equivalent social science course and permission of the instructor. Enrollment limited to 15 students. Drawing examples from popular music, religion, politics, race, and gender, explores the interpretation, production, and reception of cultural texts and meanings. Topics include aesthetic distinction and taste communities, ideology, power, and resistance; the structure and functions of subcultures; popular culture and high culture; and ethnography and interpretation.

SOCI BC3907 Communities and Social Change. 4 points.

Examines how changes in the economy, racial composition, and class relations affect community life-how it is created, changed and sometimes lost-with a specific focus on the local urban context. Student research projects will address how contemporary forces such as neoliberalization, gentrification and tourism impact a community's social fabric.

SOCI BC3916 CROSSOVER CULTURE. 4.00 points.

The rise of crossover culture: racially segregated markets and genres; organizational environments and the rise of independent labels; the creative process and black-white conflict and connection; the emergence of rock as a white genre; civil rights, Black Power, and the politics of soul; cultural borrowing and the postracial ethos

SOCI BC3919 Transitions to Adulthood. 4 points.

Prerequisites: SOCI W 1000 and SOCI W3010 or permission of instructor. Meets senior requirement.

Adolescence and early adulthood is a critical period in our lives. This research-intensive seminar explores how adolescent transitions are studied, how they compare across different national contexts, and how individual, family, and community factors affect the type and timing of different transitions.

SOCI BC3920 ADV TOPICS GENDER # SEXUALITY. 4.00 points.

This research and writing-intensive seminar is designed for senior majors with a background and interest in the sociology of gender and sexuality. The goal of the seminar is to facilitate completion of the senior requirement (a 25-30 page paper) based on ;hands on; research with original qualitative data. Since the seminar will be restricted to students with prior academic training in the subfield, students will be able to receive intensive research training and guidance through every step of the research process, from choosing a research question to conducting original ethnographic and interview-based research, to analyzing and interpreting ones findings. The final goal of the course will be the production of an original paper of standard journal-article length. Students who choose to pursue their projects over the course of a second semester will have the option of revisiting their articles further for submission and publications

SOCI BC3922 Race, Nation, and American Food Culture. 4 points.

Uses theories of race, ethnicity, and nation to ask questions about boundaries, categories, and distinctions about the American food system. Addresses the following questions: How are race, ethnicity, and national identity shaped by patterns of migration? How do processes like multiculturalism, panethnicity, and blending change the meanings and salience of these terms? How do symbols and systems of authenticity shape meaning-making around ethnoracial and national inequality? What does food have to do with race/ethnicity/nation? How are cultural products, like cuisine, markers of broader systems of inequality? How do these systems of inequality affect access to food, what we eat, the workplace, and racialized bodies? How does food serve as a marker of distinction in terms of race, ethnicity, nation, class, and gender? This course encourages students to read broadly in literatures of race, ethnicity, nation, migration and engage theories and ideas in conversation and debate across literatures to develop analytical strategies for understanding the complex landscape of ethnoracial and national inequality in the United States. By focusing analysis on cultural themes and specifically the case of American food culture, students are encouraged to question the utility and applicability of the abstract theories we encounter as well as the contributions and complications of each theory in relation to the others we discuss through a common language of cultural products, most specifically, the accessible discourse of food in American life.

SOCI BC3924 Gendered Work and Organizations. 4.00 points.

This course considers how gender shapes the action within different organizations, reflecting and reproducing broader social systems of inequality, identity, violence, and power in the United States. We will address current issues centered on the gendered nature of institutions and organizations, including the work/family debate, bodies at work, sexual harassment, service work, sex work, and sexual violence to illuminate the mechanisms by which systems of gender inequality shape the meanings and practices of individuals and groups within and across organizations and institutions

Research and writing intensive seminar on civic and political engagement in contemporary American society, along with critical evaluation of methods used to collect and analyze data on political and social life. Requirements include a final research paper based on independent data collection and analysis. Seminar limited to sociology majors with senior standing (except in exceptional circumstances). Fulfills the Research Paper Option for the senior requirement in sociology at Barnard

SOCI BC3930 ADVANCED TOPICS RACE # ETHNICITY. 4.00 points.

Discusses theories of race and ethnicity, distinctions between prejudice, discrimination, and racism, and the intersectionality paradigm. Under instructors guidance students design a research proposal, conduct their own fieldwork and write a research paper on a sociological question relating to race and/or ethnicity

SOCI BC3931 Seminar for Internships in Social Justice and Human Rights. 4 points.

Corequisites: Students must have an internship related to social justice or human rights during

This class is intended to complement and enhance the internship experience for students working in internships that relate to social justice and human rights during the Spring 2016 semester. This course will meet bi-weekly to provide an academic framing of the issues that students are working on and to provide an opportunity for students to analyze their internship experience.

SOCI BC3932 Climate Change, Global Migration, and Human Rights in the Anthropocene. 4 points.

While the existence of processes of anthropogenic climate change is well established, predictions regarding the future consequences of these processes are far less certain. In no area is the uncertainty regarding near and long term effects as pronounced as in the question of how climate change will affect global migration. This course will address the issue of climate migration in four ways. First, the course will examine the theoretical and empirical literatures that have elucidated the nature of international migration in general. Second, the course will consider the phenomena of anthropogenic climate change as it relates to migration. Third, the course will consider how human rights and other legal regimes do or do not address the humanitarian issues created by anthropogenic climate change. Fourth, the course will synthesize these topics by considering how migration and climate change has arisen as a humanitarian, political, and economic issue in the Pacific. *Human Rights elective.*

SOCI BC3933 SOCIOLOGY OF THE BODY. 4.00 points.

This seminar examines the ways in which the body is discursively constituted, and itself serves as the substratum for social life. Key questions include: How are distinctions made between normal and pathological bodies, and between the psychic and somatic realms? How do historical forces shape bodily experience? How do bodies that are racialized, gendered, and classed offer resistance to social categorization?

SOCI BC3934 Global Activism. 4.00 points.

This seminar will investigate efforts to coordinate, justify, and understand global activism through lenses of internationalism, solidarity, and universal human rights. We will also study transformations in the global institutional landscape – comprising international finance, supranational unions, and non-governmental organizations – which is itself the contradictory outcome of prior cycles of contestation. We will survey historical precedents, analyze contemporary manifestations, and speculate on the future prospects of global activism. Students will explore cases and concepts by reading scholarly literature and by considering the political practices, texts, and media created by movements themselves

SOCI BC3935 Gender and Organizations. 4 points.

This course examines the sociological features of organizations through a gender lens. We will analyze how gender, race, class, and sexuality matter for individuals and groups within a variety of organizational contexts. The course is grounded in the sociological literatures on gender and organizations.

SOCB BC3939 Housing Equity and the American Dream. 4.00 points.

The American Dream of owning a home has long represented an ideal of American equity. The ideal screams of opportunity and meritocracy: no matter how poor one begins life, as long as they work and save, they can enjoy the security and safety of home. To many, this ideal gives them hope, for they can see possibility for their achievement. To others, the ideal feels like a farce, for they rightly anticipate facing countless barriers to achieving that dream. This course examines challenges, contradictions, and ironies of American housing equity. We study ways in which the ideal of single-family home ownership has directly led to excluding large portions of the population from secure housing. We examine why and how many Americans can be deeply committed to equality and freedom and still perpetuate inequalities in their housing choices. We examine how people at the bottom who understand well the barriers they face still manage to survive, invent, and struggle to achieve dignity and equity in their housing. The course examines core issues of housing equity in America historically and in the present. The course primarily offers a sociological perspective on housing. But we will also read work and bring in perspectives from geography, history, urban planners, and others. In addition, we will also engage with work by journalists, which represents one way that the multi-disciplinary issues of housing are connected in narratives intended for a wider audience than more scholarly products. While we draw on work from various perspectives, we will focus on developing a sociological lens to understand housing

SOCI UN3944 Work, Life, Time and Space: From the Factory to the Gig Economy. 4 points.

This 4-credit class will explore experiences and perspectives of work, life, and the often blurred boundary between them. We will focus on how work is situated in, and shaped through, space and time. We will begin with a set of theoretical and historical texts, and then turn to case studies of work and life. The goal is to understand and make sense of how work, and its relationship to home, has evolved historically and how it is experienced today. The theories of space, time, and work which we begin with provide frameworks for making sense of the varied cases we will explore. The course as a whole will offer a lens for analyzing the world of work, along with the relationship between work and the rest of our lives. It may serve a springboard for you to tackle such questions as: What is the relationship between meaning and money, work time and leisure time? (Or, will I work to live or live to work?) How do historical and relatively fixed work temporalities and geographies compare to new structures of work? (or, what is my Uber driver's life like, and why is it so different from my grandfather's experience as a mail carrier?) What do changing structures of work mean for our future, in and beyond work? (or, will robots take all of our jobs? And if so, what should we do about it?)

SOCI BC3946 GLOBAL HEALTH, POLITICS, AND SOCIETY. 4.00 points.

What is global health? Where do global health disease priorities come from, and how do the ways that we understand disease shape how we respond to it? What happens when good ideas and good intentions go wrong? This course critically examines the politics of global health and its impact on local institutions and people. Drawing on social science research, the course will address three main themes: 1) how global health priorities are defined and constructed, 2) how our understandings of disease influence our response to that disease, and 3) how efforts to respond to disease intersect with people on the ground, sometimes in unexpected ways. We will examine the global health industry from the vantage point of different institutions and actors – international organizations, governments, local healthcare institutions, healthcare workers, and people living with or at risk of various illnesses like HIV/AIDS, malaria, cancer, and Ebola. A primary goal of this course is to help you to develop skills in critical thinking in relation to global health issues and their impact on society. Students will demonstrate their knowledge through individual writing, class discussion, presentations, and a final research project

SOCI UN3974 SOCI OF SCHOOLS,TEACH,LEARNING. 4.00 points.

In this class we will examine the school as a central institution in modern society, and we will grapple with an important question in the sociology of education: what role to schools play in reinforcing or challenging broader patterns of social inequality? We will pay special attention to the ways in which students class, race/ethnicity and gender shape their educational experiences. We will also look at how schools are organized, how schools construct differences among students, and how schools sort kids into different (and unequal) groups. Finally we will explore the types of interventions - at both the individual and organizational levels - that can mitigate inequality in educational achievement and help low-income students to succeed. One such intervention that has shown promise is tutoring in academic and social and behavioral skills, and interventions that strengthen self-affirmation. A major component of this class is your experience as a tutor. You will be trained as tutors to work with students from local high schools both through in-person tutoring and through tutoring using social networking technologies. Throughout the semester we will combine our academic learning with critical reflection on our experience in the field. Because you will be working with NYC high school students, we will pay special attention to how NYC high schools are organized and how current issues in education play out in the context of NYC schools

SOCI GU4028 GENDER AND INEQUALITY IN FAMI. 4 points.

In-depth, critical exploration of changing expectations and patterns of socialization for women and men in contemporary U. S. families.

Draws from family studies, gender studies, and LGBT studies to understand how gendered forces work to structure relations between and among family members. Readings highlight socioeconomic, racial and ethnic variations in patterns of behavior, at times critiquing assumptions and paradigms drawn from the experiences of traditional, middle-class nuclear families. Topics include division of household labor in same-sex and different-sex couples, adolescent experiences growing up disadvantaged, what happens to undocumented immigrant children when they reach adulthood, gender inequality in wealthy white families, and ethnic differences in men's expected roles in families.

SOCI GU4043 WORKSHP ON WEALTH # INEQUALITY. 1.00 point.

This Workshop is linked to the Workshop on Wealth - Inequality Meetings. This is meant for graduate students, however, if you are an advanced undergraduate student you can email the professor for permission to enroll

SOCI GU4370 Processes of Stratification and Inequality. 3 points.

The nature of opportunity in American society; the measurement of inequality; trends in income and wealth inequality; issues of poverty and poverty policy; international comparisons.

SOCI GU4411 Politics and Society in Central Eastern Europe. 3 points.

The goal of the course is to discuss different approaches to the study of developmental pathways in Central and Eastern Europe (CEE) in a broad historical perspective drawing on various approaches from political science, sociology and economic history. Students participating in the seminars will get an overview on the various approaches to explaining divergence in political, social and economic developments between the Eastern and Western parts of Europe, and within the region. The course aims to establish a dialogue between three types of scholarships: one dealing with the pre-regime change developmental pathways in the region, another dealing with factors that could account for persistent post-communist and post-enlargement developmental divergence and a third one that deals with issues of backwardness and core-periphery relations in transnational and global perspective.

The course starts with a discussion of broad historical perspectives on East-West divergence in Europe. The second bloc deals with the various great transformations in the region: the remaking of states, politics and economies. The third bloc is devoted to the discussion of the transnationalization of states and economies in the region. Finally, the forth bloc deals with hybrid regimes and problems of democratic backsliding in the region.

SOCI GU4600 Mystifications of Social Reality . 4 points.

The late eighteenth and early nineteenth centuries were marked by the discovery of a new object of systematic inquiry in addition to Nature and the Individual: Society. First Economics, then Anthropology, Sociology, and Political Science developed strikingly new understandings of the actions, beliefs, and institutional arrangements of men and women in society, which were seen as obeying regular laws not derivable from, or reducible to, either the laws of nature or the laws of individual behavior. But these new disciplines, which came to be called the Social Sciences, were different from their predecessors in one fundamental and centrally important way: They revealed the study of society, and indeed society itself, to be mystified, ideologically encoded, shaped and distorted by the interests and beliefs of men and women even though those living in society or studying it often were oblivious of this fact.

In this course we shall read in depth a series of texts by authors who explored the ideological mystifications of social reality in their disciplines. The goal of the course is not merely to inform students of these authors and their ideas but to strengthen the ability of students to understand their own involvement in, indeed complicity in, ideological mystification.

Cross-Listed Courses

Urban Studies

URBS UN3308 INTRO TO URBAN ETHNOGRAPHIES. 3.00 points.

Prerequisites: Students must attend first class.

What is ethnography and what makes ethnography “urban”? This course explores how social scientists use ethnography to analyze questions and dilemmas often associated with urban settings. We will combine close readings of ethnographies with field-based inquiry, including our own studies of urban public space. Through both our readings and our field exercises, we will focus on the methods at the heart of ethnography: observation and participant-observation. As we read other scholars’ work, we will ask how the author uses ethnographic tools to explore issues that are suitable for intensive fieldwork. We will assess which kinds of research problems and theoretical perspectives are a good fit with ethnography and the roles that ethnography can play in transdisciplinary research projects. You will apply what you have learned about research to design your own pilot fieldwork. The ethnographies that we read together will examine intersections of housing, race, and class in urban communities. You are welcome to extend this focus to your own fieldwork, but it’s not required to do so. This is a writing-intensive course, and we will devote a considerable portion of class time to workshop your individual projects

URBS UN3315 METROPOLITICS OF RACE # PLACE. 3.00 points.

Prerequisites: Students must attend first class.

This class explores how racism and racialized capitalism and politics shape the distribution of material resources among cities and suburbs in metropolitan areas and the racial and ethnic groups residing in them. Readings and discussion focus on the history of metropolitan area expansion and economic development, as well as contemporary social processes shaping racial and ethnic groups’ access to high-quality public goods and private amenities. We address racial and ethnic groups’ evolving political agendas in today’s increasingly market-driven socio-political context, noting the roles of residents; federal, state, and local governments; market institutions and actors; urban planners, activist organizations, foundations, and social scientists, among others. Here is a sample of specific topics: race/ethnicity and who “belongs” in what “place;” inequitable government and market investment across racial and ethnic communities over time and “sedimentation effects” (for example, the “redlining” of Black communities leading to their inability to access loan and credit markets and the resulting wealth gap between Blacks and Whites); gentrification processes; creating sufficient, sustainable tax bases; and suburban sprawl. Assignments will include two short response papers, mid-term and final exams, and another project to be determined

URBS UN3420 INTRODUCTION URBAN SOCIOLOGY. 3.00 points.

Prerequisites: Students must attend first class.

Prerequisites: Students must attend first class. Examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey research, quantitative studies, and participant observation will provide perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment

URBS UN3830 Eminent Domain and Neighborhood Change. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Intro to Urban Sociology or equivalent or permission of the instructor. Students must attend first class for instructor permission.

An examination of how the politics of eminent domain, as a government strategy for neighborhood change, plays out in the courts, city councils, administrative agencies, media, and the street. Readings drawn from law, history, planning, politics, economics, sociology, and primary sources. Emphasis on the U.S., with some international comparisons. This course will count toward Requirement A of the Urban Studies curriculum as a Sociology course.

Spanish & Latin American Cultures

Language Program Director: María Eugenia Lozano
Department Assistant: Anna Hotard

The Department of Spanish and Latin American Cultures

The Department of Spanish and Latin American Cultures at Barnard College boasts a long tradition of excellence in undergraduate education for women. Throughout its history, it has afforded students a solid preparation in both Spanish language and the literatures and cultures of Spain, Spanish America, and the Spanish-speaking United States.

Mission

The keystone of our integrated curriculum is linguistic and intellectual continuity from the elementary language level to the most advanced literature and culture courses. Our language courses are skill- and proficiency-oriented and provide the foundation students need for advanced study, either at Barnard or in college-level study abroad. Our upper-level courses stress the necessary historical and theoretical tools needed to understand the cultural and aesthetic production of the Hispanic world. Through our strong collaboration with interdisciplinary programs and departments at Barnard, including Comparative Literature, Africana Studies, Women's, Gender and Sexuality Studies, and the Forum on Migration, as well as our teamwork with the Columbia Department of Latin American and Iberian Cultures, we are ideally poised to train students for a wide range of post-graduation experiences in MA/PhD programs or in the professional sphere.

Student Learning Outcomes

Through the Major in Spanish and Latin American Cultures, students who rigorously apply themselves to their studies will be able to:

- Use the Spanish language at the B2-C2 proficiency levels (Independent User/Proficient User), as defined by the Common European Framework of Reference (depending on initial background and ability);*
- Identify and describe the cultures of Spain and Spanish America throughout their history, from Islamic Spain and the colonial period through the present.
- Demonstrate specialized knowledge of selected literary and cultural works, authors and cultural producers of the Hispanic world, understood in their aesthetic, historical, and social contexts.
- Use basic principles of literary and cultural theory to analyze and interpret a variety of texts and other cultural products.
- Express their ideas, analyses, and interpretation through clear oral exposition and effective critical writing.
- Conduct research in the fields of Spanish and Spanish American literature and culture, and demonstrate the results of their research and thinking in original academic essays.

Major and Minor in Spanish and Latin American Cultures

Majors and minors in this department will provide students with a solid literacy in the cultures of the Hispanic world. Literacy at the level of language instruction entails the students' ability to express themselves fluently in Spanish, both orally and in writing. Literacy at the cultural level entails an intellectual grasp of Spanish and Spanish American cultural and artistic products and the knowledge of the historical and methodological contexts in which to situate them. Students must consult with the major adviser to carefully plan their program upon major declaration. With adviser approval, courses taken abroad or at another institution can apply toward the major/minor. The Department of Spanish and Latin American Cultures addresses the Barnard senior research requirement through the writing of a substantial paper in a topic-based senior seminar; there is the possibility of further research development for some students. The Spanish and Latin American Cultures majors have been designed in conjunction with the Columbia Department of Spanish and Portuguese. Hence, Barnard students may, always in consultation with the major adviser, move freely between the departments of both institutions in search of the courses that best fit their interests and schedules.

Proficient User

C2 Can understand with ease virtually everything heard or read. Can summarise information from different spoken and written sources, reconstructing arguments and accounts in a coherent presentation. Can express him/herself spontaneously, very fluently and precisely, differentiating finer shades of meaning even in more complex situations.

C1 Can understand a wide range of demanding, longer texts, and recognise implicit meaning. Can express him/herself fluently and spontaneously without much obvious searching for expressions. Can use language flexibly and effectively for social, academic and professional purposes. Can produce clear, well-structured, detailed text on complex subjects, showing controlled use of organisational patterns, connectors and cohesive devices.

Independent User

B2 Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialisation. Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

Major in Spanish and Latin American Cultures

The Barnard major in Spanish and Latin American Cultures consists of eleven courses (minimum 33 credits). The required introductory courses are SPAN UN3300 (Advanced Language through Content), UN3349 (Hispanic Cultures I), and 3350 (Hispanic Cultures II). Beyond the introductory courses, the major requires **seven** upper-level elective courses— 3000- or 4000-level offerings—and a Senior Seminar intended to be taken in the Fall of the senior year (in cases of unavoidable conflict, and by approval of the Major Adviser, students may enroll in the Spring section offered at Columbia).

NOTE: With adviser approval, courses in both the Department of Spanish and Latin American Cultures and the Columbia Department of Latin American and Iberian Cultures numbered 3000 and above will count toward the majors or minors.

Eleven courses (minimum 33 points):

Three required introductory courses:

SPAN UN3300	ADV LANGUAGE THROUGH CONTENT
SPAN UN3349	HISPANIC CULTURES I (SP)
SPAN UN3350	HISPANIC CULTURES II (SP)

Select seven elective courses

Select one of the following Senior Seminars: 4

SPAN BC3990	SENIOR SEMINAR
SPAN UN3991	SENIOR SEMINAR
SPAN W3992	Senior Seminar: Modern Cities and Global Cities

UN3300 must be taken after completion of the language requirement and before UN3349 and UN3350, which can be taken simultaneously or in inverse order. Except by approval of the Major Adviser, all three introductory courses are prerequisites for upper-level courses. In choosing their sections, Barnard students should keep in mind that some Columbia classes at these levels are taught by PhD candidates. Other sections at both Barnard and Columbia are taught by full-time Lecturers/Associates and tenured or tenure-track faculty.

Electives

A minimum of four electives must be chosen from the Departments' 3000- or 4000-level* offerings. Up to three electives may be taken outside the Departments, provided they address Hispanic topics. Courses at or beyond the intermediate level in Portuguese and Catalan may count as outside electives. Coursework completed in other departments requires the approval of the major advisor; students should therefore not wait until their senior year to find out whether courses they have taken will apply to the major. All students should seek chronological and geographic breadth in their coursework, enrolling in diverse classes on both Latin American and Iberian topics, something that is essential for those planning future graduate work in Hispanic Studies. Such students should consult especially closely with their adviser to plan their program.

* 4000-level courses, offered only at Columbia, are joint graduate-undergraduate courses.

Senior Research Project

The senior seminar may be taken either at Barnard (BC or UN3990) or at Columbia (UN3991, 3992, or 3993). It is an advanced, research-oriented course on a broad topic, in the context of which Barnard students are required to write a paper in Spanish of at least 20 pages. Since this paper counts as the Barnard Senior Research Project, students who take the seminar at Columbia must be sure they fulfill the 20-page requirement, regardless of what their particular professor requires of other students. These students must hand in the final version of their paper to the Barnard Major Adviser in addition to their Columbia professor.

Study Abroad

Up to four courses from Study Abroad may apply toward the major, some of which may count toward the introductory courses, provided they are at the same level and substantially address the same topics/skills. However, no more than five courses in total may be taken outside the Barnard/Columbia Spanish departments. Approval of specific courses is at the discretion of the Major Adviser (in consultation with the Study Abroad Adviser/Language Program Director for those at the 3300 level), taking into consideration the balance in the student's full program of study. Students should consult periodically with the Major Adviser to make sure they are making adequate progress toward the completion of all requirements.

Minor in Spanish and Latin American Cultures

The Barnard minor in Spanish and Latin American Cultures consists of six courses (minimum 18 credits). The required introductory courses are SPAN UN3300 (Advanced Language through Content); and UN3349 (Hispanic Cultures I) and 3350 (Hispanic Cultures II). Beyond the introductory courses, the minor requires three upper-level electives (UN3349 and UN3350 do not count as such). These must be chosen from the Barnard Department of Spanish and Latin American Cultures' or Columbia Department of Latin American and Iberian Cultures' 3000- or 4000-level offerings.

Six courses (minimum 18 points):

SPAN UN3300	ADV LANGUAGE THROUGH CONTENT	3
SPAN UN3349	HISPANIC CULTURES I (SP)	3

SPAN UN3350	HISPANIC CULTURES II (SP)	3
Select three other courses at the 3000-level or above to be chosen in consultation with the major advisor		

UN3300 must be taken after completion of the language requirement and before UN3349 or UN3350. Except by approval of the Minor Adviser, all three introductory courses are prerequisites for upper-level courses. In choosing their sections, Barnard students should keep in mind that some Columbia classes at these levels are taught by PhD candidates. Other sections at both Barnard and Columbia are taught by full-time Lecturers/Associates and tenured or tenure-track faculty.

A maximum of three courses taken outside the Departments (from study abroad, other departments at Barnard/Columbia, or other institutions) may apply toward the minor. Such courses will be approved by the Minor Adviser and the Study Abroad Adviser/Language Program Director (the latter of whom officially signs the approval), on the basis of their level, quality, and perceived relevance to the minor program of study. Courses in English do not count toward the minor.

Although Barnard allows students to sign up for minors through the end of their senior year, the Department encourages students to sign up as early in their career as possible, and to consult regularly with the Minor Adviser to ensure they are making adequate progress toward the completion of all requirements.

Major in Spanish and Latin American Cultures with Specialization

For students wishing to pursue a more rigorously interdisciplinary program in the Social Sciences or the Humanities, the Department offers a major that integrates courses in Spanish and Latin American Cultures/Spanish and Portuguese with courses in another department or program chosen carefully by the student.

Fourteen courses (minimum 42 points):

SPAN UN3300	ADV LANGUAGE THROUGH CONTENT	3
SPAN UN3349	HISPANIC CULTURES I (SP)	3
SPAN UN3350	HISPANIC CULTURES II (SP)	3
Select ten elective courses		
Select one of the following Senior Seminars:		
SPAN BC3990	SENIOR SEMINAR	4
SPAN UN3991	SENIOR SEMINAR	
SPAN W3992	Senior Seminar: Modern Cities and Global Cities	

Coursework will include a minimum of three 3000- or 4000-level courses within the Departments but beyond the four required foundation courses, and six courses in another field of specialization, three of which should be closely related to Hispanic Studies. Students who wish to complete this rigorous interdisciplinary major will choose a specialization. Possible fields and programs include Anthropology, Africana Studies, Art History, Economics, Film, Gender Studies, History, Latino Studies, Latin American Studies, Music, Political Science, Sociology, and Urban Studies. Students should work closely with their major advisor to plan their program of study; it will be their responsibility to seek advising regarding coursework in their external specialization from appropriate sources (for example, from other departments' Chairs). Electives outside the two departments (Spanish and Latin American Cultures/Latin American and Iberian Cultures) should include basic methodological or foundation courses in the chosen field or program. In special cases and with advisor approval,

students may complete some coursework in another, closely related field. In exceptional cases and again with advisor approval, students may take a Senior Seminar in their field of specialization as a seventh course outside of the Departments if they have completed enough basic courses in that field to manage the demands of an advanced seminar. In such cases, the major advisor must receive written communication from the seminar instructor indicating approval of a student's membership in the course; the seminar project must be on a Hispanic topic; and a copy of the project must be turned in to the major advisor for the student's file upon completion of the course. Students who complete the seminar in another department may also count it as the third elective course on a Hispanic topic outside of the two departments, in which case they may take a fourth 3000- or 4000-level course in Spanish and Latin American Cultures/Latin American and Iberian Cultures.

Senior Research Project

In the fall of their senior year, students must enroll in a senior seminar in which they will undertake the research and writing of a substantial paper in the field. Some students may wish, with departmental approval, to further develop their research in the spring through an independent study project with a willing faculty member. For that project, they may expand their work in the senior seminar or undertake a new assignment in consultation with the faculty member. SPAN BC3099 INDEPENDENT STUDY may be counted as one of the courses that fulfills the major.

The senior seminar may be taken either at Barnard (BC or UN3990) or at Columbia (UN3991, 3992, or 3993). It is an advanced, research-oriented course on a broad topic, in the context of which Barnard students are required to write a paper in Spanish of at least 20 pages. Since this paper counts as the Barnard Senior Research Project, students who take the seminar at Columbia must be sure they fulfill the 20-page requirement, regardless of what their particular professor requires of other students. These students must hand in the final version of their paper to the Barnard Major Advisor in addition to their Columbia professor.

SPAN UN1101 ELEMENTARY SPANISH I. 4.00 points.

Prerequisites: a score of 0-279 in the department's Placement Examination.

Prerequisites: a score of 0-279 on the department's Spanish as a Second Language Placement exam. An introduction to Spanish communicative competence, with stress on basic oral interaction, reading, writing, and cultural knowledge. Principal objectives are to understand and produce commonly used sentences to satisfy immediate needs; ask and answer questions about personal details such as where we live, people we know and things we have; interact in a simple manner with people who speak clearly, slowly and are ready to cooperate; and understand simple and short written and audiovisual texts in Spanish. All Columbia students must take Spanish language courses (UN 1101-3300) for a letter grade

SPAN UN1120 COMPREHENSIVE BEGINNING SPAN. 4.00 points.

Intensive, fast-paced elementary Spanish course for multilingual learners who have had little to no formal education in Spanish.

Replaces the sequence SPAN UN1101-SPAN UN1102. Prerequisites: Take the Department's Language Placement Examination. (It is only for diagnostic purposes, to assess your language learning skills, not your knowledge of Spanish). If you score approximately 330 OR MORE, you may qualify for this course if: - you have had little to no formal education in Spanish, AND - you identify with ONE of the following language learner profiles: Learners of Spanish as a 3rd language: fluent in a language other than English Informal learners of Spanish: English speakers who have "picked up" Spanish by interacting with Spanish speakers in informal settings "Receptive" Spanish heritage learners: English dominant, but you understand Spanish spoken by family and community members (The exam is only an initial assessment for diagnostic purposes. Your score might be high, even if you have never studied Spanish in a formal setting). You do not need my permission to register*. I will further assess your level during the Change of Program period. Feel free to contact me if you have any questions or if you are unsure about your placement in this course. *Students who do not have the necessary proficiency level may not remain in this course.

SPAN UN2108 SPANISH FOR HERITAGE SPEAKERS. 4.00 points.

Prerequisites: SPAN UN1108 or scoring at this level on the department's Spanish as a Heritage Language Placement test (<https://columbia-barnard.vega-labs.com>). The principal aim of SPAN UN2108 is to build upon and further develop the knowledge of Spanish that heritage learners bring to the classroom – from SPAN UN1108 and/or from family and neighborhood exposure to the language. This course cultivates intermediate-level formal speaking, listening, reading, and writing abilities. Spanish heritage language courses at Columbia/Barnard focus on the development of communicative abilities and literacy from sociolinguistic and sociocultural approaches. Throughout the semester, students will be reviewing spelling patterns, building vocabulary, acquiring and effectively using learning strategies, and strengthening composition skills in Spanish. Cultural projects and readings reinforce learners' understanding of the multiple issues related to Hispanic cultures in the United States and in other Spanish-speaking societies

SPAN UN3350 HISPANIC CULTURES II (SP). 3.00 points.

This course surveys cultural production of Spain and Spanish America from the eighteenth to the twenty-first centuries. Students will acquire the knowledge needed for the study of the cultural manifestations of the Hispanic world in the context of modernity. Among the issues and events studied will be the Enlightenment as ideology and practice, the Napoleonic invasion of Spain, the wars of Spanish American independence, the fin-de-siecle and the cultural avant-gardes, the wars and revolutions of the twentieth century (Spanish Civil War, the Mexican and Cuban revolutions), neoliberalism, globalization, and the Hispanic presence in the United States. The goal of the course is to study some key moments of this trajectory through the analysis of representative texts, documents, and works of art. Class discussions will seek to situate the works studied within the political and cultural currents and debates of the time. All primary materials, class discussion, and assignments are in Spanish. This course is required for the major and the concentration in Hispanic Studies

SPAN BC3180 Between Science Fiction and Climate Fiction: Imagining the Non-human in Latin America. 3.00 points.

This course explores the entanglement between traditional science fiction and the emerging genre of climate change fiction (popularly known as "cli-fi") in Latin American literature. Traditionally, while science fiction imagines future scientific or technological advances and significant social or environmental changes, climate fiction deals more specifically with climate change and global warming. By focusing on the ideological and aesthetic implications of the human/non-human binary, this course will explore how the history of colonialism makes Latin America a unique laboratory of experimentation that combines these two genres. We will ask questions such as: How are phenomena such as climate change, post-humanism, animal, machine, artificial intelligence regionalized in Latin American fiction? How is the relationship between colonization and the extraction of natural resources fictionalized in twentieth-century literature? What are the different ways in which Latin American authors negotiate issues such as "development," "progress," and technological and capitalist expansion in their fiction? How do they imagine a future after climate change? How do climate change and technological development affect gender, racial, and class relations in Latin America? We will examine how specific literary fiction varies in response to the long-term history of capitalism, patriarchal domination, and the technological domination of nature in Latin America

SPAN BC3376 RETHINKING SPANISH TRANSLATION. 3.00 points.

Through special attention to translation method and practice, this course aims to develop a solid foundation on which to build the full set of competences required to become thoughtful, alert, self-critical translator while extending and improving the students competence of Spanish through complex translation tasks of a wide range of texts presented with a progressive overall structure and thematic organization. With a professional approach, it focuses on translation as a cross-cultural and crosslinguistic communicative activity that integrates areas such as interlanguage pragmatics, discourse analysis and transfer

SPAN BC3382 SOCIOLING ASPECTS U.S.SPANISH. 3.00 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350). Sociolinguistics studies the connections between language and social categories such as class, gender, and ethnicity. This course will address how social, geographic, cultural, and economic factors affect the different usages of Spanish among its millions of speakers. Through theory and practice of various research tools including Ethnography of Communication and Discourse Analysis, students will explore topics such as English-Spanish contact in the US, code-switching, and Spanglish, as well as issues of identity, bilingualism, and endangered languages

Intertextual relations between film and literature. Authors and film makers include: Gabriel Garcia Marquez, Laura Esquivel, Borges, Maria Luisa Bemberg, Vargas Llosa, and Fina Torres.

SPAN BC3510 Gender and Sexuality in Latin American Cultures. 3 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350).

Examines constructions of gender and sexuality in Latin American cultures. Through a close analysis of critical, literary, and visual texts, we explore contemporary notions of gender and sexuality, the socio-cultural processes that have historically shaped these, and some theoretical frameworks through which they have been understood.

SPAN BC3830 QUEER QUISQUEYA: SAME-SEX DESIRE IN DOMINICAN LITERATURE. 4.00 points.

Prerequisites: Third-year bridge course (W3300), and introductory surveys (W3349, W3350). When LGBT literatures first became consolidated as a field of study in Latin American literary studies in the 1990s, the Dominican Republic figured as a glaring absence. In the first two pioneering anthologies, *Hispanisms and Homosexualities* (Duke UP, 1998) and *¿Entiendes? Queer Readings, Hispanic Writings* (Duke UP, 1995), an impressive one-third of essays was dedicated to the insular Hispanophone Caribbean, Cuba and Puerto Rico, but none to the Dominican Republic. This course contests the presumable absence of LGBT literature in the Dominican Republic by recovering little-known 20th century representations of same-sex desire and then tracing the growing body of Dominican LGBT literature in the 21st century. We analyze through which different representational strategies Dominican writers have successfully written non-heteronormative subjects into the Dominican national family and have challenged existing gender and sexual norms across time

SPAN BC3850 ADVERTISING AS CULTURE IN MODERN AND CONTEMPORARY SPAIN. 3.00 points.

Advertising emerged in modern societies as they developed into bourgeois market economies. As a creative industry involving verbal/visual communication and technology, it is intertwined with cultural production in general, and many of its products can be seen as artistic in their own right. As it both caters to and creates a consumer public with needs and desires, it is intertwined with broad social and ideological currents, and can provide an angle for their historical analysis. This course posits analysis of a “discursive formation” that includes the language of advertising as well as literary, cinematographic, and other social languages engaging publicity as a vehicle for the study of modern/contemporary Spanish cultural history, from the birth of the modern constitutional monarchy (1812), through the Franco dictatorship (1939-75), and into the transition to present-day democracy. Topics will include the evolution and professionalization of Spanish advertising itself, advertising and aesthetics, early bourgeois reflection on art vs. commerce, the special role of women as both publicity and public, changing views on consumer culture, and marketing’s function in consolidating substate political identities

SPAN BC3910 The Affective Nation: Love and Relationships in Contemporary Spanish Culture. 4.00 points.

This course’s point of departure is the concept that emotional regimes regulating allowable or forbidden feelings and practices are at the root of social and political order. We will explore the relationship between the construction of the contemporary Spanish nation and the affective sphere through analysis of theoretical and critical works, in addition to nineteenth- through twenty-first century cultural texts—from canonical and noncanonical fiction to popular web sites—that revolve around the subjects of love, marriage, and relationships in relation to matters of citizenship, social class, and gender. The Department offers several introductory courses. Students interested in statistical concepts, who plan on consuming, but not creating statistics, should take STAT UN1001 INTRO TO STATISTICAL REASONING. The course is designed for students who have taken a pre-calculus course, and the focus is on general principles. It is suitable for students seeking to satisfy the Barnard quantitative reasoning requirements. Students seeking an introduction to applied statistics should take STAT UN1101 INTRODUCTION TO STATISTICS.

The course is designed for students who have some mathematical maturity, but who may not have taken a course in calculus, and the

focus is on the elements of data analysis. It is recommended for pre-med students, and students contemplating the concentration in statistics. Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN1201 CALC-BASED INTRO TO STATISTICS. The course is designed for students who have taken a semester of college calculus or the equivalent, and the focus is on preparation for a mathematical study of probability and statistics. It is recommended for students seeking to complete the prerequisite for econometrics, and for students contemplating the major in statistics. Students seeking a one-semester calculus-based survey of probability theory and statistical theory and methods should take STAT GU4001 INTRODUCTION TO PROBABILITY AND STATISTICS. This course is designed for students who have taken calculus, and is meant as a terminal course. It provides a somewhat abridged version of the more demanding sequence STAT GU4203 PROBABILITY THEORY and STAT GU4204 STATISTICAL INFERENCE. While some mathematically mature students take the more demanding sequence as an introduction to the field, it is generally recommended that students prepare for the sequence by taking STAT UN1201 CALC-BASED INTRO TO STATISTICS.

The Department offers the Major in Statistics, the Concentration in Statistics, and interdisciplinary majors with Computer Science, Economics, Mathematics, and Political Science. The concentration is suitable for students preparing for work or study where substantial skills in data analysis are valued and may be taken without mathematical prerequisites. The concentration consists of a sequence of six courses in applied statistics, but students may substitute statistics electives numbered 4203 or above with permission of the concentration advisors. The major consists of mathematical and computational prerequisites, an introductory course, and five core courses in probability theory and theoretical and applied statistics together with three electives. The training in the undergraduate major is comparable to a masters degree in statistics.

Students may wish to consult the following guidelines when undertaking course planning. It is advisable to take STAT UN1101 INTRODUCTION TO STATISTICS and STAT UN2102 Applied Statistical Computing before taking any of the more advanced concentration courses, STAT UN2103 APPLIED LINEAR REG ANALYSIS, STAT UN2104 APPL CATEGORICAL DATA ANALYSIS, STAT UN3105 APPLIED STATISTICAL METHODS, and STAT UN3106 APPLIED MACHINE LEARNING. It is advisable to take STAT UN1201 CALC-BASED INTRO TO STATISTICS, STAT GU4203 PROBABILITY THEORY, STAT GU4204 STATISTICAL INFERENCE, and STAT GU4205 LINEAR REGRESSION MODELS in sequence. Courses in stochastic analysis should be preceded by STAT GU4203 PROBABILITY THEORY, and for many students, it is advisable to take STAT GU4207 ELEMENTARY STOCHASTIC PROCESS before embarking on STAT GU4262 Stochastic Processes for Finance, STAT GU4264 STOCHASTIC PROCESSES-APPLICIENS I, or STAT GU4265 STOCHASTIC METHODS IN FINANCE. Most of the statistics courses numbered from 4221 to 4234 are best preceded by STAT GU4205 LINEAR REGRESSION MODELS. The data science courses STAT GU4206 STAT COMP # INTRO DATA SCIENCE, STAT GU4241 STATISTICAL MACHINE LEARNING, and STAT GU4242 Advanced Machine Learning should be taken in sequence.

Advanced Placement

The Department offers three points of advanced credit for a score of 5 on the AP statistics exam. Students who are required to take an introductory statistics course for their major should check with their

major advisor to determine whether this credit provides exemption from their requirement.

Departmental Honors

Students are considered for department honors on the basis of GPA and the comprehensiveness and difficulty of their course work in the Department. The Department is generally permitted to nominate one tenth of graduating students for departmental honors.

Undergraduate Research in Statistics and the Summer Internship

Matriculated students who will be undergraduates at Columbia College, Barnard College, the School of General Studies, or the School of Engineering and Applied Sciences may apply to the Department's summer internship program. The internship provides summer housing and a stipend. Students work with Statistics Department faculty mentors. Applicants should send a brief statement of interest and a copy of their transcript to Ms. Dood Kalicharan in the Statistics Department office by the end of March to be considered. If summer project descriptions are posted on the Department's website, please indicate in the statement of interest which project is of interest.

Students seeking research opportunities with Statistics Department faculty during the academic year are advised to be entrepreneurial and proactive: identify congenial faculty whose research is appealing, request an opportunity to meet, and provide some indication of previous course work when asking for a project.

Major in Statistics

The requirements for this program were modified in March 2016. Students who declared this program before this date should contact the director of undergraduate studies for the department in order to confirm their options for major requirements.

The major should be planned with the director of undergraduate studies. Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major. The requirements for the major are as follows:

Mathematics and Computer Science Prerequisites

MATH UN1101	CALCULUS I
MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN2010	LINEAR ALGEBRA

One of the following five courses

COMS W1007	Honors Introduction to Computer Science
------------	---

ENGI E1006	INTRO TO COMP FOR ENG/APP SCI
COMS W1005	Introduction to Computer Science and Programming in MATLAB
STAT UN2102	Applied Statistical Computing
COMS W1004	Introduction to Computer Science and Programming in Java

Core courses in probability and statistics

STAT UN1201	CALC-BASED INTRO TO STATISTICS

STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS
STAT GU4206	STAT COMP # INTRO DATA SCIENCE
STAT GU4207	ELEMENTARY STOCHASTIC PROCESS

Three approved electives in statistics or, with permission, a cognate field.

- Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 LINEAR REGRESSION MODELS with STAT GU4282 Linear Regression and Time Series Methods, and should take as one of their electives STAT GU4281 Theory of Interest.
- Students preparing for graduate study in statistics are encouraged to replace two electives with MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.

Minor in Statistics

Courses taken for a grade of Pass/D/Fail, or in which the grade of D, has been received do not count towards the minor. The requirements for the minor are as follows.

STAT UN1101	INTRODUCTION TO STATISTICS
STAT UN2102	Applied Statistical Computing
STAT UN2103	APPLIED LINEAR REG ANALYSIS
STAT UN2104	APPL CATEGORICAL DATA ANALYSIS
STAT UN3105	APPLIED STATISTICAL METHODS
STAT UN3106	APPLIED MACHINE LEARNING

- Students may replace courses required for the minor by approved Statistics Department courses.

Major in Mathematics-Statistics

The program is designed to prepare the student for: (1) a career in industries such as finance and insurance that require a high level of mathematical sophistication and a substantial knowledge of probability and statistics; and (2) graduate study in quantitative disciplines. Students choose electives in finance, actuarial science, operations research, or other quantitative fields to complement requirements in mathematics, statistics, and computer science.

Courses taken for a grade of Pass/D/Fail, or in which the grade of D has been received, do not count toward the major. The requirements for the major are as follows:

Mathematics

Select one of the following sequences:

MATH UN1101	CALCULUS I
-------------	------------

MATH UN1102	CALCULUS II
MATH UN1201	CALCULUS III
MATH UN2010	LINEAR ALGEBRA
MATH UN2500	ANALYSIS AND OPTIMIZATION

MATH UN2500	ANALYSIS AND OPTIMIZATION

Statistics required courses

STAT UN1201	CALC-BASED INTRO TO STATISTICS
STAT GU4203	PROBABILITY THEORY
STAT GU4204	STATISTICAL INFERENCE
STAT GU4205	LINEAR REGRESSION MODELS

And select one of the following courses:

STAT GU4207	ELEMENTARY STOCHASTIC PROCESS
STAT GU4262	Stochastic Processes for Finance
STAT GU4264	STOCHASTIC PROCESSES-APPLICATNS I
STAT GU4265	STOCHASTIC METHODS IN FINANCE

Computer Science

Select one of the following courses:

COMS W1004	Introduction to Computer Science and Programming in Java
COMS W1005	Introduction to Computer Science and Programming in MATLAB
ENGI E1006	INTRO TO COMP FOR ENG/APP SCI
COMS W1007	Honors Introduction to Computer Science
or an advanced Computer Science offering in programming	

Electives

An approved selection of three advanced courses in mathematics, statistics, applied mathematics, industrial engineering and operations research, computer science, or approved mathematical methods courses in a quantitative discipline. At least one elective must be a Mathematics Department course numbered 3000 or above.

- Students interested in modeling applications are recommended to take MATH UN3027 Ordinary Differential Equations and MATH UN3028 PARTIAL DIFFERENTIAL EQUATIONS
- Students interested in finance are recommended to include among their electives, MATH GR5010 INTRO TO THE MATH OF FINANCE, STAT GU4261 STATISTICAL METHODS IN FINANCE, and STAT GU4221 TIME SERIES ANALYSIS.
- Students interested in graduate study in mathematics or in statistics are recommended to take MATH GU4061 INTRO MODERN ANALYSIS I and MATH GU4062 INTRO MODERN ANALYSIS II.
- Students preparing for a career in actuarial science are encouraged to replace STAT GU4205 LINEAR REGRESSION MODELS with STAT GU4282 Linear Regression and Time Series Methods, and to take among their electives STAT GU4281 Theory of Interest.

Introductory Courses

Students interested in statistical concepts, but who do not anticipate undertaking statistical analyses, should take STAT UN1001 Introduction to Statistical Reasoning. Students seeking an introduction to applied statistics or preparing for the concentration should take STAT UN1101 Introduction to Statistics (without calculus). Students seeking a foundation for further study of probability theory and statistical theory and methods should take STAT UN1201 Calculus-based Introduction to Statistics. Students seeking a one-semester calculus-based survey should take STAT GU4001 Introduction to Probability and Statistics. The undergraduate seminar STAT UN1202 features faculty lectures prepared with undergraduates in mind; students may attend without registering.

STAT UN1001 INTRO TO STATISTICAL REASONING. 3.00 points.

A friendly introduction to statistical concepts and reasoning with emphasis on developing statistical intuition rather than on mathematical rigor. Topics include design of experiments, descriptive statistics, correlation and regression, probability, chance variability, sampling, chance models, and tests of significance

STAT UN1010 Statistical Thinking For Data Science. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

The advent of large scale data collection and the computer power to analyze the data has led to the emergence of a new discipline known as Data Science. Data Scientists in all sectors analyze data to derive business insights, find solutions to societal challenges, and predict outcomes with potentially high impact. The goal of this course is to provide the student with a rigorous understanding of the statistical thinking behind the fundamental techniques of statistical analysis used by data scientists. The student will learn how to apply these techniques to data, understand why they work and how to use the analysis results to make informed decisions. The student will gain this understanding in the classroom and through the analysis of real-world data in the lab using the programming language Python. The student will learn the fundamentals of Python and how to write and run code to apply the statistical concepts taught in the classroom

STAT UN1101 INTRODUCTION TO STATISTICS. 3.00 points.

Prerequisites: intermediate high school algebra. Designed for students in fields that emphasize quantitative methods. Graphical and numerical summaries, probability, theory of sampling distributions, linear regression, analysis of variance, confidence intervals and hypothesis testing. Quantitative reasoning and data analysis. Practical experience with statistical software. Illustrations are taken from a variety of fields. Data-collection/analysis project with emphasis on study designs is part of the coursework requirement

Applied Statistics Concentration Courses

The applied statistics sequence, together with an introductory course, forms the concentration in applied statistics. STAT UN2102 Applied statistical computing may be used to satisfy the computing requirement for the major, and the other concentration courses may be used to satisfy the elective requirements for the major. (Students who sat STAT GU4205 Linear Regression for the major would find that they have covered essentially all of the material in STAT UN2103 Applied Linear Regression Analysis.

STAT UN2102 Applied Statistical Computing. 3.00 points.

Corequisites: An introductory course in statistic (STAT UN1101 is recommended).

Corequisites: An introductory course in statistic (STAT UN1101 is recommended). This course is an introduction to R programming. After learning basic programming component, such as defining variables and vectors, and learning different data structures in R, students will, via project-based assignments, study more advanced topics, such as conditionals, modular programming, and data visualization. Students will also learn the fundamental concepts in computational complexity, and will practice writing reports based on their data analyses

STAT UN2103 APPLIED LINEAR REG ANALYSIS. 3.00 points.

Prerequisites: An introductory course in statistics (STAT UN1101 is recommended). Students without programming experience in R might find STAT UN2102 very helpful. Develops critical thinking and data analysis skills for regression analysis in science and policy settings. Simple and multiple linear regression, non-linear and logistic models, random-effects models. Implementation in a statistical package. Emphasis on real-world examples and on planning, proposing, implementing, and reporting

Prerequisites: STAT UN2103 is strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful. This course covers statistical models and methods for analyzing and drawing inferences for problems involving categorical data. The goals are familiarity and understanding of a substantial and integrated body of statistical methods that are used for such problems, experience in analyzing data using these methods, and proficiency in communicating the results of such methods, and the ability to critically evaluate the use of such methods. Topics include binomial proportions, two-way and three-way contingency tables, logistic regression, log-linear models for large multi-way contingency tables, graphical methods. The statistical package R will be used

STAT UN3105 APPLIED STATISTICAL METHODS. 3.00 points.

Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful.

Prerequisites: At least one, and preferably both, of STAT UN2103 and UN2104 are strongly recommended. Students without programming experience in R might find STAT UN2102 very helpful. This course is intended to give students practical experience with statistical methods beyond linear regression and categorical data analysis. The focus will be on understanding the uses and limitations of models, not the mathematical foundations for the methods. Topics that may be covered include random and mixed-effects models, classical non-parametric techniques, the statistical theory causality, sample survey design, multi-level models, generalized linear regression, generalized estimating equations and over-dispersion, survival analysis including the Kaplan-Meier estimator, log-rank statistics, and the Cox proportional hazards regression model. Power calculations and proposal and report writing will be discussed

Foundation Courses

The calculus-based foundation courses for the core of the statistics major. These courses are GU4203 Probability Theory, GU4204 Statistical Inference, GU4205 Linear Regression, GU4206 Statistical Computing and Introduction to Data Science, and GU4207 Elementary Stochastic processes. Ideally, students would take Probability theory or the equivalent before taking either Statistical Inference or Elementary Stochastic Processes, and would have taken Statistical Inference before, or at least concurrently with taking Linear Regression Analysis, and would have taken Linear Regression analysis before, or at least concurrently, with taking the computing and data science course. A semester of calculus should be taken before Probability, additional semesters of calculus are recommended before Statistical Inference, and a course in linear algebra before Linear Regression is strongly recommended. For the more advanced electives in stochastic processes, Probability Theory is an essential prerequisite, and many students would benefit from taking Elementary Stochastic Processes, too. Linear Regression and the computing and data science course should be taken before the advanced electives in machine learning and data science. Linear Regression is a strongly recommended prerequisite, or at least co-requisite, for the remaining advanced statistical electives.

Advanced Statistics Courses

Advanced statistics courses combine theory with methods and practical experience in data analysis. Undergraduates enrolling in advanced statistics courses would be well-advised to have completed STAT GU4203 (Probability Theory), GU4204 (Statistical Inference), and GU4205 (Linear Regression).

STAT GU4221 TIME SERIES ANALYSIS. 3.00 points.

Prerequisites: STAT GU4205 or the equivalent. Least squares smoothing and prediction, linear systems, Fourier analysis, and spectral estimation. Impulse response and transfer function. Fourier series, the fast Fourier transform, autocorrelation function, and spectral density. Univariate Box-Jenkins modeling and forecasting. Emphasis on applications. Examples from the physical sciences, social sciences, and business. Computing is an integral part of the course

STAT GU4223 MULTIVARIATE STAT INFERENCE. 3.00 points.

Prerequisites: STAT GU4205 or the equivalent.

Prerequisites: STAT GU4205 or the equivalent. Multivariate normal distribution, multivariate regression and classification; canonical correlation; graphical models and Bayesian networks; principal components and other models for factor analysis; SVD; discriminant analysis; cluster analysis

STAT GU4224 BAYESIAN STATISTICS. 3.00 points.

Prerequisites: STAT GU4204 or the equivalent.

This course introduces the Bayesian paradigm for statistical inference.

Topics covered include prior and posterior distributions: conjugate priors, informative and non-informative priors; one- and two-sample problems; models for normal data, models for binary data, Bayesian linear models; Bayesian computation: MCMC algorithms, the Gibbs sampler; hierarchical models; hypothesis testing, Bayes factors, model selection; use of statistical software. Prerequisites: A course in the theory of statistical inference, such as STAT GU4204 a course in statistical modeling and data analysis, such as STAT GU4205

Prerequisites: STAT GU4205 or the equivalent.

Prerequisites: STAT GU4205 or the equivalent. Survival distributions, types of censored data, estimation for various survival models, nonparametric estimation of survival distributions, the proportional hazard and accelerated lifetime models for regression analysis with failure-time data. Extensive use of the computer

STAT GU4232 GENERALIZED LINEAR MODELS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: STAT GU4205 or the equivalent.

Prerequisites: STAT GU4205 or the equivalent. Statistical methods for rates and proportions, ordered and nominal categorical responses, contingency tables, odds-ratios, exact inference, logistic regression, Poisson regression, generalized linear models

STAT GU4233 Multilevel Models. 3 points.

Prerequisites: STAT GU4205 or the equivalent.

Theory and practice, including model-checking, for random and mixed-effects models (also called hierarchical, multi-level models). Extensive use of the computer to analyse data.

STAT GU4234 SAMPLE SURVEYS. 3.00 points.

Prerequisites: STAT GU4204 or the equivalent. Introductory course on the design and analysis of sample surveys. How sample surveys are conducted, why the designs are used, how to analyze survey results, and how to derive from first principles the standard results and their generalizations. Examples from public health, social work, opinion polling, and other topics of interest

STAT GU4241 STATISTICAL MACHINE LEARNING. 3.00 points.

Prerequisites: STAT GU4206.

Prerequisites: STAT GU4206. The course will provide an introduction to Machine Learning and its core models and algorithms. The aim of the course is to provide students of statistics with detailed knowledge of how Machine Learning methods work and how statistical models can be brought to bear in computer systems - not only to analyze large data sets, but to let computers perform tasks that traditional methods of computer science are unable to address. Examples range from speech recognition and text analysis through bioinformatics and medical diagnosis. This course provides a first introduction to the statistical methods and mathematical concepts which make such technologies possible

STAT GU4261 STATISTICAL METHODS IN FINANCE. 3.00 points.

Prerequisites: STAT GU4205 or the equivalent. A fast-paced introduction to statistical methods used in quantitative finance.

Financial applications and statistical methodologies are intertwined in all lectures. Topics include regression analysis and applications to the Capital Asset Pricing Model and multifactor pricing models, principal components and multivariate analysis, smoothing techniques and estimation of yield curves statistical methods for financial time series, value at risk, term structure models and fixed income research, and estimation and modeling of volatilities. Hands-on experience with financial data

STAT GU4291 ADVANCED DATA ANALYSIS. 3.00 points.

Prerequisites: STAT GU4205 and at least one statistics course numbered between GU4221 and GU4261. This is a course on getting the most out of data. The emphasis will be on hands-on experience, involving case studies with real data and using common statistical packages. The course covers, at a very high level, exploratory data analysis, model formulation, goodness of fit testing, and other standard and non-standard statistical procedures, including linear regression, analysis of variance, nonlinear regression, generalized linear models, survival analysis, time series analysis, and modern regression methods. Students will be expected to propose a data set of their choice for use as case study material

Actuarial Sciences Courses

Only students preparing for a career in actuarial sciences should consider the courses in this section. Such students may also be interested in courses offered through the School of Professional Studies M.S. Program in Actuarial Science, but must check with the academic advisors in their schools to know whether they are allowed to register for those courses. Students majoring in statistics and preparing for a career in actuarial science may take STAT GU4282 (Regression and Time Series Analysis) in place of the major requirement STAT GU4205 (Linear Regression Analysis).

STAT GU4282	Linear Regression and Time Series Methods

Advanced Data Science Courses

In response to the ever growing importance of “big data” in scientific and policy endeavors, the last few years have seen an explosive growth in theory, methods, and applications at the interface between computer science and statistics. The Department offers a sequence that begins with the core course STAT GU4206 (Statistical Computing and Introduction to Data Science) and continues with the advanced electives GU4241 (Statistical Machine Learning) and GU4242 (Advanced Machine Learning), and also the advanced elective STAT GU4243 (Applied Data Science). Undergraduate students without experience in programming would likely benefit from taking the statistical computing and data science course before attempting GU4241, GU4242, or GU4243.

The Department of Theatre

The undergraduate theatre major is housed in the Barnard College Department of Theatre, and is offered to all undergraduate Barnard College, Columbia College, and General Studies students (the Columbia major is designated “Drama and Theatre Arts”). The major program engages the disciplines of drama, theatre, and performance studies as a distinctive mode of intellectual and artistic inquiry. While Barnard and Columbia students fulfill the overall graduation requirements at their respective institutions (the Core at Columbia, Foundations at Barnard),

major requirements are the same for all majors, who take foundational coursework in the literary, cultural, and embodied traditions of western and non-Western performance as well as courses in the practices of acting, directing, design, dramaturgy, playwriting, and management and technical theatre. All majors then specialize in a specific area and undertake advanced thesis work, leading either to a formal essay of original research, or to an artistic project (in acting, design, directing, dramaturgy, playwriting, solo performance, or stage and production management) that combines the practices of research and artistic creation. Barnard and Columbia students receive their degrees from their respective colleges of Columbia University.

The Barnard College Department of Theatre mounts a full season of productions in the Minor Latham Playhouse and the Glicker-Milstein Theatre, a crucible of investigation that is a credit-bearing element of the curriculum, and open to all undergraduate students for audition. A collaboration between students and professional theatre artists, the Department of Theatre productions are both a learning process and a scene of encounter, where perceptions are shaped for the attention and creative reflection of a larger public.

Students interested in majoring in Theatre should consider taking three or four of the required classes in their first two years of study: the Critical Histories of Drama, Theatre, and Performance lectures (1 and 2), another lecture or seminar course in the field of drama, theatre, and performance "studies," and/or a theatre praxis "studio" course.

Barnard students may declare the major at any time; Columbia students have a major-selection period in the second year, but all students must declare the major by the spring semester of the sophomore year. The major requirements are spelled out below, and the process for choosing a thesis area as well: all Theatre/Drama and Theatre Arts majors complete a thesis as a capstone to their work in the degree. For more information about the major, please contact the Department of Theatre Chair, or a member of the Theatre Department Faculty (see Faculty pages).

All majors must submit the online Theatre Major Declaration Form, available on the Department of Theatre website (theatre.barnard.edu); Barnard majors must also submit the Barnard Major Declaration Form via Slate. Prior to declaring the major, students should make an appointment with the Department Chair. All majors should introduce themselves to the Theatre Administrator in 507 Milbank Hall; she will add names to the departmental listserv, and help students to keep up to date in important information about studying in the Department.

Student Learning Objectives

Upon completion of the major, successful students will be able to attain the following objectives:

- Critically assess the artistic ambitions and theoretical involved in the interpretation of historical and contemporary drama and theatrical performance,
- Create with proficiency in at least one area of creative work in the field: critical/research writing, acting, design, directing, dramaturgy, playwriting, solo performance, stage and production management

Areas of Concentration

Drama and Theatre Studies Student Learning Objectives

Students successfully completing drama studies, theatre studies, and performance studies coursework, or pursuing a Senior Thesis in Research, should be able to attain the following objectives:

1. Write clearly about dramatic literature, and about performance, including where applicable film performance;
2. Synthesize and evaluate contemporary criticism and research scholarship in writing;
3. Know specific authors, movements, periods, styles, and ideological structures in the history of drama, theatre, and performance (i.e., Shakespeare, American drama, Performative Cultures of the Third Reich, Black Theatre);
4. Use critical, theoretical, and historical concepts in the analysis of drama and performance.

Acting Student Learning Objectives

Students successfully completing coursework in acting or pursuing a Senior Thesis in Performance: Acting should be able to attain the following objectives:

1. Analyze dramatic texts and apply the analysis to developing a performable role/character;
2. Synthesize external elements with external elements (social mores, environment, historical context, status relationship to others) and internal elements (center of gravity, personal rhythm, speed, tempo) toward the expression of a character's physicality and emotionality;
3. Recognize and apply the fundamental concepts of character development: objectives, obstacles, actions, given circumstances;
4. Develop vocal, physical and emotional awareness and imagination, and to explore techniques available to aid the actor in applying these elements in a conscious way during rehearsal and performance.

Design Student Learning Objectives

Students successfully completing coursework design or pursuing a Senior Thesis in Performance: Design should be able to attain the following objectives:

1. Analyze dramatic texts and translate that analysis into documents used in the production process (breakdowns, plots, etc.);
2. Collect images and texts that provide insight into the developing design idea, and accurately communicate historical and stylistic choices;
3. Demonstrate fluency with the craft of a design field – e.g. sketching, model making, drafting, sound and lighting plots, and associated software;
4. Perform collaboratively, adapting and informing their designs with ideas generated through conversation with colleagues, classmates, and advisors.

Directing Student Learning Objectives

Students successfully completing coursework in directing or pursuing a Senior Thesis in Performance: Directing should be able to attain the following objectives:

1. Recognize the different demands of different configurations of stage space;
2. Apply compositional tools;
3. Define production style and its influence on performance choices;

4. Communicate effectively with actors;
5. Analyze the historical, social, and aesthetic elements of a dramatic text as the basis for a directorial conception.

Dramaturgy Student Learning Objectives

Students successfully completing coursework dramaturgy or pursuing a Senior Thesis in Performance: Dramaturgy should be able to attain the following objectives:

1. Apply important critical and theoretical concepts to the analysis of dramatic writing and theatrical performance;

Requirements for the Minor

The Minor in Theatre (currently available only to Barnard students; Columbia College and General Studies may approve minors soon) provides the opportunity to engage in the range of opportunities offered by the Theatre department: students who minor in Theatre take a mix of lecture and seminar courses in drama, theatre, and

performance studies, as well as courses in a selected area or selected areas of performance practice (acting, design, directing, dramaturgy, stage and production management, playwriting), as well as fulfilling one backstage crew requirement. Please note:

Only courses that would fulfil the major requirements can be used to fulfill minor requirements.

The minor can be "declared" only in the semester that all requirements for the minor will be completed, typically in the first or second semester of the senior year.

The minor in Theatre consists of seven (7) courses; only courses that fulfill major requirements may be taken to fulfill minor requirements. Students minoring in Theatre may take one (1) relevant course from another department as part of the "elective" series, as approved by the minor advisor or the department chair.

Seven courses, to include three 3- or 4-credit lecture/seminar courses, three 3-credit studio courses, and one (1-3 credit variable) crew assignment, as follows:

- One (1) Theatre lecture course (THTR UN3149 PERFORMANCE IN/OF SOUTH # SOUTHEAST ASIA, THTR UN3150 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 1, THTR UN3151 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 2, THTR UN3154 THEATRE TRAD GLOBAL CONTEXT)
- One (1) additional lecture course from the list above or seminar course offered at the 3000 level in the Theatre department
- One (1) course offered in the Theatre department in any of the following fields: acting, design, directing, dramaturgy, playwriting.
- Four (4) additional courses as follows:
 - One (1) 3000 level lecture/seminar course in drama, theatre, and performance studies offered in the Theatre department
 - Two (2) studio courses, chosen from acting, design, directing, dramaturgy, or playwriting.
 - One (1) Theatre production crew assignment, which is constituted as a course.

One (1) relevant course from another department may be included with prior approval of the department chair, including ENTA courses offered through Columbia English, or relevant courses offered in other departments.

No more than three (3) courses may be in a single format: three (3) lecture or seminar and three (3) studio courses. All three studio courses may be in a single discipline (for example, three courses in acting; two design courses and one approved course in figure drawing; three playwriting courses, including one approved course taken in Barnard English).

THTR UN2005 Acting Workshop. 3 points.

When offered in Fall semester, open only to first-year students. **Not offered during 2023-2024 academic year.**

THTR UN3008 PERFORMING GREEK TRAGEDY ON THE MODERN STAGE. 3.00 points.

This course aims to explore performing Greek tragedy on the modern stage. It will include an introduction to original performance practices in ancient Greece (space, masking, choral performance, costume, acting techniques) and an examination of how artists from different contemporary theatrical traditions have adapted ancient texts in modern performances and new versions of the plays. The bulk of the course will be focused on the problems of acting, interpreting, and reinterpreting parts of three plays on the stage, Sophocles' *Antigone*, Euripides' *Medea*, and Sophocles' *Ajax* along with a new version by Ellen McLaughlin, who teaches playwriting at Barnard, *Ajax in Iraq*. Students will view all or parts of particularly interesting recent productions from various theatrical traditions, which will help them to tackle challenging issues such as choral performance and choral rhythms, masking, character work, dialogues and presenting formal political debates. For contemporary actors training in Greek tragedy offers a unique opportunity to improve their performance on stage through ensemble work and representing character through speech. It enhances dramaturgical capacities that a contemporary theater practitioner must exercise in exploring theory in practice and vice versa. This class is directed to students particularly interested in dramaturgy, directing, designing, translation, and Greek tragedy as well as acting

THTR UN3141 Socialism/Communism in Performance. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: Sophomore standing. Enrollment limited to 16 students.

Analyzes dramatic texts and performances under the Communist regimes behind the Iron Curtain before 1989. Principal focus is on Czech, Polish, and East German playwrights and their productions; we will consider their work in both legal and illegal contexts. In order to gain a wider understanding of the diversity of underground performative cultures, works from Hungary, Romania, and Slovenia will be considered as well. The seminar also attends to dissident performative activities in the framework of the 1980s revolutions, and reflects on works by western authors and emigrant/diasporic writers produced on stages behind the Iron Curtain. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

THTR UN3142 Bertolt Brecht: The Making of Theatre. 4 points.

Prerequisites: Enrollment limited to 16; permission of instructor given at first class meeting. Course is conducted in English and readings are in English; German majors and German-speaking students may do readings and papers in German.

This class provides a comprehensive overview of the drama, theatre, and theory of Bertolt Brecht, the most influential European playwright and theorist of the twentieth century, in the context of their original historical contexts and subsequent legacies. Fulfills one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

THTR UN3144 Ecologies of Transmedia Performance. 4.00 points.

Exploring transmedia performance as both a medial interaction in the physical space of theatre and a multiplatform environment expanding and extending beyond it, Ecologies of Transmedia Performance engages the NYPL for the Performing Arts archive to create an environmentally and socially self-aware, virtual transmedia performance/experience. To strengthen academic and digital competencies, the course consists of a seminar (meets on Tuesday) and a lab (meets on Wednesday), integrating several activities: experiencing and studying transmedia performances; conceptualizing transmediality; conducting archival research into transmedia theatre; and designing a transmedia performance (the digital tools we will work with include Google Sites, Google Scripts, and Google Cloud AI). Course enrollment is limited to 12; permission of instructor given after first class meeting. Fulfills one of the two required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major

THTR UN3145 AFRICAN AMERICAN WOMEN PLAYWRIGHTS. 4.00 points.

African American women have been writing plays at least since the Harlem Renaissance and the American Little Theatre Movement (1910s-1920s). Initially many of their plays portrayed the plight of poor Black women either in the American South or in New York City's Harlem, in each case showing a struggle for dignity in the midst of an unfair, dismissive, racist situation in which lynchings of Black men were a common enough occurrence and citizen rights were doubly denied these (generally educated) writers—both as Blacks and as women. Even plays depicting middle-class Black families or working women showed how just holding one's head up and keeping food on the table (much less seeking fulfillment or advancement) was exhausting and often demeaning. Plays written with Black audiences in mind often sought to provide "uplift" and encouragement. Those anticipating white or mixed audiences frequently wanted to show Blacks as equal to whites in intellect, cleanliness, childrearing, honor, patriotism, and citizenship. Over the course of a century, Black playwrights have addressed racism, African American history, urban blight, a changing workplace, and Black American womanhood in a variety of styles ranging from so-called kitchen sink realism to comedy, fantasy, and abstraction. The readings in the course do not exhaust the possibilities for study but they will get you attuned to a rich trove of varied, important writing. In this seminar, students will read and discuss several plays/meetings, make both formal and informal class presentations, and write a final essay. Course fulfills lecture/seminar in drama studies, theatre studies, performance studies requirement for Theatre major

THTR UN3146 American Drama in the 1990s. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 16.

Examines American drama in the period between the fall of the Berlin Wall in 1989 and the attack on the World Trade Center in New York in 2001, considering a range of aesthetic (epic theatre, performance art), social (AIDS), and political (Reaganomics) issues of the period. Fulfills one (of two) required courses dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major.

THTR UN3149 PERFORMANCE IN/OF SOUTH # SOUTHEAST ASIA. 3.00 points.

This course actively interrogates the region of Southeast Asia as it is mobilized in performance. It will investigate performance as a theoretical lens, artistic medium, and everyday practice across Southeast Asia. Research and writing will draw upon theatre, dance, performance art, and ritual, focusing on the construction of national and personal identity through performance. The course examines themes of gender, sexuality, imperialism, and globalization. Through discussion, viewing, and weekly writing assignments, students hone their critical thinking skills and learn to formulate research questions and arguments that will culminate in one critical essay and two in-class exams. Course may fill either the Global Theatre requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both

THTR UN3150 CRITICAL HISTORIES OF DRAMA, THEATRE, AND PERFORMANCE 1. 3.00 points.

Dialectical approach to reading and thinking about the history of dramatic theatre in the west, interrogating the ways poetry inflects, and is inflected by, the material dynamics of performance. Course undertakes careful study of the practices of performance, and of the sociocultural, economic, political, and aesthetic conditions animating representative plays of the Western tradition from the classical theatre through the early modern period to early romanticism; course will also emphasize development of important critical concepts for the analysis of drama, theatre, and performance. Specific attention will be given to classical Athens, medieval cycle drama, the professional theatre of early modern England, the rival theatres of seventeenth century France and Spain, and eighteenth-century theatre in England and Germany; topics include the sociology of theatre, the impact of print on conceptions of performance, representing gender and race, and the dynamics of court performance. Writing: 2-3 papers; Reading: 1-2 plays, critical and historical reading per week; final examination. Fulfills one (of two) Theatre History requirements for Theatre/Drama and Theatre Arts majors.

THTR UN3157 POSTCOLONIAL DRAMA:THE CANON # ITS OTHER. 4.00 points.

This class is a close reading of postcolonial plays, both as they form a recognizable canon, and as counters to it. Through a grounding in postcolonial theory, students will explore how the colonial encounter leaves a lasting impact on language and performance. How do these playwrights tackle questions of authenticity, influence, inspiration and agency? What stories do they adapt, translate or reimagine? Also, we read in equal measure male and female playwrights, attending to the ways in which power and authority are negotiated by them. This class looks both at plays that are seminal to postcolonial writing and also newer ones that unsettle the position of the greats. Do we then understand postcolonialism as a historically bound literary trend or an ongoing process of exploration? Fundamentally we ask, in our efforts to decolonize the theatre, how do we find new ways or reading? Course fulfills lecture/seminar in drama studies, theatre studies, performance studies requirement for Theatre major

THTR UN3160 Queer Performance. 4 points.

This course surveys key theoretical and historical writings in the field of Queer Performance, both within and without Theatre and Performance Studies, as well as significant dramatic and performance works in the field. Beginning with an introduction to queer theory and questions surrounding gender and sexuality in performance, the course then moves into contemporary theories to examine works that use embodiment to question constructions of gender and sexuality onstage. Performances are regarded as provocations: what constitutes queer performance? Is sexuality all we mean by queer? What are the historical, aesthetic, and political aspects of queer performance? We will also pursue questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funding? Is queer performance inherently or even necessarily radical? The course explores crosscultural performances, as well as performances spanning from theatrical stages to ritual to everyday performance. Course may fill either the Theory requirement, or one (of two) required courses in dramatic literature/theatre studies/performance studies for Theatre/Drama and Theatre Arts major, but not both.

THTR UN3165 THEORIES OF PERFORMANCE STUDIES. 4.00 points.

ENTA GU4625 SHAKESPEARE PERFORMANCE STUDIES. 4.00 points.

This course will work across three general approaches to Shakespearean drama and performance. First, we'll consider the historical forms of performance that have used Shakespearean drama as the material for theatrical endeavor. Second, we'll consider theoretical paradigms for performance that resituate an understanding that privileges either the "theatrical" or the "literary" identity of Shakespeare's plays. And, finally, we'll consider how we might consider the plays as themselves theoretical instruments for thinking about performance. Throughout the semester we will consider stage, film, and online productions, and the ways they articulate a sense of both "Shakespeare" and "performance." This course is a seminar, and while there is no formal prerequisite, students who have had a previous Shakespeare course will find the reading more manageable: we will rarely be doing the kind of "overview" of a play, but will be incisively considering specific elements of performance. Application Instructions: E-mail the instructor wworthen@barnard.edu with the title of the course in the subject line. In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list, from which the instructor will admit them as spaces become available

Urban Studies

713 Milstein Learning Center
212-854-4073

Department Assistant: Valerie Coates

Mission

The Barnard–Columbia Urban Studies program enables students to explore and understand the urban experience in all of its richness and complexity. It recognizes the city as an amalgam of diverse peoples and their social, political, economic, and cultural interactions within a distinctive built environment. Students study the evolution and variety of urban forms and governance structures, which create opportunities for, as well as constrain, the exercise of human agency, individual and collective. They explore the place of the city in different historical and comparative contexts, as well as in the human imagination.

Majors build an intellectual foundation that combines interdisciplinary coursework and a concentration of study within a single field. Through the two-semester junior colloquium, students study urban history and contemporary issues, and at the same time hone their interdisciplinary, analytical and research skills. This shared experience prepares them for their independent research project in their senior year. We encourage our majors to use New York City as a laboratory, and many courses draw on the vast resources of the city and include an off-campus experience.

Student Learning Outcomes

Having successfully completed the major in Urban Studies, the student will be able to:

- Apply concepts or methods from more than one social science or adjacent discipline to analyze an urban issue or problem.
- Describe the distinctive social, cultural, and spatial features of cities and illustrate their impacts on the urban experience.
- Apply basic skills of empirical reasoning to an urban problem.
- Explain how the idea of the city varies in different historical and comparative contexts.
- Demonstrate familiarity with a particular disciplinary approach to the city as an object of study.
- Demonstrate understanding of the history and variety of urban forms and governance structures.
- Articulate a well-defined research question, conduct independent research using primary sources and a variety of theoretical and methodological approaches, and write a substantive research paper.
- Communicate ideas effectively in written or oral form.
- Organize and present group research projects.

Major in Urban Studies

A minimum of 42 credits is required to complete the Urban Studies major. The major in Urban Studies is comprised of seven curricular requirements:

Requirement U: Introduction to Urban Studies (1 course)

URBS UN1515 INTRODUCTION TO URBAN STUDIES

Requirement A: Urban-Related Social Sciences (3 courses)

One course dealing primarily with urban subject matter from *each of three* of the following disciplines: Anthropology, Economics, History, Political Science, Sociology. For students declaring a major in Urban Studies after Spring 2018, one of the three courses *must* be History.

Each course should be chosen from the following disciplines: Anthropology, Economics, History, Political Science, Public Health, Sociology, or Urban Studies and be focused on urban issues. The three courses must be selected from three separate disciplines and

they must appear on the Urban Studies approved list to fulfill the 'A' requirement for the major (if a course does not appear on the list that you believe should, please contact the Associate Director). Each course should also be taken with a different professor (i.e. you may not use two courses with the same professor to fulfill two of your A requirements). We recommend that you complete at least two of your three 'A' courses before taking the Junior Seminar, but this is not a hard requirement.

Requirement B: Urban-Related Non-Social Science (1 course)

One course dealing primarily with urban subject matter from a discipline not listed above (such as Architecture, Art History, English, Environmental Science, etc.)

Requirement C: Methods of Analysis (1 course)

One course in methods of analysis, such as URBS UN2200 INTRODUCTION TO GIS METHODS. Methods courses in related disciplines will also be considered for the requirement. Please consult the [program website](#) or the Associate Director

Requirement D: Specialization (5 courses)

Five or more courses in a specialization from one of the participating departments. Barnard College students can double-count one A, B, or C course toward this requirement (only one of five), with the approval of the Director; Columbia College and General Studies students cannot double-count courses. Barnard majors also have specific requirements for each specialization, which are outlined in detail on the program website, urban.barnard.edu.

Requirement E: Junior Seminar (1 course)

We recommend that you complete at least two of your three 'A' courses before taking the Junior Seminar, but this is not a hard requirement.

URBS UN3545 JUNIOR SEMINAR IN URBAN STUDIES Multiple sections of this course are taught each semester by various faculty on different topics. For more information, please consult the [program website](#) or the Associate Director.

Requirement F: Senior Seminar (2 courses)

An original senior thesis written in conjunction with a two-semester research seminar on a topic of your choice. Please consult with your Urban Studies advisor and choose from among:

URBS UN3992 URBAN STUDIES SENIOR SEMINAR URBS UN3993 URBAN STUDIES SENIOR SEMINAR

URBS UN3994 SR SEM: NEW YORK FIELD RSRCH URBS UN3995 Senior Seminar: New York Field Research

Students who, for some reason, will not be able to complete the Fall-Spring Senior Seminar sequence should consult with the Associate Director about alternatives.

A complete list and courses that fulfill requirements A–E can be found on the program's website, urban.barnard.edu.

Appropriate substitutions may be made for courses listed above with the approval of the Associate Director.

There is no minor in Urban Studies.

There is no concentration in Urban Studies.

URBS UN1515 INTRODUCTION TO URBAN STUDIES. 3.00 points.

This course is intended to be both an interdisciplinary introduction to the city and to the field of Urban Studies. As an introduction to the city, the course will address a variety of questions: What is a city? How did cities develop? How do cities function socially, politically, and economically? Why do people live in cities? What are some of the major issues facing cities in the early twenty-first century, and how can cities address these issues? As an introduction to the interdisciplinary field of Urban Studies, the course will present models of how scholars approach cities from a variety of disciplinary viewpoints, including architecture, planning, law, sociology, history, archaeology, anthropology, political science, public policy, and geography. Students will learn some of the major concepts in the field of Urban Studies, and will study the works of leading scholars in the field. Students in the course will approach cities from a number of disciplines, not only through the reading, but also through assignments that take place in different locations throughout New York City

URBS UN3308 INTRO TO URBAN ETHNOGRAPHIES. 3.00 points.

Prerequisites: Students must attend first class.

What is ethnography and what makes ethnography "urban"? This course explores how social scientists use ethnography to analyze questions and dilemmas often associated with urban settings. We will combine close readings of ethnographies with field-based inquiry, including our own studies of urban public space. Through both our readings and our field exercises, we will focus on the methods at the heart of ethnography: observation and participant-observation. As we read other scholars' work, we will ask how the author uses ethnographic tools to explore issues that are suitable for intensive fieldwork. We will assess which kinds of research problems and theoretical perspectives are a good fit with ethnography and the roles that ethnography can play in transdisciplinary research projects. You will apply what you have learned about research to design your own pilot fieldwork. The ethnographies that we read together will examine intersections of housing, race, and class in urban communities. You are welcome to extend this focus to your own fieldwork, but it's not required to do so. This is a writing-intensive course, and we will devote a considerable portion of class time to workshop your individual projects

URBS UN3310 RACE. SPACE, URB SCHOOLS. 3.00 points.

Many people don't think of themselves as having attended segregated schools. And yet, most of us went to schools attended primarily by people who looked very much like us. In fact, schools have become more segregated over the past 30 years, even as the country becomes increasingly multiracial. In this class, we will use public schools as an example to examine the role race plays in shaping urban spaces and institutions. We will begin by unpacking the concept of racialization, or the process by which a person, place, phenomenon, or characteristic becomes associated with a certain race. Then, we will explore the following questions: What are the connections between city schools and their local contexts? What does it mean to be a "neighborhood school"? How do changes in neighborhoods change schools? We will use ethnographies, narrative non-fiction, and educational research to explore these questions from a variety of perspectives. You will apply what you have learned to your own experiences and to current debates over urban policies and public schools. This course will extend your understanding of key anthropological and sociological perspectives on urban inequality in the United States, as well as introduce you to critical theory

URBS UN3315 METROPOLITICS OF RACE # PLACE. 3.00 points.

Prerequisites: Students must attend first class.

This class explores how racism and racialized capitalism and politics shape the distribution of material resources among cities and suburbs in metropolitan areas and the racial and ethnic groups residing in them. Readings and discussion focus on the history of metropolitan area expansion and economic development, as well as contemporary social processes shaping racial and ethnic groups' access to high-quality public goods and private amenities. We address racial and ethnic groups' evolving political agendas in today's increasingly market-driven socio-political context, noting the roles of residents; federal, state, and local governments; market institutions and actors; urban planners, activist organizations, foundations, and social scientists, among others. Here is a sample of specific topics: race/ethnicity and who "belongs" in what "place;" inequitable government and market investment across racial and ethnic communities over time and "sedimentation effects" (for example, the "redlining" of Black communities leading to their inability to access loan and credit markets and the resulting wealth gap between Blacks and Whites); gentrification processes; creating sufficient, sustainable tax bases; and suburban sprawl. Assignments will include two short response papers, mid-term and final exams, and another project to be determined

URBS UN3351 URBAN ELSEWHERE: EXPLORING A WORLD OF CITIES. 4.00 points.

We live in an increasingly urbanized world. But what does it mean to be "urban"? As urbanization reaches more corners of the globe, its forms and processes become increasingly diverse. Urban Elsewheres is dedicated to investigating this diversity and to exploring the implications that unfamiliar urban phenomena might have for how we understand urbanization—both elsewhere in the world and in our own backyards. Through a comparative engagement with case studies drawn from around the world, this course will challenge some of our most deeply held, common sense assumptions about urbanization. Students will be asked to stretch the conceptual limits of urbanization and explore the social and political possibilities of an expanded urbanism. In doing so, the course will engage with the many of the most heated theoretical debates about urbanization, equipping students with a set of comparative analytical tools with which to explore the wider field of urban studies

URBS UN3353 Urban Ethnography of/in the Middle East. 3.00 points.

Course description: The contemporary Middle East is home to a remarkable diversity of urban landscapes. Cities in this region have been profoundly shaped by both historical forces, such as colonialism and nationalist movements, as well as contemporary ones, such as globalization, migration, and neoliberal restructuring. This course is therefore grounded in an understanding of Middle Eastern cities as both historical formations and dynamic social processes, and it uses an ethnographic lens to introduce students to these urban dynamics. Drawing on written and visual material from anthropology, history, geography, and architecture, students in this class will investigate how these social, political, and economic forces have made—and continue to remake—cities in the Middle East

URBS UN3420 INTRODUCTION URBAN SOCIOLOGY. 3.00 points.

Prerequisites: Students must attend first class.

Prerequisites: Students must attend first class. Examines the diverse ways in which sociology has defined and studied cities, focusing on the people who live and work in the city, and the transformations U.S. cities are undergoing today. Sociological methods, including ethnography, survey research, quantitative studies, and participant observation will provide perspectives on key urban questions such as street life, race, immigration, globalization, conflict, and redevelopment

URBS UN3440 SHRINKING CITIES. 3.00 points.

While some cities thrive and struggle to house the global majority, others struggle with the effects of urban shrinkage—population loss, disinvestment and abandonment. The path to urban decline is paved by social, economic and spatial forces that result in shrinking cities. This class explores how to understand and engage with urban decline. It includes a consideration of sundry efforts to reverse, live with, and rethink urban decline in a variety of locales. The hope is that this exercise will shed light not only on iconic declining places like Detroit, but also on the nature of uneven development and how it is the rule rather than the anomalous exception within capitalist urbanization. Course materials draw on disciplines such as planning, economics, architecture, history and sociology to help understand urban decline and its outcomes from a variety of perspectives. Over the course of the semester, we will investigate larger processes—globalization, deindustrialization and socioeconomic change—to understand how cities and communities responded to the consequences of these forces. We will engage with the global literature on shrinking cities but will be focused primarily on exploring the dynamics of shrinkage in US cities. To that end, following a wide-reaching examination of nation-wide phenomena, we will study in-depth a sample of cities to understand local and regional variations and responses. How do we treat cities that do not grow? Given the constrained or complete lack of resources in these places, to what extent should some cities be allowed to "die"? What is the impact on the residents that remain in these places?

URBS UN3450 NEIGHBORHOOD # COMMUNITY DVLP. 3.00 points.

New York City is made up of more than 400 neighborhoods. The concept of neighborhoods in cities has had many meanings and understandings over time. Equally complex is the concept of community used to describe the people attached to or defined by neighborhood. While neighborhood can be interpreted as a spatial, social, political, racial, ethnic, or even, economic unit; community often refers to the group of stakeholders (i.e. residents, workers, investors) whose interests directly align with the conditions of their environment. Community development is “a process where these community members come together to take collective action and generate solutions to common problems” that result from the changing contexts in their neighborhoods. Using a variety of theories and approaches, residents organize themselves or work with community development practitioners on the ground to obtain safe, affordable housing, improve the public realm, build wealth, get heard politically, develop human capital, and connect to metropolitan labor and housing markets. To address the ever-changing contexts of neighborhoods, community development organizations are taking on new roles and adapting (in various cases) to larger forces within the city, region and nation such as disinvestment, reinvestment, increased cultural diversity, an uncertain macroeconomic environment, and changes in federal policy. For more than a century, city-dwellers—and especially New Yorkers—have been tackling these challenges. This course will examine both historic and contemporary community building and development efforts, paying special attention to approaches which were shaped by New York City. This urban center, often described as a “city of neighborhoods,” has long been a seedbed for community-based problem-solving inventions. The course will focus on the theories (why?), tools (how?), and actors (who?) within the field of community development practice and is organized around important sectors (housing, econom

URBS UN3451 URBAN ENVIRONMENTAL JUSTICE: GENDER, RACE, CLASS AND THE ENVIRONMENT. 3.00 points.

In this course we will explore urban environmental inequalities through the lens of environmental justice. The concept of environmental justice has risen in prominence in the language of environmental activism, politics, and policymaking. Informed by critical studies of the environment, we will address the broad question of why, for some, the environment is representational of a healthy lifestyle and source of prosperity, while for others it is a source of risk and harm. Our course of study invites students to critically analyze environmental justice case studies and to develop an understanding of the complex relationships among urban populations and the social, political, and economic processes that lead to environmental inequality. We will also explore how racism is foundational to environmental exploitation and consider why global struggles for racial justice are crucial for protecting both people and the earth. We will pay particular attention to how environmental health inequalities are linked to race, class, gender, and nation. Drawing from academic texts, films, and photo essays we will explore how urban planning and economic development policies create environmental inequalities in the US and globally

URBS UN3480 From Homelessness to Foreclosure: NYC Geographies of Shelter and Home. 4 points.

This course will examine the social, political, and economic elements that have aligned in New York City to produce the most expansive infrastructure of homeless shelters in the United States, as well as ongoing changes in the city's homeless policy since the housing foreclosure crisis. While we will focus primarily on the past 30 to 40 years in New York City, we will consider the history of homelessness and housing in the United States since the Great Depression. Major themes will include criminalization, origin myths, and representations of people who are experiencing homelessness. Key questions will include: In what ways is the current geography of homelessness the result of historical patterns of racism and discrimination? How does studying homelessness provide insight into the ways urban spaces are made? Why have shelters become the primary public response to homelessness in New York? How are race and gender central to the project of building a shelter infrastructure in New York? How are shelters experienced by those living in them? What are some of the ways people living in shelters organize to advocate for their rights and to resist mainstream representations?

Cross-listed Courses**ARCH UN3502 URBANIZING CHINA. 4 points.**

This course investigates the dramatic urban transformation that has taken place in mainland China over the last four decades. The speed and scale of this transformation have produced emergent new lifeways, settlement patterns, and land uses that increasingly blur the distinction between urban and rural areas. At the same time, Chinese society is still characterized by rigid, administrative divisions between the nation's urban and rural sectors, with profound consequences for people's lives and livelihoods. The course therefore examines the intersection between the rapid transformation of China's built environment and the glacial transformation of its administrative categories. We will take an interdisciplinary approach to this investigation, using perspectives from architecture, history, geography, political science, anthropology, urban planning, and cultural studies, among other disciplines.

The course is divided into two parts: Over the first five weeks, we will consider the historical context of China's urbanization and its urban-rural relations, including the imperial, colonial, and socialist periods, as well as the current period of reform. In the remainder of the semester, we will turn our focus to contemporary processes of urbanization, with a particular emphasis on the complex interrelationship between urban and rural China. This portion of the semester is organized into three two-week units on land and planning, housing and demolition, and citizenship and personhood.

ARCH GU4300 The Just City: Global Debates in Urban Planning and Policy. 4.00 points.

Urbanization is inherently unequal, inscribing social, economic, environmental, and political unevenness into the spatial fabric of the city. But the distribution of such inequality is not inevitable. Urbanization is a product of the collective decisions we make (or choose not to make) in response to the shared challenges we face in our cities. And, thus, the patterns of urbanization can be changed. This is the task of urban planning and the starting point for this advanced seminar, which asks how we can reshape our cities to be more just—to alleviate inequality rather than compound it. In embarking on this effort, we face numerous “wicked” problems without clear-cut solutions. The approaches one takes in addressing urban inequality are therefore fundamentally normative—they are shaped by one's place in the world and one's view of it. The central challenge in addressing inequality is thus establishing a basis for collective action amongst diverse actors with differing—and sometimes conflicting—values and views. In other words, planning the just city a matter of both empathy and debate. In this course, we will endeavor to develop informed positions that can help us engage with others as a basis for taking collective action. The course is organized into four 3-week modules, each of which addresses a dimension of the just city: equity, democracy, diversity, and sustainability. In the first week of each module, we will discuss how the issue has been understood in history and theory (with an emphasis on tradeoffs between different priorities and values); in the second week, we will apply this discussion to a global case study prepared and presented by a team of students; and in the third week, we will hold an in-class debate to determine what should be done. Specific case studies vary each year

HIST UN1786 History of the City in Latin America. 4.00 points.

This course covers the historical development of cities in Latin America. Readings, lectures, and discussion sections will examine the concentration of people in commercial and political centers from the beginnings of European colonization in the fifteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; changing power dynamics in modern Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; planned versus unplanned cities and the rise of informal economies; the way changing legal and political rights regimes have affected urban life; and the constant tension between tradition and progress through which urban society was formed. There are no prerequisites for this course. Attendance at weekly Discussion Sections required

HIST UN2689 COLONIAL CITIES OF THE AMERICAS. 4.00 points.

This course examines the history of cities in the Americas in the colonial era, c. 1500-1800, organized around three large themes. First, we study the precolonial origins of American urban systems, focusing especially on Mesoamerica and the Andes, and exploring questions of urban continuity, disruption and change, and the forms of indigenous cities. Second, we study various patterns of city foundations and city types across the Americas, examining Spanish, Portuguese, British, Dutch and French colonial urban systems. Third, we focus on the cities more closely by looking at key issues such as urban form, built environment, social structure. Specific themes include a critical analysis of the Spanish colonial grid, the baroque city, and 18th-century urban reforms, as well as race and class, urban slavery, and urban disease environments.

HIST UN3277 History of Urban Crime and Policing in Latin America in Global Perspective. 4 points.

This seminar will examine the social construction of criminality and the institutions that developed to impose and enforce the criminal law as reflections of Latin American society throughout the region's history, with a particular emphasis on the rise of police forces as the principal means of day-to-day urban governance. Topics include policing and urban slavery; policing the urban "underworld"; the changing cultural importance of police in urban popular culture; the growth of scientific policing methods, along with modern criminology and eugenics; policing and the enforcement of gender norms in urban public spaces; the role of urban policing in the rise of military governments in the twentieth century; organized crime; transitional justice and the contemporary question of the rule of law; and the transnational movement of ideas about and innovations in policing practice. In our readings and class discussions over the course of the semester, we will trace how professionalized, modern police forces took shape in cities across the region over time. This course actually begins, however, in the colonial period before there was anything that we would recognize as a modern, uniformed, state-run police force. We will thus have a broad perspective from which to analyze critically the role of police in the development of Latin American urban societies—in other words, to see the police in the contemporary era as contingent on complex historical processes, which we will seek to understand.

HIST GU4012 HISTORY OF THE CITY IN LATIN AMERICA. 4.00 points.

This course covers the historical development of cities in Latin America. Readings examine the concentration of people in commercial and political centers from the beginnings of European colonization in the sixteenth century to the present day and will introduce contrasting approaches to the study of urban culture, politics, society, and the built environment. Central themes include the reciprocal relationships between growing urban areas and the countryside; cities as sites of imperial power and their post-colonial role in nation-building; changing power dynamics in modern Latin America, especially as they impacted the lives of cities' nonelite majority populations; the legalities and politics of urban space; the complexity and historical development of urban segregation; the rise of informal economies; and the constant tension between tradition and progress through which urban societies have formed. Reading knowledge of Spanish and/or Portuguese will be helpful but is not required. Open to both undergraduate and graduate students; graduate students will be given additional reading and writing assignments

Mission

Women's, Gender and Sexuality Studies is an interdisciplinary department for students who wish to explore gender and its relation to other axes of power: race, class, ethnicity, and sexuality. We use these concepts to analyze human experience in its bodily, political, economic and cultural dimensions. Women's, Gender and Sexuality Studies covers a complex variety of theoretical and empirical scholarship both within traditional disciplines and in interdisciplinary frames in the humanities, in the social sciences and in the natural sciences as well as combinations of the three. The Department is committed to critical perspectives and bodies of knowledge that contribute to possibilities for transformation and change.

Early in their sophomore year, students interested in the major should consult the Department to plan their major. Students also have the option of electing a combined major and a minor. Areas of faculty research specialization include feminist and queer politics and ethics in U.S. public life; contemporary and historical social movements; gender and global political economy; sexuality and the state; sociology of the body, sex and gender; critical science studies of gender and sexuality; transnational feminisms; Asia-Pacific cultural studies; comparative literature and critical theory.

Complementing the Women's, Gender and Sexuality Studies

Department, the Barnard Center for Research on Women maintains an

extensive and expanding resource collection on women’s issues. Many of these resources, including BCRW’s own online journal, The Scholar & Feminist Online, are available on BCRW’s multi-media website. BCRW also sponsors a variety of events that are invaluable to students interested in Women’s, Gender and Sexuality Studies.

Women’s, Gender and Sexuality Studies participates in a Consortium with Africana Studies and American Studies that supports the development of intellectual and curricular projects across the three fields and offers a concentration and minor in studies of race and ethnicity, with an attention to global and diasporic frameworks. We are particularly interested in relations between and among, gender, sexuality, race, ethnicity and nation. The Consortium is working to create models for research and teaching that contribute to new ways of understanding processes of social differentiation and that help to create new possibilities for social relations.

Student Learning Outcomes

Upon successful completion of the Major, students will be able to attain the following outcomes:

- Identify and denaturalize core assumptions that are attached to present-day systems of gender, race and sexuality;
- Understand the variability and complexity of social identities in multiple historical, social and cultural contexts;
- Demonstrate through oral and written presentations their understanding of gender, sexuality and race as mutually constituted and relatively autonomous categories of social difference;
- Develop an awareness of a broad range of historical and transnational contexts for studying gender in relation to other social relations of power;
- Develop a familiarity with major theoretical perspectives and concepts of feminist thought and practice;
- Distinguish between different kinds of feminist claims and critically assess their effects in the world;
- Understand and apply key social theory concepts and perspectives as these have been used in critical scholarly and activist engagements with contemporary issues and problems;
- Integrate gender, race and sexuality theoretical frameworks along with a critical awareness of the politics of knowledge production in the conception and writing of an original research paper.

WMST BC2150 PRACTICING INTERSECTIONALITY. 3.00 points.

This introductory course for the Interdisciplinary Concentration or Minor in Race and Ethnicity (ICORE/MORE) is open to all students. We focus on the critical study of social difference as an interdisciplinary practice, using texts with diverse modes of argumentation and evidence to analyze social differences as fundamentally entangled and co-produced. Because of the interdisciplinary nature of this course, the professor will frequently be joined by other faculty from the Consortium for Critical Interdisciplinary Studies (CCIS), who bring distinct disciplinary and subject matter expertise. Some keywords for this course include hybridity, diaspora, borderlands, migration, and intersectionality

WMST GU4330 SWANA Diasporas: Culture, Politics and Identity Formation in a Time of War. 4.00 points.

In this class we will study South-West Asian and North African (SWANA) diasporic populations, social movements and cultural production that have responded to the multi-faceted ramifications of the 21st century war on terror. We will focus on diverse Arab, Iranian, and Afghan diasporas in the United States, where 19th and 20th century legacies of racism, xenophobia, Islamophobia and Orientalism combined in new ways to target these groups after the September 11th, 2001 attacks. Drawing on an interdisciplinary array of texts, including ethnography, fiction, feminist and queer theory, social movement theory, and visual and performance art, we will look at how the “war on terror” has shaped the subjectivities and self-representation of SWANA communities. Crucially, we will examine the gender and sexual politics of Islamophobia and racism and study how scholars, activists and artists have sought to intervene in dominant narratives of deviance, threat, and backwardness attributed to Muslim and other SWANA populations. This course takes up the politics of naming, situating the formation of “SWANA” as part of an anti-colonial genealogy that rejects imperial geographies such as “Middle East.” We will ask how new geographies and affiliations come into being in the context of open-ended war, and what new political identities and forms of cultural production then become possible

WMST BC3138 AFFECT AND ACTIVISM. 4.00 points.

From love to anger to disappointment to hope, political activism mobilizes emotions towards certain ends but also generates new affective states and feelings along the way. This advanced seminar will familiarize students with feminist, anti-racist and queer scholarship on affect, feelings and emotion as intrinsic to politics and as crucial for understanding how political thought and action unfold in contingent and often unexpected ways. Mixing theoretical and cultural texts with case studies, we will look at how affect permeates structures of power and domination, embodiment and identity, and collective activist projects concerned with gender and sexual liberation. Students will have an opportunity to read theories of affect as well as to “read” activist movements for affect by working with archival documents (such as zines, manifestos, and movement ephemera) and other primary sources (such as memoir, photography and documentary film)

WMST GU4210 BLACK GEOGRAPHIES. 4.00 points.

Far from obvious renderings of place, maps are spatial arguments about who belongs where and how living should be defined. This course approaches place as something that is contested daily in the U.S. through the struggle of who gets to lay claim to a way of life. From the landscapes of dispossession to the alternative ways marginalized people work with and against traditional geographies, this course centers Black place-making practices as political struggle. This class will look at how power and domination become a landed project. We will critically examine how ideas about “nature” are bound up with notions of race, and the way “race” naturalizes the proper place for humans and non-human others. We will interrogate settler colonialism’s relationships to mapping who is and isn’t human, the transatlantic slave trade as a project of terraforming environments for capital, and land use as a science for determining who “owns” the earth. Centered on Black feminist, queer and trans thinkers, we will encounter space not as a something given by maps, but as a struggle over definitions of the human, geography, sovereignty, and alternative worlds. To this end, we will read from a variety of disciplines, such as Critical Black Studies, Feminist and Intersectional Science Studies, Black Geographies and Ecologies, Urban Studies and Afrofuturist literature. (Note: this class will count as an elective for the CCIS minors/concentrations in F/ISTS, ICORE/MORE, and Environmental Humanities.)

WMST GU4310 CONTEM AMER JEWISH WOMEN'S LIT. 4.00 points.

Prerequisites: Enrollment limited to 15 students. Sophomore standing. The seminar will focus on trends that have emerged over the past three decades in Jewish American women’s writing in the fields of memoirs, fiction and Jewish history: the representation and exploration through fictive narratives of women’s experiences in American Jewish orthodox communities; reinterpretation of Jewish history through gender analysis; the recording of migration and exile by Jewish women immigrants from the former Soviet Union, Morocco, Iran, and Egypt; and gender transformations. Texts will be analyzed in terms of genre structures, narrative strategies, the role of gender in shaping content and Jewish identity, and the political, cultural and social contexts in which the works were created. The course aims for students to discuss and critically engage with texts in order to develop the skills of analytical and abstract thinking, as well as the ability to express that critical thinking in writing. Prerequisites: Both one introductory WGSS course and Critical Approaches to Social and Cultural Theory, or Permission of the Instructor

Comparative study of gender, race, and sexuality through specific historical, socio-cultural contexts in which these systems of power have operated. With a focus on social contexts of slavery, colonialism, and modern capitalism for the elaboration of sex-gender categories and systems across historical time

WMST BC3512 Art/Work: Sex, Aesthetics, and Capitalism. 4 points.

Prerequisites: none

How can performances, theatrical texts, and other art/media objects illuminate the operations of gender, sexuality, and race in global capitalism? Drawing from a range of artistic media and critical traditions, we explore how aesthetic thought can help us analyze the sexual, racial, and national character of contemporary labor and life.

Fall 2023**WMST BC1006 Introduction to Environmental Humanities. 3.00 points.**

COURSE DESCRIPTION This course introduces students to key concepts and texts in environmental humanities, with an emphasis on interdisciplinary studies of race, gender, sexuality, capital, nation, and globalization. The course examines the conceptual foundations that support humanistic analyses of environmental issues, climate crisis, and the ethics of justice and care. In turn, this critical analysis can serve as the basis for responding to the urgency of calls for environmental action. **LEARNING OBJECTIVES** Students will learn what difference humanistic studies make to understanding environmental issues and climate crisis. The course will prepare students to: Identify humanistic methods and how they contribute to understanding the world; Demonstrate critical approaches to reading and representing environments; Engage ethical questions related to the environment; and Apply concepts from the course to synthesize the student's use of humanistic approaches to address urgent environmental questions

WMST BC3132 GENDERED CONTROVERSIES. 4.00 points.

Love and sex have long been studied as historical constructs that are traversed by social, political, and economic systems. In this course, we will supplement those dimensions with the often-overlooked lens of technological mediation. Starting from the premise that romantic love is deeply shaped by the affordances of the technology of the time, a critical awareness of technological mediation in romance –especially of digital technologies, i.e. online dating, social media, or cybersex – will afford us an understanding of how social categories such as gender, race, class, ability, and sexuality are shaped by technologies and in turn govern social and cultural perceptions of love, dating, and sex. Sandra Moyano-Ariza is Term Assistant Professor of WGSS and Research Director at BCRW. Her research works at the intersection of culture, philosophy, and digital technologies, with interests in the fields of media studies and digital scholarship, contemporary feminist theory, critical race theory, posthumanism, and affect theory

WMST UN3311 FEMINIST THEORY. 4.00 points.

Prerequisites: LIMITED TO 20 BY INSTRUC PERM; ATTEND FIRST CLASS

This course explores the formation of desire, sexuality, and subjectivity through the frameworks of feminist epistemologies (the question of what we can know) and feminist ethics (the question of how to be responsible within our relationships and local and global communities). We will reflect on the tension between the limits of what we can know about ourselves and others and the imperative to care for each other and remain accountable for our individual and collective actions and inaction. We will investigate how our deepest emotions, intimate encounters, and secret fantasies are formed by larger social and political contexts. In turn, we will also question how these intimate relationships with ourselves and our companions may be seen as feminist acts of resistance, disruption, and creation. Objective I: to closely engage diverse feminist perspectives in late-twentieth- and twenty-firstcentury phenomenology, existentialism, Marxism, queer theory, critical race theory, and psychoanalysis. Objective II: to begin to locate your own feminist perspective within the intersection of your unique experiences and the larger historical and social contexts that form you and which you may seek to transform

WMST BC2175 Masculinities. 3 points.

This course surveys interdisciplinary studies that inquire into how masculinity is performed or embodied, as well as how "masculinity" itself poses challenges as an object of study. We will consider how, why, and when it is appropriate to study multiple masculinities and the ways they relate to each other.

WMST BC2530 Global South Women Film Directors. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL).

Not offered during 2023-2024 academic year.

Prerequisites: Students registering for this course are required to attend the screening and commentary on Tuesdays 6:10-8:55 pm, and lecture and discussion section on Thursdays 9:10-10:50 am. Enrollment limited to 20 students.

Globalization has both shrunk the world and broadened the impact of cultural meanings. Drawing on women directors from Africa, Asia, Latin America and the Middle East, this course analyzes emerging aesthetics, trends and debates shaping cinemas of the Global South.

The course explores the work of key women filmmakers (from the Global South) as they forge a visual semantics in a celluloid landscape dominated by male directors.

WMST BC3117 Film and Feminism: Transnational Perspectives. 3 points.

BC: Fulfillment of General Education Requirement: The Visual and Performing Arts (ART).

Not offered during 2023-2024 academic year.

Prerequisites: Students registering for this course are required to attend the screening on Tuesdays 6:10-9:00 pm, and lecture and discussion section on Thursdays 9:00-10:50 am. Enrollment limited to 25 students.

WMST BC3117 Film and Feminism is part of the "CCIS Critical Inquiry Lab: Theorizing Diasporic Visuality" with AFRS BC3110 Theorizing Diasporas (Instructors: Tina Camp and May Joseph). "Theorizing Diasporic Visuality" is the first CCIS Critical Inquiry Lab - an innovative series of linked courses sponsored by the Consortium for Critical Interdisciplinary Studies (CCIS). This year's lab links Prof. Tina Camp's (Barnard Africana/Women's, Gender & Sexuality Studies [WGSS]) Africana Studies colloquium, AFRS BC3110 Theorizing Diasporas, with May Joseph's (Pratt Social Science and Cultural Studies) WGSS course, WMST BC3117 Film and Feminism. Because cinematic visuality is an increasingly powerful tool for influencing public opinion across international borders, this course will train students in essential skills in visual literacy and reading, and provide fluency in the theoretical vocabularies of Diaspora Studies and feminist film theory and analysis. The Lab will use films by and about women in the quotidian conditions of the African Diaspora to teach students how gender and racial formation are lived in diaspora, and to engage the diasporic visual practices women mobilize to represent themselves. The course is structured around a Tuesday evening film series featuring African women filmmakers and presentations by filmmakers, curators, and visual artists and seminar discussion on Thursday mornings. Students may enroll by registering for either AFRS BC3110 or WMST BC3117.

WMST BC3121 Black Women in America. 4 points.

BC: Fulfillment of General Education Requirement: Historical Studies (HIS).

Not offered during 2023-2024 academic year.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students.

Examines roles of black women in the U.S. as thinkers, activists and creators during the nineteenth and twentieth centuries. Focusing on the intellectual work, social activism and cultural expression of African American women, we examine how they understood their lives, resisted oppression and struggled to change society. We will also discuss theoretical frameworks (such as "double jeopardy," or "intersectionality") developed for the study of black women. The seminar will encourage students to pay particular attention to the diversity of black women and critical issues facing Black women today. This course is the same as *AFRS BC3121 Black Women in America*.

WMST BC3122 Contemporary American-Jewish Women Writers: 1990 to the Present. 4 points.

BC: Fulfillment of General Education Requirement: Reason and Value (REA).

Not offered during 2023-2024 academic year.

Explores the international character of the Jewish people through the experiences of Jewish women in various historical periods and contexts. Identifies issues and concerns, past and present, articulated by contemporary Jewish feminists: perspectives of secularists, observant traditional women, heterosexuals, lesbians, feminists, and activists committed to diverse political ideologies.

WMST BC3125 Pleasures and Power. An Introduction to Sexuality Studies. 3 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

This introduction to sexuality studies is an examination of the historical origins, social functions, and conceptual limitations of the notion of "sexuality" as a domain of human experience and a field of power relations. Sexuality is often taken to be a natural and unchanging element of individual life. In this course, we seek to examine the ways in which sex is both social and political. We will consider how sexuality has been socially constructed, paying careful attention to the ways these ideas relate to other social forces such as gender, race, and class.

WMST BC3131 WOMEN AND SCIENCE. 4.00 points.

Prerequisites: Enrollment limited to 18 students.
Prerequisites: Enrollment limited to 18 students. History and politics of womens involvement with science. Womens contributions to scientific discovery in various fields, accounts by women scientists, engineers, and physicians, issues of science education. Feminist critiques of biological research and of the institution of science

WMST BC3132 GENDERED CONTROVERSIES. 4.00 points.

Love and sex have long been studied as historical constructs that are traversed by social, political, and economic systems. In this course, we will supplement those dimensions with the often-overlooked lens of technological mediation. Starting from the premise that romantic love is deeply shaped by the affordances of the technology of the time, a critical awareness of technological mediation in romance – especially of digital technologies, i.e. online dating, social media, or cybersex – will afford us an understanding of how social categories such as gender, race, class, ability, and sexuality are shaped by technologies and in turn govern social and cultural perceptions of love, dating, and sex. Sandra Moyano-Ariza is Term Assistant Professor of WGSS and Research Director at BCRW. Her research works at the intersection of culture, philosophy, and digital technologies, with interests in the fields of media studies and digital scholarship, contemporary feminist theory, critical race theory, posthumanism, and affect theory

WMST BC3134 Unheard Voices: African Women's Literature. 4 points.

BC: Fulfillment of General Education Requirement: Cultures in Comparison (CUL)., BC: Fulfillment of General Education Requirement: Literature (LIT).

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 14 students.

How does one talk of women in Africa without thinking of Africa as a 'mythic unity'? We will consider the political, racial, social and other contexts in which African women write and are written about in the context of their located lives in Africa and in the African Diaspora. This course is the same as **AFRS BC3134 Unheard Voices: African Women's Literature.**

WMST BC3138 AFFECT AND ACTIVISM. 4.00 points.

From love to anger to disappointment to hope, political activism mobilizes emotions towards certain ends but also generates new affective states and feelings along the way. This advanced seminar will familiarize students with feminist, anti-racist and queer scholarship on affect, feelings and emotion as intrinsic to politics and as crucial for understanding how political thought and action unfold in contingent and often unexpected ways. Mixing theoretical and cultural texts with case studies, we will look at how affect permeates structures of power and domination, embodiment and identity, and collective activist projects concerned with gender and sexual liberation. Students will have an opportunity to read theories of affect as well as to "read" activist movements for affect by working with archival documents (such as zines, manifestos, and movement ephemera) and other primary sources (such as memoir, photography and documentary film)

WMST BC3506 Memory, Childhood and Dictatorship. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Limited to 20 students.

"What is a 'normal' childhood under a dictatorship? Focusing on the last Argentine military dictatorship (1976 – 83), the seminar examines the memory of childhood experience in sociocultural, historiographic and cinematographic approaches. Topics include childhood as political subject, public policy aimed at children, children of the disappeared and everyday life.

WMST BC3509 Gender, Knowledge and Science in Modern European History. 4 points.

BC: Fulfillment of General Education Requirement: Reason and Value (REA)., BC: Fulfillment of General Education Requirement: Historical Studies (HIS)., BC: Fulfillment of General Education Requirement: Ethics and Values.

Not offered during 2023-2024 academic year.

Develops historical strategies for uncovering the significance of gender for the cultures and contents of Western science. We will consider how knowledge is produced by particular bodies in particular spaces and times.

WMST BC3510 Interpreting Bodies: Engendering the Black Body. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Students must attend first day of class and admission will be decided then. Enrollment limited to 20 students.

This course examines how the body functions as an analytic model and a process of embodiment by focusing on the black female body in particular. Looking at feminist theorizing of the black body, it explores how the black female body has been marked in particular ways and with profound effects.

WMST BC3512 Art/Work: Sex, Aesthetics, and Capitalism. 4 points.

Prerequisites: none

How can performances, theatrical texts, and other art/media objects illuminate the operations of gender, sexuality, and race in global capitalism? Drawing from a range of artistic media and critical traditions, we explore how aesthetic thought can help us analyze the sexual, racial, and national character of contemporary labor and life.

WMST BC3513 CRITICAL ANIMAL STUDIES. 4.00 points.

"This course collaborates between students and professor, humans and animals, subjects and objects, to investigate the Animal Problem. What are non-human animals? How do we relate to them? How do we account for our animal nature while reconciling our cultural aspirations? What are our primary desires with respect to non-human animals?

WMST BC3514 HIST APPROACHES FEMINIST QUES. 4.00 points.

Comparative study of gender, race, and sexuality through specific historical, socio-cultural contexts in which these systems of power have operated. With a focus on social contexts of slavery, colonialism, and modern capitalism for the elaboration of sex-gender categories and systems across historical time

WMST BC3518 STUDIES IN U.S. IMPERIALISM. 4.00 points.

Prerequisites: Enrollment limited to 20 students.

Historical, comparative study of the cultural effects and social experiences of U.S. imperialism, with attention to race, gender and sexuality in practices of domination and struggle

WMST BC3519 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex. 4 points.

Not offered during 2023-2024 academic year.

Prerequisites: Enrollment limited to 15 students.

This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences which form sex work, as well as the way in which prostitution is utilized as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes which have been developed around the world.

WMST BC3530 FEMINIST MEDIA THEORY. 4.00 points.

The integration of contemporary media and social practices of all types is intensifying. This seminar examines media theory and various media platforms including Language, Photography, Film, Television, Radio, Digital Video, and Computing as treated by feminists, critical race and queer theorists, and other scholars and artists working from the margins. Prerequisite: Either one introductory WGSS course or Critical Approaches to Social and Cultural Theory or Permission of the Instructor

WMST BC3599 Independent Research. 3-4 points.**WMST BC3814 ACTIVISM # INQUIRY LAB A. 1.00 point.**

This lab course is an optional addition to the WGSS junior colloquia courses "Theorizing Feminist Activisms" and "Feminist Inquiry"; students must take one of those courses simultaneously with this lab. The lab gives students an opportunity to gain practical experience with one or more qualitative research methods that are frequently used in feminist and gender studies. It will be particularly valuable as groundwork for senior thesis research, but all students enrolled in Theorizing Activisms or Feminist Inquiry are encouraged to take the lab to deepen their understanding of practical and ethical issues in conducting research in support of social change

WMST BC4303 Gender, Globalization, and Empire. 4 points.

Prerequisites: Enrollment limited to 20 students.

Study of the role of gender in economic structures and social processes comprising globalization and in political practices of contemporary U.S. empire. This seminar focuses on the ways in which transformations in global political and economic structures over the last few decades including recent political developments in the U.S. have been shaped by gender, race, sexuality, religion and social movements.

WMST G4440 Gender and Affective Politics: Hate, Fear and Love in the MENA region. 4 points.

The course will examine how masculinities and femininities are produced, remade, expressed and negotiated through theories of materiality and affect and relate them to relevant ethnographic examples of such processes (for example masculine soundscapes and edible portraits of Egypt's President Abdel Fattah al-Sisi on chocolate pralines). We will explore gender in relation to the multifaceted dynamic processes unfolding in North Africa in the aftermath of earlier political fluxes, as well as today's instabilities and unrest and tomorrow's politics. Materiality and non-discursive forces, what can be called *affective politics*, impact our sense of belonging and desire for comfort in times of chaos, religious and political instability. Specifically we will focus on forces of affect and the material aspects of its public manifestation—the materiality of affect—through tangible manifestations of affects of passion: hate and love: two opposed but interlinked "emotions of revolution", as well as their sibling, fear. The same material experiences can produce materialized emotions such as love or hate depending on specific political and social positioning within the larger polity. Passion is at once a phenomenological state and an extremely fluid currency of social, political and economic transaction. The experience of passion morphs continuously, changing valence while passing from hand to hand, body to body, circumstance to circumstance.

WMST GR6001 THEORETICAL PARADIGMS. 4.00 points.

Theoretical Paradigms in Feminist Scholarship: Course focuses on the current theoretical debates of a particular topic or issue in feminist, queer, and/or WGSS scholarship. Open to graduate students, with preference given to students completing the ISSG graduate certificate. Topics differ by semester offered, and are reflected in the course subtitle. For a description of the current offering, please visit the link in the Class Notes

WMST GR6165 The Sexual Difference of Psychoanalysis (Freud, Lacan, Cixous, Kofman et al.). 4 points.

Psychoanalysis makes a difference.

This difference is both at its most fragile and most flagrant when it comes to *sexuality*. Since its invention by Freud, psychoanalysis may be seen as a place where sexuality, the difference that it makes in respect to any other determination of the "human"—philosophical, social, historical, or scientific—as well as the difference and differences that occur with and as the sexual, can invent their own language or speak in their own voice. And it cannot be excluded that these, language, voice, and speaking, appear in the name of a criticism or refusal of the very concepts linked to "sexual difference."

This seminar presents an occasion to read or reread some of the classical psychoanalytic texts on sex, sexuality, sexual difference, and sexuation as well as their commentaries, criticisms, or refutations.

The French contributions to this complex since the 1960s, coming from psychoanalysis as well as from philosophy and literature, have been extremely rich. Therefore, particular attention will be paid to some of these contributions.

WMST GR8001 GRAD STUDENT # FACULTY COLLOQ. 1.00 point.

This is a course is oriented to graduate students who are thinking about issues in teaching in the near and distant future and want to explore forms of pedagogy. The course will ask what it means to teach "as a feminist" and will explore how to create a classroom receptive to feminist and queer methodologies and theories regardless of course theme/content. Topics include: participatory pedagogy, the role of political engagement, the gender dynamics of the classroom, modes of critical thought and disagreement. Discussions will be oriented around student interest. The course will meet 4-5 times per SEMESTER (dates TBD) and the final assignment is to develop and workshop a syllabus for a new gender/sexuality course in your field. Because this course is required for graduate students choosing to fulfill Option 2 for the Graduate Certificate in Feminist Studies at IRWGS, priority will be given to graduate students completing the certificate

WMST GR8010 Advanced Topics: Significant Others. 2 points.

What is the relationship between homoeroticism and homosociality? How does this relationship form conceptions of gender and sexuality in ways that might be historically unfamiliar and culturally or regionally specific? We pursue these questions through the lens of friendship and its relationship to ideas and expressions of desire, love, and loyalty in pre-modern times. We begin by considering the intellectual basis of the modern idea of friendship as a private, personal relationship, and trace it back to earlier times when it was often a public relationship of social and political significance. Some of these relationships were between social equals, while many were unequal forms (like patronage) that could bridge social, political or parochial differences. Thinking through the relationships and possible distinctions between erotic love, romantic love and amity (love between friends), we will draw on scholarly works from a variety of disciplinary perspectives, particularly philosophy, sociology, political theory, literature, history, and art history. We will attend to friendship's work in constituting, maintaining and challenging various social and political orders in a variety of Asian contexts (West, Central, South and East Asian), with reference to scholarship on European contexts. Primary source materials will include philosophy, religious manuals, autobiographies, popular love stories, heroic epics, mystical poetry, mirror for princes, paintings, material objects of exchange, and architectural monuments.

WMST GR9000 IND RES IN FEMINIST SCHOLARSHIP. 3.00 points.**WMST GU4000 GENEALOGIES OF FEMINISM. 4.00 points.**

Genealogies of Feminism: Course focuses on the development of a particular topic or issue in feminist, queer, and/or WGSS scholarship. Open to graduate students and advanced undergraduates, though priority will be given to students completing the ISSG graduate certificate. Topics differ by semester offered, and are reflected in the course subtitle. For a description of the current offering, please visit the link in the Class Notes

WMST GU4200 Temporality and Sexuality. 4 points.

If queerness, as José Muñoz put it, "exists for us as an ideality that can be distilled from the past and used to imagine a future," we can ask about what comes next, what comes after the future? What queer understandings of time and place enliven the field of queer studies now? Where are we going, where have we been, what time is it and when will we get there? Temporality has become a major concern in studies of sexuality and gender in the last decade and this class sets out to explore why and with what impact? How do concerns about time and temporality rest upon assumptions about space and spatiality? How does a focus on time and temporality allow for or foreclose upon post-colonial questions of mimicry, authenticity, sequence and procession? What can a study of queer temporalities reveal about orientations, speed, embodiment, becoming, being, doing, touching, feeling, unbecoming? Finally, what does the focus on temporality allow us to think, say, see or imagine about the multiple points of intersection between race and sexuality in a global frame?

WMST GU4235 Indigenous Feminisms. 4.00 points.

Indigenous women, queers, trans- and Two Spirit people have been at the forefront of activism and resistance to state incursion into Indigenous lands and waters. This was evident most recently at Mauna Kea, a mountain sacred to Kanaka Maoli in Hawaii as women, trans and queer formed the first line of resistance and occupation against the construction of a 1000-meter telescope on the site. This is not unique, their voices, along with indigenous queer and feminist scholars, have been working to address issues as far-ranging as mascots, settler appropriation of indigenous cultures, missing and murdered indigenous women and girls, and the violence against indigenous urban youth. This seminar will consider how those indigenous feminist, queer, and Two Spirit scholars have theorized gender, sexuality, race, and colonialism, alongside issues of land, water and sovereignty. We will read works that consider how indigeneity challenges how gender and sexuality are expressed in the context of settler colonialism and racial capitalism

WMST GU4275 Medea Goes to Court. 4 points.

Medea has, like many of her Greek counterparts, proven a pivotal figure for sharply contrasting interpretations of her roles as woman, mother, wife, deity, immigrant, and murderer. This course explores facets of Medea the character and Medea the play in light of today's politics and with the aim of understanding the extent of Euripides' feminism in its ancient Greek context. How are we to judge Medea, the character and Medea the play? What do we make of the question of justice, of a woman's honor and her claim to reason well in a culture of misogyny, both then and now? Might Medea herself go to court in our times?

This course pursues these and many other questions in a seminar jointly taught by Patricia Dailey and Lisa Dwan. This seminar has the dual purpose of engaging in depth with the stage and literary traditions of Medea while preparing the terrain for the writing of a new Medea by Lisa Dwan and Margaret Atwood. With this in mind, students will be readings relevant selections by Atwood (poetry, fiction, essays) to better understand Atwood's feminism and astute portrayals of the complexity of gender in contemporary culture.

WMST GU4300 Queer Theory/ Visual Culture. 4 points.

This class will ask you to read a set of theoretical essays and social science studies in order to think deeply about sexuality, identity, desire, race, objects, relationality, being, knowing and becoming. We will consider sexuality, desire and gender not as a discrete set of bodily articulations, nor as natural expressions of coherent identities so much as part of the formulation of self that Avery Gordon names “complex personhood.” Over the course of the semester, we will explore new and old theories of queer desire alongside a history of queer cultural production.

WMST GU4302 The Second Wave and Jewish Women's Artistic Responses: 1939-1990. 4 points.

Prerequisites: Permission of instructor. Enrollment limited to 13 students.

A study of Jewish women's fiction, memoirs, art and film in response to the feminist/gender issues raised by the Second Wave. The seminar includes analysis of the writings and artwork of Jo Sinclair, Tillie Olsen, Judy Chicago, Helene Aylon, Elana Dykewomon, Rebecca Goldstein, E.M. Broner and others.

WMST GU4310 CONTEM AMER JEWISH WOMEN'S LIT. 4.00 points.

Prerequisites: Enrollment limited to 15 students. Sophomore standing. The seminar will focus on trends that have emerged over the past three decades in Jewish American women's writing in the fields of memoirs, fiction and Jewish history: the representation and exploration through fictive narratives of women's experiences in American Jewish orthodox communities; reinterpretation of Jewish history through gender analysis; the recording of migration and exile by Jewish women immigrants from the former Soviet Union, Morocco, Iran, and Egypt; and gender transformations. Texts will be analyzed in terms of genre structures, narrative strategies, the role of gender in shaping content and Jewish identity, and the political, cultural and social contexts in which the works were created. The course aims for students to discuss and critically engage with texts in order to develop the skills of analytical and abstract thinking, as well as the ability to express that critical thinking in writing. Prerequisites: Both one introductory WGSS course and Critical Approaches to Social and Cultural Theory, or Permission of the Instructor

Spring 2024: WMST GU4310

WMST GU4317 ADVANCED TOPICS. 4.00 points.

In this course, our point of departure will be the precariousness of embodied existence, in which precarity is understood as both an existential condition and as the socially uneven culmination of neoliberal political and economic trends. We will draw upon a variety of interdisciplinary literatures—including feminist, critical race, and queer studies; science and technology studies; disability studies; and medical sociology and anthropology—to consider some of the ways in which our bodies have served as both the repository and substratum of recent social transformations. Within the context of current pandemic crises relating to both public health and to myriad forms of social inequality, we will also consider appeals to the beneficence of science, technology, medicine, and the rational governance of dis-ease. What can critical histories of plagues, epidemics, and quarantines teach us about emergent forms of biopolitics? We will conclude by considering the interventions of contemporary disability and social justice activists, and the alternative possibilities that they have posited for self-care and mutual aid

WMST GU4325 Embodiment and Bodily Difference. 4 points.

At once material and symbolic, our bodies exist at the intersection of multiple competing discourses, including the juridical, the techno-scientific, and the biopolitical. In this course, we will draw upon a variety of critical interdisciplinary literatures—including feminist and queer studies, science and technology studies, and disability studies—to consider some of the ways in which the body is constituted by such discourses, and itself serves as the substratum for social relations. Among the key questions we will consider are the following: What is natural about the body? How are distinctions made between presumptively normal and pathological bodies, and between psychic and somatic experiences? How do historical and political-economic forces shape the perception and meaning of bodily difference? And most crucially: how do bodies that are multiply constituted by competing logics of gender, race, nation, and ability offer up resistance to these and other categorizations?

WMST GU4336 GENDER AND SEXUALITY IN YIDDISH LITERATURE.**4.00 points.**

Early publications in Yiddish, a.k.a. the *mame loshn*, ‘mother tongue,’ were addressed to “women and men who are like women,” while famous Yiddish writer, Sholem Aleichem, created a myth of “three founding fathers” of modern Yiddish literature, which eliminated the existence of Yiddish women writers. As these examples indicate, gender has played a significant role in Yiddish literary power dynamics. This course will explore representation of gender and sexuality in modern Yiddish literature and film in works created by Sholem Aleichem, Sholem Asch, Fradl Shtok, Sh. An-sky, Malka Lee, Anna Margolin, Celia Dropkin, Isaac Bashevis Singer, Kadya Molodowsky, Troim Katz Handler, and Irena Klepfisz. You will also acquire skills in academic research and digital presentation of the findings as part of the Mapping Yiddish New York project that is being created at Columbia. No knowledge of Yiddish required

WMST GU4350 Performing feminist activisms in Contemporary Latin America. 4 points.

This course explores different ways in which feminist artists and activists use performance to spark social change in Latin America. Using feminism and performance studies as critical lenses, this course addresses how performative actions can challenge patriarchal systems in neoliberal times. We begin the course by reviewing key texts to discuss the key terms “feminisms”, “performance” and “activisms” Then, the course turns to an examination of contemporary feminist activisms in Latin America, including the #niunamenos movement in Argentina, the 2018 feminist tsunami in Chile and the work of Mujeres Creando in Bolivia. In each session, we will discuss the performative strategies activists use to denounce, protest and resist dominant discourses of power, neoliberalism and gender violence, searching to trace connectivities and fractures among different contemporary feminist activist movements across Latin America.

WMST GU4506 Gender Justice. 3 points.

This course will provide an introduction to the concrete legal contexts in which issues of gender and justice have been articulated, disputed and hesitatingly, if not provisionally, resolved. Readings will cover issues such as Workplace Equality, Sexual Harassment, Sex Role Stereotyping, Work/Family Conflict, Marriage and Alternatives to Marriage, Compulsory Masculinity, Parenting, Domestic Violence, Reproduction and Pregnancy, Rape, Sex Work & Trafficking. Through these readings we will explore the multiple ways in which the law has contended with sexual difference, gender-based stereotypes, and the meaning of equality in domestic, transnational and international contexts. So too, we will discuss how feminist theorists have thought about sex, gender and sexuality in understanding and critiquing our legal system and its norms.

WMST OC3550 WOMEN # SOCIETY - SEX-TRADE ECONOMY. 3.00 points.

CC/GS/SEAS: Partial Fulfillment of Global Core Requirement

Prerequisites: 5 semesters of college-level French or the equivalent. This course is taught in French. Eligibility: This course is open to undergraduates, graduate students, and visiting students. Based on an interdisciplinary, intersectional, subalternist and post-colonial approach, this course is a general introduction to the history, sociology and anthropology of the economy of the sex-trade in Africa, America, Asia and Europe from the early nineteenth century to today. It aims to clarify: 1) the historiographical situation by questioning and analyzing the French regulatory system and its many avatars in Europe, the United States and in the colonial world, but also questioning the backlash to this system that consisted firstly of the abolitionist (born in England in the second half of the nineteenth century) and then the prohibitionist movements; 2) The relationship between class, "race" and gender in the sex market via issues of human trafficking and sex tourism in Europe, America, Africa and Asia; 3) The socio-economic issue - and its political connections - in the economy of sex with particular attention to individuals (prostitutes versus sex workers), their voices, their legal status, and even their mobilization (rallies and demonstrations, community collectives and trade unions, political and / or literary publications), but also the many heated debates that these demands for recognition and these mobilizations have provoked in places as diverse as France, the Netherlands and India to take only three specific examples in the world covered in the course. To enroll in this course, you must apply to the Columbia Summer in Paris Program through the Center for Undergraduate Global Engagement (UGE). Tuition charges apply; scholarships available. Please note the program dates are different from the Summer Term B dates

WMST S3112D Feminist Theory: Reading the Body. 3 points.

Not offered during 2023-2024 academic year.

This course is an interdisciplinary introduction to key concepts and analytical categories in Feminist Theory through a focus on "reading the body." How do we define "deviant" bodies and which bodies get to count as "normal"? How does our understanding of Nature and Culture, authenticity and artifice structure our beliefs about the body and gender, sexuality, ethnicity and race? The course will explore a range of topics, including: Racial politics and reproductive justice; Discipline, power, and the modern body; "Somatechnics," cosmetic surgery, and other forms of body modification; Gender-based violence, activism, and narratives of trauma; Diseased bodies, hysteria, and psychoanalysis; Transnational bodies and the politics of labor and migration; Queer politics, utopia and futurity. Class will be supplemented by excursions to the theater (including "Eclipsed" on Broadway) and NYC museums. This course fulfills the Feminist Theory requirement for the Columbia major in Women's, Gender, and Sexuality Studies.

WMST SD Writing Women. 3 points.

Not offered during 2023-2024 academic year.

This course has a dual focus: to explore the work of women writers of the 18th century to the present and also to grapple with the ways in which women, gender and sexuality are written and represented in a range of literary, cultural, and historical texts. This course fulfills the elective requirement for the Women's, Gender, and Sexuality major, providing a solid introduction to key concepts and analytical categories in women's, gender, and sexuality studies. The course not only interrogates the category of "Women," but also grapples with gender in its complex intersection with other systems of power and inequality, including: sexuality, race and ethnicity, class and nation. Authors will include: Christine de Pizan, Assia Djebar, Chimamanda Ngozi Adichie, Virginia Woolf, Marjane Satrapi, Alison Bechdel, Harriet Jacobs, Sapphire, Toni Morrison.

WMST UN1001 INTRO-WOMEN # GENDER STUDIES. 3.00 points.

An interdisciplinary introduction to key concepts and analytical categories in women's and gender studies. This course grapples with gender in its complex intersection with other systems of power and inequality, including: sexuality, race and ethnicity, class and nation. Topics include: feminisms, feminist and queer theory, commodity culture, violence, science and technology, visual cultures, work, and family.

WMST UN2340 Women, Power, and Popular Music. 3.00 points.

From blues singers to girl groups, pop divas to hip-hop icons, women are central to the histories of popular music. The musical landscape of the past century would be unrecognizable without the contributions of women including Billie Holiday, Ella Fitzgerald, Aretha Franklin, Dolly Parton, Celia Cruz, Queen Latifah, Lady Gaga, Lauryn Hill, Beyoncé, Nicki Minaj, and Cardi B. Women, Power, # Popular Music develops modes of feminist listening to a range of music, including the blues, spirituals, jazz, gospel, traditional music, pop, rock, R#B, soul, salsa, country, hip-hop, and crossover music. The course's primary focus will be attending to sounds, words and images with an ear to themes of voice, power, presence, and representation. Students will develop a critical vocabulary and practice a variety of modes of hearing and analyzing the meanings and effects of popular music. By examining popular music in relation to intersections of gender, sexuality, race, ethnicity, disability, the body, class, politics, and activism, students will examine a wide repertory of music by using a variety of analytical "sieves," refining and enriching their musical experience as critically astute listeners and writers. The course weaves together close listening with some of the central writings on women musical artists, listening, and feminist theory through seminar-style discussion and written work. Students will develop skills in hearing popular music through critically aware ears and will reflect upon popular music and the discourse about it through close listening and viewing, discussion of assigned readings, recordings, and videos, and writing projects

WMST UN3125 INTRO TO SEXUALITY STUDIES. 3.00 points.

This course is designed to introduce major theories sexuality, desire and identity. We will be considering the relations between the history of sexuality and the politics of gender. We will read some primary texts in gender theory, and in the study of sexuality, desire, and embodiment. This course also provides an introduction to the interdisciplinary examination of human sexual and erotic desires, orientations, and identities. We will study how desires are constructed, how they vary and remain the same in different places and times, and how they interact with other social and cultural phenomena such as government, family, popular culture, scientific inquiry, and, especially, race and class.

WMST UN3200 QUEER THEORY. 4.00 points.

This class will ask you to read a set of novels, theoretical essays and social science studies in order to think deeply about sexuality, identity, desire, race, objects, relationality, being, knowing and becoming. We will consider sexuality, desire and gender not as a discrete set of bodily articulations, nor as natural expressions of coherent identities so much as part off the formulation of self that Avery Gordon names "complex personhood." Beginning with a recent film from the UK that rereads queerness back through a history of labor and ending with a recent film made entirely on the iPhone and that stages queerness as part of an alternative articulation of Hollywood, we will explore new and old theories of queer desire.

Through the readings, discussions, and assignments, you will develop critical analytical skills to consider social change movements with particular attention to how sex, gender, race, class, sexuality, sexual orientation, and other systems of power shape people's everyday lives. We will trace the intersection of histories of labor, medicine, representation and activism and we will ask difficult questions about assimilation, mainstreaming, globalization and pink capitalism.

WMST UN3225 TRANSGENDER STUDIES - THEMES AND TOPICS. 3.00 points.

This course introduces the interdisciplinary field of transgender studies. While we will read about gender variable bodies within a long historical arc, the categories of both "transsexual" and "transgender" are recent social constructions. How did the many different forms of gender variance resolve into these singular forms and what has been lost in the medical and legal narrowing of gender variance to only these forms? Can we make any connections between witches in the 17th century (often accused on the grounds of cross-gender identification), mollies and dandies in the 19th century (often marked as effeminate), inverts in the late 19th and early 20th century and later constructions that assemble under the banner of "trans*"? Many academic disciplines— including anthropology, history, gender studies, literary studies, and gay and lesbian/queer studies—have studied transgender identities, bodies and communities, but only very recently has the field become institutionalized in the academy as a discipline "Transgender Studies." In this course we examine the ongoing development of the concept of transgender as it is situated across social, cultural, historical, medical, and political contexts. Along the way, we will try to answer some fundamental questions: when did trans* emerge as a distinct social formation? What might be the differences between the understanding of gender variance in the second half of the 20th century and formulations of the phenomena of cross-dressing and passing and transvestism in earlier periods? Is the term "transgender" applicable to non-Western and previously occurring embodiments and practices?

WMST UN3265 Queer # Trans Migration. 3.00 points.

Queer # Trans Migration places a special emphasis on queer, transgender, and gender nonbinary global migrant experiences and how these expand conceptions such as citizenship and diaspora alongside sexuality, gender, race, indigeneity and class. This course will ask: how do queer, transgender and feminist studies offer critical insights on - and inform politics regarding - issues of forced displacement, migration, citizenship, national belonging and global rights? Students will engage with ethnography, history, fiction, and digital media to explore the multi-dimensional phenomenon of (internal and transnational) queer, transgender and gender nonbinary migration. The course gives special attention to viewpoints from the global South and to New York City as a queer migrant nexus. Students will develop their expertise on course themes through their own digital ethnographic research projects, that can include observation of social media and other virtual spaces for queer, transgender, and non-binary communities in diaspora. Throughout the course, they will put their research in conversation with queer and feminist theory from interdisciplinary perspectives that draw attention to the ways migration and citizenship is entwined with sexuality, gender, race, settler colonialism, indigeneity, Blackness, and political economy. In class dialogue and readings will allow students to consider the implications of such analysis for political and cultural movements related to migration, and how these politics play out in everyday life, from language to love and desire

WMST UN3311 FEMINIST THEORY. 4.00 points.

Prerequisites: LIMITED TO 20 BY INSTRUC PERM; ATTEND FIRST CLASS

This course explores the formation of desire, sexuality, and subjectivity through the frameworks of feminist epistemologies (the question of what we can know) and feminist ethics (the question of how to be responsible within our relationships and local and global communities). We will reflect on the tension between the limits of what we can know about ourselves and others and the imperative to care for each other and remain accountable for our individual and collective actions and inaction. We will investigate how our deepest emotions, intimate encounters, and secret fantasies are formed by larger social and political contexts. In turn, we will also question how these intimate relationships with ourselves and our companions may be seen as feminist acts of resistance, disruption, and creation. Objective I: to closely engage diverse feminist perspectives in late-twentieth- and twenty-first-century phenomenology, existentialism, Marxism, queer theory, critical race theory, and psychoanalysis. Objective II: to begin to locate your own feminist perspective within the intersection of your unique experiences and the larger historical and social contexts that form you and which you may seek to transform

WMST UN3312 THEORIZING ACTIVISM. 4.00 points.

Considering local, national, and international activist case studies through social movement theories, we work together to understand what activism looks like, the people who engage in it, how activist messages are constructed, and how visions of transformation are developed. Prerequisite: Either one introductory WGSS course or Critical Approaches to Social and Cultural Theory or Permission of the Instructor

WMST UN3335 Gender and Wars: Perspectives from the Global South. 3 points.

Wars are salient features of globalization. But, how can we understand the relationship between gender and war? How do notions of masculinities and femininities operate in the organizing, waging, protesting, and commemorating war? Starting from the premise that gender is crucial to explaining what happens in national revolutionary wars, postcolonial conflicts and civil wars, peacekeeping and humanitarian interventions, and the social and personal aspects when wars come to an end; this course considers a transnational feminist analysis to reflect on the relationship between gender and militarism. It pulls together literature from different disciplinary fields to explore the gendered dimensions of wars of national liberation, armed conflicts, wartime gender based/sexual violence, politics of victimhood, anti-war activism, resistance and agency. We will pay particular attention to case studies from the global South.

The gendered analyses of war will be explored from a multi-disciplinary framework including history, anthropology, sociology, political science, international relations, philosophy, literature and film. We will utilize film, journalistic accounts, ethnographic narratives and other resources to explore the complex ways in which people, especially men and women experience and respond to wars differently.

WMST UN3345 Reframing Gender Violence: Global Agendas. 3 points.

Over the past couple of decades, violence against women (VAW) and gender-based violence (GBV) have come to prominence as loci for activism throughout the world. Both VAW and GBV regularly garner international media attention and occupy a growing place in international law and global governance. Since 2000 alone there have been more than 25 UN protocols, instruments and conventions directed at its eradication or mitigation. By embedding gendered violence in a complex matrix international norms, legal sanctions, and humanitarian aid, the anti-VAW movement has been able to achieve a powerful international “common sense” for defining, measuring, and attending to violence against women in developing countries, particularly during conflict and post-conflict situations. When invoked in the halls of the United Nations and used to shape international policy, the terms violence against women (VAW) and gender-based violence (GBV) are often assumed to have stable meanings; yet they do not. What do different parties mean when they talk of violence against women or of gender-based violence? What is left out when the problem is framed in particular ways, and whose interests are served by such framings? Religion, culture, and ethnicity are often linked to gendered violence with entire groups pathologized. Women in conflict situations are abstracted from their local contexts while the conflicts themselves are insistently localized. The definition of VAW or GBV is narrowed to attacks on bodily integrity, with economic, political and structural forms of violence increasingly excluded from the frames.

This course will explore transnational feminist debates about gender-based violence and examine the critical concepts being developed within the scholarly literature to question this “common sense.” What are the elisions and exclusions in many common-sense understandings of these terms? Can we deepen the ways in which we engage with the manifestations and causes of such violence?

We will proceed through close readings of the texts of the key feminist thinkers, researchers, and activists who are contributing to the critical analysis of the dynamics and history of this international agenda. We pay special attention to place-based research on the applicability and deployment of particular approaches to gender-based violence as found in human rights work, humanitarianism, philanthrocapitalism, and the proliferating organizations, governmental and nongovernmental, around the world that promote girls’ and women’s rights and freedom from violence. Case studies will focus mostly on the Middle East, South Asia, and Africa.

This course is open to advanced undergraduates with preference given to WGS majors and those with previous coursework on the relevant regions. By permission, cap of 20.

WMST UN3450 Topics in Sexuality and Gender Law. 3 points.

As society shifts in its views about sexuality and gender, so too does the law. Indeed, legal developments in this area have been among the most dynamic of the past couple of decades. Yet law does not map easily or perfectly onto lived experience, and legal arguments do not necessarily track the arguments made in public debate.

In this seminar, we will explore the evolving jurisprudence of sexuality and gender law in a variety of areas. Our goal throughout the semester will be to understand and think about these issues as lawyers do - with our primary focus on understanding and evaluating the arguments that can be made on both (or all) sides of any particular case, with some attention to the factors outside of the courtroom that might shape how courts approach their work. Related to this, we will also seek to understand how and why some of the jurisprudence has changed over time.

WMST UN3521 SENIOR SEMINAR I. 4.00 points.

The Senior Seminar in Women’s Studies offers you the opportunity to develop a capstone research paper by the end of the first semester of your senior year. Senior seminar essays take the form of a 25-page paper based on original research and characterized by an interdisciplinary approach to the study of women, sexuality, and/or gender. You must work with an individual advisor who has expertise in the area of your thesis and who can advise you on the specifics of method and content. Your grade for the semester will be determined by the instructor and the advisor. Students receiving a grade of B or higher in Senior Seminar I will be invited to register for Senior Seminar II by the Instructor and the Director of Undergraduate Studies. Senior Seminar II students will complete a senior thesis of 40-60 pages. Please note, the seminar is restricted to Columbia College and GS senior majors

WMST UN3600 THE POLITICS OF FOOD. 4 points.

Who is food for? The simple answer is that food is for everyone, yet a close look at the stories we tell reveals that, actually, food is not for everyone. In our novels, nonfiction, films and even in our manifestoes, some people eat and some provide food; some appetites must be unleashed and others, regulated and controlled; and some people—some people are food. Instead of a benign arena for the imagination and enactment of universal rights, food thus exposes “universal” “human” and “rights” as crucial and deeply contested terrains of raced and

gendered power. This economy of exchange, of consumption and deprivation, of the satiation of some bodies through devourment of others, of the invisibility of some hungers and the criminalization of some appetites, are all aspects of our founding narrative. These relations define the past and have also come to define our time. In this seminar, will explore the ways that we imagine food and narrate acts of feeding and eating as a means of examining both the historical enactments and contemporary mechanisms of power.

WMST UN3655 Gender and Public Health: Disparities, Pathways, and Policies. 3.00 points.

This seminar provides an intensive introduction to critical thinking about gender in relation to public health. We begin with a rapid immersion in social scientific approaches to thinking about gender in relation to health, and then examine diverse areas in which gendered relations of power – primarily between men and women, but also between cis- and queer individuals – shape health behaviors and health outcomes. We engage with multiple examples of how gendered social processes, in combination with other dimensions of social stratification, shape health at the population level. The overarching goal of this class is to provide a context for reading, discussion, and critical analysis to help students learn to think about gender – and, by extension, about any form of social stratification – as a driver of patterns in population health. We also attend consistently to how public health as a field is itself a domain in which gender is reproduced or contested

WMST UN3785 Narrating Rape: Literature, Gender and Violence. 4 points.

Prerequisites: the instructor's permission.

(Seminar). Despite the fact that gender-based violence destroys the frameworks of identity and community, testimony and truth, memory and justice, rape has been a fundamental and globally pervasive literary and artistic theme and trope, often the very act that engenders representation, narrative and plot. This seminar will explore how rape has been imaged, written and told in the face of its unspeakability and the silences surrounding it, and how the act of bearing witness can become an act of resistance, rebuilding voice, subjectivity and community. Literary texts will be read alongside feminist theoretical work on gender-violence, embodiment, trauma, testimony and law.

Requirements: class attendance and participation, weekly one-page postings on the readings, two 8-10 page papers.

Application instructions: E-mail Professor Marianne Hirsch (mh2349@columbia.edu) with the subject heading “Narrating Rape seminar.” In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course. Admitted students should register for the course; they will automatically be placed on a wait list from which the instructor will in due course admit them as spaces become available.

WMST UN3800 Feminist Listening. 3 points.

Prerequisites: HUMA UN1123

Feminist Listening: Critical and Intersectional Approaches to Popular Music develops modes of feminist listening to a variety of examples in popular music including hip-hop, pop, rock, R&B, country music, and crossover/experimental music. By examining the sonic, texted, and visual components of popular music in relation to gender, sexuality, the body, race, ethnicity, economics, and nation, students will develop a critical vocabulary for discussing and analyzing the effects and meanings of popular music as filtered by twenty-first century listeners. Through close listening, discussion of assigned readings and pieces, and analytical writing on recorded and live performances, the course will encourage students to examine a wide repertory of popular music by using a variety of intersectional analytical “sieves,” refining and enriching their experience of popular music as critically astute listeners and writers. This course is designed for students who are interested in sharpening their listening practices but does not assume previous formal study of music. The course 1) introduces the fundamental of music through exercises in listening and writing, 2) focuses on a selection of current literature on listening, theoretical approaches to music analysis, and feminist/queer criticism; 3) attunes students to the various indices of musical structure (melody, form, harmony, rhythm & meter, words, flow & groove, performance); 4) brings together these parts of music into feminist/queer, alternative hearings of specific works. COURSE

WMST UN3813 Knowledge, Practice, Power. 4.00 points.

Prerequisites: *WMST V1001* and the instructor's permission. Knowledge, Practice, Power is a practical and multi-disciplinary exploration of research methods and interpretive strategies used in feminist scholarship, focusing on larger questions about how we know what we know, and who and what knowledge is for. Open to non-majors, but sophomore and junior majors in Women's, Gender, and Sexuality Studies (WGSS) are encouraged to enroll in this course as preparation for Senior Seminar I. This course is required for students pursuing the concentration or minor in Feminist/Intersectional Science and Technology Studies. Prerequisite: Either one introductory WGSS course or Critical Approaches to Social and Cultural Theory or Permission of the Instructor

WMST V1001 Introduction to Women's and Gender Studies. 3 points.

An interdisciplinary introduction to key concepts and analytical categories in women's and gender studies. This course grapples with gender in its complex intersection with other systems of power and inequality, including: sexuality, race and ethnicity, class and nation. Topics include: feminisms, feminist and queer theory, commodity culture, violence, science and technology, visual cultures, work, and family.

WMST V3112 Feminist Texts II. 0 points.

Contemporary issues in feminist thought. A review of the theoretical debates on sex roles, feminism and socialism, psychoanalysis, language, and cultural representations

WMST V3125 Introduction to Sexuality Studies. 4 points.**Not offered during 2023-2024 academic year.**

Sexuality is often taken to be a natural and unchanging element of individual life. In this course, we seek to examine ways in which sex is both social and political. That is to say, sexuality has different meanings in different contexts, and it has different effects in terms of power relations within the social order. To this end, we will examine how sexuality has been socially constructed, paying careful attention to the ways these ideas relate to other social forces such as gender, race, and class. We begin with a historical examination as to how sexuality has been defined as a natural component of self by early sexologists and eugenicists, paying careful attention to their contemporary legacies. We continue this historical overview through an examination of early scholars who increasingly argued that sexuality has a social basis, culminating in the theoretical analyses of Foucault. The first part of this course thus seeks to historically situate and denaturalize some of the basic concepts we tend to take for granted, including that of "sexuality" itself. In the second part of the course, we will consider the state of sexual politics within the contemporary United States, focusing upon key arenas of political struggle including sex education, prostitution, and homosexuality.

WMST V3137 Feminist Sexual Politics in Historical Perspective. 4 points.**Not offered during 2023-2024 academic year.**

Why, and in what ways, has sex been a central issue for feminism throughout its history? How have feminist attitudes towards sex changed over time, and how did attitudes vary amongst feminists themselves? What connections did feminists make between sexual reform, women's rights, and broader social, political, and economic change? And what are the legacies of past feminist sexual politics for the present day? This course addresses these questions by exploring the history of feminist sexual politics in Europe over the course of the "long nineteenth century," that is, between the years 1789 and 1918, and will focus on developments in Britain, France, and Germany. From the French Revolution to the achievement of women's suffrage, we will examine feminists' writings on and activism surrounding sex and sexuality to understand how definitions of "sex," "feminism," and "sexual politics" changed over time, and how issues of class and race shaped feminist sexual politics. We will also analyze contradictions, tensions and continuities within diverse feminist approaches to sexuality, and assess similarities and differences amongst feminists from different national backgrounds. Furthermore, by adopting a focus on feminism and sexuality, this course offers a unique lens on the major "world historical" events of modern European history.

WMST V3140 Race and Sexuality: Black Queers. 4 points.**Seminar. Not offered during 2023-2024 academic year.**

Prerequisites: the instructor's permission. Application instructions: women's and gender studies majors and concentrators should e-mail Professor Marcellus Blount (mb33@columbia.edu) with the subject heading "Race and Sexuality seminar." In your message, include basic information: your name, school, major, year of study, and relevant courses taken, along with a brief statement about why you are interested in taking the course.

This undergraduate seminar draws upon feminist, African American, and queer theories and cultural practices to explore the relations of male masculinity and queer subjectivities. We will use literature and film, primarily, to provide a critique of normative notions of the binary oppositions of "black" and "gay" that oversimplify the complex social formations that structure racial and queer representations. We will attempt to find a way into discussions of how sexuality studies can enhance discussions of race and gender within the context of African American artistic forms. Cultural theorists include Judith Butler, Jack Halberstam, Karla Holloway, bell hooks, Kobena Mercer, and Robyn Wiegman. Writers and filmmakers will come from diverse canons, including the black feminist tradition of Mae V. Cowdery, Audre Lorde, Toni Morrison, and Dees Rees. This course will pay particular attention to the possibility of black queer texts and critical practices with an emphasis on deconstructing black masculinity through the languages of intimacy. Artists include Melvin Dixon, Thomas Allen Harris, Essex Hemphill, Issac Julien, Randall Kenan, Richard Bruce Nugent, and Marlon Riggs. One fifteen-page essay.

WMST UN3915 GENDER # POWER IN GLOBAL PERSP. 4.00 points.

Enrollment limited to 15.

Prerequisites: Instructor approval required

This seminar considers formations of gender, sexuality, and power as they circulate transnationally, as well as transnational feminist movements that have emerged to address contemporary gendered inequalities. Topics include political economy, colonialism/postcoloniality, war, refugees, global care chains, sexuality, sex and care work. Required for the major in Women's, Gender, and Sexuality Studies (WGSS), but open to non-majors, space permitting. Prerequisite: Either one introductory WGSS course or Critical Approaches to Social and Cultural Theory or Permission of the Instructor

WMST UN3311 FEMINIST THEORY. 4.00 points.

Prerequisites: LIMITED TO 20 BY INSTRUC PERM; ATTEND FIRST CLASS

This course explores the formation of desire, sexuality, and subjectivity through the frameworks of feminist epistemologies (the question of what we can know) and feminist ethics (the question of how to be responsible within our relationships and local and global communities). We will reflect on the tension between the limits of what we can know about ourselves and others and the imperative to care for each other and remain accountable for our individual and collective actions and inaction. We will investigate how our deepest emotions, intimate encounters, and secret fantasies are formed by larger social and political contexts. In turn, we will also question how these intimate relationships with ourselves and our companions may be seen as feminist acts of resistance, disruption, and creation. Objective I: to closely engage diverse feminist perspectives in late-twentieth- and twenty-first-century phenomenology, existentialism, Marxism, queer theory, critical race theory, and psychoanalysis. Objective II: to begin to locate your own feminist perspective within the intersection of your unique experiences and the larger historical and social contexts that form you and which you may seek to transform

WMST V3312 Theorizing Activism. 4 points.

Prerequisites: Critical Approaches or Feminist Theory or permission of instructor.

Helps students develop and apply useful theoretical models to feminist organizing on local and international levels. It involves reading, presentations, and seminar reports. Students use first-hand knowledge of the practices of specific women's activist organizations for theoretical work.

WMST V3522 Senior Seminar II. 4 points.

WMST W3151 Seminar in Sexuality, Gender, Health, and Human Rights. 4 points.

Prerequisites: introductory course in human rights or sexuality/gender studies, and the instructor's permission (please request application from csv1@columbia.edu)

This seminar uses the new scholarship on sexuality to engage with ongoing theoretical conversations and activism on sexuality, rights, gender, and health. Pressed by the increasing recognition of the importance of sexuality in a wide range of rights and advocacy work (for example, HIV/AIDS, sexual and reproductive health, and sexual violence), theorists and advocates alike have struggled with complex, sometimes fluid and elusive nature of sexuality. What is this "sexuality" in need of rights and health? How does it manifest itself across a range of persons and cultures? And how can culturally and historically situated work about sexuality inform and improve legal and advocacy interventions? The seminar also turns a critical eye on recent scholarship, in light of current issues raised by policy interventions and advocacy in many countries and cultures. Finally, the seminar aims to promote dialogue and exchange between academic, activist, and advocacy work.

WMST W3153 Sexing Art Sound. 4 points.

Open to all majors.

This course explores sound-based creative practices as sites where gender, race, and sexuality are always, and sometimes explicitly negotiated. We will study contemporary sound art that variously speaks to inequalities in canon-formation, participates in human rights movements of the late 20th and 21st centuries, and suggests feminist and queer readings of everyday sonic praxis. Readings in feminist theory, critical theory, art history, musicology, and media studies will guide in-class discussion of artworks accessed through on-line archives and New York-based installations. We will also review artist statements, exhibition catalogues, conference programs, on-line media, and journalistic articles. The seminar will address the following questions: What role do sound-based creative practices play in re-/de-/forming raced, gendered, and sexual subjects? What is the place of activism in sound-based arts engaged with feminist and queer politics? Can sound be feminist, queer, Afrofuturist? How should theorists of race, gender, and sexuality address sound in and out of the arts?

WMST V3915 Gender and Power in Transnational Perspective. 4 points.
Not offered during 2023-2024 academic year.

How have development and globalization impacted (and attempted to impact) gender and sexuality around the world? How do gender and sexuality circulate across national, political, and technological borders in the contemporary era of neoliberal globalization? How has feminism itself become part of these increasingly complex cultural circulations, to women's benefit as well as detriment? In addition to linking together what Chandra Mohanty has described as the "One Third" and "Two Thirds" worlds, this discussion-based seminar seeks to reconnect the disparately gendered intimate and global spheres, situating the feminized "private" domains of love, sex, and caring within fields of action such as geopolitics and global political economy. How do formations of gender and sexuality shift when intimate relations are transnationalized? Does the globalization of intimacy exacerbate inequalities of gender, race, class, and nation, or might it also and simultaneously create unexpected opportunities to alleviate these? Under what circumstances does feminism itself get intertwined in circuits of gendered power? In the first part of this class, we will carefully examine issues of gender, sexuality, and development. In the latter, we turn increasingly toward issues of emotion and transnational intimate exchange and emotional labor while situating these encounters within the economic context we discussed in the first section.

WMST W3514 Historical Approaches to Feminist Questions. 4 points.

This class is an introduction to the debates on women that played a dominant role in both the philosophical and literary traditions of the European/Atlantic world from the classical period through the seventeenth-century. Beginning with the works of ancient political theory that actively debated women's political, social, and ethical position in society (chiefly Aristotle, Plato, and Plutarch), the course will address the pan-European books of "Good Women" that served as exemplary case studies, the *querelle des femmes* (or debate on women) that dominated political and humanist discourse of the sixteenth and seventeenth centuries, and the crucial importance of the political analogies between the household and the state and the marital and social contracts in the premodern world (and, indeed, in our own). We will study works from ancient Greece and Rome and medieval and early modern Italy, Spain, France, England, Ethiopia and Mexico, and topics ranging from domestic violence and political resistance theory to transvestitism and lesbianism.

WMST W3625 Memoir and Embodiment. 4 points.
Not offered during 2023-2024 academic year.

Recent decades have witnessed a flood of life writing about the body, much of it by women and much of it about experiences of illness and disability. This development represents a significant change, as autobiography has historically been reserved for the most accomplished and able-bodied among us. Our course will study the rise of what G' Thomas Couser calls "the some body memoir," asking how it revises traditional autobiography as it attempts to carve out literary space for voices and bodies that have not historically been represented in public. We will consider how these new memoirs talk back to doctors and other health care professionals who medicalize the disabled body, as well as social environments that stigmatize and exclude the ill and disabled. We will also ask how race and gender inform stories of illness and disability, as well as investigating differences between physical and mental illness and/or disability. Each week we will read one memoir, paired with other writings meant to prompt discussion and critical examination. In addition to more traditional academic writing, students will also have opportunities to experiment with their own life writing.

WMST W3880 History of Sex in the 'West,' 1789-1967. 4 points.

This course explores the importance of sexuality to modern histories of North America and Western Europe, with particular emphasis on the U.S. and U.K., and secondarily Canada, Germany and France. We will examine changing sexual cultures and their relationship to new gender norms from the late seventeenth century through the mid twentieth century. The emergence and ascendance of concepts of gender, the self, heterosexuality and homosexuality will be examined through political, intellectual, cultural, and social history. The course begins when new attitudes about individual privacy, equality, and freedom first took hold in ways that helped to define the "West" and "modern" attitudes about gender and sex. We will track the continual revisions to, and contestations over, this first sexual revolution through the 1960s, when celebrations and concerns about sexual liberation, hedonism, and the "decline of virtue" came to occupy the center of cultural debates. We will examine the ways in which the study of sexuality intersects with, and offers opportunities to re-think, other major topics in the histories of the 'West,' including the role of state regulation, and ideas about reproduction, racial categories, violence, pleasure and love.

WMST W3890 From Exclusion to Inclusion? Sexuality and Citizenship in American Politics. 4 points.

For much of the 20th century, the American political system excluded lesbians and gay men from full citizenship. This course seeks to understand the political and social forces shaping the transformation of these sex nonconformists from a pariah group into a viable social movement and eventually into a powerful constituency within the Democratic Party. Special emphasis will be placed on the state's role in defining lesbian and gay identities, the ways in which gender and racial diversity have shaped the LGB movement, and the role that partisan electoral strategies played in ushering sexuality to the center of American political conflict.

WMST W3900 Reading and Writing (on) the Body in the Francophone Middle Ages. 3 points.

In this course, we consider the body both as a site for textual production—the animal skin used to make medieval parchment—and as an object of representation in medieval francophone literature. How does the choice of literary genre inflect the presentation of gender? What characterized the corporeality of the medieval hero? How did writers depict themselves and the objects of their desire? When genitalia “speak for themselves,” as in some the medieval fabliaux we will read, what do they say and whose desire do they express? Which bodies are clearly gendered and why? How does bodily metamorphosis intersect with sexual transgression and other kinds of gender trouble?

WMST W3916 Historical Approaches to Feminist Questions. 4 points. Not offered during 2023-2024 academic year.

“Historical Approaches to Feminist Questions” examines issues of gender and sexuality across time and space. We explore how feminist analyses may reorient how we think about the past. We also ask how historical perspectives can bring the contingent and contextual nature of ideas about gender and sexuality into relief. We will consult both primary and secondary historical sources as well as key theoretical texts on the politics of women’s history and the history of sexuality in intersection with other forms of identity and inequality.

WMST W3922 The Jazz Age: fictional representations of Jewish-American and African-America women in the city. 4 points. Not offered during 2023-2024 academic year.

The “Roaring 20s” evokes images of jazz, the flapper, cabarets, Harlem, the bohemian life of Greenwich Village, and a time of greater freedoms for women in the US. All of these images are associated with urban life and have clear racial, class, gender, and sexual connotations. In this course, we will be examining classic Jazz-Age Jewish-American and African-American fiction that presents “New Woman” female protagonists. We will be tracing the differences between the representation of the Jewish-American “New Woman” and the “New Negro Woman,” while discussing what these differences might signify with respect to the positionality of Jewish and black women in the US.

WMST W3940 Queer Theories and Histories. 4 points.

This course examines a genealogy of contemporary debates in queer theory beginning with feminist debates on sexuality and power in the 1970s and moving through critical race theory, the rise of antinormativity, affect theory, and posthumanism. Will fulfill Feminist Theory requirement.

WMST W4300 Advanced Topics in Women's and Gender Studies. 4 points.

Not offered during 2023-2024 academic year.

This seminar considers the family at a historical and socio-technical juncture at which its form is both remarkably flexible and deeply intractable. The course begins with an overview of sociological and feminist scholarship on the family. We then examine how developments stemming from genetic science have spurred the emergence of new reproductive technologies over the last few decades and, in turn, novel forms of procreation and affiliation. To what extent do assisted reproduction practices, such as in vitro fertilization, prenatal diagnosis, and surrogacy, offer novel ways for constituting and conceptualizing the family? Which constituencies benefit from these possibilities, which enable them, and which are constrained by them? To what extent do clinical and reproductive genetics privilege biological relatedness and, therefore, traditional gender ideologies? How is the family now simultaneously case as a source of (health) risk, a necessary resource for optimal (healthy) living, and a volitional social form? We will take up these questions against the backdrop of forms of kin-keeping sociality (family reunions, genealogy, etc.), on the one hand, and, on the other hand, “biosociality” and biological affinity. Readings include works by Carsten, Engels, Franklin & McKinnon, Furstenberg, Nelkin, Povinelli, Katz Rothman, Strathern and Weston.

WMST W4301 Early Jewish Women Immigrant Writers: 1900-1939. 4 points.

BC: Fulfillment of General Education Requirement: Literature (LIT). Enrollment limited to 15.

Prerequisites: students must attend first day of class and admission will be decided then.

Covers significant pre-Holocaust texts (including Yiddish fiction in translation) by U.S. Ashkenazi women and analyzes the tensions between upholding Jewish identity and the necessity and/or inevitability of integration and assimilation. It also examines women’s quests to realize their full potential in Jewish and non-Jewish communities on both sides of the Atlantic.

WMST W4302 The Second Wave and Jewish Women's Artistic Responses: 1939-1990. 4 points.

BC: Fulfillment of General Education Requirement: Literature (LIT).

Prerequisites: Permission of instructor. Enrollment limited to 13 students.

A study of Jewish women’s fiction, memoirs, art and film in response to the feminist/gender issues raised by the Second Wave. The seminar includes analysis of the writings and artwork of Jo Sinclair, Tillie Olsen, Judy Chicago, Helene Aylon, Elana Dykewomon, Rebecca Goldstein, E.M. Broner and others.

WMST W4303 Gender, Globalization, and Empire. 4 points.

BC: Fulfillment of General Education Requirement: Social Analysis (SOC I).

Prerequisites: Enrollment limited to 20 students.

Study of the role of gender in economic structures and social processes comprising globalization and in political practices of contemporary U.S. empire. This seminar focuses on the ways in which transformations in global political and economic structures over the last few decades including recent political developments in the U.S. have been shaped by gender, race, sexuality, religion and social movements.

WMST W4304 Gender and HIV/AIDS. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: Permission of instructor. Enrollment limited to 15 students.

An interdisciplinary exploration of feminist approaches to HIV/AIDS with emphasis on the nexus of science and social justice.

WMST W4305 Feminist Postcolonial Theory. 4 points.

Prerequisites: Critical Approaches and/or permission of instructor. Enrollment limited to 20 students.

Examines important concerns, concepts and methodological approaches of postcolonial theory, with a focus on feminist perspectives on and strategies for the decolonization of Eurocentric knowledge-formations and practices of Western colonialism. Topics for discussion and study include orientalism, colonialism, nationalism and gender, the politics of cultural representations, subjectivity and subalternity, history, religion, and contemporary global relations of domination.

WMST W4307 Sexuality and the Law. 4 points.
Not offered during 2023-2024 academic year.

Prerequisites: Because this seminar emphasizes weekly discussion and examination of the readings, enrollment is strictly limited to 20 students. Please read and follow the updated instructions: 1) Interested students must write a 50-100 word essay answering the following question: "What background, experience or expertise do you bring to the discussion of Sexuality and the Law that will help inform and challenge the other 19 students in the class?"; 2) Include the following: your name, institution you are graduating from, year of graduation, declared major, and whether you are working towards a Women's Studies major or minor; 3) Send your information and essay through email with the subject line "Barnard Sexuality & the Law"; 4) Send your email to Riya Ortiz, WS Department Assistant, at sortiz@barnard.edu no later than Wednesday, September 1, 2010. The final list of students who are registered for the course will be announced on Friday, September 3, 12 pm. Classes start on Monday, September 13. (Note: Students who have registered for the course must also submit the essay to guarantee their registration). Explores how sexuality is defined and contested in various domains of law (Constitutional, Federal, State), how scientific theories intersect with legal discourse, and takes up considerations of these issues in family law, the military, questions of speech, citizenship rights, and at the workplace.

WMST W4308 SEXUALITY AND SCIENCE. 4.00 points.

WMST W4309 SEX, GENDER & TRANSGENDER QUERIES. 4.00 points.

WMST W4311 Feminism and Science Studies. 4 points.

Prerequisites: Feminist Theory or permission of instructor. Investigates socially and historically informed critiques of theoretical methods and practices of the sciences. It asks if/how feminist theoretical and political concerns make a critical contribution to science studies.

WMST W4317 Advanced Topics: Gender, Culture, and Rights. 4 points.

The field of human rights, and the adjacent field of international women's rights, have tended to be dominated by activists, lawyers, and policy-makers, many of whom leave unquestioned the underlying assumptions of the discourse of rights and leave unexamined the structural and institutional circuits of rights policy and practice. Those concerned with gender equity have been eager to extend the discourse of human rights to encompass women's rights and sexual rights. Yet they too have only begun to think critically about the conceptual pitfalls and global circuitry of this form of politics. As some social thinkers note, both sides of the term "human rights" are ripe for critical rethinking: the universality implied by the "human" - and by extension "women" or "sexuality" - and the liberalism that makes "rights" the language of choice today in the search for justice. Although feminists and others working in multicultural settings or the international arena often invoke notions of culture, especially in framing dilemmas of intervention in terms of a clash between cultures and universal rights, it is important first to have the theoretical tools to develop adequate understandings of the dynamics of culture and the relationship between culture, social systems, and historical change. This course will explore what theories of culture and ethnographies of particular communities, as well as other forms of regional knowledges, including the historical, can contribute to our thinking about the relationship between gender rights and culture. While appreciating the instrumental power and emancipatory possibilities of rights discourses in the sphere of gender and sexuality, whether around inequality or violence, it is also crucial to reflect on the recent challenges to this paradigm, especially those that question concepts of culture.

WMST W4320 Queer Theories and Histories. 4 points.

Enrollment limited to 20. **Not offered during 2023-2024 academic year.**

The course will cover a range of (mostly U.S. and mostly 20th-Century) materials that thematize gay, lesbian, bisexual, transgender experience and identity. We will study fiction and autobiographical texts, historical, psychoanalytic, and sociological materials, queer theory, and films, focusing on modes of representing sexuality and on the intersections between sexuality and race, ethnicity, class, gender, and nationality. We will also investigate connections between the history of LGBT activism and current events. Authors will include Foucault, Freud, Butler, Sedgwick, Anzaldúa, Moraga, Smith. Students will present, and then write up, research projects of their own choosing.

WMST W4506 Gender Justice. 3 points.

This course will provide an introduction to the concrete legal contexts in which issues of gender and justice have been articulated, disputed and hesitatingly, if not provisionally, resolved. Readings will cover issues such as Workplace Equality, Sexual Harassment, Sex Role Stereotyping, Work/Family Conflict, Marriage and Alternatives to Marriage, Compulsory Masculinity, Parenting, Domestic Violence, Reproduction and Pregnancy, Rape, Sex Work & Trafficking. Through these readings we will explore the multiple ways in which the law has contended with sexual difference, gender-based stereotypes, and the meaning of equality in domestic, transnational and international contexts. So too, we will discuss how feminist theorists have thought about sex, gender and sexuality in understanding and critiquing our legal system and its norms.
